The quantities of purchase commitments should be reviewed in the light of current and prospective demand, as indicated by past operations, the backlog of sales orders, and current conditions within the industry. If quantities on order appear excessive by these standards, the auditors should seek full information on this phase of operations. Purchase commitments may need to be disclosed in the financial statements.

**Sales commitments** are indicated by the client's *backlog* of unfilled sales orders. Losses inherent in firm sales commitments are generally recognized in the lower-of-cost-or-market valuation of inventories, with *market* being defined as the net realizable value of the goods in process or finished goods inventories applicable to the sales commitments. In addition, the backlog may include sales orders for which no production has been started as of the balance sheet date. The auditors should review the client's cost estimates for these sales orders. If estimated total costs to produce the goods ordered exceed fixed sales prices, the indicated loss and a related liability should be recorded in the client's financial statements for the current period.

Primary Audit  
Objectives:

Presentation ☒

## 10. Evaluate Financial Statement Presentation of Inventories and Cost of Goods Sold, Including the Adequacy of Disclosure.

One of the most important factors in proper presentation of inventories in the financial statements is disclosure of the inventory pricing method or methods in use. Other important disclosures include the following:

- Changes in methods of valuing inventory, with the dollar effect and justification for the change reported.
- The various classifications of inventory, such as finished goods, work in process, and raw materials.
- The details of any arrangements relating to any pledged inventory.
- Deduction of valuation allowance for inventory losses.
- Existence and terms of inventory purchase commitments.

The auditors will review the client's disclosures of such matters to determine whether they comply with generally accepted accounting principles.

### Problems Associated with Inventory of First-Year Audit Clients

The need for the auditors to be present to observe the taking of the ending inventory has been strongly emphasized in auditing literature. However, the figure for beginning inventory is equally significant in determining the cost of goods sold and the net income for the year. In the initial audit of a client, the auditors may not have been present to observe the taking of inventory at the beginning of the year. What procedures can they follow to obtain evidence that the beginning inventories are fairly stated?

The first factor to consider is whether another CPA firm audited the client for the preceding year. If a review of the predecessor firm's working papers indicates compliance with generally accepted auditing standards, the new auditors can accept the beginning inventories with a minimum of investigation. That minimum might include the following steps: (1) study of the inventory valuation methods used, (2) review of the inventory records, (3) review of the inventory sheets used in taking the preceding year's physical inventory, and (4) comparison of the beginning and ending inventories, broken down by product classification.

If there was no satisfactory audit for the preceding year, the investigation of the beginning inventories would include not only the procedures mentioned above but also the following steps: (1) discussion with the person in the client's organization who supervised the physical inventory at the preceding balance sheet date, (2) study of the written instructions used in planning the inventory, (3) tracing of numerous items from the inventory tags or count sheets to the final summary sheets, (4) tests of the perpetual inventory records for the preceding period by reference to supporting documents for receipts and withdrawals, and (5) tests of the overall reasonableness of the beginning inventories in relation to sales, gross profit, and rate of inventory turnover. An investigation along these lines will sometimes give the auditors assurance that the beginning inventory was carefully compiled and reasonable in amount; in other cases, these procedures may raise serious doubts about the validity of the beginning inventory figure. In these latter cases, the auditors will not be able to issue an unqualified opinion as to *statements of income and cash flows*. They may be able, however, to give an unqualified opinion on the *balance sheet*, since this financial statement does not reflect the beginning inventories.

## Chapter Summary

This chapter described details of the controls over inventories and cost of goods sold, the auditors' consideration of these controls, and substantive procedures for inventories and cost of goods sold. To summarize:

1. The audit of inventories presents the auditors with special risks because (a) they often represent a very substantial portion of current assets, (b) numerous valuation methods are used for inventories, (c) the valuation of inventories directly affects cost of goods sold, and (d) the determination of inventory quality, condition, and value is inherently complex.
2. Effective internal control over inventories requires appropriate controls over purchasing, receiving, and issuing supplies and materials, producing and shipping products, and cost accounting. A perpetual inventory system is also important.
3. The auditors' objectives for the substantive procedures for inventories and cost of goods sold are to (a) substantiate the existence of inventories and the occurrence of related transactions; (b) establish the completeness of recorded inventories; (c) verify the cutoff of inventory-related transactions; (d) determine that the client has rights to the recorded inventories; (e) establish the proper valuation of inventories and accuracy of related transactions; and (f) determine that presentation and disclosures of inventory accounts are appropriate.
4. The auditors' consideration of inherent risks and the controls over inventories, purchases, and production will allow them to design appropriate further audit procedures for inventory and cost of goods sold accounts.
5. In the audit of inventories, a primary concern of the auditors is existence assertion, that is, the possibility of overstatement of year-end balances. Therefore, a primary substantive procedure for inventory accounts is observation of the client's physical inventory. Other substantive procedures include price tests of the valuation of inventory items, cutoff tests, analytical procedures, and tests of the financial statement presentation and disclosure.

## Key Terms Introduced or Emphasized in Chapter 12

**Bill and hold transactions (526)** Transactions in which sales of merchandise are billed to customers prior to delivery, with the goods being held by the seller. These transactions may overstate revenues and net income if they do not meet specific requirements for recognition as sales.

**Bill of lading (514)** A document issued by a common carrier acknowledging the receipt of goods and setting forth the provisions of the transportation agreement.

**Consignment (526)** A transfer of goods from the owner to another person who acts as the sales agent of the owner.

**Cost Accounting Standards Board (521)** A five-member board established by Congress to narrow the options in cost accounting that are available under generally accepted accounting principles. Companies having significant supply contracts with certain U.S. government agencies are subject to the cost accounting standards established by the board.

**Electronic data interchange (EDI) (515)** A system in which data are exchanged electronically between the computers of different companies. In an EDI system, source documents are replaced with electronic transactions created in a standard format.

**Job time tickets (513)** A document designed to accumulate the labor and machine time devoted to a particular production order.

**Master production schedule (513)** A schedule that is used to plan overall production for a period of time. The schedule illustrates the gross production of each of the company's products.

**Observation (509)** The auditors' evidence-gathering technique of viewing a client activity to obtain physical evidence of performance.

**Periodic inventory system (509)** A method of accounting in which inventories are determined solely by means of a physical inventory at the end of the accounting period.

**Perpetual inventory system (509)** A method of accounting for inventories in which controlling accounts and subsidiary ledgers are maintained to record receipts and issuances of goods, both in quantities and in dollar amounts. The accuracy of perpetual inventory records is tested periodically by physical inventories.

**Production order (513)** A document that authorizes the production of a specific quantity of a product.

**Purchase commitment (533)** A contractual obligation to purchase goods at fixed prices, entered into well in advance of scheduled delivery dates.

**Sales commitment (533)** A contractual obligation to sell goods at fixed prices, entered into well in advance of scheduled delivery dates.

**Specialist (524)** A person possessing special skill or knowledge in a field other than accounting or auditing, such as a real estate appraiser.

## Review Questions

- 12-1. Many auditors consider the substantiation of the figure for inventory to be a more difficult and challenging task than the verification of most other items on the balance sheet. List several specific factors that support this view.
- 12-2. Explain the significance of the purchase order to adequate internal control over purchase transactions.
- 12-3. What segregation of duties would you recommend to attain maximum internal control over purchasing activities in a manufacturing concern?
- 12-4. Do you believe that the normal review of purchase transactions by the auditors should include examination of receiving reports? Explain.
- 12-5. The client's cost accounting system is often an important part of the CPAs' audit of the financial statements of a manufacturing company. For what purposes do the auditors consider the cost accounting system?
- 12-6. What part, if any, do the independent auditors play in the planning for a client's physical inventory?
- 12-7. What are the purposes of the auditors' observation of the taking of the physical inventory? (Do not discuss the procedures or techniques involved in making the observation.)
- 12-8. For what purposes do the auditors make and record test counts of inventory quantities during their observation of the taking of the physical inventory? Discuss.
- 12-9. Once the auditors have completed their test counts of the physical inventory, will they have any reason to make later reference to the inventory tags used by the client's employees in the counting process? Explain.
- 12-10. When perpetual inventory records are maintained, is it necessary for a physical inventory to be taken at the balance sheet date? Explain.
- 12-11. What is meant by a "bill and hold" scheme?
- 12-12. What charges and credits may be disclosed in the auditors' analysis of the Cost of Goods Sold account of a manufacturing concern?

- 12-13. A client company wishes to conduct its physical inventory on a sampling basis. Many items will not be counted. Under what general conditions will this method of taking inventory be acceptable to the auditors?
- 12-14. Hana Ranch Company, which has never been audited, is asked on October 1 by its bank to arrange for a year-end audit. The company retains you to make this audit and asks what measures, if any, it should take to ensure a satisfactory year-end physical inventory. Perpetual inventories are not maintained. How would you answer this inquiry?
- 12-15. "A well-prepared balance sheet usually includes a statement that the inventories are valued at cost." Evaluate this quotation.
- 12-16. Darnell Equipment Company uses the LIFO method of valuation for part of its inventories and weighted-average cost for another portion. Would you be willing to issue an unqualified opinion under these circumstances? Explain.
- 12-17. "If the auditors can determine that all goods in the physical inventory have been accurately counted and properly priced, they will have discharged fully their responsibility with respect to inventory." Evaluate this statement.
- 12-18. How do the independent auditors use the client's backlog of unfilled sales orders in the examination of inventories?
- 12-19. The controller of a new client company informs you that most of the inventories are stored in bonded public warehouses. He presents warehouse receipts to account for the inventories. Will careful examination of these warehouse receipts constitute adequate verification of these inventories? Explain.
- 12-20. Enumerate specific steps to be taken by the auditors to ascertain that a client's inventories have not been pledged or subjected to a lien of any kind.

## Questions Requiring Analysis

- 12-21. Nolan Manufacturing Company retains you on April 1 to perform an audit for the fiscal year ending June 30. During the month of May, you make extensive studies of internal control over inventories.

All goods purchased pass through a receiving department under the direction of the chief purchasing agent. The duties of the receiving department are to unpack, count, and inspect the goods. The quantity received is compared with the quantity shown on the receiving department's copy of the purchase order. If there is no discrepancy, the purchase order is stamped "OK—Receiving Dept." and forwarded to the accounts payable section of the accounting department. Any discrepancies in quantity or variations from specifications are called to the attention of the buyer by returning the purchase order to him with an explanation of the circumstances. No records are maintained in the receiving department, and no reports originate there.

As soon as goods have been inspected and counted in the receiving department, they are sent to the factory production area and stored alongside the machines in which they are to be processed. Finished goods are moved from the assembly line to a storeroom in the custody of a stock clerk, who maintains a perpetual inventory record in terms of physical units but not in dollars.

What weaknesses, if any, do you see in the internal control over inventories?

**LO 12-1, 2, 6**

- 12-22. Many companies employ outside service companies that specialize in counting, pricing, extending, and footing inventories. These service companies usually furnish a certificate attesting to the value of the physical inventory.

*Required:*

Assuming that the service company took the client company's inventory on the balance sheet date:

- a. How much reliance, if any, can the auditors place on the inventory certificate of outside specialists?
- b. What effect, if any, would the inventory certificate of outside specialists have upon the type of report the auditors would render? Discuss.
- c. What reference, if any, would the auditors make to the certificate of outside specialists in their audit report?

(AICPA, adapted)

- LO 12-6** 12-23. The observation of a client's physical inventory is a mandatory auditing procedure when possible for the auditors to carry out and when inventories are material.

*Required:*

- Why is the observation of physical inventory a mandatory auditing procedure? Explain.
- Under what circumstances is observation of physical inventory impossible?
- Why is the auditors' review of the client's control of inventory tags important during the observation of physical inventory? Explain.

- LO 12-1, 6** 12-24. During your observation of the November 30, 20X0, physical inventory of Jay Company, you note the following unusual items:

- Electric motors in finished goods storeroom not tagged. Upon inquiry, you are informed that the motors are on consignment to Jay Company.
- A cutting machine (one of Jay's principal products) in the receiving department, with a large "REWORK" tag attached.
- A crated cutting machine in the shipping department, addressed to a nearby U.S. naval base, with a Department of Defense "Material Inspection and Receiving Report" attached, dated November 30, 20X0, and signed by the Navy Source Inspector.
- A small, isolated storeroom with five types of dusty raw materials stored therein. Inventory tags are attached to all of the materials, and your test counts agree with the tags.

*Required:*

What additional procedures, if any, would you carry out for each of the above? Explain.

- LO 12-2, 6** 12-25. One of the problems faced by the auditors in their verification of inventory is the risk that slow-moving and obsolete items may be included in the goods on hand at the balance sheet date. In the event that such items are identified in the physical inventory, their carrying value should be written down to an estimated scrap value or other recoverable amount.

Prepare a list of the auditing procedures that the auditors should employ to determine whether slow-moving or obsolete items are included in the physical inventory.

- LO 12-1, 6** 12-26. You are engaged in the audit of Reed Company, a new client, at the end of its first fiscal year, June 30, 20X1. During your work on inventories, you discover that all of the merchandise remaining in stock on June 30, 20X1, had been acquired July 1, 20X0, from Andrew Reed, the sole shareholder and president of Reed Company, for an original selling price of \$10,000 cash and a note payable due July 1, 20X3, with interest at 15 percent, in the amount of \$90,000. The merchandise had been used by the president when he operated a similar business as a sole proprietor.

How can you verify the pricing of the June 30, 20X1, inventory of Reed Company? Explain.

- LO 12-2, 6** 12-27. Many CPAs are sharing information over the Internet. Auditnet is an Internet site that contains audit programs donated by various CPAs. Auditnet's address is [www.auditnet.org](http://www.auditnet.org). You can get to the audit programs by registering for the free material.

- Select the inventory program, and summarize the procedures for testing inventory cutoff.
- Describe the inspection procedures done by the auditors when they arrive at an inventory location for their observation.

- LO 12-6** 12-28. Grandview Manufacturing Company employs standard costs in its cost accounting system. List the audit procedures that you would apply to ascertain that Grandview's standard costs and related variance amounts are acceptable and have not distorted the financial statements. (Confine your audit procedures to those applicable to raw materials.)

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 12-29. Multiple Choice Questions

Select the best answer for each of the following and explain fully the reason for your selection.

**LO 12-2**

- Which of the following is *least* likely to be among the auditors' objectives in the audit of inventories and cost of goods sold?
  - Determine that the valuation of inventories and cost of goods sold is arrived at by appropriate methods.

- (2) Determine the existence of inventories and the occurrence of transactions affecting cost of goods sold.
- (3) Establish that the client includes only inventory on hand at year-end in inventory totals.
- (4) Establish the completeness of inventories.

LO 12-3, 5

b. The receiving department is *least* likely to be responsible for the:

- (1) Determination of quantities of goods received.
- (2) Detection of damaged or defective merchandise.
- (3) Preparation of a shipping document.
- (4) Transmittal of goods received to the store's department.

LO 12-3, 5

c. The document issued by a common carrier acknowledging the receipt of goods and setting forth the provisions of the transportation agreement is the:

- (1) Bill of lading.
- (2) Job time shipping.
- (3) Production order.
- (4) Production schedule.

LO 12-3, 5

d. Which of the following should be included as a part of inventory costs of a manufacturing company?

	Direct Labor	Raw Materials	Factory Overhead
(1)	Yes	Yes	Yes
(2)	Yes	No	No
(3)	No	Yes	No
(4)	No	No	No

LO 12-3, 5

e. The organization established by Congress to narrow the options in cost accounting that are available under generally accepted accounting principles is the:

- (1) Cost Accounting Standards Board.
- (2) Financial Accounting Standards Board.
- (3) Public Company Accounting Oversight Board.
- (4) Securities and Exchange Commission.

LO 12-2, 4

f. When a primary risk related to an audit is possible overstated inventory, the assertion most directly related is:

- (1) Existence.
- (2) Completeness.
- (3) Clarity.
- (4) Presentation.

LO 12-5

g. Instead of taking a physical inventory count on the balance-sheet date, the client may take physical counts prior to the year-end if internal control is adequate and:

- (1) Well-kept records of perpetual inventory are maintained.
- (2) Inventory is slow-moving.
- (3) Computer error reports are generated for missing prenumbered inventory tickets.
- (4) Obsolete inventory items are segregated and excluded.

LO 12-5, 6

h. The auditor's analytical procedures will be facilitated if the client:

- (1) Uses a standard cost system that produces variance reports.
- (2) Segregates obsolete inventory before the physical inventory count.
- (3) Corrects material weaknesses in internal control before the beginning of the audit.
- (4) Reduces inventory balances to the lower of cost or market.

**LO 12-4, 5, 6**

- i. When perpetual inventory records are maintained in quantities and in dollars, and internal control over inventory is weak, the auditor would probably:
- (1) Want the client to schedule the physical inventory count at the end of the year.
  - (2) Insist that the client perform physical counts of inventory items several times during the year.
  - (3) Increase the extent of tests for unrecorded liabilities at the end of the year.
  - (4) Have to disclaim an opinion on the income statement for that year.

**LO 12-3, 6**

- j. Which of the following is the best audit procedure for the discovery of damaged merchandise in a client's ending inventory?
- (1) Compare the physical quantities of slow-moving items with corresponding quantities in the prior year.
  - (2) Observe merchandise and raw materials during the client's physical inventory taking.
  - (3) Review the management's inventory representations letter for accuracy.
  - (4) Test overall fairness of inventory values by comparing the company's turnover ratio with the industry average.

**LO 12-5, 6**

- k. McPherson Corp. does not make an annual physical count of year-end inventories, but instead makes weekly test counts on the basis of a statistical plan. During the year, Sara Mullins, CPA, observes such counts as she deems necessary and is able to satisfy herself as to the reliability of the client's procedures. In reporting on the results of her examination, Mullins:
- (1) Can issue an unqualified opinion without disclosing that she did not observe year-end inventories.
  - (2) Should comment in the scope paragraph as to her inability to observe year-end inventories, but can nevertheless issue an unqualified opinion.
  - (3) Is required, if the inventories are material, to disclaim an opinion on the financial statements taken as a whole.
  - (4) Should, if the inventories are material, qualify her opinion.

**LO 12-2, 6**

- l. The primary objective of a CPA's observation of a client's physical inventory count is to:
- (1) Discover whether a client has counted a particular inventory item or group of items.
  - (2) Obtain direct knowledge that the inventory exists and has been properly counted.
  - (3) Provide an appraisal of the quality of the merchandise on hand on the day of the physical count.
  - (4) Allow the auditor to supervise the conduct of the count in order to obtain assurance that inventory quantities are reasonably accurate.

**LO 12-6 12-30 Adapted AICPA Task-Based Simulation**

During year 1 audit of Cellenting Co., the auditor performed various procedures relating to inventory. Match each of the following procedures with the description below:

Audit procedures

- Analytical procedure
- External confirmation
- Inquiry
- Inspection of records or documents
- Inspection of tangible assets
- Observation
- Recalculation
- Repurchase

(Each audit procedure may be used once, more than once, or not at all.)

Description of Audit Procedures Performed	Type of Audit Procedure
a. During the physical inventory count, the auditor asked the client to open various boxes of inventory items so she was able to assess the quality of the item.	
b. During a site visit to a construction site, the auditor determined that all employees were wearing proper safety equipment.	
c. The auditor asked the warehouse manager about whether certain inventory items were becoming obsolete.	
d. The auditor obtained a purchase order from the purchase order file and compared it to the authorized supplier list to determine that the related goods had been purchased from an approved supplier.	
e. The auditor calculated the accounts receivable turnover for the year.	
f. The auditor obtained a copy of the company's accounting manual and read the section on inventory to prepare for the physical inventory observation.	
g. The auditing firm's computer assisted audit specialist obtained an electronic inventory file from the company and checked the accuracy of the extensions and footings.	

**LO 12-4** 12-31. **Adapted AICPA Task-Based Simulation**

For each of the independent situations described below select the appropriate inherent risk factor described and the effect of the inherent risk factor on the company's net income using the following:

Inherent Risk Factor	Effect on Net Income
(1) Complexity	(7) Overstatement
(2) Estimates	(8) Understatement
(3) Industry circumstances	(9) No effect
(4) Other external circumstances	
(5) Susceptibility of asset to theft	
(6) Volume	

Situation	Inherent Risk Factor	Effect of Inherent Risk Factor on Company's Net Income
a. Sales orders for an textbook distributor have increased 100% over the last year. Additionally, the company's inventory turnover has doubled since the previous year.		
b. Gold Miner, Inc. has gold mines in a number of states. To hedge the price of its gold inventory, Gold Miner purchases gold futures contracts.		
c. Metal, Inc. supplies copper pipes to home builders. During year 1, copper prices doubled. At any given time, a significant amount of inventory is in transit or located at job sites.		
d. Joe's Computers provides three-year money back warranties on all laptops. During year 1, warranty claims decreased significantly and the company has not reduced the warranty reserve.		
e. Global Co. imports most of its products from a foreign supplier. During year 1, a new technology made part of the Global Co. inventory obsolete.		

**LO 12-5, 6** 12–32. **Simulation**

Andy Watson, CPA, is a senior auditor on the audit of Carlson, Inc. Andy is reviewing the results of analytical procedures related to inventory. For results (a), (b), and (c), select the explanation that is most likely to be consistent with the change described. Explanations may be used once, more than once, or not at all.

*Explanation:*

- (1) Inventory increased as of year-end.
  - (2) Debt outstanding increased.
  - (3) A larger percentage of sales occurred during the last month of 20X8, as compared to 20X7.
  - (4) Interest expense increased during 20X8 due to the acquisition of new debt.
  - (5) The percentage tax included in the provision for income taxes for 20X8 is less than the percentage used in 20X7.
  - (6) Increases in costs of purchases were not completely passed on to customers through higher selling prices.
  - (7) Owners' equity increased due to retention of profits.
  - (8) Interest expense increased during 20X8.
  - (9) A significant amount of long-term debt became current at the end of 20X8.
- a. Inventory turnover (as measured by cost of goods sold/ending inventory) went from 7.95 in 20X7 to 10.52 in 20X8. Which of the explanations is consistent with the change in inventory turnover?
  - b. Net income increased in 20X8. Which of the explanations is most consistent with the changes in net income?
  - c. The gross profit percentage (gross profit/revenue) changed from .166 in 20X7 to .154 in 20X8. Which of the explanations is consistent with the change in gross profit percentage?

*Note: Section (d) is possible to work in a meaningful way only if you have the AICPA professional standards available—preferably in electronic form.*

- d. Auditors ordinarily should observe the counting of inventories that are on hand. Use the professional standards to find this requirement and the related guidance. Provide the AICPA AU-C section that includes the guidance.

**LO 12-1, 3, 4, 5, 6** 12–33. **Simulation**

Auditors often observe the counting of their clients' inventories. You are working in the area of inventory with a new assistant on the audit of Jilco Inc. The assistant has a number of questions concerning inventory and the observation of inventory. Please reply "yes" or "no" to answer the following questions. Provide your rationale.

**Statement**

- a. With strong internal control, may Jilco Inc.'s inventory count be performed during the year rather than at year end?
- b. Jilco Inc. has inventory at many locations. Do we need to be present for the count at all locations?
- c. Must I document all my test counts in the working papers?
- d. Am I correct that our observation of the counting of the inventory primarily addresses the existence of inventory, and not the completeness of the count?
- e. Is it correct that, since Jilco Inc. manufactures a product, direct labor and overhead ordinarily become a part of inventory costs?
- f. Should Jilco's inventory be valued at the lower of standard cost or market?
- g. Is it safe to assume that any inventory items present as "consigned in" should not be included in the clients' inventory?
- h. When I take test counts of items, does this eliminate the need for Jilco Inc. personnel to count those items?
- i. Do I need to count all items in the inventory?
- j. At the completion of the count, should I leave Jilco Inc. personnel with a copy of all my inventory test counts to help assure inventory accuracy?

LO 12-2, 5, 6 12–34. Multiple Choice Questions

- a. An auditor most likely would make inquiries of production and sales personnel concerning possible obsolete inventory to address:
  - (1) Valuation.
  - (2) Rights.
  - (3) Existence.
  - (4) Presentation.
- b. An auditor selects items from the client’s inventory listing and identifies the items in the warehouse. This procedure is most likely related to:
  - (1) Rights.
  - (2) Completeness.
  - (3) Existence.
  - (4) Valuation.
- c. An auditor concluded that no excessive costs for an idle plant were charged to inventory. This conclusion is most likely related to presentation and disclosure and:
  - (1) Valuation.
  - (2) Completeness.
  - (3) Existence.
  - (4) Rights.
- d. During the inventory count an auditor selects items and determines that the proper description and quantity were recorded by the client. This procedure is most closely related to:
  - (1) Rights.
  - (2) Completeness.
  - (3) Existence.
  - (4) Valuation.
- e. An auditor most likely would analyze inventory turnover rates to obtain evidence about:
  - (1) Existence.
  - (2) Rights.
  - (3) Presentation.
  - (4) Valuation.

Problems

All applicable problems are available with McGraw-Hill’s *Connect® Accounting*. 

- LO 12-3, 4, 5, 6 12–35. Described below are potential financial statement misstatements that are encountered by auditors.
- a. Inventory is understated because warehouse personnel overlooked several racks of parts in taking the physical inventory.
  - b. Inventory is overstated because warehouse personnel included inventory items received subsequent to year-end while recording the purchase in the subsequent year to hide inventory shortages.
  - c. Inventory is overstated because management instructed computer personnel to make changes in the file used to price inventories.

*Required:* For each misstatement, identify whether the misstatement results from error or fraud, the type of controls that would serve to prevent or detect the misstatement, and the substantive procedures that might be used by the auditors to detect the misstatement. Organize your answer as follows:

Misstatement	Error or Fraud	Control	Substantive Procedure
a.			

- LO 12-1, 3, 4, 5, 6 12–36. Williams Pharmaceutical Company produces a number of drugs that are regulated by various agencies, including, in the United States, the federal Food and Drug Administration (FDA). These agencies issue licenses that approve drugs for sale and establish specific regulations regarding production quality and inventory security, violations of which can result in fines or the suspension of product licenses. All the drugs are protected under patents filed in various jurisdictions, and Williams markets the drugs in the United States as well as in a number of other countries. The company faces significant competition from other pharmaceutical companies globally.
- a. Identify three business risks that are faced by Williams with respect to production processes and inventories.

- b. For each of the risks identified in part (a), state whether the business risk results in a current-period inherent risk of material misstatement of the financial statements (financial reporting risk). If the business risk results in a financial reporting risk, describe that risk in terms of the type of financial statement misstatement that could occur.
- c. Provide examples of how Williams's management might mitigate the risks (e.g., specific controls) identified in part (b) as financial reporting risks.
- d. For each risk identified in part (b) as a financial reporting risk, describe substantive auditing procedures that might be used by the auditors if management did not have controls to mitigate the risk.

- LO 12-4, 6** 12-37. Described below are potential financial statement misstatements that are encountered by auditors in the audit of inventory and cost of goods sold.
- a. Management of a chain of discount department stores systematically overstates inventory quantities at selected locations.
  - b. Accounting personnel of a manufacturing company make computational errors that understate the production costs of certain inventory items.
  - c. Management of a computer reseller overstates inventory value by failing to recognize the loss in value of certain inventory items that are obsolete.
  - d. Production personnel for a high-tech manufacturing company include in inventory items that failed to meet essential quality standards.

*Required:*

For each misstatement, describe the substantive auditing procedures that may be used by auditors to detect the misstatement. Organize your answer as shown below:

Misstatement	Audit Procedures
--------------	------------------

a.

- LO 12-3, 5, 6** 12-38. The following are typical questions that might appear on an internal control questionnaire for inventory:
1. Are written procedures prepared by the client for the taking of the physical inventory?
  2. Do the client's inventory-taking procedures include a requirement to identify damaged inventory items?
  3. Does the client maintain perpetual inventory records?

*Required:*

- a. Describe the purpose of each of the above controls.
- b. Describe the manner in which each of the above procedures might be tested.
- c. Assuming that the operating effectiveness of each of the above procedures is found to be inadequate, describe how the auditors might alter their substantive procedures to compensate for the increased level of risk.

- LO 12-3, 5, 6** 12-39. You are involved in your CPA firm's first audit of Zorostris, a retailer of artwork, primarily paintings and photographs purchased from artists in Southeast Asia (particularly Vietnam, Cambodia, and Laos). Zorostris has stores in seven cities throughout the United States, Mexico, and Canada.

Discuss difficulties you should anticipate in planning the observation of physical inventory on this engagement because of:

- a. The different locations of stores.
- b. The nature of artwork.
- c. Assume that Zorostris's records indicate that it shipped goods on December 31 for a very major sale to a customer in Edmonton, Alberta, Canada.
  - (1) Since it was shipped as of December 31, does this represent a sale for the year ended on that date?
  - (2) What additional audit steps could be taken to determine that the sale is valid?

- LO 12-3, 5, 6** 12-40. You are an audit manager of the rapidly growing CPA firm of Raye and Coye. You have been placed in charge of three new audit clients, which have the following inventory features:

1. Canyon Cattle Co., which maintains 15,000 head of cattle on a 1,000-square-mile ranch, mostly unfenced, near the south rim of the Grand Canyon in Arizona.
2. Rhoads Mfg. Co., which has raw materials inventories consisting principally of pig iron loaded on gondola freight cars on a siding at the company's plant.

# In-Class Team Case

LO 12-1, 2, 6

*Required:*

3. Strawser Company, which is in production around the clock on three shifts, and which cannot shut down production during the physical inventory.

What problems do you anticipate in the observation of physical inventories of the three new clients, and how would you deal with the problems?

LO 12-2, 6

12-41.

Smith is the partner in charge of the audit of Blue Distributing Corporation, a wholesaler that owns one warehouse containing 80 percent of its inventory. Smith is reviewing the working papers that were prepared to support the firm's opinion on Blue's financial statements, and Smith wants to be certain essential audit records are well documented.

*Required:*

What substantive procedures should Smith expect to find in the working papers to document management's assertion about completeness as it relates to the inventory quantities at the end of the year?

(AICPA, adapted)

12-42.

Hovington, CPA, knows that while audit objectives relating to inventories may be stated in terms of the assertions as presented in this chapter, they may also be subdivided and stated more specifically. He has chosen to do so and has prepared the second column of the following table.

Financial Statement Assertion	Specific Audit Objective	Audit Procedure
	1. The entity has legal title to inventories.	
	2. Recorded inventory quantities include all products on hand.	
	3. Inventories are reduced, when appropriate, to replacement cost or net realizable value.	
	4. Cost of inventories is properly calculated.	
	5. The major categories of inventories and their basis of valuation are adequately reported in the financial statements.	

*Required:*

Assume that Hovington's client, a retail department store, does no production. For each specific inventory audit objective listed above, select the most closely related financial statement assertion and the most appropriate audit procedure from the following:

Financial Statement Assertion	Audit Procedure
A. Completeness and cutoff	F. Examine current vendors' price lists.
B. Existence or occurrence	G. Review drafts of the financial statements.
C. Presentation and disclosure	H. Select a sample of items during the physical inventory count and determine that they have been included on count sheets.
D. Rights and obligations	I. Select a sample of recorded items and examine supporting vendors' invoices and contracts.
E. Valuation and accuracy	J. Select a sample of recorded items on count sheets during the physical inventory count and determine that items are on hand.
	K. Test reasonableness of direct labor rates.

Financial statement assertions and audit procedures may be selected once, more than once, or not at all.

# Ethics Case

LO 12-1, 5, 6

12-43.

You have been with Zaird & Associates for approximately three months and are completing your work on the BizCaz audit. BizCaz produces pullover knit shirts to address the business casual market for both men and women. Although your experience has been limited, an unexpected staff resignation has resulted in your working directly with the engagement's in-charge senior on inventory. This has been a learning experience for you, because you have helped perform various tests of controls which may be summarized as indicating that internal control

over inventory (including the perpetual records) seems strong. It is your impression that those tests resulted in a decrease in substantive procedures, thereby allowing a particularly efficient audit.

At the beginning of the audit, Jan Wheeler, the in-charge senior, told you that the management team of BizCaz has always been helpful and friendly. Throughout the audit, you have found the situation to be as good as described. In fact, BizCaz allows each auditor to purchase up to three shirts at a particularly attractive price of \$12 per shirt, the cost for which employees may purchase shirts. The shirts have a market value of around \$50, although the direct labor and material costs of each shirt are only \$10.

Near the conclusion of the audit, after you and the other three staff members paid the controller and told him your sizes, he walked to the warehouse, removed 12 shirts from the appropriate piles, and brought them out. That evening you gave the situation some thought. On the one hand, the company didn't lose any money on your purchase of the shirts—but on the other hand, you would never have been able to purchase such high-quality clothes for such a low price.

*Required:*

1. Is it acceptable to purchase these shirts from the audit client in this manner?
2. Discuss the effect of any information presented in the case on the adequacy of the audit.

## Research and Discussion Case

LO 12-1, 6

- 12–44. Western Trading Company is a sole proprietorship engaged in the grain brokerage business. On December 31, 20X0, the entire grain inventory of the company was stored in outside bonded warehouses. The company's procedure of pricing inventories in these warehouses includes comparing the actual cost of each commodity in inventory with the market price as reported for transactions on the commodity exchanges at December 31. A write-down is made on commodities in which cost is in excess of market. During the course of the 20X0 audit, the auditors verified the company's computations. In addition to this, they compared the book value of the inventory with market prices at February 15, 20X1, the last day of fieldwork. The auditors noted that the market prices of several of the commodities had declined sharply subsequent to year-end, until their market price was significantly below the commodities' book values.

The inventory was repriced by the auditors on the basis of the new market prices, and the book value of the inventory was found to be in excess of market value on February 15 by approximately \$21,000. The auditors proposed that the inventories be written down by \$17,000 to this new market value, net of gains on the subsequent sales. The management protested this suggestion, stating that in their opinion the market decline was only temporary and that prices would recover in the near future. They refused to allow the write-down to be made. Accordingly, the auditors qualified their audit opinion for a departure from generally accepted accounting principles.

*Required:*

- a. Were the auditors justified in issuing a qualified opinion in this situation? Discuss fully, including alternative courses of action.
- b. State your opinion as to the course of action that was appropriate in this situation.

# Property, Plant, and Equipment: Depreciation and Depletion

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 13-1** Describe the nature of property, plant, and equipment and depreciation.
- LO 13-2** Identify the auditors' objectives in the audit of property, plant, and equipment.
- LO 13-3** Explain the fundamental controls over property, plant, and equipment.
- LO 13-4** Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to property, plant, and equipment.
- LO 13-5** Obtain an understanding of internal control over property, plant, and equipment.
- LO 13-6** Assess the risks of material misstatement of property, plant, and equipment and design further audit procedures, including tests of controls and substantive procedures, to address the risks.
- LO 13-7** Explain the auditors' approach to the audit of depreciation.
- LO 13-8** Describe how the auditors design audit procedures to audit intangible assets.

### LO 13-1

Describe the nature of property, plant, and equipment and depreciation.

The term *property, plant, and equipment* includes all tangible assets with a service life of more than one year that are used in the operation of the business and are not acquired for the purpose of resale. Three major subgroups of such assets are generally recognized:

1. *Land*, such as property used in the operation of the business, has the significant characteristic of not being subject to depreciation.
2. *Buildings, machinery, equipment, and land improvements*, such as fences and parking lots, have limited service lives and are subject to depreciation.
3. *Natural resources* (wasting assets), such as oil wells, coal mines, and tracts of timber, are subject to depletion as the natural resources are extracted or removed.

Acquisitions and disposals of property, plant, and equipment are usually large in dollar amount, but concentrated in only a few transactions. Individual items of plant and equipment may remain unchanged in the accounts for many years.

## Property, Plant, and Equipment

### The Auditors' Objectives in Auditing Property, Plant, and Equipment

The auditors' *objectives* in the audit of property, plant, and equipment are to:

1. Use the understanding of the client and its environment to consider *inherent risks*, including fraud risks, related to property, plant, and equipment.
2. Obtain an understanding of *internal control* over property, plant, and equipment.
3. Assess the risks of material misstatement and design tests of controls and substantive procedures that:
  - a. Substantiate the *existence* of property, plant, and equipment and the occurrence of the related transactions.
  - b. Establish the *completeness* of recorded property, plant, and equipment.
  - c. Verify the *cutoff* of transactions affecting property, plant, and equipment.
  - d. Determine that the client has *rights* to the recorded property, plant, and equipment.
  - e. Establish the proper *valuation* or *allocation* of property, plant, and equipment and the *accuracy* of transactions affecting property, plant, and equipment.
  - f. Determine that the *presentation* and *disclosure* of information about property, plant, and equipment are appropriate, including disclosure of depreciation methods.

### LO 13-2

Identify the auditors' objectives in the audit of property, plant, and equipment.

In conjunction with the audit of property, plant, and equipment, the auditors also obtain evidence about the related accounts of depreciation expense, accumulated depreciation, and repairs and maintenance expense.

### Contrast with Audit of Current Assets

In many companies, the investment in plant and equipment amounts to 50 percent or more of the total assets. However, the audit work required to verify these properties is usually a much smaller proportion of the total audit time spent on the engagement. The verification of plant and equipment is facilitated by several factors not applicable to audit work on current assets.

First, a typical unit of property or equipment has a high dollar value, and relatively few transactions may lie behind a large balance sheet amount. Second, there is usually little change in the property accounts from year to year. The Land account often remains unchanged for a long span of years. The durable nature of buildings and equipment also tends to hold accounting activity to a minimum for these accounts. By way of contrast, such current assets as accounts receivable and inventory may have a complete turnover several times a year.

A third point of contrast between the audit of plant assets and the audit of current assets is the significance of the year-end cutoff of transactions on net income. For current assets, the year-end cutoff is a critical issue; for plant assets, it is of lesser importance. For example, in our discussion of inventories in Chapter 12, we emphasized the importance of an accurate year-end cutoff of the transactions for purchases and sales of merchandise. An error in the cutoff of a \$50,000 purchase or sales transaction may cause a \$50,000 error in the year's pretax net income. The possibility of such errors is substantial because a large volume of merchandise transactions is normal at year-end. For plant assets, on the other hand, a year-end cutoff error in recording an acquisition or retirement ordinarily will not affect net income for the year. Moreover, for many companies, there may be no transactions in plant assets occurring at the year-end. Of course, a cutoff error relating to acquisition or retirement of plant assets could cause slight inaccuracies in depreciation or in the timing of gains or losses on disposals. The problem of year-end cutoff for plant assets, however, should be considered of less importance in contrast to the audit of current assets.

### Internal Control over Plant and Equipment

#### LO 13-3

Explain the fundamental controls over property, plant, and equipment.

The amounts invested in plant and equipment represent a large portion of the total assets of many industrial concerns. Maintenance, rearrangement, and depreciation of these assets are major expenses in the income statement. The total expenditures for the assets and related expenses make strong internal control essential to the preparation of reliable financial statements. Errors in measurement of income may be material if assets are scrapped without their cost being removed from the accounts, or if the distinction between capital and revenue expenditures is not maintained consistently. The losses that inevitably arise from uncontrolled methods of acquiring, maintaining, and retiring plant and equipment are often greater than the losses from fraud in cash handling.

In large enterprises, the auditors may expect to find an annual plant budget used to forecast and control acquisitions and retirements of plant and equipment. Many small companies also forecast expenditures for plant assets. Successful utilization of a plant budget presupposes the existence of reliable and detailed accounting records for plant and equipment. A detailed knowledge of the kinds, quantities, and condition of existing equipment is an essential basis for intelligent forecasting of the need for replacements and additions to the plant.

Other key controls applicable to plant and equipment are as follows:

1. A subsidiary ledger consisting of a separate record for each unit of property. An adequate plant and equipment ledger facilitates the auditors' work in analyzing additions and retirements, in verifying the depreciation provision and maintenance expenses, and in comparing authorizations with actual expenditures.

2. A system of authorizations requiring advance executive approval of all plant and equipment acquisitions, whether by purchase, lease, or construction. Serially numbered capital **work orders** are a convenient means of recording authorizations.
3. A reporting procedure assuring prompt disclosure and analysis of variances between authorized expenditures and actual costs.
4. An authoritative written statement of company policy distinguishing between **capital expenditures** and **revenue expenditures**. A dollar minimum ordinarily will be established for capitalization; any expenditures of a lesser amount automatically are classified as charges against current revenue.
5. A policy requiring all purchases of plant and equipment to be handled through the purchasing department and subjected to standard routines for receiving, inspection, and payment.
6. Periodic physical inventories designed to verify the existence, location, and condition of all property listed in the accounts and to disclose the existence of any unrecorded units. When the assets are mobile and of high value, a radio frequency identification or global positioning system may be used to track the movement of the assets and help prevent theft.
7. A system of retirement procedures, including serially numbered *retirement work orders* (bottom), stating reasons for retirement and bearing appropriate approvals.

## Audit Documentation

The key audit working paper for property, plant, and equipment is a summary analysis such as that illustrated in Figure 13.1. This working paper follows the approach we have previously described of *emphasizing changes during the year under audit*. The working paper shows the beginning balances for the various types of plant assets; these amounts are the ending balances shown in the prior year's working papers. Next, the working paper shows the additions and retirements during the year. These are the transactions upon which the auditors' attention will be focused. A final column shows the ending balances that must equal the beginning balances plus the additions and minus the retirements. A similar set of four columns is used to summarize the changes in the accounts for accumulated depreciation.

Among the other audit working papers for property, plant, and equipment are analyses of the year's additions and retirements, analyses of repairs and maintenance expense accounts, and tests of depreciation. The analyses of plant additions and retirements and the tests of depreciation are cross-indexed to the summary analysis, as illustrated in Figure 13.1. In the audit of larger companies, it is common practice for the client to prepare for the auditors both a listing of the year's additions and a schedule of the year's disposals. In addition, the auditors document internal controls and risk assessments for property, plant, and equipment.

## Initial Audits and Repeat Engagements

The auditing procedures listed in subsequent pages are applicable to repeat engagements and therefore concern only transactions of the current year. In the auditors' first audit of a new client that has changed auditors, a review of the predecessor auditor's audit documentation may provide substantial audit evidence about opening balances and consistency of accounting principles. However, the nature, timing, and extent of audit work performed and conclusions reached are the responsibility of the successor auditor. Nonetheless, if previous audits were performed by a reputable CPA firm, that firm's work will be extremely helpful to the successor auditor.

In a first audit of a company that has *not* previously been audited, or one in which access to a predecessor's audit work is not available, the ideal approach is a complete historical analysis of the property accounts. By thorough review of all major charges and credits to the property accounts since their inception, the auditors can establish the validity of the beginning balances of property, plant, and equipment and accumulated depreciation.

If the client has been in business for many years, the review of transactions in earlier years necessarily should be performed on a test basis in order to stay within reasonable time limits. However, the importance of an analysis of transactions of prior years deserves emphasis. Only by this approach can the auditors be in a sound position to express an opinion as to the propriety of the current period's depreciation. If repair and maintenance expenses have been capitalized, or asset additions have been recorded as operating expenses, or retirements of property have gone unrecorded, the depreciation expense will be misstated regardless of the care taken in the selection of depreciation rates. The auditors should make clear to the client that the initial examination of plant and equipment requires procedures that need not be duplicated in subsequent engagements.

## Audit of Property, Plant, and Equipment

The following steps indicate the general pattern of work performed by the auditors in the verification of property, plant, and equipment. The procedures for depreciation are covered in a separate program on pages 559–560. Selection of the most appropriate procedures for a particular audit will be guided by the nature of the controls that have been implemented and by the results of the auditors' risk assessments.

- A. Use the understanding of the client and its environment to consider inherent risks, including fraud risks, related to property, plant, and equipment.
- B. Obtain an understanding of internal control over property, plant, and equipment.
- C. Assess the risks of material misstatement and design further audit procedures.
- D. Perform further audit procedures—tests of controls.
  1. Nature of tests of controls.
  2. If necessary, revise the risks of material misstatement based on the results of tests of controls.
- E. Perform further audit procedures—substantive procedures for property, plant, and equipment.
  1. Obtain a summary analysis of changes in property owned and reconcile to ledgers.
  2. Vouch additions to property, plant, and equipment during the year.
  3. Make a physical inspection of major acquisitions of plant and equipment.
  4. Analyze repair and maintenance expense accounts.
  5. Investigate the status of property, plant, and equipment not in current use.
  6. Test the client's provision for depreciation.
  7. Investigate potential impairments of property, plant, and equipment.
  8. Investigate retirements of property, plant, and equipment during the year.
  9. Examine evidence of legal ownership of property, plant, and equipment.
  10. Review rental revenue from land, buildings, and equipment owned by the client but leased to others.
  11. Examine lease agreements on property, plant, and equipment leased to and from others.
  12. Perform analytical procedures for property, plant, and equipment.
  13. Evaluate financial statement presentation and disclosure for plant assets and for related revenue and expenses.

**FIGURE 13.2**  
**Objectives of Major**  
**Substantive Procedures**  
**for Property, Plant,**  
**and Equipment and**  
**Depreciation**

Substantive Procedures	Primary Audit Objectives
Obtain a summary analysis of changes in property owned and reconcile to ledgers.	<i>Valuation</i>
Vouch additions during year. Make physical inspection of major acquisitions.	<i>Existence, occurrence, and rights</i> <i>Valuation or allocation</i> <i>Accuracy</i> <i>Cutoff</i>
Analyze repair and maintenance expense accounts.	<i>Valuation or allocation</i>
Investigate the status of property not in current use.	<i>Valuation or allocation</i> <i>Presentation and disclosure</i>
Test the client's provision for depreciation. Investigate potential impairments.	<i>Valuation and allocation</i>
Investigate retirements of property during the year. Examine evidence of legal ownership. Review rental revenue.	<i>Existence, occurrence, and rights</i>
Examine lease agreements. Perform analytical procedures.	<i>Existence and rights</i> <i>Completeness</i> <i>Valuation or allocation</i>
Evaluate financial statement presentation and disclosure.	<i>Presentation and disclosure</i>

These substantive audit procedures are summarized in Figure 13.2 along with the primary audit objectives.

#### LO 13-4

Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to property, plant, and equipment.

#### A. Use the Understanding of the Client and Its Environment to Consider Inherent Risks, Including Fraud Risks.

After they have obtained an understanding of the client and its environment, the auditors will identify and assess inherent risks related to property, plant, and equipment.

If any of the inherent risks identified by the auditors involve the possibility of fraud, they will make sure that they understand the programs and controls established by management to control the risk. They will also determine that the controls have been implemented. Finally, the auditors will design an appropriate response to the risk.

#### LO 13-5

Obtain an understanding of internal control over property, plant, and equipment.

#### B. Obtain an Understanding of Internal Control over Property, Plant, and Equipment.

In obtaining an understanding of internal control over property, plant, and equipment, the auditors may utilize a written description, flowcharts, or an internal control questionnaire. The following are typical of the questions included in a questionnaire: Are plant ledgers regularly reconciled with general ledger control accounts? Are periodic physical inventories of plant assets compared with the plant ledgers? Are variances between plant budgets and actual expenditures for plant assets subject to review and approval of executives? Does the sale, transfer, or dismantling of equipment require written executive approval on a serially numbered retirement work order? Is there a written policy for distinguishing between capital expenditures and revenue expenditures?

After preparing a description of internal control, the auditors will determine whether the controls as described to them have been *implemented*. To confirm their understanding of these policies and procedures, they will observe whether there is an appropriate segregation of duties over the acquisition of plant assets and inquire as to who performed various functions throughout the period. They will also inspect the subsidiary ledger of property, plant, and equipment; the serially numbered work orders; and the plant and equipment budget and examine evidence of the follow-up on variances from the budget. These procedures may provide the auditors with sufficient evidence to assess control risk for certain financial statement assertions about property, plant, and equipment as being at less than the maximum.

**FIGURE 13.3** Potential Misstatements—Investments in Property, Plant, and Equipment

Description of Misstatement	Examples	Internal Control Weaknesses or Factors That Increase the Risk of the Misstatement
Misstatement of acquisitions of property, plant, and equipment	<b>Fraud:</b> <ul style="list-style-type: none"> <li>Expenditures for repairs and maintenance expenses recorded as property, plant, and equipment acquisitions to overstate income</li> </ul> <b>Error:</b> <ul style="list-style-type: none"> <li>Purchases of equipment erroneously reported in maintenance and repairs expense account</li> </ul>	<ul style="list-style-type: none"> <li>Undue pressure to meet earnings targets</li> <li>Inadequate accounting manual; incompetent accounting personnel</li> </ul>
Failure to record retirements of property, plant, and equipment	<b>Error:</b> <ul style="list-style-type: none"> <li>An asset that has been replaced is discarded due to its lack of value, without an accounting entry</li> </ul>	<ul style="list-style-type: none"> <li>Inadequate accounting policies, e.g., failure to use retirement work orders</li> </ul>
Improper reporting of unusual transactions	<b>Error:</b> <ul style="list-style-type: none"> <li>A “gain” recorded on an exchange of nonmonetary assets that lacks commercial substance</li> </ul>	<ul style="list-style-type: none"> <li>Inadequate accounting manual; incompetent accounting personnel</li> </ul>

**LO 13-6**

Assess the risks of material misstatement of property, plant, and equipment and design further audit procedures, including tests of controls and substantive procedures, to address the risks.

**C. Assess the Risks of Material Misstatement and Design Further Audit Procedures.**

After considering the information about the client and its environment, including internal control, the auditors assess the risks of material misstatement related to the assertions about property, plant, and equipment. To make these assessments, the auditors should consider the relationships between specific misstatements and controls. Figure 13.3 provides examples of potential misstatements of property, plant, and equipment and weaknesses in internal control that would make them more likely to occur.

The auditors’ assessments of the risks of material misstatement (inherent and control risks) are used to design further audit procedures, including tests of controls and substantive procedures. The further audit procedures should include tests of controls when the auditors’ assessments of control risk assume that controls are operating effectively but, in regard to their understanding of the client’s internal control, the auditors have not obtained sufficient evidence that controls are operating effectively.

Some of the risks identified by the auditors may be considered to be significant risks that require special audit consideration. The auditors should design procedures that are focused on these significant risks. In addition, the auditors:

1. Should evaluate the design of the related controls and determine that they are being implemented.
2. May not rely solely on analytical procedures to address the risk.
3. May not rely on evidence obtained in prior periods regarding the operating effectiveness of the related controls.

**D. Perform Further Audit Procedures—Tests of Controls.****1. Nature of Tests of Controls.**

Tests directed toward the effectiveness of controls are used to evaluate the client’s internal control and determine whether the auditors can justify their planned assessed levels of control risk for the assertions about property, plant, and equipment accounts. Certain tests of controls are performed as the auditors obtain an understanding of the client’s internal control; these tests were described in our discussion of that process. Additional tests of controls, for example, might include selecting a sample of purchases of plant and

equipment to test the controls related to authorization, receipt, and proper recording of the transactions. A sample of recorded retirements also may be tested for proper authorization and supporting retirement work orders. These tests often will be combined with the substantive tests of additions and retirements described below.

## 2. If Necessary, Revise the Risks of Material Misstatement Based on the Results of Tests of Controls.

If the tests of controls reveal that the operating effectiveness of controls over property, plant, and equipment is not as anticipated, the auditors will have to reassess the risks of material misstatement. This will allow them to determine the substantive procedures that should be performed.

## E. Perform Further Audit Procedures—Substantive Procedures for Property, Plant, and Equipment.

### 1. Obtain a Summary Analysis of Changes in Property Owned and Reconcile to Ledgers.

The auditors may verify the beginning balances of plant and equipment assets by reference to the prior year's audit working papers. In addition to beginning balances, the summary analysis will show the additions and retirements of plant and equipment during the year under audit. As the audit progresses, the auditors will examine a sample of these additions and retirements. The detailed working papers showing this verification will support and be cross-indexed to the summary analysis worksheet.

Before making a detailed analysis of changes in property accounts during the year, the auditors will want to be sure that the amounts in the subsidiary ledgers agree in total with the balances in the controlling accounts. Reconciliation of the subsidiary ledgers with the controlling accounts can be performed very quickly with the use of generalized audit software.

### 2. Vouch Additions to Property, Plant, and Equipment during the Year.

The vouching of additions to the property, plant, and equipment accounts during the period under audit is one of the most important substantive tests. The extent of the vouching is dependent upon the auditors' assessment of control risk for the existence and valuation of plant and equipment. The vouching process utilizes a working paper analysis of the general ledger control accounts and includes the tracing of entries through the journals to original documents, such as contracts, deeds, construction work orders, invoices, canceled checks, and authorization by appropriate individuals.

The specific steps to be taken in investigating the year's additions usually will include the following:

- a. On a test basis, vouch purchases of property, plant, and equipment to invoices, deeds, contracts, or other supporting documents. Recompute extensions, footings, and treatment of discounts. Make certain repairs and maintenance expenses (or other expenses) were not improperly capitalized.
- b. Investigate all instances in which the actual cost of acquisitions substantially exceeded authorized amounts. Determine whether such excess expenditures were analyzed and approved by appropriate officials.
- c. Investigate fully any debits to property, plant, and equipment accounts not arising from acquisition of physical assets.
- d. Determine that the total cost of any plant and equipment assets purchased on the installment plan is reflected in the asset accounts and that the unpaid installments are set up as liabilities.
- e. Review changes during the year in construction in progress and examine supporting work orders, both incomplete and closed.
- f. Trace transfers from the Construction in Progress account to the property accounts, observing propriety of classification. Determine that all completed items have been transferred out of the account.

The accounting for plant assets acquired in a nonmonetary exchange is specified by *FASB ASC 845-10-30*. Generally, these assets are recorded at fair value, unless fair value is not determinable, the exchange is to facilitate sales to customers, or the exchange lacks commercial substance.

Assets constructed by a company for its own use should be recorded at the cost of direct materials, direct labor, and applicable overhead cost. However, auditors may apply the additional test of comparing the total cost of self-constructed equipment with bids or estimated purchase prices for similar equipment from outside suppliers; excess costs of self-constructed assets should be expensed in the period that construction is completed.

*Related Party Transactions*

Assets acquired from affiliated corporations, from promoters or stockholders, or by any other type of related party transaction not involving arm's-length bargaining between buyer and seller have sometimes been recorded at inflated amounts. The auditors should inquire into the methods by which the sales price was determined, the cost of the property to the vendor, length of ownership by the vendor, and any other available evidence that might indicate an arbitrarily determined valuation. Material related party transactions must be disclosed in the notes to the financial statements.

Occurrence	<input checked="" type="checkbox"/>
Rights	<input checked="" type="checkbox"/>
Valuation	<input checked="" type="checkbox"/>
Accuracy	<input checked="" type="checkbox"/>
Cutoff	<input checked="" type="checkbox"/>

**3. Make a Physical Inspection of Major Acquisitions of Plant and Equipment.**

The auditors usually make a physical inspection of major units of plant and equipment acquired during the year under audit. This step is helpful in maintaining a good working knowledge of the client's operations and also in interpreting the accounting entries for both additions and retirements.

The audit procedure of physical inspection may flow in either direction between the plant assets and the records of plant assets. By tracing items in the plant ledger to the physical assets, the auditors prove that the assets shown in the accounting records *actually* exist and are in current use. The alternative testing procedure is to inspect selected assets in the plant and trace these assets to the detailed records. This test provides evidence that existing assets are recorded (completeness).

The physical inspection of plant assets may be limited to major units acquired during the year or may be extended to include tests of older equipment as well. In a few situations (especially when the risk of material misstatement is very high), the auditors may conclude that the taking of a complete physical inventory is needed. Bear in mind, however, that a complete physical inventory of plant and equipment is a rare event. If such an inventory is required, the auditors' role is to *observe* the physical inventory.

Let us consider an example of a situation in which the auditors might conclude that a complete physical inventory of equipment is needed. Assume that a client is engaged in commercial construction work and that the client owns and operates a great many units of costly mobile equipment. Such equipment may often be scrapped or sold upon the authorization of a field supervisor. Under these circumstances, the auditors might regard a complete physical inventory of plant and equipment as essential. Similarly, in the audit of clients owning a large number of automobiles and trucks, the auditors may insist upon observing a physical count, as well as examining legal title.

Some large companies, as part of their internal control, perform occasional physical inventories of plant and equipment at certain locations or in selected departments. The *observation* of these limited counts is often carried out by the client's internal auditing staff rather than by the independent auditors.

Primary Audit Objective:	
Valuation	<input checked="" type="checkbox"/>

**4. Analyze Repair and Maintenance Expense Accounts.**

The auditors' principal objective in analyzing repair and maintenance expense accounts is to discover expenditures for fixed assets or other items that should have been capitalized. In performing this procedure, the auditors should be aware of the company's policy regarding the minimum expenditure to be capitalized. For example, company policy may prescribe that no expenditure for less than \$5,000 shall be capitalized regardless of the service life of the item purchased. In such cases, the auditors will analyze the repair

and maintenance accounts with a view toward determining the consistency of application of this policy as well as compliance with generally accepted accounting principles. To determine that the accounts contain only proper repair and maintenance charges, the auditors will trace the larger expenditures to written authorizations for the transaction. The accuracy of the client's accounting for the expenditures may be verified by reference to vendors' invoices, material requisitions, and labor time records.

One useful means of identifying capital expenditures that have been included in the repair and maintenance accounts is to obtain or prepare an analysis of the monthly amounts of expense with corresponding amounts listed for the preceding year. Any significant variations from month to month or between corresponding months of the two years should be fully investigated. If maintenance expense is classified by the departments serviced, the variations are especially noticeable.

Primary Audit Objective:	
Valuation	<input checked="" type="checkbox"/>
Presentation	<input checked="" type="checkbox"/>

### 5. Investigate the Status of Property, Plant, and Equipment Not in Current Use.

Land, buildings, and equipment not in current use should be investigated thoroughly to determine the prospects for their future use in operations. Plant assets that are temporarily idle need not be reclassified, and depreciation may be continued at normal rates. On the other hand, idle equipment that has been dismantled, or that for any reason appears unsuitable for future operating use, should be written down to an estimated realizable value and excluded from the plant and equipment classification. In the case of standby equipment and other property not needed at present or prospective levels of operation, the auditors should consider whether the carrying value is recoverable through future use in operations.

Primary Audit Objective:	
Valuation	<input checked="" type="checkbox"/>

### 6. Test the Client's Provision for Depreciation.

See the separate *depreciation* program following this audit program.

Primary Audit Objective:	
Valuation	<input checked="" type="checkbox"/>

### 7. Investigate Potential Impairments of Property, Plant, and Equipment.

Accounting standards require that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In these circumstances, if the sum of the expected undiscounted future cash flows from the asset is less than its carrying amount, an impairment loss is recognized. The impairment loss is equal to the difference between the book value and the fair market value of the asset. International accounting standards have similar requirements, but these standards allow the asset to be written back up with a reversal of the loss if the value recovers. U.S. accounting standards do not allow the loss to be reversed in future periods.

Auditors should be alert for any changes in circumstances that may affect the recoverability of property, plant, and equipment as well as long-lived intangible assets. Examples of changes in circumstances that should result in a test of impairment include a significant decrease in the market value of the asset, a significant adverse change in the way the asset is used, or an adverse change in the physical condition of the asset. If specific assets appear to be impaired, the auditors should evaluate the reasonableness of management's determination of the impairment loss.

The determination of the amount of an impairment loss often involves subjective estimates as to the fair value of assets. Recall from the discussion in Chapter 5 that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence about fair value is obtained when there is an active market for the asset and the value of the asset may be determined by reference to sales of identical assets. However, in many cases, an active market does not exist for the specific asset, and fair value must be determined through the application of a valuation model, often involving discounted cash flows. The accuracy of these estimates of fair value depends on the reasonableness of the model's underlying assumptions.

The audit of estimates of fair values often involves substantial risks of material misstatement. For a particular estimate, the level of risk is influenced by a number of factors, such as the length of the cash flow forecast period, the number of significant and complex assumptions,

the degree of subjectivity associated with those assumptions, and the availability of objective data. In auditing the values determined by valuation models, the auditors should evaluate:

- The appropriateness of the valuation model used.
- Whether the significant assumptions are reasonable and consistent with economic conditions, existing market information, management's plans and strategies, past experience, other financial statement assumptions, and the risk associated with the cash flows.
- The accuracy, completeness, and relevance of the important data on which the fair value measurements are based.

The auditors should consider the processes and controls used by management to develop the estimates and examine appropriate internal and external data in support of the significant assumptions. The auditors should also consider whether any other information or evidence gathered indicates that one or more significant assumptions are not reasonable. In some cases, the auditors may decide to develop their own estimate of fair value to evaluate the reasonableness of management's estimate.

As a part of their substantive procedures, the auditors may decide to use the work of a valuation specialist. Regardless of whether the specialist is engaged by management or by the auditors, the auditors should evaluate the professional qualifications and experience of the valuation specialist and obtain an understanding of the nature of the specialist's work and conclusions.

Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Rights	<input checked="" type="checkbox"/>

## 8. Investigate Retirements of Property, Plant, and Equipment during the Year.

The principal purpose of this procedure is to determine whether any property has been replaced, sold, dismantled, or abandoned without such action being reflected in the accounting records. Nearly every thorough physical inventory of plant and equipment reveals missing units of property—units disposed of without a corresponding reduction of the accounts.

If a machine is sold for cash or traded in on a new machine, the transaction generally will involve the use of documents, such as a cash receipts form or a purchase order; the processing of these documents may bring the retirement to the attention of accounting personnel. However, plant assets may be scrapped rather than sold or traded in on new equipment; consequently, there may be no paperwork related to the disappearance of a machine. How is the accounting department expected to know when the asset has been retired?

As explained previously, one method of preventing unrecorded retirements is enforcement of a companywide policy that no plant asset shall be retired from use without prior approval on a special type of serially numbered retirement work order. A copy of the retirement work order is routed to the accounting department, thus providing some assurance that retirements will be reflected in the accounting records.

What specific steps should the auditors take to discover any unrecorded retirements? The following measures often are effective:

- If major additions of plant and equipment have been made during the year, determine whether old equipment was traded in or replaced by the new units.
- Analyze the Miscellaneous Revenue account to locate any cash proceeds from the sale of plant assets.
- If any of the company's products have been discontinued during the year, investigate the disposition of plant facilities formerly used in manufacturing such products.
- Inquire of executives and supervisors whether any plant assets have been retired during the year.
- Examine retirement work orders or other source documents for authorization by the appropriate official or committee.
- Investigate any reduction of insurance coverage to determine whether this was caused by retirement of plant assets.

## 9. Examine Evidence of Legal Ownership of Property, Plant, and Equipment.

To determine that plant assets are the property of the client, the auditors look for such evidence as a deed, a title insurance policy, property tax bills, receipts for payments to a

Primary Audit Objectives:	
Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Rights	<input checked="" type="checkbox"/>

mortgagee, and fire insurance policies. Additionally, the fact that rental payments are not being made is supporting evidence of ownership.

It is sometimes suggested that the auditors may verify ownership of real property and the absence of liens by examination of public records. This step is seldom taken. Inspection of the documentary evidence listed above usually provides adequate proof of ownership. If some doubt exists as to whether the client has clear title to property, the auditors should obtain the opinion of the client's legal counsel or request that a title search be performed by a title insurance company.

Possession of a deed is not proof of present ownership, because when real property is sold, a new deed is prepared and the seller retains the old one. This is true of title insurance policies as well. Better evidence of continuing ownership is found in property tax bills made out in the name of the client and in fire insurance policies, rent receipts from lessees, and regular payments of principal and interest to a mortgagee or trustee.

The disclosure of liens on property is considered during the examination of liabilities, but in the audit work on plant and equipment the auditors should be alert for evidence indicating the existence of liens. Purchase contracts examined in verifying the cost of property may reveal unpaid balances. Insurance policies may contain loss payable endorsements in favor of a secured party.

The auditors can readily ascertain the ownership of automobiles and trucks by reference to certificates of title and registration documents. The ease of transfer of title to automotive equipment, plus the fact that it is often used as collateral for loans, makes it important that the auditors examine the title to such property.

### 10. Review Rental Revenue from Land, Buildings, and Equipment Owned by the Client but Leased to Others.

In testing rental revenue from land and buildings, it is often desirable for the auditors to obtain or to sketch a map of the property and to make a physical inspection of each unit. This may disclose that premises reported as vacant are in fact occupied by lessees and are producing revenue not reflected in the accounting records. If the client's property includes an office or apartment building, the auditors should obtain a floor plan of the building as well as copies of all lease contracts. In this way, they can account for all available rental space as revenue-producing or vacant and can verify reported vacancies by physical inspection at the balance sheet date. If interim audit work is being performed, vacancies should also be verified by inspection and discussion with management during the year.

Examination of leases will indicate whether tenants are responsible for the cost of electricity, water, gas, and telephone service. These provisions should be reconciled with utility expense accounts. Rental revenue accounts should be analyzed in all cases and the amount compared with lease agreements and cash records.

### 11. Examine Lease Agreements on Property, Plant, and Equipment Leased to and from Others.

The preceding step addressed rental revenue from leases. The auditors also should be aware that generally accepted accounting principles require differing accounting treatments for operating and capital leases. The auditors should carefully examine lease agreements to determine whether the accounting for the assets involved is proper. For example, the auditors should be alert for the client's possible use of improper accounting techniques, such as the following.

- Assets under a lease that are being improperly accounted for (e.g., leases that meet the criteria for capital treatment are treated as operating leases).
- Leasehold improvements to buildings under operating leases that are being depreciated over the estimated useful life of the improvements rather than the shorter term of the lease, when renewal of the lease is not reasonably assured.
- A lease that provides a rent holiday that is not properly accounted for. For example, if a lease provides for six months of free rent, this benefit should be amortized over the life of the lease.

Valuation	<input type="checkbox"/>

## 12. Perform Analytical Procedures for Property, Plant, and Equipment.

The specific trends and ratios used in judging the overall reasonableness of recorded amounts for plant and equipment will vary with the nature of the client's operations. Among the ratios and trends used by auditors for this purpose are the following:

- Total cost of plant assets divided by annual output in dollars, pounds, or other units.
- Total cost of plant assets divided by cost of goods sold.
- Comparison of repairs and maintenance expense on a monthly basis and from year to year.
- Comparison of acquisitions for the current year with prior years.
- Comparison of retirements for the current year with prior years.

Acquisitions and retirements may vary widely from year to year; however, it is essential that the auditors be aware of these variations and judge their reasonableness in the light of trends in the client's past and present operations. Analytical procedures relating to depreciation are discussed later in this chapter as part of the audit program for depreciation.

Primary Audit Objective:	
Presentation	<input checked="" type="checkbox"/>

## 13. Evaluate Financial Statement Presentation and Disclosure for Plant Assets and for Related Revenue and Expenses.

The balance sheet or accompanying notes should disclose balances of major classes of depreciable assets. Accumulated depreciation may be shown by major class or in total, and the method or methods of computing depreciation should be stated. The total amount of depreciation should be disclosed in the income statement or supporting notes.

In addition, adequate financial statement presentation and disclosure will ordinarily reflect the following principles:

- The basis of valuation should be explicitly stated. At present, cost is the generally accepted basis of valuation for plant and equipment; property not in use should be valued at the lower of cost or estimated realizable value.
- Property pledged to secure loans should be clearly identified.
- Property not in current use should be segregated in the balance sheet.

## Depreciation

### The Auditors' Perspective toward Depreciation

#### LO 13-7

Explain the auditors' approach to the audit of depreciation.

Determining the annual depreciation expense involves two decisions by the client company: first, an estimate of the useful economic lives of various groups of assets and, second, a choice among several depreciation methods, each of which would lead to a different answer. The wide range of possible amounts for annual depreciation expense because of these decisions made by the client suggests that the auditors should maintain a perspective of looking for assurance of overall reasonableness. Specifically, overall tests of the year's depreciation expense are of special importance.

Among the methods of computing depreciation expense most frequently encountered are the straight-line method and the declining-balance method. Far less common, although quite acceptable, are methods based on units of output or hours of service. The most widely adopted types of accelerated depreciation methods are fixed percentage of declining balance and sum-of-the-years' digits. The essential characteristic of these and other similar methods is that depreciation is greatest in the first year and becomes smaller in succeeding years.

CPAs often encounter clients maintaining their records using federal income tax rules, such as the modified accelerated cost recovery system (MACRS). Although such methods are considered a systematic method of depreciating the cost of an asset, the depreciable lives of the assets are often much shorter than their useful economic lives. If the recovery periods are not reasonable, depreciation expense may be materially misstated and the auditors will not be in a position to issue an unqualified opinion on the financial statements.

## The Auditors' Objectives in Auditing Depreciation

Depreciation is an accounting estimate. Recall from Chapter 5 that, in evaluating the reasonableness of accounting estimates, auditors first obtain an understanding of the client's processes and controls. Then, they use one or more of the following three basic approaches:

1. Review and test management's process of developing the estimate.
2. Review subsequent events or transactions bearing on the estimate.
3. Independently develop an estimate of the amount to compare to management's estimate.

For depreciation, while a combination of all of the above approaches may be used, the emphasis is ordinarily upon the first basic approach—reviewing and testing management's process for calculating depreciation.

As we discussed earlier, depreciation relates most directly to the *valuation* or *allocation* audit objective. To meet this objective, the auditors, in examining management's process for calculating depreciation, determine (1) that the methods in use are acceptable, (2) that the methods are being followed consistently, and (3) that the calculations required by the chosen methods are accurate. The audit program in the following section conveys a more detailed picture of the auditors' objectives.

## Audit Program—Depreciation Expense and Accumulated Depreciation

The following outline of substantive procedures to be performed by the auditors in reviewing depreciation is stated in sufficient detail to be largely self-explanatory. Consequently, no point-by-point discussion will be presented. Techniques for testing the client's provision for depreciation for the year are, however, discussed immediately following the audit program.

1. Review the depreciation policies set forth in company manuals or other management directives. Determine whether the methods in use are designed to allocate costs of plant and equipment assets systematically over their service lives.
  - a. Inquire whether any extra working shifts or other conditions of accelerated production are present that might warrant adjustment of normal depreciation rates.
  - b. Discuss with executives the possible need for recognition of obsolescence resulting from technological or economic developments. For example, assume that a new, improved model of computer has recently become available and that it would fit the company's needs more effectively. Should the remaining estimated useful life of an older computer presently owned by the company be reevaluated in the light of this technological advance?
2. Obtain or prepare a summary analysis (see Figure 13.1) of accumulated depreciation for the major property classifications as shown by the general ledger control accounts, listing beginning balances, provisions for depreciation during the year, retirements, and ending balances.
  - a. Compare beginning balances with the audited amounts in last year's working papers.
  - b. Determine that the totals of accumulated depreciation recorded in the plant and equipment subsidiary records agree with the applicable general ledger controlling accounts.
3. Test the provisions for depreciation.
  - a. Compare rates used in the current year with those employed in prior years and investigate any variances.
  - b. Test computations of depreciation provisions for a representative number of units and trace to individual records in the property ledger. Be alert for excessive depreciation on fully depreciated assets. Generalized audit software can be used to test the depreciation calculations in the client's records if the client maintains computer-based records.
  - c. Compare credits to accumulated depreciation accounts for the year's depreciation provisions with debit entries in related depreciation expense accounts.

4. Test deductions from accumulated depreciation for assets retired.
  - a. Trace deductions to the working paper analyzing retirements of assets during the year.
  - b. Test the accuracy of accumulated depreciation to date of retirement.
5. Perform analytical procedures for depreciation.
  - a. Compute the ratio of depreciation expense to total cost of plant and compare with prior years.
  - b. Compare the percentage relationships between accumulated depreciation and related property accounts with those prevailing in prior years. Discuss significant variations from the normal depreciation program with appropriate members of management.

---

### Testing the Client's Provision for Depreciation

We have emphasized the importance of determining the overall reasonableness of the amount of depreciation expense, which is usually a material amount on the income statement. An *overall* test of the annual provision for depreciation requires the auditors to perform the following steps:

1. List the balances in the various asset accounts at the beginning of the year.
2. Deduct any fully depreciated assets, since these items should no longer be subject to depreciation.
3. Add one-half of the asset additions for the year.
4. Deduct one-half of the asset retirements for the year (exclusive of any fully depreciated assets).

These four steps produce an estimate of depreciation expense for each of the major asset categories for comparison with the provision for depreciation. Material differences should be investigated.

A more efficient method of testing depreciation expense is often with the use of computer assisted audit techniques. By obtaining the client's computer readable records of plant and equipment, the auditors can use their audit software to make detailed tests of all of the client's depreciation computations.

---

### Examination of Natural Resources

In the audit of companies' operating properties subject to depletion (mines, oil and gas deposits, timberlands, and other natural resources), the auditors follow a pattern similar to that used in evaluating the provision for depreciation expense and accumulated depreciation. They determine whether depletion has been recorded consistently and in accordance with generally accepted accounting principles, and they test the mathematical accuracy of the client's computations.

The depletion of timberlands is usually based on physical quantities established by **cruising**. (The term *cruising* means the inspection of a tract of forestland for the purpose of estimating the total lumber yield.) The determination of physical quantities to use as a basis for depletion is more difficult in many mining ventures and for oil and gas deposits. The auditors often rely upon the opinions of such specialists as mining engineers and geologists about the reasonableness of the depletion rates being used for such resources. Under these circumstances, the auditors must comply with the provisions of AICPA AU-C 630 (PCAOB 336) "Using the Work of an Auditor's Specialist," as discussed in Chapter 5.

If the number of tons of ore in a mining property could be accurately determined in advance, an exact depletion cost per ton could be computed by dividing the cost of the mine by the number of tons available for extraction. In reality, the contents of the mine can only be estimated, and the estimates may require significant revision as mining operations progress.

The auditors investigate the ownership and the cost of mining properties by examining deeds, leases, tax bills, vouchers, paid checks, and other records in the same manner that they verify the plant and equipment of a manufacturing or trading concern. The costs of exploration and development work in a mine customarily are capitalized until such time as commercial production begins. After that date, additional development work generally

is treated as an expense. The large oil companies capitalize the costs of drilling oil wells only if they are found to be productive. Under this “successful efforts” policy, the costs of drilling wells that prove not to be productive are immediately written off. However, some smaller companies follow an alternative “full-cost” policy, under which all drilling costs are capitalized and amortized over future years.

## Audit of Intangible Assets

### LO 13-8

Describe how the auditors design audit procedures to audit intangible assets.

The balance sheet caption “Intangible Assets” includes a variety of assets. All intangible assets are characterized by a lack of physical substance. Furthermore, they do not qualify as current assets, and they are nonmonetary—that is, they do not represent fixed claims to cash.

Among the more prominent intangible assets are goodwill, patents, trademarks, franchises, and leaseholds. Since intangible assets lack physical substance, their value lies in the rights or economic advantages afforded in their ownership. Because of their intangible nature, these assets may be more difficult to identify than units of plant and equipment. When a client treats an expenditure as creating an intangible asset, the auditors should look for objective evidence that a genuine asset has come into existence.

The auditors’ substantiation of intangible assets may begin with an analysis of the ledger accounts for these assets. Debits to the accounts should be traced to evidence of payment having been made and to documentary evidence of the rights or benefits acquired. Credits to the accounts should be reconciled with the client’s program of amortization or traced to appropriate authorization for the write-off of the asset.

One intangible asset that may be large in amount yet of questionable future economic benefit is *goodwill*. Goodwill arises in accounting for business combinations in which the price paid to acquire another company exceeds the fair value of the identifiable net assets acquired. When business combinations result in the recording of goodwill, the auditors should review the allocation of the lump-sum acquisition cost among tangible assets, identifiable intangible assets, and goodwill. They should also determine whether goodwill is properly allocated to all the various reporting units acquired in the acquisition. Often, the auditors will have to use the services of a business valuation specialist to assist them in evaluating the reasonableness of the valuation and allocation.

Once goodwill is acquired, it remains at its purchase price; it is not amortized. Instead, goodwill assigned to reporting units should be tested for impairment on an annual basis and between annual tests in certain circumstances. As explained previously, impairment tests involve determining the fair value of the reporting units for comparison to their carrying value. If the fair value of a reporting unit is less than its carrying value, an impairment loss is recognized for the difference.

As part of an analysis of intangible assets with definite useful lives, the auditors should review the reasonableness of the client’s amortization program. Amortization is ordinarily computed by the straight-line method over the assets’ estimated useful lives. As with property, plant, and equipment, long-lived intangible assets should be continually reviewed for impairment when circumstances indicate that the carrying value of the asset may not be recoverable.

The issues regarding the potential impairment of intangible assets are similar to those regarding property, plant, and equipment, as discussed on pages 555–556. If specific intangible assets appear to be impaired, the auditors should evaluate the reasonableness of management’s estimate of the fair values of those assets.

## Audit of Plant, Equipment, and Intangibles in Advance of the Balance Sheet Date

Most of the audit work on plant, equipment, and intangibles can be done in advance of the balance sheet date. For the initial audit of a new client, the time-consuming task of reviewing the records of prior years and establishing the beginning balances in the accounts for the current period ordinarily will be completed before the year-end.

In repeat engagements, as well as in first audits, the consideration of internal control can be carried out at a convenient time during the year. Many auditing firms lighten their year-end workloads by performing interim work during October and November,

including the analysis of the plant and equipment ledger accounts for the first 9 or 10 months of the year. After the balance sheet date, the work necessary on property accounts is then limited to examination of the transactions for the final two or three months.

## Chapter Summary

In this chapter, we presented the appropriate controls for property, plant, and equipment accounts, the auditors' consideration of these controls, and the substantive procedures for property, plant, and equipment. To summarize:

1. The financial statement caption "Property, Plant, and Equipment" includes tangible assets with a useful life of more than one year that are used in operations. In the audit of property, plant, and equipment, the auditors' primary substantive procedure objectives are to (a) substantiate the existence of property, plant, and equipment and the occurrence of related transactions; (b) establish the completeness of recorded property, plant, and equipment; (c) verify the cutoff of transactions affecting property, plant, and equipment; (d) determine that the client has rights to the recorded property, plant, and equipment; (e) establish the proper valuation or allocation of property, plant, and equipment and the accuracy of related transactions; and (f) evaluate the adequacy of presentation and disclosure for property, plant, and equipment.
2. Key controls over property, plant, and equipment should include proper authorization of acquisitions, adequate records for the various units of property, periodic physical inspection of property, and the use of serially numbered retirement work orders.
3. In the audit of property, plant, and equipment for a continuing client, the emphasis of the testing is on transactions that occurred during the year, as contrasted to an emphasis on ending balances. Depreciation expense is often tested by recomputation or through the use of analytical procedures.
4. The auditors' objectives for the audit of natural resources and intangible assets are similar to those for property, plant, and equipment. Often in auditing the depletion of natural resources, the auditors should rely upon specialists to estimate the quantity and quality of the resource. The audit of intangible assets typically involves vouching the cost of the assets and evaluating and testing the allocation methods used by the client.
5. In some audits, a substantial risk with respect to property, plant, and equipment and intangible assets is the risk of unrecognized impairment.

## Key Terms Introduced or Emphasized in Chapter 13

**Capital expenditure (548)** An expenditure for property, plant, and equipment that is properly charged to an asset account.

**Cruising (560)** The inspection of a tract of forestland for the purpose of estimating the total lumber yield.

**Revenue expenditure (548)** An expenditure for property, plant, and equipment that is properly charged to an expense account.

**Work order (548)** A serially numbered accounting document authorizing the acquisition of plant assets. A separate series of retirement work orders may be used to authorize the retirement or disposal of plant assets, and a third variety consists of documents authorizing repair or maintenance of plant assets.

## Review Questions

- 13-1. The auditors' verification of plant and equipment is facilitated by several factors not applicable to audit work on current assets. What are these factors?
- 13-2. K-J Corporation has current assets of \$5 million and approximately the same amount of plant and equipment. Should the two groups of assets require about the same amount of audit time? Give reasons.
- 13-3. What are the objectives of establishing internal control over plant and equipment?
- 13-4. Identify at least three elements of strong internal control over property, plant, and equipment.
- 13-5. Explain the use of a system of authorizations for additions to plant and equipment.
- 13-6. Moultrie Company discovered recently that a number of its property and equipment assets had been retired from use several years ago without any entries being made in the accounting

records. The company asks you to suggest procedures that will prevent unrecorded retirement of assets.

- 13-7. Does a failure to record the retirement of machinery affect net income? Explain.
- 13-8. The auditors' verification of current assets such as cash, securities, and inventories emphasizes observation, inspection, and confirmation to determine the physical existence of these assets. Should the auditors take a similar approach to establish the existence of the recorded plant assets? Explain fully.
- 13-9. You are making your first audit of Clarke Manufacturing Company. The Plant and Equipment account represents a very substantial portion of the total assets. What verification, if any, will you make of the balances of the ledger accounts for Plant and Equipment as of the beginning of the period under audit?
- 13-10. What documentary evidence is usually available to the auditors in the client's office to substantiate the legal ownership of property, plant, and equipment?
- 13-11. Should the auditors examine public records to determine the legal title of property apparently owned by the client?
- 13-12. In response to threats from a terrorist organization, Technology International installed protective measures consisting of chainlink fences, concrete road barriers, electronic gates, and underground parking at its manufacturing facilities. The costs of these installations were debited to the Land account. Indicate with reasons your approval or disapproval of this accounting treatment.
- 13-13. Should the independent auditors observe a physical inventory of property and equipment in every audit engagement? Discuss.
- 13-14. Hamlin Metals Company has sales representatives covering several states and provides automobiles for them and for its executives. Describe any substantive procedures you would consider appropriate for the company's fleet of more than 100 automobiles, other than the verification procedures generally applicable to all property and equipment.
- 13-15. What is a principal objective of the auditors in analyzing a Maintenance and Repairs expense account?
- 13-16. Gibson Manufacturing Company acquired new factory machinery this year and ceased using the old machinery. The old equipment was retained, however, and is capable of being used if the demand for the company's products warrants additional production. How should the old machinery be handled in the accounting records and on the financial statements?
- 13-17. List three substantive procedures the auditors could use to detect unrecorded retirements of property, plant, and equipment.
- 13-18. Do the auditors question the service lives adopted by the client for plant assets, or do they accept the service lives without investigation? Explain.
- 13-19. Explain why the auditors may need to use the work of a specialist in the audit of goodwill.
- 13-20. Explain how the existence of lease agreements may result in understated plant and equipment.
- 13-21. Suggest several comparisons to be made as part of the auditors' analytical procedures for:
  - a. Plant and Equipment.
  - b. Depreciation.

LO 13-1, 2

### Questions Requiring Analysis

LO 13-1, 3, 5

- 13-22. Assume that a continuing audit client has recorded Accounts Receivable and Equipment both in the amount of \$1,000,000. In a typical audit, which account would take more time to audit? (AICPA, adapted)
- 13-23. An executive of a manufacturing company informs you that no formal procedures have been followed to control the retirement of machinery and equipment. A physical inventory of plant assets has just been completed. It revealed that 25 percent of the assets carried in the ledger were not on hand and had presumably been scrapped. The accounting records have been adjusted to agree with the physical inventory. Outline internal control practices to govern future retirements.

- LO 13-4, 6, 8** 13-24. Gruen Corporation is a large diversified company with a large amount of property, plant, and equipment and intangible assets, including goodwill. In the past year the company has experienced a significant decline in a number of its lines of business.

*Required:*

- What risk of material misstatement is indicated from the information provided?
- Describe how the auditors would generally obtain evidence about the value of goodwill.

- LO 13-1, 3, 4, 6** 13-25. Kadex Corporation, a small manufacturing company, did not use the services of independent auditors during the first two years of its existence. Near the end of the third year, Kadex retained Jones & Scranton, CPAs, to perform an audit for the year ended December 31. Officials of the company requested that the CPA firm perform only the audit work necessary to provide an audit report on the financial statements for the current year.

During the first two years of its operation, Kadex had erroneously treated some material acquisitions of plant and equipment as revenue expenditures. No such errors occurred in the third year.

- Under these circumstances, would Jones & Scranton, CPAs, be likely to learn of the transactions erroneously treated as revenue expenditures in years 1 and 2? Explain.
- Would the income statement and balance sheet prepared at the end of year 3 be affected by the above accounting errors made in years 1 and 2? If so, identify the specific items. Explain fully.

- LO 13-1, 2, 4** 13-26. Allen Fraser was president of three corporations: Missouri Metals Corporation, Kansas Metals Corporation, and Iowa Metals Corporation. Each of the three corporations owned land and buildings acquired for approximately \$500,000. An appraiser retained by Fraser in 20X1 estimated the current value of the land and buildings in each corporation at approximately \$3,000,000. The appraisals were recorded in the accounts. A new corporation, called Midwest Corporation, was then formed, and Fraser became its president. The new corporation purchased the assets of the three predecessor corporations, making payment in capital stock. The balance sheet of Midwest Corporation shows land and buildings "valued at cost" in the amount of \$9,000,000, the carrying values to the vendor companies at the time of transfer to Midwest Corporation. Do you consider this treatment acceptable? Explain.

- LO 13-1, 3, 6** 13-27. Your new client, Ross Products, Inc., completed its first fiscal year March 31, 20X4. During the course of your audit you discover the following entry in the general journal, dated April 1, 20X3.

Building	2,400,000	
Mortgage Note Payable		1,400,000
Common Stock		1,000,000
To record (1) acquisition of building constructed by J. A. Ross Construction Co. (a sole proprietorship); (2) assumption of Ross Construction Co. mortgage loan for construction of the building; and (3) issuance of entire authorized common stock (10,000 shares, \$100 par value) to J. A. Ross.		

*Required:*

Under these circumstances, what steps should the auditors take to verify the \$2,400,000 recorded cost of the building? Explain fully.

- LO 13-1, 3, 4, 6** 13-28. Shortly after you were retained to audit the financial statements of Case Corporation, you learned from a preliminary discussion with management that the corporation had recently acquired a competing business, the Mall Company. In your study of the terms of the acquisition, you find that the total purchase price was paid in cash and that the transaction was authorized by the board of directors and fully described in the minutes of the directors' meetings. The only aspect of the acquisition of the Mall Company that raises any doubts in your mind is the allocation of the total purchase price among the several kinds of assets acquired. The allocation, which had been specifically approved by the board of directors of Case Corporation, placed very high values on the tangible assets acquired and allowed nothing for goodwill.

You are inclined to believe that the allocation of the lump-sum price to the several types of assets was somewhat unreasonable because the total price for the business was as much as or more than the current replacement cost of the tangible assets acquired. However, as an auditor, you do not claim to be an expert in property values. Would you question the propriety of the directors' allocation of the lump-sum purchase price? Explain fully.

- LO 13-6** 13-29. List and state the purpose of all audit procedures that might reasonably be applied by the auditors to determine that all property and equipment retirements have been recorded in the accounting records.

**LO 13-8** 13–30. Girard Corporation has just completed the acquisition of Williams, Inc., at a purchase price significantly higher than the fair values of the identifiable assets. Describe the audit issues caused by the acquisition and how the auditors would likely resolve the issues.

**LO 13-1, 4, 6** 13–31. You are part of the audit team that is auditing Happy Chicken, Inc., a company that franchises Happy Chicken family restaurants. During the current year, management of Happy Chicken purchased for \$2 million one of its franchised locations, a store that was having financial difficulties. In performing its analysis for impairment of assets at year-end, management of Happy Chicken determined that the carrying value of the asset may not be recoverable. As a result, management developed an estimate of the fair value of the location using a discounted cash flow model. The estimated fair value of the location was determined to be \$1.5 million, which resulted in an impairment loss of about \$500,000. The undiscounted future cash flows are equal to \$1.7 million.

*Required:*

- State why the audit of fair values is often difficult.
- Describe how you might approach the audit of the impairment loss in this situation.
- If you decide to use the work of a valuation specialist to audit the estimate of fair value, describe your responsibilities with respect to using the specialist's work.
- List two significant assumptions that you would expect to underlie Happy Chicken management's estimate of the fair value of its recently purchased franchise location.
- For the significant assumptions that you identified in (d), describe the types of evidence that you would expect to examine in order to support those assumptions.

## Objective Questions

**LO 13-3, 5**

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 13–32. Multiple Choice Questions

Select the best answer for each of the questions below and explain fully the reason for your selection.

**LO 13-6, 7**

- To assure accountability for fixed asset retirements, management should implement an internal control that includes:
  - (1) Continuous analysis of miscellaneous revenue to locate any cash proceeds from the sale of plant assets.
  - (2) Periodic inquiry of plant executives by internal auditors as to whether any plant assets have been retired.
  - (3) Utilization of serially numbered retirement work orders.
  - (4) Periodic observation of plant assets by the internal auditors.

**LO 13-3, 5**

- The auditors may conclude that depreciation charges are insufficient by noting:
  - (1) Insured values greatly in excess of book values.
  - (2) Large amounts of fully depreciated assets.
  - (3) Continuous trade-ins of relatively new assets.
  - (4) Excessive recurring losses on assets retired.
- Which of the following is an internal control weakness related to factory equipment?
  - (1) Checks issued in payment of purchases of equipment are not signed by the controller.
  - (2) All purchases of factory equipment are required to be made by the department in need of the equipment.
  - (3) Factory equipment replacements are generally made when estimated useful lives, as indicated in depreciation schedules, have expired.
  - (4) Proceeds from sales of fully depreciated equipment are credited to other income.

**LO 13-6**

- Which of the following accounts should be reviewed by the auditors to gain reasonable assurance that additions to property, plant, and equipment are *not* understated?
  - (1) Depreciation.
  - (2) Accounts Payable.
  - (3) Cash.
  - (4) Repairs.

**LO 13-5, 6**

- The auditors are most likely to seek information from the plant manager with respect to the
  - (1) Adequacy of the provision for uncollectible accounts.
  - (2) Appropriateness of physical inventory observation procedures.

LO 13-3, 5

(3) Existence of obsolete machinery.

(4) Deferral of procurement of certain necessary insurance coverage.

f. To strengthen internal control over the custody of heavy mobile equipment, the client would most likely institute a policy requiring a periodic:

(1) Increase in insurance coverage.

(2) Inspection of equipment and reconciliation with accounting records.

(3) Verification of liens, pledges, and collateralizations.

(4) Accounting for work orders.

LO 13-1

g. Which of the following statements is *not* typical of property, plant, and equipment as compared to most current asset accounts?

(1) A property, plant, and equipment cutoff error near year-end has a more significant effect on net income.

(2) Relatively few transactions occur in property, plant, and equipment during the year.

(3) The assets involved with property, plant, and equipment ordinarily have relatively longer lives.

(4) Property, plant, and equipment accounts typically have a higher dollar value.

LO 13-1, 6

h. For the audit of a continuing nonpublic client, the emphasis of the testing for property accounts is on:

(1) All transactions resulting in the ending balance.

(2) Tests of controls over disposals.

(3) Transactions that occurred during the year.

(4) Performing analytical procedures on beginning balances of the accounts.

LO 13-2, 6

i. Audit of which of the following accounts is most likely to reveal evidence relating to recorded retirements of equipment?

(1) Accumulated depreciation.

(2) Cost of goods sold.

(3) Purchase returns and allowances.

(4) Purchase discounts.

LO 13-2, 6

j. An effective procedure for identifying unrecorded retirements of equipment is to:

(1) Foot related property records.

(2) Recalculate depreciation on the related equipment.

(3) Select items of equipment in the accounting records and then locate them in the plant.

(4) Select items of equipment and then locate them in the accounting records.

LO 13-7

k. Which of the following is *not* an overall test of the annual provision for depreciation expense?

(1) Compare rates used in the current year with those used in prior years.

(2) Test computation of depreciation provisions for a representative number of units.

(3) Test deductions from accumulated depreciation for assets purchased during the year.

(4) Perform analytical procedures.

LO 13-8

l. The audit of intangible assets typically involves

	Vouching the Cost of Asset	Testing Allocation Methods
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 13-6

## 13-33. Objective Question

Hwang Corporation has engaged in a number of expenditures relating to a land acquisition for a future plant. For each of the following, indicate whether you as the auditor of Hwang Corporation would propose an adjusting entry. Assume all transactions are material.

Yes—indicates a proposed adjusting entry is necessary.

No—indicates no proposed adjusting entry is necessary.

Situation	Propose an Adjusting Entry?
a. Hwang purchased land for a new plant that it intends to construct. A portion of the cost was a commission paid to a real estate agent. That commission was capitalized as part of the cost of the land.	
b. The purchased land was in part financed through obtaining a loan from a financial institution. Interest on that loan is being capitalized as part of the cost of the land.	
c. An existing building on the land was torn down to allow construction of a new building on the land. The cost of the demolition was capitalized as part of the cost of the new building.	
d. Subsequent to the land purchase, Hwang purchased certain equipment from a vendor who had filed for bankruptcy. Hwang's management believes that the equipment was purchased for an amount equal to approximately half what at least one other supplier sells it for. Hwang recorded the transaction at its cost.	
e. Hwang cut down a number of trees on the land and sold the wood. Other income was recorded on the transaction for the amount of the cash received.	

**LO 13-3, 6, 7, 8** 13-34. **Multiple Choice Questions**

- Analysis of which account is *least* likely to reveal evidence relating to recorded retirement of equipment?
  - Accumulated depreciation.
  - Insurance expense.
  - Property, plant, and equipment.
  - Purchase returns and allowances.
- Which of the following explanations most likely would satisfy an auditor who questions management about significant debits to the accumulated depreciation accounts?
  - The estimated remaining useful lives of plant assets were revised upward.
  - Plant assets were retired during the year.
  - The prior year's depreciation expense was erroneously understated.
  - Overhead allocations were revised at year-end.
- Treetop Corporation acquired a building and arranged mortgage financing during the year. Verification of the related mortgage acquisition costs would be least likely to include an examination of the related:
  - Deed.
  - Canceled checks.
  - Closing statement.
  - Interest expense.
- In testing plant and equipment balances, an auditor may select recorded additions in the analysis of plant and equipment and inspect the actual asset(s) involved. Which management assertion is this procedure most directly related to?
  - Existence.
  - Completeness.
  - Rights.
  - Valuation.

- e. A search for overstated property, plant, and equipment purchases would most likely include:
- (1) Accounts receivable.
  - (2) Property, plant, and equipment.
  - (3) Purchase discounts.
  - (4) Repairs and maintenance expense.

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*.

LO 13-3, 4, 5, 6

13–35. The following are typical questions that might appear on an internal control questionnaire relating to plant and equipment:

1. Has a dollar minimum been established for expenditures to be capitalized?
  2. Are subsidiary ledgers for plant and equipment regularly reconciled with general ledger controlling accounts?
- Required:*
- a. State the purpose of each of the above controls.
  - b. Describe the manner in which each of the above procedures might be tested.
  - c. Assuming that the operating effectiveness of each of the above procedures is found to be inadequate, describe how the auditors might alter their substantive procedures to compensate for the increased level of risks of material misstatements.

LO 13-1, 2, 4

13–36. Assume that you are auditing the financial statements of Agee Corporation. During the course of the audit, you discover the following circumstances.

1. Management of Agee has decided to discontinue the production of consumer electronics, which represents a moderately large line of business for the company.
2. In auditing facility rent expense, you note that the amount is significantly less than in the prior year. When you discuss the matter with management, you are informed that management entered into a new 10-year building lease agreement about nine months ago, which provided for no lease payments for the first year of the lease.
3. In vouching additions to plant assets, you find that management has capitalized the leasehold improvements made on the building acquired in (2), which are being depreciated over an estimated useful life of 12 years.
4. Management has provided you with the following information about a test of impairment of the company's clothing and apparel reporting unit and a large piece of equipment used in the consumer products division of the company. The Clothing and Apparel reporting unit has \$1,200,000 in goodwill associated with it.

### Clothing and Apparel Reporting Unit

Carrying value of the unit	\$12,600,000
Discounted value of estimated future cash flows	12,200,000
Market value of the unit	11,500,000

### Equipment

Carrying value of the equipment	\$1,200,000
Undiscounted estimated future cash flows	1,250,000
Discounted value of estimated future cash flows	1,000,000
Market value of the equipment	975,000

*Required:*

Describe the implications of each of these circumstances, including any additional information or evidence that the auditors might require to resolve the issues identified.

LO 13-1, 4, 6

13–37. You are engaged in the audit of the financial statements of Holman Corporation for the year ended December 31, 20X6. The accompanying analyses of the Property, Plant, and Equipment and related accumulated depreciation accounts have been prepared by the chief accountant of the client. You have traced the beginning balances to your prior year's audit working papers.

<b>HOLMAN CORPORATION</b> <b>Analysis of Property, Plant, and Equipment</b> <b>and Related Accumulated Depreciation Accounts</b> <b>Year Ended December 31, 20X6</b>				
Description	Final 12/31/X5	Assets		Per Ledger 12/31/X6
		Additions	Retirements	
Land	\$422,500	\$ 5,000		\$427,500
Buildings	120,000	17,500		137,500
Machinery and equipment	385,000	40,400	\$26,000	399,400
	<u>\$927,500</u>	<u>\$62,900</u>	<u>\$26,000</u>	<u>\$964,400</u>

Description	Final 12/31/X5	Accumulated Depreciation		Per Ledger 12/31/X6
		Additions*	Retirements	
Buildings	\$ 60,000	\$ 5,150		\$ 65,150
Machinery and equipment	173,250	39,220		212,470
	<u>\$233,250</u>	<u>\$44,370</u>		<u>\$277,620</u>

\*Depreciation expense for the year.

All plant assets are depreciated on the straight-line basis (no residual value taken into consideration) based on the following estimated service lives: building, 25 years; and all other items, 10 years. The company's policy is to take one half-year's depreciation on all asset additions and disposals during the year.

Your audit revealed the following information:

1. On April 1, the company entered into a 10-year lease contract for a die casting machine, with annual rentals of \$5,000 payable in advance every April 1. The lease is cancelable by either party (60 days' written notice is required), and there is no option to renew the lease or buy the equipment at the end of the lease. The estimated service life of the machine is 10 years with no residual value. The company recorded the die casting machine in the Machinery and Equipment account at \$40,400, the present value at the date of the lease, and \$2,020 applicable to the machine has been included in depreciation expense for the year.
2. The company completed the construction of a wing on the plant building on June 30. The service life of the building was not extended by this addition. The lowest construction bid received was \$17,500, the amount recorded in the Buildings account. Company personnel constructed the addition at a cost of \$16,000 (materials, \$7,500; labor, \$5,500; and overhead, \$3,000).
3. On August 18, \$5,000 was paid for paving and fencing a portion of land owned by the company and used as a parking lot for employees. The expenditure was charged to the Land account.
4. The amount shown in the machinery and equipment asset retirement column represents cash received on September 5 upon disposal of a machine purchased in July 20X2 for \$48,000. The chief accountant recorded depreciation expense of \$3,500 on this machine in 20X6.
5. Harbor City donated land and a building appraised at \$100,000 and \$400,000, respectively, to Holman Corporation for a plant. On September 1, the company began operating the plant. Since no costs were involved, the chief accountant made no entry for the above transaction.

Required:

Prepare the adjusting journal entries that you would propose at December 31, 20X6, to adjust the accounts for the above transactions. Disregard income tax implications. The accounts have not been closed. Computations should be rounded off to the nearest dollar. Use a separate adjusting journal entry for each of the preceding five paragraphs.

(AICPA, adapted)

- LO 13-1, 4, 6** 13-38. Chem-Lite, Inc., maintains its accounts on the basis of a fiscal year ending March 31. At March 31, 20X1, the Equipment account in the general ledger appeared as shown below. The company uses straight-line depreciation, a 10-year life, and 10 percent salvage value for all its equipment. It is the company's policy to take a full year's depreciation on all additions to

equipment occurring during the fiscal year, and you may treat this policy as a satisfactory one for the purpose of this problem. The company has recorded depreciation for the fiscal year ended March 31, 20X1.

Equipment	
4/1/X0 Bal. forward	100,000
12/1/X0	10,500
1/2/X1	1,015
2/1/X1	1,015
3/1/X1	1,015

Upon further investigation, you find the following contract dated December 1, 20X0, covering the acquisition of equipment:

List price	\$30,000
5% sales tax	1,500
Total	\$31,500
Down payment	10,500
Balance	21,000
8% interest, 24 months	3,360
Contract amount	<u>\$24,360</u>

*Required:*

Prepare in good form, including full explanations, the adjusting entry (entries) you would propose as auditor of Chem-Lite, Inc., with respect to the equipment and related depreciation accounts at March 31, 20X1. (Assume that all amounts given are material.)

(AICPA, adapted)

**LO 13-1, 4, 6**

13–39. You are the senior accountant in the audit of Granger Grain Corporation, whose business primarily involves the purchase, storage, and sale of grain products. The corporation owns several elevators located along navigable water routes and transports its grain by barge and rail. Your staff assistant submitted the following working paper analysis for your review:

GRANGER GRAIN CORPORATION Advances Paid on Barges Under Construction—a/c 210 December 31, 20X1	
Advances made:	
1/15/X1—Ck. No. 3463—Jones Barge Construction Co.	\$100,000*
4/13/X1—Ck. No. 4129—Jones Barge Construction Co.	25,000*
6/19/X1—Ck. No. 5396—Jones Barge Construction Co.	63,000*
Total payments	188,000
Deduct cash received 9/1/X1 from City Life Insurance Co.	188,000†
Balance per general ledger—12/31/X1	<u>\$ —0—</u>

\*Examined approved check request and paid check and traced to cash disbursements journal.

†Traced to cash receipts journal and to duplicate deposit ticket.

*Required:*

- In what respects is this brief analysis incomplete for audit purposes? (Do not include any discussion of specific auditing procedures.)
- What two different types of contractual arrangements may be inferred from your assistant's analysis?
- What additional auditing procedures would you suggest that your staff assistant perform before you accept the working paper as being complete?

(AICPA, adapted)

**In-Class Team Case**  
**LO 13-1, 3, 6**

13–40. You are reviewing the property, plant, and equipment working papers of Mandville Corporation, a company that publishes travel guides. The lead schedule for the account is included in the chapter as Figure 13.1. The following are among the findings relating to changes in the account:

1. *Land*: The addition represents the purchase of land adjacent to the company's existing plant and is financed as follows:

Contract sales price—2,000 shares of Mandville Corporation Common Stock	
Liabilities assumed by Mandville	
Accrued county taxes at settlement date	(4,600)
Unpaid sewer installation assessment	(6,400)

On June 17, the date on which the buyer and seller discussed the transaction, shares of Mandville Corporation stock were selling for \$77.50. On June 30, the settlement date (day of the sale), Mandville stock was selling for \$70.00 per share. The journal entry for the purchase was recorded as:

Land	\$151,000	
Common Stock		\$ 20,000
Paid-in capital in excess of par		120,000
Accrued taxes payable		4,600
Accrued sewer assessment payable		6,400

Examination of publicly available records has indicated that prices of comparable land in the area have been relatively constant, selling in a range from \$140,000 to \$160,000 during the past 18 months.

2. *Land improvements*: This account was increased by three journal entries (each recorded with a debit to land improvements and a credit to cash) during the year. Each of these improvements relates to the new land which was purchased in point (1) above.

Sidewalk to building	\$2,500
Repaving of road to building	3,500
Chain link fence (replaces rusted chain link fence surrounding property)	4,000

3. *Building*: The building was constructed by an independent contractor; the contract was for \$473,000. Progress payments were made during construction through use of proceeds of a bank loan, for which the building serves as collateral. The interest during construction was capitalized (\$22,000) while the interest subsequent to construction but prior to year-end (\$20,000) was expensed.

4. *Equipment*: The change in the equipment was a trade of old book "update printing equipment" for two new computer servers and associated software that will maintain electronic updates. Until recently, updates of outdated portions of guidebooks were printed and "shrinkwrapped" with the guidebook. Now the updates will be available on Mandville's website. The old equipment had a cost of \$60,000 and accumulated depreciation of \$50,600 and was worth approximately its book value of \$9,400, although the salesperson suggested that he was providing the company a \$19,400 trade-in value. Accordingly, the following entry was made to record the exchange:

Equipment—computer servers	\$110,000	
Accumulated Depr. (old equipment)	50,600	
Cash		\$90,600
Equipment—printing equipment		60,000
Gain on exchange of assets		10,000

5. *Depreciation provisions*: Mandville uses software to calculate depreciation to the exact day.
- For additions (1) through (4) above, prepare any necessary adjusting entries. If in any case your adjusting entry relies upon an assumption, provide that assumption.
  - For item (5), prepare a calculation of the depreciation provisions and determine whether they appear reasonable. For this calculation, assume that acquisitions, on average, occur at mid-year. If the provision does *not* appear reasonable, discuss follow-up procedures related to the provisions. Use the following table for your calculation:

Required:

Acct.	Rate	Depr. on Beg. Balance	Add: Depr. on Additions	Less: Depr. on Retirements	Est. Depr.	Book Depr.	Difference
152-3	5%						
154-5	3%						
156-7	10%						
Totals							

# Accounts Payable and Other Liabilities

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 14-1** Describe the nature of accounts payable and other liabilities.
- LO 14-2** Describe the auditors' objectives in the audit of accounts payable.
- LO 14-3** Identify and explain the fundamental controls over payables.
- LO 14-4** Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to accounts payable.
- LO 14-5** Obtain an understanding of internal control over accounts payable.
- LO 14-6** Assess the risks of material misstatement of accounts payable and design further audit procedures, including tests of control and substantive procedures, to address the risks.

In this chapter, we discuss accounts payable and other current liabilities. Chapter 15 includes material on long-term debt, equity capital, and loss contingencies.

## Accounts Payable

### Sources and Nature of Accounts Payable

#### LO 14-1

Describe the nature of accounts payable and other liabilities.

The term *accounts payable* (often referred to as *vouchers payable* for a voucher system) is used to describe short-term obligations arising from the purchase of goods and services in the ordinary course of business. Typical transactions creating accounts payable include the acquisition on credit of merchandise, raw materials, plant assets, and office supplies. Other sources of accounts payable include the receipt of services, such as legal and accounting services, advertising, repairs, and utilities. Interest-bearing obligations should not be included in accounts payable but shown separately as bonds, notes, mortgages, or installment contracts.

Invoices and statements from suppliers usually support accounts payable arising from the purchase of goods or services and most *other liabilities*. However, **accrued liabilities** (sometimes called *accrued expenses*) generally accumulate over time, and management must make accounting estimates of the year-end liability. Such estimates are often necessary for salaries, pensions, interest, rent, taxes, and similar items.

### The Auditors' Objectives in Auditing Accounts Payable

#### LO 14-2

Describe the auditors' objectives in the audit of accounts payable.

The auditors' *objectives* in the audit of accounts payable are to:

1. Use the understanding of the client and its environment to consider *inherent risks*, including fraud risks, related to accounts payable.
2. Obtain an understanding of *internal control* over accounts payable.
3. Assess the risks of material misstatement and design tests of controls and substantive procedures that:
  - a. Substantiate the *existence* of accounts payable and the client's *obligation* to pay these liabilities, and establish the *occurrence* of purchase transactions.
  - b. Establish the *completeness* of recorded accounts payable.
  - c. Verify the *cutoff* of purchase transactions.
  - d. Establish the proper *valuation* of accounts payable and the *accuracy* of purchase transactions.
  - e. Determine that the *presentation* and *disclosure* of information about accounts payable are appropriate.

Lawsuits against CPA firms typically allege that the auditors failed to detect an overstatement of earnings. Management, especially of publicly held firms, is often under some pressure to report increased earnings. In previous chapters, we discussed the auditors' concern about exaggeration of earnings that results from the overstatement of assets. In the audit of liabilities, the auditors are primarily concerned with the possibility

of understatement, or omission, of liabilities. An *understatement of liabilities* will exaggerate the financial strength of a company and conceal fraud just as effectively as an *overstatement of assets*. Furthermore, the understatement of liabilities is usually accompanied by the understatement of expenses and an overstatement of net income. For example, delaying the recording of bills for December operating expenses until January overstates income while understating accounts payable. Therefore, audit procedures for liabilities should have as a primary objective the determination of the *completeness* of recorded payables.

Audit procedures for detecting understated liabilities differ from those used to detect overstated assets. Overstating an asset account usually requires an improper entry in the accounting records, as by the recording of a fictitious transaction. Such an improper entry can be detected by the auditors through verification of the individual entries making up the balance of an asset account. By way of contrast, understating a liability account is generally possible merely by *failing to make an entry* for a transaction creating a liability. The omission of an entry is less susceptible to detection than is a fictitious entry. If the omission is detected, it is much easier to pass it off as an accidental error. Auditors have long recognized that the most difficult type of fraud to detect is one based on the *nonrecording* of transactions.

When accounts payable entries have been recorded, the existence of a definite financial commitment makes accomplishment of the valuation audit objective less difficult than for assets (other than cash). The situation with accrued liabilities is different. As we suggested earlier, in many circumstances exact measurement of these accounts will be difficult; the auditors should audit management's accounting estimates.

## Internal Control over Accounts Payable

### LO 14-3

Identify and explain the fundamental controls over payables.

In thinking about internal control over accounts payable, it is important to recognize that the accounts payable of one company are the accounts receivable of other companies. It follows that there is little danger of errors being overlooked permanently since the client's creditors will generally maintain complete records of their receivables and will inform the client if payment is not received. This feature also aids auditors in the discovery of fraud, since the perpetrator must be able to obtain and respond to the demands for payment. Some companies, therefore, may choose to minimize their record keeping of liabilities and to rely on creditors to call attention to any delay in making payment. This viewpoint is not an endorsement of inaccurate or incomplete records of accounts payable, but merely a recognition that the self-interest of creditors constitutes an effective control in accounting for payables that is not present in the case of accounts receivable.

Discussions of internal control applicable to accounts payable may logically be extended to the entire purchase or acquisition cycle. In an effective purchasing system, a stores or inventory control department will prepare and approve the issuance of a purchase requisition that will be sent to the purchasing department. A copy of the purchase requisition will be filed numerically and matched with the subsequently prepared purchase order and finally with a copy of the receiving report.

The purchasing department, upon receiving the purchase requisition, will (1) determine that the item should be ordered and (2) select the appropriate vendor, quality, and price. Then, a serially numbered purchase order is issued to order the goods. Copies of the purchase order should be sent to stores, receiving, and the accounts payable department. The copy sent to receiving is generally "blind" in that the quantities are not included in order to encourage counting of quantities by the receiving department. But the fact that a vendor's packing slip (with quantities) is almost always included when goods are received may decrease the effectiveness of this control.

The receiving department should be independent of the purchasing department. When goods are received, they should be counted and inspected. Receiving reports should be prepared for all goods received. These documents should be serially numbered and prepared in a sufficient number of copies to permit prompt notification of the receipt of goods to the stores department, the purchasing department, and the accounts payable department.

Within the accounts (vouchers) payable department, all forms should be stamped with the date received. **Vouchers** and other documents originating within the department can be controlled through the use of serial numbers. Each step in the verification of an invoice

# Illustrative Case

## The Importance of Controls over Accounts Payable

The need for good IT system controls has become increasingly important as in recent years companies have downsized their accounts payable department. For example, *The Wall Street Journal* reports that General Electric Co., which processes in excess of 10 million invoices annually, reduced its accounts payable staff from approximately 400 employees to 180. Part of this reduction was made possible by a decision not to compare invoices with support prior to payment of vendors;

payables were analyzed only after the money had been disbursed. *The Journal* reports that GE reduced payroll costs, but duplicate payments and overpayments to vendors increased. Other companies have encountered similar situations. One corporate official suggests that unscrupulous vendors have become skilled in fooling computerized payables checking systems. He suggests that some vendors send two invoices with different numbers for the same item, and others add a letter to the end of an invoice number.

should be evidenced by entering a date and signature on the voucher. Comparison of the quantities listed on the invoice with those shown on the receiving report and purchase order prevents the payment of charges for goods in excess of those ordered and received. Comparison of the prices, discounts, and terms of shipment as shown on the purchase order and on the vendor's invoice provides a safeguard against the payment of excessive prices.

The separation of the function of invoice verification and approval from the function of cash disbursement is another step that tends to prevent errors and fraud. Before invoices are approved for payment, written evidence must be presented to show that all aspects of the transaction have been verified. The official who signs checks should stamp or perforate the voucher and supporting documents so that they cannot be presented to support payment a second time.

In an IT-based purchasing system, vendor invoice information is entered by the accounting department and may be matched by the IT system with other information. When goods are received, information may be keyed into the IT system with subsequent automated preparation of a receiving report and updating of inventory records. The IT system can match the information from purchase orders, receiving reports, and vendors' invoices and approve appropriate payments of accounts payable. Companies with IT-based systems should implement the controls described in Chapter 8 to ensure the accuracy of the systems input, processing, and output. Of particular concern is the possibility of paying invoice amounts twice since a smaller number of individuals examine documents in an IT-based system. Often, especially when invoices are not paid on a timely basis, a vendor will send a second invoice or statement requesting payment. Controls

must be designed to prevent duplicate payments of invoices, especially those for payment of services such as retainer fees to attorneys. The company should ensure that their vendors have unique invoice numbering systems that do not allow a duplicate invoice to be issued under a different invoice number. Also, standard procedures should be established for inputting vendor identification and invoice numbers. For example, the procedures should describe how leading zeros should be handled in inputting invoice numbers. The company may also use software to detect potential duplicate payments by identifying those of identical amounts that have similar vendor identification or invoice numbers.

Another control that the auditors may expect to find in a well-managed accounts payable department is the monthly balancing of the detailed records of accounts payable (or vouchers) to the general ledger control account. These reconciliations should be preserved as evidence of the performance of this procedure and as an aid in locating any subsequent errors.

**Vendors' statements** (previous page bottom), received monthly, should be reconciled promptly with the accounts payable ledger or list of open vouchers, and any discrepancies fully investigated. In some industries, it is common practice to make advances to vendors, which are recovered by making percentage deductions from invoices. When such advances are in use, the auditors should ascertain that procedures are followed to assure that deductions from the invoices are made in accordance with the agreement.

The operation of a purchase or acquisition transaction cycle is illustrated in Figure 14.1.

### Audit Documentation for Accounts Payable

The principal working papers are a lead schedule for accounts payable, trial balances of the various types of accounts payable at the balance sheet date, and confirmation requests for accounts payable. The trial balances are often in the form of copies of client electronic files. In addition, the auditors may prepare a listing of *unrecorded* accounts payable discovered during the course of the audit, as illustrated later, in Figure 14.6 (page 585). The auditors also will document the controls and risk assessments for accounts payable.

## Audit of Accounts Payable

The following steps indicate the general pattern of work performed by the auditors in the verification of accounts payable. Selection of the most appropriate procedures for a particular audit will be guided by the nature of the controls that have been implemented and by the results of the auditors' risk assessments.

- A. Use the understanding of the client and its environment to consider inherent risks, including fraud risks, related to accounts payable.
- B. Obtain an understanding of internal control over accounts payable.
- C. Assess the risks of material misstatement and design further audit procedures.
- D. Perform further audit procedures—tests of controls.
  1. Examples of tests of controls.
    - a. Verify a sample of postings to the accounts payable control account.
    - b. Vouch to supporting documents a sample of postings in selected accounts of the accounts payable subsidiary ledger.
    - c. Test IT application controls.
  2. If necessary, revise the risks of material misstatement based on the results of tests of controls.
- E. Perform further audit procedures—substantive procedures for accounts payable.
  1. Obtain or prepare a trial balance of accounts payable as of the balance sheet date and reconcile with the general ledger.
  2. Vouch balances payable to selected creditors by inspection of supporting documents.
  3. Reconcile liabilities with monthly statements from creditors.
  4. Confirm accounts payable by direct correspondence with vendors.
  5. Perform analytical procedures for accounts payable and related accounts.
  6. Search for unrecorded accounts payable.
  7. Perform procedures to identify accounts payable to related parties.
  8. Evaluate proper balance sheet presentation and disclosure of accounts payable.

**FIGURE 14.1** Flowchart of a Purchases System

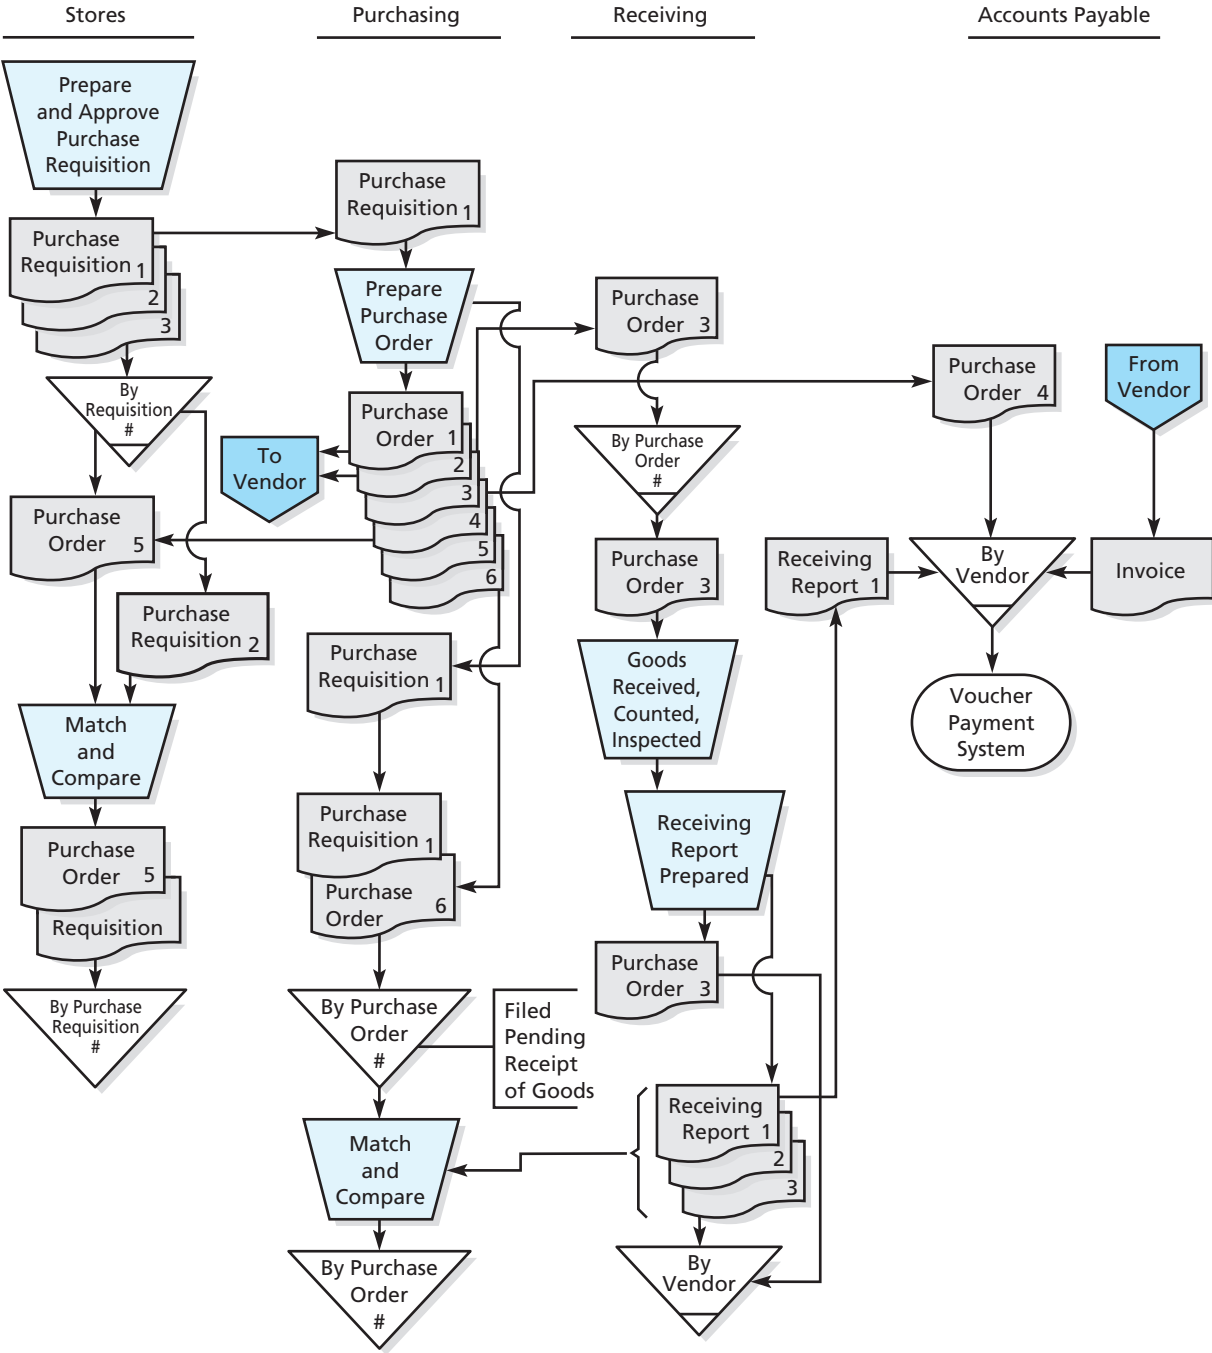

Figure 14.2 relates the objectives of the major substantive tests of payables to the primary audit objectives.

**LO 14-4**

Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to accounts payable.

**A. Use the Understanding of the Client and Its Environment to Consider Inherent Risks, Including Fraud Risks, Related to Accounts Payable.**

After they obtain an understanding of the client and its environment, the auditors are in a position to identify and assess inherent risks of accounts payable. Many of these risks arise from business risks faced by management, such as the risk of payment of unauthorized payables, and the failure to capture all accounts payable for financial reporting purposes.

If any of the inherent risks identified by the auditors are related to fraud, the auditors will make certain that they understand the programs and controls established by

**FIGURE 14.2**

management to control the risk. They will also determine that the controls have been implemented. Finally, the auditors will design appropriate responses to these fraud risks and all other risks of material misstatement.

### **B. Obtain an Understanding of Internal Control over Accounts Payable.**

One approach used by auditors in becoming familiar with a client's internal control over accounts payable is to prepare a flowchart or to use flowcharts prepared by the client. In some engagements, the auditors may choose to prepare a narrative description covering such matters as the independence of the accounts payable department and the receiving department from the purchasing department. The auditors might also use a questionnaire to obtain a description of accounts payable controls. Typical of the questions are the following: Is an accounts payable trial balance prepared monthly and reconciled to the general ledger controlling account? Are monthly statements from vendors reconciled with accounts payable ledgers or unpaid vouchers? Are advance payments to vendors recorded as receivables and controlled in a manner that assures that they will be recovered by offset against vendors' invoices? Are debit memos issued to vendors for discrepancies in invoice prices, quantities, or computations? Are debit balances in vendors' accounts brought to the attention of the credit and purchasing departments?

After the auditors have prepared a flowchart (or other description) of internal control, they determine whether the client is actually using the controls described to them; that is, they determine whether the controls have been implemented. The auditors will typically perform a walk-through of several purchase transactions and observe the implementation of the various controls. Figure 14.3 (pages 578–579) illustrates the documents and accounts that the auditors typically encounter in their consideration of controls over purchase transactions.

As the auditors verify their understanding of internal control, they will observe and inquire about the segregation of duties for purchases and cash disbursements. They will also inspect the various documents and reconciliations that are important to the client's internal control over accounts payable. For example, the reconciliations of monthly statements from vendors to the payables ledger will be inspected. Budgets for cash disbursements will be inspected and the auditors will review the evidence of the follow-up on variances from budgeted amounts of disbursements. These procedures may serve as tests of controls that provide the auditors with sufficient evidence to assess control risk for certain financial statement assertions about accounts payable as being at less than the maximum.

#### **LO 14-5**

Obtain an understanding of internal control over accounts payable.

### **C. Assess the Risks of Material Misstatement and Design Further Audit Procedures.**

Based on their understanding of the client and its environment, including internal control over accounts payable, the auditors develop their planned assessed levels of the risks of

material misstatement for the assertions about accounts payable. To support these assessments, the auditors may need to obtain additional evidence of the operating effectiveness of various controls. This evidence is obtained by performing tests of controls. In designing these tests, the auditors should decide which ones will result in sufficient reductions in substantive procedures to justify the time spent performing them.

The auditors' assessment of control risk, along with their assessment of inherent risk, will be used to plan the nature, timing, and extent of substantive procedures for accounts payable. In designing planned substantive procedures, the auditors will

consider potential misstatements that may occur and the weaknesses in control or other factors that make the misstatements more likely, as illustrated in Figure 14.4 (page 580).

#### D. Perform Further Audit Procedures—Tests of Controls.

Tests directed toward the effectiveness of controls help to evaluate the client's internal control and determine whether the auditors can support their planned assessed levels of the risks of material misstatement for the assertions about accounts payable. A number of tests of controls relating to accounts payable have already been discussed in Chapters 10 and 12. In this chapter, we briefly recap several significant tests.

##### 1. Examples of Tests of Controls.

###### a. Verify a Sample of Postings to the Accounts Payable Control Account.

The validity of the amount in the general ledger control account for accounts payable is established by tracing postings to the **voucher register** and cash disbursements journal.

**FIGURE 14.4** Potential Misstatements—Accounts Payable

Description of Misstatement	Examples	Internal Control Weaknesses or Factors That Increase the Risk of the Misstatement
Inaccurate recording of a purchase or disbursement	<b>Fraud:</b> <ul style="list-style-type: none"> <li>A bookkeeper prepares a check to himself and records it as having been issued to a major supplier.</li> </ul> <b>Error:</b> <ul style="list-style-type: none"> <li>A disbursement is made to pay an invoice for goods that have not been received.</li> </ul>	<ul style="list-style-type: none"> <li>Inadequate segregation of duties of record keeping and preparing cash disbursements, or check signer does not review and cancel supporting documents</li> <li>Ineffective controls for matching invoices with receiving documents before disbursements are authorized</li> </ul>
Misappropriation of purchases	<b>Fraud:</b> <ul style="list-style-type: none"> <li>Goods are ordered but delivered to an inappropriate address and stolen.</li> </ul>	<ul style="list-style-type: none"> <li>Ineffective controls for matching invoices with receiving documents before disbursements are authorized</li> </ul>
Duplicate recording of purchases	<b>Error:</b> <ul style="list-style-type: none"> <li>A purchase is recorded when an invoice is received from a vendor and recorded again when a duplicate invoice is sent by the vendor.</li> </ul>	<ul style="list-style-type: none"> <li>Ineffective controls for review and cancelation of supporting documents by the check signer</li> </ul>
Late (early) recording of cost of purchases—"cutoff problems"	<b>Fraud:</b> <ul style="list-style-type: none"> <li>Purchases journal "closed early" with this period's purchases recorded as having occurred in subsequent period.</li> </ul>	<ul style="list-style-type: none"> <li>Ineffective board of directors, audit committee, or internal audit function; "tone at the top" not conducive to ethical conduct; undue pressure to meet earnings target</li> </ul>

This work is performed before the balance sheet date as part of a general test of postings to all records. At the same time, the auditors should scrutinize all entries to the control account for the entire period under audit and should investigate any unusual entries.

**b. Vouch to Supporting Documents a Sample of Postings in Selected Accounts of the Accounts Payable Subsidiary Ledger.**

Testing the voucher register or the accounts payable ledgers by vouching specific items back through the cash payments journal, purchases journal, and other journals to original documents (such as purchase orders, receiving reports, invoices, and paid checks) is necessary to determine the operating effectiveness of certain controls. If the functions of purchasing, receiving, invoice verification, and cash disbursement are delegated to separate departments and controls appear adequate, the vouching of individual items from the ledgers to the original records may provide the auditors with sufficient evidence to assess control risk for certain assertions (e.g., existence) related to accounts payable as being at a low level.

The auditors may also perform tests by following the audit trail in the opposite direction. By tracing a representative sample of entries from the source documents to the accounts payable ledger, the auditors can verify that accounts payable are completely and accurately recorded on a timely basis.

**c. Test IT Application Controls.**

When the client has established effective IT application controls for purchase transactions, the auditors may find it more efficient to test these controls rather than to test a sample of purchase transactions. Batch processing controls might be tested by inspecting evidence of the reconciliations of batch control totals by the control group. In addition, a sample of the exception reports printed by the computer when the vendors' invoices do not match purchasing and receiving information might be inspected, as well as evidence of follow-up on these exceptions.

**LO 14-6**

Assess the risks of material misstatement of accounts payable and design further audit procedures, including tests of controls and substantive procedures, to address the risks.

## 2. If Necessary, Revise the Risks of Material Misstatement Based on the Results of Tests of Controls.

Completion of the above audit procedures enables the auditors to perform a final assessment of the risk of material misstatement for each of the major financial statement assertions about accounts payable. The auditors use the reassessment of control risk to determine whether it is necessary to modify their planned substantive procedures.

An assessment of low control risk for accounts payable often means that the auditors have found that serially numbered receiving reports are prepared promptly by the client for all goods received, that serially numbered vouchers are prepared and recorded in the voucher register, and that payments are made promptly on the due dates and immediately recorded in the cash payments journal and accounts payable subsidiary ledger. Finally, at the end of each month, an employee who does not participate in processing accounts payable compares the individual accounts in the accounts payable subsidiary ledger with vendors' statements and also compares the total of the subsidiary record with the general ledger control account. This strong internal control would enable the auditors to minimize substantive procedures for accounts payable.

On the other hand, an assessment of high control risk for accounts payable often means that the auditors have found that the subsidiary record of accounts payable is not in agreement with the general ledger control account, that receiving reports and vouchers are used haphazardly, that purchase transactions often are not recorded until payment is made, and that many accounts payable are long past due. In this situation, the auditors should undertake extensive substantive work if they are to determine that the balance sheet amount for accounts payable includes all liabilities in existence at the balance sheet date.

### E. Perform Further Audit Procedures—Substantive Procedures.

#### 1. Obtain or Prepare a Trial Balance of Accounts Payable as of the Balance Sheet Date and Reconcile with the General Ledger.

One purpose of this procedure is to determine that the liability figure appearing in the balance sheet is in agreement with the individual items comprising the detailed records. A second purpose is to provide a starting point for substantive procedures. The auditors will use the list of vouchers or accounts payable to select a representative group of items for careful examination.

The client company usually furnishes the auditors with a year-end trial balance. The auditors should verify the footing and the accuracy of individual amounts in the trial balance. If the schedule of individual items does not agree in total with the control account, the cause of the discrepancy should be investigated. In most situations, the auditors will arrange for the client's staff to locate such errors and make the necessary adjustments. Agreement of the control account and the list of individual account balances is not absolute proof of the total indebtedness; invoices received near the close of the period may not be reflected in either the control account or the subsidiary records, and other similar errors may exist without causing the accounts to be out of balance.

#### 2. Vouch Balances Payable to Selected Creditors by Inspection of Supporting Documents.

The vouching of selected creditors' balances to supporting vouchers, invoices, purchase orders, and receiving reports is a substantive procedure that addresses the existence and valuation of accounts payable. For companies that use a voucher system, the verification of the individual vouchers is made most conveniently at the balance sheet date, when the vouchers will be together in the unpaid voucher file. The content of the unpaid voucher file changes daily; as vouchers are paid, they are removed from the file and filed alphabetically by vendor. Consequently, it is important that the client maintain a list of year-end unpaid vouchers. This listing should show the names of vendors, voucher numbers, dates, and amounts.

#### 3. Reconcile Liabilities with Monthly Statements from Creditors.

In some companies, it is a regular practice each month to reconcile vendors' statements with the detailed records of payables. If the auditors find that the client's staff regularly performs

this reconciliation, they may limit their review of vendors' statements to determining that the reconciliation work has been satisfactory.

If the client's staff has not reconciled vendors' statements and accounts payable, the auditors may do so on a selected basis. When the risk of material misstatement for accounts payable is high, the auditors may control incoming mail to assure that all vendors' statements received by the client are made available to the auditors. Among the discrepancies often revealed by reconciliation of vendors' statements are charges by the vendor for shipments not yet received or recorded by the client. Although conceptually all goods on which title has passed should be included in inventory (thus items shipped FOB [free on board] shipping point as of year-end and not yet received should be included), normal accounting procedures often do not provide for recording invoices as liabilities until the merchandise has been received. In-transit shipments on which title has passed should be listed and a decision reached as to whether they are sufficiently material to warrant year-end adjustment.

#### 4. Confirm Accounts Payable by Direct Correspondence with Vendors.

Although **confirmation** of accounts payable is a widely used procedure, it is generally considered less necessary than is the confirmation of accounts receivable. One reason is that for accounts payable the auditors will find in the client's possession externally created evidence such as vendors' invoices and statements that substantiate the accounts payable. Generally only limited external evidence (e.g., the customer's purchase order) is on hand to support accounts receivable.

Another reason for the difference in significance attached to confirmation of accounts payable is that the greatest risk in the audit of liabilities is the possibility of unrecorded amounts. While confirmation can provide evidence about completeness, it is a more effective procedure for establishing existence and valuation of an item. To make the confirmation procedure more effective at addressing the completeness of accounts payable, the auditors will often use a *blank form*, as illustrated by Figure 14.5. This form asks the vendor to fill in the amount of the liability rather than to confirm a recorded amount.

Also, accounts payable confirmation requests should be sent to vendors from whom substantial purchases have been made during the year, regardless of the size of their accounts at the balance sheet date (even to suppliers whose accounts show *zero balances*). These substantial suppliers may be identified by reference to cash disbursement records or computer printouts of purchase volume by individual supplier, inquiry of purchasing department personnel, and examination of the accounts payable subsidiary ledger. Other accounts that often are confirmed by the auditors include those for which monthly statements are not available, accounts reflecting unusual transactions, accounts with parent or subsidiary corporations, and accounts secured by pledged assets.

#### 5. Perform Analytical Procedures for Accounts Payable and Related Accounts.

To gain assurance as to the overall reasonableness of accounts payable, the auditor may compute ratios such as purchases divided by accounts payable and accounts payable divided by total current liabilities. These ratios are compared with ratios for prior years to disclose trends that warrant investigation.

The list of amounts payable to individual vendors should be reviewed to identify any companies from which the client does not ordinarily acquire goods or services. The amounts owed to individual creditors should also be compared with balances in prior years. By studying yearly variations in purchases and other accounts closely related to accounts payable, the auditors may become aware of errors in accounts payable. Finally, the portion of accounts payable that is past due at year-end should be compared with corresponding data for previous years.

The auditors may test purchase discounts by computing the ratio of cash discounts earned to total purchases during the period and comparing this ratio from period to period. Any significant decrease in the ratio might indicate a change in terms of purchases, failure to take discounts, or fraudulent manipulation.

## 6. Search for Unrecorded Accounts Payable.

Throughout the audit, the auditors should be alert for any unrecorded payables. For example, the preceding three steps of this plan—reconciliation, confirmation, and analytical procedures—may disclose unrecorded liabilities. In addition to normal trade payables that may be unrecorded, other examples include unrecorded liabilities related to customers' deposits recorded as credits to accounts receivable, obligation for securities purchased but not settled at the balance sheet date, unbilled contractor or architect fees for a building under construction at the audit date, and unpaid attorney or insurance broker fees.

In addition to the prior audit steps, when searching for unrecorded accounts payable the auditors will examine transactions that were recorded following year-end. A comparison of cash payments occurring after the balance sheet date with the accounts payable trial balance is generally the most effective means of disclosing unrecorded accounts

payable. All liabilities must eventually be paid and will, therefore, be reflected in the accounts at least by the time they are paid. Regular monthly expenses, such as rent and utilities, are often posted to the ledger accounts directly from the cash disbursements journal without any account payable or other liability having been set up. Therefore, the auditors will often examine all cash disbursements over specific dollar amounts that are made by the client during the **subsequent period**.

The auditors should also consider potential sources of unrecorded payables such as the following:

- a. Unmatched invoices and unbilled receiving reports. These documents are called *work in process* in a voucher system. The auditors should review such unprocessed documents at the balance sheet date to ascertain that the client has recorded an account payable where appropriate.
- b. Vouchers payable entered in the voucher register subsequent to the balance sheet date. Inspection of these records may uncover an item that should have been recorded as of the balance sheet date.
- c. Invoices received by the client after the balance sheet date. Not all vendors send invoices promptly when goods are shipped or services are rendered. Accordingly, the auditors' review of invoices received by the client in the subsequent period may disclose unrecorded accounts payable as of the balance sheet date.
- d. **Consignments** in which the client acts as a consignee. The consignee assumes liability for consigned merchandise when those goods have been sold to third parties. Those sales, especially shortly before the year-end, may not have been set up as a liability to the consignor. While the auditors' overall knowledge about the accounting for such consigned items will dictate the appropriate procedures, those related to the revenue cycle, such as tests of sales transactions around year-end, may reveal such sales.

A form of audit working paper used to summarize unrecorded accounts payable discovered by the auditors is illustrated in Figure 14.6.

When the auditors discover unrecorded liabilities, the next question is whether the omissions are sufficiently material to warrant proposing an adjusting entry. Will the adjustment cause a sufficient change in the financial statements to give a different impression of the company's current position or of its earning power? As previously indicated in the discussion of the reconciliation of vendors' statements with accounts payable, auditors may choose not to propose adjustments for the purpose of adding shipments in transit to the year-end inventory unless the shipments are unusually large.

As a further illustration of the factors to be considered in deciding upon the *materiality* of an unrecorded transaction, let us use as an example the December 31 annual audit of a small manufacturing company in good financial condition with total assets of \$3 million and preadjustment net income of \$100,000. The auditors' procedures bring to light the following unrecorded liabilities:

- a. An invoice of \$1,400, dated December 30 and bearing terms of FOB shipping point. The goods were shipped on December 30 but were not received until January 4. The invoice was also received and recorded on January 4.  
In considering the materiality of this omission, the first point is that net income is not affected. The adjusting entry, if made, would add equal amounts to current assets (inventories) and to current liabilities; hence it would not change the amount of working capital. The omission does affect the current ratio very slightly. The auditor would probably consider this transaction as not sufficiently material to warrant adjustment.
- b. Another invoice for \$4,000, dated December 30 and bearing terms of FOB shipping point. The goods arrived on December 31 and were included in the physical inventory taken that day. The invoice was not received until January 8 and was entered as a January transaction.

This error should be corrected because the inclusion of the goods in the physical inventory without recognition of the liability has caused an error of \$4,000 in pretax

FIGURE 14.6 Search for Unrecorded Liabilities

THE PALERNO COMPANY				M-1-1
Unrecorded Accounts Payable				LK
December 31, 20X3				2/19/X4
Date	Invoice Number	Vendor and Description	Account Charged	Amount
12/31/X3	2581	Hayes Mfg. Co.—invoice and shipment in transit	Inventories	\$10,650.00
12/31/X3	2428	Tax & Williams—unpaid legal fees—see M-4	Legal Expenses	1,000.00
12/31/X3	-	Allen Enterprises—12/19 account sales for consigned goods	Sales	25,680.00
-	-	Hart & Co.—machinery repairs (paid 1/1/X4)	Repairs Expense	12,600.00
-	-	Grant Co.—shipment received 12/31/X3 per receiving report no. 2907; invoice not yet received	Cost of Sales	15,820.00
-	-	Arthur & Baker—earned but unpaid architects' fee for building under construction—see K-5	Construction in Progress	23,370.00
				<u>\$89,120.00</u>
-----				
A.J.E. #8	131	Inventories	10,650.00	
	501	Cost of Sales	15,820.00	
	156	Construction in Progress	23,370.00	
	401	Sales	25,680.00	
	518	Legal Expenses	1,000.00	
	527	Repairs Expense	12,600.00	
	203	Accounts Payable		89,120.00
To record unrecorded accounts payable at 12/31/X3				
The above payables were identified principally in the audit of accounts payable. See audit plan B-4 for procedures employed. In my opinion the \$89,120 adjustment includes all material unrecorded accounts payable.				
				LK
				2/23/X4

income for the year. Since the current liabilities are understated, both the amount of working capital and the current ratio are overstated. The owners' equity is also overstated. These facts point to the materiality of the omission and constitute strong arguments for an adjusting entry.

- c. An invoice for \$1,500, dated December 31, for a new office safe. The safe was installed on December 31, but the invoice was not recorded until paid on January 15.

Since the transaction involves only asset and liability accounts, the omission of an entry does not affect net income. However, working capital and the current ratio are affected by the error since the debit affects a noncurrent asset and the credit affects a current liability. Most auditors would probably not propose an adjusting entry for this item.

- d. An invoice for \$3,000, dated December 31, for advertising services rendered during October, November, and December. The invoice was not recorded until paid on January 15.

The argument for treating this item as sufficiently material to warrant adjustment is based on the fact that net income is affected, as well as the amount of working capital and the current ratio. The adjusting entry should probably be recommended in these circumstances.

The preceding examples suggest that a decision as to the materiality of an unrecorded transaction hinges to an important extent on whether the transaction affects net income.

Assuming that an omitted transaction *does* affect net income and there is doubt as to whether the dollar amount is large enough to warrant adjustment, the auditors should bear in mind that about one-third of the effect of the error on net income may be eliminated by corporate income taxes. In other words, an adjusting entry to record an omitted expense item of \$10,000 may reduce after-tax income by only \$6,500. If the adjusting entry is not made, the only ultimate effect is a shift of \$6,500 between the net incomes of two successive years. Unless the client requests all adjusting entries, the auditors should avoid proposing adjusting entries for clearly inconsequential errors in the year-end cutoff of transactions. However, it should be borne in mind that a number of insignificant individual misstatements may be material in their *cumulative* effect on the financial statements. Therefore, the auditors will accumulate the effects of the adjusting entries not proposed (passed) to consider them with misstatements detected in other accounts, as discussed in Chapter 16.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

### 7. Perform Procedures to Identify Accounts Payable to Related Parties.

Payables to a corporation's officers, directors, stockholders, or affiliates require particular attention by the auditors since they are not the result of arm's-length bargaining by parties of opposing interests. Here the auditors should consider the possibility that these payables relate to purchases of inventory or other asset items for which there may be valuation questions.

The independent auditors should search for such payables. All material payables to related parties must be disclosed in the financial statements.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

### 8. Evaluate Proper Balance Sheet Presentation and Disclosure of Accounts Payable.

Proper balance sheet presentation of accounts payable requires that any material amounts payable to related parties (directors, principal stockholders, officers, and employees) be listed separately from amounts payable to trade creditors.

Debit balances of substantial amount sometimes occur in accounts payable because of such events as duplicate payments made in error, return of merchandise to vendors after payment has been made, and advances to suppliers. If these debit balances are material, a reclassification entry should be made in the audit working papers so that the debit balances will appear as assets in the balance sheet rather than being offset against other accounts payable with credit balances.

If the client company acts as a consignee of merchandise, it is possible that sales of consigned goods shortly before the year-end may not have been set up as a liability to the consignor. An accurate determination of any amounts owing to consignors at the balance sheet date is one step in the proper balance sheet presentation of liabilities.

Accounts payable secured by pledged assets should be disclosed in the balance sheet (or a note thereto) and cross-referenced to the pledged assets.

## Other Liabilities

Notes payable are discussed in the next chapter. In addition to the accounts payable previously considered, other items classified as current liabilities include:

1. Amounts withheld from employees' pay.
2. Sales taxes payable.
3. Unclaimed wages.
4. Customers' deposits.
5. Accrued liabilities.

### Amounts Withheld from Employees' Pay

Payroll deductions are numerous; among the more important are Social Security taxes and individual income taxes. Although the federal and state governments do not specify the exact form of records to be maintained, they do require that records of amounts earned and withheld be adequate to permit a determination of compliance with tax laws.

Income taxes withheld from employees' pay and not remitted as of the balance sheet date constitute a liability to be verified by the auditors. Accrued employer payroll taxes may be audited at the same time. This verification usually consists of tracing the amounts withheld to the payroll summary sheets, testing computations of taxes withheld and accrued, determining that taxes have been deposited or paid in accordance with federal and state laws and regulations, and reviewing quarterly tax returns.

Payroll deductions also are often made for union dues, charitable contributions, retirement plans, insurance, savings bonds, and other purposes. Besides verifying the liability for any such amounts withheld from employees and not remitted as of the balance sheet date, the auditors should review the adequacy of the withholding procedures and determine that payroll deductions have been properly authorized and accurately computed.

---

### **Sales Taxes Payable**

In most sections of the United States, business concerns involved in retail sales are required to collect sales taxes imposed by state and local governments. These taxes do not represent an expense to the business; the retailer merely acts as a collecting agent. Until the amounts collected from customers are remitted to the taxing authority, they constitute current liabilities of the business. The auditors' verification of this liability includes a review of the client's periodic tax returns. The reasonableness of the liability also is tested by a computation applying the tax rate to total taxable sales. In addition, the auditors should examine a number of sales invoices to ascertain that customers are being charged the correct amount of tax. Debits to the liability account for remittances to the taxing authority should be traced to copies of the tax returns and vouched to the paid checks.

---

### **Unclaimed Wages**

Unclaimed wages are, by their very nature, subject to misappropriation. The auditors, therefore, are concerned with the adequacy of internal control over this item. A list of unpaid wages should be prepared after each payroll distribution. The payroll checks should not be left for more than a few days in the payroll department. Prompt deposit in a special bank account provides much improved control. The auditors will analyze the Unclaimed Wages account for the purpose of determining that (1) the credits represent all unclaimed wages after each payroll distribution and (2) the debits represent only authorized payments to employees, remittances to the state under unclaimed property laws, or transfers back to general cash funds through approved procedures.

---

### **Customers' Deposits**

Many companies require that customers make deposits on returnable containers. Public utilities and common carriers also may require deposits to guarantee payment of bills or to cover equipment on loan to the customer. A review of the procedures followed in accepting and returning deposits should be made by the auditors with a view to disclosing any shortcomings in internal control. In some instances, deposits shown by the records as refunded to customers may in fact have been abstracted by employees.

The verification should include obtaining a list of the individual deposits and a comparison of the total with the general ledger control account. If deposits are interest-bearing, the amount of accrued interest should also be tested for reasonableness. As a general rule, the auditors do not attempt to confirm deposits by direct communication with customers; however, this procedure is desirable if the amounts involved are substantial or controls are considered to be deficient.

---

### **Accrued Liabilities**

Most accrued liabilities (expenses) represent obligations payable sometime during the succeeding period for services or privileges received before the balance sheet date. Examples include interest payable, accrued property taxes, accrued payrolls and payroll taxes, income taxes payable, and amounts accrued under service guarantees.

Accrued liabilities represent accounting estimates made by the client of amounts that will subsequently become payable. Recall from Chapter 5 that, in evaluating the reasonableness of accounting estimates, auditors use one or more of the following three basic approaches:

1. Review and test management's process of developing the estimate.
2. Review subsequent events or transactions bearing on the estimate.
3. Independently develop an estimate of the amount to compare to management's estimate.

For most accrued liabilities, the audit approach will emphasize a review and test of management's process of developing the estimates (see particularly audit plan steps 1 through 5 below).

Issues such as management's estimates (1) being based on highly subjective assumptions, and (2) often made through manual computations may make it difficult to establish control over accrued liabilities. As a result, these estimates may be particularly susceptible to misstatement, especially in circumstances in which management is under pressure to show increased earnings.

The basic auditing steps for accrued liabilities are:

1. Examine any contracts or other documents on hand that provide the basis for the accrual.
2. Appraise the accuracy of the detailed accounting records maintained for this category of liability.
3. Identify and evaluate the reasonableness of the assumptions made that underlie the computation of the liability.
4. Test the computations made by the client in setting up the accrual.
5. Determine that accrued liabilities have been treated consistently at the beginning and end of the period.
6. Consider the need for accrual of other accrued liabilities not presently considered (that is, test completeness).
7. For significant estimates, perform a retrospective analysis of the prior year's estimates for evidence of management bias.

The following sections describe the nature of the audit of various accrued liabilities.

#### *Accrued Property Taxes*

Property tax payments are usually few in number and substantial in amount. It is, therefore, feasible for the audit working papers to include an analysis showing all of the year's property tax transactions. Tax payments should be verified by inspection of the property tax bills issued by local government units and by reference to the related paid checks. If the tax accruals at the balance sheet date differ significantly from those of prior years, an explanation of the variation should be obtained. The auditors should verify that property tax bills have been received on all taxable property or that an estimated tax has been accrued.

#### *Accrued Payrolls*

The audit of payrolls from the standpoint of appraising the adequacy of controls and substantiating the expenditures for the period under audit is considered in Chapter 16. The present consideration of payrolls is limited to the procedures required for testing accrued payrolls at the balance sheet date.

Accrued gross salaries and wages appear on the balance sheets of virtually all concerns. The accuracy of the amount accrued may be significant in the determination of total liabilities and also in the proper matching of costs and revenue. The verification procedure consists principally of comparing the amounts accrued to the actual payroll of the subsequent period and reviewing the method of allocation at the balance sheet date. Payments made at the first payroll dates of the subsequent period are reviewed to determine that no significant *unrecorded* payroll liability existed as of the balance sheet date.

#### *Pension Plan Accruals*

Auditing procedures for the accrued liability for pension costs may begin with a review of the copy of the pension plan in the auditors' permanent file. Then consideration should be given to the provisions of the Employee Retirement Income Security Act (ERISA).

The auditors should determine that the client's accrued pension liability is presented in accordance with *FASB ASC 715*, including consideration of service cost, interest cost, amortization of transition and service costs, and gains and losses on pension plan assets. In auditing these amounts, the auditors will obtain representations from an actuary and confirm the activity in the plan with the trustee. In evaluating the evidence from the actuary, the auditors should comply with the requirements of AICPA AU-C 620 (PCAOB 336) for using the work of a specialist, as discussed in Chapter 5.

#### *Postemployment Benefits Other Than Pensions*

Under *FASB ASC 715*, companies must accrue, during the years that employees perform services, the expected cost of providing health and similar retirement benefits to the employees, their beneficiaries, and their dependents. Determining the amount of these liabilities is a very complex procedure, because assumptions must be made about matters such as employee work lives and increases in medical costs. Since actuaries and other specialists develop these assumptions, the auditors should evaluate the assumptions and the specialists' qualifications in accordance with AICPA AU-C 620 (PCAOB 336).

#### *Accrued Vacation Pay*

Closely related to accrued salaries and wages is the liability that may exist for accrued vacation pay. This type of liability arises from two situations: (1) An employee entitled by contract to a vacation during the past year may have been prevented from taking it by an emergency work schedule, and (2) an employee may be entitled to a future vacation of which part of the cost must be accrued to achieve a proper matching of costs and revenue.

The auditors' verification of accrued vacation pay may begin with a review of the permanent file copy of the employment contract or agreement stipulating vacation terms. The computation of the accrual should then be verified both as to arithmetical accuracy and for agreement with the terms of the company's vacation policy.

#### *Product Warranty Liabilities*

The products of many companies are sold with a guarantee of free service or replacement during a rather extended warranty period. The costs of rendering such services should be recognized as expenses in the year the product is sold rather than in a later year in which the replacement is made or the repair service is performed. If this policy is followed, the company will make an annual charge to expense and a credit to a liability account based on the amount of the year's sales and the estimated future service or replacement cost. As repairs and replacements take place, the costs will be charged to the liability account.

The auditors should review the client's annual provision for estimated future expenditures and compute the percentage relationship between the amount in the liability account and the amount of the year's sales. If this relationship varies sharply from year to year, the client should be asked for an explanation. The auditors should also review the charges to the liability account month by month and be alert for the improper recording of other expenses in this account. Sudden variations in the monthly charges to the liability account require investigation. In general, the auditors should determine that the balance in the liability account for service guarantees moves in reasonable relationship with the trend of sales. The auditors also should be alert for changes in the client's products or repair costs that might affect the amount of the warranty liability.

Current income tax laws prohibit the deduction of provisions for warranty liabilities; deductions are permitted only when actual expenditures are incurred. Accordingly, the auditors should ascertain that the client is properly allocating income taxes attributable to the nondeductible provisions.

#### *Accrued Commissions and Bonuses*

Accrued commissions to sales representatives and bonuses payable to managerial personnel also require verification. The essential step in this case is reference to the authority for the commission or bonus. The basic contracts should be examined and traced to minutes of directors' meetings. If the bonus or commission is based on the total volume of sales or

### Focus on the Airline Industry

The frequent flyer travel award programs in the airline industry are similar to product warranty liabilities in the sense that a free service is associated with the purchase of airline tickets. These programs provide an excellent example of the accounting and auditing difficulties involved with many accrued liabilities. In these programs, travelers earn frequent flier mileage, for flying with the airline, which may be exchanged for flight awards.

In accounting for these programs, estimates must be made of the percentage of the mileage that will ultimately be redeemed as well as the expected cost of providing the travel. Currently, airlines account for the awards by the incremental cost method, which calculates the airline's liability as the incremental cost associated with transporting a passenger in an otherwise empty seat. While auditors may easily test computations and determine that the liability has been treated consistently at the beginning and end of the period, determining the reasonableness of the estimates of redemption rates and future costs is more difficult. Generally, they must use analytical procedures that focus on the prior experience of the client and other airline companies.

some other objective measure, the auditors should verify the computation of the accrual by applying the prescribed rate to the amount used as a base.

### *Income Taxes Payable*

Federal, state, and foreign income taxes on corporations represent a material factor in determining both net income and financial position. The auditors cannot express an opinion on either the balance sheet or income statement of a corporation without first obtaining evidence that the provision for income taxes has been properly computed. In the audit of small and medium-size companies, it is customary for the audit engagement to include the preparation of the client's tax returns. If the client's staff or other persons have prepared the income tax returns, the auditors should nevertheless verify the reasonableness of the tax liability if they are to express an opinion on the fairness of the financial statements. In performing such a review of a tax return prepared by the client's staff or by others, the auditors may sometimes discover an opportunity for a tax saving that has been overlooked; obviously such a discovery tends to enhance the client's appreciation of the services rendered by the auditors.

The auditors should analyze the Income Taxes Payable account and vouch all amounts to income tax returns, paid checks, or other supporting documents. The final balance in the Income Taxes Payable account will ordinarily equal the computed federal, state, and foreign taxes on the current year's income tax returns, less any payments thereon.

The tax expected to be paid by a corporation often differs from the actual tax paid due to temporary differences between taxable income and pretax accounting income. These differences result in the need to establish deferred tax liabilities or assets. The auditors determine the amount of deferred tax liabilities using schedules referred to as "tax accrual" working papers, which usually are reviewed by one of the CPA firm's tax specialists.

Besides reviewing the computation of the income tax liability for the current year, the auditors should determine the date on which income tax returns for prior years were examined by IRS agents, as well as the particulars of any disputes or additional assessments. Review of the reports of revenue agents is also an essential step. In the first audit of a new client, the auditors should review any prior years' income tax returns not yet examined by revenue agents to make sure that there has been no substantial underpayment of taxes that would warrant presentation as a liability.

### *Accrued Professional Fees*

Fees of professional firms include charges for the services of attorneys, public accountants, consulting engineers, and other specialists who often render services of a continuing nature but present bills only at infrequent intervals. By inquiry of officers and by review of corporate minutes, the auditors may learn of professional services received for which no liability has yet been reflected in the accounts. Review of the expense account for legal fees is always essential because it may reveal damage suits, tax disputes, or other litigation warranting disclosure in the financial statements.

---

## Balance Sheet Presentation

Accrued expenses—interest, taxes, rent, and wages—are included in the current liability section of the balance sheet and sometimes combined into one figure. Income taxes payable, however, may be sufficiently material to be listed as a separate item. Deferred federal income taxes resulting from tax allocations should be classified as current liabilities (or assets) if they relate to the next year. Otherwise, deferred federal income taxes are classified as noncurrent.

Deferred credits to revenue for such items as rent or interest collected in advance that will be included in earnings in the succeeding period are customarily included in current liabilities. Deposits on contracts and similar advances from customers also are accorded the status of current liabilities because the receipt of an advance increases the current assets total and because the goods to be used in liquidating the advance are generally included in current assets.

---

## Time of Examination

The nature and amount of **trade accounts payable** may change greatly within a few weeks' time; consequently, the auditors' verification of these rapidly changing liabilities is most effective when performed immediately after the balance sheet date. As emphasized at the beginning of this chapter, failure to record a liability will cause an overstatement of financial position. Audit work on accounts payable performed before the balance sheet date is of little value if the client fails to record important liabilities coming into existence during the remaining weeks of the year under audit. For this reason, many auditors believe that most of the audit work on accounts payable should be performed *after the balance sheet date*. Certainly, the auditors' search for unrecorded liabilities must be made after the balance sheet date because this search is concentrated on the transactions occurring during the first few weeks of the new year.

Some current liability accounts other than accounts payable are more suitable for preliminary audit work. The documents relating to accrued property taxes, for example, may be available in advance of the balance sheet date. Amounts withheld from employees' pay also can be reviewed before the end of the year. The propriety of amounts withheld and of amounts remitted to the tax authorities during the year can be verified before the pressure of year-end work begins. The working papers relating to such liability accounts then may be completed very quickly after the end of the accounting period.

---

## Chapter Summary

This chapter explained the fundamental controls over accounts payable and purchase transactions. It also discussed the auditors' consideration of these controls and the substantive procedures for accounts payable and purchases. To summarize:

1. Accounts payable are short-term obligations arising from the purchase of goods and services in the ordinary course of the business.
2. The purchases cycle includes initiating and authorizing purchases, ordering goods and services, and recording and paying accounts payable. Effective internal control over purchase transactions is best achieved by having separate departments responsible for purchasing, receiving, and accounting for the transactions. In this manner, payments are made only for those purchases that are properly authorized and received.
3. The auditors' principal objectives for the substantive procedures for accounts payable and purchases are to (a) substantiate the existence of recorded accounts payable and the occurrence of purchase transactions, (b) establish the completeness of accounts payable and purchase transactions, (c) determine that the client has obligations to pay the recorded accounts payable, (d) verify the cutoff of purchase transactions, (e) determine the appropriate valuation and accuracy of accounts payable, and (f) determine that the presentation and disclosure of accounts payable and purchases are appropriate.

4. In auditing accounts payable and other liabilities, it is important for the auditors to remember that an understatement of liabilities will exaggerate the financial strength of a company in the same way as an overstatement of assets. Therefore, the auditors' substantive procedures primarily focus on the objective of determining the completeness of recorded amounts. A number of these procedures involve inspecting documents related to transactions occurring during the subsequent period to determine whether these items should have been recorded as liabilities at year-end.
5. Accrued liabilities represent obligations payable for services received before the balance sheet date that will be paid in the subsequent period. Examples include accrued warranty liabilities, accrued payroll, and accrued pension liabilities. The substantive procedures to audit these liabilities generally include inspection of documents, recomputation, and analytical procedures.

## Key Terms Introduced or Emphasized in Chapter 14

**Accrued liabilities (accrued expenses) (572)** Short-term obligations for services of a continuing nature that accumulate over time. Examples include interest, taxes, rent, salaries, and pensions. They generally are not evidenced by invoices or statements.

**Confirmation (582)** Direct communication with vendors or suppliers to determine the amount of an account payable. Represents high-quality evidence because it is a document created outside the client organization and transmitted directly to the auditors.

**Consignment (584)** A transfer of goods from the owner to another person who acts as the sales agent of the owner.

**Subsequent period (584)** The time extending from the balance sheet date to the date of the auditors' report.

**Trade accounts payable (591)** Current liabilities arising from the purchase of goods and services from trade creditors, generally evidenced by invoices or statements received from the creditors.

**Vendor's statement (575)** A monthly statement prepared by a vendor (supplier) showing the beginning balance, charges during the month for goods or services, amounts collected, and ending balance. This externally created document should correspond (except for timing differences) with an account in the client's accounts payable subsidiary ledger.

**Voucher (573)** A document authorizing a cash disbursement. A voucher usually provides space for the initials of employees performing various approval functions. The term *voucher* may also be applied to the group of supporting documents used as a basis for recording liabilities or for making cash disbursements.

**Voucher register (579)** A journal used in a voucher system to record liabilities requiring cash payment in the near future. Every liability recorded in a voucher register corresponds to a voucher authorizing future payment.

## Review Questions

- 14-1. If a corporation overstates its earnings, are its liabilities more likely to be overstated or understated? Explain.
- 14-2. Lawsuits against CPA firms are most likely to allege that the auditors were negligent in not detecting which of the following? (a) overstatement of liabilities and earnings, (b) understatement of assets and earnings, or (c) overstatement of owners' equity. Explain the reasoning underlying your choice.
- 14-3. Assume that a highly placed employee has stolen company assets and is now planning to conceal the fraud by failing to make an accounting entry for a large transaction. Would the omission probably be for a transaction creating an asset or a liability? Explain.
- 14-4. Suggest two reasons why the adjustments proposed by independent auditors more often than not call for reducing recorded earnings.
- 14-5. Compare the auditors' approach to the verification of liabilities with their approach to the verification of assets.

- 14-6. The auditors usually find in the client's possession documentary evidence, such as invoices, supporting both accounts receivable and accounts payable. Is there any difference in the quality of such evidence for accounts receivable and for accounts payable? Explain.
- 14-7. Describe briefly an internal control activity that would prevent a paid disbursement voucher from being presented for payment a second time.
- 14-8. The operating procedures of a well-managed accounts payable department will provide for the verification of several specific points before a vendor's invoice is recorded as an approved liability. What are the points requiring verification?
- 14-9. List the major responsibilities of an accounts payable department.
- 14-10. In achieving adequate internal control over operations of the accounts payable department, a company should establish procedures that will ensure that extensions and footings are proved on all invoices and that the propriety of prices is reviewed. What is the most effective means of assuring consistent performance of these duties?
- 14-11. Which do you consider the more significant step in establishing strong internal control over accounts payable transactions: the approval of an invoice for payment, or the issuance of a check in payment of an invoice? Explain.
- 14-12. For which documents relating to the accounts payable operation would you recommend the use of serial numbers as an internal control activity?
- 14-13. What internal control activity would you recommend to call attention to a failure to pay invoices within the discount period?
- 14-14. During the verification of the individual invoices composing the total of accounts payable at the balance sheet date, the auditors discovered some receiving reports indicating that the merchandise covered by several of these invoices was not received until after the balance sheet date. What action should the auditors take?
- 14-15. As part of the investigation of accounts payable, auditors sometimes vouch entries in selected creditors' accounts back through the journals to original documents, such as purchase orders, receiving reports, invoices, and paid checks. What is the principal purpose of this procedure?
- 14-16. Outline a method by which the auditors may test the propriety of cash discounts taken on accounts payable.
- 14-17. Is the confirmation of accounts payable by direct communication with vendors as useful and important an audit procedure as such confirmation of accounts receivable? Explain.
- 14-18. Whitehall Company records its liabilities in an accounts payable subsidiary ledger. The auditors have decided to select some of the accounts for confirmation by direct communication with vendors. The largest volume of purchases during the year has been made from Ranchero Company, but at the balance sheet date this account has a zero balance. Under these circumstances, should the auditors send a confirmation request to Ranchero Company, or would they accomplish more by limiting their confirmation to accounts with larger year-end balances?
- 14-19. Vendors' statements and accounts payable confirmations are both forms of documentary evidence created outside the client organization and useful in audit work on accounts payable. Which of these two represents higher-quality evidence? Why?
- 14-20. Explain how the auditors coordinate the year-end cutoff of accounts payable with their observation of the year-end physical inventory.
- 14-21. Identify three audit procedures (other than "Search for unrecorded accounts payable") that are concerned directly or indirectly with disclosing unrecorded accounts payable.
- 14-22. What do you consider to be the most important single procedure in the auditors' search for unrecorded accounts payable? Explain.
- 14-23. What is the purpose of the auditors' review of cash payments subsequent to the balance sheet date?
- 14-24. Most auditors are interested in performing as many phases of an audit as possible in advance of the balance sheet date. The verification of accounts payable, however, generally is regarded as something to be done after the balance sheet date. What specific factors can you suggest that make the verification of accounts payable less suitable than many other accounts for interim work?
- 14-25. What documentary evidence created outside the client's organization is particularly important to the auditors in verifying accrued property taxes?
- 14-26. What differences should auditors expect to find in supporting evidence for accrued liabilities as contrasted with accounts payable?

## Questions Requiring Analysis

- LO 14-1, 6** 14-27. Auditors usually send confirmations to obtain evidence about accounts receivable and accounts payable.
- Is confirmation presumptively required for accounts receivable, accounts payable, or both?
  - Are accounts receivable requests, accounts payable requests, or both mailed by the auditors (as opposed to client personnel)?
  - Which assertion do confirmation results most directly address—existence or completeness?
- LO 14-4, 6** 14-28. In the course of your initial audit of the financial statements of Sylvan Company, you determine that of the substantial amount of accounts payable outstanding at the close of the period, approximately 75 percent is owed to six creditors. You have requested that you be permitted to confirm the balances due to these six creditors by communicating with the creditors, but the president of the company is unwilling to approve your request on the grounds that correspondence in regard to the balances—all of which contain some overdue items—might give rise to demands on the part of the creditors for immediate payment of the overdue items and thereby embarrass Sylvan Company.
- Given these circumstances, what alternative procedure would you adopt in an effort to satisfy yourself that the accounting records show the correct amounts payable to these creditors?
- (AICPA, adapted)
- LO 14-6** 14-29. The subsequent period in an audit is the time extending from the balance sheet date to the date of the auditors' report.
- Required:* Discuss the importance of the subsequent period in the audit of trade accounts payable.
- LO 14-1, 3, 4, 6** 14-30. Early in your first audit of Star Corporation, you notice that sales and year-end inventory are almost unchanged from the prior year. However, cost of goods sold is less than in the preceding year, and accounts payable also are down substantially. Gross profit has increased, but this increase has not carried through to net income because of increased executive salaries. Management informs you that sales prices and purchase prices have not changed significantly during the past year, and there have been no changes in the product line. Star Corporation relies on the periodic inventory system. Your initial impression of internal control is that several weaknesses may exist.
- Suggest a possible explanation for the trends described, especially the decrease in accounts payable while sales and inventory were constant and gross profit increased. Explain fully the relationships involved.
- LO 14-1, 4, 6** 14-31. During the course of any audit, the auditors are always alert for unrecorded accounts payable or other unrecorded liabilities.
- Required:* For each of the following audit areas, (1) describe an unrecorded liability that might be discovered and (2) state what auditing procedure or procedures might bring it to light.
- Construction in progress (property, plant, and equipment).
  - Prepaid insurance.
  - License authorizing the client to produce a product patented by another company.
  - Minutes of directors' meetings.
- LO 14-1, 6** 14-32. Describe the audit steps that generally would be followed in establishing the propriety of the recorded liability for federal income taxes of a corporation you are auditing for the first time. Consideration should be given to the status of (a) the liability for prior years and (b) the liability arising from the current year's taxable income.

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

- LO 14-6** 14-33. **Multiple Choice Questions**
- Select the best answer for each of the following and explain the reason for your selection.
- Which of the following procedures is *least* likely to be completed before the balance sheet date?
    - Confirmation of receivables.
    - Search for unrecorded liabilities.
    - Observation of inventory.
    - Review of internal accounting control over cash disbursements.
  - An audit of the balance in the accounts payable account is ordinarily not designed to:
    - Detect accounts payable that are substantially past due.
    - Verify that accounts payable were properly authorized.
- LO 14-2, 4, 6**

- (3) Ascertain the reasonableness of recorded liabilities.  
 (4) Determine that all existing liabilities at the balance sheet date have been recorded.
- LO 14-4, 6** c. Which of the following is the best audit procedure for determining the existence of unrecorded liabilities?
- (1) Examine confirmation requests returned by creditors whose accounts appear on a subsidiary trial balance of accounts payable.  
 (2) Examine unusual relationships between monthly accounts payable balances and recorded purchases.  
 (3) Examine a sample of invoices a few days prior to and subsequent to year-end to ascertain whether they have been properly recorded.  
 (4) Examine selected cash disbursements in the period subsequent to year-end.
- LO 14-1, 4, 6** d. Auditor confirmation of accounts payable balances at the balance sheet date may be unnecessary because:
- (1) This is a duplication of cutoff tests.  
 (2) Accounts payable balances at the balance sheet date may *not* be paid before the audit is completed.  
 (3) Correspondence with the audit client's attorney will reveal all legal action by vendors for nonpayment.  
 (4) There is likely to be other reliable external evidence available to support the balances.
- LO 14-1, 3, 5** e. A client erroneously recorded a large purchase twice. Which of the following internal control measures would be most likely to detect this error in a timely and efficient manner?
- (1) Footing the purchases journal.  
 (2) Reconciling vendors' monthly statements with subsidiary payable ledger accounts.  
 (3) Tracing totals from the purchases journal to the ledger accounts.  
 (4) Sending written quarterly confirmation to all vendors.
- LO 14-3, 5** f. For effective internal control, the accounts payable department should compare the information on each vendor's invoice with the:
- (1) Receiving report and the purchase order.  
 (2) Receiving report and the voucher.  
 (3) Vendor's packing slip and the purchase order.  
 (4) Vendor's packing slip and the voucher.
- LO 14-3, 6** g. When confirming accounts payable, the approach is most likely to be one of:
- (1) Selecting the accounts with the largest balances at year-end, plus a sample of other accounts.  
 (2) Selecting the accounts of companies with whom the client has previously done the most business, plus a sample of other accounts.  
 (3) Selecting a random sample of accounts payable at year-end.  
 (4) Confirming all accounts.
- LO 14-2, 6** h. In an audit, the valuation of year-end accounts payable is most likely addressed by:
- (1) Confirmation.  
 (2) Examination of cash disbursements immediately prior to year-end.  
 (3) Examination of cash disbursements immediately subsequent to year-end.  
 (4) Analytical procedures applied to vouchers payable at year-end.
- LO 14-1, 2** i. Ordinarily, the most significant assertion relating to accounts payable is:
- (1) Completeness.  
 (2) Existence.  
 (3) Presentation.  
 (4) Valuation.
- LO 14-1, 6** j. The *least* likely approach in auditing management's estimate relating to an accrued liability is to:
- (1) Independently develop an estimate of the amount to compare to management's estimate.  
 (2) Review and test management's process of developing the estimate.  
 (3) Review subsequent events or transactions bearing on the estimate.  
 (4) Send confirmations relating to the estimate.

## LO 14-3, 5

k. To determine that each voucher is submitted and paid only once, when a payment is approved, supporting documents should be canceled by the:

- (1) Authorized members of the audit committee.
- (2) Accounting department.
- (3) Individual who signs the checks.
- (4) Chief executive officer.

## LO 14-2, 6

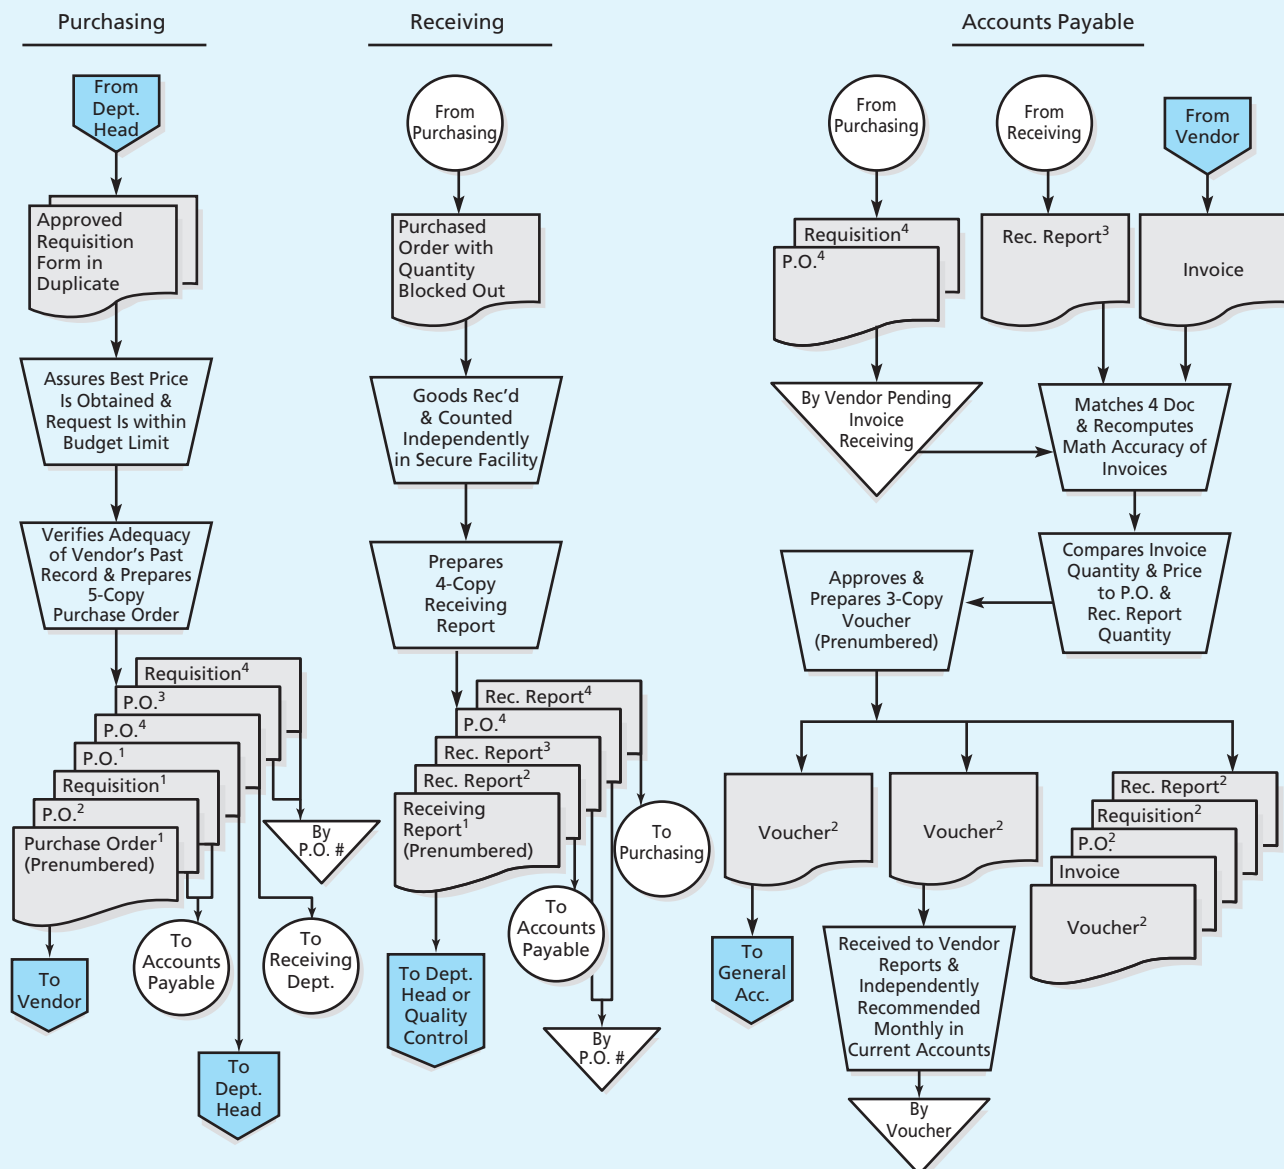

l. In performing a test of controls, the auditors vouch a sample of entries in the purchases journal to the supporting documents. Which assertion would this test of controls most likely test?

- (1) Completeness.
- (2) Existence.
- (3) Valuation.
- (4) Rights.

## LO 14-1, 2, 5 14-34.

**Simulation**

The following flowchart depicts the activities relating to the purchasing, receiving, and accounts payable departments of Model Company, Inc. Assume that you are a supervising assistant assigned to the Model Company audit.

Joe Werell, a beginning assistant, analyzed the flowchart and has supplemented the flowchart by making certain inquiries of the controller. He has concluded that the internal control over purchasing, receiving, and accounts payable is strong and has provided the following list of what he refers to as internal control strengths. Review his list and for each internal control strength indicate whether you agree or disagree that each represents a strength. For those in which you disagree, briefly explain why.

### Internal Control Strengths Prepared by Joe Werell

- |                         |   |
|-------------------------|---|
| <i>Purchasing</i>       | <ul style="list-style-type: none"> <li>a. The department head of the requisitioning department selects the appropriate supplier.</li> <li>b. Proper authorization of requisitions by department head is required before purchase orders are prepared.</li> <li>c. Purchasing department makes certain that a low-cost supplier is always chosen.</li> <li>d. Purchasing department assures that requisitions are within budget limits before purchase orders are prepared.</li> </ul>   |
| <i>Receiving</i>        | <ul style="list-style-type: none"> <li>e. The adequacy of each vendor's past record as a supplier is verified.</li> <li>f. Secure facilities limit access to the goods during the receiving activity.</li> <li>g. Receiving department compares its count of the quantity of goods received with that listed on its copy of the purchase order.</li> <li>h. A receiving report is required for all purchases, including purchases of services.</li> <li>i. The requisitioning department head independently verifies the quantity and quality of the goods received.</li> <li>j. Requisitions, purchase orders, and receiving reports are matched with vendor invoices as to quantity and price.</li> </ul> |
| <i>Accounts Payable</i> | <ul style="list-style-type: none"> <li>k. Accounts payable department personnel recompute the mathematical accuracy of each invoice.</li> <li>l. The voucher register is independently reconciled to the control accounts monthly by the originators of the related vouchers.</li> <li>m. All supporting documentation is marked "paid" by accounts payable immediately prior to making it available to the treasurer.</li> <li>n. All supporting documentation is required for payment and is made available to the treasurer.</li> <li>o. The purchasing, receiving, and accounts payable functions are segregated.</li> </ul>  |

### LO 14-2, 6 14–35. Simulation

The auditors of SSC Company, a nonpublic company, are working on both audit objectives for the various accounts and documentation requirements. Parts (a) through (d) of this question relate to objectives, while part (e) addresses documentation.

The auditors have established the objectives listed below as a part of the audit. For each objective, select a substantive procedure (from the list of substantive procedures) that will help achieve that objective. Each of the procedures may be used once, more than once, or not at all.

- |                               |  |
|-------------------------------|--|
| <i>Audit Objectives</i>       | <ul style="list-style-type: none"> <li>a. Determine the existence of year-end recorded accounts payable and that the client has obligations to pay these liabilities.</li> <li>b. Establish the completeness of recorded accounts payable.</li> <li>c. Determine that the presentation and disclosure of accounts payable are appropriate.</li> <li>d. Determine that the valuation of warranty loss reserves is measured in accordance with GAAP.</li> </ul>  |
| <i>Substantive Procedures</i> | <ul style="list-style-type: none"> <li>1. Obtain a trial balance of payables and reconcile with the accounts payable subsidiary ledger.</li> <li>2. Vouch sales from throughout the year.</li> <li>3. Vouch purchases recorded after year-end.</li> <li>4. Vouch sales recorded shortly before year-end.</li> <li>5. Vouch major warranty expenses paid during 20X8.</li> <li>6. Inquire of management concerning the existence of related party transactions.</li> <li>7. Test the computations made by the client to set up the accrual.</li> <li>8. Test the reasonableness of general and administrative labor rates.</li> </ul> |

9. Confirm outstanding year-end balances of payables.
10. Confirm warranty expenses payable as of year-end.

*Note: Part (e) is possible to work in a meaningful way only if you have the professional standards available—preferably in electronic form.*

- e. The auditors believe that it will be necessary to depart from a requirement relating to accounts payable that is considered presumptively mandatory. Provide the AU-C section and paragraph(s) that address documentation requirements in this situation. You need only present the requirement, not the application and other explanatory material.

- LO 14-1, 4, 6** 14–36. In applying audit procedures and evaluating the results of those procedures, auditors may encounter specific information that may raise a question concerning the existence of non-compliance with laws and related party transactions. Indicate whether each of the following is more likely related to noncompliance with a law (NL) or a related party transaction (RP).

*Statement*

- (a) Purchases have been made from a vendor at a price well above the market price for the goods involved.
- (b) A purchasing agent's spouse has the same name as a major vendor of the company.
- (c) Unexplained payments have been made to government officials.
- (d) The company exchanged certain real estate property for similar real estate property.
- (e) A purchasing agent of the company has received large cash payments from a major vendor of the company.

## Problems

All applicable problems are available with McGraw-Hill's **Connect® Accounting**. 

- LO 14-1, 3, 5** 14–37. The following are typical questions that might appear on an internal control questionnaire for accounts payable.

*Required:*

1. Are monthly statements from vendors reconciled with the accounts payable listing?
  2. Are vendors' invoices matched with receiving reports before they are approved for payment?
- a. Describe the purpose of each of the above internal control activities.
  - b. Describe the manner in which each of the above procedures might be tested.
  - c. Assuming that the operating effectiveness of each of the above procedures is found to be inadequate, describe how the auditors might alter their substantive procedures to compensate for the increased level of the risk of material misstatement.

- LO 14-1, 3, 6** 14–38. As part of your first audit of the financial statements of Marina del Rey, Inc., you have decided to confirm some of the accounts payable. You are now in the process of selecting the individual companies to whom you will send accounts payable confirmation requests. Among the accounts payable you are considering are the following:

Company	Amount Payable at Year-End	Total Purchases from Vendor during Year
Dayco, Inc.	\$ —	\$1,980,000
Gearbox, Inc.	22,650	46,100
Landon Co.	65,000	75,000
Western Supply	190,000	2,123,000

*Required:*

- a. Which two of the above four accounts payable would you select as the most important to confirm? Explain your choice in terms of the audit objectives in sending accounts payable confirmation requests.
- b. Assume that you are selecting accounts receivable to be confirmed. Assume also that the four companies listed above are customers of your client rather than suppliers and that the dollar amounts are accounts receivable balances and total sales for the year. Which two companies would you select as the most important to confirm? Explain your choice.

- LO 14-1, 3, 6** 14–39. Taylor, CPA, is engaged in the audit of Rex Wholesaling for the year ended December 31. Taylor obtained an understanding of internal control relating to the purchasing, receiving,

trade accounts payable, and cash disbursement cycles and has decided not to proceed with tests of controls. Based upon analytical procedures, Taylor believes that the trade accounts payable on the balance sheet as of December 31 may be understated.

Taylor requested and obtained a client-prepared trade accounts payable schedule listing the total amount owed to each vendor.

*Required:*

What additional substantive audit procedures should Taylor apply in examining the trade accounts payable?

- LO 14-1, 3, 6** 14-40. Nancy Howe, your staff assistant on the April 30, 20X2, audit of Wilcox Company, was transferred to another audit engagement before she could complete the audit of unrecorded accounts payable. Her working paper, which you have reviewed and are satisfied is complete, appears below.

		Wilcox Company		
		Unrecorded Accounts Payable		M-1-1
		April 30, 20X2		
Invoice				
Date	Vendor and Description			Amount
	Hill & Harper—unpaid legal fees at Apr. 30, X2 (see lawyer's letter at M-4)			1000 <i>y</i>
Apr. 1, X2	Drew Insurance Agency—unpaid premium on fire insurance for period Apr. 1, X2– Mar. 31, X5 (see insurance broker letter at J-1-1)			1800 <i>y</i>
Apr. 30, X2	Mays and Sage, Stockbrokers—advice for 100 shares of Madison Ltd. common stock (settlement date May 7, X2)			2125 <i>y</i>
	Lane Company—shipment received Apr. 30, X2 per receiver no. 3361 and included in Apr. 30, X2, physical inventory; invoice not yet received (amount is per purchase order)			5863 <i>y</i>
				<u>10788 —</u>
	<i>y-Examined document described.</i>			
	<i>In my opinion, the \$10,788 adjustment includes all material unrecorded accounts payable.</i>			
				<i>N.A.H.</i>
				<i>May 29, X2</i>

*Required:*

Prepare a proposed adjusting journal entry for the unrecorded accounts payable of Wilcox Company at April 30, 20X2. The amounts are material. (Do not deal with income taxes.)

- LO 14-1, 3, 4, 6** 14-41. Your client, Software and Stuff (Software), has developed a new electronic game. One part of the game uses software developed by another company, Component of Yuma (Component). Software signed an agreement with Component that provides that Software will pay Component a royalty of \$1.00 per game sold. At year-end you note that a material liability is payable by Software to Component under the terms of the royalty agreement. Provide a list of

procedures that should be performed on the royalty liability and the related royalty expense for the year.

## In-Class LO 14-1, 3, Team Case 4, 6

- 14-42. You have just been assigned as a member of the audit team of Bozarkana Company (a new client) and are considering accounts payable. Bozarkana Company uses a computerized voucher system for payables. As a starting point, you asked Bill Bozarkana, the controller, for a summary of payables and received the following schedule of more than 1,000 unpaid vouchers at year-end:

Voucher#	Vendor Number	Purchase Order#	Receiving Report#	Date Payment Due	Amount
2334555	2133	654444	106500	1/2/0Y	\$ 2,020.21
2334558	1098	654579	106820	1/2/0Y	12,344.56
2334567	2133	654593	106920	1/2/0Y	322.43
⋮					
⋮					
⋮					
2335643	2231	655456	107654	1/28/0Y	2,346.62
TOTAL PAYABLE					\$2,225,980.83

File Name	Information in Table	Comment
Purchase requisitions	Purchase requisition number Date requisitioned Item number Item description Quantity	The table includes one row for each purchase requisition—only one type of item per requisition may be requisitioned.
Purchase orders	Purchase order number Date ordered Purchase requisition number Vendor number Item number Quantity Cost	The table includes multiple rows for each purchase order—one for each item ordered.
Receiving reports	Receiving report number Date shipped Date received Item number Quantity	The table includes multiple rows for each receiving report—one for each item received.
Vendor master	Vendor number Vendor name Vendor address	The table includes one line for each vendor.
Cash disbursements	Disbursement number Vendor number Check number or electronic funds transfer number Voucher number Amount	The table includes one line for each check or funds transfer (electronic payment).

Bill Bozarkana has indicated that the schedule is a listing of the vouchers payable file as of year-end and that the total is the result of a separate question (query) of that file asking for total payables. You have the schedule in electronic and hard-copy form. Vouchers are issued sequentially, and voucher number 2335643 was the last one issued prior to year-end. You also

have obtained the information relating to the following other computer files, which are available to you in electronic form, as shown on the previous page.

The client has made copies of these files available so that you and the assistant can perform the necessary steps on the files. Furthermore, you have compared these copies to the client's copies and find that they are identical. Finally, you may assume that tests of controls have been performed on the controls related to the dates on the files. The controls were found to be effective.

*Required:*

- a. Discuss how you would establish samples in the following situations:
  - (1) Randomly select 30 vouchers as of year-end and obtain the necessary information to send confirmations.
  - (2) Randomly select 30 accounts with balances payable (per vendor) as of December 31.
  - (3) Select all accounts (per vendor) with which the company has disbursed more than \$500,000 during the year, but whose balance at year-end is zero.
- b. Provide detailed guidance on the following:
  - (1) All purchases are sent to Bozarkana Company "FOB shipping point." Identify a procedure for testing whether any items shipped to the client prior to year-end have been omitted from vouchers payable as of year-end.
  - (2) Select all disbursements over \$300,000 in the first two weeks of January, and, for those not included as liabilities as of December 31, determine whether title to the goods had passed as of year-end, resulting in an unrecorded liability.

## Appendix 14A

# Illustrative Audit Case: Keystone Computers & Networks, Inc.

## Part IV: Consideration of Internal Control

This part of the audit case of Keystone Computers & Networks, Inc. (KCN), illustrates the nature of internal control over the acquisition cycle and the way in which auditors assess control risk for this cycle. The following working papers are included:

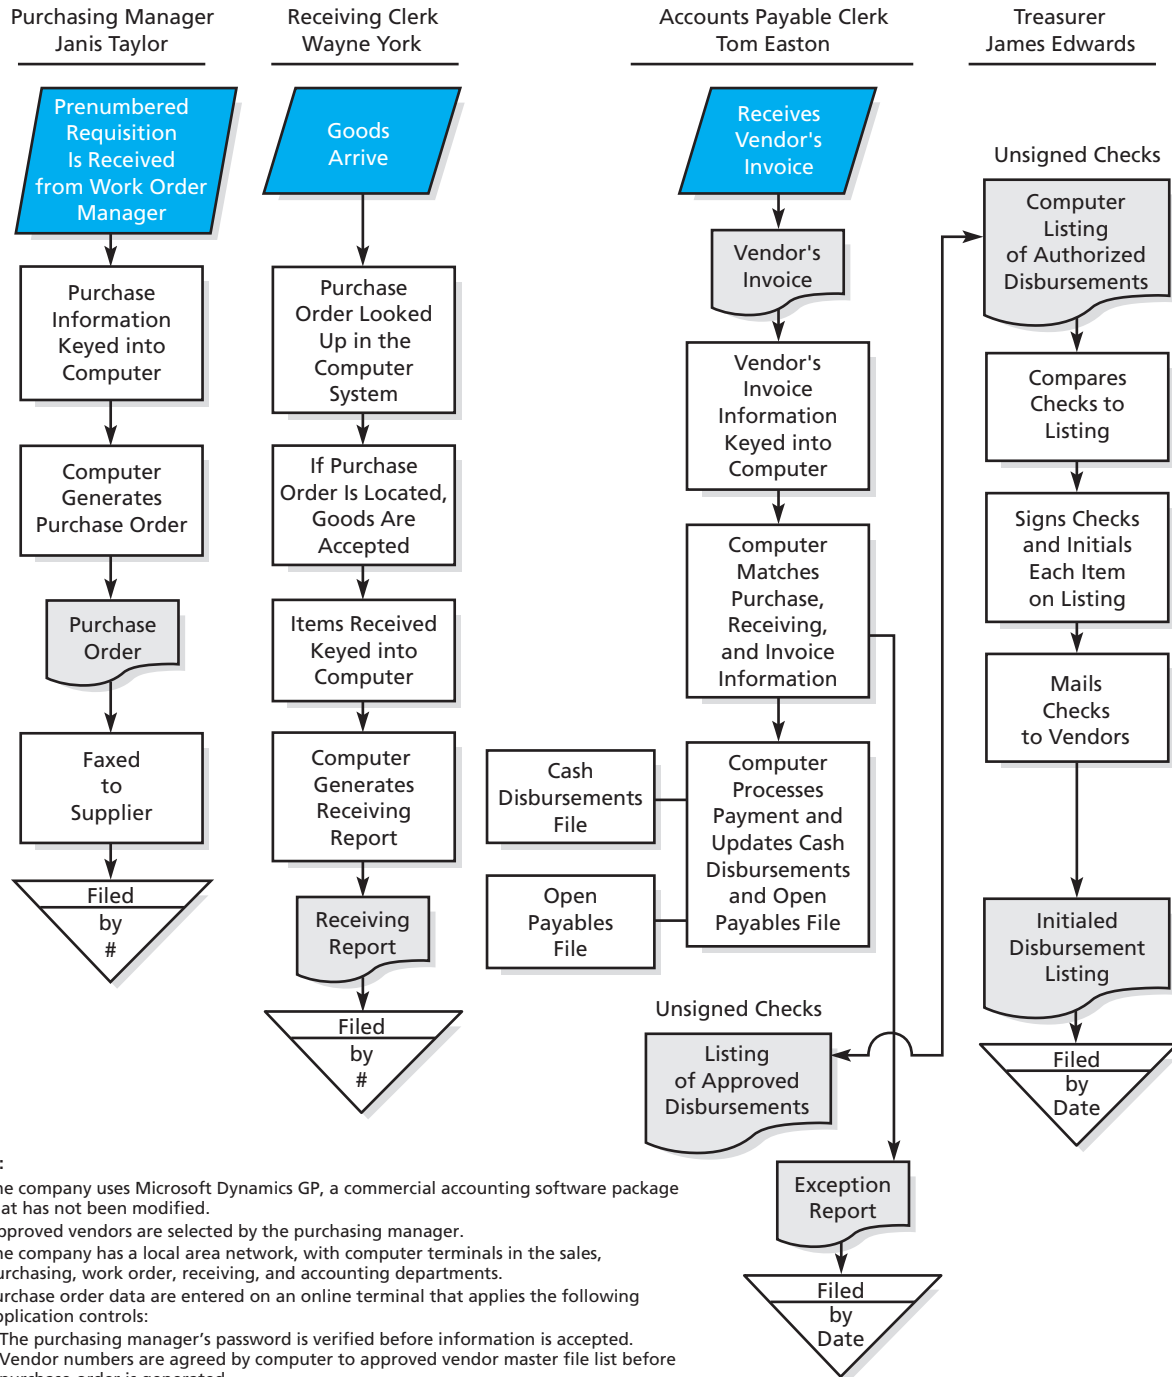

- A flowchart description of the acquisition cycle of the company and the related controls prepared by the staff of Adams, Barnes & Co. (ABC), CPAs. This flowchart focuses on the (accounting) information system and control activities.
- ABC's working paper for the assessment of control risk for accounts payable and purchases as it would appear before any tests of controls are performed. This working paper identifies the prescribed controls and weaknesses for the revenue cycle. It also relates the controls and weaknesses to the various financial statement assertions about accounts payable and purchases.

You should read through the information to obtain an understanding of typical controls for this cycle. You may also wish to review the planning documentation presented on pages 240–247 of Chapter 6 to refresh your knowledge about the nature of the company's business and its environment. The Control Environment, Risk Assessment, and Monitoring Questionnaire on pages 489–490 and the Organizational Chart of KCN on page 491 can be used to help refresh your memory about these components of internal control.

Appendix 14A  
Problems

Required:  
LO 14-1, 3,  
5, 6

14A-1. A summary of the controls for the acquisition cycle of Keystone Computers & Networks, Inc., appears on pages 602–603.

a. For the following three controls over the acquisition cycle, indicate one type of error or fraud that the control serves to prevent or detect. Organize your solution as follows:

Control	Error or Fraud Controlled
1. Computer matches information from vendors' invoice with purchase order and receiving data.	
2. The computer assigns numbers to receiving reports.	
3. Checks are mailed by check signer.	

b. For each of the controls described above, indicate how the auditors could test the control. Organize your answer as follows:

Control	Tests of Controls
1. Computer matches information from vendors' invoice with purchase order and receiving data.	
2. The computer assigns numbers to receiving reports.	
3. Checks are mailed by check signer.	

LO 14-1, 4, 5 14A-2. As indicated on the control risk assessment working paper on page 602, the auditors identified two weaknesses in internal control over the acquisition cycle of KCN. Describe the implications of each of the two weaknesses in terms of the type of errors or fraud that could result.

LO 14-3, 5, 6 14A-3. The auditors' working paper that relates control strengths and weaknesses to the assertions about purchases and accounts payable is presented on page 602. This working paper also presents the auditors' planned assessed level of control risk for each of the assertions.  
Prepare an audit plan for tests of the controls over the acquisition cycle. (Note: You may want to use the tests of controls plan for the revenue cycle, which is on pages 496–497, as a guide.)

# Debt and Equity Capital

Business corporations obtain substantial amounts of their financial resources by incurring debt and issuing capital stock. The acquisition and repayment of capital is sometimes referred to as the *financing cycle*. This transaction cycle includes the sequence of procedures for authorizing, executing, and recording transactions that involve bank loans, mortgages, bonds payable, and capital stock as well as the payment of interest and dividends. In this chapter, we present material on the auditors' approach to both debt and equity capital accounts.

## Debt

### Source and Nature of Debt

Long-term debt usually is substantial in amount and often extends for periods of 20 years or more. Debentures, secured bonds, and notes payable (sometimes secured by mortgages or trust deeds) are the principal types of long-term debt. **Debenture bonds** are backed only by the general credit of the issuing corporation and not by liens on specific assets. Since in most respects debentures have the characteristics of other corporate bonds, we shall use the term *bonds* to include both debentures and secured bonds payable.

The formal document creating bond indebtedness is called the *indenture* or **trust indenture**. When creditors supply capital on a long-term basis, they often insist upon placing certain restrictions on the borrowing company. For example, the indenture often includes a restrictive covenant that prohibits the company from declaring dividends unless the amount of working capital is maintained above a specified amount. The acquisition of plant and equipment, or the increasing of managerial salaries, may be permitted only if the current ratio is maintained at a specified level and if net income reaches a designated amount. Another device for protecting the long-term creditor is the requirement of a sinking fund or redemption fund to be held by a trustee. If these restrictions are violated, the indenture may provide that the entire debt is due on demand.

### The Auditors' Objectives in Auditing Debt

3. Assess the risks of material misstatement and design tests of controls and substantive procedures that:

#### LO 15-2

Describe the auditors' objectives in auditing debt.

- a. Substantiate the *existence* of debt and the *occurrence* of the related transactions.
- b. Establish the *completeness* of recorded debt.
- c. Verify the *cutoff* of transactions affecting debt.
- d. Determine that the client has *obligations* to pay the recorded debt.
- e. Establish the proper *valuation* of debt and the *accuracy* of transactions affecting debt.
- f. Determine that the *presentation* and *disclosure* of information about debt are appropriate, including disclosure of major provisions of loan agreements.

The auditors' *objectives* in the audit of debt are to:

1. Use the understanding of the client and its environment to consider *inherent risks*, including fraud risks, related to debt.
2. Obtain an understanding of *internal control* over debt.

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 15-1 Describe the nature of debt.
- LO 15-2 Describe the auditors' objectives in auditing debt.
- LO 15-3 Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to debt.
- LO 15-4 Obtain an understanding of internal control over the financing cycle.
- LO 15-5 Assess the risks of material misstatement of debt and design further audit procedures to address the risks.
- LO 15-6 Describe the nature of equity accounts.
- LO 15-7 Describe the auditors' objectives in the audit of equity accounts.
- LO 15-8 Obtain an understanding of the fundamental controls over capital stock and other types of equity accounts.
- LO 15-9 Describe further audit procedures for equity accounts.

In conjunction with the audit of debt, the auditors will also obtain evidence about interest expense, interest payable, and bond discount and premium.

Many of the principles related to accounts payable also apply to the audit of other forms of debt. As is the case for accounts payable, the understatement of debt is considered to be a major potential audit problem. Related to disclosure of debt, the auditors should determine whether the company has met all requirements and restrictions imposed upon it by debt agreements.

## Assessment of the Inherent Risks Related to Debt

### LO 15-3

Use the understanding of the client and its environment to consider inherent risks (including fraud risks) related to debt.

A major business risk related to debt is ensuring that the client obtains capital in an effective and efficient manner. This risk is not indicative of a risk of material misstatement of the financial statements and, therefore, is not of primary concern to the auditors. However, other business risks do equate to risks of material misstatement. As an example, management must be concerned with the business risk of noncompliance with debt covenants. This is also a concern of the auditors because noncompliance may affect the classification of debt and related disclosures. Many of the principles related to accounts payable also apply to the audit of debt. As is the case for accounts payable, the understatement of debt, whether due to error or fraud, is considered to be a major potential inherent risk.

## Internal Control over Debt

### LO 15-4

Obtain an understanding of internal control over the financing cycle.

### *Authorization by the Board of Directors*

Effective internal control over debt begins with the authorization to incur the debt. The bylaws of a corporation usually require that the board of directors approve borrowing. The treasurer of the corporation will prepare a report on any proposed financing, explaining the need for funds, the estimated effect of borrowing upon future earnings, the estimated financial position of the company in comparison with others in the industry both before and after the borrowing, and alternative methods of raising the funds. Authorization by the board of directors will include review and approval of such matters as the choice of a bank or trustee, the type of security, registration with the SEC, agreements with investment bankers, compliance with requirements of the state of incorporation, and listing of bonds on a securities exchange. After the issuance of long-term debt, the board of directors should receive a report stating the net amount received and its disposition as, for example, acquisition of plant assets, addition to working capital, or other purposes.

### *Use of an Independent Trustee*

Bond issues are always for large amounts—usually many millions of dollars. Therefore, only relatively large companies issue bonds; small companies obtain long-term capital through mortgage loans or other sources. Any company large enough to issue bonds and able to find a ready market for the securities will almost always utilize the services of a large bank as an independent trustee.

The trustee is charged with the protection of the creditors' interests and with monitoring the issuing company's compliance with the provisions of the indenture. The trustee also maintains detailed records of the names and addresses of the registered owners of the bonds, cancels old bond certificates and issues new ones when bonds change ownership, follows procedures to prevent overissuance of bond certificates, distributes interest payments, and distributes principal payments when the bonds mature. Use of an independent trustee largely solves the problem of internal control over bonds payable. Internal control is strengthened by the fact that the trustee does not have access to the issuing company's assets or accounting records and the fact that the trustee is a large financial institution with legal responsibility for its actions.

### *Interest Payments on Bonds and Notes Payable*

Many corporations assign the entire task of paying interest to the trustee for either *bearer bonds* or *registered bonds*. Highly effective control is then achieved, since the company will issue a single check for the full amount of the semiannual interest payment on the

entire bond issue. In the case of bearer bonds (coupon bonds), the trustee upon receipt of this check will make payment for coupons presented, cancel the coupons, and file them numerically. A second count of the coupons is made at a later date; the coupons then are destroyed and a cremation certificate is delivered to the issuing company. The trustee does not attempt to maintain a list of the holders of coupon bonds, since these securities are transferable by the mere act of delivery. If certain coupons are not presented for payment, the trustee will hold the funds corresponding to such coupons for the length of time prescribed by statute. In the case of registered bonds, the trustee will maintain a current list of holders and will remit interest checks to them in the same manner as dividend checks are distributed to stockholders.

For a note payable, there generally is only one recipient of interest. Companies control that disbursement in the same manner as other cash disbursements, without using a trustee.

## Audit Documentation

A copy of the loan agreement or the indenture relating to a bond issue should be placed in the auditors' permanent file. A listing of the restrictions placed on the company is extracted from these documents to facilitate the auditors' tests of compliance with the debt provisions. Analyses of ledger accounts for notes and bonds payable, and the related accounts for interest and discount or premium, should be obtained for the current working papers file or the permanent file. In addition, the auditors should include documentation of internal control and risk assessment for debt. A lead schedule is often not required for short-term notes payable or for long-term debt.

## Audit of Debt

### LO 15-5

Assess the risks of material misstatement of debt and design further audit procedures to address the risks.

After obtaining an understanding of the client and its environment, including internal control, the auditors will assess the risks of material misstatement and design further audit procedures for debt. This audit plan does not provide for the usual distinction between tests of controls and substantive procedures. This is because individual transactions will generally be examined for all large debt agreements. To document internal control, the auditors will usually prepare a written description, as well as an internal control questionnaire. Questions included on a typical questionnaire are the following: (1) Are amounts of new debt authorized by appropriate management? (2) Is an independent trustee used for all bond issues? (3) Does a company official monitor compliance with debt provisions?

Because transactions are few in number but large in dollar amount, the auditors are generally able to substantiate the individual transactions. Therefore, testing of controls occurs through what actually amounts to dual-purpose transaction testing. As discussed further in Chapter 18, in an integrated audit, more controls will be tested.

Audit procedures appropriate for the verification of debt include the following:

1. Obtain or prepare analyses of debt accounts and related interest, premium, and discount accounts.
2. Examine copies of notes payable and supporting documents.
3. Confirm debt with payees or appropriate third parties.
4. Vouch borrowing and repayment transactions to supporting documents.
5. Perform analytical procedures to test the overall reasonableness of interest-bearing debt and interest expense.
6. Test the valuation of debt, computation of interest expense, interest payable, and amortization of discount or premium.
7. Evaluate whether debt provisions have been met.
8. Trace authority for issuance of debt to the corporate minutes.
9. Review notes payable paid or renewed after the balance sheet date.
10. Perform procedures to identify notes payable to related parties.

Objectives of Major  
Substantive Procedures  
for Debt Transactions  
and Balances

Substantive Procedures	Primary Audit Objectives
Obtain analyses of debt and related accounts.	<i>Valuation</i>
Examine copies of notes payable and supporting documents.	<i>Completeness</i>
Confirm debt.	<i>Existence and obligations</i>
Vouch borrowing and repayment transactions.	<i>Accuracy</i>
Perform analytical procedures.	<i>Cutoff</i>
Test computations of interest expense, interest payable, and amortization of discount and premium.	<i>Completeness</i>
Evaluate whether debt provisions have been met.	<i>Existence and obligations</i>
Trace authority for issuance of debt to corporate minutes.	<i>Valuation</i>
Review notes payable paid or renewed after the balance sheet date.	<i>Presentation and disclosure</i>
Perform procedures to identify notes payable to related parties.	
Send confirmation letters about financing arrangements.	
Evaluate financial statement presentation and disclosure.	

11. Send confirmation letters to financial institutions to obtain information about financing arrangements.
12. Evaluate proper financial statement presentation and disclosure of debt and related transactions.

Figure 15.1 relates these substantive procedures to their primary audit objectives.

Primary Audit Objective:
Valuation <input checked="" type="checkbox"/>

### 1. Obtain or Prepare Analyses of Debt Accounts and Related Interest, Premium, and Discount Accounts.

A notes payable analysis shows the beginning balance of each individual note, additional notes issued and payments on notes during the year, and the ending balance of each note. In addition, the beginning balances of interest payable or prepaid interest, interest expense, and interest paid and the ending balances of interest payable or prepaid interest may be presented in the analysis working paper.

An analysis of the Notes Payable account will serve a number of purposes: (a) The payment or other disposition of notes listed as outstanding in the previous year's audit can be verified, (b) the propriety of individual debits and credits can be established, and (c) the amount of the year-end balance of the account is proved through the step-by-step examination of all changes in the account during the year.

In the first audit of a client, the auditors will analyze the ledger accounts for Bonds Payable, Bond Issue Costs, and Bond Discount (or Bond Premium) for the years since the bonds were issued. The working paper is placed in the auditors' permanent file; in later audits, any further entries in these accounts may be added to the analysis.

The accounts of the financing cycle are often relatively free of material misstatement. When misstatements occur, they may be due to improper reporting of debt (e.g., a loan is recorded with a debit to cash and a credit to a revenue account), incomplete recording of debt (e.g., a loan is not recorded and the proceeds are maintained "off the books"), or improper amortization of loan-related discount and premium accounts. In some situations, note disclosures related to debt are incomplete.

The auditors should also understand the risks involved when clients have complex organizational structures involving numerous or unusual legal entities or contractual arrangements and transactions involving related parties. In these cases, questions arise as to proper recording of the transactions. Also, the auditors should realize that a lack of compliance with the provisions of a debt agreement usually makes the debt involved entirely due and payable on demand.

Cutoff	<input checked="" type="checkbox"/>

## 2. Examine Copies of Notes Payable and Supporting Documents.

The auditors should examine the client's copies of notes payable and supporting documents such as mortgages and trust deeds. The original documents will be in the possession of the payees, but the auditors should make certain that the client has retained copies of the debt instruments and that their details correspond to the analyses described in the first procedure of this audit plan.

## 3. Confirm Debt with Payees or Appropriate Third Parties.

Notes payable to financial institutions are confirmed as part of the confirmation of cash deposit balances. The standard confirmation form illustrated in Chapter 10 includes a request that the financial institution confirm all borrowings by the depositor.

Confirmation requests for notes payable to payees other than financial institutions should be drafted on the client's letterhead stationery, signed by the controller or other appropriate executive, and mailed by the auditors. Payees should be requested to confirm dates of origin, due dates, unpaid balances of notes, interest rates, dates to which interest has been paid, and collateral for the notes.

The auditors may also substantiate the existence and amount of a mortgage liability outstanding by direct confirmation with the mortgagee. The information received should be compared with the client's records and the audit working papers. When no change in the liability account has occurred in the period under audit, the only major procedure necessary will be this confirmation with the creditor. At the same time that the mortgagee is asked to confirm the debt, it may be asked for an indication of the company's compliance with the mortgage or trust deed agreement.

Bond transactions usually can be confirmed directly with the trustee. The trustee's reply should include an exact description of the bonds, including maturity dates and interest rates; bonds retired, purchased for the treasury, or converted into stock during the year; bonds outstanding at the balance sheet date; and **sinking fund** transactions and balances.

## 4. Vouch Borrowing and Repayment Transactions to Supporting Documents.

The auditors should obtain evidence that transactions in debt accounts were valid. To accomplish this objective, the auditors vouch the cash recorded as received from the issuance of notes, bonds, or mortgages to the validated copy of the bank deposit slip and to the bank statement. Any remittance advices supporting these cash receipts are also examined. The auditors can find further support for the net proceeds of a public issue by referring to the underwriting contract and to the prospectus filed with the SEC.

Debits to a Notes Payable or a Mortgages Payable account generally represent payments in full or in installments. The auditors should examine these payments; in so doing, they also will account for payments of accrued interest. The propriety of installment payments should be verified by reference to the repayment schedule set forth in the note or mortgage copy in the client's possession.

A comparison of canceled notes payable with the debit entries in the Notes Payable account provides further assurance that notes indicated as paid during the year have, in fact, been retired. The auditors' inspection of these notes should include a comparison of the maturity date of the note with the date of cash disbursement. Failure to pay notes promptly at maturity is suggestive of financial weakness.

There is seldom any justification for a paid note to be missing from the files; a receipt for payment from the payee of the note is not a satisfactory substitute. If, for any reason, a paid note is not available for inspection, the auditors should review the request for a check or other vouchers supporting the disbursement and should discuss the transaction with an appropriate official.

In examining the canceled notes, the auditors should also trace the disposition of any collateral used to secure these notes. A convenient opportunity for diversion of pledged securities or other assets to an unauthorized user might be created at the time these assets are returned by a secured creditor.

### 5. Perform Analytical Procedures to Test the Overall Reasonableness of Interest-Bearing Debt and Interest Expense.

One of the most effective ways to determine the overall reasonableness of interest-bearing debt is to examine the relationship between recorded interest expense and the average principal amount of debt outstanding during the year. If the client is paying interest on debt that is not recorded, this relationship will not be in line with the interest rate at which the client company should be able to borrow. Therefore, the auditors can use these procedures as a test of the *completeness* of recorded interest-bearing debt.

The auditors also compare the year-end amount of interest-bearing debt with the amount in the prior year's balance sheet. A similar comparison is made of interest expense for the current year and the preceding year.

### 6. Test the Valuation of Debt, Computations of Interest Expense, Interest Payable, and Amortization of Discount or Premium.

Unless management elects the fair value option, debt is valued at its outstanding face value plus or minus any unamortized premium or discount. To test valuation, the auditors test the amounts of amortization of debt premiums or discounts. In addition, the auditors test the accuracy of the client's computations of interest expense and interest payable, including examining paid checks supporting interest payments. An analysis of interest payments is another means of bringing to light any unrecorded interest-bearing liabilities.

The fair value option, as presented in Chapter 5, is available for companies that wish to value these financial liabilities at market value. As indicated in Chapter 5, depending upon the circumstances involved, valuation may be with observable inputs (e.g., market prices) or unobservable inputs (discounted cash flows). When the fair value option has been selected, the auditors should evaluate the propriety of the valuation techniques and the inputs.

### 7. Evaluate Whether Debt Provisions Have Been Met.

In the first audit of a client or upon the issuance of a new bond issue, the auditors will obtain a copy of the bond indenture for the permanent file. The indenture should be carefully studied, with particular attention to such points as the amount of bonds authorized, interest rates and dates, maturity dates, descriptions of property pledged as collateral, provisions for retirement or conversion, duties and responsibilities of the trustee, and any restrictions imposed on the borrowing company.

The indenture provisions may require maintenance of a sinking fund, maintenance of stipulated minimum levels of working capital, and insurance of pledged property. The indenture also may restrict dividends to a specified proportion of earnings, limit management compensation, and prohibit additional long-term borrowing, except under stipulated conditions. The auditors will perform tests to evaluate whether the company is in compliance with these provisions. For example, the auditors will examine evidence of insurance coverage, vouch payments to the sinking fund, and compare the amounts of management compensation and dividends paid to amounts allowed by the agreements.

If the company has not complied fully with the requirements, the auditors should inform both the client and the client's legal counsel of the violation. In some cases of violation, the entire bond issue may become due and payable on demand, and hence a current liability. When the client is in violation of an indenture provision and the penalty is to make the debt become payable upon demand, the client usually will be able to obtain a waiver of compliance with the provision. In other words, creditors often choose not to enforce contract terms fully. To enable the liability to be presented as long term, the waiver must waive compliance for a period of one year from the balance sheet date. Even if an appropriate waiver of compliance is obtained, the matter should be disclosed in the notes to the client's financial statements.

Auditors do not judge the legality of a bond issue; this is a problem for the client's attorneys. The auditors should be familiar, however, with the principal provisions of the federal Securities Act of 1933 and the corporate blue sky laws of the client's state of incorporation. They should determine that the client has obtained an attorney's opinion

## Illustrative Case

### Violations of Debt Covenants

In the audit of a large construction company, the auditors found the client's working capital to be far below the minimum level stipulated in the indenture of long-term secured bonds payable. In addition, the client had allowed the required insurance coverage of pledged assets to lapse. These violations of the indenture were sufficient to cause the bond issue to become payable on demand.

Although the client agreed to reclassify the bond issue as a current liability and disclose the problem in

the financial statements, the auditors were unable to satisfy themselves that the client could meet the obligation if the bondholders demanded payment. Also, if the bondholders foreclosed on the pledged assets, the ability of the client to continue as a going concern would be questionable. Thus, even after the liability was reclassified as current, the auditors added an explanatory paragraph to their report referring to the uncertainty regarding the company's ability to meet its obligations and remain a going concern.

on the legality of the bond issuance. In doubtful cases, they should obtain representations from the client's legal counsel.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

#### 8. Trace Authority for Issuance of Debt to the Corporate Minutes.

The authority to issue debt generally lies with the board of directors. To determine that the bonds outstanding were properly authorized, the auditors should read the passages in the minutes of directors' (and stockholders') meetings concerning the issuance of debt. The minutes usually will cite the applicable sections of the corporate bylaws permitting the issuance of debt instruments and may also contain reference to the opinion of the company's counsel concerning the legality of the issue.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

#### 9. Review Notes Payable Paid or Renewed after the Balance Sheet Date.

If any of the notes payable outstanding at the balance sheet date are paid before completion of the audit engagement, such cash payments provide the auditors with additional evidence on the liability. Renewal of notes maturing shortly after the balance sheet date may alter the auditors' thinking as to the proper classification of these liabilities.

In the discussion of notes receivable in Chapter 11, emphasis was placed on the necessity of close scrutiny of loans to officers, directors, and affiliates because of the absence of arm's-length bargaining in these related party transactions. Similar emphasis should be placed on the examination of notes payable to insiders or affiliates, although the opportunities for self-dealing are more limited than with receivables. The auditors should scan the notes payable records for the period between the balance sheet date and the completion of the audit so that they may be aware of any unusual transactions, such as the reestablishment of an insider note that had been paid just prior to the balance sheet date.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

#### 10. Perform Procedures to Identify Notes Payable to Related Parties.

As has been the case in other portions of the audit, the auditors should perform procedures to determine that any related party debt is properly disclosed. Note here that the lower number of transactions makes discovery of such transactions less difficult than in accounts with a large number of transactions such as accounts payable.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

#### 11. Send Confirmation Letters to Financial Institutions to Obtain Information about Financing Arrangements.

Financing arrangements and transactions can be very complex, and the details of these arrangements and transactions must be adequately disclosed in the notes to the financial statements. If the auditors determine that additional evidence is needed to verify these details, they will send a *separate* confirmation letter to the financial institution. For example, confirmation letters may be used to obtain information about lines of credit, contingent

Wallace Manufacturing, Inc.  
1400 Main St.  
Los Angeles, CA 90015

January 31, 20X5

Mr. Richard M. Smith  
Senior Loan Officer  
First United Bank  
2330 Fourth Ave.  
Los Angeles, CA 90010

Dear Mr. Smith:

In connection with an audit of the financial statements of Wallace Manufacturing, Inc., as of December 31, 20X4, and for the year then ended, we have advised our independent auditors of the information listed below, which we believe is a complete and accurate description of our line of credit from your financial institution as of the close of business on December 31, 20X4. Although we do not request or expect you to conduct a comprehensive, detailed search of your records, if during the process of completing this confirmation additional information about other lines of credit from your financial institution comes to your attention, please include such information below.

1. The company has available at your financial institution a line of credit totaling \$47 million.
2. The current terms of the line of credit are contained in the letter dated May 11, 20X2.
3. The amount of unused line of credit, subject to the terms of the related letter, at December 31, 20X4, was \$19 million.
4. The interest rate at the close of business on December 31, 20X4, was 9.2%.
5. There are no requirements for compensating balances in connection with this line of credit.

Please confirm whether the information about the line of credit presented above is correct by signing below and returning this letter directly to our independent auditors, Warren & Clark, CPAs, 2100 Century Blvd., Los Angeles, CA 90053.

Sincerely,  
Wallace Manufacturing, Inc.

By: Robert Barr  
Robert Barr  
Controller

-----

Dear Warren & Clark, CPAs:

The above information regarding the line of credit agrees with the records of this financial institution. Although we have not conducted a comprehensive, detailed search of our records, no information about other lines of credit came to our attention. [Note exceptions below or in an attached letter.]

\_\_\_\_\_

(Officer and Title) (Date)

liabilities, compensating balance arrangements, letters of credit, or futures contracts. These letters are signed by the client and specifically addressed to the client’s loan officer or another official at the financial institution that is knowledgeable about the information. This expedites a response to the confirmation and enhances the quality of the evidence received. Figure 15.2 provides an example of a letter to confirm information about lines of credit.

Primary Audit Objective:
Presentation <input checked="" type="checkbox"/>

**12. Evaluate Proper Financial Statement Presentation and Disclosure of Debt and Related Transactions.**

Because of the interest of creditors in the current liability section of the balance sheet and the inferences that may be drawn from various uses of notes payable, adequate

informative disclosure is extremely important. Classification of notes by types of payees, as well as by current or long-term maturity, is necessary. Notes payable to banks, notes payable to trade creditors, and notes payable to officers, directors, stockholders, and affiliates should be listed separately.

Secured liabilities and pledged assets should be cross-referenced to one another with an explanation in the notes to the financial statements. In the event of financial difficulties and dissolution, creditors expect to share in the assets in proportion to their respective claims; if certain assets, such as current receivables, have been pledged to one creditor, the risk to unsecured creditors is increased. Current liabilities should include not only those notes maturing within a period of 12 months (or a longer operating cycle) but also any installments currently payable on long-term obligations such as mortgages.

The essential point in balance sheet presentation of long-term liabilities is that they be adequately described, including details about the types of debt, amounts authorized and issued, interest rates, maturity dates, and any conversion or subordination features.

#### *Long-Term Debt Payable in the Current Period*

Long-term liabilities include all debts that will not be liquidated with the use of current assets. In other words, any bonds or notes falling due in the coming operating cycle that are to be paid from special funds or refinanced will be classified as long-term obligations regardless of maturity date. Before accepting a long-term classification for maturing obligations, auditors should satisfy themselves that the client has both the *intent* and the *ability* to refinance the obligation on a long-term basis. Intent and ability to refinance are demonstrated by the client through either (1) refinancing the obligation on a long-term basis before the issuance of the financial statements, or (2) entering into a financing agreement by that date, which clearly permits such refinancing. Any debt maturing currently and payable from current assets should be classified as a current liability.

#### *Restrictions Imposed by Long-Term Debt Agreements*

The major restrictions imposed on the company by long-term loan agreements are significant to the company's investors and creditors. Consequently, the nature of the restrictions should be clearly set forth in a note to the financial statements.

#### *Unamortized Bond Premium or Discount*

Unamortized premium should be added to the face amount of the bonds or debentures in the liability section of the balance sheet. Similarly, unamortized discount should be deducted from the face amount of the debt.

---

### **Time of Examination— Debt**

Analysis of the ledger accounts for debt and interest expense takes very little time in most audits because of the small number of entries. Consequently, most auditors prefer to wait until the end of the year before analyzing these accounts.

Audit procedures intended to reveal any unrecorded liabilities cannot ordinarily be performed in advance of the balance sheet date. Such steps as the evaluation of compliance with debt provisions, tests of interest expense, and the investigation of notes paid or renewed shortly after the balance sheet date must necessarily await the close of the period being audited. The opportunities for performing audit work in advance of the balance sheet date are thus much more limited in the case of debt than for most of the asset groups previously discussed.

---

## **Equity Capital**

### **Sources and Nature of Owners' Equity**

Most of this section is concerned with the audit of stockholders' equity accounts of corporate clients; the audit of owners' equity in partnerships and sole proprietorships is discussed briefly near the end of the chapter.

**LO 15-6**

Describe the nature of equity accounts.

Owners' equity for corporate clients consists of capital stock accounts (preferred and common) and retained earnings. Balances in the capital stock accounts change when the corporation issues or repurchases stock. Transfer of ownership of shares from one shareholder to another does not affect the account balances. Retained earnings are normally increased by earnings and decreased by dividend payments. Additionally, a few journal entries (e.g., prior period adjustments) may directly affect retained earnings. Transactions in the owners' equity accounts are generally few in number, but material in amount. No change may occur during the year in the capital stock accounts, and perhaps only one or two entries will be made to the retained earnings account.

### The Auditors' Objectives in Auditing Owners' Equity

**LO 15-7**

Describe the auditors' objectives in the audit of equity accounts.

The auditors' *objectives* in the audit of owners' equity are to:

1. Use the understanding of the client and its environment to consider *inherent risks*, including fraud risks, related to owners' equity.
2. Obtain an understanding of *internal control* over owners' equity.
3. Assess the risks of material misstatement and design tests of controls and substantive procedures that:
  - a. Substantiate the *existence* of owners' equity and the *occurrence* of the related transactions.
  - b. Establish the *completeness* of recorded owners' equity.
  - c. Verify the *cutoff* of transactions affecting owners' equity.
  - d. Establish the proper *valuation* of owners' equity and the *accuracy* of transactions affecting owners' equity.
  - e. Determine that the *presentation* and *disclosure* of information about owners' equity are appropriate.

In conjunction with the audit of owners' equity accounts, the auditors will also obtain evidence about the related accounts of dividends payable and capital stock discounts and premiums.

### Internal Control over Owners' Equity

**LO 15-8**

Obtain an understanding of the fundamental controls over capital stock and other types of equity accounts.

There are three principal elements of strong internal control over capital stock and dividends: (1) the proper authorization of transactions by the board of directors and corporate officers, (2) the segregation of duties in handling these transactions (preferably the use of independent agents for stock registration and transfer and for dividend payments), and (3) the maintenance of adequate records.

#### *Control of Capital Stock Transactions by the Board of Directors*

All changes in capital stock accounts should receive formal advance approval by the board of directors. The board of directors must determine the number of shares to be issued and the price per share; if an installment plan of payment is to be used, the board must prescribe the terms. If plant and equipment, services, or any consideration other than cash is to be accepted in payment for shares, the board of directors must establish the valuation on the noncash assets received. Transfers from retained earnings to the Capital Stock and Paid-in Capital accounts, as in the case of stock dividends, are initiated by action of the board. In addition, stock splits and changes in par or stated value of shares require formal authorization by the board.

Authority for all dividend actions rests with the directors. The declaration of a dividend must specify not only the amount per share but also the date of record and the date of payment.

#### *Independent Registrar and Stock Transfer Agent*

In appraising internal control over capital stock, the first question that the auditors consider is whether the corporation employs the services of an independent stock registrar and a stock transfer agent or handles its own capital stock transactions. Internal control

is far stronger when the services of an independent stock registrar and a stock transfer agent are utilized because the banks or trust companies acting in these capacities will have the experience, the specialized facilities, and the trained personnel to perform the work in an expert manner. Moreover, by placing the responsibility for handling capital stock certificates in separate and independent organizations, the corporation achieves to the fullest extent the internal control concept of separation of duties. The New York Stock Exchange and most other exchanges require that listed corporations utilize the services of an independent registrar.

The primary responsibility of the **stock registrar** is to avoid any overissuance of stock. The danger of overissuance is illustrated by the old story of a promoter who sold a 25 percent interest in a new corporation to each of 10 investors. To prevent such frauds, the registrar must make certain that the issuance of stock is properly controlled. Historically, control was exerted over the issuance of paper stock certificates related to stock transactions. Currently, most frequently, paper stock certificates are not issued and the control involved relates to the associated electronic records.

Corporations with actively traded securities also employ independent **stock transfer agents**. Although the stock transfer agent maintains a record of the total shares outstanding, its primary responsibility is maintaining detailed stockholder records (name and address of each stockholder) and carrying out transfers of stock ownership.

#### *The Stock Certificate Book and Stockholders Ledger*

If the corporation does not utilize the services of an independent registrar and stock transfer agent, the board of directors usually assigns these functions to the secretary of the company. The board of directors should designate officers who are authorized to (1) sign stock certificates, (2) maintain records of stockholders, (3) maintain custody of unissued certificates, and (4) sign dividend checks. The stock certificates should be serially numbered by the printer, and from the time of delivery to the company until issuance, they should be in the exclusive custody of the designated officer. The signatures of two officers are generally required on stock certificates.

The certificates often are prepared in and torn from bound books called **stock certificate books**, with attached stubs similar to those in a checkbook. Each stub shows the certificate number and contains blank spaces for entering the number of shares represented by the certificate, the name of the stockholder, and the serial number of any previously issued certificate surrendered in exchange for the new one. Certificates should be issued in numerical sequence and not signed or countersigned until the time of issuance. When outstanding shares are transferred from one holder to another, the old certificate is surrendered to the company. The designated officer cancels the old certificate by perforating and attaching it to the corresponding stub in the certificate book.

The stock certificate book is not in itself an adequate record of the capital stock outstanding. The certificates appear in the book in serial number order, and a single stockholder may own several certificates listed at various places in the certificate book. A transfer journal may be used to record transfers of shares between shareholders. A **stockholders ledger** provides a separate record for each stockholder, thus making it possible to determine at a glance the total number of shares owned by any one person. This record may be used in compiling the list of dividend checks or for any other communication with shareholders.

#### *Internal Control over Dividends*

The nature of internal control over the payment of dividends, as in the case of stock issuance, depends primarily upon whether the company performs the function of dividend payment itself or utilizes the services of an independent dividend-paying agent. If an independent dividend-paying agent is used, the corporation will provide the agent with a certified copy of the dividend declaration and a check for the full amount of the dividend. The bank or trust company serving as stock transfer agent is usually appointed to distribute the dividend, since it maintains the detailed records of stockholders. The agent issues

dividend checks to the individual stockholders and sends the corporation a list of the payments made. The use of an independent dividend-paying agent is to be recommended from the standpoint of internal control, as it materially reduces the possibility of fraud or error arising in connection with the distribution of dividends.

In a small corporation that does not use the services of a dividend-paying agent, the responsibility for payment of dividends is usually lodged with the treasurer and the secretary. After declaration of a dividend by the board of directors, the secretary prepares a list of stockholders as of the date of record, the number of shares held by each, and the amount of the dividend each is to receive. The total of these individual amounts is proved by multiplying the dividend per share by the total number of outstanding shares.

Dividend checks controlled by serial numbers are drawn payable to individual stockholders in the amounts shown on the list described above. If the stockholders ledger is maintained on a computer master file, the dividend checks may be prepared by the computer directly from this record. The stockholder list and dividend checks are submitted to the treasurer for approval and signature. The checks should be reconciled by the treasurer with the total of shares outstanding and mailed without again coming under control of the officer who prepared them.

Cash in the amount of the total dividend is then transferred from the general bank account to a separate dividend bank account. As the individual dividend checks are paid from this account and returned by the bank, they should be matched with the check stubs or marked *paid* in the dividend check register. A list of outstanding checks should be prepared monthly from the open stubs or open items in the check register. This list should agree in total with the balance remaining in the dividend bank account. Companies with numerous stockholders prepare dividend checks in machine-readable form, so that the computer may perform the reconciliation of outstanding checks.

### Audit Documentation for Owners' Equity

In addition to the lead schedule for owners' equity accounts, the auditors prepare an analysis of each equity account for the permanent file. A detailed analysis is essential for all aspects of a stock option plan: options authorized, issued, and outstanding. For a closely held corporation not served by a transfer agent, the auditors will often prepare for the permanent file a list of shareholders and the number of shares owned by each. In addition, documentation will include descriptions of internal control and the auditors risk assessment.

## Audit Plan—Capital Stock

The following procedures are typical of the procedures required in many engagements for the verification of capital stock:

1. Obtain an understanding of internal control over capital stock transactions.
2. Examine articles of incorporation, bylaws, and minutes for provisions relating to capital stock.
3. Obtain or prepare analyses of the capital stock accounts.
4. Account for all proceeds from stock issues.
5. Confirm shares outstanding with the independent registrar and stock transfer agent.
6. For a corporation acting as its own stock registrar and transfer agent, reconcile the stockholder records with the general ledger.
7. Determine that appropriate accounting is applied to employee stock compensation plans.
8. Determine that compliance with restrictions and preferences pertaining to capital stock and disclosures are appropriate.

Capital stock transactions are usually few in number; consequently, the auditors usually substantiate all transactions in audits of nonpublic companies. In public company

#### LO 15-9

Describe further audit procedures for equity accounts.

integrated audits, the auditors will rely on controls because they must be tested to attest to internal control. In addition to the preceding steps, the auditors should determine the appropriate financial statement presentation of capital stock. This topic is discussed later in this chapter, along with the financial statement presentation of other elements of owners' equity.

### 1. Obtain an Understanding of Internal Control over Capital Stock Transactions.

Although the examination of capital stock consists primarily of substantive procedures, the auditors, even in the audits of nonpublic companies, should acquire an understanding of the client's procedures for authorizing, executing, and recording capital stock transactions. This may be achieved by preparing a written description or flowchart of the system or by filling in an internal control questionnaire. If the questionnaire approach is employed, typical questions to be answered might include the following: Does the company utilize the services of an independent registrar and stock transfer agent? Are stockholders ledgers and transfer journals maintained? Are entries in owners' equity accounts reviewed periodically by an appropriate officer?

Primary Audit Objectives:	
Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Completeness	<input checked="" type="checkbox"/>

### 2. Examine Articles of Incorporation, Bylaws, and Minutes for Provisions Relating to Capital Stock.

In a first audit, copies of the articles of incorporation and bylaws obtained for the permanent file should be read carefully. The information required by the auditors for each issue of capital stock includes the number of shares authorized and issued; the par or stated value; dividend rates, if any; call and conversion provisions; stock splits; and stock options. The auditors will also review minutes of the meetings of directors and stockholders for authorizations of transactions related to the company's stock. By gathering evidence on these points, the auditors obtain assurance that capital stock transactions and dividend payments have been in accordance with legal requirements and specific authorizations by stockholders and directors. Also, they will be able to judge whether the balance sheet contains all necessary information to describe adequately the various stock issues and other elements of corporate capital.

Primary Audit Objectives:	
Valuation	<input checked="" type="checkbox"/>
Accuracy	<input checked="" type="checkbox"/>

### 3. Obtain or Prepare Analyses of the Capital Stock Accounts.

In an initial audit engagement, capital stock accounts should be analyzed from the beginning of the corporation to provide the auditors with a complete historical picture of corporate capital. Analysis of capital stock includes an appraisal of the nature of all changes and the vouching of these changes to the supporting documents and records. All changes in capital stock should bear the authorization of the board of directors.

The analyses of capital stock accounts may be prepared in a manner that permits additions during later audit engagements. After the initial audit, if the analyses are kept in the auditors' permanent file, all that will be necessary is to record the current period's increases and decreases and to vouch these transactions. The auditors then will have working papers showing all changes in capital stock from the inception of the corporation.

The auditors also should analyze the Treasury Stock account and prepare a list showing the number of shares of **treasury stock** on hand. Any certificates on hand then may be inspected. If certificates are not available, the transactions should be confirmed with the transfer agent.

In their review of treasury stock transactions, the auditors should refer to permanent file copies of the minutes of directors' meetings to determine (a) that the acquisition or reissuance of treasury stock was authorized by directors and (b) that the price paid or received was in accordance with prices specified by the board.

Primary Audit Objectives:	
Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Valuation	<input checked="" type="checkbox"/>
Accuracy	<input checked="" type="checkbox"/>

### 4. Account for All Proceeds from Stock Issues.

Closely related to the analyses of capital stock accounts is the audit procedure of accounting for the receipt and proper disposition of all funds derived from the issuance of capital stock. The proceeds should be traced to the cash records and bank statements.

SEC registration statements and contracts with underwriters may also be available as evidence of the amounts received from stock issues.

When assets other than cash are received as consideration for the issuance of capital stock, the entire transaction requires careful study. Generally, the value of assets and services received in exchange for capital shares is established by action of the board of directors. The auditors should determine that these accounting estimates made by the client result in a reasonable valuation.

Primary Audit Objectives:	
Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Cutoff	<input checked="" type="checkbox"/>

### 5. Confirm Shares Outstanding with the Independent Registrar and Stock Transfer Agent.

The number of shares issued and outstanding on the balance sheet date may be confirmed by direct communication with the independent registrar and stock transfer agent. The confirmation request should be written by the client on the client's letterhead, but it should be mailed by the auditors. Confirmation replies should be sent directly to the auditors, not to the client. All information contained in these replies should be traced to the corporate records. It is essential that the general ledger controlling accounts agree with the amount of stock issued as reported by the independent registrar and stock transfer agent. Because of the strong controls usually maintained over stock transactions, it is not customary to communicate with individual stockholders in establishing the number of shares outstanding.

Primary Audit Objectives:	
Existence	<input checked="" type="checkbox"/>
Occurrence	<input checked="" type="checkbox"/>
Completeness	<input checked="" type="checkbox"/>
Cutoff	<input checked="" type="checkbox"/>

### 6. For a Corporation Acting as Its Own Stock Registrar and Transfer Agent, Reconcile the Stockholder Records with the General Ledger.

When a corporation acts as its own transfer agent and registrar, the auditors should adopt alternative procedures to obtain evidence that is not available by direct confirmation with outside parties. These procedures include (a) accounting for stock certificate numbers, (b) examining canceled certificates, and (c) reconciling the stockholders ledger and stock certificate book with the general ledger.

The audit working papers should include a record of the last certificate number issued during the year. Reference to the working papers for the preceding audit, combined with the verification of certificate numbers issued during the current period, will enable the auditors to account for all certificates by serial number.

A working paper prepared during the auditors' examination of the stock certificate book of a small closely held corporation is designed to be utilized during several audits; it may be retained in the permanent file or forwarded to successive current files. Additionally, it is desirable for the auditors to inspect the unissued certificates to determine that all certificates purported to be unissued are actually on hand and blank.

Adequate internal control for corporations not utilizing the services of an independent registrar and stock transfer agent requires that all canceled stock certificates be perforated or marked in a manner precluding the possibility of further use. Canceled certificates should be attached to the corresponding stubs in the stock certificate book and permanently preserved. If reacquired certificates are not canceled properly, the danger exists that they may be reissued fraudulently by officers or employees. Auditors, therefore, will examine all canceled stock certificates on hand, noting in particular that they have been voided. The general ledger account for capital stock shows the total par value or stated value of all shares outstanding, plus any treasury shares. The stockholders ledger includes an account for each stockholder. The stock certificate book contains all canceled certificates and also open stubs for outstanding certificates. The auditors should reconcile these three records (general ledger control account, stockholders ledger, and stock certificate book) to establish the amount of outstanding stock and to rule out the possibility of an overissuance of shares. If this verification were not made, it would be possible for a dishonest official to issue unlimited amounts of stock and withhold the proceeds from such sales.

A trial balance of the subsidiary stockholder records may be obtained from the client or prepared by the auditors and compared with the general ledger controlling account.

## Illustrative Case

### Backdating of Stock Options

Several years ago, financial headlines revealed that a number of companies have engaged in “backdating” of stock option grants to officers and employees. Some of these companies announced restatements of previously issued financial statements as a result of the practice. The PCAOB has indicated that

auditors should be alert to the risk that a company may not have properly accounted for stock options and, as a result, may have materially misstated its financial statements. In cases where the risk of misstatement is significant, the auditors should react to the risk by considering assigning more experienced staff to the audit and evaluating the nature of the audit procedures to be performed for the options.

In conjunction with this procedure, the total shares outstanding, as shown by the stock certificate book stubs, should also be reconciled with the control account and with the subsidiary trial balance. These procedures assure the auditors of the accuracy of the ledger account balances for capital stock.

Primary Audit Objectives:	
Valuation	<input checked="" type="checkbox"/>
Accuracy	<input checked="" type="checkbox"/>
Presentation	<input checked="" type="checkbox"/>

#### 7. Determine That Appropriate Accounting Is Applied to Employee Stock Compensation Plans.

Many corporations grant stock options or other similar instruments to officers and employees through incentive-type compensation plans. Accounting standards now require companies to recognize the compensation cost related to these awards. Specifically, the compensation cost is measured as the fair value of the options on the date they are granted to the employee. This cost is then recognized as compensation expense over the period in which the options vest.

The accounting for these instruments at fair value presents a particular challenge for the auditors. Because options are not traded on a market, the fair values of the options are determined by using option pricing models, such as the Black Scholes and the binomial models. Estimates of fair value or variability of stock prices are often determined by reference to the behavior of stock and option prices of comparable companies. The auditors should determine that the assumptions underlying the estimates of fair value are reasonable. In addition, they should obtain evidence that the computations are accurate. Chapter 5 describes the guidance for auditing financial statement items that are measured at fair value. In this area, the auditors may decide to use the work of a specialist.

Primary Audit Objective:	
Presentation	<input checked="" type="checkbox"/>

#### 8. Determine That Compliance with Restrictions and Preferences Pertaining to Capital Stock and Disclosures Are Appropriate.

When *stock options* are granted, the corporation must hold a portion of the authorized but unissued stock in reserve so that it will be in a position to fulfill the option agreements. Similarly, corporations with convertible debentures or convertible preferred stock outstanding must hold in reserve a sufficient number of common shares to meet the demands of preferred stockholders and debenture holders who may elect to convert their securities into common stock.

The auditors should become thoroughly familiar with the terms of any stock options and stock purchase plans and with the conversion features of debenture bonds and preferred stock, so that they can determine appropriate measurement and adequate disclosure of these agreements. The auditors should also verify the shares issued during the year through conversion or exercise of stock options and should ascertain that the number of shares held in reserve at the balance sheet date does not exceed the corporation's authorized but unissued stock.

## Retained Earnings and Dividends

Audit work on retained earnings and dividends includes two major steps: (1) the analysis of retained earnings and any appropriations of retained earnings and (2) the review of dividend procedures for both cash and stock dividends.

On a first-year audit, the analysis of retained earnings and any appropriations of retained earnings should cover the entire history of these accounts. Such an analysis is prepared for the permanent file and is updated during each annual audit. Credits to the Retained Earnings account ordinarily represent amounts of net income transferred from the Income Summary account. Debits to the Retained Earnings account ordinarily include entries for net losses, cash and stock dividends, and the creation or enlargement of appropriated reserves. Appropriations of retained earnings require specific authorization by the board of directors. The only verification necessary for these entries is to ascertain that the dates and amounts correspond to the actions of the board.

In the verification of cash dividends, the auditors usually will perform the following steps:

1. Determine the dates and amounts of dividends authorized.
2. Verify the amounts paid.
3. Determine the amount of any preferred dividends in arrears.
4. Review the treatment of unclaimed dividend checks.

The auditors' analysis of dividend declarations may reveal the existence of cash dividends declared but not paid. These dividends must be shown as liabilities in the balance sheet. The auditors also may review the procedures for handling unclaimed dividends and ascertain that these items are recognized as liabilities. The amount of any accumulated dividends in arrears on preferred stock should be computed. If a closely held company has irregular dividend declarations or none at all, the auditors should consider whether the federal penalty surtax on reasonably accumulated retained earnings might be assessed. In the verification of stock dividends, there is an additional responsibility of determining that the proper amounts have been transferred from retained earnings to capital stock and paid-in capital accounts for both large and small stock dividends.

---

### Financial Statement Presentation of Stockholders' Equity

The presentation of capital stock in the balance sheet should include a complete description of each issue. Information to be disclosed includes the title of each issue; par or stated value; dividend rate, if any; dividend preference; conversion and call provisions; number of shares authorized, issued, and in treasury; dividends in arrears, if any; and shares reserved for stock options or for conversions.

Treasury stock preferably is shown in the stockholders' equity section, at cost, as a deduction from the combined total of paid-in capital and retained earnings. In many states, an amount of retained earnings equivalent to the cost of the treasury shares must be restricted. A note to the financial statements discloses this restriction.

Changes in retained earnings during the year may be shown in a separate statement or combined with the income statement. A combined statement of income and retained earnings often is presented. In this form of presentation, the amount of retained earnings at the beginning of the year is added to the net income figure, dividends paid are subtracted from the subtotal, and the final figure represents the new balance of retained earnings.

One of the most significant points to consider in determining the presentation of retained earnings in the balance sheet is the existence of any restriction on the use of this retained income. Agreements with banks, bondholders, and other creditors very commonly impose limitations on the payment of dividends. These restrictions must be fully disclosed in the notes to financial statements.

## Time of Examination—Stockholders' Equity

The transactions involving stockholders' equity accounts generally are few in number, but material in amount. Because so few transactions occur, it usually is efficient to make the analysis after the close of the period. In the first audit of a new client, however, some preliminary work can be done in terms of obtaining and reviewing copies of the articles of incorporation and bylaws and analyzing the capital accounts.

For a continuing client, the auditors will often find that audit time required will be small in relation to the dollars in these accounts and much less than is required for assets, liabilities, revenue, or expense. Thus, while the capital stock account often has a larger balance than the cash account, the audit work required for capital stock is usually far less.

## Audit of Partnerships and Sole Proprietorships

Perhaps the most common reason for a small business to arrange for an independent audit is the need for audited financial statements in order to obtain a bank loan. Often, when approached by the owners of a small business applying for a loan, a banker will request audited financial statements as an aid to reaching a decision on the loan application.

### *Procedures for the Audit of Partners' Accounts*

A most significant document underlying the partnership form of organization is the partnership contract. The auditors are particularly interested in determining that the distribution of net income has been carried out in accordance with the profit-sharing provisions of the partnership contract. Maintenance of partners' capital accounts at prescribed levels and restriction of drawings by partners to specified amounts are other points often covered in the contract; compliance with these clauses should be verified by the auditors in determining the propriety of the year's entries in the capital accounts. Partners' loan accounts also require reference to the partnership contract to determine the treatment intended by the partners.

Occasionally, the auditors may find that a partnership is operating without any written agreement of partnership. This situation raises a question of whether profits have been divided in accordance with the understanding existing between the partners. For their own protection, the auditors may wish to obtain from each partner a written statement confirming the balance in his or her capital account and approval of the method used in dividing the year's earnings. They may also suggest that the firm develop a written partnership agreement.

### *Procedures for the Audit of Sole Proprietorships*

In general, the same principles described for the audit of corporate capital are applicable to the examination of the capital accounts and drawing accounts of a sole proprietorship or partnership. Analyses are made of all proprietorship accounts from the beginning of the business; the initial capital investment and any additions are traced to the cash and asset records; and the net income or loss for the period and any withdrawals are verified. In the case of a sole proprietorship, a common source of difficulty is the practice of intermingling business and personal transactions, making it necessary for the auditors to segregate personal net worth from business capital. Adjustments may also be required to transfer from expense accounts to the owner's drawing account any personal expenditures paid with company funds.

## Chapter Summary

The details of the audit of long-term debt and equity accounts were discussed in this chapter. The chapter includes a description of the controls for these types of accounts and the audit procedures that auditors use to substantiate long-term debt and equity accounts. To summarize:

1. The financing cycle involves those activities of the company that are designed to obtain capital funds. It typically involves the issuance and repayment of debt and equity, as well as payment of interest and dividends. A primary concern for both of

these types of transactions is proper authorization by the appropriate official in the company or by the board of directors.

2. Control over the issuance of bonds by a company is enhanced when an independent trustee represents the interest of the bondholders. The responsibilities of the trustee include monitoring the company's compliance with the requirements of the bond agreement and processing the payments of interest and principal to individual bondholders.
3. Capital stock transactions are best controlled by employing a registrar/transfer agent who monitors the issuance of the company's stock and handles transfers of shares between investors. In smaller companies, capital stock is controlled through the maintenance of a stock certificate book and a stockholders ledger.
4. After the auditors obtain an understanding of the client and its environment, including internal control over the financing cycle, they will often perform only limited tests of controls because of the limited number of transactions typically involved. In audits of nonpublic companies, it is usually more efficient to assess control risk at a high level and perform detailed substantive procedures for transactions. Internal controls must be tested in an integrated audit of a public company.
5. In the audit of debt, the auditors' primary substantive procedures will include vouching selected transactions occurring during the period, examining debt agreements, confirming balances and terms, and evaluating compliance with restrictive covenants.
6. The auditors' primary substantive procedures for equity transactions will typically include vouching the major equity transactions occurring during the period, confirming the number of shares outstanding with the registrar, and evaluating the company's compliance with stock option plan requirements and other restricting agreements.

## Key Terms Introduced or Emphasized in Chapter 15

**Debenture bond (605)** An unsecured bond, dependent upon the general credit of the issuer.

**Sinking fund (609)** Cash or other assets set aside for the retirement of a debt.

**Stock certificate book (615)** A book of serially numbered certificates with attached stubs. Each stub shows the corresponding certificate number and provides space for entering the number of shares represented by the certificate, the name of the shareholder, and the serial number of the certificate surrendered in exchange for the new one. Surrendered certificates are canceled and replaced in the certificate book.

**Stock registrar (615)** An institution charged with responsibility for avoiding overissuance of a corporation's stock. Every new certificate must be presented to the registrar for examination and registration before it is issued to a stockholder.

**Stock transfer agent (615)** An institution responsible for maintaining detailed records of shareholders and handling transfers of stock ownership.

**Stockholders ledger (615)** A record showing the number of shares owned by each stockholder. This is the basic record used for preparing dividend payments and other communications with shareholders.

**Treasury stock (617)** Shares of its own stock acquired by a corporation for the purpose of being reissued at a later date.

**Trust indenture (605)** The formal agreement between bondholders and the issuer as to the terms of the debt.

## Review Questions

- 15-1. What does the trust indenture used by a corporation in creating long-term bonded indebtedness have to do with the payment of dividends on common stock?
- 15-2. Long-term creditors often insist upon placing certain restrictions upon the borrowing company for the term of the loan. Give three examples of such restrictions, and indicate how each restriction protects the long-term creditor.
- 15-3. Most corporations with bonds payable outstanding utilize the services of a trustee. What relation, if any, does this practice have to the maintenance of adequate internal control?
- 15-4. What information should be requested by the auditors from the trustee responsible for an issue of debentures payable?

- 15-5. Palmer Company has issued a number of notes payable during the year, and several of these notes are outstanding at the balance sheet date. What sources of information should the auditors use in preparing a working paper analysis of the notes payable?
- 15-6. Is the confirmation of notes payable usually correlated with any other specific phase of the audit? Explain.
- 15-7. What is the principal reason for testing the reasonableness of the Interest Expense account in conjunction with the verification of notes payable?
- 15-8. In addition to verifying the recorded liabilities of a company, the auditors should also give consideration to the possibility that other unrecorded liabilities exist. What specific steps may be taken by the auditors to determine that all their client's interest-bearing liabilities are recorded?
- 15-9. Audit procedures for examination of accounts receivable and notes receivable often include investigation of selected transactions occurring after the balance sheet date as well as transactions occurring during the year under audit. Are the auditors concerned with notes payable transactions subsequent to the balance sheet date? Explain.
- 15-10. "Auditors are not qualified to pass on the legality of a bond issue; this is a question for the company's attorneys. It is therefore unnecessary for the auditors to inspect the bond indenture." Criticize the quotation.
- 15-11. Mansfield Corporation has outstanding an issue of 30-year bonds payable. There is no sinking fund for these bonds. Under what circumstances, if any, should this bond issue be classified as a current liability?
- 15-12. Two assistant auditors were assigned by the auditor-in-charge to the verification of long-term liabilities. Some time later, they reported to the auditor-in-charge that they had determined that all long-term liabilities were properly recorded and that all recorded long-term liabilities were genuine obligations. Does this determination constitute a sufficient examination of long-term liabilities? Explain.
- 15-13. Compare the auditors' examination of owners' equity with their work on assets and current liabilities. Among other factors to be considered are the relative amounts of time involved and the character of the transactions to be inspected.
- 15-14. What do you consider to be the most important control a corporation can adopt with respect to capital stock transactions?
- 15-15. What is the primary responsibility of an independent registrar with respect to capital stock?
- 15-16. In the audit of a small corporation not using the services of an independent stock registrar and stock transfer agent, what use is made of the stock certificate book by the auditors?
- 15-17. Describe the significant features of a stock certificate book, its purpose, and the manner in which it is used.
- 15-18. You have been retained to perform an audit of Valley Products, a small corporation which has not been audited during the previous 10 years of its existence. How will your work on the Capital Stock account in this initial audit differ from that required in a repeat engagement?
- 15-19. Your new client, Black Angus Valley Ranch, is a small corporation with fewer than 100 stockholders. It does not utilize the services of an independent stock registrar or transfer agent. For your first audit, you want to obtain or prepare a year-end list of stockholders showing the number of shares owned by each. From what source or record should this information be obtained? Explain.
- 15-20. Corporations sometimes issue their own capital stock in exchange for services and various assets other than cash. As an auditor, what evidence would you look for to determine the propriety of the values used in recording such transactions?
- 15-21. In your second annual audit of a corporate client, you find a new account in the general ledger called Treasury Stock, which has a balance of \$306,000. Describe the procedures you would follow to verify this item.
- 15-22. In auditing the financial statements of Foster Company, you observe a debit entry for \$200,000 labeled as Dividends in the Retained Earnings account. Explain in detail how you would verify this entry.
- 15-23. Name three situations that might place a restriction on retained earnings, limiting or preventing dividend payments. Explain how the auditors might become aware of each such restricting factor.
- 15-24. Comment on the desirability of audit work on the owners' equity accounts before the balance sheet date.

## Questions Requiring Analysis

LO 15-1, 5

- 15-25. Delta Company has issued stock options to four of its officers, permitting them to purchase 5,000 shares each of common stock at a price of \$25 per share at any time during the next five years. The president asks you what effect, if any, the granting of the options will have upon the balance sheet presentation of the stockholders' equity accounts.
- 15-26. What errors are commonly encountered by the auditors in their examination of the capital and drawing accounts of a sole proprietor?

LO 15-1, 4, 5

- 15-27. The only long-term liability of Range Corporation is a note payable for \$1 million secured by a mortgage on the company's plant and equipment. You have audited the company annually for the three preceding years, during which time the principal amount of the note has remained unchanged. The maturity date is 10 years from the current balance sheet date. You are informed by the president of the company that all interest payments have been made promptly in accordance with the terms of the note. Under these circumstances, what audit work, if any, is necessary with respect to this long-term liability during your present year-end audit?

*Required:*

LO 15-1, 5

- 15-28. During your annual audit of Walker Distributing Co., your assistant, Jane Williams, reports to you that, although a number of entries were made during the year in the general ledger account Notes Payable to Officers, she decided that it was not necessary to audit the account because it had a zero balance at year-end.

Do you agree with your assistant's decision? Discuss.

*Required:*

- 15-29. You are engaged in the audit of the financial statements of Armada Corporation for the year ended August 31, 20X0. The balance sheet, reflecting all your audit adjustments accepted by the client to date, shows total current assets, \$8,000,000; total current liabilities, \$7,500,000; and stockholders' equity, \$1,000,000. Included in current liabilities are two unsecured notes payable—one payable to United National Bank in the amount of \$900,000 due October 31, 20X0; the other payable to First State Bank in the amount of \$800,000 due September 30, 20X0. On September 30, the last scheduled date for your audit fieldwork, you learn that Armada Corporation is unable to pay the \$832,000 maturity value of the First State Bank note, that Armada executives are negotiating with First State Bank for an extension of the due date of the note, and that nothing definite has been decided as to the extension.

- Should this situation be disclosed in the notes to Armada Corporation's August 31 financial statements?
- After the question of financial statement disclosure has been resolved to the auditors' satisfaction, might this situation have any effect upon the audit report?

LO 15-1, 4, 5

- 15-30. You are retained by Columbia Corporation to audit its financial statements for the fiscal year ended June 30. Your consideration of internal control indicates a fairly satisfactory condition, although there are not enough employees to permit an extensive separation of duties. The company is one of the smaller units in its industry, but it has realized net income of about \$500,000 in each of the last three years.

Near the end of your fieldwork, you overhear a telephone call received by the president of the company while you are discussing the audit with him. The telephone conversation indicates that on May 15 of the current year the Columbia Corporation made an accommodation endorsement of a 60-day \$430,000 note issued by a major customer, Brill Corporation, to its bank. The purpose of the telephone call from Brill was to inform your client that the note had been paid at the maturity date. You had not been aware of the existence of the note before overhearing the telephone call.

*Required:*

- From an ethical standpoint, do you think the auditors would be justified in acting on information acquired in this manner?
- Should the balance sheet as of June 30 disclose the contingent liability? Give reasons for your answer.
- Prepare a list of auditing procedures that might have brought the contingency to light. Explain fully the likelihood of detection of the accommodation endorsement by each procedure listed.

LO 15-6, 7, 8, 9

- 15-31. Valley Corporation established a stock option plan for its officers and key employees this year. Because the options granted have a higher option price than the stock's current market price, the company has not recognized any cost for the options in the financial statements. However, a note to the financial statements includes all required disclosures.

Required:

- a. Do you believe that Valley's management has appropriately accounted for the stock option plan? Explain your answer.
- b. What responsibility do the auditors have for the information in the notes to the financial statements?
- c. List the audit procedures, if any, that you believe should be applied to the stock option plan.

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 15–32. Multiple Choice Questions

Select the best answer choice for each of the following, and justify your selection in a brief statement.

LO 15-2

- a. Which of the following is *least* likely to be an audit objective for debt?
  - (1) Determine the existence of recorded debt.
  - (2) Establish the completeness of recorded debt.
  - (3) Determine that the client has rights to receive proceeds relating to the redemption of debt.
  - (4) Determine that the valuation of debt is in accordance with generally accepted accounting principles.

LO 15-5

- b. The auditors would be most likely to find unrecorded long-term liabilities by analyzing:
  - (1) Interest payments.
  - (2) Discounts on long-term liabilities.
  - (3) Premiums on long-term liabilities.
  - (4) Recorded long-term liability accounts.

LO 15-1, 5

- c. A likely reason that consideration of client compliance with debt provisions is important to an audit is that violation of such debt provisions may affect the total recorded:
  - (1) Number of debt restrictions.
  - (2) Current liabilities.
  - (3) Long-term assets.
  - (4) Capital stock.

LO 15-6, 8, 9

- d. A transfer agent and a registrar are most likely to provide the auditor with evidence on:
  - (1) Restrictions on the payment of accounts payable.
  - (2) Shares issued and outstanding.
  - (3) Preferred stock liquidation value.
  - (4) Transfers occurring between management and related parties.

LO 15-5, 9

- e. The audit procedure of confirmation is least appropriate with respect to:
  - (1) The trustee of an issue of bonds payable.
  - (2) Holders of common stock.
  - (3) Holders of notes receivable.
  - (4) Holders of notes payable.

LO 15-6, 9

- f. An auditor is most likely to trace treasury stock purchase transactions to the:
  - (1) Numbered stock certificates on hand.
  - (2) Articles of incorporation.
  - (3) Year's interest expense.
  - (4) Minutes of the audit committee.

LO 15-1, 6

- g. In the continuing audit of a manufacturing company of medium size, which of the following areas would you expect to require the *least* amount of audit time?
  - (1) Owners' equity.
  - (2) Revenue.
  - (3) Assets.
  - (4) Liabilities.

## LO 15-1, 4, 5

- h. The auditors can best verify a client's bond sinking fund transactions and year-end balance by:
- (1) Recomputation of interest expense, interest payable, and amortization of bond discount or premium.
  - (2) Confirmation with individual holders of retired bonds.
  - (3) Confirmation with the bond trustee.
  - (4) Examination and count of the bonds retired during the year.

## LO 15-2, 5

- i. The auditors' plan for the examination of long-term debt should include steps that require the:
- (1) Verification of the existence of the bondholders.
  - (2) Examination of copies of debt agreements.
  - (3) Inspection of the accounts payable subsidiary ledger.
  - (4) Investigation of credits to the bond interest income account.

## LO 15-1, 4

- j. All corporate capital stock transactions should ultimately be traced to the:
- (1) Minutes of the board of directors.
  - (2) Cash receipts journal.
  - (3) Cash disbursements journal.
  - (4) Numbered stock certificates.

## LO 15-7, 9

- k. Which of the following is *most* likely to be an audit objective in the audit of owners' equity?
- (1) Establish that recorded owners' equity includes all long-term debt and equity balances.
  - (2) Determine that common stock is valued at current market value.
  - (3) Determine that the presentation and disclosure of owners' equity are appropriate.
  - (4) Determine that the existence of recorded owner's equity is in conformity with equity accounting rule valuations.

## LO 15-9

- l. In an audit of a sole proprietorship, a common difficulty is lack of:
- (1) Segregation of personal net worth and business capital.
  - (2) Availability of the owner.
  - (3) Agreement as to the distribution between retained earnings and owners' capital.
  - (4) Proper measures of dividends.

## LO 15-4

- m. Which of the following questions would an auditor most likely include on an internal control questionnaire for notes payable?
- (1) Are assets that collateralize notes payable critically needed for the entity's continued existence?
  - (2) Are two or more authorized signatures required on checks that repay notes payable?
  - (3) Are the proceeds from notes payable used for the purchase of noncurrent assets?
  - (4) Are direct borrowings on notes payable authorized by the board of directors?

## LO 15-8

- n. The primary responsibility of a bank acting as registrar of capital stock is to:
- (1) Ascertain that dividends declared do *not* exceed the statutory amount allowable in the state of incorporation.
  - (2) Account for stock certificates by comparing the total shares outstanding to the total in the shareholders' subsidiary ledger.
  - (3) Act as an independent third party between the board of directors and outside investors concerning mergers, acquisitions, and the sale of treasury stock.
  - (4) Verify that stock is issued in accordance with the authorization of the board of directors and the articles of incorporation.

## LO 15-8

- o. Where an independent stock transfer agent is not employed and the corporation issues its own stocks and maintains stock records, canceled stock certificates should:
- (1) Be defaced to prevent reissuance and attached to their corresponding stubs.
  - (2) Not be defaced but segregated from other stock certificates and retained in a canceled certificates file.
  - (3) Be destroyed to prevent fraudulent reissuance.
  - (4) Be defaced and sent to the secretary of state.

## LO 15-5

- p. An auditor most likely would inspect loan agreements under which an entity's inventories are pledged to support management's financial statement assertion of:
- (1) Presentation and disclosure.
  - (2) Valuation or allocation.
  - (3) Existence or occurrence.
  - (4) Completeness.

## LO 15-8

- q. An auditor usually obtains evidence of stockholders' equity transactions by reviewing the entity's:
- (1) Minutes of board of directors meetings.
  - (2) Transfer agent's records.
  - (3) Canceled stock certificates.
  - (4) Treasury stock certificate book.

## LO 15-1, 5, 6, 8

- 15–33. Match the following definitions (or partial definitions) to the appropriate term. Each term may be used once or not at all.

Definition (or Partial Definition)	Term
a. An institution charged with responsibility for avoiding overissuance of a corporation's stock	1. Common stock
b. An institution responsible for maintaining detailed records of shareholders and handling changes of ownership of stock ownership	2. Debenture bond
c. Cash or other assets set aside for the retirement of a debt	3. Sinking fund
d. Shares of its own stock acquired by a corporation for the purpose of being reissued at a later date	4. Stock certificate book
e. The formal agreement between bondholders and the issuer as to the terms of the debt	5. Stock certificate holder
	6. Stock registrar
	7. Stock transfer agent
	8. Treasury stock
	9. Trust indenture

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*. 

## LO 15-1, 2, 5

- 15–34. Your client, Summerford, Inc., has a debt agreement with Valley City Bank that includes a number of restrictions and covenants. Violation of any restriction or covenant results in the entire amount of the debt becoming due immediately. For each of the following, provide audit procedures that will address whether Summerford has met the restriction or covenant.
- a. A current ratio of at least 1.5 to 1 must be maintained at year-end.
  - b. No dividends may be paid in years in which there is a net loss. When there is net income, no more than one-half of the net income may be paid out in dividends.
  - c. The accounts receivable and inventory serve as security on the loan.
  - d. The total of the president's and vice president's salaries may not exceed \$800,000 during the duration of the loan.
  - e. Monthly payments as per the agreement are due by the 10th of the following month.

## LO 15-1, 2, 3, 4, 5

- 15–35. Robert Hopkins was the senior office employee at the Griffin Equipment Company. He enjoyed the complete confidence of the owner, William Barton, who devoted most of his attention to sales, engineering, and production problems. All financial and accounting matters were entrusted to Hopkins, whose title was office manager. Hopkins had two assistants, but their only experience in accounting and financial work had been gained under Hopkins's supervision. Barton had informed Hopkins that it was his responsibility to keep him (Barton) informed on the financial position and operating results of the company but not to bother him with details.

The company was short of working capital and would occasionally issue notes payable in settlement of past-due open accounts to suppliers. The situations warranting the issuance of notes were decided upon by Hopkins, and the notes were drawn by him for signature by Barton. Hopkins was aware of the weakness in internal control and finally devised a scheme for defrauding the company through understating the amount of notes payable outstanding. He prepared a note in the amount of \$24,000 payable to a supplier to whom several invoices were

past due. After securing Barton's signature on the note and mailing it to the creditor, Hopkins entered the note in the Notes Payable account of the general ledger as \$4,000, with an offsetting debit of \$4,000 to Accounts Payable. Subsequently, when funds became available to the company, he paid the \$20,000 of accounts payable that remained on the books.

Several months later when the note matured, a check for \$24,000 plus interest was issued and properly recorded, including a debit of \$24,000 to the Notes Payable account. Hopkins then altered the original credit in the account by changing the figure from \$4,000 to \$24,000. He also changed the original debit to Accounts Payable from \$4,000 to \$24,000. This alteration caused the Notes Payable account to have a balance in agreement with the total of other notes outstanding. To complete the fraud, Hopkins called the supplier to whom the check had been sent and explained that the check should have been for only \$4,000 plus interest.

Hopkins explained to the supplier that the note of \$24,000 originally had been issued in settlement of a number of past-due invoices, but that while the note was outstanding, checks had been sent in payment of all the invoices. "In other words," said Hopkins over the telephone, "we made the mistake of giving you a note for those invoices and then going ahead and sending you checks for them as soon as our cash position had improved. Then we paid the note at maturity. So please excuse our mistakes and return the overpayment." After reviewing the record of invoices and checks received, the supplier agreed he had been overpaid by \$20,000 plus interest and promptly sent a refund, which Hopkins abstracted without making any entry in the accounts.

*Required:*

- a. Assuming that an audit by CPAs was made while the note was outstanding, do you think that the \$20,000 understatement of the Notes Payable account would have been detected? Explain fully the reasoning underlying your answer.
  - b. If the fraud was not discovered while the note was outstanding, do you think that an audit subsequent to the payment of the note would have disclosed the fraud? Explain.
  - c. What controls would you recommend for Griffin Equipment Company to avoid fraud of this type?
- LO 15-6, 8, 9** 15-36. You have received confirmations from the transfer agent and the registrar of Lowe Company as to the number of authorized and outstanding shares as of December 31, 20X1, Lowe's year-end.
- a. Which financial statement assertions do these confirmations most directly address?
  - b. Provide a listing of additional auditing procedures likely to be necessary in the audit of Lowe's common stock outstanding.
- LO 15-6, 8, 9** 15-37. You are engaged in the audit of Phoenix Corp., a new client, at the close of its first fiscal year, April 30, 20X1. The accounts had been closed before the time you began your year-end fieldwork.
- You review the following stockholders' equity accounts in the general ledger:

Capital Stock			
		5/1/X0 CR1	500,000
		4/28/X1 J12-5	50,000
Paid-in Capital in Excess of Stated Value			
		5/1/X0 CR1	250,000
		2/2/X1 CR10	2,500
Retained Earnings			
4/28/X1 J12-5	50,000	4/30/X1 J12-14	800,000
Treasury Stock			
9/14/X0 CP5	80,000	2/2/X1 CR10	40,000
Income Summary			
4/30/X1 J12-13	5,200,000	4/30/X1 J12-12	6,000,000
4/30/X1 J12-14	800,000		

Other information in your working papers includes the following:

1. Phoenix's articles of incorporation filed April 17, 20X0, authorized 100,000 shares of no-par-value capital stock.
2. Directors' minutes include the following resolutions:
  - 4/18/X0 Established \$50 per share stated value for capital stock.
  - 4/30/X0 Authorized issue of 10,000 shares to an underwriting syndicate for \$75 per share.
  - 9/13/X0 Authorized acquisition of 1,000 shares from a dissident holder at \$80 per share.
  - 2/1/X1 Authorized reissue of 500 treasury shares at \$85 per share.
  - 4/28/X1 Declared 10 percent stock dividend, payable May 18, 20X1, to stockholders of record May 4, 20X1.
3. The following costs of the May 1, 20X0, and February 2, 20X1, stock issuances were charged to the named expense accounts: Printing Expense, \$2,500; Legal Fees, \$17,350; Accounting Fees, \$12,000; and SEC Fees, \$150.
4. Market values for Phoenix Corp. capital stock on various dates were:
 

9/13/X0	\$78.50	2/2/X1	\$85.00
9/14/X0	\$79.00	4/28/X1	\$90.00
5. Phoenix Corp.'s combined federal and state income tax rates total 55 percent.
  - a. Prepare the necessary adjusting journal entries at April 30, 20X1.
  - b. Prepare the stockholders' equity section of Phoenix Corp.'s April 30, 20X1, balance sheet.

*Required:*

# Auditing Operations and Completing the Audit

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 16-1** Identify the audit objectives for revenue and expense accounts.
- LO 16-2** Explain the relationships between revenue and expense accounts and balance sheet accounts.
- LO 16-3** Describe the nature of appropriate substantive audit procedures to accomplish the objectives for the audit of revenue and expense accounts.
- LO 16-4** Describe the fundamental controls over payroll.
- LO 16-5** Complete an audit plan for payroll.
- LO 16-6** Explain the types of procedures that are necessary to complete the audit.
- LO 16-7** Describe the auditors' responsibilities for the detection and evaluation of various types of subsequent events.
- LO 16-8** Explain the steps involved in evaluating audit findings.
- LO 16-9** Discuss the auditors' post-audit responsibilities.

This chapter presents information about the manner in which auditors examine the client's income statement accounts and the procedures and considerations involved in completing the audit engagement. These procedures and judgments, completed at or near the last day of fieldwork, are important in determining the nature and content of the auditors' report.

## Auditing Operations

Today, with great emphasis being placed upon corporate earnings as an indicator of the health and well-being of corporations as well as of the overall economy, the income statement is of fundamental importance to management, stockholders, creditors, employees, and the government. The relative level of corporate earnings is often a key factor in the determination of such issues as wage negotiations, income tax rates, subsidies, and government fiscal policies. In fact, accountants generally agree that the measurement of income is the most important single function of accounting. While this text has emphasized the relationships of revenues and expenses to various balance sheet accounts, this section presents additional details on the auditing of operations.

### The Auditors' Approach to Auditing Operations

#### LO 16-1

Identify the audit objectives for revenue and expense accounts.

The doctrine of **conservatism** is a powerful force influencing decisions on revenues and expenses. The concept remains important in large part due to the subjectivity involved with many accounting estimates (as for expected future credit losses on receivables, lives of assets, and the warranty liability for products sold). Conservatism in the valuation of assets means that when two (or more) reasonable alternative values are indicated, the accountant will choose the lower amount. For valuation of liabilities, the

higher amount is chosen. Therefore, when applied to the income statement, the conservatism concept results in a low or "conservative" income figure.

Most auditors have considerable respect for the doctrine of conservatism. In part, this attitude springs from the concept of legal liability to third parties. Financial statements that *understate* financial position and operating results almost never lead to legal action against the auditors involved. Nevertheless, auditors must recognize that overemphasis on conservatism in financial reporting is a narrow and shortsighted approach to meeting the needs of our society. To be of greatest value, financial statements should be neutral, rather than understate, financial position and operating results. The FASB rejected conservatism as a desirable characteristic of accounting information, suggesting that it is inconsistent with neutrality.

Auditors obtain evidence about many income statement accounts concurrently with related balance sheet accounts. Depreciation expense, for example, is most conveniently verified along with the plant and equipment accounts. Once the existence and cost of depreciable assets are established, the verification of depreciation expense is merely an additional step. On the other hand, to verify depreciation expense without first establishing

the nature and amount of assets owned and subject to depreciation would obviously be a cart-before-the-horse approach. The same line of reasoning suggests that the auditors' work on inventories, especially in determining that inventory transactions were accurately cut off at the end of the period, is a major step toward the verification of the income statement figures for sales and cost of goods sold.

The auditors' examination of operations should, however, be much more than an incidental by-product of the examination of assets and liabilities. They use a combination of cross-referencing, analytical procedures, and analysis of specific transactions to bring to light errors, omissions, and inconsistencies not disclosed in the audit of balance sheet accounts.

Specifically, the objectives for the audit of revenues and expenses are to:

1. Use the understanding of the client and its environment to consider *inherent risks*, including fraud risks, related to revenues and expenses.
2. Consider *internal control* over revenues and expenses.
3. Assess the *risks of material misstatement* of revenues and expenses and design further audit procedures that:
  - a. Establish the *occurrence* of recorded revenue and expense transactions.
  - b. Determine the *completeness* of recorded revenue and expense transactions.
  - c. Establish the *accuracy* of revenue and expense transactions.
  - d. Verify the *cutoff* of revenue and expense transactions.
  - e. Determine that the *presentation* and *disclosure* of revenue and expense accounts are appropriate, including the proper classification of amounts and the proper presentation of earnings-per-share data.

## Revenue

### LO 16-2

Explain the relationships between revenue and expense accounts and balance sheet accounts.

The auditors' review of revenue was considered in connection with accounts receivable in Chapter 11. In this section, we consider (1) the relationship of revenue to various balance sheet accounts and (2) the miscellaneous revenue account.

### Relationship of Revenue to Balance Sheet Accounts

As pointed out previously, most revenue accounts are verified by the auditors in conjunction with the audit of a related asset or liability. The following list summarizes the revenue verified in this manner:

Balance Sheet Item	Revenue
Accounts receivable	Sales
Notes receivable	Interest
Securities and other investments	Interest, dividends, gains on sales, share of investee's income
Property, plant, and equipment	Rent, gains on sale
Intangible assets	Royalties

### Miscellaneous Revenue

Miscellaneous revenue, by its very nature, is a mixture of minor items, some nonrecurring and others likely to be received at irregular intervals. If the client's personnel receive a cash payment and are not sure of the source, it is likely that it will be recorded as miscellaneous revenue. Because of the nature of items often recorded in the Miscellaneous Revenue account, the auditors will obtain an analysis of the account. Among the items the auditors might find improperly included as miscellaneous revenue are the following:

1. Collections on previously written-off accounts or notes receivable, which should properly be recorded as a reduction of the allowance for uncollectible notes account.
2. Write-offs of old outstanding checks or unclaimed wages. In many states, unclaimed properties revert to the state after statutory periods; in such circumstances, these write-offs should be credited to a liability account rather than to miscellaneous revenue.

- 3. Proceeds from sales of scrap. Scrap sale proceeds generally should be applied to reduce cost of goods sold, under by-product cost accounting principles.
- 4. Rebates or refunds of insurance premiums. These refunds should be offset against the related expense or unexpired insurance.
- 5. Proceeds from sales of plant assets. These proceeds should be accounted for in the determination of the gain or loss on the assets sold.

The auditors should propose adjusting journal entries to classify correctly any material items of the types described in the preceding list that have been included in miscellaneous revenue by the client. Before concluding the work on revenue, the auditors should perform analytical procedures and investigate unusual fluctuations. Material amounts of unrecorded revenue, as well as significant misclassifications affecting revenue accounts, may be discovered by these procedures.

Expenses

The auditors’ work relating to purchases and cost of goods sold was covered in Chapter 12. We are now concerned with audit procedures for other types of expenses.

Relationship of Expenses to Balance Sheet Accounts

Let us consider for a moment the expense accounts for which we have already outlined audit procedures in the chapters dealing with balance sheet topics:

Balance Sheet Item	Expenses (and Costs)
Accounts and notes receivable	Uncollectible accounts and notes expense
Inventories	Purchases, cost of goods sold, and payroll
Property, plant, and equipment	Depreciation, repairs and maintenance, and depletion
Intangible assets	Amortization
Accrued liabilities	Commissions, fees, bonuses, product warranty expenses, and others
Interest-bearing debt	Interest

In the following sections, we shall complete our review of expenses by considering additional audit objectives and procedures for selling, general, and administrative expenses other than those listed above.

Substantive Procedures for Selling, General, and Administrative Expenses

**LO 16-3**  
Describe the nature of appropriate substantive audit procedures to accomplish the objectives for the audit of revenue and expense accounts.

For other expenses not verified in the audit of balance sheet accounts, the following substantive tests are appropriate:

- 1. Perform analytical procedures related to the accounts.
  - a. Develop an expectation of the account balance.
  - b. Determine the amount of difference from the expectation that can be accepted without investigation.
  - c. Compare the company’s account balance with the expected account balance.
  - d. Investigate significant deviations from the expected account balance.
- 2. Obtain or prepare analyses of selected expense accounts.
- 3. Obtain or prepare analyses of critical expenses in income tax returns.

1. Perform Analytical Procedures Related to the Accounts.

a. Develop an Expectation of the Account Balance.

Auditors develop an expectation of the account balance by considering factors such as budgeted amounts, the prior-year audited balances, industry averages, relationships among financial data, and relevant nonfinancial data.

An effective budgeting program will reduce the risk of material misstatement, since budgets provide management with information as to expected amounts. The existence of these expected expense amounts increases the likelihood that errors will be detected by management, since any significant discrepancy between budgeted and actual amounts receives timely attention.

The existence of a good budgeting program also helps the auditors in their audit of expense accounts. When the control over budgeting has been found to be effective, the budgeted amounts often provide the auditors with very good expected amounts for their analytical procedures.

One of the previously described audit objectives was to determine whether expenses had been correctly classified. The classification of such costs may affect net income. For example, manufacturing overhead costs may properly be carried forward as part of inventory cost, whereas the expenses of selling, general, and administrative functions usually are deducted from revenue in the period incurred. The auditors' review of the propriety of classification of expenses can be linked conveniently with the comparison of amounts of the various expenses. Comparison of yearly totals is accomplished by inclusion of amounts for the preceding year on the auditors' lead schedules or working trial balance, but this procedure may be supplemented by comparison of expenses on a month-by-month basis.

Comparison of expense (as well as revenue) accounts with industry and nonfinancial data is another means of bringing to light circumstances that require investigation. The auditors may also examine relationships between financial and nonfinancial information, such as between production records stated in gallons or pounds and the dollar amounts of sales.

**b. Determine the Amount of Difference from the Expectation That Can Be Accepted without Investigation.**

The auditors use their estimates of materiality to arrive at which differences are to be investigated and which might be expected to occur by chance. However, the extent of the assurance desired from the analytical procedure should also be considered.

**c. Compare the Company's Account Balance with the Expected Account Balance.**

Comparisons of the revenue and expense accounts with expected amounts may reveal significant differences that warrant investigation. Figure 16.1 illustrates a working paper that compares major income statement categories for the year under audit with the prior year amounts and industry averages.

**d. Investigate Significant Deviations from the Expected Account Balance.**

The starting point for investigating significant variations in expenses generally is inquiry of management. The auditors substantiate management's explanations for significant variations by various means, including analyses of accounts.

**2. Obtain or Prepare Analyses of Selected Expense Accounts.**

As a result of the above procedure, the auditors will have chosen certain expense accounts for further verification. The client should be requested to furnish analyses of the accounts selected, together with related vouchers and other supporting documents, for the auditors' review.

Which expense accounts are most important for the auditors to analyze? The American Institute of Certified Public Accountants (AICPA) has suggested investigation of (1) advertising, (2) research and development, (3) legal expenses and other professional fees, (4) maintenance and repairs, and (5) rents and royalties.<sup>1</sup>

<sup>1</sup> See AICPA, *Audit and Accounting Manual* (New York, 2010), paragraph AAM 5400.170.

**FIGURE 16.1** Comparative Income Statement

CHEVIOT CORPORATION

Comparative Income Statement

Year Ended December 31, 20X3

R-1-4

	20X2		20X3		Industry
	Amount	Percentage	Amount	Percentage	Percentage
Sales	\$5,487,842 ✓	100%	\$6,107,401 ∇ ∇	100%	100%
Cost of goods sold	3,746,583 ✓	68	4,030,701 ∇ ∅	66	65
Gross profit	1,741,259	32	2,076,700 ∅	34	35
Selling expenses	554,841 ✓	10	856,540 ∇ ∆	14	15
General and administrative expenses	796,347	15	875,570 ∇ ∅	14	12
Income before taxes	390,071	7	344,590 ∅	6	8
Taxes	128,732 ✓	2	68,693 ∇ ✗	1	3
Net income	261,339	5	275,897 ∅	5	5
	∧		∧		

∧ Footed.

∇ Agreed to the general ledger.

✓ Agreed to the prior year working papers.

∅ Amount is reasonable in relation to prior year results and industry statistics.

∇ See audit procedures performed on sales, R-1-2.

∆ Large increase in selling expenses is due to the addition of a salesperson to the sales staff. Based on a review of the payroll records, the increase in the amount appears reasonable.

✗ Decrease in tax rate is due to the realization of several thousand dollars in tax credits. See tax accrual working paper, O-3.

Conclusion:

The comparative analysis revealed no unusual fluctuations that could not be adequately explained.

Concur

C.M.

2/25/X4

The analyses of legal and other professional fees may disclose legal and audit fees properly chargeable to costs of issuing stock of debt instruments, or to costs of business combinations. Also, the analysis of professional fees expense furnishes the names of attorneys to whom letters should be sent requesting information as to pending litigation and other loss contingencies. Figure 16.2 illustrates an analysis of the professional fees expense account.

### 3. Obtain or Prepare Analyses of Critical Expenses in Income Tax Returns.

Income tax returns generally require schedules for officers' salaries, directors' fees, taxes, travel and entertainment, contributions, and casualty losses. In addition to these, officers' expense account allowances are presented in the analysis of officers' salaries. Accordingly, the auditors should obtain or prepare analyses of any of these expenses that were not analyzed when performing other audit steps. The auditors should bear in mind that details of these expenses will probably be closely scrutinized when the state or federal revenue agents examine the client's tax returns.

**FIGURE 16.2** Professional Fees Analysis

Acct. No. 547                      CHEVIOT CORPORATION Professional Fees Expense Year Ended December 31, 20X3					R-3-7
Date	Reference	Payee	Description	Amount	
Various	Various	Hale and Hale	Monthly retainer for legal services—12 x \$1,000	\$12,000	
Mar. 5, X3	CD 411	Jay & Wall, CPAs	Fee for the audit	22,000	✓
May 2, X3	CD 602	Hale and Hale	Fee for legal services relating to acquisition of real property adjoining Vancouver plant	6,000	✓

## The Audit of Payroll

The payroll in many companies is the largest operating cost and therefore deserves the close attention of management as well as the auditors. In the past, payroll frauds were common and often substantial. Today, however, such frauds may be more difficult to conceal for several reasons: (1) extensive segregation of duties relating to payroll; (2) the use of computers, with proper controls, for preparation of payrolls; and (3) the necessity of filing frequent reports to the government listing employees' earnings and tax withholdings.

### Internal Control over Payroll

#### LO 16-4

Describe the fundamental controls over payroll.

The establishment of strong internal control over payroll remains important for several reasons. Although payroll frauds are less frequent today, the possibility of large-scale payroll fraud still exists. Such frauds may involve listing fictitious persons on the payroll, overpaying employees, and continuing employees on the payroll after their separation from the company. A second reason for emphasizing internal control over payroll is that a great mass of detailed information concerning hours worked and rates of pay must be

processed quickly and accurately if workers are to be paid promptly and without error. Good employee relations demand that direct deposits to employee bank accounts or paychecks be processed on time and be free from error. As pointed out in previous chapters, internal control is a means of securing accuracy and dependability in accounting data as well as a means of preventing fraud.

Still another reason for emphasizing the importance of internal control over payroll is the existence of various payroll tax and income tax laws that require that certain payroll records be maintained and that payroll data be reported to the employee and to governmental agencies. Complete and accurate records of time worked are also necessary if a company is to protect itself against lawsuits under the Fair Labor Standards Act.

To control payroll costs means to avoid waste and to obtain efficient production from the dollars expended for services of employees. As a means of establishing control over payroll costs, many companies delegate to department heads and other supervisors responsibility for the control of costs in their respective units of the business. Budgets are prepared using estimates of departmental labor costs for the coming period. As the year progresses and actual labor costs are compiled, the controller submits monthly reports to top management comparing the budgeted labor costs and the actual labor costs for each department. The effectiveness of this control procedure will depend largely upon the extent to which top management utilizes these reports and takes action upon variances from the budget.

Most important of all controls over payroll is the division of payroll work among several departments of the company. Payroll activities include the functions of (1) employment (human resources), (2) timekeeping, (3) payroll preparation and record keeping, and (4) distribution of pay to employees. For effective internal control, a separate department of the company should handle each of these functions. These several phases of payroll activities will now be considered individually.

#### *Employment (Human Resources)*

The first significant step in establishing strong internal control over payroll should be taken by the human resources department when a new employee is hired. At this point, the authorized rate of pay should be entered on a pay-rate record. The employee also should sign a payroll deduction authorization specifying any amounts to be withheld and a withholding tax exemption certificate. These records should be kept in the human resources department, but a notice of the hiring of the new employee, the rate of pay, and the payroll deductions should be sent to the payroll department. When a computer is used, this information will be keyed into an employee payroll master file. The human resources department, the payroll department, or data processing will enter the data into the computer system.

Under no circumstances should a name be added to the payroll without having received the formal authorization notice from the human resources department. When an employee's rate of pay is changed, the new rate should be entered on the pay-rate record (often computerized) that is maintained in the human resources department. An authorization for the new rate should be sent to the payroll department before the change can be made effective on the payroll. Upon termination of an employee, notice of termination should be sent from the human resources department to the payroll department. The work of the payroll department and the propriety of names and pay raises used in preparing the payroll, therefore, rest upon formal documents or computer input originating outside the payroll department.

Adequate internal control demands that the addition and removal of names from the company payroll, as well as rate changes and reclassification of employees, be evidenced by written approval of an executive in the human resources department and by the head of the operating department concerned. To permit the payroll department to initiate changes in pay rates or to add names to the payroll without formal authorization from the human resources department increases the likelihood of fraud.

#### *Timekeeping*

The function of timekeeping consists of determining the number of hours (or units of production) for which each employee is to be paid. The use of electronic time-recording equipment is of considerable aid in establishing adequate internal control over the

time-keeping function. In addition, supervisors should maintain contact with subordinates and prepare time reports summarizing the use of labor.

Internal control can be improved by the practice of regular comparison of the time reports prepared by timekeepers or supervisors with time clock records showing the arrival and departure times of employees. If pay is based on piecework, a comparison may be made between the reports of units produced and the quantities that are added to the perpetual inventory records.

Salaried employees receiving a fixed monthly or weekly salary may not be required to use time clocks. Some companies require salaried employees to fill out a weekly or semi-monthly report indicating the time devoted to various activities. If a salaried employee is absent, the department head usually has authority to decide whether a pay reduction should be made.

#### *Payroll Preparation and Record Keeping*

In a manual system, the payroll department has the responsibility for computing the amounts to be paid to employees and for preparing all payroll records. It is important that the payroll department *not* perform the related functions of timekeeping, employment, or distribution of pay to employees. The output of the payroll department may be thought of as (1) the payroll checks or direct deposits (or pay envelopes, if wages are paid in cash); (2) individual employee statements of earnings and deductions; (3) a payroll journal; (4) an employees ledger, summarizing earnings and deductions for each employee; (5) a payroll distribution schedule, showing the allocation of payroll costs to direct labor, overhead, and various departmental expense accounts; and (6) quarterly and annual reports to the government showing employees' earnings and taxes withheld. If the client utilizes a centralized computer, many of these functions may be delegated to data processing.

In a computerized system, the payroll is calculated by the computer, using the work hours reported by the timekeeping department and the authorized pay rates and payroll deductions reported by the human resources department. In addition to preparing the payroll journal, the payroll department prepares the payroll checks or the pay envelopes, if wages are paid in cash. Checks are then forwarded to the treasurer for signature.

Regardless of the system used, the auditors should expect the client's system to include such basic records as time cards, payroll journals, labor distributions, and employee earnings records. In a computerized system, some or all of these documents may exist only in computer-readable form.

#### *Distributing Pay: Direct Deposit, Paychecks, or Cash*

The distribution of pay through direct deposit, paychecks, or pay envelopes (with cash enclosed) should be performed by an individual who performs no other payroll activity. If pay is deposited directly into employee bank accounts, controls over that process are necessary, such as authorization of deposits by personnel in the treasurer's department. If pay is distributed as paychecks or pay envelopes, the task should be that of the paymaster.

Most companies that pay employees by check or direct deposit use a special payroll bank account. A voucher for the entire amount of the weekly payroll may be prepared in the general accounting department based on the payroll summary prepared in the payroll department. This voucher is sent to the treasurer, who issues a check on the general bank account for the amount of the payroll. The check is deposited in the special payroll bank account and checks or direct deposits to individual employees are drawn on the account. It also is the practice of some companies to require dual signatures on large checks and to have printed on the check a statement that this type of check is not valid if issued for an amount in excess of a specified dollar amount.

If employees are paid in cash, the paymaster will use a copy of the payroll journal and the information on the payroll envelopes (both prepared by the payroll department) to fill the payroll envelopes with cash. The paymaster will require proof of identity when distributing checks or cash to employees and require them to sign a receipt for any cash

received. All checks or pay envelopes for an absent employee should be retained and neither returned to the payroll department nor turned over to another employee for delivery.

When wages are paid in cash, any unclaimed wages should be deposited in the bank and credited to a special liability account. Subsequent disbursement of these funds to employees then will be controlled by the necessity of drawing a check and preparing supporting documents. The dangers inherent in permitting unclaimed pay envelopes to be retained by the paymaster, returned to the payroll clerk, or intermingled with petty cash are apparent.

### Documentation of Internal Control for Payroll

Typical of the questions to be posed by the auditors prior to the completion of an internal control questionnaire, a systems flowchart, or other record of payroll controls are the following: Are employees paid by check or direct deposit? Is a payroll bank account maintained on an imprest basis? Are the activities of timekeeping, payroll compilation, payroll check signing, and paycheck distribution performed by separate departments or employees? Are all operations involved in the preparation of payrolls subjected to independent verification before the paychecks are distributed? Are employee time reports approved by supervisors? Is the payroll bank account reconciled monthly by an employee having no other payroll duties?

### Audit Plan for Payroll

#### LO 16-5

Complete an audit plan for payroll.

After obtaining an understanding of the client and its environment, including internal control, the auditors will assess the risks of material misstatement and design further audit procedures, including:

1. Perform tests of controls over payroll transactions for selected pay periods, including the following specific procedures:
  - a. Compare names and wage or salary rates to records maintained by the human resources department.
  - b. Compare time shown on payroll to time cards and time reports approved by supervisors.
  - c. If payroll is based on piecework rates rather than hourly rates, reconcile earnings with production records.
  - d. Determine basis of deductions from payroll and compare with records of deductions authorized by employees.
  - e. Test extensions and footings of payroll.
  - f. Compare total of payroll with total of payroll checks issued.
  - g. Compare total of payroll with total of labor cost summary prepared by cost accounting department.
  - h. If wages are paid in cash, compare receipts obtained from employees with payroll records.
  - i. If wages are paid by check, compare paid checks with payroll and compare endorsements to signatures on withholding tax exemption certificates.
  - j. If wages are paid by direct deposit, compare listing of employee payments with payroll and direct deposit authorizations.
  - k. Observe the use of time clocks by employees reporting for work and investigate time cards not used.
2. Perform analytical procedures to test the reasonableness of payroll expense; for example, develop an expectation about the amount of payroll expense by multiplying the amount of one pay period by the number of pay periods in the year.
3. Investigate any extraordinary fluctuations in salaries, wages, and commissions.
4. Obtain or prepare a summary of compensation of officers for the year and compare to contracts, minutes of directors' meetings, or other authorization.
5. Test the period end accrual of payroll expense.
6. Test computations of compensation earned under profit-sharing or bonus plans.

**FIGURE 16.3**  
Objectives of Major  
Substantive Procedures  
for Payroll

Substantive Procedures	Primary Audit Objectives
Perform analytical procedures. Investigate fluctuations in salaries, wages, and commissions. Obtain a summary of amounts of officers' compensation and trace to authorization.	<i>Existence and occurrence</i> <i>Completeness</i> <i>Accuracy</i>
Test the period end accrual of payroll expenses.	<i>Existence and occurrence</i> <i>Completeness</i> <i>Accuracy</i> <i>Cutoff</i>
Test computations of compensation under profit-sharing or bonus plans. Test commission earnings. Test pension obligations.	<i>Accuracy</i>

7. Test commission earnings by examination of contracts and detailed supporting records.
8. Test pension obligations by reference to authorized pension plans and supporting records.

Figure 16.3 relates these procedures to their primary audit objectives.

In addition to the preceding procedures, the auditors may plan a surprise observation of a regular distribution of paychecks to employees. The auditors' objective in observing the distribution of checks or cash to employees on a regular payday is to determine that every name on the company payroll is that of a bona fide employee presently on the job. This audit procedure is especially desirable if the various phases of payroll work are not sufficiently segregated by departments to afford good internal control. The history of payroll frauds shows that permitting one person to have custody of employment records, time cards, paychecks, and employees' earnings records has often led to the entering of fictitious names on the payroll and to other forms of fraud, such as use of excessive pay rates and continuance of pay after the termination of an employee. When performing this procedure, the auditors first will determine that they have possession of all the checks or envelopes comprising the payroll. They will then accompany representatives of the client around the plant as all the checks or envelopes are distributed to employees. It is essential that the auditors establish the identity of each employee receiving payment.

## Audit of the Statement of Cash Flows

The statement of cash flows is prepared from other financial statements and from analyses of increases and decreases in selected account balances. The amounts included in the statement of cash flows are audited in conjunction with the audit of balance sheet and income statement accounts. Thus, limited substantive procedures are necessary. The auditors merely compare the amounts included in the statement of cash flows to other financial statement balances and amounts included in audit working papers.

Since receipts and payments must be classified in the statement of cash flows as to whether they are from operating, investing, or financing activities, the presentation and disclosure audit objective is especially important. The auditors should determine that the concept of cash or cash and cash equivalents analyzed in the statement agrees with an amount shown on the balance sheet. Finally, the auditors should ascertain that a statement of cash flows is presented for each year for which an income statement is presented.

## Completing the Audit

### LO 16-6

Explain the types of procedures that are necessary to complete the audit.

The auditors' report should not be dated prior to the date they have gathered sufficient, appropriate evidence. This date is often the last day of fieldwork but it may be a later date. Therefore, the auditors' opinion on the financial statements is based on all evidence gathered by the auditors up to the date of the audit report and any other information that

comes to their attention between that date and the issuance of the financial statements. To be effective, certain audit procedures described in previous chapters cannot be completed before the end of the audit. Among those procedures are the following:

1. Search for unrecorded liabilities.
2. Review the minutes of meetings.
3. Perform final analytical procedures.
4. Perform procedures to identify loss contingencies.
5. Perform the review for subsequent events.
6. Obtain the representation letter.

---

### Search for Unrecorded Liabilities

As discussed in Chapter 14, auditors should be alert for unrecorded payables. The search for unrecorded liabilities includes procedures performed near the date of the auditors' report, such as examining subsequent cash disbursements. These procedures are designed to detect liabilities that existed at year-end but were omitted from the liabilities recorded in the client's financial statements.

---

### Review the Minutes of Meetings

The auditors should review the **minutes** of meetings of stockholders and directors, including important subcommittees of directors such as the audit committee and the investment committee. This review includes meetings held through the date of the audit report. In completing the audit, the auditors should determine that they have considered all minutes, including those for meetings subsequent to year-end. They will also obtain written representation from management that all minutes have been made available.

---

### Perform Final Analytical Procedures

The discussion of **analytical procedures** in Chapter 5 pointed out that they should be performed as a part of the auditors' risk assessment as well as near the end of the audit. Those performed near the end of the audit assist the auditors in assessing the validity of the conclusions reached, including the opinion to be issued. This final review may identify areas that need to be examined further as well as provide a consideration of the adequacy of data gathered in response to unusual or unexpected relationships identified during the audit. AICPA AU-C 240 (PCAOB 316) specifically requires auditors to evaluate whether analytical procedures performed as substantive procedures or in the overall review stage indicate a previously unrecognized risk of material misstatement due to fraud.

---

### Perform Procedures to Identify Loss Contingencies

A **loss contingency** may be defined as a *possible* loss, stemming from past events that will be resolved as to existence and amount by some future event. Central to the concept of a contingent loss is the idea of uncertainty—uncertainty as to both the amount of loss and whether, in fact, any loss has been incurred. This uncertainty is resolved when some future event occurs or fails to occur.

Most loss contingencies may also appropriately be called **contingent liabilities**. Loss contingencies, however, is a broader term, encompassing the possible impairment of assets as well as the possible existence of liabilities. The audit problems with respect to loss contingencies are twofold. First, the auditors should determine the existence of the loss contingencies. Because of the uncertainty factor, most loss contingencies do not appear in the accounting records, and a systematic search is required if the auditors are to have reasonable assurance that no important loss contingencies have been overlooked. Second, the auditors should appraise the probability that a loss has been incurred and its amount. This is made difficult both by the uncertainty factor and also by the tendency of the client management to maintain at least an outward appearance of optimism.

In *FASB ASC 450-20*, "Loss Contingencies," the Financial Accounting Standards Board set forth the criteria for accounting for loss contingencies. Such losses should be reflected

in the accounting records when both of the following conditions are met: (1) Information available prior to the issuance of the financial statements indicates that it is *probable* that a loss has been sustained before the balance sheet date, and (2) the amount of the loss can be *reasonably estimated*. Recognition of the loss may involve either recognition of a liability or reduction of an asset. When a loss contingency has been accrued in the accounts, it is usually desirable to explain the nature of the contingency in a note to the financial statements and to disclose any exposure to loss in excess of the amount accrued.

Loss contingencies that do not meet both of the above criteria should still be disclosed in a note to the financial statements when there is at least a *reasonable possibility* that a loss has been incurred. This disclosure should describe the nature of the contingency and, if possible, provide an estimate of the possible loss. If the amount of possible loss cannot be reasonably estimated, the disclosure should include either a range of loss or a statement that an estimate cannot be made.

Certain contingent liabilities traditionally have been disclosed in financial statement notes even though the possibility that a loss has occurred is remote. Such items include notes receivable discounted and guarantee endorsements. With the exception of those items for which disclosure is traditional, disclosure need not be made of loss contingencies when the possibility of loss is remote.

The procedures undertaken by auditors to identify the existence of loss contingencies and to assess the probability of loss vary with the nature of the contingent item. Regardless of the procedures performed, it is important that they be extended to near the date of the auditors' report, so that the auditors have the latest available information to evaluate the financial statement presentation and disclosure of loss contingencies. To illustrate these types of procedures, we will discuss several of the more frequent types of contingencies warranting financial statement disclosure.

### *Litigation*

Perhaps the most common loss contingency appearing in the financial statements is that stemming from actual or potential litigation. AICPA AU-C 501 (PCAOB 337) provides guidance in this area and requires that auditors design and perform audit procedures to identify litigation, claims, and assessments that may give rise to a risk of material misstatement, including:

- Inquiring about these matters with management and others in the organization, including in-house legal counsel.
- Obtaining from management a description and evaluation of litigation, claims, and assessments, including identification of those matters referred to legal counsel.
- Reviewing (1) minutes of meetings of those charged with governance, (2) documents in management's possession regarding litigation, claims, and assessments, and (3) correspondence with legal counsel.
- Reviewing legal expense accounts and invoices from legal counsel.

When actual or potential litigation is identified, the auditors obtain evidence relevant to identifying the cause, degree of probability of an unfavorable outcome, and the amount of potential loss.

Unless the above audit procedures indicate no actual or potential litigation, claims, or assessments, the auditors should directly communicate with the client's external legal counsel through a **letter of inquiry** prepared by management and sent by the auditors. The letter should ask legal counsel to reply as of a date approximating the estimated date of the audit report to allow the auditors to receive the most current information possible.

The letter of inquiry asks legal counsel to corroborate the information provided by management and to comment on those areas where their views differ from those of management. Legal counsel is also requested to identify any pending claims, litigation, or assessments that have been omitted from management's list. If in-house legal counsel has primary responsibility for any particular litigation, claim, or assessment, similar information should be requested of them, although this is not a substitute for seeking the information from external counsel.

The letter of inquiry should also include a list of certain **unasserted claims** on which individuals or organizations have not yet taken legal action against the company. An unasserted claim should be on the list if the legal counsel has devoted substantive attention to it and if it is (1) *probable* that a claim will be asserted and (2) *reasonably possible* that a loss will result. The letter of inquiry should request that the legal counsel comment on those matters on which its views concerning the description or evaluation of the matter differ from those stated by management. However, if management fails to list an unasserted claim, legal counsel is *not* required to describe the claim in the reply to the auditors; the lawyer is, however, generally required to inform the client of the omission and to consider resignation if the client fails to inform the auditors about the claim. For this reason, auditors should always consider carefully the reasons for any legal counsel's resignation.

What should the auditors do if the client's legal counsel refuses to respond appropriately to the letter of inquiry or management refuses to provide the auditors with permission to communicate with legal counsel? In these situations, the auditors should attempt to obtain evidence by performing alternative procedures. If the auditors are unable to obtain sufficient appropriate audit evidence by performing alternative audit procedures, they should modify their opinion due to the lack of sufficient appropriate audit evidence, as discussed in Chapter 17.

#### *Illustration of Disclosure*

The following note to the financial statements of an aircraft manufacturer illustrates the disclosure of the contingent liability associated with pending litigation.

A number of suits are pending against the Company as the result of accidents in prior years involving airplanes manufactured by the Company. It is believed that insurance carried by the Company is sufficient to protect it against loss by reason of suits involving the lives of passengers and damage to aircraft. Other litigation pending against the Company involves no substantial amount or is covered by insurance.

The note of another large corporation contained the following note concerning contingent liabilities:

The Company is a party to a number of lawsuits and claims (some of which are for substantial amounts) arising out of the conduct of its business, including those relating to commercial transactions, product liability, and environmental, safety, and health matters. While the ultimate results of lawsuits or other proceedings against the Company cannot be predicted with certainty, management does not expect that these matters will have a material adverse effect on the consolidated financial position or results of operations of the Company.

#### *Income Tax Disputes*

The necessity of estimating the income tax liability applicable to the year under audit was discussed in Chapter 14. In addition to the taxes relating to the current year's income, uncertainty often exists concerning the amount ultimately payable for prior years. A lag of two or three years often exists between the filing of income tax returns and the final settlement after review by the Internal Revenue Service (IRS). Disputes between the taxpayer and the IRS may create contingent liabilities not settled for several more years. The auditors should determine whether internal revenue agents have examined any returns of the client since the preceding audit and, if so, whether any additional taxes have been assessed. In addition, the auditors should review any correspondence with the IRS and any other regulatory agencies.

#### *Accommodation Endorsements and Other Guarantees of Indebtedness*

The endorsement of notes of other concerns or individuals is very seldom recorded in the accounts, but may be reflected in the minutes of directors' meetings. The practice is more common among small concerns—particularly when one person has a proprietary interest in several companies. Officers, partners, and sole proprietors of small organizations should be questioned as to the existence of any contingent liability from this source. Inquiry should

also be made as to whether any collateral has been received to protect the company. The auditors may also decide to confirm written or oral guarantees or other contingent liabilities with appropriate financial institutions, using a specially designed confirmation letter.

#### *Accounts Receivable Sold or Assigned with Recourse*

When accounts receivable are sold or assigned *with recourse*, a guarantee of collectibility is given. Authorization of such a transaction should be revealed during the auditors' reading of the minutes, and evidence of such agreements also may be found during the examination of transactions and correspondence with financial institutions. Confirmation by direct communication with the purchaser or assignee is necessary for any receivables sold or assigned.

#### *Environmental Issues*

Environmental remediation liability laws, written at all levels of government, are increasingly leading to both contingent and accrued liabilities. The Resource, Conservation, and Recovery Act, Superfund, and various clean air and water acts create potential liability for companies, as illustrated in the following example focusing on the electronics industry.

#### **Focus on the Electronics Industry**

The electronics industry and other high-technology enterprises may find themselves liable for remediation of environmental contamination. As described in an AICPA industry *Audit Risk Alert*, Superfund legally empowers the United States Environmental Protection Agency to seek recovery from both current and previous owners or operators of a contaminated site, or anyone who generated or transported hazardous substances to or from such a site. The use of toxic or hazardous materials in the electronics industry or the manufacturing of by-products that adversely affect the environment may create environmental cleanup issues. Various professional pronouncements released interpret *FASB No. 5* for environmental matters to help companies determine when it is appropriate to disclose or possibly accrue liabilities for such matters.

#### *Commitments*

Closely related to contingent liabilities are obligations termed **commitments**. The auditors may discover during their audit any of the following commitments: inventory purchase commitments, commitments to sell merchandise at specified prices, contracts for the construction of plant and equipment, pension or profit-sharing plans, long-term operating leases of plant and equipment, employee stock option plans, and employment contracts with key officers. A common characteristic of these commitments is the contractual obligation to enter into transactions *in the future*.

To illustrate the relationship of a commitment to a loss contingency, assume that a manufacturer commits to sell a substantial part of its output at a fixed price over the next three years. At the time of forming the agreement, the manufacturer, of course, believes the arrangement to be advantageous. However, it is possible that rising price levels may transform the fixed price sales agreement into an unprofitable one, requiring sales to be made at prices below manufacturing cost. Such circumstances may warrant recognition of a loss in the financial statements.

All classes of material commitments may be described in a single note to financial statements, or they may be included in a "Contingencies and Commitments" note.

#### *General Risk Contingencies*

In addition to loss contingencies and commitments, all businesses face the risk of loss from numerous factors called **general risk contingencies**. A general risk contingency represents a loss that *might occur in the future*, as opposed to a loss contingency that *might have occurred in the past*. Examples of general risk contingencies are threat of a strike or consumer boycott, risk of price increases in essential raw materials, and risk of a natural catastrophe.

Since the events that might produce a loss actually have not occurred and they are part of the general business environment, general risk contingencies ordinarily *need not be disclosed* in financial statements. The lack of insurance coverage is a general risk

contingency. Neither the adequacy nor the lack of insurance coverage is required to be presented in financial statements.

### *The Auditors' Procedures for Loss Contingencies*

An overview of the auditors' procedures to detect and evaluate loss contingencies is described below.

1. Review the minutes of directors' meetings to the date of completion of fieldwork. Important contracts, lawsuits, and dealings with subsidiaries are typical of matters discussed in board meetings that may involve loss contingencies.
2. Send a letter of inquiry to the client's lawyer requesting:
  - a. A description (or evaluation of management's description) of the nature of pending and threatened litigation and tax disputes.
  - b. An evaluation of the likelihood of an unfavorable outcome in the matters described.
  - c. An estimate of the probable loss or range of loss, or a statement that an estimate cannot be made.
  - d. An evaluation of management's description of any unasserted claims that, if asserted, have a reasonable possibility of an adverse outcome.
  - e. A statement of the amount of any unbilled legal fees.
3. Send confirmation letters to financial institutions to request information on contingent liabilities of the company.
4. Review correspondence with financial institutions for evidence of accommodation endorsements, guarantees of indebtedness, or sales or assignments of accounts receivable.
5. Review reports and correspondence from regulatory agencies to identify potential assessments or fines.
6. Obtain a representation letter from the client indicating that all liabilities known to officers are recorded or disclosed.

## Perform the Review for Subsequent Events

### LO 16-7

Describe the auditors' responsibilities for the detection and evaluation of various types of subsequent events.

Evidence not available at the close of the period under audit often becomes available before the auditors finish their fieldwork and issue their audit report. The CPA's opinion on the fairness of the financial statements may be changed considerably by these subsequent events. The term **subsequent event** refers to an event occurring after the date of the balance sheet but prior to the date of the auditors' report (the date on which the auditors have obtained sufficient appropriate audit evidence to support their opinion). *FASB ASC 855* divides subsequent events into two broad categories: (1) those providing additional evidence about facts existing on or before the balance sheet date ("recognized subsequent events"), and (2) those involving facts coming into existence subsequent to the balance sheet date ("nonrecognized subsequent events").

### *Type 1 Subsequent Events*

The first type of subsequent event provides additional evidence as to *conditions that existed at the date of the financial statements*. This type of subsequent event requires that the financial statement amounts be adjusted to reflect the changes in estimates resulting from the additional evidence.

As an example, let us assume that a client's accounts receivable at December 31 included one large account and numerous small ones. While management regarded the large account's balance as fully collectible at year-end, during the course of the audit the customer entered bankruptcy. The auditors' procedures revealed that, although the bankruptcy occurred early in January, the financial strength of the customer had deteriorated before December 31, and the client was simply in error in believing the receivable to be fully collectible at that date. Accordingly, the auditors recommended an increase in the December 31 allowance for uncollectible accounts. Evidence becoming available after the balance sheet date through the date of issuance of the auditors' report should be used in making judgments about the valuation of receivables.

Other examples of this first type of subsequent event include the following:

1. Customers' checks included in the cash receipts of the last day of the year prove to be uncollectible and are charged back to the client's account by the bank. If the checks were material in amount, an adjustment of the December 31 cash balance may be necessary to exclude the checks now known to be uncollectible.
2. A new three-year union contract signed two weeks after the balance sheet date provides evidence that the client has materially underestimated the total cost to complete a long-term construction project on which revenue is recognized by the percentage-of-completion method. The amount of income (or loss) to be recognized on the project in the current year should be recomputed using revised cost estimates.
3. Litigation pending against the client is settled shortly after the balance sheet date, and the amount owed by the client is material. This litigation was to be disclosed in notes to the financial statements, but no liability had been accrued because at year-end no reasonable estimate could be made as to the amount of the client's loss. Now that appropriate evidence exists as to the dollar amount of the loss, this loss contingency meets the criteria for accrual in the financial statements, rather than mere note disclosure.

#### *Type 2 Subsequent Events*

The second type of subsequent event involves conditions *that arose after the date of the financial statements*. These events do not require adjustment to the dollar amounts shown in the financial statements, *but they should be disclosed in the financial statement notes if the statements otherwise would be misleading*. To illustrate, assume that shortly after the balance sheet date a client sustains an uninsured fire loss destroying most of its plant assets. The carrying value of plant assets should not be reduced in the balance sheet because these assets were intact at year-end. However, people analyzing the financial statements would be misled if they were not advised that most of the plant assets are no longer in a usable condition.

Other examples of nonrecognized subsequent events occurring after the balance sheet date but before the release of the financial statements include:

- Sale of a bond or capital stock.
- A business combination with another company.
- Settlement of litigation when the event giving rise to the claim took place after the balance sheet date.
- Loss of plant or inventories due to a fire
- Losses on receivables resulting from conditions (e.g., a customer's major casualty) arising after the balance sheet date.
- Changes in the fair value of assets or liabilities or foreign exchange rate.

If the financial statements would be misleading without such disclosure, any such subsequent event should be reported in the financial statement notes with an estimate of the financial effect, or a statement that such an estimate cannot be made. Other subsequent events that relate less directly to accounting matters are less likely to be disclosed in the financial statements (e.g., an employee strike, introduction of a new line of products, or death of an executive).

#### *Pro Forma Statements as a Means of Disclosure*

Occasionally subsequent events may be so material that supplementary *pro forma financial statements* should be prepared giving effect to the events as if they had occurred as of the balance sheet date. The pro forma statements (usually a balance sheet only) may be presented in columnar form next to the audited financial statements. This form of disclosure is used only when the subsequent event has a significant effect upon the asset structure or capital structure of the business. An example would be a business combination.

### *Distinguishing between the Two Types of Subsequent Events*

In deciding whether a particular subsequent event should result in an adjustment to the financial statements or a note disclosure, the auditor should carefully consider *when the underlying conditions came into existence*. For example, assume that shortly after the balance sheet date, a major customer of the audit client declares bankruptcy, with the result that a large receivable previously considered fully collectible now appears to be uncollectible. If the customer's bankruptcy resulted from a steady deterioration in financial position, the subsequent event provides evidence that the receivable actually was uncollectible at year-end, and the allowance for doubtful accounts should be increased. On the other hand, if the customer's bankruptcy stemmed from a casualty (such as a fire) occurring after year-end, the conditions making the receivable uncollectible came into existence after the balance sheet date. In this case, the subsequent event should be disclosed in a note to the financial statements.

### *Audit Procedures Relating to Subsequent Events*

For the period after year-end through the date of the auditors' report, the auditors should perform audit procedures to obtain sufficient appropriate audit evidence that all subsequent events that require adjustment or disclosures in the financial statements have been identified. During this period, the auditors should determine that proper cutoffs of cash receipts and disbursements and sales and purchases have been made, and they should examine data to aid in the evaluation of assets and liabilities as of the balance sheet date. In addition, the auditors should:

1. Obtain an understanding of management's procedures to ensure that subsequent events are identified.
2. Inquire of management (and those charged with governance) about whether subsequent events have occurred.
3. Read available minutes of directors, stockholders, and appropriate committee meetings that have been held after the date of the financial statements and inquire about matters discussed at any such meeting for which minutes are not yet available.
4. Read the company's latest subsequent interim financial statements, if any.

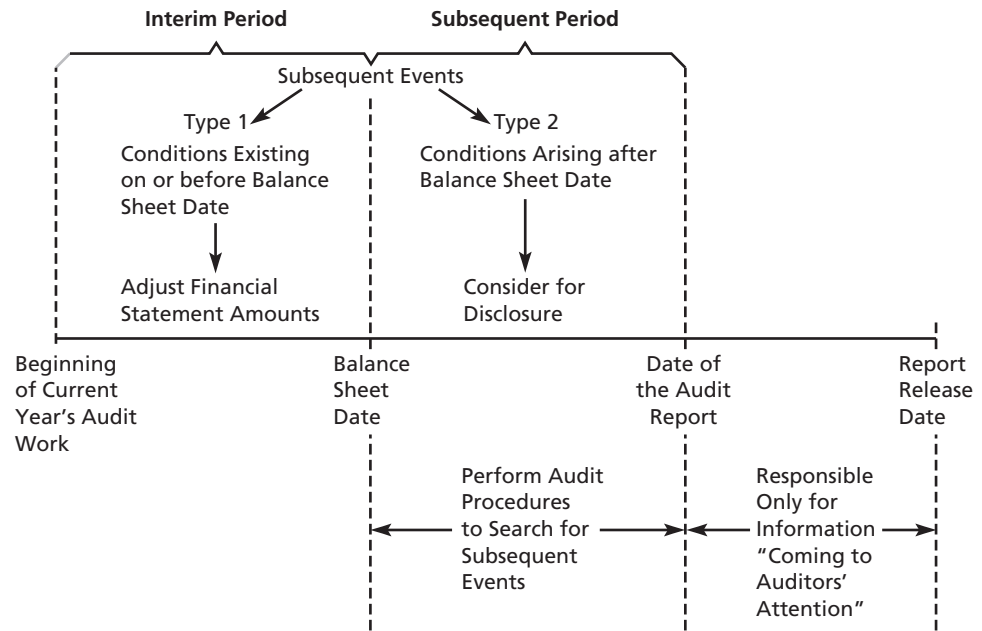

Generally, the auditors' responsibility for performing procedures to gather evidence as to subsequent events extends only through the date of the audit report. However, even after completing normal audit procedures, the auditors are responsible for evaluating subsequent events that come to their attention prior to the report release date. Suppose, for example, that the auditors completed their work for a December 31 audit on February 3 and thereafter began drafting their report. On February 11, before issuing their report, the client informed the auditors that the client had settled a lawsuit on that day by a substantial payment. In such a circumstance, generally accepted accounting principles require that the liability be established in the December 31 balance sheet. If the adjustment does not also require a note disclosure, the audit report ordinarily continues to be dated as of the date the auditor had sufficient audit evidence, February 3. If a related note disclosure is necessary, auditors have two methods available for dating the audit report. They may *dual-date* their report "February 3, except for Note X, as to which the date is February 11." Alternatively, they might decide to return to the client's facilities for further review of subsequent events through the date of the subsequent event, February 11; in this case, the audit report would bear that date only.

Dual-dating extends the auditors' responsibility for disclosure through the later date *only with respect to the specified item*. Using the later date for the date of the report extends the auditors' responsibility with respect to all areas of the financial statements. Finally, in the unusual circumstance in which the client does not agree to properly reflect the event, the departure from generally accepted accounting principles may result in either a qualified or adverse opinion.

Figure 16.4 summarizes the auditors' responsibilities for subsequent events with respect to the balance sheet date, the date of the audit report, and date the auditors grant the client permission to use the audit report—the **report release date**.

**FIGURE 16.4**  
Subsequent Events

#### *The Auditors' S-1 Review in an SEC Registration*

The Securities Act of 1933 (Section 11 [a]) extends the auditors' liability in connection with the registration of new securities with the Securities and Exchange Commission (SEC) to the *effective date* of the registration statement—the date on which the securities may be sold to the public. In many cases, the effective date of the registration statement may be several weeks or even months later than the date the auditors completed their fieldwork. Accordingly, on or as close as practicable to the effective date, the auditors return to the client's facilities to conduct an **S-1 review**, so-called because of the "Form S-1" title of the traditional SEC registration statement for new securities issues. In addition to completing the subsequent events review described in the preceding section, the auditors should read the entire prospectus and other pertinent portions of the registration statement. They should also inquire of officers and other key executives of the client whether any events not reported in the registration statement have occurred that require amendment of the registration statement to prevent the audited financial statements therein from being misleading.

### Obtain Representation Letter

Chapter 5 included a general description of the **representation letter** that the auditors should obtain from management. The primary purpose of the representation letter is to have the client's principal officers acknowledge that they are primarily responsible for the fairness of the financial statements. Since the financial statements must reflect all material subsequent events, the representation letter should be dated as of the date of the audit report. As indicated in Chapter 5, while representation letters are part of the audit evidence the auditors obtain, they are not a substitute for the application of other necessary audit procedures. Thus, for example, obtaining a management representation as to the reasonableness of the estimated allowance for doubtful accounts should not result in fewer other audit procedures relating to that account.

### Communicate Misstatements to Management

Throughout the course of the audit, the auditors accumulate and communicate to management all misstatements identified, other than those the auditors believe to be trivial. Because the financial statements are the representations of management, management makes the final decision as to whether to approve and record any adjustments and disclosures. In some circumstances, management may propose alternative amounts for the adjustments and disclosures. Since the auditors' responsibility is to express an opinion on the financial statements, unresolved differences between the auditors and management with respect to such

adjustments may result in modification of the auditors' report. Also, if any adjusting entries are not recorded, management must represent to the auditors (in the representation letter) that management believes the adjustments to be immaterial. Of course the auditors should make their own conclusions about whether the amounts involved are material or immaterial.

Misstatements identified by the auditors may include amounts that are known to be misstated, likely to be misstated, or both. **Known misstatements** are specific misstatements identified during the course of the audit (e.g., the amount of misstatement in a particular account receivable that was confirmed). **Likely misstatements** may be due to either extrapolation from audit evidence or differences in accounting estimates:

- *Extrapolation differences* are generally projected misstatements determined through the use of sampling. As an example, if the book value of accounts receivable is \$6,250,000 and the auditors, using audit sampling, estimate the audited value to be \$6,100,000, the projected misstatement is \$150,000 (\$6,250,000 – \$6,100,000). However, this amount should be decreased by the amount of the known misstatement (the actual misstatements identified in the sample).
- *Accounting estimate differences* are differences between management's and the auditors' judgment concerning the appropriate amounts of accounting estimates. For these items, the estimated (likely) misstatement is the difference between management's estimate and the closest amount that the auditors consider reasonable. An example would be a situation in which management estimates the company's warranty liability to be \$90,000 and the auditors develop an estimate of between \$120,000 and \$140,000 for the liability. The likely misstatement is \$30,000 (\$120,000 – \$90,000).

The auditors should request that management record the adjustment needed to correct all known misstatements other than those considered trivial.<sup>2</sup> When the auditors identify a likely misstatement due to an extrapolation difference, they should request that management examine the accounts involved in order to identify and correct other misstatements. When accounting estimates include what the auditors believe to be likely misstatements, the auditors should request that management review the assumptions and methods used in developing their estimate (e.g., the allowance for doubtful accounts).

## Evaluate Audit Findings

### LO 16-8

Explain the steps involved in evaluating audit findings.

As indicated, the auditors will request that management record any adjustments required to correct misstatements. When management refuses to correct these misstatements, the auditors should evaluate their importance. Any known *material* misstatements must be corrected, or the auditors cannot issue an unqualified opinion on the financial statements. In evaluating whether an individual misstatement is material, the auditors consider both quantitative and qualitative factors. For example, a \$10,000 related party transaction might be considered material for a particular audit, whereas a misstatement of trade accounts receivable of the same amount might not be considered material. Immaterial misstatements that are discovered by the auditors and not corrected by the client are accumulated in a working paper that is given a title such as "Adjusting Entries Passed."

### *Evaluation Materiality—Considering Quantitative Factors*

To issue an unqualified opinion, the auditors must conclude that there is a low level of risk of material misstatement of the financial statements. Prior to evaluating the effect of uncorrected misstatements, the auditors should reassess materiality to confirm whether it remains appropriate in the context of the client's actual financial results. They will consider the quantitative and qualitative effects of uncorrected misstatements on relevant classes of transactions, accounts, and disclosures.

If the auditors estimate that the total of known and likely misstatements is material to the financial statements, they will conclude that the risk of material misstatement is too high to issue an unqualified opinion on the financial statements. As this total approaches the

<sup>2</sup> CPA firms often consider amounts of less than 3% or 5% of planning materiality as being trivial.

materiality level, the auditors should consider whether there is a greater than acceptably low level of risk that undetected misstatements could cause the total to exceed the materiality level. If so, the auditors should reconsider the nature and extent of further audit procedures.

The auditors will conclude that the risk of material misstatement is sufficiently low to issue an unqualified opinion only when the *aggregated misstatements (known and likely) are significantly less than a material amount*. The relationship between the aggregated misstatements and materiality is often documented in a working paper similar to that shown in Figure 16.5. As illustrated, the auditors should consider the effects of the aggregated misstatements on the various components of the financial statements, such as current assets and net income. As we have emphasized, whether a misstatement is material depends on its specific effect on the financial statements.

Notice that the misstatements in Figure 16.5 are adjusted for the effects of income taxes. To illustrate, consider the first misstatement, which represents an overstatement of prepaid expenses of \$6,500. If that adjustment is not made, net income before taxes will be overstated by that amount. However, since taxable income is also overstated by \$6,500, the company's income tax expense is overstated, in this case by \$2,600 (40 percent of \$6,500). Note that the 40 percent rate is used because it represents the company's marginal tax rate.

#### *Evaluation Materiality—Considering Qualitative Factors*

While a schedule such as that presented in Figure 16.5 is helpful for assessing the quantitative effects of misstatement, auditors should also consider qualitative factors when evaluating the materiality of such misstatements. Both AICPA AU-C 320 (PCAOB 312) and SEC *Staff Accounting Bulletin No. 99*, "Materiality," provide examples of such qualitative factors. One or more misstatements are likely to be material from a qualitative perspective when they:

- Arise from an item capable of precise measurement (e.g., the amount of a sale) rather than from an estimate (e.g., the amount in the allowance for doubtful accounts).
- Mask a change in earnings or other trends.
- Hide a failure to meet analysts' consensus expectations for the company.
- Change a loss into income, or vice versa.
- Concern a particularly important segment or other portion of the registrant's business.
- Affect compliance with regulatory requirements, loan covenants, or other contractual requirements.
- Increase management's compensation.
- Involve concealment of an unlawful transaction.
- Are of an amount that management or the auditors believe would affect the stock's price.

In addition, the SEC requires that management and auditors apply a *reasonableness* standard when considering fairness of financial presentation. This somewhat ill-defined standard suggests that the need for proper presentation is not entirely a function of the above types of qualitative considerations. For example, the intentional misrecording of certain immaterial transactions might be considered unreasonable. Indeed, intentional misstatements may in some circumstances be unlawful; as such, they may require auditor consideration, as discussed in Chapter 2. Note that the situation being considered by the SEC in this case is one in which a client intentionally misrecords items to manage earnings (e.g., reporting sales in the wrong year), as opposed to a situation in which an accounting expediency is being applied to an immaterial area (e.g., the expensing of immaterial office supplies rather than listing them as an asset).

#### *Evaluation Materiality—Considering the Effects of Prior Year Uncorrected Misstatements*

When uncorrected misstatements exist from prior years, should those misstatements be included in this year's materiality calculations? For example, assume that a client's previous year financial statements understated the estimated warranty payable by \$60,000,

**FIGURE 16.5** Aggregated Misstatements

SOUTHMADE PRODUCTS, INC. Aggregated Misstatements December 31, 20X4 Overstatement (Understatement)								S-8
W/P ref.		Current Assets	Noncurrent Assets	Current Liabilities	Noncurrent Liabilities	Owners' Equity	Income before Taxes	Tax Expense
	<u>Uncorrected Known Misstatements</u>							
D8	Overstatement of prepaid expenses	\$ 6,500		\$ 2,600		\$ 6,500 (2,600)	\$ 6,500	\$ 2,600
F-6	Overstatement of prior year's depreciation		(\$10,000)	(4,000)		(10,000) 4,000		
M-4	Unrecorded liabilities			(11,215) 4,486		11,215 (4,486)	11,215	4,486
	<u>Projected Misstatements</u>							
C-5	Overstatement of accounts receivable (confirmation results)	30,000		12,000		30,000 (12,000)	30,000	12,000
	<u>Other Estimated Misstatements</u>							
C-10	Understatement of allowance for uncollectible accounts	5,000		2,000		5,000 (2,000)	5,000	2,000
	<u>Total Likely Misstatements</u>	\$ 41,500	(\$10,000)	\$ 5,871	-	\$ 25,629	\$ 52,715	\$21,086
	Amount considered material	\$100,000	\$125,000	\$100,000	\$125,000	\$200,000	\$150,000	
<i>Conclusion: Total likely misstatements are small enough in amount to result in a sufficiently low level of audit risk to justify our opinion.</i>								<i>2/17/25 JWW</i>

an immaterial amount. Furthermore, the auditors estimate that this year's accrual is understated by an additional \$70,000. In making materiality judgments, should the auditors consider only this year's \$70,000? Or should they consider the total of \$130,000 (\$70,000 + \$60,000)?

Historically, auditors have been allowed to use either of two approaches to make this decision: the **rollover approach** or the **iron curtain approach**. The *rollover approach* considers only the amount of the misstatement originating in the current year income statement—in this case, \$70,000. In contrast, the *iron curtain approach* considers the balance sheet effect of correcting the total misstatement existing at the end of the year, regardless of when the misstatement originated—in this case, \$130,000.

SEC *Staff Accounting Bulletin No. 108* decreased the auditor's flexibility in choosing between these methods by requiring that both the rollover and iron curtain approaches be considered. If either approach results in a material misstatement, an adjustment must be made. Thus, if the \$130,000 misstatement is considered material to the financial statements, the client's financial statements should be adjusted. The adjustment may be disaggregated as:

- \$70,000 current year effect.
- \$60,000 balance sheet carryover misstatement that originated in the preceding year.

The current year financial statements should be adjusted for \$70,000. If the \$60,000 misstatement relating to the prior year (or years) is material to the current year, the prior year financial statements should be adjusted, even if the amounts remain immaterial to those prior years. If the \$60,000 is immaterial to this year's financial statements, it may be included as an expense on this year's income statement rather than requiring restatement of the prior year's financial statements.

#### *Evaluating the Risks of Material Misstatement*

At or near the completion of fieldwork, the auditors should evaluate whether the accumulated results of their procedures and observations affect the assessments of the risks of material misstatement made earlier in the engagement. In addition, the partner in charge of the engagement should determine that information or conditions indicative of risks of material misstatement due to fraud have been communicated to the audit team members.

#### *Review the Financial Statement Disclosures*

Throughout the audit, the auditors must recognize the need to determine that financial statement note disclosures are adequate. These disclosure requirements arise in numerous pronouncements of the Financial Accounting Standards Board, such as *FASB ASC 450-20* on "Loss Contingencies" and *FASB ASC 280-50* on reporting on segment information. In addition, the auditors should be aware of the requirements of *AICPA Statement of Position 94-6*, "Disclosure of Certain Significant Risks and Uncertainties." That statement establishes disclosure requirements concerning (1) the nature of company operations, (2) the use of estimates in the preparation of financial statements, (3) certain significant estimates, and (4) current vulnerability due to concentrations (e.g., dependence upon a particular customer, supplier, or product).

It is not effective to rely on the auditors' memories to evaluate the adequacy of disclosures, and it is not efficient for them to research the required disclosures each time they review a set of financial statements. Thus, many CPA firms use **disclosure checklists** that list all specific disclosures required by the FASB, the GASB, the FASAC, and the SEC. The auditors complete the checklist as a part of their review of the completed financial statements.

#### *Client Approval of Adjusting Entries and Disclosures*

During the course of the audit, the auditors may suggest various adjustments and disclosures concerning the financial statements. However, because they are the representations of management, the financial statements are not modified to reflect these items until management approves them. In some circumstances, management may propose differing

adjustments and disclosures. Since the auditors' responsibility is to express an opinion on the financial statements, unresolved differences between auditor and client with respect to such differences may result in modification of the auditors' report. If any adjusting entries are not recorded, management must represent to the auditors (in the representation letter) that management believes the adjustments are not material.

---

### Review the Engagement

AICPA AU-C 300 (PCAOB 311) states that "the work performed by each assistant should be reviewed to determine whether it was adequately performed and documented and to evaluate the results, relative to the conclusions to be presented in the auditors' report." This review of the work of the audit staff is primarily accomplished through a review of the audit working papers. The seniors on audit engagements typically perform their review of the audit working papers as the papers are completed. While audit partners and managers will generally communicate with seniors and other staff members throughout the audit, their review of the working papers generally is not completed until near (or after) completion of fieldwork. The audit partner and manager will devote special attention to those accounts that have a higher risk of material misstatement, such as the significant accounting estimates of inventory obsolescence and warranty obligations. Also, a final consideration will be made of whether the results of procedures performed throughout the audit, including while completing the audit, identify conditions and events that indicate there could be substantial doubt about the company's ability to continue as a going concern. Finally, if a second partner review is required by the CPA firm's quality control policies, this review is usually performed just prior to issuance of the audit report.

---

## Responsibilities for Other Information

Audited financial statements generally are included with annual reports to shareholders and in reports to the SEC. These documents may include a considerable amount of information in addition to the audited financial statements. In completing the audit engagement, the auditors must fulfill certain responsibilities regarding the additional information.

---

### Other Information in Documents Containing Audited Financial Statements

**Other information** is financial and nonfinancial information that is included in a document that contains audited financial statements, except it does not include required supplementary information (see next section). Examples of other information include a report by management discussing the year's operating results, financial summaries, employment data, planned capital expenditures, financial ratios, and names of officers and directors. AICPA AU-C 720 (PCAOB 550) requires auditors to read this information for inconsistencies, if any, with the audited financial statements. If no inconsistencies are identified, the auditors are not required to reference the other information in the auditors' report on the financial statements. However, if they so choose, they may include an **other-matter paragraph** disclaiming an opinion on the other information. Other-matter paragraphs are discussed in Chapters 17 and 19.

If inconsistencies are identified, the auditors first request the client to revise any incorrect information. If the client refuses, and the other information is incorrect, this will lead to (1) an other-matter paragraph being added to a report with an unmodified opinion, (2) withholding the auditors' report, or (3) withdrawing from the engagement. If it is the financial statements that are incorrect, it will be treated as a departure from GAAP, resulting in either a qualified or adverse opinion.

---

### Required Supplementary Information

Certain organizations are required by a designated accounting standards setter (i.e., FASB, GASB, FASAB, IASB) to present supplementary information. Such **required supplementary information**, while not considered a part of the general purpose financial statements, is required to be presented as unaudited supplementary schedules

accompanying the financial statements. AICPA AU-C 730 (PCAOB 558) requires auditors to apply the following procedures to this information:

- *Inquire* of management about methods of preparing information, including whether (1) it was prepared following prescribed guidelines, (2) methods of measurement or presentation have changed from the prior period, and (3) there were any significant assumptions or interpretations underlying the measurement or presentation of the information.
- *Compare information* for consistency with (1) management's responses to the inquiries, (2) the basic financial statements, and (3) other knowledge obtained during the audit.
- *Obtain written representations* from management (1) acknowledging its responsibility for the information, (2) about whether the information is measured within guidelines, (3) about whether the methods have changed, and (4) about any significant assumptions or interpretations.

When no significant exceptions are identified, the reporting responsibilities differ between the AICPA and PCAOB standards. The AICPA standards require inclusion of an emphasis-of-matter paragraph in the financial statement audit report indicating that the procedures were performed; the paragraph provides no assurance. Under PCAOB standards, no mention of the information is required in the auditors' report.

When the supplementary information is omitted or improperly stated, under both AICPA and PCAOB standards, the situation is described in an emphasis-of-matter paragraph. The opinion paragraph of the report is not modified since the supplementary information is not considered a part of the audited information.

### Supplementary Information in Relation to the Financial Statements as a Whole

AICPA AU-C 725 (PCAOB Auditing Standard 17) provides guidance on a non-required form of auditor association with **supplementary information** that goes beyond that described in the preceding two sections. With this service, auditors perform procedures to allow them to provide assurance on whether supplemental information is fairly stated, in all material respects, in relation to the financial statements as a whole. While the supplementary information may be presented in a document containing audited financial statements or separately from the financial statements, it must be derived from, and relate directly to, the underlying accounting and other records. Examples of information derived from the underlying accounting records include consolidating information, historical summaries of accounts, and statistical data. Examples for regulated companies (e.g., brokers and dealers) include SEC rules regarding maintenance of minimum net capital and reserve requirements. To provide this assurance, the auditors should perform the following procedures:

- Inquire of management about the purpose of the information and criteria used to prepare it.
- Determine the propriety of the form and content of the information, including whether it complies with any relevant regulatory requirements.
- Obtain an understanding of how the information was prepared.
- Compare and reconcile information to underlying accounting and other records.
- Inquire of management concerning significant assumptions.
- Evaluate the appropriateness and completeness of the information.
- Obtain written representations.

When the information is found to be fairly stated in relation to the financial statements, an other-matter paragraph is added describing the procedures followed and including an opinion that "the information is fairly stated in all material respects in relation to the financial statements as a whole." If the auditors conclude that the information is not fairly stated in all material respects, the paragraph so states. The opinion paragraph of the audit report is not modified since the supplementary information is not considered a part of the audited information.

Figure 16.6 summarizes the reporting standards for both other information and supplementary information.

**FIGURE 16.6** Summary of Other Information and Supplementary Information Reporting

Circumstance Giving Rise to Other-Matter Paragraph	Effect on Audit Report If Properly Presented	Effect on Audit Report If Improperly Presented
Other information in documents containing audited financial statements	No change required (that is, other-matter paragraph need <i>not</i> be added). However, the auditor may choose to include an other-matter paragraph disclaiming an opinion on the other information.	The other-matter paragraph indicates that information is incorrect or omitted, as appropriate. The audit opinion remains unmodified unless the audited information is misstated, in which case a qualified or adverse opinion is appropriate.
Required supplementary information	For audits performed under AICPA standards, an other-matter paragraph is added; the paragraph provides no assurance on the required supplementary information. For audits performed under PCAOB standards, no paragraph is added.	
Supplementary information in relation to the financial statements as a whole	An other-matter paragraph is added; the paragraph includes an opinion that the information is fairly stated in all material respects in relation to the financial statements as a whole.	

Note: In all circumstances, the added paragraph follows the opinion paragraph.

## Opinion Formulation and Report Issuance

After the preceding procedures have been performed, the auditors will ordinarily be in a position to issue their audit report. When the auditors have obtained reasonable assurance that the financial statements follow generally accepted accounting principles and the audit has been performed in conformity with generally accepted auditing standards, including no significant scope limitations, an unqualified opinion will ordinarily be issued. As we will discuss in Chapter 17, when various circumstances have occurred (e.g., changes in accounting principles, substantial doubt about the entity's ability to continue as a going concern, and when other auditors are involved), explanatory language may be added to the audit report.

## Additional Communications

Auditors should communicate certain matters relating to fraud, illegal acts, reportable conditions, and certain other matters to the audit committee or the equivalent group with responsibility for oversight of the financial reporting process. All the communications may be communicated either orally or in writing.

### *Fraud and Illegal Acts*

AICPA AU-C 240 (PCAOB 316) and AICPA AU-C 250 (PCAOB 317) require that the audit committee be informed about fraudulent or illegal acts that the auditors become aware of, unless those acts are clearly inconsequential. Although these disclosures are also normally made to management, when management is believed to be involved with such an act, the communications should be made directly to the audit committee.

### *Significant Deficiencies*

Recall from our discussion in Chapter 7 that AICPA AU-C 265 (PCAOB 325) requires that the auditors communicate to the audit committee any significant deficiencies in internal control (previously known as reportable conditions).

### *Other Communications*

AICPA AU-C 260 (PCAOB Standard No. 16) require an oral or written communication of certain information to those charged with governance of the company being audited. Those charged with governance means those with responsibility for overseeing

## Illustrative Case

### Primary Issues Requiring Companies to Restate Financial Statements

An analysis of circumstances resulting in restatement of financial statements reveals

the following as frequent causes:

- Revenue recognition issues.
- Debt, quasi-debt, warrants and equity security issues (including derivatives).
- Tax expenses.
- Cash flow statement classification errors.
- Acquisitions, mergers, disposals, reorganization accounting issues.
- Accounts/loans receivable, investments and cash issues.
- Liabilities, payable, reserves and accrual estimate failures.
- Deferred stock-based and/or executive compensation issues.

the strategic direction of the entity and obligations related to the accountability of the entity—this ordinarily includes the board of directors or audit committee. The communication is aimed at providing information related to corporate governance matters related to the financial statement audit that are significant and relevant for overseeing the financial reporting process. It includes information on:

- The auditors' responsibility under generally accepted auditing standards (i.e., to form and express an opinion) and management's responsibilities.
- An overview of the planned scope and timing of the audit.
- Significant findings from the audit.

The discussion of significant findings from the audit is particularly complex in that it involves communication of qualitative aspects of the company's significant accounting practices, audit difficulties encountered, uncorrected misstatements, disagreements with management, management consultations with other accountants, auditor independence issues, and other significant issues.

While the requirements of PCAOB Standard No. 16 and AICPA AU-C 260 are similar, in most areas, PCAOB Standard No. 16 is more detailed and possibly more comprehensive regarding the nature of the required communications. For example, Statement No. 16 explicitly requires a discussion of significant issues the auditors have discussed with management prior to the auditors' appointment and a discussion of significant unusual transactions the auditors have identified. Finally, PCAOB Standard No. 16 requires that the communication to occur prior to issuance of the auditors' report; AICPA AU-C 260 requires the communication on a timely basis.

## Post-Audit Responsibilities

### The Auditors' Subsequent Discovery of Facts Existing at the Date of Their Report

#### LO 16-9

Discuss the auditors' post-audit responsibilities.

After the issuance of its audit report, a CPA firm may encounter evidence indicating that the client's financial statements were materially misstated or lacked required disclosures. The auditors should immediately investigate such subsequently discovered facts. If the auditors determine that the facts are significant and existed at the date of the audit report, they should advise the client to make appropriate disclosure of the facts to anyone actually or likely to be relying upon the audit report and the related financial statements. For a public company in the United States, disclosure that a financial statement should no longer be relied upon is ordinarily through the client's filing of a Form 8-K with the SEC. If the client refuses to make appropriate disclosure, the CPAs should inform each member of the client's board of directors of such refusal. They should also notify regulatory agencies having jurisdiction over the client, and, if practicable, each person known to be relying upon the audited financial statements, that the CPAs' report can no longer be relied upon.

### Subsequent Discovery of Omitted Audit Procedures

What actions should the auditors take if, after issuing an audit report, they find that they failed to perform certain significant audit procedures? The omission of appropriate audit procedures in a particular engagement might be discovered during a peer review or other subsequent review of the auditors' working papers. Unlike the situation described in the previous section, the auditors do not have information indicating that the financial statements are in error. Instead, the subsequent review has revealed that they may have issued their audit report without having gathered sufficient audit evidence. In addressing this sensitive problem, AICPA AU-C 585 (PCAOB 390) states that the auditors should assess the importance of the omitted procedures to their previously issued opinion. If they believe that the omitted procedures impair their ability to support their previously issued opinion, and their report is still being relied upon by third parties, they should attempt to perform the omitted procedures or appropriate alternative procedures. Because of the legal implications of these situations, the auditors should consider consulting their legal counsel.

### Chapter Summary

This chapter explained auditing operations and the considerations and procedures involved in completing the audit. To summarize:

1. The analysis throughout the text has emphasized the need to consider revenue and expense accounts in conjunction with the audit of asset and liability accounts. However, vouching and other substantive procedures are generally necessary for revenue and expense accounts that are less directly associated with transaction cycles, such as miscellaneous revenue and selling, general, and administrative expenses.
2. Substantive procedures for payroll accounts address the overall reasonableness of payroll costs and the proper allocation of these costs to the functional areas of manufacturing, selling, and administration. In addition, tests should be performed on the allocation of manufacturing costs to work in process, finished goods, and cost of goods sold.
3. Because of their objectives, certain audit procedures cannot be completed before the end of the audit. These procedures include (a) search for unrecorded liabilities, (b) review the minutes of meetings, (c) perform final analytical procedures, (d) perform procedures to identify loss contingencies, (e) perform the review for subsequent events, and (f) obtain the representation letter.
4. The auditors should perform audit procedures to determine that loss contingencies have been properly presented and disclosed. To identify loss contingencies, auditors perform various procedures, such as reviewing minutes of directors' meetings, inquiring of the client's lawyer, reviewing correspondence with financial institutions and regulatory agencies, sending confirmations to financial institutions, and obtaining a representation letter from officers of the company.
5. Subsequent events may be classified into two broad categories: (a) those providing additional evidence as to conditions that existed at the date of the financial statements (which may require adjusting entries), and (b) those that arose after the date of the financial statements (which may require note disclosures). Many of these subsequent events relate to loss contingencies, and the audit procedures involved are similar to the ones used to audit those items.
6. Also important to completing the audit are the procedures performed to evaluate audit findings and review the audit work. In evaluating audit findings, the auditors accumulate known misstatements, projected misstatements, and other estimated misstatements to determine if the aggregate results of their procedures support the fairness of the financial statements. In addition, the auditors should consider whether any audit results indicate a need to reassess the risks of material misstatement of the financial statements.
7. Auditors also have certain post-audit responsibilities. When auditors find, subsequent to the issuance of their audit report, that the financial statements are materially misleading, they should take steps to prevent continued reliance on their report. In some cases, this might involve notification of regulatory agencies.

## Key Terms Introduced or Emphasized in Chapter 16

**Analytical procedures (640)** Evaluations of financial information made by a study of plausible relationships between financial and nonfinancial information.

**Commitment (643)** A contractual obligation to carry out a transaction at specified terms in the future. Material commitments should be disclosed in the financial statements.

**Conservatism (630)** An accounting doctrine for asset valuation in which the lower of two alternative acceptable asset valuations is chosen.

**Contingent liability (640)** A possible liability, stemming from past events, that will be resolved as to existence and amount by some future event.

**Date of the financial statements (644)** The date of the end of the latest period covered by the financial statements (e.g., date of the balance sheet).

**Disclosure checklist (651)** A list of specific disclosures required by the FASB, the GASB, the FASAC, and the SEC that is used to evaluate the adequacy of the disclosures in a set of financial statements.

**Emphasis-of-matter paragraph and other-matter paragraph (645)** A paragraph included in the auditors' report that is required by GAAS or is included at the auditors' discretion, and that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditor's judgment, is of such importance that it is fundamental to users' understanding of the financial statements.

**General risk contingency (643)** An element of the business environment that involves some risk of a future loss. Examples include the risk of accident, strike, price fluctuations, or natural catastrophe. General risk contingencies should not be disclosed in financial statements.

**Iron curtain approach (651)** An approach to making materiality judgments that quantifies the total likely misstatement as of the current year-end based on the effects of reflecting all misstatements (including projecting misstatements where appropriate) existing in the balance sheet at the end of the current year, irrespective of whether the misstatements occurred in the current year or previous years. For example, if expenses were understated by \$20,000 in the previous year and \$45,000 during the current year, the iron curtain method would quantify the misstatement as \$65,000. Also see *rollover approach*.

**Known misstatements (648)** Specific misstatements identified by the auditors during the course of the audit.

**Letter of inquiry of the client's lawyer (641)** A letter sent by auditors to a client's legal counsel requesting a description and evaluation of pending or threatened litigation, unasserted claims, and other loss contingencies. The returned letter from the lawyer is referred to as the lawyer's letter.

**Likely misstatements (648)** Misstatements identified by the auditors during the course of the audit that are due to either extrapolation from audit evidence or differences in accounting estimates.

**Loss contingency (640)** A possible loss, stemming from past events, that will be resolved as to existence and amount by some future event. Loss contingencies should be disclosed in notes to the financial statements if there is a reasonable possibility that a loss has been incurred. When loss contingencies are considered probable and can be reasonably estimated, they should be accrued in the accounts.

**Minutes (640)** A formal record of the issues discussed and actions taken in meetings of stockholders and the board of directors.

**Other information (652)** Financial and nonfinancial information (other than the financial statements and the auditors' report thereon) that is included in a document containing audited financial statements and the auditors' report thereon but is not required by a designated accounting standards setter.

**Other-matter paragraph (652)** A paragraph included in the auditors' report that refers to a matter other than those presented or disclosed in the financial statements that, in the auditors' judgment, is relevant to users' understanding of the audit, the auditors' responsibilities, or the auditors' report.

**Report release date (646)** The date the auditors grant the client permission to use the audit report in connection with the financial statements. This is sometimes referred to as the date of issuance of the audit report.

**Representation letter (647)** A single letter or separate letters prepared by officers of the client company at the auditors' request setting forth certain representations about the company's financial position or operations.

**Required supplementary information (652)** Information that a designated accounting standards setter requires to accompany an entity's basic financial statements. Required supplementary information differs from other types of information outside the basic financial statements because a designated accounting standards setter considers the information an essential part of the financial reporting of certain entities and because authoritative guidelines for the measurement and presentation of the information have been established.

**Rollover approach (651)** An approach to making materiality judgments that quantifies the total likely misstatement as of the current year-end based on the effects of reflecting misstatements (including projecting

misstatements where appropriate) only during the current year. For example, if expenses were understated by \$20,000 in the previous year, and \$45,000 during the current year, the rollover method would quantify the misstatement as \$45,000, ignoring the previous year misstatement. Also see *iron curtain approach*.

**S-1 review (647)** Procedures carried out by auditors at the client company's facilities on or as close as practicable to the effective date of a registration statement filed under the Securities Act of 1933.

**Subsequent event (644)** An event occurring between the date of the financial statements and the date of the auditor's report.

**Supplementary information (653)** Information presented outside the basic financial statements, excluding required supplementary information, that is not considered necessary for the financial statements to be fairly presented in accordance with the applicable financial reporting framework. Such information may be presented in a document containing the audited financial statements or separate from the financial statements.

**Unasserted claim (642)** A possible legal claim of which no potential claimant has exhibited an awareness.

## Review Questions

- 16-1. Identify three revenue accounts that are verified during the audit of balance sheet accounts; also, identify the related balance sheet accounts.
- 16-2. How are analytical procedures used in the verification of revenue?
- 16-3. Identify three items often misclassified as miscellaneous revenue.
- 16-4. Identify three expense accounts that are verified during the audit of balance sheet accounts; also, identify the related balance sheet accounts.
- 16-5. For which expense accounts should the auditors obtain or prepare analyses to be used in preparation of the client's income tax returns?
- 16-6. When you are first retained to audit the financial statements of Wabash Company, you inquire whether a budget is used to control costs and expenses. The controller, James Lowe, replies that he personally prepares such a budget each year, but that he regards it as a highly confidential document. He states that you may refer to it if necessary, but he wants you to make sure that no employee of the firm sees any of the budget data. Comment on this use of a budget.
- 16-7. What auditing procedure can you suggest for determining the reasonableness of selling, general, and administrative expenses?
- 16-8. Describe how the auditors use analytical procedures in the examination of selling, general, and administrative expenses.
- 16-9. What division of duties among independent departments is desirable to achieve maximum internal control over payroll?
- 16-10. What safeguards should be employed when the inaccessibility of banking facilities makes it desirable to pay employees in cash?
- 16-11. You are asked by a client to outline the procedures you would recommend for handling of unclaimed wages. What procedures do you recommend?
- 16-12. What specific procedures are suggested by the phrase "test of controls over payroll transactions"?
- 16-13. Should the auditors make a complete review of all correspondence in the client's files? Explain.
- 16-14. What is the purpose of analytical procedures performed as a part of the overall review?
- 16-15. List the audit procedures that should be completed near the date of the audit report.
- 16-16. What are *loss contingencies*? How are such items presented in the financial statements? Explain.
- 16-17. What is the usual procedure followed by the CPA in obtaining evidence regarding pending and threatened litigation against the client?
- 16-18. Explain how a loss contingency exists with respect to an *unasserted* claim. Should unasserted claims be disclosed in the financial statements?
- 16-19. If the federal income tax returns for prior years have not as yet been reviewed by federal tax authorities, would you consider it necessary for the client to disclose this situation in a note to the financial statements? Explain.
- 16-20. What is the meaning of the term *commitment*? Give examples. Do commitments appear in financial statements? Explain.
- 16-21. What are *general risk contingencies*? Do such items require disclosure in the financial statements?
- 16-22. What are *subsequent events*?
- 16-23. Describe the manner in which the auditors evaluate their audit findings.

- 16–24. Describe a disclosure checklist. What is its purpose?
- 16–25. When the auditors have audited the financial statements, what is their responsibility with respect to other information (not including required supplemental information) included in an annual report to shareholders?
- 16–26. Does incorrect required supplemental information included with audited financial statements result in a qualified or adverse audit opinion? Explain.

## Questions Requiring Analysis

- LO 16-7** 16–27. In your audit of the financial statements of Wolfe Company for the year ended April 30, you find that a material account receivable is due from a company in reorganization under Chapter 11 of the Bankruptcy Act. You also learn that on May 28 several former members of the bankrupt company's management formed a new company and that the new company had issued a note to Wolfe Company that would pay off the bankrupt customer's account receivable over a four-year period. What presentation, if any, should be made of this situation in the financial statements of Wolfe Company for the year ended April 30? Explain.

- LO 16-6** 16–28. During an audit engagement, Robert Wong, CPA, has satisfactorily completed an examination of accounts payable and other liabilities and now plans to determine whether there are any loss contingencies arising from litigation, claims, or assessments.

What are the audit procedures Wong should follow with respect to the existence of loss contingencies arising from litigation, claims, or assessments? Do not discuss reporting requirements.

- LO 16-6, 7** 16–29. You are the audit manager in the audit of the financial statements of Midwest Grain Storage, Inc., a new client. The company's records show that, as of the balance sheet date, approximately 15 million bushels of various grains are in storage for the Commodity Credit Corporation, an agency of the U.S. government.

In your review of the audit senior's working papers, you ascertain the following facts:

- All grain is stored under a Uniform Grain Storage Agreement, which holds Midwest responsible for the quantity and quality of the grain.
- Losses due to shrinkage, spoilage, and so forth are inherent in the storage of grain. Midwest's losses, however, have been negligible due to the excellence of its storage facilities.
- Midwest carries a warehouseman's bond covering approximately 20 percent of the value of the stored grain.

In the loss contingencies section of the working papers, the senior auditor has made the following notation: "I propose recommending to Midwest's controller that the contingent liability for grain spoilage and shrinkage be disclosed in a note to the financial statements."

Do you concur with the senior's proposal? Explain.

- LO 16-1, 2, 3** 16–30.

	Sales	Cost of Sales	Gross Margin Percentage	Industry Averages
New Course Books	\$ 1,086,800	\$ 742,567		25.4
Used Course Books	468,200	318,222		32.6
Custom Published Books	212,222	159,293		25.6
Textbook Rental Sales	102,323	90,323		22.1
Course Technology	90,600	80,432		11.2
Trade Books	68,400	40,356		24.3
Professional Reference Books	22,330	15,200		31.0
<b>Total Book Sales</b>	<b>\$2,050,875</b>	<b>\$1,446,393</b>		<b>26.5</b>
<b>Total Non-Book Sales</b>	<b>\$823,578</b>	<b>\$612,233</b>		<b>29.7</b>
<b>Total Net Sales</b>	<b>\$2,874,453</b>	<b>\$2,058,626</b>		<b>28.3</b>

- Calculate the gross margin percentage for each of State University's product lines.
- Compare State University's gross margins to industry averages. Indicate any margins that appear out of line, in relation to the industry.

- LO 16-7** 16-31. The auditor's opinion on the fairness of financial statements may be affected by subsequent events.
- Required:*
- Define what is commonly referred to in auditing as a subsequent event, and describe the two general types of subsequent events.
  - Identify those auditing procedures that the auditor should apply at or near the completion of fieldwork to disclose significant subsequent events.
- LO 16-6, 7** 16-32. Linda Reeves, CPA, receives a telephone call from her client, Lane Company. The company's controller states that the board of directors of Lane has entered into two contractual arrangements with Ted Forbes, the company's former president, who has recently retired. Under one agreement, Lane Company will pay the ex-president \$7,000 per month for five years if he does not compete with the company during that time in a rival business. Under the other agreement, the company will pay the ex-president \$5,000 per month for five years for such advisory services as the company may request from the ex-president.
- Lane's controller asks Reeves whether the balance sheet as of the date the two agreements were signed should show \$144,000 in current liabilities and \$576,000 in long-term liabilities, or whether the two agreements should be disclosed in a contingencies note to the financial statements. How should Linda Reeves reply to the controller's questions? Explain.
- LO 16-8** 16-33. Justin Kealey, CPA, is auditing Tustin Companies, Inc. Kealey has accumulated known and likely misstatements for the current year to evaluate whether there is a sufficiently low risk of material misstatement of the financial statements to issue an opinion. However, Kealey notes that there are several misstatements that have been carried over from prior years.
- Required:*
- Distinguish between the *iron curtain* and the *rollover* approaches to considering the misstatements from prior years.
  - Describe how SEC *Staff Accounting Bulletin No. 108* requires auditors to consider misstatements carried over from prior periods.
- LO 16-7, 9** 16-34. On July 27, 20X0, Arthur Ward, CPA, issued an unqualified audit report on the financial statements of Dexter Company for the year ended June 30, 20X0. Two weeks later, Dexter Company mailed annual reports, including the June 30 financial statements and Ward's audit report, to 150 stockholders and to several creditors of Dexter Company. Dexter Company's stock is not actively traded on national exchanges or over the counter.
- On September 5, the controller of Dexter Company informed Ward that an account payable for consulting services in the amount of \$170,000 had inadvertently been omitted from Dexter's June 30 balance sheet. As a consequence, net income for the year ended June 30 was overstated by \$90,500, net of applicable federal and state income taxes. Both Ward and Dexter's controller agreed that the misstatement was material to Dexter's financial position at June 30, 20X0, and operating results for the year then ended.
- What should Arthur Ward's course of action be in this matter? Discuss.
- LO 16-8** 16-35. Linda Tanner, CPA, is auditing the Carson Company. For the current year, Carson is presenting December 31, 20X5, financial statements with comparative financial statements for the year ended December 31, 20X4. In the prior year audit, Linda identified an understatement of prepaid expenses of \$100,000 at December 31, 20X4, that was not corrected. In the current year, Linda found that prepaid expenses were understated by another \$50,000 at December 31, 20X5.
- Required:*
- Using the *iron curtain* approach, describe how Tanner would consider whether an adjustment is required.
  - Using the *rollover* approach, describe how Tanner would consider whether an adjustment is required.
  - Describe what SEC *Staff Accounting Bulletin No. 108* requires in this situation.

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 16-36. Multiple Choice Questions

Select the best answer for each of the following and give reasons for your choice:

- LO 16-5**
- Which of the following is *least* likely to be considered a substantive procedure relating to payroll?
    - Investigate fluctuations in salaries, wages, and commissions.
    - Test computations of compensation under profit sharing for bonus plans.
    - Test commission earnings.
    - Test whether employee time reports are approved by supervisors.

## LO 16-5

- b. Which of the following is the *best* way for the auditors to determine that every name on a company's payroll is that of a bona fide employee presently on the job?
- (1) Examine human resources records for accuracy and completeness.
  - (2) Examine employees' names listed on payroll tax returns for agreement with payroll accounting records.
  - (3) Make a surprise observation of the company's regular distribution of paychecks on a test basis.
  - (4) Visit the working areas and verify that employees exist by examining their badge or identification numbers.

## LO 16-6

- c. As a result of analytical procedures, the independent auditors determine that the gross profit percentage has declined from 30 percent in the preceding year to 20 percent in the current year. The auditors should:
- (1) Express an opinion that is qualified due to the inability of the client company to continue as a going concern.
  - (2) Evaluate management's performance in causing this decline.
  - (3) Require note disclosure.
  - (4) Consider the possibility of a misstatement in the financial statements.

## LO 16-5

- d. When auditing the statement of cash flows, which of the following would an auditor *not* expect to be a source of receipts and payments?
- (1) Capitalization.
  - (2) Financing.
  - (3) Investing.
  - (4) Operations.

## LO 16-6

- e. The search for unrecorded liabilities for a public company includes procedures usually performed through the:
- (1) Day the audit report is issued.
  - (2) End of the client's year.
  - (3) Date of the auditors' report.
  - (4) Date the report is filed with the SEC.

## LO 16-8

- f. The aggregated misstatement in the financial statements is made up of:

	Known Misstatements	Projected Misstatements	Other Misstatements
(1)	Yes	Yes	Yes
(2)	Yes	Yes	No
(3)	No	Yes	No
(4)	No	Yes	Yes

## LO 16-6

- g. A possible loss, stemming from past events that will be resolved as to existence and amounts, is referred to as a(n):
- (1) Analytical process.
  - (2) Loss contingency.
  - (3) Probable loss.
  - (4) Unasserted claim.

## LO 16-7

- h. Which of the following is most likely to be considered a Type 1 subsequent event?
- (1) A business combination completed after year-end, but for which negotiations began prior to year-end.
  - (2) A strike subsequent to year-end due to employee complaints about working conditions which originated two years ago.
  - (3) Customer checks deposited prior to year-end, but determined to be uncollectible after year-end.
  - (4) Introduction of a new line of products after year-end for which major research had been completed prior to year-end.

## LO 16-6

i. An auditor accepted an engagement to audit the 20X8 financial statements of EFG Corporation and began the fieldwork on September 30, 20X8. EFG gave the auditor the 20X8 financial statements on January 17, 20X9. The auditor completed the audit on February 10, 20X9, and delivered the report on February 16, 20X9. The client's representation letter normally would be dated:

- (1) December 31, 20X8.
- (2) January 17, 20X9.
- (3) February 10, 20X9.
- (4) February 16, 20X9.

## LO 16-8

j. Which of the following procedures is most likely to be included near completion of an audit?

- (1) Obtain an understanding of internal control.
- (2) Confirmation of receivables.
- (3) Observation of inventory.
- (4) Perform analytical procedures.

## LO 16-9

k. Subsequent to the issuance of the auditor's report, the auditor became aware of facts existing at the report date that would have affected the report had the auditor then been aware of such facts. After determining that the information is reliable, the auditor should next:

- (1) Notify the board of directors that the auditor's report must no longer be associated with the financial statements.
- (2) Determine whether there are persons relying or likely to rely on the financial statements who would attach importance to the information.
- (3) Request that management disclose the effects of the newly discovered information by adding a footnote to subsequently issued financial statements.
- (4) Issue revised pro forma financial statements taking into consideration the newly discovered information.

## LO 16-7

l. Which of the following events occurring on January 5, 20X2, is most likely to result in an adjusting entry to the 20X1 financial statements?

- (1) A business combination.
- (2) Early retirement of bonds payable.
- (3) Settlement of litigation.
- (4) Plant closure due to a strike.

## LO 16-7 16–37. Adapted AICPA Task-Based Simulation

The following situations represent excerpts from the responses to audit inquiries of external legal counsel of XYZ Co. during the annual audit of year 1 ("legal response"). For each excerpt, select the most appropriate financial statement effect and audit response. Each excerpt is independent. Responses may be used once, more than once, or not at all.

- a. The client's year end is December 31, year 1.
- b. The anticipated audit report date is February 15, year 2.
- c. All amounts are material to the financial statements.

Financial Statement Effect	Audit Response
(1) No impact on financial statement amounts or notes.	(7) Legal response is appropriately dated.
(2) Disclosure in notes relating to nature of litigation, but no amount disclosed.	(8) Update legal response. (9) Update audit report date.
(3) Disclosure in notes relating to nature of litigation, including loss amount.	
(4) Potential litigation settlement accrued in financial statements.	
(5) Potential litigation settlement not accrued in financial statements, amount disclosed in notes.	
(6) Verify amount due attorney is recorded in financial statement amounts.	

Situations	Financial Statement Effect	Audit Response
<b>Letter dated February 14, year 2:</b>		
"I advise you that at and since December 31, year 1, I have not been engaged to give substantive attention to, or represent, XYZ Co. in connection with any pending or threatened litigation, claims, or assessments, nor am I aware of any loss contingencies. No amounts were due to this office for services provided at December 31, year 1."	(a)	(b)
<b>Letter dated January 21, year 2:</b>		
"I advise you that at and since December 31, year 1, I have not been engaged to give substantive attention to, or represent, XYZ Co. in connection with any pending or threatened litigation, claims, or assessments, nor am I aware of any loss contingencies. There were fees outstanding of \$3,675 due to this office for services provided at December 31, year 1."	(c)	(d)
<b>Letter dated February 26, year 2:</b>		
<i>K. Bowt v. XYZ Co.:</i> This matter commenced in December, year 1. The plaintiff alleges discrimination relating to his termination on November 17, year 1. The company intends to defend this case vigorously. At this time, we are unable to evaluate the likelihood of an unfavorable outcome or estimate the amount or range of potential loss.	(e)	(f)
<b>Letter dated March 16, year 2:</b>		
<i>J. Myers v. XYZ Co.:</i> This matter commenced in March, year 2. The plaintiff alleges discrimination relating to his termination on November 17, year 1. The company intends to defend this case vigorously. At this time, we are unable to evaluate the likelihood of an unfavorable outcome. The plaintiff is demanding \$50,000.	(g)	(h)
<b>Letter dated February 14, year 2</b>		
<i>R. Brown v. XYZ Co.:</i> This matter commenced in November, year 1. The plaintiff alleges discrimination relating to his termination on March 17, year 1. It is reasonably possible that the case will be settled for approximately \$35,000.	(i)	(j)
<b>Letter dated February 14, year 2</b>		
<i>L. Peep v. XYZ Co.:</i> This matter commenced in November, year 1. The plaintiff alleges discrimination relating to his termination on March 17, year 1. The case is tentatively settled for \$35,000.	(k)	(l)

**LO 16-7 16–38. Adapted AICPA Task-Based Simulation**

In connection with your audit of the financial statements of Hollis Mfg. Corporation for the year ended December 31, 20X3, your review of subsequent events disclosed the following items:

- January 7, 20X4: The mineral content of a shipment of ore en route to Hollis Mfg. Corporation on December 31, 20X3, was determined to be 72 percent. The shipment was recorded at year-end at an estimated content of 50 percent by a debit to Raw Materials Inventory and a credit to Accounts Payable in the amount of \$82,400. The final liability to the vendor is based on the actual mineral content of the shipment.
- January 15, 20X4: Following a series of personal disagreements between Ray Hollis, the president, and his brother-in-law, the treasurer, the latter resigned, effective immediately, under an agreement whereby the corporation would purchase his 10 percent stock ownership at book value as of December 31, 20X3. Payment is to be made in two equal amounts in cash on April 1 and October 1, 20X4. In December, the treasurer had obtained a divorce from his wife, who is Ray Hollis's sister.
- January 16, 20X4: As a result of reduced sales, production was curtailed in mid-January and some workers were laid off.
- On January 18, 20X4, a major customer filed for bankruptcy. The customer's financial condition had been degenerating over recent years.

- e. On January 28, 20X4, a famous analyst who followed the industry provided a negative report on his expectations concerning the short and intermediate term for the industry.

*Required:*

- For each of the subsequent events, indicate whether they should result in:  
Adjustment—an adjusting entry as of 20X3.  
Consider Disclosure—consideration of note disclosure as of 20X3.
- Select the two events least likely to be reflected (resulting in adjustment or disclosure) in the financial statements.

**LO 16-7** 16–39. **Adapted AICPA Task-Based Simulation**

In connection with her audit of the financial statements of Flowmeter, Inc., for the year ended December 31, 20X3, Joan Hirsch, CPA, is aware that certain events and transactions that have taken place after December 31, 20X3, but before she has issued her report dated February 28, 20X4, may affect the company's financial statements.

The following material events or transactions have come to her attention:

- On January 3, 20X4, Flowmeter, Inc., received a shipment of raw materials from Canada. The materials had been ordered in October 20X3 and shipped FOB shipping point in December 20X3.
- On January 15, 20X4, the company settled and paid a personal injury claim of a former employee as the result of an accident that had occurred in March 20X3. The company had not previously recorded a liability for the claim.
- On January 25, 20X4, the company agreed to purchase for cash the outstanding stock of Porter Electrical Co. The business combination is likely to double the sales volume of Flowmeter, Inc.
- On February 1, 20X4, a plant owned by Flowmeter, Inc., was damaged by a flood, resulting in an uninsured loss of inventory.
- On February 5, 20X4, Flowmeter, Inc., issued to an underwriting syndicate \$2 million in convertible bonds.

*Required:*

- For each of the subsequent events, indicate whether they should result in:  
Adjustment—an adjusting entry as of 20X3.  
Possible Disclosure—Consider note disclosure as of 20X3.

- LO 16-6, 7, 8, 9** 16–40. Match the following terms to the appropriate definition (or partial definition). Each definition is used once.

Term	Definition (or Partial Definition)
a. Commitment	1. A contractual obligation to carry out a transaction at specified terms in the future. Material commitments should be disclosed in the financial statements.
b. Contingent liability	2. A possible liability, stemming from past events, that will be resolved as to existence and amount by some future event.
c. General risk contingency	3. A possible loss, stemming from past events, that will be resolved as to existence and amount by some future event.
d. Iron curtain approach	4. An approach to making materiality judgments that quantifies the total likely misstatement as of the current year-end based on the effects of reflecting all misstatements (including projecting misstatements where appropriate) existing in the balance sheet at the end of the current year, irrespective of whether the misstatements occurred in the current year or previous years.
e. Known misstatements	5. An approach to making materiality judgments that quantifies the total likely misstatement as of the current year-end based on the effects of reflecting misstatements (including projecting misstatements where appropriate) only during the current year.
f. Likely misstatements	6. An element of the business environment that involves some risk of a future loss. Examples include the risk of accident, strike, price fluctuations, or natural catastrophe. General risk contingencies should not be disclosed in financial statements.
g. Loss contingency	7. Misstatements identified by the auditors during the course of the audit that are due to either extrapolation from audit evidence or differences in accounting estimates.
h. Rollover approach	8. Specific misstatements identified by the auditors during the course of the audit.

16–41. **Adapted AICPA Simulation**

*Note: This simulation integrates concepts first presented in Chapter 5 (see Figure 5.1 for Assertions about Account Balances) and information from throughout the procedural chapters (10 through 16) rather than only Chapter 16 coverage. This problem uses only the four account balances assertions from Figure 5.1: it does not include the cutoff assertion. Accordingly, procedures which might be considered cutoff procedures would generally be considered as addressing either or both of the existence or completeness assertions (see footnote 1 on page 144).*

For each of the account balances and associated assertions below, select the audit procedure from the list provided that provides the most appropriate audit evidence for the account assertion.

Account Balances	Assertion	Procedure
1. Accounts Receivable	Completeness	a. Review confirmation of accounts receivable balances and agree to accounts receivable subledger. b. Review list of accounts written off during year. c. Review schedule of bad debt expense. d. Trace individual customer account transactions to sales invoice. e. Trace sales invoice and shipping documents just before year-end to customer account transactions.
2. Inventory	Valuation and Allocation	a. Examine invoices from suppliers. b. Examine invoices paid subsequent to year-end and trace to subsidiary ledger. c. Select items from inventory listing and locate the items in the warehouse. d. Select items located in the inventory warehouse and trace to inventory listing. e. Trace sales invoices and shipping documents just before year-end to customer accounts.
3. Fixed Assets	Rights and Obligations	a. Interview plant manager regarding fixed asset additions during the year. b. Recalculate partial year depreciation for fixed asset acquisitions. c. Trace fixed asset item to fixed asset master control listing. d. Vouch fixed asset acquisitions to purchase invoices. e. Vouch fixed asset acquisitions to related cash disbursement.
4. Accounts Payable	Completeness	a. Compare aging of accounts payable to prior periods. b. Confirm accounts payable balance with suppliers. c. Examine invoices paid subsequent to year-end and trace to subsidiary ledger. d. Trace individual payable transaction to purchase order. e. Vouch invoices for the purchase of supplies to receiving documents.
5. Cash	Existence	a. Agree bank statement to the subsidiary ledger. b. Agree cash balance per the bank reconciliation to the year-end bank statement. c. Agree cash balance to online year-end bank statement. d. Recalculate bank statement balance including interest receivable. e. Trace deposit per the bank statement to the cash subsidiary ledger.

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*. 

- LO 16-1, 3** 16-42. Rita King, your staff assistant on the April 30, 20X2, audit of Maxwell Company, was transferred to another assignment before she could prepare a proposed adjusting journal entry for Maxwell's Miscellaneous Revenue account, which she had analyzed per the working paper given on the next page. You have reviewed the working paper and are satisfied with King's procedures. You are convinced that all the miscellaneous revenue items should be transferred to other accounts. Maxwell Company's state of incorporation has an Unclaimed Properties Law.

Draft a proposed adjusting journal entry at April 30, 20X2, for Maxwell Company's Miscellaneous Revenue account.

- LO 16-1, 2, 3** 16-43. Your client is a company that owns a shopping center with 30 store tenants. All leases with the store tenants provide for a fixed rent plus a percentage of sales, net of sales taxes, in excess of a fixed dollar amount computed on an annual basis. Each lease also provides that the lessor may engage CPAs to audit all records of the tenant for assurance that sales are being properly reported to the lessor.

You have been requested by your client to audit the records of Traders Restaurant to determine that the sales totaling \$390,000 for the year ended December 31, 20X2, have been properly reported to the lessor. The restaurant and the shopping center entered into a five-year lease on January 1, 20X1. Traders Restaurant offers only table service; no liquor is served. During mealtimes, there are four or five waiters and waitresses in attendance who prepare handwritten prenumbered restaurant checks for the customers. Payment is made at a cash register, operated by the proprietor, as the customer leaves. All sales are for cash. The proprietor also is the accountant. Complete files are kept of restaurant checks and cash register tapes. A daily sales journal and general ledger are also maintained.

**Required:** List the auditing procedures that you would employ to verify the total annual sales of Traders Restaurant.

Maxwell Company Miscellaneous Revenue Year Ended April 30, 20X2				Q-2
Acct. No. 430				
Date	Description	Reference	Amount	
May 8, 20X1, through April 7, 20X2	Proceeds of sale of scrap from manufacturing process (total of 12 monthly sales)	Various CR	\$5,843	Y
July 18, 20X1	Write-off of old outstanding checks; nos. 118—\$500; 214—\$400; 407—\$200	GJ 7-4	1,100	Y
Sept. 22, 20X1	Recovery of previously written off account receivable from Wilson Company	CR 9-1	4,381	Y
Feb. 6, 20X2	Cash proceeds from sale of machine. Cost of \$10,000 and accumulated depreciation of \$8,000 as of Feb. 6, X2, not removed from accounts	CR 2-1	3,500	Y
April 28, 20X2	Refund of premium overcharge on fire insurance policy no. 1856, for period April 1, 20X2–Mar. 31, 20X3	CR 4-1	600	Y
April 30, 20X2	Balance per ledger		<u>\$15,424</u>	
Y—Traced to cash receipts journal or general journal; vouched to appropriate supporting documents.

- LO 16-4, 5** 16-44. The following are typical questions that might appear on an internal control questionnaire for payroll activities:

1. Is there adequate separation of duties between employees who maintain human resources records and employees who approve payroll disbursements?
2. Is there adequate separation of duties between personnel who maintain timekeeping or attendance records for employees and employees who distribute payroll checks?

*Required:*

- a. Describe the purpose of each of the above controls.
- b. Describe the manner in which each of the above controls might be tested.
- c. Assuming that the operating effectiveness of each of the above controls is found to be inadequate, describe how the auditors might alter their substantive procedures to compensate for the increased level of control risk.

- LO 16-4, 5** 16-45. In connection with an audit of the financial statements of Olympia Company, the auditors are reviewing procedures for accumulating direct labor-hours. They learn that all production is by job order and that all employees are paid hourly wages, with time and a half for overtime hours.

Olympia's direct labor-hour input process for payroll and job-cost determination is summarized in the flowchart that is illustrated next. Steps A and C are performed in timekeeping, step B in the factory operating departments, step D in payroll audit and control, step E in data input, and step F in computer operations.

*Required:*

For each input processing step A through F:

- a. List the possible errors or discrepancies that may occur.
- b. Cite the corresponding control that should be in effect for each error or discrepancy.

Note: Your discussion of Olympia's procedures should be limited to the input for direct labor-hours, as shown in steps A through F in the flowchart. Do not discuss human resources procedures for hiring, promotion, termination, and pay-rate authorization. In step F, do not discuss equipment, computer program, and general computer controls.

Organize your answer for each input-processing step as follows:

Step	Possible Misstatements or Discrepancies	Control
A		

(AICPA, adapted)

- LO 16-4** 16–46. Rowe Manufacturing Company has about 50 production employees and uses the following payroll procedures.

The factory supervisor interviews applicants and on the basis of the interview either hires or rejects the applicants. After being employed, the applicant prepares a W-4 form (Employee's Withholding Exemption Certificate) and gives it to the supervisor. The supervisor writes the hourly rate of pay for the new employee in the corner of the W-4 form and then gives the form to a payroll clerk as notice that the applicant has been employed. The supervisor verbally advises the payroll department of pay-rate adjustments.

A supply of blank time cards is kept in a box near the entrance to the factory. Each employee takes a time card on Monday morning, signs it, and notes in pencil on the time card the daily arrival and departure times. At the end of the week, the employees drop the time cards in a box near the door to the factory.

The completed time cards are taken from the box on Monday morning by a payroll clerk. Two payroll clerks divide the cards alphabetically between them, one taking the A–L section of the payroll and the other taking the M–Z section. Each clerk is fully responsible for one section of the payroll. The payroll clerks compute the gross pay, deductions, and net pay; post the details to the employees' earnings records; and prepare and number the payroll checks. Employees are automatically removed from the payroll when they fail to turn in time cards.

The payroll checks are manually signed by the chief accountant and given to the supervisor, who distributes the checks to the employees in the factory and arranges for the delivery of the checks to the employees who are absent. The payroll bank account is reconciled by the chief accountant, who also prepares the various quarterly and annual payroll tax reports.

List your suggestions for improving Rowe Manufacturing Company's internal control over factory hiring practices and payroll.

- LO 16-7** 16–47. Robertson Company had accounts receivable of \$200,000 at December 31, 20X0, and had provided an allowance for uncollectible accounts of \$6,000. After performing all normal auditing procedures relating to the receivables and to the valuation allowance, the independent auditors were satisfied that this asset was fairly stated and that the allowance for uncollectible accounts was adequate. Just before completion of the audit fieldwork late in February, however, the auditors learned that the entire plant of Thompson Corporation, a major customer, had been destroyed by a flood early in February and that as a result Thompson Corporation was hopelessly insolvent.

The account receivable from Thompson Corporation in the amount of \$44,000 originated on December 28; terms of payment were net 60 days. The receivable had been regarded as entirely collectible at December 31, and the auditors had so considered it in reaching their conclusion as to the adequacy of the allowance for uncollectible accounts. In discussing the news concerning the flood, the controller of Robertson Company emphasized to the auditors that the probable loss of \$44,000 should be regarded as a loss of the following year, and not of 20X0, the year under audit.

What action, if any, should the auditors recommend with respect to the receivable from Thompson Corporation?

## In-Class Team Case

- LO 16-8** 16–48. The audit staff of Adams, Barnes & Co. (ABC), CPAs, reported the following audit findings in their 20X5 audit of Keystone Computers & Networks (KCN), Inc.:

1. Unrecorded liabilities in the amount of \$6,440 for purchases of inventory. These inventory items were counted and included in the year-end total.
2. Projected misstatement from confirmation of accounts receivable in the amount of \$2,042 understatement.
3. Projected misstatement from price tests of inventory of \$9,510 overstatement.
4. The staff of ABC believes that the amount of KCN's allowance for uncollectible accounts should be increased by \$5,000.

In addition, the audit staff has decided that for evaluating a material misstatement of the financial statements, the following guidelines should be used:

Current assets—\$50,000  
 Noncurrent assets—\$75,000  
 Current liabilities—\$50,000  
 Noncurrent liabilities—\$75,000  
 Total owners' equity—\$100,000  
 Net income before taxes—\$65,000

*Required:*

- a. Prepare a schedule modeled after Figure 16.5 on page 650 to be used to evaluate the above audit findings, assuming that KCN's marginal tax rate is 25 percent.
- b. Decide whether the results indicate that there is a sufficiently low risk of material misstatement to justify ABC's audit opinion.

## Research and Discussion Case

LO 16-6, 8

- 16-49. Marshall and Wyatt, CPAs, has been the independent auditor of Interstate Land Development Corporation for several years. During these years, Interstate prepared and filed its own annual income tax returns.

During 20X4, Interstate requested Marshall and Wyatt to audit all the necessary financial statements of the corporation to be submitted to the Securities and Exchange Commission (SEC) in connection with a multistate public offering of 1 million shares of Interstate common stock.

This public offering came under the provisions of the Securities Act of 1933. The audit was performed carefully and the financial statements were fairly presented for the respective periods. These financial statements were included in the registration statement filed with the SEC.

While the registration statement was being processed by the SEC, but before the effective date, the Internal Revenue Service (IRS) obtained a federal court subpoena directing Marshall and Wyatt to turn over all its working papers relating to Interstate for the years 20X1–20X4. Marshall and Wyatt initially refused to comply for two reasons. First, Marshall and Wyatt did not prepare Interstate's tax returns. Second, Marshall and Wyatt claimed that the working papers were confidential matters subject to the privileged communications rule. Subsequently, however, Marshall and Wyatt did relinquish the subpoenaed working papers.

Upon receiving the subpoena, Wyatt called Dunkirk, the chairman of Interstate's board of directors, and asked him about the IRS investigation. Dunkirk responded, "I'm sure the IRS people are on a fishing expedition and that they will not find any material deficiencies."

A few days later Dunkirk received a written memorandum from the IRS stating that it was contending Interstate had underpaid its taxes during the period under review. The memorandum revealed that Interstate was being assessed \$800,000, including penalties and interest for the three years. Dunkirk forwarded a copy of this memorandum to Marshall and Wyatt. This \$800,000 assessment was material relative to the financial statements as of December 31, 20X4. The amount for each year individually, exclusive of penalty and interest, was not material relative to each respective year.

*Required:*

- a. In general terms, discuss the extent to which a CPA firm's potential liability to third parties is increased in an SEC registration audit.
- b. Discuss the implications of the IRS investigation, if any, relative to Marshall and Wyatt's examination of Interstate's 20X4 financial statements. Discuss any additional investigative procedures that the auditors should undertake or any audit judgments that should be made as a result of this investigation.
- c. Can Marshall and Wyatt validly refuse to surrender the subpoenaed working papers to the IRS? Explain.

(AICPA, adapted)

# Auditors' Reports

Expressing an independent and expert opinion on the fairness of financial statements is the most frequently performed attestation service rendered by the public accounting profession. This opinion, which is expressed in the auditors' report, provides users of financial statements with an opinion on whether the statements are in conformity with the appropriate financial reporting framework, most frequently generally accepted accounting principles.

In Chapter 2, we saw that the auditors' **standard report** states that the audit was performed in conformity with generally accepted auditing standards and expresses an opinion that the client's financial statements are presented fairly in conformity with generally accepted accounting principles. However, auditors *cannot* issue the standard report if:

- There are conditions, although not departures from GAAP, about which the readers of the financial statements should be informed (e.g., a lack of consistent application of GAAP).
- There are material departures from GAAP in the client's financial statements.
- The auditors are unable to obtain sufficient appropriate audit evidence (e.g., due to client not retaining certain important records).

Instead, they must alter their report to communicate those matters.

In this chapter, we describe the different types of audit reports that auditors issue in various circumstances. Their goal in reporting is to present clearly the nature of the audit and their opinion on the financial statements.

## Financial Statements and Standard Unmodified Audit Reports

Because we are discussing audit reports on financial statements, we first briefly provide an overview of financial statements, including disclosures. Next, we discuss in detail the standard unmodified audit reports included in AICPA Auditing Standards Board and Public Company Accounting Oversight Board professional standards.

### Financial Statements

Auditors most frequently report upon a complete set of financial statements: that is, the balance sheet, the income statement, the statement of retained earnings, and the statement of cash flows and related notes.<sup>1</sup> In some cases, the statement of retained earnings is either expanded to a statement of stockholders' equity or combined with the income

<sup>1</sup> As is discussed in further detail in Chapter 19, an auditor may report on less than the complete set of financial statements. Thus, for example, an auditor could issue an audit report with an opinion on a balance sheet alone. One issue that complicates matters is a GAAP requirement that when a company presents a balance sheet and an income statement, it must also present a statement of cash flows; if a statement of cash flows is omitted in this situation, a departure from GAAP exists.

### LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 17-1** Describe the standard audit report for non-public entity (nonissuer) audits.
- LO 17-2** Describe the standard audit report for public entity (issuer) audits.
- LO 17-3** Identify the circumstances that result in audit reports with emphasis-of-matter paragraphs and unmodified opinions.
- LO 17-4** Identify the circumstances that result in modified audit opinions.
- LO 17-5** Describe the auditors' responsibilities for reporting on comparative financial statements.

statement. Financial statements generally are presented in comparative form for the current year and one or more preceding years. The financial statements for a parent corporation usually are consolidated with those of the subsidiaries. In the United States, these financial statements are most frequently prepared following the **general-purpose framework** referred to as *accounting principles generally accepted in the United States of America*.<sup>2</sup>

## Financial Statement Disclosures

The purpose of notes to financial statements is to properly disclose information required by generally accepted accounting principles that cannot be adequately conveyed on the face of the financial statements. Adequate disclosure in the notes to the financial statements is necessary for the auditors to issue an unmodified opinion on the financial statements.

The Financial Accounting Standards Board (FASB), the Government Accounting Standards Board (GASB), the Federal Accounting Standards Advisory Board (FASAB), and the Securities and Exchange Commission (SEC) have issued numerous pronouncements that have added extensive disclosure requirements. Examples of these requirements include the disclosure of significant accounting policies, accounting changes, loss contingencies, and lease and postretirement benefit information.

In evaluating financial reporting disclosures, the auditors should keep in mind that disclosures are meant to *supplement* the information on the face of the financial statements—not *correct* improper financial statement presentation. Thus, a note or supplementary schedule, no matter how skillfully drafted, does not compensate for the erroneous presentation of an item in the financial statements.

## Comparative Financial Statements

**Comparative financial statements** are financial statements for one or more prior periods, included for comparison with the financial statements of the current period. Comparative financial statements allow users to identify changes and trends in the financial position and operating results of a company over an extended period, and thus are more useful to investors and creditors than are financial statements for a single period. Publicly owned companies are required to include in their annual reports the balance sheets for each of the last two years and the related statements of income, retained earnings, and cash flows for each of the last three years. The auditors' report covers all financial statements that are presented. Later in this chapter, we will describe in detail the auditors' reporting responsibilities when management presents comparative financial statements.

## The Auditors' Standard Report—Nonpublic Clients

### LO 17-1

Describe the standard audit report for nonpublic entity (nonissuer) audits.

Chapter 2 includes a standard audit report on the audit of a nonpublic company's financial statements for two years. The following is a nonpublic company standard unmodified report on financial statements for one year (AICPA AU-C 700):

### Independent Auditors' Report

To the Board of Directors and Stockholders of ABC Company:

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheet as of December 31, 20X1, and the related consolidated statements of income, changes in stockholders' equity and cash flows for the year then ended, and the related notes to the financial statements.

#### *Management's Responsibility for the Financial Statement*

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

<sup>2</sup> While financial statements may be prepared using a number of financial reporting frameworks other than GAAP (e.g., *International Financial Reporting Standards*, *Cash Basis*, *Tax Basis*), throughout this chapter we will ordinarily just refer to GAAP unless a distinction relating to another framework is being made.

*Auditors' Responsibility*

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statement. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Opinion*

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of ABC Company and its subsidiaries as of December 31, 20X1, and the results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Phoenix, Arizona  
February 5, 20X2

*Williams & Co., LLP*

Before continuing, notice several details about this report. It has a title that includes the word *independent*. It is addressed to those for whom it is prepared, generally the audited company itself or to those charged with governance. After the introductory paragraph, the report is divided into sections with headings.

The introductory paragraph of the auditors' report identifies the financial statements that have been audited. The section heading of *Management's Responsibility for the Financial Statement* indicates that management is responsible for the preparation and fair presentation of the financial statements, in accordance with generally accepted accounting principles (or another **financial reporting framework** such as cash basis, if appropriate) and its responsibility for internal control. The *Auditors' Responsibility* section includes three paragraphs that (1) indicate that it is the auditors' responsibility to express an opinion on the financial statements based on an audit conducted in accordance with generally accepted auditing standards, (2) outline the nature of an audit, and (3) conclude that the auditors believe that sufficient appropriate audit evidence has been obtained to provide a basis for the audit opinion. Finally, the *Opinion Section* presents the auditors' opinion on whether the financial statements are presented fairly in conformity with accounting principles generally accepted in the United States.<sup>3</sup>

Historically, audit reports referred simply to generally accepted auditing standards and generally accepted accounting principles. Today, however, a number of nations have their own *generally accepted* standards (principles), and those standards generally differ from one another. To reduce confusion, audit reports issued in the United States now use terms such as "generally accepted auditing standards (United States of America)" or "auditing standards

<sup>3</sup> Auditors sometimes have reporting responsibilities related to other legal and regulatory requirements. For example, for audits performed under *Government Auditing Standards*, the auditors may be required to report on internal control over financial reporting and on compliance with laws, regulations, and other matters. It is when the relevant law or regulation requires or permits the auditors to report within the auditors' report on the financial statements that this becomes relevant. In such a situation, the overall report is divided as described below:

- *Report on Financial Statements*. This heading is added above the introductory paragraph.
- *Report on Other Legal and Regulatory Requirements*. This heading and the related report follow the opinion paragraph on the financial statements.

Note that this treatment is not applicable for emphasis-of-matter or other-matter paragraphs added to an audit report and is not required by the PCAOB.

generally accepted in the United States of America.” A similar modification is made relating to generally accepted accounting principles. For simplicity’s sake, in our text discussion, we often will use the simpler historical terms or their abbreviations “GAAP” and “GAAS.”

Notice that the audit report is signed with the name of the CPA firm, not the name of an individual partner in the firm. This signature stresses that it is the firm, not the individual, that takes responsibility for the audit report. If the CPA is practicing under his or her own name as a sole practitioner, the report is signed with the CPA’s personal signature. In addition, a sole practitioner should use *I* instead of *we* in the audit report.<sup>4</sup>

Also notice the date under the signature. The auditors’ report should not be dated earlier than the date on which the auditors have obtained sufficient appropriate audit evidence to support their opinion on the financial statements. Sufficient appropriate audit evidence has been obtained when all audit documentation has been reviewed, the financial statements (including notes) are prepared, and management has asserted that they have taken responsibility for these financial statements (ordinarily through a representation letter). The date of the audit report is quite significant because the auditors have a responsibility to perform procedures through that date to search for any subsequent events that may affect the fairness of the client’s financial statements (see Chapter 16), and due to requirements relating to changes in documentation that arise after that date (see Chapter 5).

An auditors’ report with an unmodified opinion may be issued only when the auditors have obtained sufficient appropriate audit evidence to conclude that the financial statements, as a whole, are not materially misstated.

## The Auditors’ Standard Report—Public Clients

### LO 17-2

Describe the standard audit report for public entity (issuer) audits.

The following is an example of a standard audit report for audits of public companies.

### Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Southwest Airlines Co.:

We have audited the accompanying consolidated balance sheets of Southwest Airlines Co. as of December 31, 2011 and 2010, and the related consolidated statement of income, stockholders’ equity, and cash flows for each of the three years in the period ended December 31, 2011. These financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to herein present fairly, in all material respects, the consolidated financial position of Southwest Airlines Co. at December 31, 2011 and 2010, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Southwest Airlines Co.’s internal control over financial reporting as of December 31, 2011, based on criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 9, 2012 expressed an unmodified opinion thereon.

*Ernst & Young, LLP*

Dallas, Texas  
February 9, 2012

<sup>4</sup> Section ISA 700 of the *International Standards on Auditing* allows the signature to be that of the audit firm, the personal name of the auditor who directed the audit, or both, as appropriate for the particular jurisdiction. For audits of years ending after December 15, 2016, the personal name of the auditor who directed the audit will ordinarily be required. Also effective for audits of periods ending after December 15, 2016, the International Auditing and Assurance Standards Board (IAASB) will require audit reports of public companies to include a “key audit matters” section. Key audit matters are those matters that, in the auditor’s professional judgment, were of most significance in the audit. For example, for a particular audit, accounting estimates with high estimation uncertainty and unusual transactions, such as those with related parties might be considered key audit matters. The Auditing Standards Board and the Public Company Auditing Standards Board are both considering requiring similar disclosures in audit reports.

There are a number of differences between this PCAOB audit report and the report used for audits of nonpublic companies. The primary differences are that the PCAOB report:

- Includes the words “Registered” in the title.
- References standards of the PCAOB rather than generally accepted auditing standards.
- Includes less detailed discussions of management and auditor responsibilities.
- Includes an additional paragraph indicating that the auditors have also issued a report on the client’s internal control over financial reporting. (For a description of audits of internal control over reporting, see Chapters 7 and 18.)
- Does not include section headings.

We will now turn our attention to modifications of auditors’ standard reports. Although our illustrations are for audit reports of nonpublic companies, they require few or no changes to be used for the PCAOB audit report.

## Expression of an Opinion

The options when expressing an opinion on financial statements may be summarized as being either **unmodified** or **modified** as follows:

### Unmodified Opinions

- *Unmodified opinion—standard report.* This report may be issued only when the auditors have obtained sufficient appropriate audit evidence to conclude that the financial statements, taken as a whole, are not materially misstated and there is no need to add an **emphasis-of-matter paragraph**, an **other-matter paragraph** or to indicate a group audit situation.<sup>5</sup>
- *Unmodified opinion with an emphasis-of-matter paragraph.* An emphasis-of-matter paragraph in an audit report follows the opinion paragraph and is included to refer to a matter that is appropriately presented or disclosed in the financial statements but is being emphasized through the audit report. In certain circumstances, an emphasis-of-matter paragraph is required (e.g., when there is substantial doubt about a company’s ability to continue as a going concern and when the company changes accounting principles). In others, it is included at the auditors’ discretion (e.g., an uncertainty relating to future exceptional litigation, significant transactions with related parties, or unusually important subsequent events).
- *Unmodified opinion with an other-matter paragraph.* An other-matter paragraph in an audit report follows the opinion paragraph (and any emphasis-of-matter paragraph) and refers to a matter *other than* those presented or disclosed in the audited financial statements. The matter is, in the auditors’ judgment, relevant to users’ understanding of the audit, the auditors’ responsibilities, or the auditors’ report. These may arise in a variety of circumstances, including those presented in Chapter 16, relating to other information in documents containing audited financial statements and required supplementary information. Also, as discussed in Chapter 19, an other-matter paragraph is added when financial statements are prepared in accordance with special-purpose frameworks. In this chapter, we discuss other-matter paragraphs used to (1) report on comparative statements when there are predecessor auditors and (2) alert readers about the intended use of an audit report when it is not for general use.
- *Unmodified opinion on group financial statements.* This circumstance involves a situation in which two or more CPA firms are involved in the audit of components of

<sup>5</sup> PCAOB standards use the term “unqualified” rather than “unmodified.” In 2010, the AICPA Auditing Standards Board switched from using “unqualified” to align its terminology with *International Standards on Auditing*.

group financial statements (e.g., the component auditors may audit one subsidiary of an organization structured as a parent company with five subsidiaries). When the audit firm that does the remainder of the audit does not wish to take responsibility for the work of the component auditors, the audit report is modified to divide responsibility between the CPA firms. This situation is unique in that the report alterations do not involve inclusion of an emphasis-of-matter or an other-matter paragraph.

### Modified Opinions

- *Qualified opinion.* A qualified opinion states that the financial statements are presented fairly in conformity with generally accepted accounting principles “except for” the effects of some matter. **Qualified opinions** are issued when the financial statements are materially misstated (“a departure from GAAP”) *or* when the auditors are unable to obtain sufficient appropriate audit evidence on which to base the opinion (“a scope limitation”). In both cases, the likely effects, while **material**, are *not* considered **pervasive**. All significant reasons for the issuance of a qualified opinion should be set forth in a **basis for modification paragraph (explanatory paragraph)** under PCAOB standards) that precedes the opinion paragraph.
- *Adverse opinion.* An adverse opinion states that the financial statements are *not* presented fairly in conformity with generally accepted accounting principles. Auditors issue an adverse opinion when the deficiencies in the financial statements are both material and pervasive. All significant reasons for the issuance of an adverse opinion should be set forth in a basis for modification paragraph that precedes the opinion paragraph.
- *Disclaimer of opinion.* A disclaimer of opinion most frequently is the result of a scope limitation that creates a situation in which the auditors are *unable to obtain sufficient appropriate audit evidence* on which to base the opinion, and they conclude that the possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive. A disclaimer is not an opinion; it simply states that the auditors do not express an opinion on the financial statements. All significant reasons for the issuance of a disclaimer of opinion should be set forth in a basis for modification paragraph that precedes the opinion paragraph. As we discuss later in this chapter, disclaimers may also result from substantial doubt about a client’s ability to continue as a going concern or multiple uncertainties relating to the financial statements.

We structure our discussion of audit reports around the two basic types of opinions just outlined—unmodified and modified opinions. Since several circumstances may result in either an unmodified or a modified opinion (e.g., substantial doubt about going-concern status and uncertainties), we emphasize those circumstances that are encountered most frequently.

## Reports with an Unmodified Opinion and an Emphasis-of-Matter Paragraph

### LO 17-3

Identify the circumstances that result in audit reports with emphasis-of-matter paragraphs and unmodified opinions.

The primary circumstances that result in an audit report with an unmodified opinion but with an emphasis of matter paragraph (or referral to other auditors in a group audit situation) include:

- Substantial doubt about the company’s going-concern status
- Generally accepted accounting principles not consistently applied
- Uncertainties
- Other circumstances that auditors believe should be emphasized (e.g., a major catastrophe, related party transactions, and subsequent events)
- Group audits

In these circumstances, the auditors have to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatement but they decide that additional information should be added to the audit report. The first four bulleted circumstances require an emphasis-of-matter paragraph following the opinion paragraph, which includes a statement that the audit opinion is not modified with respect to the matter.<sup>6</sup> As indicated earlier in this chapter, group audits may lead to modifications of existing paragraphs in the audit report when responsibility is divided between two or more CPA firms.

### Substantial Doubt about a Company's Going- Concern Status

The professional standards require that auditors evaluate whether there is substantial doubt about the client's ability to continue as a going concern for a reasonable period of time, which is defined as not to exceed one year beyond the date of the financial statements being audited. Going-concern status is a significant issue for users of financial statements, because assets and liabilities are normally recorded and classified on the assumption that the company will continue to operate.

The professional standards state that the auditors should consider the results of the procedures performed during the course of the audit to identify conditions or events that, when considered in the aggregate, indicate there could be substantial doubt about the entity's ability to continue as a going concern. For example, when performing risk assessment procedures, the auditors should consider whether there are events or conditions that indicate that there could be substantial doubt about the entity's ability to continue as a going concern. Also, throughout the audit the auditors should remain alert for audit evidence indicating such substantial doubt.

Conditions that may cause the auditors to question the going-concern assumption include negative cash flows from operations, defaults on loan agreements, adverse financial ratios, work stoppages, and legal proceedings. When such conditions or events are identified, the auditors should gather additional information and consider whether management's plans for dealing with the conditions are likely to mitigate the problem. If, after evaluating the information and management's plans, the auditors conclude that the substantial doubt is resolved, they may issue a standard report. If, on the other hand, substantial doubt still exists about the company's ability to continue as a going concern for a period of one year from the balance sheet date, the auditors should add an emphasis-of-matter paragraph to their unmodified opinion or issue a disclaimer of opinion.<sup>7</sup> Including an emphasis-of-matter paragraph with an unmodified opinion is the most frequent resolution.

The following is an example of an emphasis-of-matter paragraph relating to substantial doubt about a company's ability to continue as a going concern (emphasis added):

#### *Emphasis-of-Matter*

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has suffered negative cash flows from operations and has an accumulated deficit, conditions that raise *substantial doubt* about the Company's *ability to continue as a going concern*. Management's plans in regard to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to this matter.

<sup>6</sup> PCAOB standards require that consistency and going-concern emphasis-of-matter paragraphs follow the opinion paragraph of the audit report; other emphasis-of-matter paragraphs may either precede or follow the opinion paragraph. PCAOB standards also do not require a statement concerning the opinion not being modified. (*International Standards of Auditing [ISA]* are consistent with GAAS in this area.)

<sup>7</sup> *The International Standards on Auditing (ISA 570)* state that in rare cases involving multiple material uncertainties that are significant to the financial statements, the auditor may consider it appropriate to issue a disclaimer of opinion. This is consistent with GAAS and PCAOB standards.

Regardless of whether the auditors decide to add an emphasis-of-matter paragraph to a report with an unmodified opinion or to issue a disclaimer of opinion, the auditors should consider the adequacy of financial statement disclosures that relate to the firm's going-concern status. Financial statement disclosures include:

- Pertinent conditions and events giving rise to the substantial doubt and their possible effects.
- Management's evaluation of the significance of the conditions and effect and management's plans for dealing with them.
- Possible discontinuance of operations.
- Information about the recoverability or classification of recorded asset amounts and the amounts and classification of liabilities.

If such disclosures are materially inadequate, a departure from GAAP exists and a qualified or adverse opinion is appropriate.

When conditions and events indicate that there could be substantial doubt about the entity's ability to continue as a going concern, the auditors should document in the working papers the conditions and events and significant management plans. In addition, they should document the auditing procedures performed to evaluate management's plans, the conclusion about whether substantial doubt exists, and their consideration of the adequacy of financial statement disclosures.

Recall that this section applies when there is "substantial doubt" about the client's ability to continue as a going concern. What about the situation in which liquidation of the company is imminent (that is, the company definitely is not a going concern)? In such a case, the liquidation basis of accounting is considered the appropriate basis under generally accepted accounting principles. The auditors' report ordinarily should use an emphasis-of-matter paragraph that states that the company has changed the basis of accounting from the going-concern basis to a liquidation basis. On the other hand, when a client's financial statements follow the going-concern basis of accounting when liquidation is imminent, a departure from GAAP exists.

---

### Generally Accepted Accounting Principles Not Consistently Applied

United States auditing standards for both public and nonpublic companies require that auditors evaluate the client's current period financial statements for consistency of application of accounting principles in relation to prior periods. Which periods should be considered in this evaluation? Both Auditing Standards Board and PCAOB standards base that decision on the periods covered by the auditors' report on the financial statements.

- When the auditors are reporting only on the current period, they should evaluate whether the current-period financial statements are consistent with those of the preceding period, regardless of whether the preceding period is presented.
- When the auditors are reporting on two or more periods, they should evaluate consistency between such periods and the consistency of such periods with the period prior thereto if that prior period is presented with the financial statements being reported upon.

When the client makes a **change in accounting principles**, the nature of, justification for, and effect of the change are reported in a note to the financial statements for the period in which the change is made. The auditors should evaluate the change by determining whether it meets the following four accounting requirements:

1. The newly adopted principle is generally accepted.
2. The method of accounting for the effect of the change is in conformity with GAAP.
3. The disclosures related to the change are adequate.
4. Management has justified that the new accounting principle is preferable.

When the auditors believe that the new principle meets the four requirements, an emphasis-of-matter paragraph is added to the audit report to highlight the lack of consistent application

of acceptable accounting principles; but the opinion remains unmodified.<sup>8</sup> Following is an example of an emphasis-of-matter paragraph that would follow the opinion paragraph:

*Emphasis-of-Matter*

As discussed in Note 5 to the consolidated financial statements, the Company adopted Financial Accounting Standards Board Update No. XXX, *Provide Title*, as of December 31, 20X8. Our opinion is not modified with respect to this matter.

When the auditors believe that the new principle does not meet one or more of the four requirements, a departure from generally accepted accounting principles exists. In such a circumstance, the auditors should issue either a qualified or an adverse opinion.

A client's correction of a material misstatement in previously issued financial statements also results in addition of an emphasis-of-matter paragraph to the audit report. The paragraph is only included in the year of correction and includes a statement that the previously issued financial statements have been restated for correction of a material misstatement and a reference to the entity's disclosure of the correction in the notes to the financial statements.

Among situations that ordinarily *do not* result in an emphasis-of-matter paragraph on consistency are changes in accounting estimates (e.g., changing the life of a fixed asset) and changes in principles with an immaterial effect (even if the effects are expected to be material in the future); absent other circumstances, a standard report may be issued in the year of the change. Finally, because consistency is a between-periods concept, a consistency modification is not appropriate for a company in the first year of its existence.

### Auditor Discretionary Circumstances That Result in an Emphasis-of- Matter Paragraph

While the professional standards require auditors to include an emphasis-of-matter paragraph in the circumstances presented previously, in the following circumstances the auditors may elect to include an emphasis-of-matter paragraph.

*Uncertainties*

Uncertainties are situations in which conclusive audit evidence concerning the ultimate outcome cannot be expected to exist at the time of the audit, since that outcome will occur in the future. While all financial statements are affected to some extent by uncertainties, it is only to those whose outcome is unusually important that auditors consider adding an emphasis-of-matter paragraph: for example, unusually important ongoing litigation or regulatory action in process against the client. The following illustrates an emphasis-of-matter paragraph describing an uncertainty:

*Emphasis-of-Matter*

As discussed in Note X to the financial statements, the company is a defendant in a lawsuit [briefly describe the nature of the litigation consistently with the Company's description in the note to the financial statements]. Our opinion is not modified with respect to this matter.

Adding an emphasis-of-matter paragraph for matters such as the above is at the discretion of the auditors. A major assumption underlying the inclusion of an emphasis-of-matter paragraph is that the matter is adequately disclosed in the notes to the financial statements. The auditors simply choose to emphasize it. As is the case with other emphasis-of-matter paragraphs, a discretionary emphasis paragraph follows the opinion paragraph.

While a report with an unmodified opinion and an emphasis-of-matter paragraph is the most frequent resolution regarding a particularly important uncertainty, there are situations in which a disclaimer may be issued. When multiple uncertainties cause the auditors to conclude that it is not possible to form an opinion on the financial statements as a whole due to the interaction and cumulative possible effects of the uncertainties, a disclaimer may be appropriate.

<sup>8</sup> *International Standards on Auditing* (ISA 706) allow, but do not require, an emphasis-of-matter paragraph relating to a properly accounted for change in accounting principles.

If a matter such as those just described is *not* adequately disclosed in the financial statements, a departure from GAAP exists; as described later in the chapter, either a qualified or an adverse opinion is then appropriate.

#### *Additional Circumstances That May Result in an Emphasis-of-Matter Paragraph*

Auditors also may at their own discretion choose to add an emphasis-of-matter paragraph to a report with an unmodified opinion for other circumstances relating to the financial statements. Examples of such matters include:

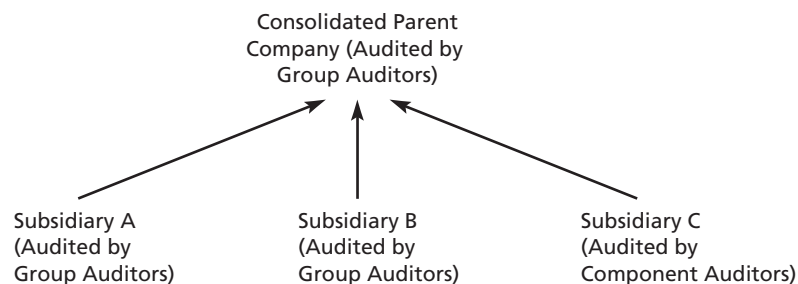

- A major catastrophe that has had, or continues to have, a significant effect on the organization.
- Significant transactions with related parties.
- Unusually important subsequent events.

Note that the matter should relate to the financial statements, not to the audit itself (e.g., adding an emphasis-of-matter paragraph relating to an audit procedure performed would not be appropriate).

## Group Financial Statements

Group financial statements are those of a company that is composed of more than one **component** (e.g., subsidiary). When one CPA firm audits the entire group, no particular audit reporting complications arise. It is when one or more components are audited by **component auditors** other than the **group auditors**<sup>9</sup> that issues arise about the relative responsibilities of the various auditors. For example, consider the following company, composed of a parent company and three subsidiaries:

Except for Subsidiary C, the entire audit is performed by the group auditors. Assume, as is ordinarily the case, that an audit report is required upon the overall consolidated parent

company's financial statements. It is this audit report that is considered in this section.

When component auditors are involved, the group auditors should determine whether sufficient appropriate audit evidence can reasonably be expected to be obtained regarding the overall group controls, the consolidation process, and the financial information of the components. In addition, the group engagement team should obtain an understanding of:

- Whether the component auditors are competent, operate in a regulatory environment with proper oversight, and will comply with all ethical requirements.
- The extent to which the group engagement team will be involved with the component auditors and will be able to obtain necessary information on the consolidation process from the component auditors.

As a part of this process, the group auditors should communicate to the component auditors audit related matters of which they should be aware.

<sup>9</sup> GAAS (ASB AU-C 600) and *International Standards of Auditing* (ISA 600) use the terms "group engagement partner" and "group engagement team"—for simplicity sake, in part of this discussion, we use the term "group auditors." Also, previously, the group auditors were referred to as the "principal auditors" and the component auditors as "other auditors." The terms "principal auditors" and "other auditors" are still used in PCAOB auditing standards (PCAOB 543).

Under GAAS and PCAOB Standards, the group auditors have two basic reporting alternatives:<sup>10</sup>

1. *Make reference to the component auditors.* When the group auditors make reference to the work performed by the component auditors, they are in essence *dividing* responsibility for the engagement among the group and component auditors. Historically, this type of report has often been called a **shared responsibility opinion**, even though it is signed only by the group auditors. When the group auditors decide to make reference to the component auditors, they should perform the procedures described previously in this section and should also read the component's financial statements and the component auditors' report on those statements to identify significant findings and issues.

A shared responsibility report indicates the portion of the engagement performed by the component auditors in terms of dollars or percentages in the *Auditors' Responsibility* section and also refers to the component auditors in the *Opinion* section ("In our opinion, *based on our audit and the report of the other auditors*, the consolidated financial statements referred herein present fairly. . .").<sup>11</sup>

What if the component auditors modify the opinion of their report on the component? Are the group auditors required to modify their opinion on the consolidated financial statements? The answer to this question depends on the *materiality* of the matter. The consolidated financial statements ordinarily will have much larger amounts and totals than those of the component. Matters that were material to the component's financial statements may be quite insignificant to the consolidated entity. To determine whether a qualification is in order, the group auditors must evaluate the materiality of the matter *in relation to the consolidated financial statements*.

2. *Make no reference to the component auditors.* If the group auditors make no reference in their report to the portions of the engagement performed by the component auditors, they assume responsibility for the entire audit. This approach is usually followed when the component auditors are well known or when the group auditors are responsible for hiring the component auditors. Also, when difficulties arise relating to the component auditors' competence or work, the group auditors may decide to audit the component and not refer to the component auditors. If the group auditors elect to make no reference, they will issue the standard auditors' report with no additional wording.

When the group auditors decide not to make reference to the work of the component auditors, they must perform certain additional audit procedures. First, they should evaluate the appropriateness of performance materiality at the component level. The additional required procedures relating to the component depend upon whether that component is considered to be a *significant component*; a significant component is one identified by the group engagement team as having financial significance to the group or, due to its nature, is likely to include significant risks of material misstatement of the group financial statements. Figure 17.1 summarizes the audit work that ordinarily must be performed for components when no reference is made to the component auditors.

Group auditors are never *forced* to rely on the work of component auditors. Instead, they may insist upon *personally* auditing any aspect of the client's operations. If the client refuses to permit them to do so, the auditors may regard this as a **scope limitation** and, depending upon materiality, issue a qualified report or a disclaimer of opinion. As a practical matter, opinions are seldom modified for this reason. Satisfactory arrangements about who will audit the various aspects of a client's business normally will be worked out before the audit begins.

<sup>10</sup> *International Standards on Auditing* (ISA 600) do not permit the audit report to make reference to component auditors unless required by law or regulation.

<sup>11</sup> Another acceptable, although less frequently used, option allows the group auditors to obtain the permission of the component auditors to explicitly use the auditors' name in the audit report. In such circumstances, the component auditors' report must also be presented with the report of the group auditors.

**FIGURE 17.1**  
**Additional Procedures**  
**When Not Making**  
**Reference to the**  
**Component Auditors**

Component Nature	Audit Procedures
Not significant	The group engagement team should perform analytical procedures at the group level. Audit additional components <i>if</i> sufficient appropriate audit evidence has not been obtained.
Significant due to its individual financial significance to the group	<ol style="list-style-type: none"> <li>1. The group auditors or component auditors should perform an audit of the component, adapted as necessary to the needs of the group engagement team, using the materiality of the component.</li> <li>2. The group engagement team should be involved in the risk assessment and should: <ul style="list-style-type: none"> <li>• Discuss with the component auditors or component management the component's business activities of significance to the group.</li> <li>• Discuss with the component auditors the susceptibility of the component to material misstatement.</li> <li>• Review the component auditors' documentation of identified significant risks of material misstatement of the group financial statements.</li> </ul> </li> </ol>
Significant because it is likely to include significant risks of material misstatement of the group financial statements	<ol style="list-style-type: none"> <li>1. The group auditors or the component auditors: <ul style="list-style-type: none"> <li>• Should perform an audit of the component, adapted as necessary to the needs of the group engagement team, using the materiality of the component.</li> <li>• Should audit one or more component account balances, classes of transactions, or disclosures that relate to the significant risks.</li> <li>• Should perform specified audit procedures relating to the likely significant risks of material misstatement of the group financial statements.</li> </ul> </li> <li>2. Requirement 2 above.</li> </ol>

Figure 17.2 summarizes important points related to emphasis-of-matter paragraphs and group audits.

**FIGURE 17.2** Summary of Emphasis-of-Matter Paragraphs and Group Audits

Matter Giving Rise to Emphasis-of-Matter Paragraph	Effect on Audit Report If the Matter Is Properly Presented	Effect on Audit Report If the Matter Is Improperly Presented in Financial Statements
<p><b>Going Concern</b>—Substantial doubt about ability to remain a going concern</p> <p><b>Consistency</b>—GAAP not consistently applied</p> <p><b>Auditor Discretionary</b>—Circumstances in which the auditors may add an emphasis-of-matter paragraph (e.g., an uncertainty, a major catastrophe, significant related party transactions, or unusually significant subsequent events)</p>	<p><i>Unmodified opinion with an emphasis-of-matter paragraph</i> added after the opinion paragraph. (Going concern and uncertainties may also lead to disclaimers of opinion.)</p>	<p>A departure from GAAP is involved and the auditors modify the opinion paragraph to either a qualified or adverse opinion and add a basis for modification paragraph preceding the opinion paragraph.</p>
<b>Group Audits</b>	<p>Unmodified opinion. The component auditors are referred to when the group auditors do not take responsibility for the component auditors' work. If the group auditors take responsibility, no modification of the audit report is necessary.</p>	<p>Not applicable because it is an auditor reporting concern.</p>

## Modified Opinions

### LO 17-4

Identify the circumstances that result in modified audit opinions.

Modified opinions are required in two circumstances:

- *Materially misstated financial statements (i.e., a “departure from GAAP”)*—The auditors conclude that the financial statements as a whole are materially misstated.
- *Inability to obtain sufficient appropriate audit evidence (i.e., a “scope limitation”)*—The auditors are unable to obtain sufficient appropriate audit evidence to conclude that the financial statements as a whole are free from material misstatements (AICPA AU-C 705; PCAOB 508).

Recall from earlier in the chapter the three types of modified opinions: qualified opinions, adverse opinions, and disclaimers of opinion. Figure 17.3 describes the situations in which each type of modified opinion is issued.

As indicated in Figure 17.3, materially misstated financial statements result in either a qualified opinion or an adverse opinion depending on the size and pervasiveness of the misstatement. Similarly, an inability to obtain sufficient appropriate audit evidence leads to either a qualified opinion or a disclaimer opinion based on the *possible effects* on the financial statements of undetected misstatements. In both situations, the decision is based on whether misstatements or possible misstatements are both *material and pervasive*.

In the context of misstatements, *pervasive* is the term used to describe the effects on the financial statements of misstatements (departures from GAAP) or the possible effects on the financial statements of misstatements (scope limitations). Effects of misstatements become pervasive when, in the auditors' judgment, they meet one or more of the following three criteria:

- They are not confined to specific elements, accounts, or items of the financial statements.
- If confined, they represent or could represent a substantial proportion of the financial statements.
- In relation to disclosures, they are fundamental to users' understanding of the financial statements.

When a modified opinion is issued, the report includes a basis for modification paragraph *prior to* the opinion paragraph. The following sections discuss modified opinions (1) for misstated financial statements and (2) for the inability to obtain sufficient appropriate audit evidence.

### Materially Misstated Financial Statements (“Departures from GAAP”)

The auditors sometimes do not agree with the accounting principles used in preparing the financial statements—that is, they believe that the financial statements depart from GAAP. As indicated in Figure 17.3, they should consider the materiality of the effects of any departure from GAAP to determine the appropriate type of audit report to issue. When the effects of the departures are *immaterial*, an unmodified opinion may be issued; when the effects are *material*, the auditors should issue either a qualified opinion or an adverse opinion based on whether the misstatement is considered pervasive.

**FIGURE 17.3**  
Modified Audit Opinions

Nature of Matter Giving Rise to the Modification	Auditors' Judgment about the Pervasiveness of the Effects or Possible Effects on the Financial Statements		
	Not Material (Accordingly, also Not Pervasive)	Material but Not Pervasive	Material and Pervasive
<i>Misstated Financial Statements (Departure from GAAP)</i>	Unmodified	Qualified	Adverse
<i>Inability to Obtain Sufficient Appropriate Audit Evidence (Scope Limitation)</i>	Unmodified	Qualified	Disclaimer

The distinction between the effects of departures from generally accepted accounting principles that are material but not pervasive and those that are material and pervasive is a matter of professional judgment. In the discussions that follow, it will not be practical to present sufficient detail for readers to make these judgments. Therefore, we will either (1) use the terms *material, but not pervasive* and *material and pervasive*, or (2) use terms from the criteria for when a misstatement is pervasive, such as “a substantial proportion of the financial statements” or “fundamental to users’ understanding.”

When the report is qualified for a departure from GAAP, the modification involves adding a basis for modification paragraph immediately above the opinion paragraph and qualifying the opinion paragraph. The opinion section should have a heading indicating the nature of the opinion and include the phrase *except for the effects of the matter(s) described in the Basis for Qualified Opinion paragraph*.<sup>12</sup> The following is an example of basis for modification and opinion paragraphs of an audit report qualified for a departure from generally accepted accounting principles. The report’s other paragraphs would contain standard wording.

*Basis for Qualified Opinion*

The company has excluded from property and debt in the accompanying balance sheets certain lease obligations that, in our opinion, should be capitalized in order to conform with accounting principles generally accepted in the United States of America. If these lease obligations were capitalized, property would be increased by \$15,000,000, long-term debt by \$14,500,000, and retained earnings by \$500,000 as of December 31, 20X8. Additionally, net income would be increased by \$500,000 and earnings per share would be increased by \$1.22 for the year then ended.

*Qualified Opinion*

In our opinion, *except for the effects of not capitalizing certain lease obligations as discussed in the Basis for Qualified Opinion paragraph*, the financial statements referred to above present fairly, in all material respects, the financial position of Wend Company as of December 31, 20X8, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

If the material misstatement is considered pervasive, an **adverse opinion** is appropriate. An adverse opinion is the opposite of an unmodified opinion; it states that the financial statements *do not* present fairly the financial position, results of operations, and cash flows. When the auditors express an adverse opinion, they should include a separate basis for modification paragraph—similar to that of a report with a qualified opinion, as illustrated above (although a pervasive misstatement may require a longer paragraph). An illustration of an adverse opinion paragraph follows:

*Adverse Opinion*

In our opinion, *because of the significance of the matter discussed in the Basis for Adverse Opinion paragraph*, the consolidated financial statements referred to above *do not express fairly* the financial position of Wend Company as of December 31, 20X8, and the results of its operations and its cash flows for the year then ended.

A material misstatement may exist due to the omission of information; that is, disclosures required by GAAP for a fair presentation may have been omitted. In such a circumstance, if, after communicating with those charged with governance, the

<sup>12</sup> *International Standards on Auditing* (ISA 705) follow the same approach. PCAOB standards are similar, but rather than “Basis for Modification Opinion paragraph” the phrase used is “preceding paragraph.” The PCAOB also follows this approach for adverse opinions and disclaimers of opinion.

information is still considered necessary and omitted, the auditors will issue a qualified or adverse opinion based upon the pervasiveness of the resulting misstatement.<sup>13</sup>

The professional standards require the auditors to describe in the basis for modification paragraph the nature of the omitted information and include the omitted information if it is practicable to do so. Practicable, as used here, means that the information is reasonably obtainable from the accounts and records and that in providing the information in the report the auditors do not assume the position of a preparer of the financial statements. For example, the auditors would not be expected to prepare a basic financial statement or segment information and include it in the auditors' report when management omits such information. Also, disclosing the information in the basis of modification paragraph would not be practicable if the information, in the auditors' judgment, would be unduly voluminous in relation to the auditors' report.

Ordinarily, a client that is reluctant to make a particular disclosure would rather disclose the information in a note than have it highlighted in the auditors' report. Therefore, very few auditors' reports actually are qualified because of inadequate disclosure. Instead, the requirements of the professional standards usually convince the client to include the necessary disclosure among the notes to the financial statements.<sup>14</sup>

---

### Inability to Obtain Sufficient Appropriate Audit Evidence (Scope Limitation)

Limitations on the scope of an audit may create a situation in which the auditors are unable to obtain sufficient appropriate audit evidence. Such limitations may occur due to:

- Circumstances beyond the control of the client (e.g., important accounting records were destroyed).
- Circumstances relating to the nature and timing of the auditors' work (e.g., the auditors are hired too late to observe the client's beginning inventory<sup>15</sup>).
- The client (e.g., the client's refusal to allow the auditors to send confirmations to customers).

Client-imposed limitations are very significant since they may have other implications for the audit, such as for the auditors' assessment of fraud risks and consideration of whether to continue the engagement or to withdraw. If management imposes a limitation, the auditors should communicate the limitation to those charged with governance.

When a scope limitation is encountered, the auditors attempt to obtain sufficient appropriate audit evidence by performing alternative procedures. If those procedures provide the required evidence, no report modification is necessary. If they do not, a decision needs to be made about whether a qualified opinion is necessary or whether the possible effects on the financial statements are so pervasive as to require a disclaimer of opinion.

<sup>13</sup> As indicated in footnote 1, GAAP require that when a balance sheet and an income statement are presented, a statement of cash flows should also be presented and its omission is a departure from GAAP. Historically this has led to a qualified opinion, although the current GAAS standards are silent on whether a qualified opinion or an adverse opinion standard should be issued. PCAOB standards, in this case the superseded GAAS standards that were adopted by the PCAOB as interim standards, still recommend a qualified opinion. *International Auditing Standards* do not explicitly address omission of the statement of cash flows.

<sup>14</sup> The Accounting Principles Rule (ET 1.320) of the AICPA *Code of Professional Conduct* recognizes that in unusual circumstances a departure from accounting principles may be justified. However, the FASB does not allow such a departure from authoritative body pronouncements and this type of report is not generally issued. Under a financial reporting framework that allows such a departure, when the auditors agree with such departure, the auditors may issue a report with an unmodified opinion, but must disclose the departure in an emphasis-of-matter paragraph after the opinion paragraph. When the auditors do not agree that the departure is justified, a qualified or an adverse opinion is appropriate. Note that it is very seldom that the auditors would consider such a departure as justified under any financial reporting framework.

<sup>15</sup> Note that, even though this may be the "fault" of the client, it is not considered a limitation imposed by management because the client is not refusing to allow the auditors to perform a procedure that is possible to perform.

If the auditors decide that the possible effects on the financial statements of undetected misstatements, if any, could be material but not pervasive, a qualified opinion is appropriate. The report will include a Basis for Modification Paragraph and a modification of the opinion paragraph as follows (the remainder of the report uses the standard wording):

*Basis for Qualified Opinion*

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at \$20,500,000, or its equity in earnings of that affiliate of \$6,250,450, which is included in net income, as described in Note 8 to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in earnings by other auditing procedures.

*Qualified Opinion*

In our opinion, *except for the possible effects of the matters described in the Basis for Qualified Opinion paragraph*, the financial statements referred to above present fairly, in all material respects, the financial position of XYZ Company as of December 31, 20XX, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Notice in the opinion paragraph that the qualification is worded as being due to the possible effects of the matter(s) on the financial statements, and not to the scope limitation itself.

When the auditors conclude that the possible effects on the financial statements could be both material and pervasive, a disclaimer of opinion is appropriate. A **disclaimer of opinion** is *no opinion*. Auditors issue a disclaimer whenever they are unable to form an opinion or have not formed an opinion as to the fairness of presentation of the financial statements. The following is an example of the paragraphs modified when a disclaimer of opinion is issued:

*Auditors' Responsibility*

Our responsibility is to express an opinion on these financial statements based on conducting the audit in accordance with auditing standards generally accepted in the United States of America. Because of the matter described in the Basis for Disclaimer of Opinion paragraph, however, we were not able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion.

*Basis for Disclaimer of Opinion*

We were unable to obtain audited financial statements supporting the Company's investment in a foreign affiliate stated at \$20,500,000, or its equity in earnings of that affiliate of \$6,250,450, which is included in net income, as described in Note 8 to the financial statements; nor were we able to satisfy ourselves as to the carrying value of the investment in the foreign affiliate or the equity in earnings by other auditing procedures.

*Disclaimer of Opinion*

Because of the significance of the matter described in the Basis for Disclaimer of Opinion paragraph, we have not been able to obtain sufficient appropriate audit evidence to provide a basis for an audit opinion. Accordingly, we do not express an opinion on these financial statements.

### *Scope Limitations versus Uncertainties*

It is important to be able to distinguish between an inability to obtain sufficient appropriate audit evidence (a scope limitation) and an uncertainty. This is because a scope limitation may result in either a qualified opinion or disclaimer of opinion, while an uncertainty may result in a report with an unmodified opinion and an emphasis-of-matter paragraph (or, less frequently, a disclaimer of opinion).

An inability to obtain sufficient appropriate audit evidence (a scope limitation) occurs in situations in which audit evidence should be available and is not—due to circumstances beyond the control of the organization, circumstances dealing with the timing of the auditors' work, or limitations imposed by management. Alternatively, an uncertainty involves a situation that is expected to be resolved at a future date, at which time conclusive audit evidence concerning its outcome would be expected to become available.

Complicating the matter is the fact that a situation involving an uncertainty may also involve a scope limitation. As an example, assume that an uncertainty exists relating to the future outcome of a lawsuit against the company. Also assume that the lawyer engaged by the client who has devoted substantive attention to the matter refuses to provide appropriate information on the uncertainty. Here the lawyer's refusal to reply may result in a lack of sufficient appropriate audit evidence (a scope limitation) relating to the litigation (an uncertainty). The appropriate audit opinion would be either qualified or a disclaimer of opinion.

#### *A Disclaimer Is Not an Alternative to an Adverse Opinion*

A disclaimer cannot be issued when the auditors have formed an opinion on the financial statements. For example, if the auditors have already formed an opinion that the financial statements are materially and pervasively misstated, an adverse opinion is appropriate. A disclaimer of opinion *cannot* be used as a way to avoid expressing an adverse opinion. In fact, even when auditors issue a disclaimer of opinion, they should express in the basis for modification paragraph of their report *any and all material reservations* they have concerning the financial statements. These reservations would include any material departures from generally accepted accounting principles, including inadequate disclosure. In short, the issuance of a disclaimer can never be used to avoid warning financial statement users about problems that the auditors know to exist in the financial statements.

### Summary of Auditors' Reports

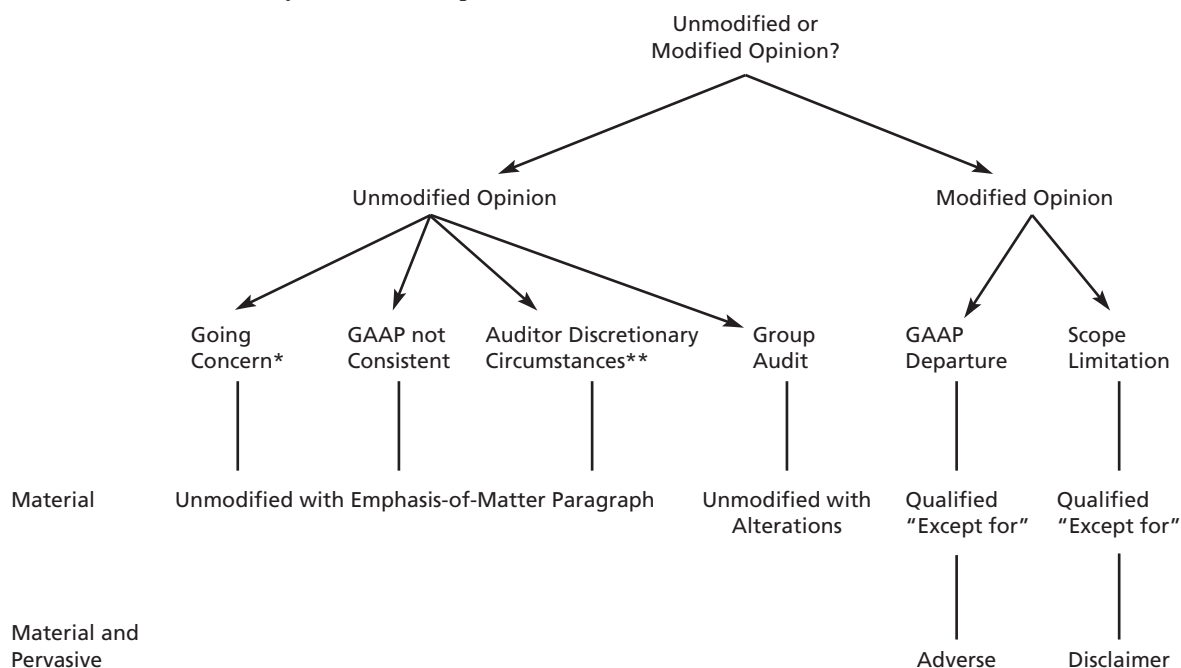

Figure 17.4 summarizes the types of auditors' reports that should be issued under different conditions.

## Additional Reporting Issues

### Two or More Report Modifications

An audit report may be qualified for two or more matters. For example, an audit report may include a modification for a scope limitation and for a departure from generally accepted accounting principles. The wording of such a report would include the appropriate qualifying language and basis for modification for both types of qualifications.

**FIGURE 17.4** Summary of Auditors' Reports

\*The auditors may decide to issue a disclaimer in this situation.

\*\*Examples include an uncertainty relating to the outcome of an unusually important event, a major catastrophe, related party transactions, unusually important subsequent events. Also, note that in circumstances involving multiple uncertainties, the auditors may issue a disclaimer of opinion.

When there are several matters requiring the qualification of an opinion, the auditors should consider the cumulative effects of those matters. If the effect involves material and pervasive known misstatements, an adverse opinion would be appropriate, not a qualified opinion.

When several matters requiring modification of the audit report exist, separate emphasis-of-matter and basis for modification paragraphs will ordinarily refer to each matter. As an example, consider the audit report for a company in extremely weak financial condition and with financial statements that include a material departure from generally accepted accounting principles. The audit report would likely include an emphasis-of-matter paragraph describing substantial doubt about the ability of the company to continue as a going concern, and a basis for modification paragraph and opinion modification relating to the departure from generally accepted accounting principles.

## Reporting on Comparative Financial Statements

### LO 17-5

Describe the auditors' responsibilities for reporting on comparative financial statements.

As indicated previously, many companies present with the current year's financial statements' comparative financial statements for one or more prior years. When comparative financial statements are presented by the client company, the auditors' report should cover the current year's financial statements as well as those for prior periods that were audited by the firm.

The auditors may express different opinions on the financial statements of different years. In addition, auditors should update their reports for all prior periods presented for comparative purposes. *Updating* the report means either re-expressing the opinion originally issued or, depending upon the circumstances, revising the opinion from that originally issued. A different opinion on the prior-period financial statements may be warranted because new information may have come to light that causes the auditors to alter their original opinion. For example, the client may revise previously issued financial statements to correct a departure from GAAP, resulting in a situation in which a qualified opinion is no longer warranted.

In some situations, the current auditors have not audited the prior period financial statements, because those financial statements are either unaudited or audited by predecessor auditors. If the financial statements of prior comparative periods are unaudited, this fact should be indicated on the applicable financial statements and the auditors' report should include a disclaimer of opinion on those statements. If the prior-period financial statements were audited by predecessor auditors, the current (successor) auditors' *opinion* will cover only the period or periods that they have audited. For the financial statements audited by the predecessor auditors, there are two reporting options. First, the report of the predecessor auditors may be *reissued* by them bearing its original date. Before reissuing the report, the predecessor auditors should read the subsequent period financial statements, compare them with the prior-period financial statements, and obtain representation letters from both management and the successor auditors in essence indicating that they are not aware of information that would indicate that the financial statements are incorrect or improper. The second reporting option is to have the successor auditors *refer to the report of the predecessor auditors* by indicating in an other-matter paragraph of the current auditors' report: (1) that the prior-period statements were audited by predecessor auditors, (2) the type of opinion expressed by the predecessor and, if the opinion was modified, the reasons therefore, (3) the nature of any emphasis-of-matter paragraph or other-matter paragraph included in the predecessor auditors' report, and (4) the date of the predecessor auditors' report.

An example of an other-matter paragraph of a report in which the predecessor auditors' report on the prior year was qualified but not presented in the current year is illustrated below, with the explanatory language emphasized.

#### Other-Matter

*The financial statements of XYZ Company for the year ended December 31, 20X7, were audited by a predecessor auditing firm whose opinion, dated March 1, 20X8, on those statements was qualified as being presented fairly except for the effects on the 20X7 statements of the adjustments pertaining to the valuation of inventory, as discussed in Note X to the financial statements.*

## Different Opinions on Different Statements

The professional standards provide an illustration of a situation in which auditors may provide differing opinions on the respective financial statements. The situation involves auditors being retained *after* the client has taken its *beginning* inventory count and the auditors being unable to obtain sufficient appropriate audit evidence relating to that beginning inventory. Here the auditors satisfy themselves as to the amounts in the year-end balance sheet, but they are unable to satisfy themselves as to the statements of income, retained earnings, and cash flows due to the effects on these statements of the beginning inventory. In this situation, the auditors would normally issue an unmodified opinion on the balance sheet and a disclaimer of opinion on the other financial statements.

## Alerting Readers about the Intended Use of the Auditors' Report

Audit reports on a complete set of general-purpose financial statements (e.g., those prepared following GAAP) ordinarily are not restricted as to use or users. Indeed, for public companies the SEC requires this to be the case. However, nothing in GAAS precludes an auditor from “restricting use,” that is indicating that the report is only for use by specified users. As an example, the auditors might indicate that an audit report of a nonpublic company is restricted to use by management, the board of directors, and shareholders. This, however, is seldom done, and when done, it must be a part of the understanding with the client. When a restriction on use is included in an audit report, it is included in an other-matter paragraph that:

- Indicates that the report is intended solely for the information and use of the specified parties indicated in the audit report.
- Identifies the specified parties.
- Indicates that the report is not intended to be used by anyone other than the specified parties.<sup>16</sup>

## Reports to the SEC

Most publicly owned corporations are subject to the financial reporting requirements of the federal securities laws, administered by the Securities and Exchange Commission (SEC). Many of the reports, or *forms*, filed with the SEC include audited financial statements for one or more years. Among the most important of these forms are the following:

- *Forms S-1 through S-11*. These are the “registration statements” for companies planning to issue securities to the public.
- *Forms SB-1 and SB-2*. These are more simplified registration forms for small businesses.
- *Form 8-K*. This is a “current report” filed for any time in which significant events occur for a company subject to the Securities Exchange Act of 1934. If the significant event is a business combination, audited financial statements of the acquired company often are required in the current report. An 8-K report is also used to notify the SEC of a change in auditors.
- *Form 10-Q*. This form is filed quarterly with the SEC by publicly owned companies. It contains unaudited financial information. The company’s auditors perform reviews of this information, but their work is substantially less in scope than an audit.
- *Form 10-K*. This report is filed annually with the SEC by publicly owned companies. The report includes audited financial statements and other detailed financial information. It also includes management and the auditors’ reports on internal controls over financial reporting.

<sup>16</sup> In some circumstances, restriction of particular reports issued by auditors is required. As we discussed in Chapter 7, two reports arising from an audit, communicating internal control related matters and the auditor’s communication with those charged with governance, result in reports alerting readers as to intended use. Also, as discussed in Chapter 19, agreed-upon procedures engagements and audits of special-purpose financial statements prepared in accordance with a contractual or regulatory basis of accounting must be restricted.

Auditors dealing with these reports should be well versed on the requirements of each form, as well as in the provisions of the SEC's Regulation S-X, which governs the form and content of financial statements filed with the various forms.

The SEC, in conjunction with the Public Company Accounting Oversight Board (PCAOB), has the power to enforce a high-quality performance by auditors of issuers (public companies). The federal securities laws provide both civil and criminal penalties for any person, including auditors, responsible for misrepresentations of fact in audited statements filed with the SEC. The auditors' legal liability under the federal securities acts is discussed in Chapter 4.

## Chapter Summary

This chapter explained the different types of reports that auditors issue to indicate the character of their audit and the degree of responsibility they are taking. To summarize:

1. Audit reports in this chapter include those with unmodified opinions and those with modified opinions. A report with an unmodified opinion may be a "standard report" or include an emphasis-of-matter or other-matter paragraph. The three types of modified opinions are qualified, adverse, and disclaimer of opinion.
2. A report with an unmodified opinion and standard in form includes an introductory paragraph, sections describing management and auditor responsibilities, and an opinion section. The report has a title that includes the word *independent*, is addressed to the company whose financial statements are being audited or to its board of directors or stockholders, and is signed with the name of the CPA firm. The public company audit report includes similar but less detailed information on management and auditor responsibilities.
3. An *emphasis-of-matter* paragraph is included following an unmodified opinion paragraph to emphasize matters described in the audited financial statements. Circumstances in which emphasis-of-matter paragraphs are *required* include substantial doubt about a client's ability to remain a going concern and inconsistency in the application of GAAP. Auditors *may choose to add* an emphasis-of-matter paragraph in a variety of circumstances involving matters properly described in the financial statements that they believe merit emphasis (e.g., uncertainties, related party transactions, and unusually important significant events).
4. An *other-matter* paragraph is included following an unmodified opinion paragraph to emphasize something other than information described in the audited financial statements. Other-matter paragraphs are included when required supplementary information is present and sometimes regarding information included in a document with audited financial statements; other-matter paragraphs are also used when an audit report's use is restricted to certain parties. Group financial statements describe the situation when multiple audit firms are involved in an audit and the group auditors do not wish to take responsibility for a component auditors' work.
5. Modified opinions are issued when material departures from GAAP exist or when a scope limitation is involved. Figure 17.2 provides details on the appropriate modifications required for each of these types of reports.
6. When a client presents comparative financial statements for one or more prior periods with the current-period financial statements, the auditors should make certain that all periods are covered by an audit report. Audit reports on prior periods should be updated based on any new information that might affect the auditors' opinion. When predecessor auditors have audited the prior-period financial statements, the current (successor) auditors may summarize the predecessor auditors' opinion in the current-year audit report, or the client may arrange to have the predecessor auditors reissue their audit report.
7. Auditors of publicly held corporations should understand the various reporting requirements of the SEC. The reports filed with the SEC must be in accordance with Regulation S-X, which governs the form and content of the corporation's financial statements.

## Key Terms Introduced or Emphasized in Chapter 17

**Adverse opinion (684)** An opinion that the financial statements *do not* fairly present financial position, results of operations, and cash flows in conformity with generally accepted accounting principles. This situation occurs when the auditors believe that departures from GAAP are both material and pervasive.

**Basis for modification paragraph (676)** A paragraph added to a report with a modified opinion (qualified, adverse, or disclaimer) that provides a description of the matter giving rise to the modification. The paragraph should be placed immediately before the opinion paragraph in the auditors' report and use the heading "Basis for Qualified Opinion," "Basis for Averse Opinion," or "Basis for Disclaimer of Opinion," as appropriate.

**Change in accounting principle (678)** Changes in accounting principles and reporting entities result in an emphasis-of-matter paragraph being added to the auditors' report.

**Comparative financial statements (672)** A complete set of financial statements for one or more prior periods included for comparison with the financial statements of the current period.

**Component (of a financial statement) (680)** An entity or business activity for which group or component management prepare financial information that is required by the applicable financial reporting framework to be included in group financial statements.

**Component auditors (680)** Auditors that audit one or more components of a group of entities that provide consolidated financial statements. In the PCAOB standards, component auditors are referred to as other auditors.

**Disclaimer of opinion (686)** A form of report in which the auditors state that they do not express an opinion on the financial statements.

**Emphasis-of-matter paragraph (675)** A paragraph included in the auditors' report that is required by GAAS or is included at the auditors' discretion, and that refers to a matter appropriately presented or disclosed in the financial statements that, in the auditors' judgment, is of such importance that it is fundamental to users' understanding of the financial statements (e.g., a lack of consistent application of GAAP, substantial doubt about an entity's ability to continue as a going concern).

**Explanatory paragraph (676)** A paragraph inserted in an auditors' report to explain a matter or to describe the reasons for giving an opinion that is other than unmodified. This term is still used in PCAOB standards, but has been replaced in AICPA standards by an emphasis-of-matter paragraph and an other-matter paragraph.

**Financial reporting framework (673)** A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements: for example, accounting principles generally accepted in the United States of America, *International Financial Reporting Standards (IFRS)* issued by the International Accounting Standards Board (IASB), or a special-purpose framework (discussed in Chapter 19). An "applicable financial reporting framework" is the framework adopted by management of the company being audited in a particular situation.

**General-purpose framework (672)** A financial reporting framework designed to meet the common financial information needs of a wide range of users (e.g., GAAP, *International Financial Reporting Standards*).

**Group auditors (680)** Auditors that are responsible for issuing the audit report on a group of companies (e.g., a parent and its subsidiaries). In the PCAOB standards, group auditors are referred to as the principal auditors.

**Material (676)** Being of substantial importance. Significant enough to affect evaluations or decisions by users of financial statements. Information that should be disclosed in order for the financial statements to constitute a fair presentation. Determining what is material involves both quantitative and qualitative criteria.

**Modified opinion (675)** A qualified opinion, an adverse opinion, or a disclaimer of opinion.

**Other-matter paragraph (675)** A paragraph included in the auditors' report that is required by GAAS or is included at the auditors' discretion, and that refers to a matter other than those presented or disclosed in the financial statements that, in the auditors' judgment, is relevant to users' understanding of the audit, the auditors' responsibilities, or the auditors' report.

**Pervasive (676)** A term used, in the context of misstatements, to describe the effects on the financial statements of misstatements or the possible effects on the financial statements of misstatements, if any, that are undetected due to an inability to obtain sufficient appropriate audit evidence. Pervasive effects on the financial statements are those that, in the auditors' judgment:

- Are not confined to specific elements, accounts, or items of the financial statements.
- If confined, represent or could represent a substantial proportion of the financial statements.
- In relation to disclosures, are fundamental to users' understanding of the financial statements.

**Principal auditors (680)** The term previously used by the AICPA to describe the group auditors. This term is still used in PCAOB standards.

**Qualified opinion (676)** A modification of the auditors' standard report, employing a clause such as *except for* to limit the auditors' opinion on the financial statements. A qualified opinion indicates that, except for the effects of some limitation on the scope of the audit or some departure from generally accepted accounting principles, the financial statements are fairly presented.

**Scope limitation (681)** A restriction that prevents the auditors from being able to apply all of the audit procedures that they consider necessary in the circumstances. Scope limitations may be client imposed or may be imposed by other circumstances.

**Shared responsibility opinion (681)** An auditors' report in which the principal auditors decide to share responsibility with other auditors who have audited some segment of the client's business. The sharing of responsibility is done by making reference to the other auditors. Making reference is not, in itself, a qualification of the auditors' report.

**Standard report (671)** An audit report with (1) an unmodified (unqualified) opinion and (2) no additional matters emphasized (e.g., a change in accounting principles) beyond the information required in all audit reports. Note that while this term is frequently used in practice, the AICPA no longer formally uses it in its standards.

**Unmodified opinion (675)** The opinion expressed by the auditors when they conclude that the financial statements are prepared, in all material respects, in accordance with the applicable financial reporting framework (e.g., GAAP).

## Review Questions

- 17-1. Identify the sections of the standard audit report for a nonpublic company.
- 17-2. What is the function of notes to financial statements?
- 17-3. List three primary differences between the audit report for nonpublic entities and the one for public entities.
- 17-4. Comment on whether you agree with the following and why: GAAP and GAAS represent two frequently used financial reporting frameworks.
- 17-5. Provide a list of the types of unmodified and modified audit opinions.
- 17-6. Howard Green, a partner with Cary, Loeb, & Co., and his audit team have completed the audit of Baker Manufacturing. Determine the proper date of the audit report.
  - December 31, 20X0: Baker's year-end.
  - February 15, 20X1: Green completed audit procedures performed at Baker's location.
  - February 19, 20X1: The financial statements were completed.
  - February 20, 20X1: All audit procedures were completed, including the review of all audit documentation.
  - February 25, 20X1: Green signed the audit report.
  - February 26, 20X1: Green delivered the audit report to Baker.
- 17-7. When the current auditors make reference to the work of the component auditors, does this result in expression of a qualified opinion? Explain.
- 17-8. Explain three situations in which the wording of a report with an unmodified opinion might depart from the auditors' standard report.
- 17-9. Wade Corporation has been your audit client for several years. At the beginning of the current year, the company changed its method of inventory valuation from average cost to last in, first out (LIFO). The change, which had been under consideration for some time, was in your opinion a logical and proper step for the company to take. What effect, if any, will this situation have on your audit report for the current year?
- 17-10. What are the two circumstances that result in modified opinions?
- 17-11. Comment on the following: "If the financial statements contain an immaterial departure from generally accepted accounting principles, the auditors issue a qualified opinion; if the financial statements contain a material departure from GAAP, the auditors issue an adverse opinion."
- 17-12. What factors determine whether a misstatement is considered *pervasive*?
- 17-13. Can the client change a set of financial statements to receive an unmodified opinion instead of an opinion qualified as to the adequacy of disclosure? Explain.
- 17-14. Describe the alterations from the standard report when a scope limitation has occurred and the auditors have issued a qualified opinion.

- 17–15. The auditors know that the client's accounting for deferred income taxes is not in accordance with generally accepted accounting principles, but because of a very significant scope limitation they have not been able to determine the amount of the misstatement involved and have not been able to form an opinion on the financial statements taken as a whole. What type of report should they issue?
- 17–16. Why are adverse opinions rare?
- 17–17. Comment on whether you agree with the following: A basis for modified opinion paragraph is the same as a basis for qualified opinion paragraph.
- 17–18. Assume that CPAs are attesting to comparative financial statements. Can the CPAs express differing opinions on the sets of financial statements of two successive years?
- 17–19. Assume that CPAs are attesting to comparative financial statements. Can the CPAs change their report on the prior year's statements?
- 17–20. Describe the reports containing audited financial statements that are customarily filed by a company subject to the reporting requirements of the SEC.

## Questions Requiring Analysis

LO 17-1, 2

- 17–21. An accountant of an audit client made the following statement: It is important to read the notes to financial statements, even though they are presented in technical language and are incomprehensible. Auditors may reduce their exposure to third-party liability by stating something in the notes that contradicts completely what the client has presented in the balance sheet or income statement.

Evaluate the above statement and indicate:

- Areas of agreement, if any.
- Areas of misconception, incompleteness, or fallacious reasoning included in the statement.

LO 17-3

- 17–22. Rowe & Myers audits the financial statements of Dunbar Electronics. During the audit, Ross & Myers engaged Jones & Abbot, a Canadian public accounting firm, as a component auditor to audit Dunbar's wholly owned Canadian subsidiary.

*Required:*

- Should Rowe & Myers make reference to the component auditor in its audit report? Explain.
- Assume that Jones & Abbott issued a qualified report on the Canadian subsidiary. Should Rowe & Myers include the same qualification in its report on Dunbar Electronics?

LO17-3

- 17–23. Lando Corporation is a domestic company with two wholly owned domestic subsidiaries. Michaels, CPA, has been engaged to audit the financial statements of the parent company and one of the subsidiaries and to act as the group auditors. Thomas, CPA, has audited financial statements of the other subsidiary. Michaels has not yet decided whether to make reference to the audit of Thomas.

*Required:*

- What audit procedures should Michaels perform with respect to the component auditor, regardless of whether Michaels decides to make reference to Thomas in the report?
- What modifications are made to the audit report if Michaels decides to make reference to the audit of Thomas?

LO17-3

- 17–24. While performing your audit of Williams Paper Company, you discover evidence that indicates that Williams may not have the ability to continue as a going concern.
- Discuss types of information that may indicate substantial doubt about a client's ability to remain a going concern.
  - Explain the auditors' obligation in such situations.

## Objective Questions

LO 17-4

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 17–25. Multiple Choice Questions

- A material departure from generally accepted accounting principles will result in auditor consideration of:
  - Whether to issue an adverse opinion rather than a disclaimer of opinion.
  - Whether to issue a disclaimer of opinion rather than a qualified opinion.
  - Whether to issue an adverse opinion rather than a qualified opinion.
  - Nothing, because none of these opinions is applicable to this type of exception.

## LO 17-1, 2

b. The auditors' report should be dated as of the date the:

- (1) Report is delivered to the client.
- (2) Auditors have accumulated sufficient evidence.
- (3) Fiscal period under audit ends.
- (4) Peer review of the working papers is completed.

## LO 17-3

c. In an audit report on combined financial statements, reference to the fact that a portion of the audit was performed by a component auditor is:

- (1) Not to be construed as a qualification, but rather as a division of responsibility between the two CPA firms.
- (2) Not in accordance with generally accepted auditing standards.
- (3) A qualification that lessens the collective responsibility of both CPA firms.
- (4) An example of a dual opinion requiring the signatures of both auditors.

## LO 17-1, 2

d. Assume that the opinion paragraph of an auditors' report begins as follows: "With the explanation given in Note 6, . . . the financial statements referred to above present fairly. . ." This is:

- (1) An unmodified opinion.
- (2) A disclaimer of opinion.
- (3) An "except for" opinion.
- (4) An improper type of reporting.

## LO 17-3

e. The auditors who wish to draw reader attention to a financial statement note disclosure on significant transactions with related parties should disclose this fact in:

- (1) An emphasis-of-matter paragraph to the auditors' report.
- (2) A footnote to the financial statements.
- (3) The body of the financial statements.
- (4) The "summary of significant accounting policies" section of the financial statements.

## LO 17-4

f. What type or types of audit opinion are appropriate when financial statements are materially and pervasively misstated?

	Qualified	Adverse
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 17-3

g. Which of the following ordinarily involves the addition of an emphasis-of-matter paragraph to an audit report?

- (1) A consistency modification.
- (2) An adverse opinion.
- (3) A qualified opinion.
- (4) Part of the audit has been performed by component auditors.

## LO 17-2

h. An audit report for a public client indicates that the audit was performed in accordance with:

- (1) Generally accepted auditing standards (United States).
- (2) Standards of the Public Company Accounting Oversight Board (United States).
- (3) Generally accepted accounting principles (United States).
- (4) Generally accepted accounting principles (Public Company Accounting Oversight Board).

## LO 17-2

i. An audit report for a public client indicates that the financial statements were prepared in conformity with:

- (1) Generally accepted auditing standards (United States).
- (2) Standards of the Public Company Accounting Oversight Board (United States).
- (3) Generally accepted accounting principles (United States).
- (4) Generally accepted accounting principles (Public Company Accounting Oversight Board).

## LO 17-3

- j. When the matter is properly disclosed in the financial statements, the likely result of substantial doubt about the ability of the client to continue as a going concern is the issuance of which of the following audit opinions?

	Qualified	Unmodified with Emphasis-of-Matter
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 17-4

- k. A change in accounting principles that the auditors believe is not justified is likely to result in which of the following types of audit opinions?

	Qualified	Unmodified with Emphasis-of-Matter
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 17-3

- l. Which of the following is *least* likely to result in inclusion of an emphasis-of-matter paragraph in an audit report?

- (1) The company is a component of a larger business enterprise.
- (2) An unusually important significant event.
- (3) A decision not to confirm accounts receivable.
- (4) A risk or uncertainty.

- LO 17-3, 4 17–26. For each of the following brief scenarios, assume that you are reporting on a client's financial statements. Reply as to the type(s) of opinion possible for the scenario. In addition:

- Unless stated otherwise, assume the matter involved is material.
- If the problem does not state that a misstatement (or possible misstatement) is pervasive, assume that it may or may not be pervasive (thus, the appropriate reply may include two possible reports).
- Do not read more into the circumstance than what is presented.

Do not consider an auditor discretionary circumstance for modification of the audit report unless the situation explicitly suggests that the auditors wish to emphasize a particular matter. Report Types may be used once, more than once, or not at all.

Situation	Report Types
a. Bowles Company is engaged in a hazardous trade and has obtained insurance coverage related to the hazard. Although the likelihood is remote, a material portion of the company's assets could be destroyed by a serious accident.	1. Unmodified—standard report
b. Draves Company owns substantial properties that have appreciated significantly in value since the date of purchase. The properties were appraised and are reported in the balance sheet at the appraised values (which materially exceed costs) with related disclosures. The CPAs believe that the appraised values reported in the balance sheet reasonably estimate the assets' current values.	2. Unmodified with an emphasis-of-matter paragraph
c. During the audit of Eagle Company, the CPA firm has encountered a significant scope limitation relating to inventory record availability and is unable to obtain sufficient appropriate audit evidence in that area.	3. Qualified
d. London Company has material investments in stocks of subsidiary companies. Stocks of the subsidiary companies are not actively traded in the market, and the CPA firm's engagement does not extend to any subsidiary company. The CPA firm is able to determine that all investments are carried at original cost, but has no real idea of market value. Although the difference between cost and market could be material, it could not have a pervasive effect on the overall financial statements.	4. Adverse
e. Slade Company has material investments in stocks of subsidiary companies. Stocks of the subsidiary companies are actively traded in the market. Management insists that all investments be carried at original costs, and the CPA firm is satisfied that the original costs are accurate. The CPA firm believes that the client will never ultimately realize a substantial portion of the investments because the market value is much lower than the cost; the client has fully disclosed the facts in notes to the financial statements.	5. Disclaimer
	6. Either qualified or adverse
	7. Either qualified or disclaimer
	8. Either adverse or disclaimer

- LO 17-3, 4** 17–27. Use the following to provide the type of audit report the auditors generally should issue in the situations presented below:
1. Unmodified—standard.
  2. Unmodified—with an emphasis-of-matter paragraph.
  3. Qualified.
  4. Adverse.
  5. Disclaimer

*Situation:*

- a. Client-imposed restrictions significantly limit the scope of the auditors' procedures, and they are unable to obtain sufficient appropriate audit evidence. The possible effects on the financial statements of undetected misstatements, if any, could be both material and pervasive.
- b. The auditors decide not to make reference to the report of a component auditor that audited a portion of group financial statements.
- c. The auditors believe that the financial statements have been presented in conformity with generally accepted accounting principles in all respects, except that a loss contingency that should be disclosed through a note to the financial statements is not included. While they consider this a material omission, they do not believe that it pervasively affects the financial statements.
- d. The client has changed from LIFO to FIFO for inventory valuation purposes; the auditors concur with this change. The effect is considered material to the financial statements, although inventory is not a large part of total assets.
- e. The client has changed from LIFO to FIFO for inventory valuation purposes; the auditors do not concur with this change. The effect is considered material and pervasive.

- LO 17-3** 17–28. Auditors report on the consistency of application of accounting principles. Assume that the following list describes changes that have a material effect on a client's financial statements for the current year.

- (1) A change from the completed-contract method to the percentage-of-completion method of accounting for long-term construction contracts.
- (2) A change in the estimated service lives of previously recorded plant assets based on newly acquired information.
- (3) Correction of a mathematical error in inventory pricing made in a prior period.
- (4) A change from direct costing to full absorption costing for inventory valuation.
- (5) A change from deferring and amortizing preproduction costs to recording such costs as an expense when incurred because future benefits of the costs have become doubtful. The new accounting method was adopted in recognition of the change in estimated future benefits.
- (6) A change to including the employer's share of FICA taxes as "Retirement benefits" on the income statement. This information was previously included with "Other taxes."
- (7) A change from the FIFO method of inventory pricing to the LIFO method of inventory pricing.

*Required:*

For each of the above situations, state whether the audit report should include an emphasis-of-matter paragraph on consistency.

- LO 17-3, 4** 17–29. **Simulation**

*Items 1 through 5* present various independent factual situations an auditor might encounter in conducting an audit. For each situation, assume:

- The auditor is independent.
  - The auditor previously expressed an unmodified opinion on the prior year's financial statements.
  - Only single-year (not comparative) statements are presented for the current year.
  - The conditions for an unmodified opinion exist unless contradicted in the factual situations.
  - The conditions stated in the factual situations are material.
  - No report modifications are to be made except in response to the factual situation.
1. In auditing the long-term investments account, an auditor is unable to obtain audited financial statements for an investee located in a foreign country. The auditor concludes that sufficient appropriate audit evidence regarding this investment cannot be obtained.

2. Due to recurring operating losses and working capital deficiencies, an auditor has substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. However, the financial statement disclosures concerning these matters are adequate. The auditor has decided *not* to issue a disclaimer of opinion.
3. A group auditor decides to take responsibility for the work of a component CPA who audited a wholly owned subsidiary of the entity and issued an unmodified opinion. The total assets and revenues of the subsidiary represent 17 percent and 18 percent, respectively, of the total assets and revenues of the entity being audited.
4. An entity changes its depreciation method for production equipment from straight-line to a units-of-production method based on hours of utilization. The auditor concurs with the change, although it has a material effect on the comparability of the entity's financial statements.
5. An entity discloses certain lease obligations in the notes to the financial statements. The auditor believes that the failure to capitalize these leases is a departure from generally accepted accounting principles and, although the possible effects on the financial statements of the misstatements are material, they could not be pervasive.

*Required:*

List A represents the types of opinions the auditor ordinarily would issue and List B represents the report modifications (if any) that would be necessary. Select as the best answer for each situation (items 1 through 6) the type of opinion and alterations, if any, the auditor would normally select. Replies may be selected once, more than once, or not at all.

(AICPA, adapted)

List A: Types of Opinions	List B: Report Alteration
A. Unmodified	H. Add an emphasis-of-matter paragraph—prior to opinion paragraph.
B. Qualified	I. Add an emphasis-of-matter paragraph—after opinion paragraph.
C. Adverse	J. Add a basis for modification paragraph—prior to opinion paragraph.
D. Disclaimer	K. Add a basis for modification paragraph—after opinion paragraph.
E. Qualified or adverse	L. Modifications other than addition of a paragraph.
F. Qualified or disclaimer	M. Issue standard report without alteration.
G. Disclaimer or adverse	

#### LO 17-3, 4, 5 17–30. Simulation\*

For each of the following brief scenarios, assume that you are reporting on a client's financial statements. Reply as to the type(s) of opinion (per below) possible for the scenario. In addition:

- Unless stated otherwise, assume the matter involved is material. If the problem doesn't tell you whether a misstatement *pervasively* misstates the financial statements or doesn't list a characteristic that indicates pervasiveness, two reports may be possible (i.e., replies 6 to 9).
- Do not read more into the circumstances than what is presented.
- Do not consider an auditor discretionary circumstance for modification of the audit report unless the situation explicitly suggests that the auditor wishes to emphasize a particular matter.

#### Types of Opinion

1. Unmodified—standard.
2. Unmodified with an emphasis-of-matter paragraph.
3. Qualified.
4. Adverse.
5. Disclaimer.
6. Unmodified with an emphasis-of-matter paragraph or disclaimer.
7. Qualified or adverse.
8. Qualified or disclaimer.
9. Adverse or disclaimer.
10. Other.

\* Note that this simulation has more parts than one would expect in a particular CPA exam simulation. We present it to provide examples of many types of reporting situations in one problem.

Situation	Report
1. A company has not followed generally accepted accounting principles in the recording of its leases.	
2. A company has not followed generally accepted accounting principles in the recording of its leases. The amounts involved are immaterial.	
3. A company valued its inventory at current replacement cost. Although the auditor believes that the inventory costs do approximate replacement costs, these costs do not approximate any GAAP inventory valuation method.	
4. A client changed its depreciation method for production equipment from the straight-line method to the units-of-production method based on hours of utilization. The auditor concurs with the change.	
5. A client changed its depreciation method for production equipment from the straight-line to a units-of-production method based on hours of utilization. The auditor does not concur with the change.	
6. A client changed the depreciable life of certain assets from 10 years to 12 years. The auditor concurs with the change.	
7. A client changed the depreciable life of certain assets from 10 years to 12 years. The auditor does not concur with the change. Confined to fixed assets and accumulated depreciation, the misstatements involved are not considered pervasive.	
8. A client changed from the method it uses to calculate postemployment benefits from one acceptable method to another. The effect of the change is immaterial this year, but is expected to be material in the future.	
9. A client changed the salvage value of certain assets from 5 percent to 10 percent of original cost. The auditor concurs with the change.	
10. A client uses the specific identification method of accounting for valuable items in inventory, and LIFO for less valuable items. The auditor concurs that this is a reasonable practice.	
11. Due to recurring operating losses and working capital deficiencies, an auditor has substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. The notes to the financial statements adequately disclose the situation.	
12. Due to recurring operating losses and working capital deficiencies, an auditor has substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. The notes to the financial statements do not adequately disclose the substantial doubt situation, and the auditor believes the omission fundamentally affects the users' understanding of the financial statements.	
13. An auditor reporting on group financial statements decides to take responsibility for the work of a component auditor who audited a 70 percent owned subsidiary and issued an unmodified opinion. The total assets and revenues of the subsidiary are 5 percent and 8 percent, respectively, of the total assets and revenues of the entity being audited.	
14. An auditor reporting on group financial statements decides not to take responsibility for the work of a component auditor who audited a 70 percent owned subsidiary and issued an unqualified opinion. The total assets and revenues of the subsidiary are 5 percent and 8 percent, respectively, of the total assets and revenues of the entity being audited.	
15. An auditor was hired after year-end and was unable to observe the counting of the year-end inventory. She is unable to apply other procedures to determine whether ending inventory and related information are properly stated.	
16. An auditor was hired after year-end and was unable to observe the counting of the year-end inventory. However, she was able to apply other procedures and determined that ending inventory and related information are properly stated.	
17. An auditor discovered that a client made illegal political payoffs to a candidate for president of the United States. The auditor was unable to determine the amounts associated with the payoffs because of the client's inadequate record-retention policies. The client has added a note to the financial statements to describe the illegal payments and has stated that the amounts of the payments are not determinable.	
18. An auditor discovered that a client made illegal political payoffs to a candidate for president of the United States. The auditor was unable to determine the amounts associated with the payoffs because of the client's inadequate record-retention policies. Although there is no likelihood that the financial statements are pervasively misstated, they may be materially misstated. The client refuses to disclose the payoffs in a note to the financial statements.	
19. In auditing the long-term investments account of a new client, an auditor finds that a large contingent liability exists that is material to the consolidated company. It is probable that this contingent liability will be resolved with a material loss in the future, but the amount is not estimable. Although no adjusting entry has been made, the client has provided a note to the financial statements that describes the matter in detail.	

Situation	Report
<p>20. In auditing the long-term investments account of a new client, an auditor finds that a large contingent liability exists that is material to the consolidated company. It is probable that this contingent liability will be resolved with a material loss in the future, and this amount is reasonably estimable as \$2,000,000. Although no adjusting entry has been made, the client has provided a note to the financial statements that describes the matter in detail and includes the \$2,000,000 estimate in that note.</p> <p>21. A client is issuing two years of comparative financial statements. The first year was audited by another auditor who is <i>not</i> being asked to reissue her audit report. (Reply as to the successor auditors' report.)</p> <p>22. A client is issuing two years of comparative financial statements. The first year was audited by another auditor who is being asked to reissue her audit report. (Reply as to the successor auditors' report.)</p> <p>23. A client's financial statements follow GAAP, but the auditor wishes to emphasize in his audit report a significant related party transaction that is adequately described in the notes to the financial statements.</p> <p>24. A client's financial statements follow GAAP except that they do not include a note on a significant related party transaction.</p>	

### LO 17-3, 4 17–31. Simulation

Last year, Johnson & Barkley, CPAs, audited the consolidated financial statements of Jordan Company (a nonpublic company) for the year ended December 31, 20X0, and expressed a standard unmodified report.

Johnson & Barkley also audited Jordan's this year's financial statements—for the year ended December 31, 20X1. These consolidated financial statements are being presented on a comparative basis with those of the prior year, and an unmodified opinion is being expressed. Smith, the engagement supervisor, instructed Abler, an assistant on the engagement, to draft the auditors' report. In drafting the report below, Abler considered the following:

- Jordan changed its method of accounting for inventory from LIFO to FIFO in 20X1.
- Larkin & Lake, CPAs, audited the financial statements of BX, Inc., a consolidated subsidiary of Jordan, for the year ended December 31, 20X1. The subsidiary's financial statements reflected total assets and revenues of 2 percent and 3 percent, respectively, of the consolidated totals. Larkin & Lake expressed an unmodified opinion and furnished Johnson & Barkley with a copy of the auditors' report. Johnson & Barkley has decided to assume responsibility for the work of Larkin & Lake insofar as it relates to the expression of an opinion on the consolidated financial statements taken as a whole and has applied the necessary audit procedures.
- Jordan is a defendant in a lawsuit alleging patent infringement. This is adequately disclosed in the notes to Jordan's financial statements, but no provision for liability has been recorded because the ultimate outcome of the litigation cannot presently be determined.

Abler drafted the following audit report:

#### Auditors' Report

We have audited the accompanying consolidated financial statements of Jordan Company and its subsidiaries, which comprise the consolidated balance sheets as of December 31, 20X1 and 20X0, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the financial statements.

#### Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

*Emphasis-of-Matter*

As discussed in Note 2 to the consolidated financial statements, the Company adopted the first-in-first-out method of inventory valuation in 20X1. Our opinion is not modified with respect to this matter.

*Opinion*

In our opinion, the consolidated financial statements referred to here present fairly, in all material respects, the financial position of Jordan Company and its subsidiaries as of December 31, 20X1 and 20X0, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

*Johnson & Barkley, CPAs*

Phoenix, Arizona  
December 31, 20X1

*Required:*

Smith reviewed Abler's draft and stated in the *Supervisor's Review Notes* below that there were deficiencies in Abler's draft. Items 1 through 10 represent the deficiencies noted by Smith. For each deficiency, indicate whether Smith is correct or incorrect in the criticism of Abler's draft.

1. The report's title is incorrect as it should include the word "independent."
2. The report should have an addressee such as the board of directors.
3. There should be a section entitled *Management's Responsibility for the Financial Statements*.
4. The first sentence of the *Auditors' Responsibility* section should state that "Our responsibility is to provide assurance . . .," not "Our responsibility is to express an opinion . . ."
5. The *Auditors' Responsibility* and the *Opinion* sections should both refer to the component auditors.
6. The third paragraph under the *Auditors' Responsibility* section is not required—let's omit it.
7. The emphasis-of-matter paragraph should follow the opinion paragraph.
8. The *Opinion* section should indicate that the principles were consistently applied except for the change in method of inventory valuation.
9. The report should be dated as of the date sufficient appropriate audit evidence has been gathered, not as of year-end.
10. The names of the individual financial statements should be included in the *Opinion* section.

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*.

**LO 17-1, 3**

- 17–32. The auditors' report that follows was drafted by a staff accountant of Williams & Co., CPAs, at the completion of the audit of the financial statements of Lenz Corporation (nonpublic company) for the year ended December 31, 20X1. Assume that there is substantial doubt about the entity's ability to continue as a going concern, and that this doubt is properly disclosed in the financial statements.

### Independent Auditors' Report

To the Board of Directors and Stockholders of Lenz Corporation:

We have audited the accompanying consolidated financial statements of Lenz Corporation and its subsidiaries, and the related notes to the financial statements.

*Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

**Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are in conformity with accounting principles generally accepted in the United States of America.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

**Emphasis-of-Matter**

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the consolidated financial statements, the Company has suffered negative cash flows from operations and has an accumulated deficit that raises substantial doubt about the Company's ability to continue as a going concern beyond a reasonable time. Management's plans in regard to these matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is modified with respect to this matter.

**Opinion**

In our opinion, except for the effects of the matter described in the preceding paragraph, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lenz Corporation and its subsidiaries and the results of their operations and their cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America applied on a basis consistent with that of the preceding year.

- 17–33. Identify deviations from the appropriate nonpublic company audit report. The auditors' report that follows was drafted by a staff accountant of Smith & Co., CPAs, at the completion of the audit of the financial statements of Lenses Co. (a public company) for the year ended December 31, 20X1.

**Report of Registered Public Accounting Firm**

To the Management of Lenses Co.:

We have examined the accompanying consolidated balance sheet of Lenses Co. as of December 31, 20X1 and 20X0, and the related consolidated statement of income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 20X1. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. All PCAOB requirements were met on this audit.

We conducted our audits in accordance with the standards of generally accepted auditing standards (United States). Those standards require that we plan and perform the audit to obtain positive assurance about whether the financial statements are free of all misstatements. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present, in all material respects, the consolidated financial position of Lenses Co. at December 31, 20X1 and 20X0, and the consolidated results of its operations and its cash flows for each of the three years in the period ended

December 31, 20X1, in conformity with U.S. generally accepted accounting principles applied on a consistent basis.

We also have reviewed, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Lenses Co.'s internal control over financial reporting as of December 31, 20X1, based on criteria established in the Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated February 15, 20X2, expressed an unmodified opinion thereon.

*Smith & Co., CPAs*

Dallas, Texas

February 15, 20X2

*Required:*

Identify deviations from the public company standard report.

**LO 17-4**

17–34. Sturdy Corporation (a nonpublic company) owns and operates a large office building in a desirable section of New York City's financial center. For many years, management of Sturdy Corporation has modified the presentation of its financial statement by:

1. Reflecting a write-up to appraisal values in the building accounts.
2. Accounting for depreciation expense on the basis of such valuations.

Wyley, CPA, was asked to audit the financial statements of Sturdy Corporation for the year ended December 31, 20X3. After completing the audit, Wyley concluded that, consistent with prior years, an adverse opinion would have to be expressed because the material misstatements were considered pervasive.

*Required:*

- a. Describe in detail the appropriate content of the basis for modification section of the auditors' report on the financial statements of Sturdy Corporation for the year ended December 31, 20X3. Do not discuss deferred taxes.
- b. Write a draft of the opinion paragraph of the auditors' report on the financial statements of Sturdy Corporation for the year ended December 31, 20X3.

**LO 17-1, 3, 4**

17–35. Roscoe & Jones, Ltd, a CPA firm in Silver Bell, Arizona, has completed the audit of the financial statements of Excelsior Corporation as of, and for, the year ended December 31, 20X1. Findings related to the financial statements and the audit include:

- Excelsior is a nonpublic company that presents only current-year financial statements.
- Roscoe was unable to perform normal accounts receivable confirmation procedures, but alternate procedures were used to satisfy Roscoe as to the validity of the receivables.
- Excelsior Corporation is the defendant in litigation, the outcome of which is highly uncertain. If the case is settled in favor of the plaintiff, Excelsior will be required to pay a substantial amount of cash that might require the sale of certain assets. The litigation and the possible effects have been properly disclosed in Note 11. Roscoe wishes to include discussion of this matter in the audit report.
- During 20X1 Excelsior changed its method of accounting for long-term construction contracts and properly reflected the effect of the change. Roscoe is satisfied with Excelsior's justification for making the change. The change is discussed in Note 12.
- Excelsior issued debentures on January 31, 20X1, in the amount of \$10 million. The funds obtained from the issuance were used to finance the expansion of plant facilities. The debenture agreement restricts the payment of future cash dividends to earnings after December 31, 20X1. Excelsior declined to disclose these data in the notes to the financial statements. Roscoe considers this a material but not pervasive omission.
- Roscoe gathered sufficient appropriate audit evidence as of February 10, 20X2, and planned a report release date of February 16, 20X2.

*Required:*

Consider all facts given and prepare an auditors' report in an acceptable and complete format, incorporating any necessary departures from the standard report.

**LO 17-2, 3, 4**

17–36. Rotter & Co, Ltd, a CPA firm in Silver Bell, Arizona, has completed the audit of the financial statements of Exchecker Corporation as of, and for, the year ended December 31, 20X1. Findings related to the financial statements and the audit include:

- Exchecker is a public company that presents two years of balance sheets and three years of the other financial statements in accordance with SEC reporting requirements.

- During 20X1, Exchecker changed its method of accounting for long-term construction contracts and properly reflected the effect of the change. Rotter is satisfied with Exchecker's justification for making the change. The change is discussed in Note 12.
- Rotter was unable to perform normal accounts receivable confirmation procedures, but alternate procedures were used to satisfy Rotter as to the validity of the receivables.
- Exchecker Corporation is the defendant in litigation, the outcome of which is highly uncertain. If the case is settled in favor of the plaintiff, Exchecker will be required to pay a substantial amount of cash that might require the sale of certain assets. The litigation and the possible effects have been properly disclosed in Note 11. Rotter wishes to include discussion of this matter in the audit report.
- Rotter gathered sufficient appropriate audit evidence as of February 10, 20X2, and planned a report release date of February 16, 20X2.

Required:

Consider all facts given, and prepare an auditors' report in an acceptable and complete format incorporating any necessary departures from the standard report.

## In-Class Team Cases

LO 17-3,  
4, 5

- 17–37. For each of the following brief scenarios, assume that you are the CPA reporting on the client's financial statements. Using the form included with this problem, describe the reporting circumstance involved, the type or types of opinion possible in the circumstance, and the appropriate report alterations. Since more than one report may be possible in several of the circumstances, a second "type of opinion" and "report alteration" row is added for each circumstance. For example, if the problem doesn't tell you whether a misstatement *pervasively* misstates the financial statements or doesn't list a characteristic that indicates pervasiveness, two reports may be possible.

In most cases, you will not need to use the second row. Do not read more into the circumstance than what is presented, and only reply "emphasis-of-matter" in auditor discretionary circumstances such as those suggested in the chapter. Unless stated otherwise, assume that the information presented is material to the financial statements.

Circumstance		Type of Opinion	Report Alteration
GC	Going concern	U Unmodified	EOM Emphasis-of-matter paragraph added
CON	Consistency	Q Qualified	OM Other-matter paragraph added
EMPH	Auditor discretionary emphasis-of-matter	D Disclaimer	BFM Basis for modification paragraph added
GROUP	Group audit	A Adverse	OTHER Other alteration, but no paragraph added
GAAP	Departure from GAAP		NO No alteration
SCOPE	Scope limitation		
COMP	Comparative financial statements		
NONE	No circumstance		

1. Your client has declined to depreciate its assets this year because the depreciation expense would reduce the year's small income to a loss.
2. A client's financial statements follow GAAP, but you wish to emphasize that the client is a subsidiary of Webster Corporation in the audit report.
3. In auditing the long-term investments account of a new client, you are unable to obtain audited financial statements for the investee located in a foreign country. You conclude that sufficient appropriate audit evidence regarding this investment cannot be obtained.
4. Due to a very major lawsuit, you have substantial doubt about a client's ability to continue as a going concern for a reasonable period of time. The financial statement disclosures related to this lawsuit are adequate.
5. You decide not to take responsibility for the work of the component auditors who audited a 70 percent owned subsidiary and issued an unmodified opinion. The total assets and revenues of the subsidiary are 5 percent and 8 percent, respectively, of the total assets and revenues of the entity being audited.
6. You decide to take responsibility for the work of the component auditors who audited a 70 percent owned subsidiary and issued an unmodified opinion. The total assets and revenues of the subsidiary are 5 percent and 8 percent, respectively, of the total assets and revenues of the entity being audited.

7. A company has changed the remaining life of a significant asset from 12 to 10 years. You believe that the change is reasonable.
8. A company changes from FIFO to LIFO for inventory valuation and you concur with the change. The change has an immaterial effect on the entity's financial statements this year, but it is expected to have a material effect in the future.
9. Your client is a defendant in a major lawsuit. It is probable that the company will experience a material loss due to the lawsuit, although it is impossible to calculate the likely amount. The financial statements include a note adequately describing the matter. You decide that a standard report is inappropriate.
10. Predecessor auditors audited last year's financial statements and you audited the current year. You have decided not to ask the predecessor to reissue that audit report. Comparative financial statements are being issued on the two years.

	Circumstance	Type Opinion(s)	Report Alteration
1			
2			
3			
4

10			

**LO 17-3, 4, 5** 17–38. For each of the following brief scenarios, assume that you are reporting on a client's current year financial statements. Reply as to the type or types of opinion possible in the circumstance.

- S Unmodified—standard  
 U Unmodified with emphasis-of-matter or other-matter paragraph  
 Q Qualified  
 D Disclaimer  
 A Adverse

Since more than one report may be possible in several of the circumstances, a second “opinion” column is added for each circumstance. In certain cases, you will not need to use the second column. Do not read more into the circumstance than what is presented, and do not consider the possibility of an auditors' discretionary emphasis-of-matter paragraph being added to the audit report. Unless stated otherwise, assume that the information presented is material to the financial statements. If the situation doesn't tell you whether a misstatement *pervasively* misstates the financial statements or doesn't list a characteristic that indicates pervasiveness, two reports may be possible.

Situation	Opinion	Opinion
1. A company in its first year of existence values its inventory at current replacement cost. Although you believe that the inventory costs do approximate replacement costs, these costs do not approximate any GAAP inventory valuation method. The difference involved is material, but not pervasively material to the financial statements.		
2. Due to recurring operating losses and working capital deficiencies, you have substantial doubt about an entity's ability to continue as a going concern for a reasonable period of time. The notes to the financial statements adequately disclose the substantial doubt situation.		
3. You have discovered that a client made illegal payoffs to a candidate for president of the United States. You are unable to determine the amounts associated with the payoffs because of the client's inadequate record retention policies. The client has added a note to the financial statements to describe this information, and has stated that the amounts of the payments are not determinable.		
4. In auditing the long-term investments account of a new client, you find that a \$2,000,000 contingent liability exists that is material to the consolidated company. It is probable that this contingent liability will be resolved with a material loss in the future. Although no adjusting entry has been made, the client has provided a note to the financial statements that describes the matter in detail and includes the \$2 million estimate.		
5. A client is issuing two years of comparative financial statements. The first year was audited by other auditors who are not being asked to reissue their audit report.		
6. An entity changes its depreciation method for production equipment from the straight-line to the units-of-production method based on hours of utilization. You concur with the change.		
7. A client has changed the method it uses to calculate postemployment benefits from one acceptable method to another acceptable method. The effect of the change is immaterial this year, but is expected to be material in the future.		
8. Component auditors have audited a subsidiary of your client as a part of a group audit. You have decided to rely upon the component auditors' work.		
9. A client omits note disclosure related to significant accounting policies that the auditors believe to be fundamental to users' understanding of the financial statements.		
10. A client does not count its year-end inventory. The auditors are unable to obtain sufficient appropriate audit evidence related to the inventory, and they consider inventory to represent an extremely substantial proportion of the financial statements.		

## Research and Discussion Case

LO 17-3, 4

17–39. Your firm audits Metropolitan Power Supply (MPS). The issue under consideration is the treatment in the company's financial statements of \$700 million in capitalized construction costs relating to Eagle Mountain, a partially completed nuclear power plant.

Seven years ago, MPS began construction of Eagle Mountain, with an original cost estimate of \$400 million and completion expected within five years. Cost overruns were enormous, and construction has been repeatedly delayed by litigation initiated by the antinuclear lobby. At present, the project is little more than 50 percent complete, and construction has been halted because MPS does not have the funds to continue.

If Eagle Mountain is ultimately completed, the state utilities commission will determine the extent to which MPS may recover its construction costs through its rate structure. The commission's rulings are difficult to predict, but it is quite possible that the commission will not allow MPS to include all of the Eagle Mountain construction costs in its "rate base." If Eagle Mountain were abandoned today, none of the construction costs would be recoverable. The related write-off would amount to over 70 percent of MPS's stockholders' equity, but the company would survive.

MPS's management, however, remains committed to the completion of the Eagle Mountain facility. Management has obtained authorization from the company's stockholders to issue \$500 million in bonds and additional shares of common stock to finance completion of the project. If MPS incurs this additional debt and is still not able to make Eagle Mountain fully operational, it is doubtful that the company can avoid bankruptcy. In short, management has elected to gamble—all its chips are riding on Eagle Mountain.

*Required:*

- a.* Discuss the arguments for and against the auditors insisting that MPS begin expensing some portion of the construction costs rather than continuing to accumulate an ever-increasing asset. Indicate the position you would take as the auditor.
- b.* Discuss whether the auditors should modify their report because of uncertainty about whether or not MPS can remain a going concern. Indicate the type of opinion that you would issue. (You need not limit yourself to a “going-concern” modification.)

# Integrated Audits of Public Companies

## LO 18-1

Describe the nature of an integrated audit.

In this chapter, we provide information on **integrated audits** based on the provisions of Public Company Accounting Oversight Board (PCAOB) *Standard No. 5*, “An Audit of Internal Control Over Financial Reporting That Is Integrated with an Audit of Financial Statements.” Throughout this chapter, our emphasis is on presenting (1) details on audits of internal control over financial reporting and (2) information on how financial statement audits are modified when the auditors perform an integrated audit. Although we have referred to integrated audits earlier in the text, in this chapter we emphasize in detail the nature of a public company audit. While an integrated audit involves an enhanced consideration of internal control, the financial statement audit’s various planning, evidence gathering, and reporting procedures remain largely unchanged. Accordingly, the focus of this chapter is on audits of internal control over financial reporting (hereafter, internal control).

## Overview

The Sarbanes-Oxley Act of 2002 requires that, in addition to reporting upon financial statements, auditors of public companies should also report upon internal control over financial reporting (hereafter, internal control). Consistently, PCAOB *Standard No. 5* recognizes this relationship and states that the internal control and financial statement audits should be viewed as integrated.

Section 404 is composed of two distinct sections.<sup>1</sup> **Section 404(a)**, which applies to all public companies, requires that each annual report filed with the Securities and Exchange Commission include an internal control report prepared by management in which management acknowledges its responsibility for establishing and maintaining adequate internal control and provides an assessment of internal control effectiveness as of the end of the most recent fiscal year. **Section 404(b)**, which applies to public companies with a market capitalization in excess of \$75,000,000, requires the CPA firm to audit internal control and express an opinion on the effectiveness of internal control. While the emphasis of this chapter is on the auditors’ responsibility under Section 404(b), we will begin with an overview of management’s responsibility.

<sup>1</sup> While we emphasize Section 404 in this chapter, we also incorporate information from Section 103, which requires auditor reporting on internal control. In addition, other sections of the Sarbanes-Oxley Act are also relevant to the overall area of audits of financial statements. Section 302 requires each of a company’s principal executives and financial officers to certify the financial and other information contained in the company’s quarterly and annual reports. These certifications must indicate that, based on the officer’s knowledge, the financial statements and other financial information included in the report fairly present, in all material respects, the financial condition and results of operations of the company as of, and for, the period presented in the report. Section 906 includes a similar certification requirement but amends the Federal Criminal Code and explicitly sets forth possible criminal penalties for certifications that do not comply with the requirements.

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 18-1** Describe the nature of an integrated audit.
- LO 18-2** Discuss management’s responsibility for reporting on internal control as required by the Sarbanes-Oxley Act of 2002.
- LO 18-3** Describe the auditors’ responsibility for reporting on internal control through integrated audits as required by the Public Company Accounting Oversight Board.
- LO 18-4** Present the auditors’ approach to analyzing internal control when performing an integrated audit.
- LO 18-5** Explain how findings relating to the audits of internal control and the financial statements may affect one another.
- LO 18-6** Discuss circumstances that require auditors to modify their report on internal control.

## Management's Responsibility for Internal Control

### LO 18-2

Discuss management's responsibility for reporting on internal control as required by the Sarbanes-Oxley Act of 2002.

Management has always been responsible for maintaining effective internal control. However, the **Sarbanes-Oxley Act of 2002** increases management's responsibility for demonstrating that controls are effective. As operationalized by the Securities and Exchange Commission (SEC), management is required to:

- Accept responsibility for the effectiveness of internal control.
- Evaluate the effectiveness of internal control using suitable control criteria.
- Support the evaluation with sufficient evidence.
- Provide a report on internal control.

Management's report and the auditors' opinion must be included in Form 10-K, the annual report filed with the SEC. The Sarbanes-Oxley Act requires management to perform the above steps in a meaningful manner to support its report. While the exact wording of the report is left to management's discretion, Section 404(a) of the Sarbanes-Oxley Act requires the report to:

- State that it is management's responsibility to establish and maintain adequate internal control.
- Identify management's framework for evaluating internal control.
- Include management's assessment of the effectiveness of the company's internal control over financial reporting as of the end of the most recent fiscal period, including a statement as to whether internal control over financial reporting is effective.
- Include a statement that the company's auditors have issued an audit report on management's assessment.

### Management's Evaluation Process and Assessment

For most SEC registrants, passage of Sarbanes-Oxley resulted in a one-time major project of evaluating and improving internal control to allow both management and the auditors to conclude that the company's internal control is effective. Then, for each subsequent year's reporting, the analysis is updated. The overall process is one of identifying the significant controls and testing their design and operating effectiveness.

The project is performed either by the company itself or by the company assisted by consultants—often personnel from a CPA firm that does not audit the company's financial statements. The company's external auditing firm may provide only limited assistance to management to avoid a situation in which its assessment is in essence part of management's assessment, as well as its own. That is, the CPA firm performing the audit should not create a situation in which management relies in any way on the CPA firm's assessment in making its own assessment.

As a starting point, the Securities and Exchange Commission, which provides operational guidance for implementing the Sarbanes-Oxley requirements, has adopted the following definition for internal control:

Internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and affected by the company's board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

1. Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
2. Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
3. Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Comparison of Control  
Deficiency, Significant  
Deficiency, and Material  
Weakness Definitions

Deficiency	Severity	Does Existence Result in Required Modification of Management's Assessment and Auditors' Report?
<b>Control Deficiency</b>	Not directly considered in definition	Only if it is a material weakness
<b>Significant Deficiency</b>	Less severe than a material weakness	No
<b>Material Weakness</b>	Reasonable possibility of a material misstatement	Yes

**FIGURE 18.2**  
Levels of Severity of  
Control Deficiencies

Management's report must be based on the preceding definition of internal control and must result from an evaluation using an accepted "control framework." Although not required, the control framework ordinarily used is the *Internal Control–Integrated Framework*, created by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The COSO framework (revised 2013), discussed in detail in Chapter 7, is the internal control framework commonly used in audits of financial statements.

To perform its evaluation and make its assessment,<sup>2</sup> management must understand the concepts of control deficiency, significant deficiency, and material weakness—concepts originally presented in Chapter 7 of this text, although the latter two terms are defined differently for purposes of an integrated audit. A **control deficiency** exists when the design or operation of a control does not allow management or employees, in the normal course of performing their functions, to prevent or detect misstatements on a timely basis.

A **material weakness** is a control deficiency, or combination of control deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A reasonable possibility exists when the likelihood is either "reasonably possible" or "probable" as those terms are used in *FASB ASC 450-20 "Loss Contingencies."*

A **significant deficiency** is a control deficiency, or a combination of control deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

Figures 18.1 and 18.2 illustrate relationships among deficiencies, significant deficiencies, and material weaknesses.

<sup>2</sup> The "evaluation" or "evaluation process" refers to the methods and procedures management implements to comply with the requirements. The "assessment" is the disclosure required in management's report on internal control discussing any material weaknesses and management's assessment of the effectiveness of internal control.

In evaluating the significance of identified deficiencies, both quantitative and qualitative factors are considered. Quantitative factors address the potential amount of loss. Qualitative factors include consideration of the nature of the accounts and assertions involved and the possible future consequences of the deficiency. Chapters 6 and 16 of this text include discussions of qualitative factors affecting materiality judgments.

Additionally, the consideration of a control deficiency should also include analysis of whether a **compensating control** exists to either prevent or detect the possible misstatement. For example, assume a company has a deficiency in control over cash disbursements. The compensating control of reconciliation of cash accounts by a competent individual who is otherwise independent of the cash function might make the likelihood of not detecting a significant misstatement less than reasonably possible. Therefore, while a deficiency might exist, it might not be a significant deficiency or a material weakness due to the existence of a compensating control.

Management must identify the significant financial statement accounts in order to evaluate the controls over major classes of transactions. **Major classes of transactions** are those that materially affect significant financial statement accounts—either directly through entries in the general ledger or indirectly through the creation of rights or obligations that may or may not be recorded in the general ledger.

The overall objective of management's evaluation of internal control is to provide it with a reasonable basis for its annual assessment as to whether there are any material weaknesses in internal control as of the end of the fiscal year. How does management go about achieving this objective? The SEC guidance is structured about two broad principles—(1) evaluating the design of controls to identify controls and risks and (2) evaluating the operation of the controls. This is consistent with the internal control coverage throughout the text—first consider the design and then the operating effectiveness of controls.

#### *Evaluating Design Effectiveness of Controls*

The evaluation process begins with identifying and assessing the risks to reliable financial reporting. Management then considers whether it has controls placed in operation (implemented) that are designed to adequately address those risks. Management ordinarily uses a top-down approach in which it begins with the identification of entity-level controls and works down to detailed controls only to the extent necessary. For example, if management determines that a control within the company's period-end financial reporting process (an entity-level control) is designed to adequately address the risk of a material misstatement of interest expense, management may not need to identify any additional controls related to interest expense. When additional assurance is needed, consideration of additional controls becomes necessary. Since the process auditors go through is similar, we discuss this in greater detail later in the chapter.

#### *Evaluating Operating Effectiveness of Internal Control*

Management then evaluates operating effectiveness of controls in those areas that pose a high risk to reliable financial reporting. Evidence on operating effectiveness is obtained from tests of controls and from ongoing monitoring activities related to the controls. Tests of controls are similar to those performed by financial statement auditors as described in detail in Chapter 7. Ongoing monitoring includes activities that provide information about the operation of controls. This information is obtained, for example, through assessments made by employees, assessments made by management (referred to as *self-assessment* procedures), and the analysis of performance measures designed to track the operation of controls (e.g., budgets).

#### *Documentation*

A required part of management's evaluation process is appropriate documentation of internal control. The documentation often occurs throughout the entire evaluation

**FIGURE 18.3**  
**Management Report on**  
**Internal Control**

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Carver Company's internal control system was designed to provide reasonable assurance to the company's management and board of directors regarding the preparation and fair presentation of published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even a system determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. [Note: *This paragraph is not required.*]

We assessed the effectiveness of the company's internal control over financial reporting as of December 31, 20X4. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control—Integrated Framework*. Based on our assessment, we believe that, as of December 31, 20X4, the company's internal control over financial reporting is effective based on those criteria.

Carver Company's independent auditors have issued an audit report on our assessment of the company's internal control over financial reporting. This report appears on page XX.

*John Hankson*

Chief Financial Officer

process. Virtually all of the documentation tools included in Chapters 7 and 8 of this text are relevant for both management's evaluation and the external auditors' audit of internal control.

### Reporting

Management's evaluation process culminates with the issuance of management's report on internal control, which includes management's assessment. If management believes that no material weaknesses exist at year-end, it is able to issue a report concluding that the company maintained effective internal control over financial reporting. An illustration of such a report is included in Figure 18.3. In the next section, we will describe the auditors' process for evaluating and reporting on internal control.

## The Auditors' Responsibility for Reporting on Internal Control in PCAOB Audits

### LO 18-3

Describe the auditors' responsibility for reporting on internal control through integrated audits as required by the Public Company Accounting Oversight Board.

The auditors' objective in an audit of internal control is to express an opinion on the company's internal control over financial reporting. To meet this objective, the auditors must plan and perform the audit to obtain reasonable assurance about whether material weaknesses exist as of the date specified in management's assessment. Evidence is gathered on both the design and operating effectiveness of internal control as of the date specified in management's assessment—normally the last day of the company's fiscal year. The audit may be viewed as consisting of the following five stages.

1. Plan the engagement.
2. Use a top-down approach to identify controls to test.
3. Test and evaluate design effectiveness of internal control.
4. Test and evaluate operating effectiveness of internal control.
5. Form an opinion on the effectiveness of internal control.

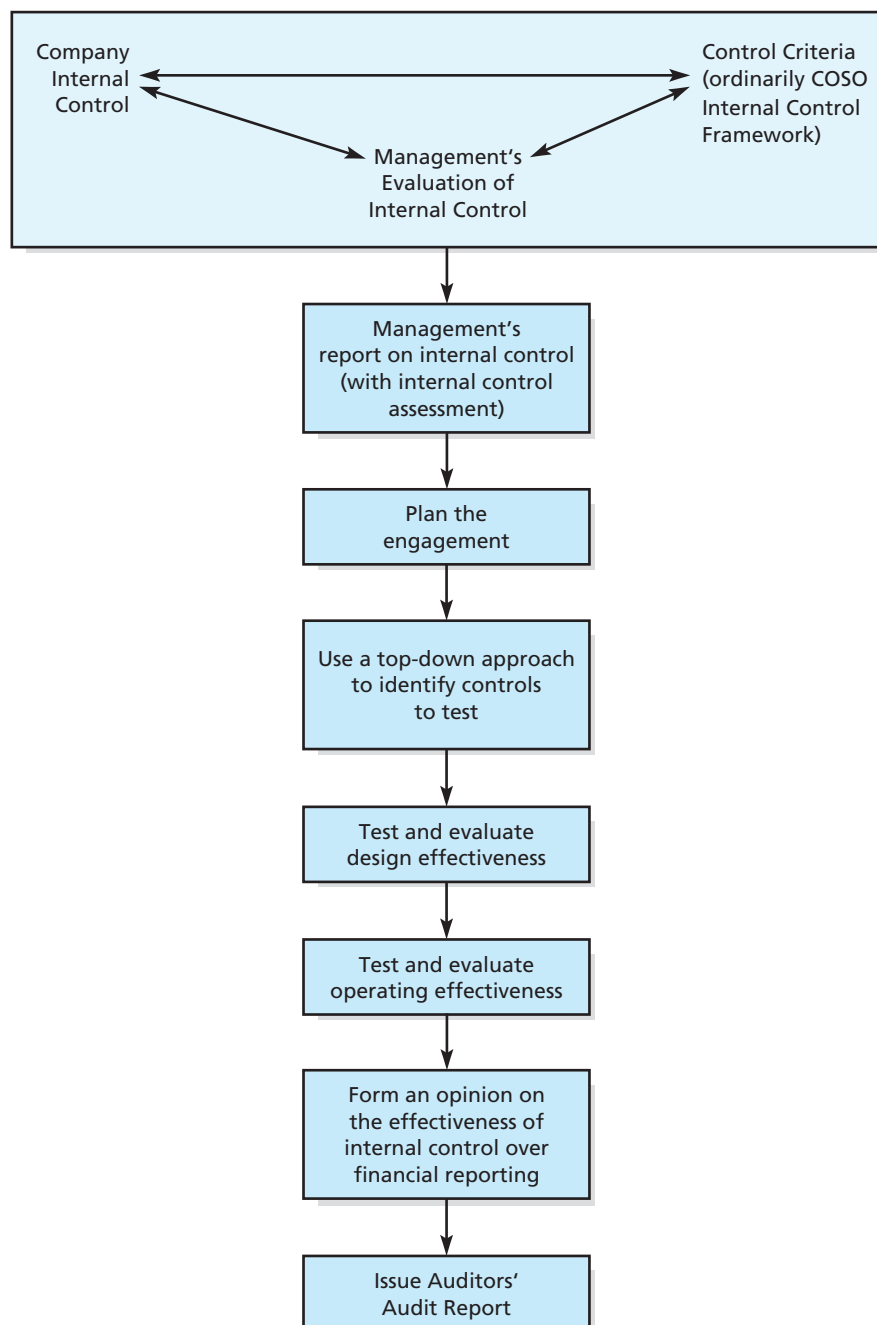

## Plan the Engagement

### LO 18-4

Present the auditors' approach to analyzing internal control when performing an integrated audit.

As indicated in Figure 18.4, the auditors first plan the engagement. Efficient planning requires coordination with the financial statement audit. For purposes of both audits, the auditors consider matters related to the client's industry, regulatory matters, the client's business, and any recent changes in the client's operations. The auditors' knowledge of a client's internal control at the planning stage of the engagement will differ significantly depending upon the nature of the client and the auditors' experience with that client, and this in turn will affect the scope of the auditors' procedures. For example, when the auditors have previously performed audits of the client, the auditors begin the integrated audit with more information than in a circumstance in which the company is a new audit client. Accordingly, they only have to perform procedures to update their knowledge.

**FIGURE 18.4**  
An Audit of Internal Control over Financial Reporting

There is a subtle difference between the auditors' consideration of internal control for the audit of internal control as compared to their consideration of internal control in an audit of financial statements. In the audit of internal control, the focus is on whether internal control is effective at a point in time—the **as of date**—which is ordinarily the last day of the client's fiscal period. To express the internal control opinion, the auditors must obtain sufficient evidence on the effectiveness of controls at the as of date. By itself, this would involve performing tests of controls for a period that is usually significantly less than the entire year. On the other hand, in a financial statement audit the consideration of internal control is performed to help plan the audit and to assess control risk for the entire financial statement period. Therefore, the auditors must perform tests of controls of transactions occurring throughout the year to meet the objective of obtaining sufficient evidence to support the opinion on internal control and assess control risk. This distinction is discussed in more detail later in this chapter.

When planning and performing the audit of internal control, the auditors should take into account the results of the financial statement fraud risk assessment. Specifically, the auditors should identify and test controls that address the risk of fraud, including management override of other controls. These controls include those over:

- Significant unusual transactions, particularly those reported late in the period and those related to the period-end financial reporting process.
- Related party transactions.
- Significant management estimates.
- Incentives for management to falsify or inappropriately manage financial results.

When planning and performing the audit of internal control, the auditors should also recognize internal control differences between small and large clients. Often these differences are related to the degree of complexity of their operations. For example, when the auditors are auditing a small company, many control objectives may be accomplished through daily interaction of senior management and other company personnel rather than through formal policies and procedures. Because of the extensive involvement of senior management in performing controls and the period-end financial reporting process, the auditors of a small company should realize that controls to prevent management override are even more important than it is for a large company. Accordingly, for example, while detailed oversight by the audit committee may be an important control for most companies, it may be particularly important for a small company.

---

### Use a Top-Down Approach to Identify Controls to Test<sup>3</sup>

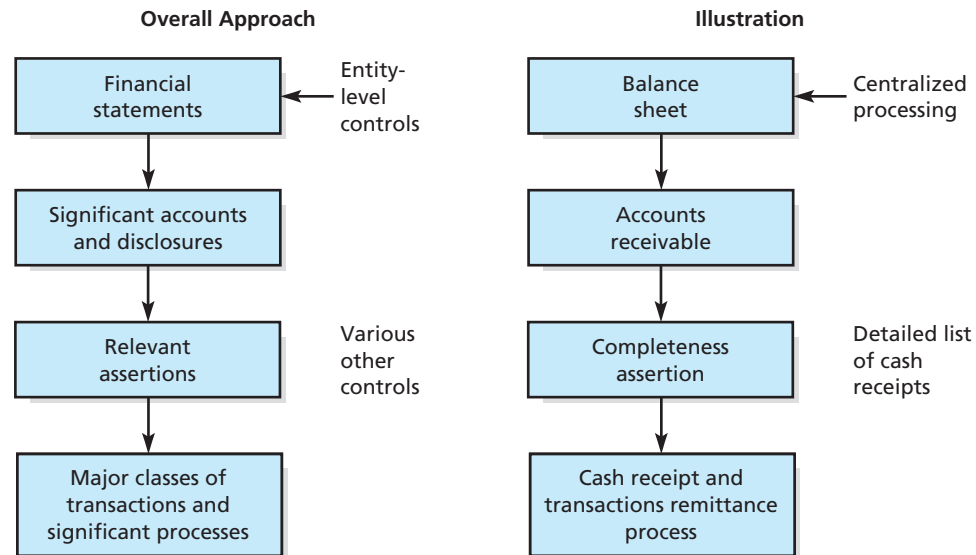

Figure 18.4 indicates that the auditors use a top-down approach to identify controls to test. What is a “top-down” approach? As indicated in Figure 18.5, the “top-down” approach starts at the top—the financial statements and entity-level controls—and links the financial statement elements and entity-level controls to significant accounts, relevant assertions, and to the major classes of transactions. The goal is to focus on testing those controls that are most important to the auditor's conclusion on internal control, while avoiding those that are less important.

#### *Entity-Level Controls*

Entity-level controls often are those included in the control environment or monitoring components of internal control. For example, the portions of the control environment dealing with integrity and ethical values, oversight by the board of directors, and appropriate assignment of authority and responsibility have a pervasive effect on internal control. Also, information technology general controls over program development, program changes, and computer controls over processing have a pervasive effect in that they help ensure that specific controls over processing are operating effectively. The pervasiveness of entity-level

<sup>3</sup> This terminology is used in PCAOB *Standard No. 5*. This stage corresponds to obtaining an understanding of internal control in a financial statement audit.

**FIGURE 18.5**  
**A Top-Down Approach**  
**to Testing Internal**  
**Control**

controls distinguishes them from other controls that are designed to achieve the specific objectives. As an example of a control that is not an entity-level control, consider control of requiring accounting for all shipping documents. This control activity is aimed primarily at assuring the completeness of recorded sales and does not have the pervasive effect of an entity-level control.

Entity-level controls relating to audit committee effectiveness, fraud, and the period-end financial reporting process are particularly emphasized in *Standard No. 5*. The audit committee is particularly important since an effective audit committee exercises oversight responsibility over both financial reporting and internal control. Indeed, ineffective audit committee oversight by itself is regarded as a strong indication that a material weakness in internal control exists.

PCAOB *Standard No. 5* also emphasizes the need for controls specifically intended to address the risk of fraud. These controls range from entity-level control environment controls, such as an appropriate tone at the top, corporate codes of conduct, and an effective antifraud program, to control activities, such as the reconciliation of cash accounts. Figure 18.6 provides examples of antifraud programs and elements.

The period-end financial reporting process (often referred to as “financial statement close”) is also very significant. The period-end process involves the procedures used to enter transaction totals into the general ledger through the end of the financial statement reporting process. Auditors should thoroughly evaluate this process, including the manner in which financial statements are produced, the extent of information technology involved, who participates from management, the locations involved, and the types of adjusting entries and oversight by appropriate parties.

In considering entity-level controls, the auditors should be aware that controls may have either an indirect or a direct effect on the likelihood of misstatement. Controls with an indirect effect on the likelihood of misstatement might affect the auditors’ decisions about the other controls that the auditors select for testing, as well as the nature, timing, and extent of procedures the auditors perform on other controls. For example, a positive tone at the top of the organization may lead to more effective lower level control performance, yet it does not have a direct effect on the likelihood of misstatement for any particular assertion. Such a control might allow the auditors to decrease the testing of other lower level controls.

Controls with a direct effect on the likelihood of misstatement operate at varying levels of precision. Some of these controls might be designed to identify possible breakdowns in lower level controls and operate at a level of precision that would allow auditors to reduce, but not eliminate, the testing of other controls. As an example, a monitoring control that detects only relatively large misstatements may fall into this category. When such a control is operating effectively, it might allow the auditor to reduce, but not eliminate, the testing of other controls.

**FIGURE 18.6**  
Entity-Level Antifraud  
Programs and Elements

Antifraud Program or Element	Strong Indicator of Significant Deficiency
Management accountability	Senior management conducts ineffective oversight of antifraud programs and controls.
Audit committee	Audit committee passively conducts oversight. It does not actively engage the topic of fraud.
Internal audit	Inadequate scope of activities. Inadequate communication, involvement, and interaction with the audit committee.
Code of conduct/ethics	Nonexistent code or code that fails to address conflicts of interest, related party transactions, illegal acts, and monitoring by management and the board. Ineffective communication to all covered persons.
"Whistleblower" program*	No program for anonymous submissions. Inadequate process for responding to allegations of suspicions of fraud. Whistleblower program significantly defective in design or operation.
Hiring and promotion procedures	Failure to perform substantive background investigations for individuals being considered for employment or promotion to a position of trust.
Remediation	Failure to take appropriate and consistent remedial actions with regard to identified significant deficiencies, material weaknesses, actual fraud, or suspected fraud.

\* A program for handling complaints and for accepting confidential submissions of concerns about questionable accounting, auditing, and other matters (e.g., hotlines).

Other entity-level controls that have a direct effect on the likelihood of misstatement might be designed to operate at a level of precision that would adequately prevent or detect material misstatements to one or more relevant assertions. Such controls may allow the auditor to omit testing additional controls relating to that risk. Monitoring controls that identify relatively small misstatements may fall into this category. Note, however, that this area has been controversial as some have asked how frequently such controls actually exist, and thus allow the elimination of testing of controls beneath "the top."

#### *Significant Accounts and Disclosures*

As shown in Figure 18.5, the auditors should obtain an understanding of **significant accounts** and disclosures. An account is significant if there is a reasonable possibility that it could contain a misstatement that, individually or when aggregated with others, has a material effect on the financial statements, considering both the risks of understatement and overstatement. The assessment should be made without giving any consideration to the effectiveness of internal control. Factors that the auditors consider in deciding whether an account is significant include:

- Size and composition.
- Susceptibility of loss due to errors or fraud.
- Volume of activity, complexity, and homogeneity of individual transactions.
- Nature of the account.
- Accounting and reporting complexity.
- Exposure to losses.

- Possibility of significant contingent liabilities.
- Existence of related party transactions.
- Changes from the prior period.

#### *Identifying Relevant Financial Statement Assertions*

Once they have determined the significant accounts and disclosures, the auditors must determine which financial statement assertions are relevant to the significant accounts: (1) existence or occurrence; (2) completeness; (3) valuation or allocation; (4) rights and obligations; and/or (5) presentation and disclosure. Relevant assertions for an account are those that have a meaningful bearing on whether the account is presented fairly. For example, valuation may be very relevant to determining the amount of receivables, but it is not ordinarily relevant to cash unless currency translation is involved.

#### *Obtaining a Further Understanding of Likely Sources of Misstatement*

To further understand the likely sources of potential misstatements, auditors should understand the flow of transactions related to the relevant assertions. This understanding allows the auditors to identify points within the company's processes where a material misstatement could arise and to identify the controls to prevent or detect these misstatements.

Throughout the text (e.g., Chapter 6, Chapters 11–16), we have discussed the concept of transaction cycles. Transaction cycles (also referred to as classes of transactions) are those transaction flows that have a meaningful bearing on the totals accumulated in the company's significant accounts and, therefore, have a meaningful bearing on relevant assertions. Consider a company whose sales may be initiated by customers either through the Internet or in a retail store. These two types of sales may be viewed as representing two major classes of transactions within the sales process.

Although not explicitly discussed in PCAOB *Standard No. 5*, it is helpful to classify transactions by *transaction type*—routine, nonroutine, or accounting estimates. **Routine transactions** are for recurring activities, such as sales, purchases, cash receipts and disbursements, and payroll. **Nonroutine transactions** occur only periodically; they generally are not part of the routine flow of transactions and include transactions such as counting and pricing inventory, calculating depreciation expense, or determining prepaid expenses. **Accounting estimates** are activities involving management's judgments or assumptions, such as determining the allowance for doubtful accounts, estimating warranty reserves, and assessing assets for impairment.

Throughout the audit of internal control, auditors must be concerned about all three transaction types. However, the auditors must be aware that the unique nature of nonroutine transactions and the subjectivity involved with accounting estimate transactions make them particularly prone to misstatement unless they are properly controlled.

To understand the likely sources of potential misstatements and as a part of selecting the controls to test, the auditors should:

- Understand the flow of transactions;
- Verify points within the company's processes at which a misstatement could arise that could be material;
- Identify the controls management has implemented to address these potential misstatements; and
- Identify the controls management has implemented to prevent or detect on a timely basis unauthorized acquisition, use, or disposition of the company's assets that could result in a material misstatement.

Figure 18.7 provides an illustration of the relationships among significant accounts, processes, and transaction types emphasizing inventory processes; it presumes one major class of transactions for each process.

**FIGURE 18.7** Relationships among Processes, Transaction Types, and Significant Accounts

Example Processes	Transaction Types	Examples of Significant Accounts								
		Cash	Accounts Receivable	Allowance for Doubtful Accounts	Inventories	Inventory Reserves	Prepaid	Property, Plant, & Equipment	Other Accounts	Stockholders' Equity
Financial statement close	Nonroutine	X	X	X	X	X	X	X	X	X
Cash receipts	Routine	X	X						X	
Cash disbursements	Routine	X							X	
Payroll	Routine									
Inventory costing (CGS)	Routine	X			X					
Estimate purchase commitments	Estimation								X	
Estimate excess and obsolete inventory	Estimation					X				
Lower-of-cost-or-market calculation	Estimation					X				
LIFO calculation	Nonroutine					X				
Physical inventory count	Nonroutine					X				
Accounts receivable and sales	Routine		X							

Source: Adapted from Ernst & Young, *Evaluating Internal Control: Considerations for Documenting Controls at the Process, Transaction, or Application Level*, 2003.

### Selecting Controls to Test

The auditors should test those controls that are important to their conclusion about whether the company's controls sufficiently address the risk of misstatement for each relevant assertion. It is not necessary to design tests of all controls. For example, tests of **redundant controls** (those that duplicate other controls) need not be designed when tests of the related control are planned, unless redundancy itself is a control objective. The auditors may decide to design tests of preventive controls, detective controls, or a combination of both for the various assertions and significant accounts. Preventive controls have the objective of preventing errors or fraud from occurring; detective controls have the objective of detecting errors or fraud that has already occurred. Effective internal control generally involves "levels" of controls composed of a combination of both preventive and detective controls. Some controls are **complementary controls** in that they work together to achieve a particular control objective. When tests are being performed related to that control objective, the complementary controls should be tested.

A question that arises when a client has multiple locations is: Should the auditors design and perform tests at all locations? The answer is no. In determining the locations at which to perform tests of controls, the auditor should assess the risk of material misstatement to the financial statements of each location and base the amount of testing on the degree of risk.

### Performing Walk-throughs

While not required, performing walk-throughs may frequently be the most effective way to obtain an understanding of the likely sources of misstatement. A **walk-through** involves literally tracing a transaction from its origination through the company's

information system until it is reflected in the company's financial reports. Walk-throughs provide the auditors with evidence to:

- Verify that they have identified points at which a significant risk of misstatement to a relevant assertion exists.
- Verify their understanding of the design of controls, including those related to the prevention or detection of fraud.
- Evaluate the effectiveness of the design of controls.
- Confirm whether controls have been placed in operation (implemented).

Because much judgment is required in performing a walk-through, the auditors should either perform walk-throughs themselves or supervise the work of others who provide assistance to them (e.g., internal auditors).

While performing walk-throughs, the auditors ask those involved to describe their understanding of the processing involved and to demonstrate what they do. In addition, follow-up inquiries should be made to help identify abuse of controls or indicators of fraud. Examples of such follow-up inquiries include:

- What do you do when you find an error?
- What kind of errors have you found?
- What happened as a result of finding the errors, and how were the errors resolved?
- Have you ever been asked to override the process or controls? If yes, why did it occur and what happened?

---

### **Test and Evaluate Design Effectiveness of Internal Control over Financial Reporting**

The auditors test the design effectiveness of controls by determining whether the company's controls, if operating properly, satisfy the company's control objectives and can effectively prevent or detect errors or fraud that could result in material misstatements. The procedures performed here include a combination of inquiry of appropriate personnel, observation of the company's operations, and inspection of relevant documentation. Figure 18.8 provides an example of control objectives, risks, and controls using the COSO framework. The auditors specifically consider whether the controls, if functioning, would reduce the risks to an appropriately low level.

---

### **Test and Evaluate Operating Effectiveness of Internal Control over Financial Reporting**

Tests of the operating effectiveness of a control determine whether the control functions as designed and whether the person performing the control possesses the necessary authority and qualifications. In deciding how to design tests of operating effectiveness, the auditors must focus on the nature, timing, and extent of the tests.

#### *Nature of Tests of Operating Effectiveness*

Tests of controls, in the order of increasing persuasiveness, include a combination of inquiries of appropriate personnel, inspection of relevant documents, observation of the company's operations, and reperformance of the application of controls. For example, to evaluate whether the second control objective in Figure 18.8, the accurate and complete recording of invoices, is achieved, the auditors might use generalized audit software to inspect electronic documents to determine that no gaps exist in the sequence of shipping documents. Also, *Standard No. 5* states that the auditors should vary the exact tests performed when possible to introduce unpredictability into the audit process.

Evaluating responses to inquiries represents a particular challenge in that the responses may range from formal written inquiries (e.g., representation letters) to informal oral inquiries. Because of the possibility of misrepresentation or misunderstanding of the responses, inquiry alone does not provide sufficient evidence to support the operating effectiveness of a control. Thus, auditors should substantiate the responses to inquiries by performing other procedures, such as inspecting reports or other documentation relating to the inquiries.

**FIGURE 18.8** Process: Accounts Receivable

Control Objective	Risks	Controls
1. Ensure that all goods shipped are accurately billed in the proper period.	Missing documents or incorrect information  Improper cutoff of shipment at the end of a period	<ul style="list-style-type: none"> <li>• Use standard shipping or contract terms.</li> <li>• Communicate nonstandard shipping or contract terms to accounts receivable department.</li> <li>• Identify shipments as being before or after period end by means of a shipping log and prenumbered shipping documents.</li> </ul>
2. Accurately record invoices for all authorized shipments and only for such shipments.	Missing documents or incorrect information	<ul style="list-style-type: none"> <li>• Prenumber and account for shipping documents and sales invoices.</li> <li>• Match orders, shipping documents, invoices, and customer information, and follow through on missing or inconsistent information.</li> <li>• Mail customer statements periodically and investigate and resolve disputes or inquiries by individuals independent of the invoicing function.</li> <li>• Monitor number of customer complaints regarding improper invoices or statements.</li> </ul>
3. Accurately record all authorized sales returns and allowances and only such returns and allowances.	Missing documents or incorrect information  Inaccurate input of data	<ul style="list-style-type: none"> <li>• Authorization of credit memos by individuals independent of accounts receivable function.</li> <li>• Prenumber and account for credit memos and receiving documents.</li> <li>• Match credit memos and receiving documents and resolve unmatched items by individuals independent of the accounts receivable function.</li> <li>• Mail customer statements periodically and investigate and resolve disputes or inquiries by individuals independent of the invoicing function.</li> </ul>
4. Ensure continued completeness and accuracy of accounts receivable.	Unauthorized input for nonexistent returns, allowances, and write-offs	<ul style="list-style-type: none"> <li>• Review correspondence authorizing returns and allowances.</li> <li>• Reconcile accounts receivable subsidiary ledger with sales and cash receipts transactions.</li> <li>• Resolve differences between the accounts receivable subsidiary ledger and the accounts receivable control account.</li> </ul>
5. Safeguard accounts receivable records.	Unauthorized access to accounts receivable records and stored data	<ul style="list-style-type: none"> <li>• Restrict access to accounts receivable files and data used in processing receivables.</li> </ul>

Source: Adapted from *Internal Control—Integrated Framework, Evaluation Tools*.

### *Timing of Tests of Controls*

Tests of controls should be performed over a period of time sufficient to determine whether, as of the date specified in management's report, the controls were operating effectively. The auditors are aware that some controls operate continuously (e.g., controls over routine transactions, such as sales), while others operate only periodically (e.g., controls over nonroutine transactions or events, such as the preparation and analysis of monthly or quarterly financial statements). For controls that operate only periodically, it may be necessary to wait until after the date of management's report to test them; for example, controls over period-end financial reporting normally operate only after the date of management's report. The auditors' tests can be performed only at the time the controls are operating.

### *Extent of Tests of Controls*

PCAOB *Standard No. 5* requires the auditors to obtain sufficient evidence about the effectiveness of controls for all relevant assertions related to all significant accounts. This means that the auditors must design procedures to provide a high level of assurance

## LO 18-5

Explain how findings relating to the audits of internal control and the financial statements may affect one another.

### *Relationship between Tests of Controls Performed for the Internal Control Audit and Those Performed for the Financial Statement Audit*

Are the types of tests of controls performed for an internal control audit the same as those performed for a financial statement audit? May the evidence from tests performed for an internal control audit be used for the financial statement audit? While the answer to both of these questions is yes, the auditors should consider the differences in the objectives of the tests.

The objective of tests of controls in an audit of internal control is to obtain evidence about the effectiveness of controls to support the auditors' opinion on whether management's assessment of the effectiveness of internal control, taken as a whole, is fairly stated as of a point in time. Accordingly, to express this opinion the auditors should obtain evidence about the effectiveness of controls over all relevant assertions for all significant accounts and disclosures in the financial statements.

The objective of tests of controls for a financial statement audit is to assess control risk. If the auditors decide to assess control risk at less than the maximum, they are required to obtain evidence that the relevant controls operated effectively during the entire period upon which they plan to place reliance on those controls. However, the auditors are not required to assess control risk at less than the maximum for all assertions.

How may these two different approaches for tests of controls be reconciled in an integrated audit? PCAOB *Standard No. 5*, for purposes of the internal control audit, allows the auditors to obtain evidence about operating effectiveness at different times throughout the year—provided that the auditors update those tests or obtain other evidence that the controls still operated effectively at the end of the year. Thus, although the timing for issuing the internal control report will not ordinarily require tests from throughout the year, the integrated nature of the two audits suggests that testing should be spread throughout the year.

The requirements of *Standard No. 5* have had the effect of pushing auditors to perform financial statement audits using the systems approach—an approach with heavy reliance on internal control evidence. In essence, since extensive tests of controls are required for each significant account for the internal control audit, the auditors should have significant evidence about the effectiveness of internal control for the financial statement audit. The auditors generally must merely extend the tests to cover the financial statement period in order to assess control risk at a low level for purposes of the financial statement audit.

### *Effect of Tests of Controls on Financial Statement Audit Substantive Procedures*

Historically, to enhance audit efficiency and effectiveness, auditors often have used a substantive audit approach that is not acceptable for integrated audits. Auditors have traditionally relied primarily (or completely) on evidence from substantive procedures rather than testing controls in audit areas when a substantive approach was considered the most cost-effective approach. To illustrate, when only a financial statement audit is being performed, auditors often rely heavily upon substantive procedures to audit areas such as property, plant, and equipment; investments; and long-term debt. Since auditors must now report on the effectiveness of internal control, approaches limiting the testing of controls are not acceptable.

Historically, another efficiency that has developed in financial statement audits is minimizing the testing of controls aimed at **preventive controls** (e.g., transaction level controls), and emphasizing the testing of **detective controls** (e.g., various types of reconciliations and exception reports). When auditors express an opinion on internal control, the auditors are more likely to use an approach that includes testing of both preventive and detective controls.

Since an integrated audit requires tests of controls for all major accounts and relevant assertions, circumstances in which controls are found to be effective will lead to a decreased scope of substantive procedures as compared to a situation in which tests of controls have revealed an ineffective system or a situation in which tests of controls have not been performed. However, when significant deficiencies or material weaknesses have been identified, the auditors should obtain assurance that such deficiencies have not resulted in undetected material misstatements. As an example, if controls over the recording of revenues are considered ineffective, the auditors should determine whether the audit procedures designed into their audit program must be modified to obtain more evidence about the fairness of revenue.

## Illustrative Case

### Using Attributes Sampling to Consider Control Deficiencies

It is possible to use statistical attribute sampling (presented in Chapter 9) to consider control deficiency seriousness. Consider a control over authorization of sales transactions:

- 1% = Deviation rate in the auditors' sample
- 6% = Achieved upper deviation rate
- 5% = Risk of assessing control risk too low

If one further assumes that \$3,000,000 of the transaction type occurred, the auditor may estimate that \$180,000

(6%  $\times$  \$3,000,000) worth of transactions may not have been properly approved. That is, there is at least a reasonable possibility that \$180,000 in transactions was not properly approved.

If one assumes that \$180,000 is material, after considering both quantitative and qualified factors, the deficiency represents a material weakness. Alternatively, if it is not considered quantitatively material, an auditor must judgmentally determine whether it represents a significant deficiency that should be communicated to the audit committee. Note, however, that the auditors must also take into account qualitative considerations.

The extensive level of controls testing performed during an integrated audit leads to the question of whether substantive tests may be omitted completely in areas in which controls have been found to operate effectively. This is not acceptable. Regardless of the assessed level of control risk, the auditors must perform substantive procedures for all relevant assertions related to all significant accounts and disclosures.

#### *Effect of Financial Statement Substantive Procedures on the Audit of Internal Control*

We have shown that the audit of internal control may affect the scope of substantive procedures performed for the financial statement audit. Alternatively, the results of substantive procedures may affect the audit of internal control. The findings obtained while performing substantive procedures in the financial statement audit may provide evidence of the effectiveness or ineffectiveness of internal control over financial reporting. For example, identification of a material misstatement in the financial statements is considered indicative of at least a significant deficiency in internal control. Additional examples of substantive procedures findings that might affect the internal control audit are those relating to illegal acts, related party transactions, the reasonableness of accounting estimates, and the client's overall selection of accounting principles.

## Form an Opinion on the Effectiveness of Internal Control over Financial Reporting

### LO 18-6

Discuss circumstances that require auditors to modify their report on internal control.

In forming an opinion on internal control over financial reporting, the auditors evaluate all evidence, including:

1. The results of their evaluation of the design,
2. The results of tests of the operating effectiveness of controls,
3. Negative results of substantive procedures performed during the financial statement audit, and
4. Any identified control deficiencies.

An unqualified audit opinion may be issued when no material weaknesses in internal control have been identified as existing at the as of date (year-end) and when there have been no restrictions on the scope of the auditors' work. The auditors may issue separate reports on the financial statements and internal control or a combined report. Figure 18.9 is an example of a separate report on internal control.

One or more material weaknesses in internal control result in an adverse opinion.<sup>4</sup> Scope limitations may result in either a disclaimer or withdrawal from the engagement depending on the extent of the limitation.

<sup>4</sup> Notice that this is different from reports on audits of financial statements. In an audit of financial statements, a departure from generally accepted accounting principles results in either a qualified opinion or an adverse opinion based on materiality.

## Illustrative Case

### Internal Control Audit Deficiencies

A recent PCAOB analysis of audits of internal control revealed that at the time the auditors issued their audit reports, 15% of the reports on internal control failed to obtain sufficient audit evidence to support its opinion on the effectiveness of internal control. The most frequent deficiencies included audit firm failures to:

- Identify and sufficiently test controls that are intended to address the risks of material misstatements.
- Sufficiently test the design and operating effectiveness of management review controls to monitor the results of operations (e.g., monthly comparisons of budget and actual results, comparisons of other metrics such as profit margins, and quarterly balance sheet reviews).
- Obtain sufficient evidence to update the results of tests of controls from an interim date to the client's year end.
- Sufficiently test system-generated data and reports that support important controls.
- Sufficiently perform procedures regarding the use of the work of others (e.g., that of its own IT specialist auditors).
- Sufficiently evaluate identified control deficiencies and consider their effect on both the financial statement audit and the audit of internal control.

Determining whether deficiencies have been identified and, if so, the likelihood and potential amount of misstatement is key to identifying the proper opinion to issue. If no deficiencies have been identified and no scope limitations are involved, an unqualified opinion is appropriate.

#### *Evaluating Deficiencies*

The auditors must evaluate whether identified control deficiencies, individually or in combination, are significant deficiencies or material weaknesses. This involves a consideration of both quantitative and qualitative factors.

When a deficiency has been identified, the auditors will consider whether any other controls effectively mitigate the risk of potential misstatement and create a situation in which the deficiency is not significant or, at least, does not constitute a material weakness. Earlier in this chapter, we used the example of a weakness in cash disbursements that was mitigated by the compensating control of reconciliation of the bank account by an individual otherwise independent of the cash function. Such a compensating control might cause the auditors to alter their assessment of a deficiency—reducing it from one that otherwise would be considered significant (or a material weakness) to one that is simply a control deficiency.

In evaluating the potential amount of misstatement related to a control deficiency, the auditors should consider not only the misstatements identified, but also the amount that could occur with a reasonable possibility. Although there are various possible approaches to this evaluation, one is to directly consider whether a reasonable possibility exists that a material amount of misstatement could occur. If that is the case, the deficiency is a material weakness. Alternatively, if the deficiency is less severe than a material weakness, yet important enough to merit the attention by those responsible for oversight of the company's financial reporting (ordinarily the audit committee), the deficiency represents a significant deficiency.

The auditors must also consider qualitative factors when evaluating materiality, as is the case with financial statement audits. Examples of qualitative factors include whether the weakness relates to related party transactions and whether there are changes in account characteristics in relation to the prior year. Chapter 6 presents additional information on qualitative factors that are used by the auditors. In essence, the auditors should attempt to determine what a prudent official in the conduct of his or her own affairs would consider a significant deficiency and a material weakness.

**FIGURE 18.9** Report with Standard Unqualified Opinion on Internal Control over Financial Reporting**Report of Independent Registered Public Accounting Firm**

To the Audit Committee and Stockholders of Carver Company:

*[Introductory paragraph]*

We have audited Carver Company's internal control over financial reporting as of December 31, 20X8, based on criteria established in *Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)*. Carver Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying [title of management's report]. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audits.

*[Scope paragraph]*

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

*[Definition paragraph]*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

*[Inherent limitations paragraph]*

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

*[Opinion paragraph]*

In our opinion, Carver Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on criteria established in *Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)*.

*[Explanatory paragraph]*

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the balance sheets of Carver Company as of December 31, 20X8 and 20X7, and the related statements of income, shareholders' equity and comprehensive income, and cash flows for each of the three years for the period ended December 31, 20X8, of Carver Company. Our report, dated February 12, 20X9, expressed an unqualified opinion.

*Willington & Co., CPAs*

Bisbee, Arizona, United States of America  
February 20X9

**FIGURE 18.10** Abstract of Report with Adverse Opinion on Internal Control over Financial Reporting

(Paragraphs 1–4 and the final paragraph are identical to Figure 18.9 standard unqualified report)

*[Explanatory paragraph]*

A material weakness is a control deficiency, or a combination of control deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness was identified and is described in management's assessment of internal control. That material weakness relates to [describe the material weakness, including its actual and potential effect on the financial statements].

*[Opinion paragraph]*

In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, Carver Company has not maintained effective internal control over financial reporting as of December 31, 20X8, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

While a material weakness in internal control can arise in a wide variety of situations, PCAOB *Standard No. 5* provides the following indicators of material weaknesses:

- Identification of fraud, whether or not material, on the part of senior management.
- Restatement of previously issued financial statements to reflect the correction of a material misstatement.
- Identification by the auditors of a material misstatement in circumstances that indicate that the misstatement would not have been detected by the company's internal control.
- Ineffective oversight of the company's external financial reporting and internal control by the company's audit committee.

*Correcting a Material Weakness*

Recall that the audit report is modified for material weaknesses that exist at the as of date (year-end). Consider a situation in which four months prior to year-end management identifies a material weakness. If management corrects this weakness prior to year-end, can the auditors issue an unqualified opinion on internal control? Yes, but only if the auditors have sufficient evidence to provide reasonable assurance that the new control is operating effectively. Obtaining such evidence is much easier for controls that operate frequently, in contrast to those that operate only monthly or quarterly (e.g., financial statement close). All in all, the timing of the identification of the material weakness is very important. For example, if the material weakness is not identified until after year-end, an adverse opinion must be issued even if the weakness is corrected: The control did not operate effectively on the date of management's report.

## Audit Report Modifications

*Existence of a Material Weakness*

A material weakness in internal control that exists at year-end results in the issuance of an adverse opinion. When expressing an adverse opinion, the auditors' report must define a material weakness, indicate that one has been identified, and refer to the description of it in management's report. Figure 18.10 provides an example of an adverse opinion.

*Scope Limitations*

If a restriction on the scope of the audit is imposed by the circumstances, the auditors should withdraw from the engagement or disclaim an opinion. Earlier we discussed the situation in which the auditors identify a material weakness and management takes steps to correct that material weakness prior to year-end. If the auditors are unable to obtain sufficient evidence that the new controls are effective for a sufficient period of time, they will issue a disclaimer of opinion on internal control.

**FIGURE 18.11** Circumstances Affecting Auditors' Opinion on Internal Control

Circumstance	Auditors' Opinion
<b>Material Weakness Exists</b>	Adverse
<b>Material Weakness Existed during Year, System Changed prior to the As of Date</b>	
Auditors test new system and material weakness eliminated	Unqualified
Auditors do not have sufficient time to test new system	Treat as scope restriction
<b>Scope Restriction*</b>	<b>Disclaimer or Withdraw from Engagement</b>
<b>Management's Report on Internal Control Is Incomplete or Improperly Presented</b>	
Report does not acknowledge a material weakness identified by the auditor	Adverse
<b>Other Issues</b>	Unqualified (but with an explanatory paragraph)

\* If the auditors intend to issue a disclaimer of opinion, yet know of a material weakness, the material weakness should be described in the report.

### *Management's Report on Internal Control Is Incomplete or Improperly Presented*

When management's report on internal control (including its assessment) is found to be inadequate, the auditors should modify their report to include an explanatory paragraph describing the reasons for this determination. If management does not disclose a material weakness properly, the auditors should state that the material weakness is not included in management's assessment and describe it in the audit report. Note that the auditors' report is already adverse due to the existence of a material weakness. In this situation, the auditors also are required to communicate in writing to the audit committee that the material weakness was not disclosed or identified as a material weakness in management's report. Figure 18.11 summarizes reporting for this and the preceding circumstances described in this section.

### *Reliance on Other Auditors*

When other auditors have performed a portion of the audit, the auditors must decide whether they are able to serve as the principal auditors. The considerations and reporting requirements are essentially the same as when other auditors are involved in the financial statement audit. The auditors who are able to serve as the principal auditors of the financial statements ordinarily also serve as principal auditors of internal control. When the principal auditors decide to refer in their report to the work of the other auditors, this reference is included both in describing the scope of the audit and in expressing the opinion.

### *Subsequent Events*

Subsequent events relevant to the internal control audit are changes in internal control subsequent to year-end but before the date of the auditors' report. The auditors have a responsibility to make inquiries of management about whether there have been any such changes. If the auditors obtain knowledge of subsequent events that materially and adversely affect the effectiveness of internal control, they should issue an adverse opinion. If the auditors are unable to determine the effect of the subsequent event, they should disclaim an opinion.

### *Issuing a Combined Report on the Financial Statements and Internal Control*

PCAOB *Standard No. 5* allows auditors to either issue separate reports on their audits of the financial statements and internal control or issue one combined report. The illustrations in this chapter have been based on separate reports. Figure 18.12 provides an illustration of a combined unqualified report on both the financial statements and internal control.

**FIGURE 18.12** Combined Report with Standard Unqualified Opinion on Financial Statements and Internal Control over Financial Reporting

**Report of Independent Registered Public Accounting Firm**

To the Audit Committee and Stockholders of Carver Company

*[Introductory paragraph]*

We have audited the accompanying balance sheets of Carver Company as of December 31, 20X8 and 20X7, and the related statements of income, stockholders' equity and comprehensive income, and cash flows for each of the years in the three-year period ended December 31, 20X8. We also have audited Carver Company's internal control over financial reporting as of December 31, 20X8, based on [Identify control criteria: for example, "criteria established in *Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)*"]. Carver Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying [title of management's report]. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

*[Scope paragraph]*

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

*[Definition paragraph]*

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

*[Inherent limitations paragraph]*

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

*[Opinion paragraph]*

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Carver Company as of December 31, 20X8 and 20X7, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 20X8, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, Carver Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 20X8, based on [identify control criteria: for example, "criteria established in *Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)*"].

*Willington & Co., CPAs*

Bisbee, Arizona, United States of America  
February 20X9

## Other Communication Requirements

PCAOB *Standard No. 5* requires that auditors communicate in writing to management all control deficiencies, regardless of their severity—this includes material weaknesses, significant deficiencies, and other deficiencies. In addition, a written communication to the audit committee must be issued that includes material weaknesses, significant deficiencies, and an indication that all deficiencies have been communicated to management. The written communications on weaknesses to both management and the audit committee should be made prior to issuance of the audit report on internal control.

In addition, when the auditors conclude that the oversight of the company's external financial reporting and internal control over financial reporting is ineffective, they must communicate that conclusion in writing to the board of directors.

## Reporting on Whether a Previously Reported Material Weakness Continues to Exist

After the existence of a material weakness has led to an adverse opinion in an internal control audit report, the company is ordinarily motivated to eliminate the weakness as quickly as is reasonably possible. When management believes that the material weakness has been eliminated, the auditors may be engaged to report on whether the material weakness continues to exist. PCAOB *Standard No. 4*, "Reporting on Whether a Previously Reported Material Weakness Continues to Exist," provides the guidance for such engagements.

To engage the auditors to perform this service, management must first gather sufficient evidence to demonstrate that the material weakness has been eliminated, document this evidence, and provide a written assertion stating that the material weakness no longer exists. The auditors then plan and perform an engagement that focuses on controls that are relevant to the particular weakness. If they determine that the controls are now effective, the auditors may issue an unqualified report indicating that the material weakness no longer exists. PCAOB *Standard No. 4* provides other reporting guidance, including:

- A significant scope limitation on the auditors' procedures should result in either a disclaimer of opinion or the resignation of the auditors (qualified opinions are not allowed).
- When the auditors' original report includes other material weaknesses that are not being considered in this engagement, the report should be modified to disclose that the other weaknesses are not addressed by the opinion.
- After a change in auditors, the successor auditors may issue such a report, but they first must obtain a sufficient understanding of the entity and the related material weakness.
- If, while performing the engagement, the auditors discover an additional material weakness, the auditors should inform the audit committee about the matter, but they are not required to modify their report.

## Integrated Audits for Nonpublic Companies

While nonpublic companies are not required to undergo integrated audits, the option is available. As an example, management may be considering taking the company public in the relatively near future and might choose to undergo such an audit. AICPA Auditing Standards provide guidance for performing an audit of internal control over financial reporting that is integrated with the audit of financial statements for engagements where PCAOB standards do not apply (e.g., engagements involving non-public companies). AICPA Standards provide guidance for performing an audit of internal control over financial reporting that is integrated with the audit the financial statements of a *nonpublic* company.

The procedures for a nonpublic integrated audit are very similar to those for a public company that we have emphasized throughout this chapter.

## Chapter Summary

This chapter explained the nature of integrated audits of public companies performed in response to the Sarbanes-Oxley Act of 2002 and in accordance with Public Company Accounting Oversight Board *Standard No. 5*. To summarize:

1. Section 404(a) of the Sarbanes-Oxley Act requires management to acknowledge its responsibility for establishing and maintaining adequate internal control and provide an assessment of internal control effectiveness as of the end of the most recent fiscal year.
2. Section 404(b) of the Sarbanes-Oxley Act requires the auditors to provide an opinion on the effectiveness of internal control.
3. Material weaknesses involve a reasonable possibility that a material misstatement of the financial statements will not be prevented or detected on a timely basis. Significant deficiencies are less severe than material weaknesses, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.
4. An integrated audit includes an audit report on both the financial statements and internal control. To issue such a report, the auditors perform procedures to test controls over all significant accounts, as well as substantive tests to support their opinion on the fairness of the financial statements.
5. Internal control audit reports are modified for a material weakness that exists at year-end. The report issued includes an adverse opinion indicating that effective internal control does not exist. If the scope of the auditors' work is limited, they should issue a disclaimer of opinion, or withdraw from the engagement.
6. After a client has remediated a material weakness that led to an adverse report, auditors may be engaged to attest to the elimination of the material weakness.

## Key Terms Introduced or Emphasized in Chapter 18

**Accounting estimate (716)** A transaction involving management's judgments or assumptions, such as determining the allowance for doubtful accounts, establishing warranty reserves, and assessing assets for impairment.

**As of date (713)** An audit of internal control over financial reporting assesses internal control as of a particular point in time, the "as of" date, as opposed to the entire period under audit. This date is ordinarily the last day of the client's fiscal period.

**Compensating control (710)** A control that reduces the risk that an existing or potential control weakness will result in a failure to meet a control objective (e.g., avoiding misstatements). Compensating controls are ordinarily controls performed to detect, rather than prevent, the misstatement from occurring. For example, a reconciliation of the bank account performed by an individual otherwise independent of the cash function serves to detect a variety of possible misstatements (both errors and fraud) that may have occurred in the processing of cash receipts and disbursements.

**Complementary controls (717)** Controls that function together to achieve the same control objective (e.g., avoiding misstatements).

**Control deficiency (709)** A weakness in the design or operation of a control that does not allow management or employees, in the normal course of performing their functions, to prevent or detect misstatements on a timely basis.

**Detective controls (722)** Policies and procedures that are designed to identify errors or fraud after they have occurred. Detective controls can be applied to groups of transactions (e.g., bank reconciliations).

**Integrated audit (under PCAOB Standard No. 5) (707)** An audit that includes audit reports on both a company's internal control over financial reporting and the financial statements.

**Major classes of transactions (710)** Those transaction flows that have a meaningful bearing on the totals accumulated in the company's significant accounts and, therefore, have a meaningful bearing on relevant assertions.

**Material weakness (709)** A control deficiency, or a combination of control deficiencies, in internal control over financial reporting, such that there is a **reasonable possibility** that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis.

**Nonroutine transaction (716)** A transaction that occurs only periodically, such as counting and pricing inventory, calculating depreciation expense, or determining prepaid expenses.

**Preventive controls (722)** Procedures designed to prevent an error or fraud. Preventive controls are normally applied at the individual transaction level.

**Redundant controls (717)** Duplicate controls that both achieve a control objective.

**Routine transaction (716)** A transaction for a recurring financial activity recorded in the accounting records in the normal course of business, such as sales, purchases, cash receipts, cash disbursements, and payroll.

**Sarbanes-Oxley Act of 2002 (708)** An act passed by the U.S. Congress to protect investors from the possibility of fraudulent accounting activities by corporations by improving the accuracy and reliability of corporate disclosures.

**Section 404 (707)** The primary section of the Sarbanes-Oxley Act dealing with management and auditor reporting on internal control over financial reporting. Section 404(a) requires that each annual report filed with the Securities and Exchange Commission include an internal control report prepared by management in which management acknowledges its responsibility for establishing and maintaining adequate internal control and an assessment of internal control effective *as of the end of the most recent fiscal year*. Section 404(b) requires that the CPA firm attest to and report internal control.

**Significant account (715)** An account for which there is a reasonable possibility that it could contain misstatements that individually, or when aggregated with others, could have a material effect on the financial statements.

**Significant deficiency (709)** A deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the company's financial reporting.

**Walk-through (717)** A procedure in which an auditor follows a transaction from origination through the company's processes, including information systems, until it is reflected in the company's financial records, using the same documents and information technology that company personnel use. Walk-through procedures usually include a combination of inquiry, observation, inspection of relevant documentation, and reperformance of controls.

## Review Questions

- 18-1. Section 404 of the Sarbanes-Oxley Act of 2002 includes two sections. Describe those sections.
- 18-2. Identify management's four overall responsibilities with respect to internal control over financial reporting that arise due to the Securities and Exchange Commission's implementation of the Sarbanes-Oxley Act of 2002.
- 18-3. What information must be included in management's report on internal control over financial reporting in the annual report filed with the Securities and Exchange Commission?
- 18-4. Describe the difference between a significant deficiency and a material weakness in internal control.
- 18-5. Comment on the accuracy of the following statement: "Since both significant deficiencies and material weaknesses must be reported to the audit committee, for practical purposes, there is no distinction between the two."
- 18-6. What is meant by the "as of" date when reporting on internal control over financial reporting?
- 18-7. What is a compensating control?
- 18-8. Provide examples of antifraud programs that the auditors might expect the client to have.
- 18-9. Describe what is meant by a "walk-through." Must walk-throughs be performed during audits of internal control over financial reporting? May the client perform a walk-through and the auditors then review the client's work?
- 18-10. While performing a walk-through, auditors ordinarily make certain inquiries of employees. Provide three examples of such inquiries.
- 18-11. Auditors often perform walk-throughs in integrated audits. Describe the evidence that is typically provided by a walk-through.
- 18-12. When performing an audit of internal control over financial reporting, auditors may distinguish among the following types of transactions: routine, nonroutine, and accounting estimates. Distinguish between these three types of transactions and give an example of each.
- 18-13. When performing an integrated audit, auditors should identify significant accounts and disclosures. What makes an account significant? What factors should be considered in deciding whether an account is significant?

- 18-14. A client operates out of 25 locations. Must the CPA perform tests related to internal control at each of these locations?
- 18-15. Comment on the following: "Auditors must decide, based on cost considerations, whether to test the design effectiveness or operating effectiveness of controls."
- 18-16. Provide an example of a situation in which the design of controls may be effective but those controls do not operate effectively.
- 18-17. Comment on the following: "Inquiry alone does not provide sufficient evidence to support the operating effectiveness of a control."
- 18-18. Comment on the following: "All controls should be tested either prior to or on the 'as of' date."
- 18-19. What requirements exist when the auditors use the work of client personnel as a part of the evidence obtained for an audit of internal control? In which areas of the audit would one expect this to be most likely to occur?
- 18-20. Provide an example of a situation in which the performance of substantive procedures for the financial statement audit might affect the internal control audit.
- 18-21. Provide an example of a situation in which the performance of tests of controls for the internal control audit might affect the performance of substantive procedures in a financial statement audit.
- 18-22. Distinguish between entity-level controls and controls designed to achieve specific control objectives.
- 18-23. Provide three examples of findings by the auditors that are at least significant deficiencies and strong indicators of the existence of a material weakness in internal control.
- 18-24. The auditors have completed an examination of internal control and are preparing to issue a report. Does the opinion paragraph on the client's internal control conclude on internal control or management's assessment of internal control?
- 18-25. What type of report on internal control is likely to be issued when management imposes a scope limitation?
- 18-26. If an adverse internal control report is issued by the auditors, may an unqualified report be issued on the financial statements?
- 18-27. Which types of deficiencies must be communicated to the audit committee?
- 18-28. Describe the requirements involved when auditors are engaged to report on whether a previously reported material weakness continues to exist.

## Questions Requiring Analysis

- LO 18-3** 18-29. The CPA firm of Carson & Boggs LLP is performing an internal control audit in accordance with PCAOB *Standard No. 5*. The partner in charge of the engagement has asked you to explain the process of determining which controls to test. Describe the process, presenting each of the links in this process and a short summary of how the auditors approach each of them.
- LO 18-1, 5** 18-30. Tests of controls are ordinarily performed for both financial statement audits and internal control audits.
  - a. What is the objective of tests of controls when performed for internal control audits?
  - b. What is the objective of tests of controls when performed for financial statement audits?
  - c. How are these different objectives reconciled in an integrated audit?
- LO 18-6** 18-31. The CPA firm of Webster, Warren, & Webb LLP issued an adverse opinion on the internal control of Alexandria Financial, a public company, due to a material weakness. The weakness involved the lack of sufficient accounting expertise to evaluate and adopt appropriate accounting principles. Subsequent to issuance of the report, management of Alexandria hired a new controller to eliminate the weakness.
  - a. Describe what steps Alexandria must perform to engage Webster, Warren, & Webb to issue a report indicating that the weakness no longer exists.
  - b. Describe how Webster, Warren, & Webb should approach the engagement.
  - c. Describe what Webster, Warren, & Webb must do if, during the course of the engagement, a member of the audit team discovers another material weakness in internal control over financial reporting. Will the new weakness affect the auditors' report?

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 18–32. Multiple Choice Questions

Select the best answer for each of the following questions. Explain the reasons for your selection:

LO 18-3

- a. In an integrated audit, which of the following must the auditors communicate to the audit committee?

	Known Material Weaknesses	Known Significant Deficiencies
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 18-6

- b. In an integrated audit, which of the following lead(s) to an adverse opinion on internal control?

	Known Material Weaknesses	Known Significant Deficiencies
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 18-2

- c. In an integrated audit, which of the following must be communicated by management to the audit committee?

	Known Material Weaknesses	Known Significant Deficiencies
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 18-6

- d. Which of the following is most likely to be considered a material weakness in internal control?

- (1) Ineffective oversight of financial reporting by the audit committee.
- (2) Restatement of previously issued financial statements due to a change in accounting principles.
- (3) Inadequate controls over nonroutine transactions.
- (4) Weaknesses in risk assessment.

LO 18-3

- e. Which of the following is defined as a weakness in internal control that allows a reasonable possibility of a misstatement that is material?

- (1) Control deficiency.
- (2) Material weakness.
- (3) Reportable condition.
- (4) Significant deficiency.

LO 18-6

- f. The auditors identified a material weakness in internal control in August. The client was informed and the client corrected the material weakness prior to year-end (December 31); the auditors concluded that management eliminated the material weakness prior to year-end. The appropriate audit report on internal control is:

- (1) Adverse.
- (2) Qualified.

- (3) Unqualified.  
 (4) Unqualified with explanatory language relating to the material weakness.
- LO 18-2** g. Which of the following need *not* be included in management's report on internal control under Section 404(a) of the Sarbanes-Oxley Act of 2002?
- (1) A statement that the company's auditors have issued an audit report on management's assertion.  
 (2) An identification of the framework used for evaluating internal control.  
 (3) Management's assessment of the effectiveness of internal control.  
 (4) Management's acknowledgment of its responsibility to establish and maintain internal control that detects all significant deficiencies.
- LO 18-2** h. Management's documentation of internal control ordinarily should include information on:

	Controls Designed to Prevent Fraud	Controls Designed to Ensure Employee Personal Integrity
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

- LO 18-3** i. A material weakness is a control deficiency (or combination of control deficiencies) that results in a reasonable possibility that a misstatement of at least what amount will not be prevented or detected?
- (1) Any amount greater than zero.  
 (2) A greater amount than zero, but an amount that is at least inconsequential.  
 (3) A greater amount than inconsequential.  
 (4) A material amount.

- LO 18-4** j. A procedure that involves tracing a transaction from origination through the company's information systems until it is reflected in the company's financial report is referred to as a(n):
- (1) Analytical analysis.  
 (2) Substantive test.  
 (3) Test of a control.  
 (4) Walk-through.

- LO 18-4** k. Which of the following is *not* a typical question asked during a walk-through?
- (1) Have you ever been asked to override the process or controls?  
 (2) What do you do when you find an error?  
 (3) What is the largest fraudulent transaction you ever processed?  
 (4) What kind of errors have you found?

- LO 18-4** l. An audit of internal control over financial reporting ordinarily assesses internal control:
- (1) As of the last day of the fiscal period.  
 (2) As of the last day of the auditor's fieldwork.  
 (3) For the entire fiscal period.  
 (4) For the entire period plus the period of the auditor's fieldwork.

- LO 18-4** 18–33. While performing an internal control audit in conformity with PCAOB *Standard No. 5*, the auditors must be able to identify both control strengths and control weaknesses. Items (1) through (11) present various control strengths and deficiencies. For each item, select from the following list the appropriate response.
- A. Control strength for the revenue cycle (including cash receipts).  
 B. Control deficiency for the revenue cycle (including cash receipts).  
 C. Control strength unrelated to the revenue cycle.

*Items to be answered:*

1. Credit is granted by a credit department.
2. Sales returns are presented to a sales department clerk who prepares a written prenumbered shipping report.
3. Statements are sent monthly to customers.
4. Write-offs of accounts receivable are approved by the controller.
5. Cash disbursements over \$10,000 require two signatures on the check.
6. Cash receipts received in the mail are received by a secretary with no record keeping responsibility.
7. Cash receipts received in the mail are forwarded unopened, with remittance advices, to accounting.
8. The cash receipts journal is prepared by the treasurer's department.
9. Cash is deposited weekly.
10. Support for disbursement checks is canceled after payment by the treasurer.
11. Bank reconciliation is prepared by individuals independent of cash receipts record keeping.

**LO 18-4** 18–34. **Simulation**

Bill Jensen, a staff member of Zhan & Co., CPAs, has given you the following list of what he refers to as “internal control deficiencies” for the Zabbling Co. audit and has asked you to review each point and make certain that you agree that each is an internal control deficiency. For each of the following items, reply A (Agree) or D (Disagree) indicating whether the item represents an internal control deficiency.

- a. Voided checks are torn up and destroyed.
- b. Separate sequences of prenumbered checks are used for each bank account.
- c. The purchasing department manager and assistant manager are the authorized check signers.
- d. No checks are made payable to cash.
- e. The authorized check signers reconcile bank accounts.
- f. All cash receipts (checks) received through the mail are prelisted by the two individuals who open the mail.
- g. All cash receipts received through the mail are restrictively endorsed when received.
- h. When a disbursement is made based on paper supporting documents, those supporting documents are canceled by the individual who signs the check.

18–35 **Adapted AICPA Simulation**

During audits of internal control over financial reporting of various issuers, the auditors encountered the independent situations below. For each situation *a* through *e* select from the following list the appropriate audit responses. Each reply may be used once, more than once, or not at all.

1. Assess control risk as low for the purpose of the financial statement audit.
2. Consult legal counsel to explore reducing auditor liability.
3. Determine if the control deficiency is a material weakness by obtaining further evidence.
4. Disclose in the notes to the financial statements that there are material weaknesses.
5. Express an adverse opinion on internal control.
6. Express an unqualified opinion on internal control.
7. Express an unqualified opinion on internal control and add a paragraph on whether a previously reported material weakness in internal control continues to exist.
8. Insist that management's assessment of internal control includes a description of the significant deficiency.
9. Issue a disclaimer of opinion.
10. Issue a report on internal control stating that no deficiencies were noted.
11. Issue a separate report on the client's internal control.
12. Modify the opinion in the report on internal control for significant deficiencies.
13. Report matter only to the board of directors.

Situation	Response
<p>a. The client did not furnish adequate evidence for the auditors to evaluate internal control over inventory. All other evidence was provided.</p> <p>b. The auditors examined the client's internal control over cash receipts and concluded that they are operating exactly as designed. However, the design of the controls does not include control procedures to prevent misstatements and the potential omission of cash receipts.</p> <p>c. The auditors concluded that the ineffectiveness of the design of controls over accounts payable and cash disbursements represents a material weakness in internal control, even though the financial statements are not materially misstated.</p> <p>d. The auditors concluded that a significant deficiency in internal control exists in the payroll function, but no material weakness.</p> <p>e. The auditor's prior-year report on internal control included an adverse opinion. The client has since modified internal control and no material weaknesses were found in the current year.</p>	

**LO 18-2, 3, 4, 6** 18–36. Match the following definitions (or partial definitions) to the appropriate term. Each term may be used once or not at all.

Definition (or Partial Definition)	Term
<p>a. A control deficiency, or a combination of control deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis</p> <p>b. A weakness in the design or operation of a control that does not allow management or employees, in the normal course of performing their functions, to prevent or detect misstatements on a timely basis</p> <p>c. An account for which there is a reasonable possibility that it could contain misstatements that individually, or when aggregated with others, could have a material effect on the financial statements</p> <p>d. The primary section of the Sarbanes-Oxley Act dealing with management and auditor reporting on internal control over financial reporting</p> <p>e. Those transaction flows that have a meaningful bearing on the totals accumulated in the company's significant accounts and, therefore, have a meaningful bearing on relevant assertions</p> <p>f. Tracing a transaction from origination through the company's information systems until it is reflected in the company's financial reports</p>	<p>1. Control deficiency</p> <p>2. Detective controls</p> <p>3. Major classes of transactions</p> <p>4. Material weakness</p> <p>5. Nonroutine transaction</p> <p>6. Routine transaction</p> <p>7. Section 243</p> <p>8. Section 404</p> <p>9. Significant account</p> <p>10. Significant deficiency</p> <p>11. Substantive procedure</p> <p>12. Walk-through</p>

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*. 

- LO 18-4** 18–37. Your working papers for an integrated audit being performed under PCAOB *Standard No. 5* include the narrative description below of the cash receipts and billing portions of internal control of Slingsdale Building Supplies, Inc. Slingsdale is a single-store retailer that sells a variety of tools, garden supplies, lumber, small appliances, and electrical fixtures to the public, although about half of Slingsdale's sales are to construction contractors on account. Slingsdale employs 12 salaried sales associates, a credit manager, three full-time clerical workers, and several part-time cash register clerks and assistant bookkeepers. The full-time clerical workers perform such tasks as cash receipts, billing, and accounting and are adequately bonded. They are referred to in the narrative as "accounts receivable supervisor," "cashier," and "bookkeeper."

*Narrative:*

Retail customers pay for merchandise by cash or credit card at cash registers when merchandise is purchased. A contractor may purchase merchandise on account if approved by the credit manager, based only on the manager's familiarity with the contractor's reputation. After credit is approved, the sales associate files a prenumbered charge form with the accounts receivable (AR) supervisor to set up the receivable.

The AR supervisor independently verifies the pricing and other details on the charge form by reference to a management-authorized price list, corrects any errors, prepares the invoice, and supervises a part-time employee who mails the invoice to the contractor. The AR supervisor electronically posts the details of the invoice in the AR subsidiary ledger; simultaneously, the transaction's details are transmitted to the bookkeeper. The AR supervisor also prepares a monthly computer-generated AR subsidiary ledger (without a reconciliation with the AR control account) and a monthly report of overdue accounts.

The cash receipts functions are performed by the cashier, who also supervises the cash register clerks. The cashier opens the mail, compares each check with the enclosed remittance advice, stamps each check "for deposit only," and lists checks for deposit. The cashier then gives the remittance advices to the bookkeeper for recording. The cashier deposits the checks daily, separate from the daily deposit of cash register receipts. The cashier retains the verified deposit slips, to assist in reconciling the monthly bank statements, but forwards to the bookkeeper a copy of the daily cash register summary. The cashier does not have access to the journals or ledgers.

The bookkeeper receives the details of transactions from the AR supervisor and the cashier for journalizing and posting to the general ledger. After recording the remittance advices received from the cashier, the bookkeeper electronically transmits the remittance information to the AR supervisor for subsidiary ledger updating. The bookkeeper sends monthly statements to contractors with unpaid balances upon receipt of the monthly report of overdue balances from the AR supervisor. The bookkeeper authorizes the AR supervisor to write off accounts as uncollectible when six months have passed since the initial overdue notice was sent. At this time, the credit manager is notified by the bookkeeper not to grant additional credit to that contractor.

*Required:*

- a. Based only on the information in the narrative, describe the internal control deficiencies in Slingsdale's internal control over the cash receipts and billing functions. Organize the weaknesses by employee job function: Credit manager, AR supervisor, Cashier, and Bookkeeper.
- b. Assume that you have performed your audit of internal control in conformity with PCAOB standards. Based on your results for part (a), you believe that several of the deficiencies represent material weaknesses. What effect will this have on your report on Slingsdale's internal control? Which types of opinions may be appropriate?
- c. What communication responsibilities do you have for any weaknesses that represent significant deficiencies?

## In-Class Team Cases

LO 18-6 18–38.

*Case 1:*

For each of the following independent cases, state the highest level of deficiency that you believe the circumstances represent—a control deficiency, a significant deficiency, or a material weakness. Explain your decision in each case.

The company processes a significant number of routine intercompany transactions. Individual intercompany transactions are not material and primarily relate to balance sheet activity—for example, cash transfers between business units to finance normal operations. A formal management policy requires monthly reconciliation of intercompany accounts and confirmation of balances between business units. However, there is not a process in place to ensure performance of these procedures. As a result, detailed reconciliations of intercompany accounts are not performed on a timely basis. Management does perform monthly procedures to investigate selected large-dollar intercompany account differences. In addition, management prepares a detailed monthly variance analysis of operating expenses to assess their reasonableness.

*Case 2:*

During its assessment of internal control over financial reporting, management identified the following deficiencies. Based on the context in which the deficiencies occur, management and the auditors agree that these deficiencies individually represent significant deficiencies:

- Inadequate segregation of duties over certain information system access controls.
- Several instances of transactions that were not properly recorded in the subsidiary ledgers; the transactions involved were not material, either individually or in the aggregate.
- No timely reconciliation of the account balances affected by the improperly recorded transactions.

- Case 3:* The company uses a standard sales contract for most transactions, although sales personnel are allowed to modify sales contract terms as necessary to make a profitable sale. Individual sales transactions are not material to the entity. The company's accounting personnel review significant or unusual modifications to the sales contract terms, but they do not review changes in the standard shipping terms. The changes in the standard shipping terms could require a delay in the timing of revenue recognition. Management reviews gross margins on a monthly basis and investigates any significant or unusual relationships. In addition, management reviews the reasonableness of inventory levels at the end of each accounting period. The company has experienced limited situations in which revenue has been inappropriately recorded in advance of shipment, but amounts have not been material.
- Case 4:* The company has a standard sales contract, but sales personnel frequently modify the terms of the contract. Sales personnel frequently grant unauthorized and unrecorded sales discounts to customers without the knowledge of the accounting department. These amounts are deducted by customers in paying their invoices and are recorded as outstanding balances on the accounts receivable aging. Although these amounts are individually insignificant, they are material in the aggregate and have occurred consistently over the past few years.
- Case 5:* The company has found it necessary to restate its financial statements for the past two years due to a material overstatement of revenues two years ago (and an equal understatement last year). The errors are due to sales of certain software that allowed the purchasers extremely lenient rights of return. The errors were discovered shortly following the end of the current accounting year. Members of management indicated that the misstatements occurred because they simply didn't know the accounting rules. Now they know the rules and they won't let it happen again.
- Case 6:* Assume the same facts exist as in Case (5) except that you, the auditor, have identified the misstatements at the end of June of the year currently under audit. Members of management acknowledged that the misstatements occurred because they simply didn't know the rules at the time, and now they know the rules. Management, within the last six months of the year under audit, hired a new financial accounting expert and believes that the control weakness has been corrected as of year-end. Management believes that it is extremely unlikely that such a misstatement could occur again with the new expert reviewing these matters.
- Case 7:* Assume the same facts exist as in Case (6), except that management has informed the chief financial officer that she must watch over these matters much more carefully. She has attended several CPE courses on accounting and seems to be caught up in the area in which the misstatements occurred.
- Case 8:* Subsequent to year-end, the auditors have determined that they believe that management has understated its warranty obligations. The auditors know that, according to the Professional Standards, they should consider the difference between management's estimate and the closest reasonable estimate as "likely misstatement." The chief financial officer (CFO) has argued that this amount is reasonable. Yet, in fact, neither the auditors nor the CFO knows which amount is right. The CFO is under no particular pressure to meet an earnings forecast; he just thinks that the warranty obligations for many of the products will expire and will not be exercised. Still, the CFO can't convince the auditors. Likewise, the auditors can't convince the CFO of their position. The CFO finally agrees to a material adjustment to get to the auditors' amount and "keep the peace."

(Adapted from PCAOB *Standard No. 5*)

# Additional Assurance Services: Historical Financial Information

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 19-1** Discuss additional audit-based services, including reporting on compliance with contractual agreements, letters for underwriters, and summary financial statements.
- LO 19-2** Identify the types of special-purpose financial reporting frameworks and the nature of the audit reports issued.
- LO 19-3** Describe the auditors' responsibilities when auditing financial statements that use a generally accepted financial reporting framework of another country.
- LO 19-4** Discuss audits of single financial statements and specific accounts or items of a financial statement.
- LO 19-5** Explain the special considerations involved in auditing personal financial statements.
- LO 19-6** Describe the nature of financial statement reviews conducted under *Statements on Standards for Accounting and Review Services*.
- LO 19-7** Discuss how reviews performed under *Statements on Standards for Accounting and Review Services* differ from those performed under the *Statements on Auditing Standards*.
- LO 19-8** Explain the accountant's responsibilities when compiling and preparing financial statements.

In the preceding chapters, we emphasized the audit of financial statements prepared in accordance with accounting principles generally accepted in the United States, including resulting auditor communications through audit reports and communications to those charged with corporate governance. In addition, in Chapters 7 and 18 we discussed the audit of internal control. These services represent the CPAs' principal type of attestation engagement. However, CPAs provide additional communications related to these audits and perform a variety of other types of assurance, attestation, and accounting services.

Chapter 19 begins with a discussion of services that use the financial statement audit as a starting point but result in providing assurance on additional information. Next we describe engagements that involve audits of information prepared using a financial reporting framework other than GAAP. Then we provide a summary of several assurance services not discussed previously in the text. Finally, we present a discussion of financial statement compilation and preparation services in which no assurance is provided by CPAs.

## Audit-Based Services: Assurance on Additional Information

### LO 19-1

Discuss additional audit-based services, including reporting on compliance with contractual agreements, letters for underwriters, and summary financial statements.

ments, (2) issue letters for

underwriters, or (3) report on summary financial information. Auditors who have audited the financial statements of an organization are sometimes asked to use the audit results as a starting point for providing assurance on additional subject matter. Here we discuss reporting situations in which an audit has been performed and the auditors are engaged to (1) report on compliance with contractual or regulatory requirements, (2) issue letters for

### Reporting on Compliance with Aspects of Contractual Agreements or Regulatory Requirements in Connection with Audited Financial Statements

Regulatory requirements and debt agreements often require companies to provide compliance reports prepared by their independent auditors. A common example of such reports is one prepared for a bond trustee as evidence of the company's compliance with restrictions contained in the bond indenture. The auditors typically provide negative assurance with respect to the client's compliance with indenture provisions relating to the maintenance of certain financial ratios and restrictions on the payment of dividends.

Professional standards indicate that to provide this service, the auditors *must first have performed an audit* of the related financial statements and must have subjected the applicable restrictions to audit procedures applied in the financial statement audit (AICPA AU-C 806; PCAOB 623). The auditors may provide such assurance either in the audit report accompanying the financial statements or in a separate report. When a separate report is issued, it includes an introductory paragraph summarizing the audit report on the financial statements, a paragraph providing negative

assurance with respect to compliance, and a paragraph indicating that the report is solely for the use of the client and the specified third party. The paragraph providing negative assurance about compliance is illustrated below.<sup>1</sup>

In connection with our audit, nothing came to our attention that caused us to believe that the Company was not in compliance with any of the terms, covenants, provisions, or conditions of Sections 8 to 15, inclusive, of the Indenture dated July 21, 20X1, with First National Bank. However, our audit was not directed primarily toward obtaining knowledge of such noncompliance.

When the auditors have identified one or more incidences of noncompliance that they believe should be reported, the items should be identified in the report. When they believe that noncompliance is pervasive, they should consider whether a negative assurance statement is appropriate. Also, issuance of this type of report is not appropriate if the auditors have expressed an adverse opinion or disclaimed an opinion on the financial statements to which the covenants relate.

## Letters for Underwriters

Investment banking firms that underwrite securities issues often request independent auditors who have audited the financial statements and schedules in the registration statement to issue a letter for the underwriters. This letter is commonly called a **comfort letter**, and the professional standards provide guidance on its content (AICPA AU-C 920; PCAOB 634). The standards indicate that a comfort letter may include assurance about the following matters:

1. A statement that the auditors are independent.
2. Whether the audited financial statements and financial statement schedules included in the registration statement comply regarding form with the accounting requirements of the Securities Act of 1933 and related regulations.
3. Unaudited financial statements, condensed interim financial information, capsule financial information, pro forma financial information, financial forecasts, and management's discussion and analysis.
4. Changes in selected financial statement items during a period subsequent to the date and period of the latest financial statements included in the registration statement.
5. Tables, statistics, and other financial information included in the registration statement.
6. Certain nonfinancial statement information included in the registration statement complies regarding form with SEC regulations.

Auditors may provide positive assurance on items 1 and 2 of the preceding list. For items 3 through 6, depending upon the situation (e.g., in some circumstances an interim review must have been performed on interim information), auditors are often able to provide negative assurance. This negative assurance indicates that, based on the procedures performed, nothing has come to their attention to cause them to believe that any material modifications need to be made to the information (or that the information does not comply with SEC requirements).

Comfort letters aid the underwriters in fulfilling their obligation to perform a reasonable investigation of the securities registration statement. No definitive criteria exist for the underwriters' "reasonable investigation." Therefore, the underwriters should approve the adequacy of the CPAs' procedures serving as a basis for the comfort letter.

<sup>1</sup> The auditing reporting standards are in a period of change in that, historically, reports do not include section headings and many reports still do not (e.g., compilation and review reports). In this chapter, with the exception of our illustration of an audit report on a special-purpose financial framework, we do not include section headings.

## Illustrative Case

### Summary Annual Reports

A number of corporations have experimented with issuing summary annual reports to shareholders. These reports generally include condensed financial statements and refer shareholders desiring more

detailed information to the annual report filed with the SEC (Form 10-K). The auditors of these companies issue a report on the summary financial statements that refers to their report included with the Form 10-K.

## Summary Financial Statements

Occasionally, a client-prepared document will include **summary financial statements (condensed financial statements)** developed from audited financial statements. These statements typically include considerably less detail than the audited financial statements. The auditors who issued the report on the audited financial statements may be asked to report on the summary statements. Unless they have issued an adverse opinion or a disclaimer of opinion on the audited financial statements, the auditors may accept an engagement related to the summary financial statements (AICPA AU-C 810; PCAOB 552). In these circumstances, the auditors determine whether the criteria applied by management in the preparation of the summary financial statements are acceptable and whether those criteria have been properly applied. Although they need not accompany the summary financial statements, the audited financial statements should be readily available to any user who wishes to obtain them (e.g., available on the company's website). When the CPAs have concluded that the summary financial information is properly presented, they may issue an opinion stating that the summary financial statements are consistent, in all material respects, with the financial statements from which they have been derived, in accordance with the applied criteria.

## Auditing Financial Statements That Use a Financial Reporting Framework Other Than GAAP

Recall that in Chapter 2 we briefly discussed **financial reporting frameworks**, which are sets of criteria for preparing financial statements (e.g., generally accepted accounting principles are referred to as a **general-purpose financial reporting framework**). Auditors are sometimes engaged to audit financial statements that are prepared using a financial reporting framework *other than* generally accepted accounting principles. In this section, we describe special-purpose frameworks and frameworks used in a foreign country.

## Audits of Financial Statements Prepared in Accordance with Special-Purpose Financial Reporting Frameworks

### LO 19-2

Identify the types of special-purpose financial reporting frameworks and the nature of the audit reports issued.

The professional standards (AICPA AU-C 800) define five **special-purpose financial reporting frameworks**: (a) cash basis, (b) tax basis, (c) contractual basis, and (d) regulatory basis.<sup>2</sup>

When considering accepting an engagement in which a special-purpose financial reporting framework is used, the auditors should obtain an understanding of the purpose of the financial statements, the intended users, and steps taken by management to determine that the framework is acceptable in the circumstances. In addition, management must acknowledge that it understands its responsibilities with respect to the framework. When planning and performing the audit, the auditors adapt AU sections that are relevant in the circumstances.

An audit report on financial statements prepared using a special-purpose financial reporting framework departs from the standard form in several ways. Most importantly, the report must include an emphasis-of-matter paragraph that states that the financial

<sup>2</sup> Under the current PCAOB standard (623), the cash basis, tax basis, and regulatory basis financial reporting frameworks are referred to as "other comprehensive bases of accounting." The AICPA eliminated the term from its standards in 2012.

statements are prepared using a special-purpose framework that is a basis of accounting other than GAAP. The paragraph should also describe the basis of accounting being used or refer to a financial statement note that provides such a description. The essence of the report is the expression of an opinion about whether the financial statements fairly present what they purport to present.

The auditors should be cautious about the titles given to the financial statements. Titles such as “balance sheet,” “income statement,” and “statement of cash flows” are generally associated with financial statements presented in accordance with GAAP. Consequently, the professional standards require more descriptive titles for statements that are presented on some other basis. For example, a cash-basis “balance sheet” is more appropriately titled “statement of assets and liabilities arising from cash transactions.” Perhaps the most common financial statements prepared on a basis other than GAAP are cash-basis statements. The body of an unmodified report on cash-basis statements is shown below with the distinctive wording emphasized.

We have audited the accompanying financial statements of ABC Partnership, which comprise the *statement of assets and liabilities arising from cash transactions* as of December 31, 20X1, and the *related statement of revenue collected and expenses paid* for the year then ended.

#### *Management’s Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in *accordance with the cash receipts and disbursements basis of accounting described in Note X*; this includes determining that the cash receipts and disbursements basis of accounting is an acceptable basis for the preparation of the financial statements in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### *Auditors’ Responsibility*

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the partnership’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the partnership’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### *Opinion*

In our opinion, the financial statements referred to above present fairly, in all material respects, the *assets and liabilities arising from cash transactions* of ABC Partnership as of December 31, 20X1, and its revenue collected and expenses paid during the year then ended in accordance with *the cash receipts and disbursements basis of accounting* described in Note X.

#### *Basis of Accounting*

Without modifying our opinion, we draw attention to Note X to the financial statements, which describes the basis of accounting. The financial statements are prepared on the cash receipts and disbursements basis of accounting, which is a basis of accounting other than generally accepted accounting principles.

If the special-purpose financial statements are prepared in accordance with a contractual or regulatory basis of accounting, the auditors’ report should also include an other-matter paragraph alerting users about the intended use of the auditors’ report (e.g., for those

within the entity, the parties to the contract or agreement, or the regulatory agencies to whose jurisdiction the entity is subject). The following is an illustration of this paragraph:

#### Restriction on Use

Our report is intended solely for the information and use of ABC Company and Regulator DEF and is not intended to be and should not be used by parties other than these specified parties.

Figure 19.1 provides overall reporting requirements relating to the various special-purpose frameworks.

#### *Auditors' Report Prescribed by Law or Regulation*

When the auditors are involved with financial information prepared on a regulatory basis, they may be requested to use a specific layout, form, or wording (hereafter, layout) for the auditors' report. If the layout includes the basic reporting requirements (e.g., title,

**FIGURE 19.1** Overview of Reporting Requirements

	Cash Basis	Tax Basis	Contractual Basis	Regulatory Basis	Regulatory Basis (General Use Statements)	Other Basis
<b>Opinion(s)</b>	Single opinion on special-purpose framework	Single opinion on special-purpose framework	Single opinion on special-purpose framework	Single opinion on special-purpose framework	Dual opinion on special-purpose framework and on GAAP	Single opinion on special-purpose framework
<b>Description of purpose for which special-purpose financial statements are prepared</b>	No	No	Yes	Yes	Yes	Yes
<b>Emphasis-of-matter paragraph alerting readers to the preparation in accordance with a special-purpose framework</b>	Yes	Yes	Yes	Yes	No	Yes
<b>Other-matter paragraph including an alert about restricting the use of the auditors' report</b>	No	No	Yes	Yes	No	Yes
<b>Additional requirements unique to category</b>			The auditors must obtain an understanding of significant management interpretations of the contract.	If a specific layout, form, or wording is required that the auditors have no basis to make, then the auditors should reword the form or attach an appropriately worded separate report.		

addresses, management and auditor responsibilities, opinion paragraph), they may use it. If the layout is not acceptable, or would cause the auditors to make a statement they have no basis to make, they should reword it or attach an appropriately worded separate report. If this is not allowable, the auditors should not accept the audit engagement unless required by law or regulation to do so. If so required, the auditors should not include any reference within the auditors' report to the audit having been conducted in accordance with GAAS.

### Financial Statements Prepared Using a Financial Reporting Framework Generally Accepted in Another Country

#### LO 19-3

Describe the auditors' responsibilities when auditing financial statements that use a generally accepted financial reporting framework of another country.

A U.S.-based company may prepare financial statements using another country's financial reporting framework (rather than U.S. GAAP) for use in that country. For example, the company may have a subsidiary in Germany and may prepare financial statements for that subsidiary following German accounting principles as part of an effort to raise capital in Germany. The professional standards (AICPA AU-C 910; PCAOB 534) address the auditors' responsibility in this situation. When auditing the information, the auditors should comply with U.S. auditing standards to the extent the standards are appropriate. In addition, the auditors should obtain an understanding of the other country's financial reporting framework. Also, if the terms of the engagement require the auditors to apply either the auditing standards of that country or the international standards, the auditors should obtain an understanding of them and apply those standards.

When the financial statements are *intended for use only outside* the United States, the auditors should issue one report, using either:

- A United States form of report that indicates that the financial statements have been prepared in accordance with a financial reporting framework generally accepted in another country, or
- The other country audit report.

When the financial statements are also intended for use in the United States, the auditors use a U.S. form of report. For nonpublic companies, this report includes an emphasis-of-matter paragraph stating the financial reporting framework used and that it differs from GAAP; an unmodified opinion may be issued relating to the financial reporting framework used. For public companies, the PCAOB requires that an opinion also be added on whether the financial statements follow GAAP.

## Additional GAAS Audits

In this section, we describe CPA association with:

- Single financial statements (e.g., an income statement, and not the other financial statements), and specific elements, accounts, or items of financial statement (e.g., a schedule of accounts receivable).
- Personal financial statements.

### Single Financial Statements and Specific Elements, Accounts, or Items of Financial Statements

#### LO 19-4

Discuss audits of single financial statements and specific accounts or items of a financial statement.

Auditors may be engaged to audit a single financial statement or a specific element, account, or item (hereafter, element) of a financial statement. A company may request the audit because it has entered into an agreement such as:

- A loan agreement that includes a requirement that the balance sheet (but not other financial statements) be audited annually.
- A lease agreement with a requirement that annual company revenues be audited because lease payments are based in part on the lessee's revenue.

When auditing a single financial statement or a specific element of a financial statement, the auditors should adapt GAAS to the extent necessary in the circumstances and then apply it. The auditors should perform procedures on interrelated items as necessary to meet the objectives of the audit. Examples of interrelated items include sales and

receivables; inventory and payables; and building and equipment and depreciation. Thus, when auditing the sales account, the auditors will normally need to perform procedures on accounts receivable.

When the CPAs are engaged to audit a particular account or element, they modify the standard audit report to indicate the information audited, the basis of accounting used, and whether the information is presented fairly on that basis. For example, the following represents the opinion paragraph of a report on the audit of accounts receivable.

In our opinion, the schedule of accounts receivable referred to above presents fairly, in all material respects, the accounts receivable of ABC Company as of December 31, 20X1, in accordance with accounting principles generally accepted in the United States of America relevant to preparing such a statement.

In some situations the auditors may be engaged to report on a schedule of accounts that, other than not being a balance sheet, income statement, or statement of cash flows, is otherwise prepared in accordance with GAAP. Examples of such schedules include:

- A governmental agency may require a schedule of gross income and certain expenses of a company's real estate operation in which income and expenses are measured in accordance with GAAP, but expenses are defined to exclude certain items such as interest, depreciation, and income taxes.
- An agreement in which one company is considering acquiring another company may specify a schedule of gross assets and liabilities of the company measured in accordance with GAAP, but limited to the assets to be sold and liabilities to be transferred according to the agreement.

In these situations, the auditors' report should include an emphasis-of-matter paragraph stating the purpose of the presentation, referring to a note that describes the basis of presentation and stating that the presentation is not intended to be a complete presentation of the organization's assets, liabilities, revenues or expenses.

To this point we have discussed situations in which auditors are asked to audit information that is less than a complete set of financial statements. In some circumstances, when they have performed an audit of the complete set of financial statements, they may also be asked to audit and report on a single financial statement or element. In such circumstances:

- A separate opinion should be issued on each engagement.
- Different materiality measures will ordinarily be used for the two engagements (e.g., materiality for a particular element generally will be less than for the overall financial statements).
- When both the complete set of financial statements and the single financial statement (or element) are being published together, the auditors must be satisfied that there is a clear differentiation between them.
- When the auditors' report on the complete set of financial statements is modified, the auditors should consider its effect on the single financial statement (or element) report. When the matter relates to the specific element, the report on the element is also likely to be modified. When it does not relate to the specific element, it may be possible to issue an unmodified report on the element if the two reports are not published together and the specific element does not constitute a major portion of the complete set of financial statements.

#### *Reviews and Agreed-Upon Procedures Engagements*

On occasion, the client may request the CPAs *not to perform an audit, but to perform either review or agreed-upon procedures* on a financial statement or specified elements of financial statements. A review ordinarily consists of analytical procedures and

inquiries. For example, the landlord of a shopping center may request that the CPAs perform review procedures (analytical procedures and inquiry procedures) related to the revenue account. Typical review procedures are presented later in this chapter.

Finally, a CPA may be engaged to perform agreed-upon procedures on specified elements. The attestation standards provide guidance for these engagements that result in a summary of findings that is intended only for specified parties (AICPA and PCAOB AT 201). Agreed-upon procedures engagements are “customer driven” services in that the “specified parties” agree with the CPAs on the procedures to be performed and take responsibility for their *sufficiency*. In our example, these might include procedures such as substantiating the revenue reported by tenants by agreeing the figures with the tenants’ internal financial statements and state sales tax returns. In this situation, the CPAs will meet with representatives of the landlord (the specified party) to agree upon the procedures to be performed. The accountants’ report indicates that it is intended for the specified party and lists the procedures performed and related findings. The report *should* include a disclaimer of opinion and *should not include negative assurance* that indicates that nothing came to the CPAs’ attention to indicate that the financial statement element is not fairly presented.

Another common example of an agreed-upon procedures engagement is one in which a bankruptcy trustee (the specified party) engages the CPA to help establish claims of creditors. In this situation, a CPA may be engaged to perform agreed-upon procedures relating to accounts payable and issue a report such as the following (emphasis added):

#### Independent Accountants’ Report on Applying Agreed-Upon Procedures

To the Trustee of Mardem Company:

*We have performed the procedures described below, which were agreed to by the Trustee of Mardem Company, with respect to the claims of creditors to determine the validity of claims of Mardem Company as of May 31, 20X1, as set forth in accompanying Schedule A. This engagement to apply agreed-upon procedures was performed in accordance with standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of the Trustee of Mardem Company. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose. The procedures and associated findings are as follows:*

1. Compare the total of the trial balance of accounts payable at May 31, 20X1, prepared by Mardem Company, to the balance in the related general ledger account.  
The total of the accounts payable trial balance agrees with the balance in the related general ledger account.
2. Compare the amounts for claims received from creditors (as shown in claim documents provided by Mardem Company) to the respective amounts shown in the trial balance of accounts payable. Using the data included in the claims documents and in Mardem Company’s accounts payable detail records, reconcile any differences found to the accounts payable trial balance.  
All differences noted are presented in column 3 of Schedule A. Except for those amounts shown in column 4 of Schedule A, all such differences were reconciled.
3. Examine the documentation submitted by creditors in support of the amounts claimed and compare it to the following documentation in Mardem Company’s files: invoices, receiving reports, and other evidence of receipt of goods or services.  
Invoices, receiving reports, and other evidence existed for all documents submitted by creditors.

We were not engaged to, and did not perform an audit, the objective of which would be the expression of an opinion on the specified elements, accounts, or items. Accordingly, *we do not express such an opinion*. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

*This report is intended solely for the use of the Trustee of Mardem Company and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purpose.*

## Audits of Personal Financial Statements

### LO 19-5

Explain the special considerations involved in auditing personal financial statements.

Audited personal financial statements may be required in a variety of circumstances, including when an individual seeks a large loan or wishes to purchase a business using his or her personal credit. Generally accepted accounting principles applied to personal financial statements are quite different from those applicable to business entities. In personal financial statements, assets are shown at their *estimated current values* and liabilities are presented at their *estimated current amounts*. Thus, auditors must apply audit procedures that will substantiate these estimates. On occasion, the auditors may need to rely upon appraisers, following the guidelines set forth for using the work of a specialist (AICPA AU-C 620; PCAOB 336).

The “balance sheet” for an individual is termed a *statement of financial condition*. This statement shows the individual’s *net worth* in lieu of “owners’ equity” and includes a liability for income taxes on the differences between the estimated current values of assets and liabilities and their income tax bases. The “income statement” for an individual is called the *statement of changes in net worth*. In addition to showing revenue and expenses, this statement includes the increases and decreases in both the estimated current values of assets and the estimated amounts of liabilities during the period.

Accounting principles and auditing guidance for personal financial statements are presented in the AICPA’s audit and accounting guide titled “Personal Financial Statements,”<sup>3</sup> The reports issued on personal financial statements are standard in form, modified only for the change in financial statement names.

### *Completeness—A Special Problem in Personal Financial Statements*

One of the assertions that a client makes regarding its financial statements is that the statements are complete—that is, they reflect all of the client’s assets, liabilities, and transactions for the period. Determining the completeness of financial statements may be especially difficult in the audit of personal financial statements for several reasons. First, there is generally poor internal control because all aspects of each transaction usually are under the control of the individual. Second, some individuals may seek to omit assets and income from their personal financial statements. The motivation to conceal earnings or assets may stem from income tax or estate tax considerations, anticipation of a divorce, or illegal sources of income.

The omission of assets from financial statements is far more difficult for auditors to detect than is the overstatement of assets or omission of liabilities. Thus, in deciding whether to accept a personal financial statements audit engagement, auditors should assess the risk that an individual may be concealing assets. If auditors conclude during an engagement that the individual is concealing assets, it is doubtful that they can ever develop confidence that their audit procedures have located all the concealed assets. Therefore, they should withdraw from the engagement.

Most engagements involving personal financial statements are *not* audits, because few individuals need audited financial statements. The approaches described for reviews, compilations and financial statement preparation later in this chapter are more commonly applied to personal financial statements.

## Reviews of Historical Financial Statements

Auditors perform reviews of the financial statements of nonpublic companies, as well as reviews of the interim information of public companies.

### SSARS Reviews of Nonpublic Companies (Nonissuers)

Serving the needs of small business represents a sizable part of the practice of many public accounting firms. For a smaller public accounting firm, especially one with only a single office, nonpublic clients may represent the firm’s entire practice. To provide CPAs with guidance in meeting the accounting needs of these nonpublic (**nonissuer**) clients, the AICPA established the Accounting and Review Services Committee. This committee

<sup>3</sup> AICPA, “Personal Financial Statements,” *AICPA Audit and Accounting Guide* (New York, 2010).

## LO 19-6

Describe the nature of financial statement reviews conducted under *Statements on Standards for Accounting and Review Services*.

sets professional standards for CPAs associated with the *unaudited* financial statements, or other unaudited financial information of nonpublic companies. These standards are published in a sequentially numbered series called *Statements on Standards for Accounting and Review Services (SSARS)*. The SSARS include guidance for three types of engagements involving unaudited financial statements of nonpublic companies: **reviews** (AR-C 90), **compilations** (AR-C 80), and **preparation of financial statements** (AR-C 70). Compilation and financial statement preparation services are described in detail in the final section of this chapter.

We will refer to reviews performed under these standards as “SSARS reviews,” to distinguish them from reviews of interim information performed under the requirements of the PCAOB or the Auditing Standards Board. SSARS reviews apply in the situation in which there is no annual audit performed. The objective of such a review is to obtain limited assurance that there are no material modifications that should be made to the financial statements in order for the statements to be in conformity with GAAP, or other applicable financial reporting framework.

The AICPA *Code of Professional Conduct* requires members to comply with the standards set forth in the SSARS. Thus, the Accounting and Review Services Committee has authority comparable to that of the Auditing Standards Board (ASB). The SSARS pronouncements apply to nonpublic companies that *do not have an annual audit*. Although this ordinarily involves annual financial statements, the standard also applies to reviews of interim financial statements.

A review is an attest service in which the accountants (1) perform analytical procedures, (2) make inquiries of management and others within the organization, (3) perform other procedures considered necessary, and (4) obtain representations from management relating to the financial statements. The review report provides **limited (negative) assurance**. SSARS reviews of nonpublic companies are ordinarily performed on annual information.

#### *Screening the Client*

One of the basic elements of quality control in a public accounting firm relates to the acceptance and continuance of clients. The purpose of policies and procedures in this area is to minimize the risk of association with a client whose management lacks integrity. One means of acquiring information about a prospective client is to contact the client’s predecessor CPAs.

SSARS 19 provides guidelines for accountants who decide to make inquiries of the predecessor accountants before accepting a review (or compilation) engagement. These inquiries include questions regarding the integrity of management, disagreements over accounting principles, the willingness of management to provide or to revise information, and the reasons for the change in accountants. The decision of whether to contact the predecessor accountants is left to the judgment of the successor CPAs. However, if inquiries are made with the client’s consent, the predecessor accountants are generally required to respond.

#### *Engagement Letters*

Reviews and compilations are quite different from audits. The need to establish a clear understanding with the client concerning the nature of such services was dramatically illustrated in the *1136 Tenants’ Corporation* case discussed in Chapter 4. CPAs must avoid the implication that they are performing audits when they are engaged to perform other services. Accordingly, the professional standards require that CPAs prepare an *engagement letter* (or other suitable form of written communication) clearly specifying the objectives of the engagement, management’s responsibilities, the accountant’s responsibilities, and limitations of the engagement.

#### *Understanding the Client and Its Industry*

After a client has been accepted, the auditors obtain further understanding of both the client and its industry. This information is used to help design review procedures as well as to evaluate the responses to their inquiries and the results of the review procedures. The CPAs’ understanding of the client’s business should include a general understanding of the company’s organization, its methods of operation, and the nature of its financial statement accounts.

### Review Procedures

As we have indicated, during a review engagement the accountants (1) perform analytical procedures, (2) make inquiries of management and others within the organization, (3) perform other procedures considered necessary, and (4) obtain representations from management relating to the financial statements.

Analytical procedures (generally comparisons of accounts and ratios) are applied to the financial data by reference to prior financial statements, budgets, and other operating data. The approach used when the accountants perform analytical procedures<sup>4</sup> is to compare recorded amounts and ratios to expected values, identify significant differences that might indicate a misstatement, and then to investigate the unexpected values. For example, revenue reported by month, product line, or business segment may be compared to amounts from comparable prior periods. When unexpected differences are noted, they are investigated further by making inquiries of management or performing other procedures.

The CPAs' *inquiries* should focus on whether the financial statements are in accordance with generally accepted accounting principles, changes in business activities, significant subsequent events, and knowledge of material fraud or suspected fraud.

Other procedures performed in a review include inquiries concerning actions taken at stockholder and director meetings, reading the interim financial information, and obtaining reports from other accountants who have reviewed significant components of the company.

Although a review ordinarily does not require accountants to corroborate management's responses, they should perform the engagement with professional skepticism and consider the consistency of management responses in light of the results of other review procedures. Additional procedures should be performed if the accountants become aware that information may be incorrect, incomplete, or otherwise unsatisfactory. The accountants should perform these procedures to the extent considered necessary to obtain limited assurance that there are no material modifications that should be made to the statements. For example, if review procedures lead an accountant to question whether a significant sales transaction is recorded in conformity with generally accepted accounting principles, it may become necessary to discuss the terms of the transaction with both senior marketing and accounting personnel and to read the sales contract. Figure 19.2 summarizes analytical procedures, inquiries, and other review procedures.

**FIGURE 19.2**  
Nonpublic Company  
Analytical Procedures,  
Inquiries, and Other  
Review Procedures

<p><b>Analytical Procedures</b></p> <ul style="list-style-type: none"> <li>• Develop <i>expectations</i> by identifying and using plausible relationships that are reasonably expected to exist.</li> <li>• Compare recorded amounts or ratios developed from recorded amounts to expectations.</li> <li>• Compare the consistency of management's responses in light of results of other review procedures and knowledge of business and industry.</li> </ul> <p><b>Other Review Procedures</b></p> <ul style="list-style-type: none"> <li>• Inquire as to actions taken at shareholder, board of director, and other committees of board of directors.</li> <li>• Read financial statements.</li> <li>• Obtain reports from other accountants, if any, that have reviewed significant components.</li> </ul>	<p><b>Inquiries of Management Members with Responsibility for Financial and Accounting Matters About:</b></p> <ul style="list-style-type: none"> <li>• Whether financial statements are prepared in conformity with GAAP</li> <li>• The accounting principles, practices, and methods applied</li> <li>• Any unusual or complex situations that might affect the financial statements</li> <li>• Significant transactions taking place near the end of the period</li> <li>• Status of uncorrected misstatements identified in a previous engagement</li> <li>• Questions that have arisen in applying review procedures</li> <li>• Subsequent events</li> <li>• Knowledge of potentially material fraud or suspected fraud</li> <li>• Significant journal entries and other adjustments</li> <li>• Communications from regulatory agencies</li> </ul>
--	--

<sup>4</sup> Chapter 5 presents general guidance on analytical procedures.

Finally, the auditors must obtain a representation letter that is tailored to the circumstances of the particular engagement. However, all representation letters should be dated as of the date of the review report and include management's acknowledgment of its:

- Responsibility for the financial statements' conformity with generally accepted accounting principles and its belief that it has met this responsibility.
- Responsibility to prevent and detect fraud, as well as to divulge any knowledge that it has of any actual or suspected fraud that is material.
- Responsibility to respond fully and truthfully to all inquiries and to provide complete information, including that on subsequent events.

### *Review Reports*

The assurance provided by a review report is necessarily limited because of the limited scope of the accountants' procedures. Although these procedures may bring to the CPAs' attention significant departures from GAAP, they do not guarantee that the CPAs will become aware of all of the significant matters that would be discovered in an audit. A review is not sufficient to enable the accountants to express an opinion on the fairness of the financial statements. Therefore, the accountants' report concludes with a statement that the accountants do not express such an opinion. The body of an accountants' standard report on a review of a nonpublic company's financial statements reads as follows:

#### **Independent Accountant's Review Report**

*[Appropriate Addressee]*

We have reviewed the accompanying financial statements of XYZ Company, which comprise the balance sheet as of December 31, 20XX, and the related statements of income, changes in stockholders' equity, and cash flows for the year then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, we do not express such an opinion.

#### *Management's Responsibility for the Financial Statements*

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

#### *Accountant's Responsibility*

Our responsibility is to conduct the review engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our report.

#### *Accountant's Conclusion*

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

*[Signature of accounting firm or accountant, as appropriate]*

[Accountant's city and state]

[Date of the accountant's review report]

The date of an accountant's review report should not be earlier than the date on which the accountant has accumulated review evidence sufficient to provide a reasonable basis

for providing limited assurance on the financial statements. Also, although not required, the accountant may consider marking each page of the financial statements with a caption such as “See Accountants’ Review Report.”

To provide any degree of assurance about the fairness of information, the CPAs must be independent. Thus, professional standards require the accountants to be independent of the client.

#### *Departures from Generally Accepted Accounting Principles*

A modification of the report is required when the accountants become aware of a material departure from generally accepted accounting principles (or some other comprehensive basis of accounting). The departure is referred to in the report’s fourth paragraph, as illustrated below:

With the exception of the matter described in the following paragraph, we are not aware of any material modifications. . . .

Notice that the report is neither “qualified” nor “adverse” in form as would be the case with an audit report in which a departure from GAAP exists. Audit reports, not review reports, result in an opinion, whether it is unmodified, qualified, or adverse.

In a separate paragraph of the review report, the departure will be described. The following is an example of a report paragraph that discusses a departure from generally accepted accounting principles:

As disclosed in Note 6 to the financial statements, generally accepted accounting principles require that land be stated at cost. Management has informed us that the Company has stated its land at appraised value and that, if generally accepted accounting principles had been followed, the land account and stockholders’ equity would have been decreased by \$500,000.

Review reports are not required to be altered in situations involving a lack of consistent application of generally accepted accounting principles or the existence of major uncertainties (including going-concern uncertainties) that have been properly reported in the financial statements. However, when that information is not properly presented or disclosed in the financial statements, the financial statements contain a departure from generally accepted accounting principles, and the review report should be appropriately modified. Finally, in all circumstances in which an accountant is unable to perform the necessary review procedures due to a scope limitation, the review is considered incomplete and no review report should be issued.

#### *Review Reports on Comparative Statements*

As with audited financial statements, accountants who have reviewed prior-period financial statements presented with those of the current period should report on both years. If the accountants have reviewed both sets of financial statements, they will merely update their review report on the prior year by issuing one review report covering both years. The report will be dated as of the completion of the current year’s review procedures.

In certain situations, the accountants may be engaged to perform a lower level of service on the current year’s financial statements than they performed on the prior year’s financial statements (e.g., a review this year and an audit last year or a compilation this year and a review last year). In these situations, the CPAs should not update the prior year’s report. This would imply that they have performed those types of services to the date of the current year’s report. Instead, the CPAs should either reissue the prior year’s report bearing its original date and present it with the current year’s report, or include a reference to the prior year’s report in the current year’s report. For example, the following

## Illustrative Case

### *Difference between CPAs' Responsibilities*

The difference between CPAs' responsibilities when performing audits and reviews of financial statements was dramatically illustrated by the ZZZZ Best case. ZZZZ Best, Inc. was a company engaged in the business of carpet cleaning and restoring fire- and flood-damaged buildings. The company, which was founded by 16-year-old Barry Minkow, reported operating results that were almost wholly fictitious.

In the review of the financial statements of ZZZZ Best, the partner-in-charge of the engagement insisted upon

observing two major restoration jobs, a finished job, and a carpet warehouse. However, Minkow and other officers of the company cleverly faked these locations. As a result, the observations did not result in detection of the fraud, and the public accounting firm also agreed not to make follow-up contacts with the insurance companies and building owners involved. The court ruled that the accounting firm was not liable for failing to detect the misstatements of the financial statements. The court noted that the accountants' review report specifically disclaimed an opinion on ZZZZ Best's financial statements.

paragraph could be added to a compilation report on the current year's financial statements to refer to a review of the comparative financial statements for the prior year.

The accompanying 20X1 financial statements of XYZ Company were previously reviewed by us, and our report dated March 1, 20X2, stated that we were not aware of any material modifications that should be made to those statements in order for them to be in conformity with generally accepted accounting principles. We have not performed any procedures in connection with that review engagement after the date of our report on the 20X1 financial statements.

A reference similar to the one above should also be included in the current report when another public accounting firm, whose report is not presented, reviewed the comparative financial statements.

### *Other Communications*

As with annual financial statement audits, the CPAs should communicate to the audit committee the information about significant adjustments found during the review and the acceptability and quality of significant accounting policies and estimates. The audit committee should also be informed about any disagreements with management over accounting principles or review procedures, or any other difficulties encountered in performing the review. These communication responsibilities with respect to an audit were described in detail in Chapter 16. Finally, the CPAs should make sure that the audit committee is informed about any instances of fraud or illegal acts that come to their attention, as well as any significant deficiencies and material weaknesses related to the preparation of financial statements.

## PCAOB and Auditing Standards Board Reviews of Interim Information

**Public companies (issuers)** are required to have annual audits and *interim reviews* of the first three quarters of the year prior to public release of that information. The guidance for public companies interim reviews is included in PCAOB 722. **Nonpublic companies** that have their annual financial statements audited also may choose to undergo interim reviews in accordance with Auditing Standards Board (ASB) standards (AICPA AU-C 930). Interim reviews under standards of the PCAOB and the Auditing Standards Board are both very similar to reviews performed under the SSARS.

As is the case with a SSARS review, a starting point for a PCAOB or ASB interim review is to establish an understanding with the client regarding the nature of the engagement. The understanding, which preferably should be in writing, includes information on management's responsibilities, the accountants' responsibilities, and the nature of

## LO 19-7

Discuss how reviews performed under *Statements on Standards for Accounting and Review Services* differ from those performed under the *Statements on Auditing Standards*.

reviews. An engagement letter is often used to document the understanding. A review includes obtaining an understanding of the client's business and internal control, performing review procedures, and communicating results.

Since PCAOB and ASB interim reviews are very similar in scope to those of SSARS reviews, we will not go through these engagements in detail. We simply highlight the following major differences:

- PCAOB and Auditing Standards Board reviews are conducted on interim information of public and nonpublic companies that have had annual audits, while SSARS reviews are conducted on nonpublic companies that have not had an annual audit. Public companies must undergo interim reviews; it is an option for nonpublic companies.
- The most significant procedural difference between a SAARS and an ASB or PCAOB interim review is that the latter two require that the accountant obtain a more detailed understanding of the company's business and particularly its internal control. The understanding that is necessary for an ASB or PCAOB interim review is one that allows the accountants to identify types of potential material misstatements and their likelihood of occurrence. This understanding allows them to select appropriate procedures that serve as the basis for the review.
- The accountants ordinarily are not required to issue a review report on interim financial statements.<sup>5</sup> The decision on report issuance is made by the accountant and the client.
- Although the ASB interim review report is very similar to the SSARS report, the PCAOB report differs somewhat and is presented below.

#### Report of Independent Registered Public Accounting Firm

We have reviewed the balance sheet and related statements of income, retained earnings, and cash flows of ABC Company and consolidated subsidiaries as of September 30, 20X2 and 20X1, and for the three-month and nine-month periods then ended. These financial statements are the responsibility of the company's management.

We conducted our review in accordance with the *standards of the Public Company Accounting Oversight Board*. A review of interim financial information consists principally of applying *analytical procedures* to financial data and making *inquiries* of persons responsible for financial and accounting matters. It is *substantially less in scope than an audit* conducted in accordance with generally accepted auditing standards, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we *do not express such an opinion*.

Based on our review, we are *not aware of any material modifications* that should be made to the accompanying financial statements for them to be in conformity with generally accepted accounting principles.

## Compilation and Preparation of Historical Financial Statements

## LO 19-8

Explain the accountant's responsibilities when compiling or preparing financial statements.

The public accounting profession has developed financial statement compilation and preparation services to respond to clients that request financial statement assistance. Because neither compilation nor preparation results in accountants providing assurance on the financial statements, accountants performing such services need not be independent of their client. The following two sections describe these two services: compilation and preparation of financial statements.

<sup>5</sup> An exception is that a document containing the reviewed interim financial information makes reference to the accountant's review—in such a situation, a review report must be issued.

## Compilation of Financial Statements

A compilation involves assisting management in presenting financial information in the form of financial statements.<sup>6</sup> To perform a compilation, SSARS require the accountants to have knowledge of the accounting principles and practices used within the client's industry and a general understanding of the client's business transactions and accounting records. The accountants should evaluate the client's representations in light of this knowledge.

At a minimum, the accountants should read the compiled statements for appropriate format and to identify obvious material misstatements. When performing a compilation, the accountants must not accept patently unreasonable information. If the client's information appears to be incorrect, incomplete, or otherwise unsatisfactory, the accountants should insist upon revised information. If the client refuses to provide revised information, the accountants should withdraw from the engagement. Beyond these basic requirements, accountants have no responsibility to perform any investigative procedures to substantiate the client's representations.

In a compilation report the accountants provide no assurance on the financial statements. The following is a standard report:

Management is responsible for the accompanying financial statements of XYZ Company, which comprise the balance sheet as of December 31, 20X2 and the related statements of income, changes in stockholder's equity, and cash flows for the years then ended, and the related notes to the financial statements in accordance with accounting principles generally accepted in the United States of America. We have performed a compilation engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. We did not audit or review the financial statements nor were we required to perform any procedures to verify the accuracy or completeness of the information provided by management. Accordingly, we do not express an opinion, a conclusion, nor provide any form of assurance on these financial statements.

*Signature (accountant or accountant's firm)*

City and state where accountant practices

Date (date accountant completed required procedures)

Although not required, each page of the unaudited financial statements may be marked "See Accountants' Compilation Report," or "See Accountant's Report." The accountants' report should be dated as of the completion of compilation procedures.

Accountants may issue a compilation report on one or more individual financial statements, without compiling a complete set of statements. Also, financial statements may be compiled on a framework of accounting *other than* generally accepted accounting principles. In this case, the basis of accounting used must be disclosed either in the statements or in the accountants' report.

### *Departures from Generally Accepted Accounting Principles*

Treatment of departures from generally accepted accounting principles parallels that for reviews of financial statements. A departure from generally accepted accounting principles requires the accountants to discuss the departure in a separate paragraph in the compilation report. If the accountant believes that modification of the standard report is not adequate to indicate the deficiencies in the financial statements, the accountant should withdraw from the engagement. As is the situation with review reports, compilation reports are not required to be altered in situations involving a lack of consistent application of generally accepted accounting principles or the existence of major uncertainties (including going-concern uncertainties) that have been properly reported in the financial statements. When that information is not properly reported in the financial statements, the accountants should modify the compilation report for a departure from generally accepted accounting principles.

<sup>6</sup> Previous compilation standards stated that compilations are attest engagements. The current standards do not explicitly include that statement.

*Compilations That Omit Substantially All Disclosures*

The numerous disclosures required by generally accepted accounting principles may not be particularly useful in the financial statements of a nonpublic business, especially when the statements are intended for internal use by management. Therefore, a nonpublic client may request CPAs to compile financial statements that omit substantially all of the disclosures required by GAAP. CPAs may compile such statements, provided that the omission is not undertaken to mislead financial statement users and clearly indicated in the accountants' report. In such situations, the accountants should add the following last paragraph to their report:

Management has elected to omit substantially all of the disclosures required by generally accepted accounting principles. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the company's financial position, results of operations, and cash flows. Accordingly, these financial statements are not designed for those who are not informed about such matters.

If the client wishes to include only some of the disclosures required by GAAP, these disclosures may be labeled "Selected Information—Substantially All Disclosures Required by Generally Accepted Accounting Principles Are Not Included."

*Compilations of Information in Prescribed Forms*

Prescribed forms refer to standard preprinted forms designed or adopted by the institution or agency to which the form is to be submitted. An example is a bank loan application. Since these prescribed forms often require financial statement items to be presented on a basis other than generally accepted accounting principles, accountants compiling the forms indicate that the financial statements are presented in accordance with the requirements of the regulatory body rather than GAAP. The accountants should modify the report to point out material departures from the requirements of the prescribed form.

*Compilations When the CPAs Are Not Independent*

CPAs may perform compilations even when they are not independent of the client. However, they should indicate their lack of independence by adding the following last paragraph to their compilation report:

We are not independent with respect to XYZ Company.

The CPAs may also provide reason(s) for the lack of independence (e.g., a member of the audit team had a direct financial interest in XYZ Company).

## Preparation of Financial Statements

Accountants may be engaged to prepare financial statements (or a single financial statement), but not perform an audit, review or compilation of those financial statements.<sup>7</sup> Preparation of financial statements involves a CPA preparing (assembling) financial statements from client records. The service is considered a nonattest service and it ordinarily does not result in issuance or an accountant's report. When preparing financial statements the accountants need not be independent of the client, in fact, they need not even determine whether they are independent.<sup>8</sup>

<sup>7</sup> AR-C 70 presents the requirements for financial statement preparation. That section is not applicable to a number of financial statement related services such as maintaining schedules (e.g., depreciation), preparing certain adjusting entries, entering general ledger transactions, processing payments in an accounting software system, or drafting financial statement notes. Also, its requirements do not apply when financial statements are prepared for:

- Submission to a taxing authority or preparation of financial statements prepared.
- Inclusion in written personal financial plans.
- Litigation services, involving pending or potential legal or regulatory proceedings.

<sup>8</sup> This requirement differs from compilations in which a determination of independence must be made and a lack of independence communicated in their compilation report.

When preparing a client's financial statements a written engagement letter (or other suitable form of written agreement) is required; the letter should be signed by both the accountant (or the accountant's firm) and management. Alternatively, in certain circumstances it may be appropriate for other parties (e.g., those charged with governance) to sign the letter instead of or in addition to management.

Accountants prepare the financial statements using the client's records, documents, explanations and other information provided by management. To perform the engagement, the accountants should have or obtain an understanding of the financial framework adopted by management for preparation of the financial statements (e.g., generally accepted accounting principles) and the significant accounting policies adopted by management. If the accountants become aware that the information used in the preparation of the financial statements is incomplete or inaccurate, they should bring the matter to the attention of management and obtain additional or corrected information. While this will ordinarily solve the problem, the accountants should withdraw from the engagement if management fails to provide the corrected or additional information requested.

Each page of the financial statements should include a statement indicating that (1) no CPA provides any assurance on them or (2) the statements have not been audited or reviewed, and no CPA expresses an opinion or conclusion nor provides any assurance on them. If the accountant is unable to include such a statement on each page of the financial statements, a disclaimer such as the following is required to be issued and accompany the financial statements:

The accompanying financial statements of XYZ Company as of and for the year ended December 31, 20X3, were not subjected to an audit, review, or compilation engagement by us and, accordingly, we do not express an opinion, a conclusion, nor provide any assurance on them.

As is the situation with compiled financial statements, in some circumstances a client may wish to issue financial statements that omit many of the disclosures required by generally accepted accounting principles (or other basis of accounting being followed). In such a situation the following may be added by the disclosures that are included: "Selected Information—Substantially All Disclosure Required By Generally Accepted Accounting Principles Are Not Included." Figure 19.3 provides a comparison of financial statement preparation and compilation.

**FIGURE 19.3** Comparison of Financial Statement Preparation and Compilation

Issue	Preparation	Compilation
Source of standards?	AR-C 70	AR-C 80
What is basic service being provided?	Prepare financial statements.	Prepare financial statements.
Is the accountant required to determine if he or she is independent of the client?	No	Yes
If the accountant is not independent, is that fact required to be disclosed in accountant's report?	Not applicable	Yes
Engagement letter (or equivalent) signed by management and accountant required?	Yes	Yes
Does the engagement require an accountant's report?	No*	Yes
May the financial statements omit notes?	Yes	Yes
Departures from GAAP (or other criteria)?	Withdraw from engagement.	Modify compilation report; if modification is inadequate, withdraw from engagement.

\* When an accountant is engaged to prepare financial statements, the accountant is required to include an adequate statement on each page of the financial statements indicating that no CPA provides any assurance on the financial statements. If the accountant is unable to include an adequate statement on each page of the financial statements, the accountant is required to issue a disclaimer on the financial statements.

## Chapter Summary

This chapter described CPA services on historical financial information other than audits of corporation financial statements in accordance with U.S. generally accepted accounting principles. To summarize:

1. Auditors sometimes are asked to provide additional assurance services after having conducted an audit. Regulatory requirements and debt agreements often require companies to provide compliance reports prepared by their auditors, including limited assurance about whether the company has complied with the particular requirements. In letters for underwriters (comfort letters), the auditors provide limited assurance about various information contained in registration statements used for the sale of securities. Also, clients may issue summary financial statements developed from audited financial statements, and CPAs may attest as to whether they are consistent, in all material respects, with the audited financial statements.
2. The professional standards define *special-purpose financial reporting frameworks* as: (a) cash basis, (b) tax basis, (c) regulatory basis, and (d) contractual basis. CPAs may audit financial statements following these bases and issue an audit report that alerts users to the basis being followed. Financial statements following a regulatory or contractual basis are ordinarily restricted to the use of those in the company, the parties to the contract or agreement, or regulatory agencies.
3. The nature of auditors' reporting responsibilities on financial statements prepared using a financial framework generally accepted in another country depends upon whether there will be use of those financial statements in the United States. When the intended use is only outside the United States, the auditors may issue a U.S. form of report modified as appropriate, or the standard report of the other country. When use is also intended in the United States, a second report is issued using a U.S. form, with alterations that depend upon whether a nonpublic or public company is involved.
4. Auditors may audit and issue an opinion on single financial statements and specific elements, accounts, or items of a financial statement. However, they must design the engagement to provide appropriate sufficient audit evidence about the subject matter of the audit.
5. There are several major differences between personal financial statements and those of other types of organizations. For example, assets and liabilities on personal financial statements are presented at their estimated current values and amounts. Accountants may audit, review, or compile personal financial statements.
6. Nonpublic companies that do not have annual audits may engage CPAs to review their annual or interim financial statements under *SSARS*. The procedures performed in a review engagement consist primarily of (1) performing analytical procedures, (2) making inquiries of management and others within the organization, (3) performing other procedures considered necessary, and (4) obtaining representations from management relating to the financial statements. A review report provides limited (negative) assurance that the financial statements contain no material departures from GAAP. The accountants will adjust the specific procedures based on their knowledge of the client's internal control and business.
7. Public companies must engage CPAs to review the company's interim financial statements while nonpublic companies that have annual audits may choose to do so; these reviews are under ASB or PCAOB standards. These interim reviews are similar in nature to those performed under *SSARS*. However, under ASB and PCAOB standards, the auditors must obtain an understanding of client internal control.
8. In financial statement compilation and preparation engagements accountants provide no assurance with respect to the financial statements. Neither form of association requires accountant independence. A compilation results in an accountant's report with no assurance. Financial statement preparation ordinarily results in no accountant's report, unless the financial statements do not make clear that accountants are providing no assurance.

## Key Terms Introduced or Emphasized in Chapter 19

**Comfort letter (739)** A letter issued by the independent auditors to the underwriters of securities registered with the SEC under the Securities Act of 1933. Comfort letters deal with such matters as the auditors' independence and the compliance of unaudited data with requirements of the SEC.

**Compilation (747)** An accounting service with the objective of assisting management in presenting financial information in the form of financial statements without obtaining or providing any assurance on those statements.

**Financial reporting framework (740)** A set of criteria used to determine measurement, recognition, presentation, and disclosure of all material items appearing in the financial statements. Financial reporting frameworks may be general-purpose financial reporting frameworks or special-purpose financial reporting frameworks.

**General-purpose financial reporting frameworks (740)** Financial reporting frameworks designed to meet the common financial information needs of a wide range of users. Examples of general-purpose financial reporting frameworks are accounting principles generally accepted in the United States of America and *International Financial Reporting Standards* issued by the International Accounting Standards Board.

**Limited assurance (negative assurance) (747)** The level of assurance provided by CPAs who review historical financial statements.

**Negative assurance (747)** An assertion by CPAs that after applying limited investigative techniques to certain information, they are not aware of the need to modify the presentation of the information. Negative assurance is equivalent to limited assurance.

**Nonissuer (746)** A company whose securities are *not* registered under requirements of the Securities and Exchange Commission; ordinarily, a "nonissuer" is a nonpublic company. This is in contrast to an issuer, a company whose securities are registered under the requirements of the Securities and Exchange Commission.

**Nonpublic company (751)** A company other than one whose securities are traded on a public market or one that makes a filing with a regulatory agency in preparation for the sale of securities on a public market.

**Preparation of financial statements (754)** An accounting service that involves a CPA preparing (assembling) financial statements from client records. No assurance is provided and, ordinarily, no accountant's report is issued.

**Public company (issuers) (751)** A company whose stock is traded on a public market or a company in the process of registering its stock for public sale.

**Review of financial statements (747)** A form of attestation based on inquiry and analytical procedures applied for the purpose of expressing limited assurance that historical financial statements are presented in accordance with generally accepted accounting principles or some other appropriate basis.

**Special-purpose financial reporting frameworks (740)** Financial reporting frameworks other than GAAP, which are one of the following bases of accounting: cash basis, tax basis, regulatory basis, and contractual basis. Common special-purpose financial reporting frameworks include:

**Cash basis.** The cash receipts and disbursements basis of accounting, and modifications of the cash basis having substantial support, such as recording depreciation on fixed assets or accruing income taxes.

**Tax basis.** The basis of accounting that the entity uses or expects to use to file its income tax return for the period covered by the financial statements.

**Regulatory basis.** A basis of accounting in accordance with the requirements or financial reporting provisions of a regulatory agency to whose jurisdiction the entity is subject. An example is a basis of accounting that insurance companies use pursuant to the rules of a state insurance commission.

**Contractual basis.** A basis of accounting in accordance with an agreement between the entity and one or more third parties other than the auditors.

**Summary financial statements (condensed financial statements) (740)** Historical financial information that is derived from the financial statements but contains less detail, while still providing a structured representation consistent with the financial statements.

## Review Questions

- 19-1. Evaluate this statement: "All companies should be audited annually."
- 19-2. Evaluate this statement: "Auditors perform attestation services and accountants perform accounting services."
- 19-3. In communications with clients, should CPAs refer to themselves as auditors or as accountants? Explain.
- 19-4. Can auditors express an unmodified opinion on financial statements that are not presented on the basis of generally accepted accounting principles? Explain.
- 19-5. Provide four types of special-purpose financial reporting frameworks.
- 19-6. Comment on the following: "Because of the nature of the frameworks the clients use, audits of *special-purpose* financial reporting frameworks result in an audit report that is restricted for use by those within the entity."
- 19-7. A client has prepared financial statements using a financial reporting framework generally accepted in another country. The statements are intended only to be used in that country. Describe the auditor's reporting options.
- 19-8. Jane Wilson has prepared personal financial statements in which her assets are valued at her historical cost, less appropriate depreciation. Is this presentation in conformity with generally accepted accounting principles? Can a public accounting firm audit these statements and issue a standard unmodified opinion?
- 19-9. What are the general types of procedures performed during a review of the quarterly financial statements of a company that has audits of its annual financial statement?
- 19-10. Describe a unique reporting aspect about the CPAs' required review of the quarterly financial statements of public companies.
- 19-11. How do CPAs of public companies assist audit committees in performing their oversight function with respect to quarterly financial statements?
- 19-12. What types of services may be performed by CPAs with respect to the financial statements of nonpublic companies?
- 19-13. How does a review of the financial statements of a nonpublic company differ from an audit?
- 19-14. What are the types of procedures performed during the review of the financial statements of a nonpublic company?
- 19-15. Are engagement letters needed for accounting and review services? Explain.
- 19-16. What is the purpose of a comfort letter? Discuss.
- 19-17. What form of opinion will the auditors normally issue with respect to *summary financial statements* that the client has developed from the audited financial statements?
- 19-18. What procedures are required when a CPA performs a compilation of financial statements?
- 19-19. Can the CPAs report on a nonpublic client's financial statements that omit substantially all disclosures required by generally accepted accounting principles? Explain.
- 19-20. What should the accountants do if they discover that the financial statements they are compiling contain a material departure from generally accepted accounting principles?
- 19-21. When a CPA has prepared a client's financial statements how is the fact that no assurance is provided indicated?
- 19-22. Assume that a public accounting firm is reviewing the financial statements of a nonpublic company and discovers that the firm is not independent. What options are available to the firm?

## Questions Requiring Analysis LO 19-6, 8

*Required:*

- 19-23. You have been asked by Ambassador Hardware Co., a small nonpublic company, to submit a proposal for the audit of the company. After performing an investigation of the company, including its management and accounting system, you advise the president of Ambassador that the audit fee will be approximately \$20,000. Ambassador's president was somewhat surprised at the fee, and after discussions with members of the board of directors, he concluded that the company could not afford an audit at this time.
  - a. Discuss management's alternatives to having their company's financial statements audited in accordance with generally accepted auditing standards.

- b. What should Ambassador's management consider when selecting the type of service that you should provide? Explain.

**LO 19-2** 19–24. Schmich and Schmich, CPAs in Minneapolis, Minnesota, has completed the audit of XYM Co. for the year ended December 31, 20X1. The financial statements for this nonpublic client are prepared following the cash basis of accounting.

Note 7 to the financial statements refers to an uncertainty due to material litigation against XYM related to an employee's charges of age discrimination that the employee believes result in his inability to secure a promotion.

Schmich and Schmich has determined that an unmodified opinion is appropriate, although the uncertainty should be referred to in the audit report.

*Required:* Draft the opinion, basis of accounting, and emphasis-of-matter paragraphs of the audit report.

**LO 19-4** 19–25. Occasionally, public accounting firms are engaged to report on specified elements, accounts, and items of financial statements.

*Required:* a. Discuss three types of reports that may be provided for specified elements, accounts, and items of financial statements.

b. Why should reports on the application of agreed-upon procedures to information be restricted to specified users?

**LO 19-6** 19–26. You have been engaged by the management of Pippin, Inc., a nonpublic company, to review the company's financial statements for the year ended December 31, 20XX. To prepare for the engagement, you consult the *Statements on Standards for Accounting and Review Services*.

*Required:* a. Discuss the procedures required for the performance of a review of financial statements.

b. Explain the content of the report on a review of financial statements.

c. Discuss your responsibilities if you find that the financial statements contain a material departure from generally accepted accounting principles.

**LO 19-1** 19–27. In connection with a public offering of first-mortgage bonds by Guizzetti Corporation, the bond underwriter has asked Guizzetti's CPAs to furnish it with a comfort letter giving as much assurance as possible on Guizzetti's unaudited financial statements for the three months ended March 31. The CPAs had expressed an unqualified opinion on Guizzetti's financial statements for the year ended December 31, the preceding year; they also performed a review of Guizzetti's financial statements for the three months ended March 31. Nothing has come to their attention that would indicate that the March 31 statements are not properly presented.

*Required:* a. Explain what can be stated about the unaudited financial statements in the letter.

b. Discuss other matters that are typically included in comfort letters.

**LO 19-8** 19–28. Andrew Wilson, CPA, has assembled the financial statements of Texas Mirror Co., a small nonpublic company. He has not performed an audit of the financial statements in accordance with generally accepted auditing standards. Wilson is confused about the standards applicable to this type of engagement.

*Required:* a. Explain where Wilson should look for guidance concerning this engagement.

b. Explain Wilson's responsibilities with respect to a preparation of these financial statements.

## Objective Questions

All applicable questions are available with McGraw-Hill's *Connect® Accounting*. 

### 19–29. Multiple Choice Questions

Select the best answer for each of the following and explain fully the reason for your selection.

**LO 19-6** a. Which of the following is *not* typically performed when the auditors are performing a review of client financial statements?

(1) Analytical procedures applied to financial data.

(2) Inquiries about significant subsequent events.

(3) Confirmation of accounts receivable.

(4) Obtaining an understanding of accounting principles followed in the client's industry.

## LO 19-6

- b. Which of the following must be obtained in a review of a nonpublic company?

	Engagement Letter	Representation Letter
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 19-6, 8

- c. A CPA who is *not* independent may perform which of the following services for a nonpublic company?

	Compilation	Review
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 19-6

- d. When performing a review of a nonpublic company, which is *least* likely to be included in auditor inquiries of management members with responsibility for financial and accounting matters?

- (1) Subsequent events.
- (2) Significant journal entries and other adjustments.
- (3) Communications with related parties.
- (4) Unusual or complex situations affecting the financial statements.

## LO 19-4

- e. The proper report by an auditor relating to summarized financial statements includes:

- (1) A statement about the type of opinion expressed in the prior year.
- (2) An adverse opinion.
- (3) An opinion on whether the summarized information is fairly stated in all material respects in relation to the basic financial statements.
- (4) No assurance on the information.

## LO 19-7

- f. Concerning interim quarterly financial statements, management of public companies:

- (1) Must engage CPAs to audit the statements.
- (2) Must engage CPAs to review the statements.
- (3) May choose to engage CPAs to review the statements.
- (4) May not engage CPAs to become associated with the statements.

## LO 19-8

- g. A proper compilation report on financial statements that omit note disclosures:

- (1) Includes an adverse opinion.
- (2) Includes a disclaimer of opinion on the accuracy of such note disclosures.
- (3) Indicates that management has omitted such information.
- (4) Indicates that note disclosures are not necessary for those not informed about such matters.

## LO 19-1, 6, 8

- h. Which of the following forms of accountant association is *least* likely to result in issuance of an accountant's report on financial statements or financial information?

- (1) Compilation.
- (2) Review.
- (3) Preparation.
- (4) Agreed-upon procedures.

## LO 19-5

- i. Which assertion is generally most difficult to attest to with respect to personal financial statements?

- (1) Existence and occurrence.

- (2) Rights and obligations.
- (3) Completeness.
- (4) Valuation.

**LO 19-2**

- j. Financial statements prepared following which of the following are most likely to be considered a special-purpose financial reporting framework?
- (1) Generally accepted accounting principles.
  - (2) *International Financial Reporting Standards*.
  - (3) Financial reporting standards of a foreign nation.
  - (4) The cash basis of accounting.

**LO 19-6, 8**

- k. In which of the following reports should a CPA *not* express negative (limited) assurance?
- (1) A standard compilation report on financial statements of a nonpublic entity.
  - (2) A standard review report on interim financial statements of a public entity.
  - (3) A standard review report on financial statements of a nonpublic entity.
  - (4) A comfort letter on financial information included in a registration statement filed with the Securities and Exchange Commission.

**LO 19-1**

- l. Comfort letters to underwriters are normally signed by the:
- (1) Independent auditor.
  - (2) Underwriter.
  - (3) Client's lawyer.
  - (4) Chief executive officer.

- LO 19-2** 19–30. The following statements relate to auditor reporting on financial statements prepared using special-purpose financial reporting frameworks. For each, indicate whether the statement is correct or incorrect.

Statement	Correct	Incorrect
1. A special-purpose financial reporting framework is any framework other than GAAP.		
2. Some, but not all, special-purpose frameworks require an indication that the financial statements are intended solely for certain specified users.		
3. An audit report on financial statements that are prepared using a special-purpose framework must include an emphasis-of-matter paragraph alerting users that the financial statements were prepared in accordance with the framework.		
4. An audit report on financial statements that are prepared using a special-purpose framework must in all circumstances include a description of the purposes for which the statements are prepared.		
5. An audit opinion on financial statements that use a special-purpose framework may be unmodified.		
6. The <i>Attestation Standards</i> , not the <i>Statements on Auditing Standards</i> apply to engagements involving special purpose frameworks.		
7. If a regulatory agency requires a particular layout for the audit report, the auditor may be able to use that layout rather than the suggested report included in the <i>Professional Standards</i> .		
8. An audit report on financial statements that are prepared using a special-purpose framework will indicate that the audit was conducted in accordance with the special-purpose financial reporting framework auditing standards.		

- LO 19-3** 19–31. Bill Jones, the president of AMTO, a nonpublic audit client of your firm, has come to you and indicated that his company established a subsidiary in the country of Laos this year and that he wants your firm to issue an audit report on that subsidiary for use in Laos for various purposes. The financial statements should follow Laotian generally accepted principles. Answer the following questions relating to this situation.

Question	Yes	No
1. Is this considered an audit of financial statements using a special-purpose financial reporting framework?		
2. In performing the audit, must your firm consider GAAS to the extent the standards are appropriate?		
3. If the financial statements are intended for use only outside the United States, must an audit report include an opinion on whether U.S. GAAP are followed?		
4. If the resulting audit report will be used extensively both in the United States and in Laos, must the report include an opinion on whether U.S. GAAP are followed?		
5. If Laotian generally accepted auditing standards do not require the Laotian form of audit report, may your firm use the U.S. report form and modify it as necessary?		
6. If Laotian generally accepted auditing standards do not require the Laotian form of audit report, may your firm use the Laotian report form?		
7. Must a paragraph be added to the report indicating that the financial statements are intended solely for certain specified users?		

**LO 19-2** 19–32. State whether you agree or disagree with each of the following relating to the topic of special-purpose financial reporting frameworks.

- International Financial Reporting Standards* are considered a special-purpose financial reporting framework.
- Cash basis financial statements are considered as having been prepared following a special-purpose financial reporting framework, and their use should be restricted to specified users.
- Financial statements prepared following a contractual basis are considered as having been prepared following a special-purpose financial reporting framework, and their use should be restricted to specified users.
- An emphasis-of-matter paragraph should be added to a cash basis set of financial statements indicating that the framework is other than GAAP.
- When financial statements are prepared following a contractual basis, the auditors must obtain an understanding of significant management interpretations of the contract.

**LO 19-2, 4, 8** 19–33. **Simulation**

Indicate whether a CPA may provide each of the following services, and whether independence is required, by placing a check in the appropriate box.

Service	May Provide; Independence Is Required	May Provide; Independence Is Not Required	May Not Provide
a. Provide an opinion on whether financial statements are prepared following the cash basis of accounting.			
b. Compile the financial statements for the past year and issue a publicly available report.			
c. Apply certain agreed-upon procedures to accounts receivable for purposes of obtaining a loan, and express a summary of findings relating to those procedures.			
d. Review quarterly information and issue a report that includes limited assurance.			
e. Perform an audit of the financial statements on whether they are prepared following generally accepted accounting principles.			
f. Prepare the financial statements for the past year.			

**LO 19-1, 4, 6, 7, 8** 19–34. **Simulation**

Auditors who audit public and nonpublic companies must be familiar with professional standards developed by a variety of sources. For each of the types of services below, indicate the proper source of professional requirements. Each source may be used once, more than once, or not at all.

Service	Source of Standards
a. An annual review of the financial statements of a nonpublic company. b. A quarterly review of the financial statements of a nonpublic company that has an annual audit. c. A quarterly review of the financial statements of a public company that has an annual audit. d. An audit of the financial statements of a nonpublic company. e. A compilation of the financial statements of a nonpublic company. f. A quarterly review of the financial statements of a nonpublic company that annually has a review of its financial statements. (Note: The question is on the quarterly review.) g. A letter to an underwriter of a public company. h. A report on summary financial statements of a nonpublic company. i. An audit of a public company.	1. Accounting and Review Services Committee <i>Statements on Standards for Accounting and Review Services</i> 2. Auditing Standards Board <i>Statements on Auditing Standards</i> 3. PCAOB <i>Auditing Standards</i>

**Problems**

All applicable problems are available with McGraw-Hill's **Connect® Accounting**. 

- 19–35. Jiffy Clerical Services is a company that furnishes temporary office help to its customers. The company maintains its accounting records on a basis of cash receipts and cash disbursements. You have audited the company for the year ended December 31, 20X4, and have concluded that the company's financial statements represent a fair presentation on that basis.
- Draft the unqualified auditors' report you would issue covering the financial statements (a statement of assets and liabilities and the related statement of revenue collected and expenses paid) for the year ended December 31, 20X4.
  - Briefly discuss and justify your modifications of the conventional standard auditors' report on GAAP financial statements.
- 19–36. Loman, CPA, who has audited the financial statements of the Broadwall Corporation, a publicly held company, for the year ended December 31, 20X6, was asked to perform a review of the financial statements of Broadwall Corporation for the period ending March 31, 20X7. The engagement letter stated that a review does not provide a basis for the expression of an opinion.
- Explain why Loman's review will *not* provide a basis for the expression of an opinion.
  - What are the review procedures Loman should perform, and what is the purpose of each procedure? Structure your response as follows:

Procedure	Purpose of Procedure
(AICPA, adapted)	

**In-Class Team Case****LO 19-2, 4, 6, 8**

- 19–37. Webstar, a nonpublic company, is owned by Ben Williams and three of his friends. Previously the company's financing has been internally generated, with limited equity contributions by the owners. The company has not been audited in the past, and Williams has said to you that while he generally understands the nature of an audit, he would like to discuss services other than an audit. Specifically, he read a brief article in a management journal which described reviews, compilations, financial statements prepared following another comprehensive basis of accounting (other than generally accepted accounting principles), and auditing specified elements of financial statements. Among his questions are the following:
- Review of financial statements:*
    - Is the review form of association available for Webstar's financial statements?
    - What procedures are typically included in a review?

- (3) What type of assurance is included in a review report?
  - (4) What will result in modification of a review report?
  - (5) Williams says that he heard something about there being a requirement that every company obtain a review of its financial statements. He has been concerned, since he never has had this done. What's the story with this?
- b. *Compilation of financial statements:*
- (1) Is the compilation form of association available?
  - (2) What procedures are typically included in a compilation?
  - (3) If a compilation is performed, must a compilation report be issued?
  - (4) What type of assurance would be provided in a compilation report?
  - (5) What will result in modification of a compilation report?
- c. *Financial statements:* Williams says he isn't sure he wants to prepare financial statements following GAAP. He says he needs only statements based on the income tax method he uses to file his income taxes.
- (1) Are you able to issue an audit report based on the income tax basis?
  - (2) What type of report is this?
  - (3) How will the report issued differ from that of a GAAP audit?
- d. *Auditing a small portion of financial statements:* Williams has given some thought to having an audit of just his company's revenues for the year and receivables at year-end.
- (1) May you perform an audit of only these two accounts?
  - (2) What types of engagements are possible here?
  - (3) What type of assurance will be provided in these reports?

*Required:*

Draft brief answers to each of the above questions.

## Research LO 19-5 and Discussion Case

- 19–38. You are a young CPA just starting your own practice in Hollywood, California, after five years' experience with a "Big 4" firm. You have several connections in the entertainment industry and hope to develop a practice rendering income tax, auditing, and accounting services to celebrities and other wealthy clients.

One of your first engagements is arranged by John Forbes, a long-established business manager for a number of celebrities and a personal friend of yours. You are engaged to audit the personal statement of financial condition (balance sheet) of Dallas McBain, one of Forbes's clients. McBain is a popular rock star, with a net worth of approximately \$100 million. However, the star also has a reputation as an extreme recluse who is never seen in public except at performances.

Forbes handles all of McBain's business affairs, and all your communications with McBain are through Forbes. You have never met McBain personally and have no means of contacting the star directly. All of McBain's business records are maintained at Forbes's office. Forbes also issues checks for many of McBain's personal expenses, using a check-signing machine and a facsimile plate of McBain's signature.

During the audit, you notice that during the year numerous checks totaling approximately \$500,000 have been issued payable to Cash. In addition, the proceeds of a \$250,000 sale of marketable securities were never deposited in any of McBain's bank accounts. In the accounting records, all of these amounts have been charged to the account entitled "Personal Living Expenses." There is no further documentation of these disbursements.

When you bring these items to Forbes's attention, he explains that celebrities such as McBain often spend a lot of cash supporting various "hangers-on," whom they don't want identified by name. He also states, "Off the record, some of these people also have some very expensive habits." He points out, however, that you are auditing only the statement of assets and liabilities, not McBain's revenue or expenses. Furthermore, the amount of these transactions is not material in relation to McBain's net worth.

*Required:*

- a. Discuss whether the undocumented disbursements and the missing securities' proceeds should be of concern to you in a balance sheet-only audit.
- b. Identify the various courses of action that you might at least consider under these circumstances. Explain briefly the arguments supporting each course of action.

- c. Explain what you would do and justify your decision.
- d. Assume that you are a long-established CPA, independently wealthy, and that the McBain account represents less than 5 percent of the annual revenue of your practice. Would this change in circumstances affect your conclusion in part (c)? Discuss.

# Additional Assurance Services: Other Information

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 20-1** Describe the differences among assurance services, attestation services, and audits.
- LO 20-2** Explain the applicability of the attestation standards.
- LO 20-3** Describe the nature of attestation engagements, including examinations, reviews, and agreed-upon procedures engagements.
- LO 20-4** Describe the fundamental attributes of attestation services for prospective financial statements.
- LO 20-5** Describe the fundamental attributes of attestation services for management discussion and analysis.
- LO 20-6** Describe the nature of Trust Services.
- LO 20-7** Describe the nature of *PrimePlus/ElderCare* services.
- LO 20-8** List several developing assurance services.

To this point, we have focused primarily on services involving historical financial information, but CPAs are often asked to provide a wide range of other assurance services. In this chapter, we first focus on the broad concept of assurance services. Next, we address the attestation standards, which apply to a majority of the new assurance services. Finally, we provide a detailed description of a number of existing and developing services.

## Assurance Services

### LO 20-1

Describe the differences among assurance services, attestation services, and audits.

**Assurance services** provided by CPAs are professional services that are meant to improve the quality of information or its context for decision makers and other users.<sup>1</sup>

The AICPA's Assurance Standards Executive Committee seeks to (1) identify and prioritize emerging trends and market needs for assurance in areas not covered by other authoritative standards, and (2) develop related assurance methodology guidance and tools as needed. As such the Committee is involved with developing assurance services that are meant to assure the quality, relevance, and usefulness of information or its context for decision makers and other users.

As discussed in Chapter 1, assurance services go beyond attestation services. Figure 20.1 illustrates that while assurance services encompass audits of financial statements and all other attestation services, the concept also includes additional services. Assurance services may involve analyzing data or putting them in a form to facilitate decision making. For example, CPAs may collect information that is generally considered to be relevant to a particular decision and synthesize it for the user. CPAs may also provide assurance that the user has a complete set of information with which to make a decision. In an assurance engagement, a report may or may not be issued and, if one is issued, it could be in oral, symbolic, or any other appropriate form.

Attestation services are defined in the attestation standards (AT 101.01) as being engagements to issue an examination, review, or agreed-upon procedures report on the subject matter or an assertion about the subject matter that is the responsibility of another party.<sup>2</sup> In an attest engagement, the practitioner must evaluate the subject matter of the

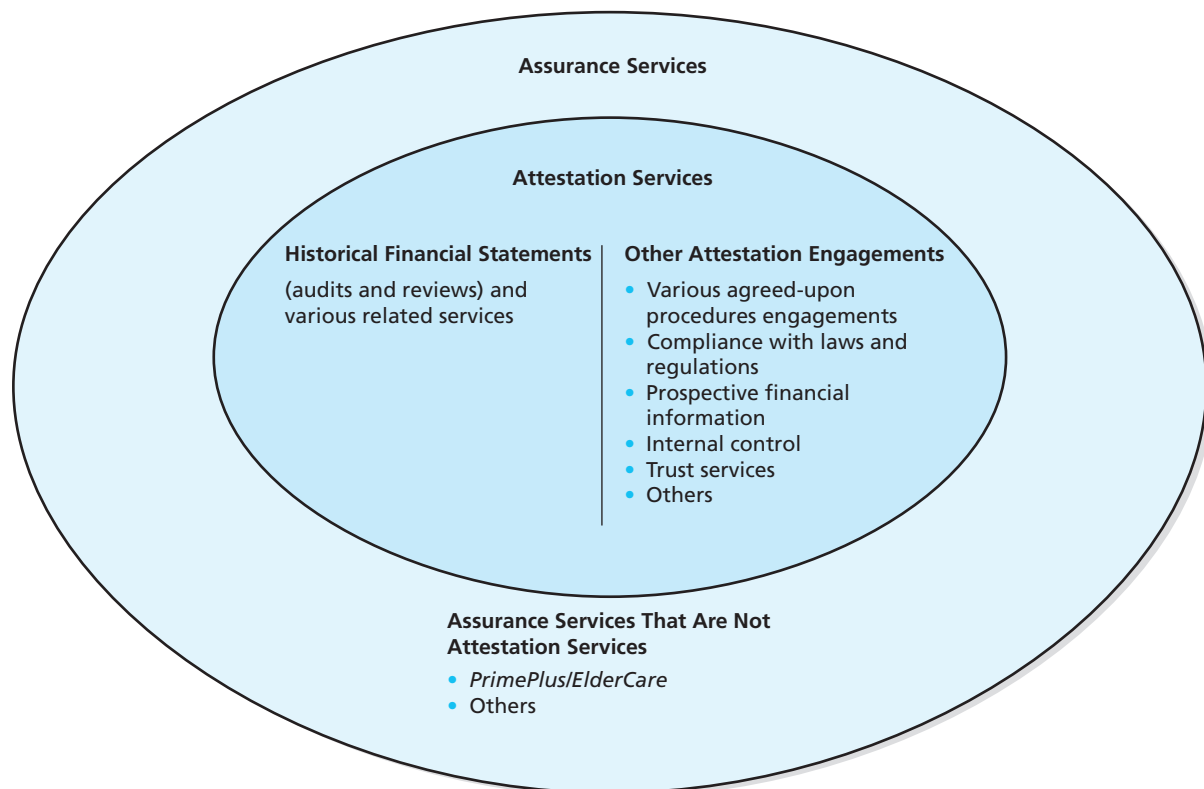

<sup>1</sup> CPAs are not alone in the role of providing assurance. Although a wide variety of examples are possible, consider information available on a wide variety of products from Consumers Union ([www.consumerreports.org](http://www.consumerreports.org)), automobile reliability provided by organizations such as Edmunds, Inc. (e.g., [www.edmunds.com](http://www.edmunds.com)), and restaurant quality from Zagat Survey ([www.zagat.com](http://www.zagat.com)). Also, because of the wide variety of assurance services provided that are discussed in this chapter, we use either *CPA* or *practitioner* rather than *auditor* throughout this chapter.

<sup>2</sup> The AICPA Code of Professional Conduct (ET 92.01) defines attestation services more generally as "engagements that require independence as defined in the AICPA *Professional Standards*."

	Illustrative Case	Types of Assurance Services
<p>In a survey of 21 large- and medium-sized CPA firms, the Special Committee on Assurance Services identified over 275 types of assurance services. A few examples will provide an</p>	<p>A wide variety of assurance services are currently being performed by accounting firms.</p>	<p>identification of the breadth of the subject matter of these engagements: (a) customer satisfaction, (b) investment performance, (c) software functionality, (d) effectiveness of risk management, (e) clinical results of in-vitro fertilization, and (f) the distance that golf balls travel.</p>

**FIGURE 20.1** The Relationship between Assurance Services and Attestation Services

engagement against **suitable criteria**.<sup>3</sup> Figure 20.2 summarizes selected characteristics of the various types of assurance engagements.

### The Demand for Assurance Services

The demand for new types of assurance services developed as a natural extension of the audit function. Management realized that contracting costs could be reduced in many situations by providing investors, creditors, customers, and others transacting with the company access to information that is *certified* as to its reliability. As with an audit, these new assurance services reduce information risk for the outside parties and thus enable the company to contract at more favorable terms.

Much of the demand for other assurance services arises from developments in information technology, which have significantly changed the expectations of information

<sup>3</sup> Recall that financial statements are prepared following an appropriate *financial reporting framework*. "Suitable criteria" is the generalization of that term to include information other than financial statements.

**FIGURE 20.2** Selected Characteristics of Assurance Services

	Assurance Services		
	Assurance Services That Are Attestation Services		Other Assurance Services
	Historical Financial Statement–Related Information	Other Attestation Engagements	
<b>Primary Source of Standards</b>	Auditing standards Review standards (SSARS)	Attestation standards	General performance standards of AICPA <i>Code of Professional Conduct</i> (Rule 201)
<b>Nature</b>	Providing assurance on the reliability of historical financial statement information	Providing assurance on the reliability of subject matter, or an assertion about subject matter, that is the responsibility of another party (other than historical financial information)	Independent professional services that assure the quality, relevance, and usefulness of information or its context
<b>Primary Forms of Engagements</b>	Audits Reviews Agreed-upon procedures	Examinations Reviews Agreed-upon procedures	No specific forms have been developed; intended to be flexible
<b>Form of Report</b>	Written	Written	Any reasonable form of communication

<b>Is Independence Required?</b>	Yes	Yes	Yes

users. The fact that users can now instantaneously access a broad range of online information customized to their needs certainly has current and expected future implications for CPAs. Decision makers demand timely assurance about a wide range of financial and nonfinancial information. In addition, CPAs are using their expertise to place information in formats that improve decision making.

To date, a number of assurance services have been developed. Many of these new services are performed currently in accordance with the *Statements on Standards for Attestation Services*; an example, discussed later in this chapter, is Trust Services. Other products are being developed involving services that, at least portions of which, are not encompassed by those statements, including **PrimePlus/ElderCare** and XBRL.

## Attestation Standards

### LO 20-2

Explain the applicability of the attestation standards.

Attestation standards, presented in *Codification of the Statements on Standards for Attestation Engagements*, apply to engagements in which practitioners are engaged to issue or do issue an examination, a review, or an agreed-upon procedures report on subject matter, or an assertion about subject matter, that is the responsibility of another party. It is important to distinguish between the subject matter and the assertion about the subject matter. The **subject matter** of an **attestation engagement** may take many forms, including:

- Historical or prospective performance or condition (e.g., historical prospective financial information, performance measurements, and backlog data).
- Physical characteristics (e.g., narrative descriptions, square footage of facilities).

- Historical events (e.g., price of a market basket of goods on a certain date).
- Analyses (e.g., break-even analyses).
- Systems or processes (e.g., internal control).
- Behavior (e.g., corporate governance, compliance with laws and regulations, and human resource practices).

Generally, practitioners may attest to this subject matter at a point in time or for a period of time.

An **assertion** is a declaration about whether the subject matter is presented in accordance with certain criteria. To perform an attestation engagement, the practitioners generally must obtain an appropriate assertion from the party responsible for the subject matter. For example, in an engagement on a company's internal control over financial reporting, management (the responsible party) might assert that the company has maintained effective internal control.

While the practitioners generally must obtain an appropriate assertion about the subject matter, they ordinarily may report on either the *subject matter itself*, or on an *assertion about the subject matter*. Using investment returns as an example, when reporting on the subject matter, the practitioner's opinion would include assurance directly on the related schedule. Alternatively, when reporting on the assertion, the practitioner's opinion would provide assurance on whether that assertion is properly stated. The following exhibit presents the two methods of reporting.<sup>4</sup>

Reporting on Subject Matter	Reporting on Assertion
In our opinion, the schedule presents fairly in all material respects the investment returns of XYZ Company for the year ended December 31, 20XX, based on the criteria set forth in Note 1.	In our opinion, XYZ Company's assertion that the schedule presents the investment returns of XYZ Company for the year ended December 31, 20XX, based on the criteria set forth in Note 1, is fairly stated, in all material respects.

If the practitioners are reporting on an assertion about the subject matter, the assertion is presented with the subject matter or in the practitioners' report. If the practitioners are reporting *directly* on the subject matter, the assertion normally is included only in a representation letter that the practitioners obtain from the responsible party.

There is an exception to the option of reporting directly upon the subject matter *or* on management's assertion. When the examination reveals material departures from the suitable criteria, to most effectively communicate with the reader of the report, the practitioner should report directly upon the subject matter, and not on the assertion.

## The Criteria

Criteria are standards or benchmarks that are used to evaluate the subject matter of the engagement. Criteria are important in reporting the practitioners' conclusion to the users because they convey the basis on which the conclusion was formed. Without this frame of reference, the practitioners' report is subject to misinterpretation. For example, generally accepted accounting principles are ordinarily used as the frame of reference—the criteria—to evaluate financial statements.

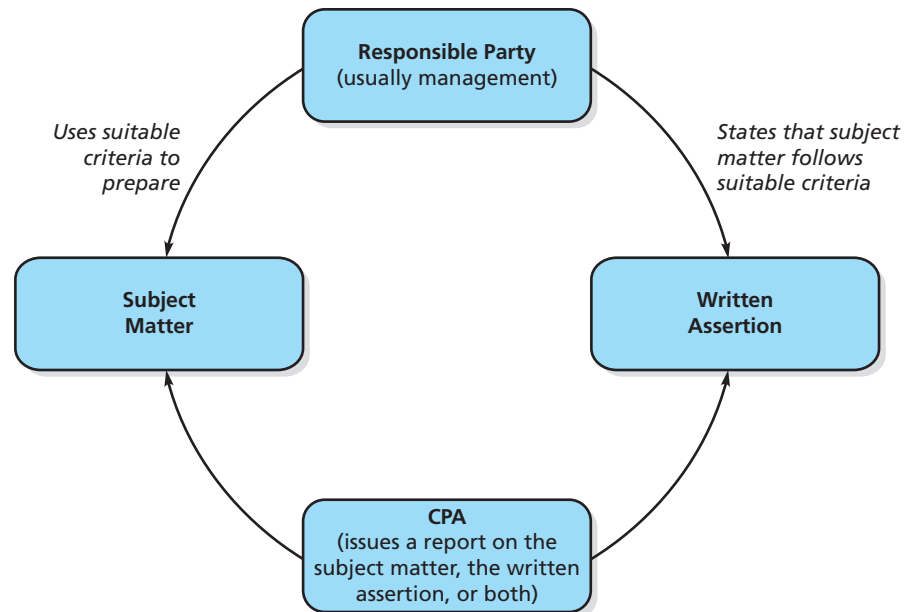

In most areas, however, the criteria are not as well established as are generally accepted accounting principles. Accordingly, a practitioner must evaluate the criteria being followed. As indicated in the third general standard, the criteria used in an attestation engagement must be *suitable* and *available* to the users.

### *Suitable Criteria*

Suitable criteria are those that are *objective* and permit reasonably *consistent measurements*. In addition, the criteria must be sufficiently *complete* such that no relevant

<sup>4</sup> These options are only available for reporting on a nonpublic (nonissuer) client. As indicated in Chapter 18, public company internal control reports are on the subject matter.

**FIGURE 20.3**  
**Illustration of**  
**Relationships among**  
**Terms Used in**  
**Attestation Engagements**

factors are omitted that would affect a conclusion about the subject matter. Finally, the criteria must measure some characteristic of the subject matter that is *relevant* to a user's decision.

Criteria are ordinarily suitable if they are developed by regulatory agencies or other bodies composed of experts that use due process, including exposing the proposed criteria for public comment. For example, the Committee of Sponsoring Organizations (COSO), discussed in Chapter 7, is an organization that followed due process in the development of its control criteria pertaining to internal control. Figure 20.3 illustrates the relationships among the responsible party, suitable criteria, subject matter, the written assertion, and the CPA's report.

Criteria developed by management or industry groups without due process may be suitable, but the practitioner should carefully evaluate them in relation to the characteristics described in the previous two paragraphs. Criteria that are overly subjective should not be used in an attestation engagement. For example, an assertion that a particular software product is the *best on the market* is too subjective for an attestation engagement. There are no generally accepted criteria for what constitutes the *best* software product.

Some criteria for evaluating subject matter may be suitable only for those who established them (referred to as *specified parties*). As such, they are not suitable for *general use*. For example, criteria developed based on a lengthy, involved contract between two parties might result in a report whose use is restricted to the two parties. In such situations, the attestation report should be *restricted* to the use of the specified parties.

#### *Available Criteria*

In addition to meeting the requirement that they be *suitable*, the criteria also must be *available* to users. This requirement of availability has two parts in that, not only must the criteria be available, but they also must be understandable to users. The criteria may be made *available and understandable* to the users in a variety of ways. If the criteria were developed by a regulatory agency or an expert body using due process, it is likely that they are publicly available to users; it ordinarily is presumed that such criteria are understandable.

Alternatively, the criteria may be made available to the users in the presentation of the subject matter, in the assertion, or in the practitioners' report. Making the criteria available in one of these manners is particularly important when there is no "generally

accepted” way of evaluating the related subject matter. Take for example the subject matter of customer satisfaction. There are a number of possible measures of customer satisfaction, including customer opinion, rate of customer referral, rate of return customer sales, and increase in dollar amount of sales to existing customers. Particular criteria might employ one or more of these or other customer satisfaction measures. If the practitioner found the criteria being followed to be suitable, the presentation of the subject matter on customer satisfaction would most likely include the criteria describing the way in which customer satisfaction was defined and measured.

When criteria are available only to certain users, the practitioners’ report should be restricted to those *specified parties*. Here again a contract between two parties provides a good illustration. In the preceding section on suitable criteria, we suggested that the provisions of a contract may not be suitable for those who are not a party to the contract. Therefore, we find that the report on the provisions is generally restricted. These situations often have in common the fact that they have been developed by and agreed to by the parties to the engagement and are not generally understandable to, or usable for, those not involved.

## Attestation Risk and Materiality

**Attestation risk** is the risk that the practitioners will unknowingly fail to appropriately modify their report on subject matter that is materially misstated. Like audit risk, attestation risk consists of three components—inherent risk, control risk, and detection risk. In this context, *inherent risk* is the risk that the subject matter is materially misstated before considering any internal control. *Control risk* is the risk that internal control will fail to prevent or detect a material misstatement of the subject matter, and *detection risk* is the risk that the practitioners’ procedures will fail to detect a material misstatement of the subject matter. In an attestation engagement, the practitioners assess inherent and control risks and design procedures to restrict detection risk to the appropriate level.

Determining materiality for an attestation engagement may be very difficult because the subject matter may not be financial in nature. In fact, the subject matter may not even be presented in quantitative terms. As an example, the practitioners may be attesting to material compliance with specific provisions of a regulation. To determine what is material for planning and reporting purposes, the practitioners must attempt to determine the likely needs of the intended users and consider the extent and nature of misstatements of the subject matter that would be significant to their decisions.

Materiality for the engagement may be considered in the context of quantitative or qualitative factors. If the subject matter is quantitative, materiality should generally be a relative rather than an absolute amount. That is, as the quantitative amounts of the presentation increase, the amount considered to be material should also increase. For qualitative subject matter, the practitioners must use professional judgment to consider what omission or misstatement would have a significant effect on the presentation of the subject matter.

## The Character of the Engagement

### LO 20-3

Describe the nature of attestation engagements, including examinations, reviews, and agreed-upon procedures engagements.

The practitioners should issue an attestation report that clearly describes the nature of the assurance being provided as an *examination*, a *review*, or the performance of *agreed-upon procedures*.

### Examinations

An **examination** is designed to obtain reasonable assurance—the level of assurance a financial statement audit provides. In conducting an examination, the practitioners identify and assess risks of material misstatement as the basis for designing and performing further procedures. The nature of the subject matter determines the possible examination procedures, which may include performing inquiry, inspection, observation, confirmation, recalculation, reperformance and analytical procedures to obtain sufficient evidence to drive attestation risk to an appropriately low level.

**FIGURE 20.4**  
**Standard Unmodified**  
**Examination Report**  
**on Subject Matter**

Title	Independent Accountants' Report
Introductory paragraph	We have examined the accompanying schedule of investment performance statistics of Terrill Investment Fund for the year ended December 31, 20X2. Terrill Investment Fund's management is responsible for the schedule of investment performance statistics. Our responsibility is to express an opinion on this schedule based on our examination.
Scope paragraph	Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence supporting the schedule and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.
Opinion paragraph	In our opinion, the schedule of investment performance statistics referred to above presents, in all material respects, the performance of Terrill Investment Fund for the year ended December 31, 20X2, in conformity with the measurement and disclosure criteria set forth by the Association of Investment Management Research, Inc., as described in Note 1.  <i>Wesley &amp; Ward, LLP</i> January 22, 20X3

At the completion of the examination, the practitioners issue an appropriate report. Figure 20.4 illustrates an annotated standard unmodified examination report *directly on the subject matter*. This standard report, however, is not appropriate in all cases. The following table illustrates circumstances that result in modification of the standard unmodified report.

Situation	Report Modification
1. Criteria are agreed upon or only available to specified parties	A statement of limitations on the use of the report
2. Departure of subject matter from criteria	Qualified or adverse opinion, depending on materiality of the departure
3. Limitation on scope of engagement	Qualified opinion or disclaimer
4. When reporting on subject matter and a written assertion is not obtained from the responsible party	A statement of limitations on the use of the report

*Reviews*

A **review** engagement involves performing limited procedures, such as inquiries and analytical procedures. In performing a review, the practitioners endeavor to gather sufficient evidence to drive attestation risk to a *moderate level*. Accordingly, the resulting report provides only limited assurance that the information is fairly presented. **Limited assurance** is also referred to as **negative assurance** because the practitioners' report disclaims an opinion on the reviewed information but includes a statement such as, "We are not aware of any material modifications that should be made in order for the information to be in conformity with the criteria." An example of an annotated unmodified review report *directly on the subject matter* is presented in Figure 20.5. Of course, when an uncorrected material departure from the criteria is noted, the report must be modified to describe the departure. The following table lists circumstances that result in modification of the practitioners' review report.

**FIGURE 20.5**  
**Standard Unmodified**  
**Review Report on**  
**Subject Matter**

Title	Independent Accountants' Report
Introductory paragraph	We have reviewed the accompanying schedule of investment performance statistics of Keller Investment Fund for the year ended December 31, 20X2. Keller Investment Fund's management is responsible for the schedule of investment performance statistics.
Nature of review and disclaimer paragraph	Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. A review is substantially less in scope than an examination, the objective of which is the expression of an opinion on the schedule. Accordingly, we do not express such an opinion.
Negative assurance paragraph	Based on our review, nothing came to our attention that caused us to believe that the accompanying schedule of investment performance statistics of Keller Investment Fund for the year ended December 31, 20X2, is not presented, in all material respects, in accordance with the measurement and disclosure criteria set forth by the Association of Investment Management Research, Inc., as described in Note 1.  <i>George Little &amp; Associates, LLP</i> January 15, 20X3

Situation	Report Modification
1. Criteria are agreed upon or only available to specified parties	A statement of limitations on the use of the report
2. Departure of subject matter from criteria	Modified report describing the departure
3. Limitation on scope of the engagement	Report cannot be issued
4. When reporting on subject matter and a written assertion is not obtained from the responsible party	A statement of limitations on the use of the report

#### *Agreed-Upon Procedures*

Practitioners may also be engaged to perform procedures that were agreed upon by specified parties of the report. **Agreed-upon procedures** reports include a list of procedures performed (or reference thereto) and the related findings. Because specified parties have agreed upon the nature of the procedures, the reports for such engagements are intended for those parties only. Consequently, reports on agreed-upon procedures are referred to as *restricted-use* reports, in contrast with *general-use* reports, such as those on examinations and reviews. As previously indicated, examination and review reports ordinarily may be used by all third parties. Only when the criteria have been agreed upon by the parties involved and such criteria are not generally understandable to those not involved with the information must an examination or review report be restricted.

## Assurance Service Examples

### **Assurance on Internal Control over Financial Reporting**

Chapters 7 and 18 presented information on auditors' reports on internal control over financial reporting. This is a primary assurance service, particularly as performed for public companies which are required to have their internal control audited as a part of the integrated audit required by the Sarbanes-Oxley Act of 2002 and implemented by the PCAOB. As we indicated in Chapter 18, nonpublic companies are also able to

engage their auditors in such a service. Also, the Federal Deposit Insurance Corporation Improvement Act of 1991, which applies to financial institutions with total assets of \$500 million or more, requires an internal control report similar to that described in detail in Chapter 18.

We will not repeat detailed coverage of internal control reporting in this chapter. Yet reporting on internal control provides a good example of an assurance service that differs broadly from reporting on financial statements because with internal control the subject matter of the engagement is a process rather than historical results.

## Assurance on Prospective Financial Statements

### LO 20-4

Describe the fundamental attributes of attestation services for prospective financial statements.

Securities analysts and loan officers give considerable attention to prospective financial statements. Although such statements may be presented in various forms, CPAs most frequently are involved *with financial forecasts and financial projections*. A **financial forecast** presents information about the entity's *expected* financial position, results of operations, and cash flows. On the other hand, a **financial projection** presents expected results, *given one or more hypothetical assumptions*. For example, a projection might present expected results assuming the company expanded its plant. While a forecast may be issued for general use, a projection's use should be restricted to the party with whom the company is negotiating, for example, a bank that is considering loaning funds to the company to expand the plant. Both forecasts and projections must include certain minimum *prospective financial statement* items, background information, and a list of the major assumptions and accounting policies.

Users of forecasts and projections may request assurance that this forward-looking information is properly presented and based upon reasonable assumptions. To provide such assurance, CPAs may be engaged to examine prospective statements, or they may be asked to perform certain agreed-upon procedures or perform a compilation, but the attestation standards *prohibit* the review of prospective financial statements. Criteria for evaluation of the fairness of a forecast or projection are presented in AT Section 301 and include a set of presentation guidelines.<sup>5</sup>

### Examinations of Prospective Financial Statements

In an examination of prospective financial statements, the practitioners gather evidence relating to the client's procedures for preparation of the statements, evaluate the underlying assumptions, obtain a written representation letter from the client, and evaluate whether the statements are presented in conformity with AICPA guidelines. The report issued is ordinarily on the subject matter and states whether, in the practitioners' opinion, the statements are presented in conformity with AICPA guidelines and whether the underlying assumptions provide a reasonable basis for the statements. In no circumstance is the practitioners' report to vouch for the achievability of the forecast or projection.

The standard report should be modified in the following situations:

Situation	Report Modification
1. Material departure from presentation criteria	Qualified or adverse opinion (if underlying assumptions are omitted, an adverse opinion should be issued)
2. One or more significant assumptions do not provide a reasonable basis for the prospective financial statements	Adverse opinion
3. Limitation on scope of engagement	Disclaimer of opinion

<sup>5</sup> Further details of required disclosures are presented in the AICPA's "Guide for Prospective Financial Information" (New York, 2009).

The report on a financial projection is similar to the one illustrated for a forecast, but a paragraph is added prior to the opinion paragraph indicating that the use of the report should be restricted to the specified party. In addition, the opinion paragraph explicitly states the hypothetical assumptions.

#### *Agreed-Upon Procedures on Prospective Financial Statements*

Specific users may request the practitioners to perform certain agreed-upon procedures on prospective financial statements. In such circumstances, the practitioners may perform the procedures and provide a summary of findings. As is the case with all engagements involving agreed-upon procedures, the report should indicate that its use is restricted to the specified parties.

## Assurance on Compliance

The attestation standards provide guidance for two types of compliance attestation engagements:

1. Attesting to an entity's compliance with specified requirements of laws, regulations, rules, contracts, or grants.
2. Attesting to the effectiveness of an entity's internal control over compliance with specified requirements.

Practitioners are permitted to perform an examination or agreed-upon procedures on such matters, but they are *prohibited* from performing reviews of compliance or internal control over compliance. These types of engagements and reports are described in detail in Chapter 21.

## Assurance on Management's Discussion and Analysis

### LO 20-5

Describe the fundamental attributes of attestation services for management discussion and analysis.

Management of a public company is required to provide a narrative explanation of financial results as reported in the financial statements filed with the SEC. This narrative explanation, referred to as **Management's Discussion and Analysis (MD&A)**, is a required part of Form 10-K (for annual financial statements) and Form 10-Q (for interim financial statements) filed with the SEC. Practitioners may examine or review MD&A under the guidance of the attestation standards.

To accept an engagement to examine MD&A, the practitioners must have audited the most recent financial statement period to which the MD&A applies, and the other financial statement periods also must have been audited by them or other auditors. The practitioners' objective in such an engagement is to provide assurance on whether (1) the presentation includes, in all material respects, the required elements of the rules and regulations adopted by the SEC; (2) the historical financial amounts included in the presentation have been accurately derived, in all material respects, from the entity's financial statements; and (3) the underlying information, determinations, estimates, and assumptions of the entity provide a reasonable basis for the disclosures contained in the presentation. Practitioners also may be engaged to perform a review of MD&A for an annual or interim period. However, if a review is performed and the report is not intended to be filed with the SEC, it should be restricted as to use. At this point, few reports on MD&A have been issued.

## Trust Services

### LO 20-6

Describe the nature of Trust Services.

Information technology has a profound effect on the way in which companies do business. Increasingly, companies have developed technology-enabled systems that not only maintain historical information but also produce products and services, directly interact with customers and suppliers, and run portions of the business. As a result, system reliability is of major concern not only to management, but also to stockholders, creditors, business partners, and other stakeholders in the company. The public accounting profession has developed a set of **Trust Services** that are defined as a set of professional attestation and advisory services based on a core set of principles and criteria that addresses the risks and opportunities of IT-enabled systems and privacy programs.

Trust Services are intended to help entities differentiate themselves by demonstrating that they are attuned to the risks posed by their environment and that they are equipped with controls that address those risks. There are potentially a wide range of beneficiaries of Trust Services assurance reports, including consumers, business partners, bankers, creditors, regulators, and outsourcers. Trust Services, jointly developed by the AICPA and the Canadian Institute of Chartered Accountants (CICA), are services in which a practitioner examines a system's controls and attests to the system's reliability. This is a part of a broader future vision of the accounting profession to supply real-time assurance on information databases and systems and is viewed as a natural extension of the CPA's audit and information technology consulting functions.

In a Trust Services engagement, management prepares and communicates a description of the aspects of the system that are to be encompassed by the practitioner's engagement. Management's description can be included on the company's website, attached to the practitioners' report, or communicated to users in some other manner. It must clearly articulate the boundaries of the system to allow individuals to understand both the scope of management's assertions related to it and the practitioners' report.

#### *Performing a Trust Services Engagement*

In performing a Trust Services engagement, the practitioner (1) performs procedures to determine that management's description of the system is fairly stated, and (2) obtains evidence that the controls over the system are designed and operating effectively to meet the Trust Services Principles and Criteria—the suitable criteria required for an attest engagement. The evidence obtained should bear on whether the system meets one or more of the following principles over a particular reporting period:

1. *Security*. The system is protected against unauthorized access (both physical and logical).
2. *Availability*. The system is available for operation and use as committed or agreed upon.
3. *Processing integrity*. System processing is complete, accurate, timely, and authorized.
4. *Confidentiality*. Information designated as confidential is protected as committed or agreed upon.
5. *Privacy*. Personal information is collected, used, retained, disclosed, and destroyed in conformity with the commitments in the entity's privacy notice and with criteria set forth in generally accepted privacy principles issued by the AICPA and CICA.

Each of the principles has four criteria associated with it that fit into the following four broad areas:

1. *Policies*. The entity has defined and documented its policies relevant to the particular principle.
2. *Communications*. The entity has communicated its defined policies to responsible parties and authorized users of the system.
3. *Procedures*. The entity placed in operation procedures to achieve the objectives in accordance with its defined policies.
4. *Monitoring*. The entity monitors the system and takes action to maintain compliance with its defined policies.

#### *Types of Trust Services Engagements*

At present, CPAs offer two types of Trust Services, both providing either agreed-upon procedures or examination-level assurance. **WebTrust** provides assurance on electronic commerce systems, while **SysTrust** provides assurance on any system. To this point, **SysTrust** has gained wider market acceptance.

#### *Reporting*

The reports issued for *SysTrust* and *WebTrust* are similar. The box on the next page provides the body of a *SysTrust* report on the first four *SysTrust* principles for Capital Confirmation, Inc., the company referred to in Chapter 10, which is a leader in the electronic confirmation process. Both *WebTrust* and *SysTrust* are designed to incorporate a seal

management process by which a seal (logo) may be included on a client's website as an electronic representation of the practitioners' unqualified *WebTrust* report. If the client wishes to continue to use the seal (logo), the engagement must be updated at least annually. Also, the initial reporting period must include at least two months.

We have examined the accompanying management assertion that during the period June 1, 2009, through November 30, 2011, Capital Confirmation, Inc. (Capital Confirmation), maintained effective controls over the Confirmation.com™ system based on the AICPA and CICA trust services availability, security, processing integrity, and confidentiality criteria to provide reasonable assurance that:

- The system was available for operation and use, as committed or agreed;
- The system was protected against unauthorized access (both physical and logical);
- The system processing was complete, accurate, timely, and authorized; and
- Information designated as confidential was protected by the system as committed or agreed;

based on the AICPA and CICA trust services security, availability, processing integrity, and confidentiality criteria.

Capital Confirmation's management is responsible for this assertion. Our responsibility is to express an opinion based on our examination. Management's description of the aspects of the Confirmation.com system covered by its assertion is attached. We did not examine this description, and accordingly, we do not express an opinion on it.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included (1) obtaining an understanding of Capital Confirmation's relevant controls over the availability, security, processing integrity, confidentiality, and privacy of the Confirmation.com system; (2) testing and evaluating the operating effectiveness of the controls; and (3) performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion.

Because of the nature and inherent limitations of controls, Capital Confirmation's ability to meet the aforementioned criteria may be affected. For example, controls may not prevent or detect and correct error or fraud, unauthorized access to systems and information, or failure to comply with internal and external policies or requirements. Also, the projection of any conclusions based on our findings to future periods is subject to the risk that changes may alter the validity of such conclusions.

In our opinion, management's assertion referred to above is fairly stated, in all material respects, based on the AICPA and CICA trust services security, availability, processing integrity, and confidentiality criteria.

## Service Organization Control (SOC) Reports

Service organizations provide processing services to customers who decide to outsource their processing of data. Examples of services that are typically outsourced include **cloud computing** services, payroll processing services, information security services, and information system services. In Chapter 7 we discussed service organizations as they relate to audits of financial statements. Here we recap three services that result in the following types of CPA reports on service organization controls (SOC):

- SOC 1: Restricted-use reports on controls at a service organization relevant to a user entity's internal control over financial reporting (presented earlier in Chapter 7).
- SOC 2: Restricted-use reports on controls at a service organization related to security, availability, processing integrity, confidentiality, and/or privacy.
- SOC 3: General-use SysTrust reports related to security, availability, processing integrity, confidentiality, and/or privacy.

All three of the above are based on auditors having performed examinations of the related information.

### *SOC 1 Reports*

SOC 1 reports are issued under AICPA AT 801 (PCAOB 324). Chapter 7 of this text includes a discussion of service auditor reports when an audit client has outsourced a portion of its processing to a service organization. As an illustration, that chapter presented

an example of an employee benefit plan that used a bank trust department to invest and service the plan's assets. Service organizations engage their auditors to study their internal control over financial reporting relating to their processing services and to issue a service auditor's report on that internal control. These reports may either be on

- Management's description and design of its controls (Type 1 reports), or
- Management's description and design of its controls *and control operating effectiveness* (Type 2 reports).

Auditors of companies that employ the service organization (referred to as "user auditors") generally use the service auditors' report as a portion of their consideration of the user's internal control (AICPA AU-C 402; PCAOB 324). SOC 1 reports are restricted-use reports ordinarily meant for communication between one auditor and another, or the service auditor and the user organization.

### *SOC 2 Reports*

SOC 2 reports are performed under AT section 101, *Attest Engagements*, and relate to security, availability, processing integrity, confidentiality, and/or privacy. These reports are similar to SysTrust in coverage in that a CPA issues a report on controls at the service organization that relates to one or more of these Trust Services principles of security. SOC 2 reports are designed to provide:

- Organizations that outsource tasks and functions a mechanism for improving governance and oversight of service providers.
- Service organizations the ability to communicate the suitability of the design and operating effectiveness of their controls.

In an SOC 2 engagement management prepares a detailed description of the service organization's system, including controls designed to achieve the criteria for one or more of the Trust Services Principles, and the CPA reports on the fairness of the description. Service organizations can distribute the report to their customers and other intended recipients, such as regulators and business partners. As is the case with SOC 1 reports, the CPAs may be engaged to issue either a Type 1 or Type 2 report.

### *SOC 3 Reports*

SOC 3 reports are in essence Trust Services reports. These reports provide users with an assertion by management that it maintained effective controls to meet the Trust Services criteria, a short description of its system, and a CPA's report on either management's assertion or on the effectiveness of controls in meeting the Trust Services criteria as described earlier in this chapter. Figure 20.6 compares the various types of service organization reports and related information.

## **PrimePlus/ ElderCare Services**

### **LO 20-7**

Describe the nature of *PrimePlus/ElderCare* services.

The population of the United States is aging, with the greatest increase in adults over 65 years of age expected to occur between now and 2030. In response to these demographics, the AICPA and the Canadian Institute of Chartered Accountants have developed *PrimePlus/ElderCare* services. These services focus on the specific needs and goals of older adults. In providing these services, you draw upon your strengths and competencies in a variety of areas, including accounting, cash flow planning and budgeting, pre- and postretirement planning, insurance reviews, estate planning, and tax planning. The intent is to help older Americans maintain for as long as possible their lifestyle and financial independence. The profession sees three primary markets for these services:

- Older clients of the CPA who have the financial resources to avail themselves of the services.
- The children of older adults who have the resources and interest to see that their loved ones are cared for.
- Other professionals who deal with older adults (e.g., lawyers and health care professionals).

**FIGURE 20.6** Comparison of Types of Service Organization Control (SOC) Reporting

	SOC 1	SOC 2	SOC 3
<b>Professional Standards</b>	AT 801 (SSAE No. 16) AICPA Guide, <i>Applying SSAE No. 16, Reporting on Controls at a Service Organization</i>	<ul style="list-style-type: none"> <li>• AT 101</li> <li>• AICPA Guide, <i>Reporting on Controls at a Service Organization Relevant to Security, Availability, Processing Integrity, Confidentiality, or Privacy</i></li> </ul>	<ul style="list-style-type: none"> <li>• AT 101</li> <li>• AICPA Technical Practice Aid, <i>Trust Services Principles, Criteria and Illustrations</i></li> </ul>
<b>Primary Purpose</b>	Report on service organization controls over financial reporting, particularly on those controls likely to be relevant to user entities' financial statements.	Report on service organization controls related to compliance with the Trust Services Principles and Criteria (controls over security, availability, processing integrity, confidentiality, and/or privacy).	
<b>Assertion Provided by Service Organization Management</b>	A detailed assertion on details of the system.		A more general assertion on the organization having met one or more of the AICPA Trust Services Criteria.
<b>Report*</b>	Detailed Type 1 or Type 2 report on controls tested.	Detailed Type 1 or Type 2 report on service organization's compliance with one or more Trust Services Principles.	A less detailed report on whether the service organization maintained effective controls based on the Trust Services Criteria.
<b>Use of Report</b>	Restricted-use report primarily for user auditors (auditors auditing the financial statements of companies that use the service auditor).	Restricted-use report primarily for service organization and user stakeholders such as customers, regulators, business partners, suppliers, and directors.	General-use report (for use by anyone).

\*Type 1 reports address whether the description of the controls is fairly presented and whether the controls described are suitably designed. A Type 2 report includes the information in a Type 1 report and an opinion on whether the controls were operating effectively.

The services involved are of two types—financial and nonfinancial. Financial services include goal-setting, funding analysis, cost management, and needs assessment. Non-financial services may involve interpersonal and relationship management, as well as management of the interaction between service providers and the client. Figure 20.7 provides more detailed examples of each of these services.

## Future Assurance Services

### LO 20-8

List several developing assurance services.

The AICPA, through its various committees, continues to consider and develop a number of other services to be provided by CPAs, including XBRL, health care performance measurement, and continuous auditing.

### XBRL

**XBRL**, eXtensible Business Reporting Language, is an international information format designed specifically for business information. It assigns all individual disclosure items within business reports unique electronically readable tags that are mapped to taxonomies. XBRL offers major benefits in the preparation, analysis, and communication of business information through its cost-effectiveness and improved reliability as compared to other existing systems.

**FIGURE 20.7**  
Examples of *PrimePlus/*  
*ElderCare* Services

Financial Services	Nonfinancial Services
<ul style="list-style-type: none"> <li>• Planning for fiduciary needs</li> <li>• Evaluating financing options</li> <li>• Receiving, depositing, and accounting for client receipts</li> <li>• Ensuring that expected revenues are received</li> <li>• Submitting claims to insurance companies</li> <li>• Protecting the elderly from predators</li> <li>• Estate planning</li> <li>• Income tax planning and preparation</li> <li>• Gift tax return preparation</li> <li>• Evaluating investments and trust activity</li> <li>• Portfolio management</li> <li>• Risk management and insurance planning</li> </ul>	<ul style="list-style-type: none"> <li>• Lifestyle planning</li> <li>• Lifestyle management services</li> <li>• Coordinating support and health care services</li> <li>• Functioning as the “quarterback” or as a member of the <i>PrimePlus/ElderCare</i> team—which consists of health care, legal, and other professionals</li> <li>• Helping family members monitor the elder’s care</li> <li>• Communicating family expectations to care providers</li> <li>• Establishing, in concert with the family, appropriate standards of care</li> <li>• Establishing performance monitoring systems</li> </ul>

The AICPA’s XBRL Assurance Task Force is in the process of developing guidance that will assist CPAs in public practice who are requested to provide assurance on XBRL-related documents. The task force is currently focusing on:

- Developing practice guidance that will assist CPAs in applying existing standards to information reported in XBRL format.
- Recommending, where deemed necessary and appropriate, to the appropriate standard setting bodies changes to existing standards and/or the development of new standards.
- Collaborating with key stakeholders, including the SEC, PCAOB, various AICPA groups, and others.

#### *Health Care Performance Measurement*

Health care recipients and their employers are increasingly concerned about the quality and availability of health care services. This service provides assurance about the effectiveness of health care services provided by health maintenance organizations, hospitals, doctors, and other providers.

#### *Continuous Auditing*

A demand exists for assurance beyond that provided on quarterly and annual financial statements. As indicated earlier in this chapter, **continuous auditing** provides assurance using a series of reports provided simultaneously or shortly after the related information is released. The area of continuous auditing is in its infancy but is expected to grow dramatically as companies provide more and more up-to-date financial information on their websites.

## Chapter Summary

This chapter described assurance services, focusing on those that are governed by *Statements on Standards for Attestation Engagements*. To summarize:

1. Assurance services are defined as professional services that improve the quality of information, or its context, for decision makers. Assurance services go beyond attestation services in that they may involve analyzing data or putting data in a form to facilitate decision making, or they may address relevance to a decision.
2. The vast majority of currently provided assurance services are attestation services that are performed in accordance with *Statements on Standards for Attestation Engagements*. The attestation standards apply to a variety of types of information (e.g., prospective financial statements, compliance with laws and regulations, and management’s

discussion and analysis). They do not apply to professional services specifically covered by the following other standards: *Statements on Auditing Standards*, *Statements on Standards for Accounting and Review Services*, and *Statements on Standards for Consulting Services*. They also do not cover various types of tax services.

3. Attestation engagements include examinations, reviews, and agreed-upon procedures engagements. Examinations and reviews involve providing assurance about the correspondence of subject matter with suitable criteria. An agreed-upon procedures engagement involves performing procedures and issuing a report on the findings.
4. CPAs may perform examinations, compilations, or agreed-upon procedures on prospective financial statements. Reviews of prospective financial statements are prohibited. Prospective financial statements include forecasts that reflect expected financial results and projections that reflect expected financial results given one or more hypothetical assumptions.
5. Practitioners may examine or review Management's Discussion and Analysis (MD&A). MD&A consists of a narrative explanation of financial results that must be included in annual and quarterly filings with the SEC. The practitioners' objective in an examination is to provide assurance on whether (a) the presentation includes all required elements, (b) any historical amounts have been accurately derived from the entity's financial statements, and (c) the underlying information, determinations, estimates, and assumptions provide a reasonable basis for the disclosures included.
6. Trust Services provide assurance on one or more of the following Trust Principles: (a) security, (b) availability, (c) processing integrity, (d) confidentiality, and (e) privacy. Currently, two services have been developed—*WebTrust*, which provides assurance on electronic commerce systems, and *SysTrust*, which provides assurance on other systems.
7. CPAs also may report on service organization controls. Three forms of reporting have been developed: one based on a service organization's internal control over financial reporting and two based on the Trust Services Principles.
8. *PrimePlus/ElderCare* services focus on the specific needs and goals of older adults. In providing these services, CPAs draw upon their strengths and competencies in a variety of areas, including accounting, cash flow planning and budgeting, pre- and postretirement planning, insurance reviews, estate planning, and tax planning.
9. The AICPA's XBRL Assurance Task Force is in the process of developing guidance that will assist CPAs in public practice who are requested to provide assurance on XBRL-related documents. Other assurance services being developed by the profession include health care performance measurement and continuous auditing.

## Key Terms Introduced or Emphasized in Chapter 20

**Agreed-upon procedures (773)** An attestation engagement in which the CPAs agree to perform specific procedures for a specified party or parties and issue a report that expresses the CPAs' findings. The report is restricted to use by the specified party or parties.

**Assertion (769)** An assertion is a declaration about whether subject matter is presented in accordance with certain criteria.

**Assurance services (766)** Professional services that improve the quality of information, or its context, for decision makers. Many assurance services involve some form of attestation.

**Attestation engagement (768)** Providing assurance about whether some subject matter, or an assertion about the subject matter, is in accordance with suitable criteria.

**Attestation risk (771)** The risk that the practitioners will issue an unmodified report on subject matter that is materially misstated.

**Cloud computing (777)** A model for enabling on-demand user network access to a shared pool of computing resources (e.g., networks, servers, storage, applications, or services), often through an Internet browser. As an illustration, consider a model in which databases and the associated data are maintained by an independent provider and accessed by corporate users.

**Continuous auditing (780)** To provide assurance using a series of reports provided simultaneously or shortly after the related information is released.

**Examination (771)** An attestation engagement designed to provide the highest level of assurance that CPAs provide on subject matter or an assertion about the subject matter. An examination of financial statements is referred to as an audit.

**Financial forecast (774)** Prospective financial statements that present an entity's expected financial position, results of operations, and cash flows for one or more future periods.

**Financial projection (774)** Prospective financial statements that present expected results, given one or more hypothetical assumptions.

**Limited assurance (negative assurance) (772)** The level of assurance provided by CPAs who have performed a review of subject matter. Provides substantially less assurance than the reasonable assurance provided by an examination.

**Management's Discussion and Analysis (MD&A) (775)** Management's discussion of the company's operating results, liquidity, and financial position that is required in the regular form filings with the SEC. CPAs may examine or review this information. However, if the information is reviewed, the report must be restricted as to its use.

**Negative assurance (772)** See *limited assurance*.

**PrimePlus/ElderCare (768)** Services to help older individuals maintain, for as long as possible, their lifestyle and financial independence.

**Review (772)** An engagement designed to provide only a limited (moderate) degree of assurance about the conformance of subject matter, or an assertion about subject matter, with suitable criteria.

**Subject matter (768)** The underlying topic of the engagement. For example, subject matter may be prospective financial information or internal control.

**Suitable criteria (767)** Criteria that are objective and permit reasonably consistent measurement.

**SysTrust (776)** A Trust Service developed by the AICPA and CICA to provide assurance about the reliability of systems other than electronic commerce systems.

**Trust Services (775)** Engagements that provide assurance on systems. Trust Services provide assurance on one or more of the following Trust Principles: (a) security, (b) availability, (c) processing integrity, (d) online privacy, and (e) confidentiality. Currently, two services have been developed. *WebTrust* provides assurance on electronic commerce systems, and *SysTrust* provides assurance on other systems.

**WebTrust (776)** A Trust Service developed by the AICPA and CICA to provide assurance on electronic commerce systems.

**XBRL (eXtensible Business Reporting Language) (779)** An international information format designed specifically for business information. It assigns all individual disclosure items within business reports unique electronically readable tags that are mapped to taxonomies. The AICPA is in the process of developing guidance that will assist CPAs in public practice who are requested to provide assurance on XBRL-related documents.

## Review Questions

- 20-1. Explain the relationship between assurance services and attestation services.
- 20-2. Comment on the correctness of the following statement: Since all attest services are assurance services, all assurance services are also attest services.
- 20-3. Describe the forces that have fueled the demand for assurance services.
- 20-4. Is a written report from the accountant involved for all attestation and other assurance services? Explain.
- 20-5. List and describe the three types of attestation engagements.
- 20-6. Distinguish between forms of attestation engagements that result in reports that are designed for "general use" and those that result in reports that are designed for "restricted use."
- 20-7. Distinguish between an attestation engagement in which the practitioners report directly on the subject matter and one in which the practitioners report on an assertion about the subject matter.
- 20-8. What are "suitable criteria" and how do they relate to an attestation engagement?
- 20-9. Explain what is meant by *attestation risk*. What are its components?
- 20-10. Comment on the accuracy of the following: A client's uncorrected material departure from the suitable criteria identified during an examination conducted under the attest standards is treated as a departure from GAAP in a financial statement audit—either a qualified or adverse opinion is appropriate.
- 20-11. What is XBRL? How do assurance services relate to it?
- 20-12. "A company would normally include a financial projection in its annual report rather than a financial forecast." Comment on the validity of this statement.
- 20-13. Describe the major elements of a report on the examination of a financial forecast.

- 20–14. Describe the two types of compliance services that may be performed under AT section 601.
- 20–15. Identify the circumstances under which CPAs may examine Management's Discussion and Analysis.
- 20–16. Describe the objectives of the practitioners' examination of Management's Discussion and Analysis.
- 20–17. List the principles that may be included in the criteria for a Trust Services engagement.
- 20–18. Contrast the types of systems on which assurance is provided in a *WebTrust* engagement as compared to a *SysTrust* engagement.
- 20–19. Discuss CPAs' competition for *WebTrust* in the market for consumer-to-business electronic commerce.
- 20–20. Describe the primary purpose and intended users of each of the three types of service auditor reports presented in the Professional Standards.
- 20–21. The attestation standards provide guidance on agreed-upon procedures, review, and examination engagements. Which of these types of engagements are available for *WebTrust* and *SysTrust*?
- 20–22. What types of *PrimePlus/ElderCare* services do CPAs typically perform?
- 20–23. Identify three types of assurance services that are currently under development by the AICPA.

## Questions Requiring Analysis

- LO 20-1** 20–24. Other types of assurance services provided by CPAs have developed as a natural extension of the audit function.
- Required:*
- a. Explain what is meant by the term *assurance services*.
  - b. Describe the forces that have caused a demand for other types of assurance services.
  - c. Describe the subset of assurance services governed by the *Statements of Standards for Attestation Engagements*.
- LO 20-3** 20–25. The attestation standards provide guidance for three basic types of engagements.
- Required:*
- a. Describe these three types of engagements.
  - b. Describe the types of procedures performed for each of these three types of engagements.
  - c. Discuss the degree of assurance provided by each type of engagement.
  - d. Identify when each of the three types of engagements results in reports that are appropriate for *general use*.
- LO 20-4** 20–26. The management of Williams Co. is considering issuing corporate debentures. To enhance the marketability of the bond issue, management has decided to include a financial forecast in the prospectus. Management has requested that your CPA firm examine the financial forecast to add credibility to the prospective information.
- Required:*
- a. Explain what is involved in an examination of a financial forecast.
  - b. Discuss the elements of a report on the examination of a financial forecast. (Do not write a report.)
- LO 20-6** 20–27. The accounting profession has developed *Trust Services* to help entities differentiate themselves by demonstrating that they are attuned to the risks posed by their environment and that they are equipped with controls that address those risks. Present the principles on which a *Trust Services* engagement may be based.
- LO 20-2** 20–28. The third general attestation standard indicates that the subject matter of the engagement must be capable of reasonably consistent evaluation against criteria that are suitable and available to the user.
- Required:*
- a. Explain why criteria are needed for an attestation engagement.
  - b. Describe what makes a particular set of criteria *suitable* for an attestation engagement.
  - c. Explain how criteria are made *available* to users of the information.

## Objective Questions

All applicable questions are available with McGraw-Hill's **Connect® Accounting**.

### 20–29. Multiple Choice Questions

Select the best answer for each of the following and explain fully the reason for your selection.

- LO 20-2** a. A report on an attestation engagement should:
- (1) State the nature of the client's control system.
  - (2) State the practitioner's conclusion about the subject matter or assertion.
  - (3) Include a reasonable limitations section pertaining to data inputs.
  - (4) Refer to the auditor's assertion concerning the subject matter.

## LO 20-4

- b. When an accountant examines a financial forecast that fails to disclose several significant assumptions used to prepare the forecast, the accountant should describe the assumptions in the accountant's report and issue a(n):
- (1) Qualified opinion.
  - (2) Unqualified opinion with a separate explanatory paragraph.
  - (3) Disclaimer of opinion.
  - (4) Adverse opinion.

## LO 20-5

- c. Which of the following is *not* an objective of a CPA's examination of a client's MD&A?
- (1) The presentation includes, in all material respects, the required elements of the rules and regulations adopted by the Securities and Exchange Commission.
  - (2) The presentation is in conformity with rules and regulations adopted by the SEC.
  - (3) The historical amounts included in the presentation have been accurately derived, in all material respects, from the entity's financial statements.
  - (4) The underlying information, determinations, estimates, and assumptions provide a reasonable basis for the disclosures contained in the presentation.

## LO 20-6

- d. A CPA's report relating to a *SysTrust* engagement is most likely to include:
- (1) An opinion on whether the system is electronically secure.
  - (2) An opinion on management's assertion that the system meets one or more of the *SysTrust* principles.
  - (3) Negative assurance on whether the system is secure.
  - (4) No opinion or other assurance, but a summary of findings relating to the system.

## LO 20-5

- e. When performing an examination, if a CPA finds one or more significant assumptions are not reasonable for a forecast, the most appropriate report is:
- (1) Adverse.
  - (2) Disclaimer.
  - (3) Qualified.
  - (4) Unqualified with emphasis-of-matter paragraph.

## LO 20-8

- f. The accounting profession is currently developing assurance services related to which of the following international information formats?
- (1) C++.
  - (2) Webmat.
  - (3) Object language.
  - (4) XBRL.

## LO 20-7

- g. CPA services performed under *PrimePlus/ElderCare* services may be:

	Financial	Nonfinancial
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 20-8

- h. When reporting on a company's compliance with a law, the CPAs may report on:

	Compliance with the Law Itself	Effectiveness of Internal Control over Compliance
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

## LO 20-1

- i. Benchmarks that are objective and permit reasonably consistent measurement in an engagement performed under *Statements on Standards for Attestation Services* are referred to as:
- (1) Written assertions.
  - (2) Suitable criteria.
  - (3) Subject matter.
  - (4) Generally accepted auditing standards.

- LO 20-2** j. Which of the following is *least* likely to be the subject matter of an attestation engagement?
- (1) Behavior.
  - (2) Historical events.
  - (3) Suitable criteria.
  - (4) Systems or processes.
- LO 20-2** k. A restricted-use report on controls at a service organization related to security, availability, processing integrity, confidentiality, and/or privacy is referred to as a:
- (1) SOC 1 report.
  - (2) SOC 2 report.
  - (3) SOC 3 report.
  - (4) SOC 4 report.
- LO 20-6** l. The assurance services being developed that address user and preparer needs regarding issues of security, availability, processing integrity, confidentiality, and privacy within e-commerce and other systems are referred to as:
- (1) *PrimePlus* Services.
  - (2) XBRL Services.
  - (3) Risk Advisory Services.
  - (4) Trust Services.
- LO 20-4, 5, 6, 7, 8** 20–30. Following are descriptions of potential needs of clients for various services. For each need identify the type of service that would best meet the client's need using the following:
- Attestation of prospective financial information
  - *PrimePlus/Elder* Care Services
  - Attestation of MD&A
  - Agreed-upon Procedures
  - SOC 1 (Service Organization Controls Type 1)
  - SOC 2
  - SOC 3
  - *SysTrust* in an area other than a SOC report
  - XBRL engagement
  - Other attestation service

Client Need	Type of Service
a. A computer manufacturing company wants to provide assurance about estimated future results to be included in the company's annual report.	
b. A company that processes payroll for other companies wants to provide assurance on its internal control over financial reporting that will be useful to the auditors of the companies that use its services.	
c. A public company wants to provide its shareholders assurance about the narrative analysis of financial results provided in the company's Form 10-K.	
d. A service organization wishes to provide a general-use report from its auditor on its processing integrity and confidentiality controls.	
e. The relative of an institutionalized uncle wants a CPA firm to oversee the uncle's financial affairs.	
f. A bank wants a CPA firm to confirm account receivables of a company that has pledged the receivables as collateral for a loan.	
g. A service organization wishes to provide a restricted-use report from its auditor to regulators on its processing integrity and confidentiality controls.	
h. A grocery store wants to provide the highest level of assurance that its prices are less than the prices of its competitors.	

- LO 20-2, 3, 5, 6, 7** 20–31. Indicate whether a CPA may provide each of the following services, and whether independence is required, by placing a check in the appropriate box.

Service	May Provide; Independence Is Required	May Provide; Independence Is Not Required	May Not Provide
a. Compile a forecast for the coming year.			
b. Perform a review of a forecast the company has prepared for the coming year.			
c. Perform an examination of Management's Discussion and Analysis when they have not audited the year's financial statements.			
d. Issue a <i>SysTrust</i> examination report on the security against unauthorized access of a service organization's electronic processing system.			
e. Assist an elderly client with his estate planning.			

- LO 20-5, 6, 7, 8** 20–32. For each of the situations (a) through (f), select the CPA engagement that is most likely to be appropriate from the lists of services below:
1. Compliance.
  2. Continuous auditing.
  3. Forecast.
  4. Internal control over financial reporting.
  5. MD&A.
  6. *PrimePlus/ElderCare*.
  7. Service organization audit.
  8. *SysTrust*.
  9. *WebTrust*.

Each reply may be used a maximum of one time, with two replies not being used at all.

Situation	CPA Engagement
a. Williams is worried about the welfare of his father who lives in a distant state.	
b. ABC Company is involved in a very vibrant industry. It would like all of its press releases to include audited results, regardless of when they are issued.	
c. DEF Mortgage Banking Co. services mortgages for others, and the auditors of those other organizations are constantly inquiring of DEF concerning its internal control as a part of their audits of the other organizations.	
d. GHI Company would like to assure its website users of the reliability of its website and its operations.	
e. JKL would like all of its customers and potential customers to have assurance about the effectiveness of its internal controls related to processing information.	
f. MNO Company believes that it has effective internal control to assure itself that it complies with various legal requirements, but would like assurance from its CPA on compliance with the legal requirements.	

- LO 20-6, 7, 8** 20–33. Match the following definitions (or partial definitions) to the appropriate term. Each term may be used once or not at all.

Definition (or Partial Definition)	Term
a. A service developed by the AICPA and CICA to provide assurance about the reliability of systems other than electronic commerce systems.	1. CBIZ
b. A service developed by the AICPA and CICA to provide assurance on electronic commerce systems.	2. Financial forecast
c. An international information format designed specifically for business information.	3. Financial projection
d. Engagements that provide assurance on systems' (1) security, (2) availability, (3) processing integrity, (4) online privacy, and (5) confidentiality.	4. Limited assurance
e. Prospective financial statements that present an entity's expected financial position, results of operations, and cash flows for one or more future periods.	5. <i>PrimePlus/ElderCare</i>
f. Prospective financial statements that present expected results, given one or more hypothetical assumptions.	6. Reasonable assurance
g. Services to help older individuals maintain, for as long as possible, their lifestyle and financial independence.	7. Review
h. The level of assurance provided by CPAs who have performed a review of subject matter.	8. Social Security services
	9. Service auditor report
	10. <i>SysTrust</i>
	11. Trust Services
	12. <i>WebTrust</i>
	13. XBRL

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*. 

### LO 20-7

Required:

20–34. *SysTrust* and *WebTrust* are Trust Services developed by the AICPA and the CICA.

- Present and describe the Trust Services principles.
- Present and describe the “criteria” related to Trust Services.
- What is the relationship between the principles and the criteria?
- Must a *WebTrust* or *SysTrust* report provide assurance on all of the principles?

### LO 20-2, 3, 9

Required:

20–35. Assume that you are a partner with the firm of Slater & Lowe LLP. You have been asked by Grayson, Inc., an industrial supply company, to provide assurance about the change in existing customer satisfaction over the last three years. Grayson's management has indicated that the criteria it intends to use to evaluate customer satisfaction are a combination of customer retention rate and increase in dollar sales. Grayson's management will provide a schedule of the customer satisfaction measures and a note that describes the criteria used.

- If Grayson wants to provide the presentation and the CPA's report for general use by prospective customers, identify any available standards that provide guidance for such a service and the type or types of services that your firm could provide.
- Describe the factors that you should consider in determining whether the criteria are suitable.
- Assuming that you conclude that the criteria are suitable, draft your firm's report assuming that you perform an examination of the subject matter.

## In-Class Team Case

### LO 20-3, 8

Required:

20–36. Katherine Whipple of Food Queen Grocery, Inc., has asked you and your team to meet with her concerning a possible attest engagement relating to the assertion that Food Queen has the lowest overall prices of all grocery stores in the Salt Lake City area. Food Queen has just recently moved into the Salt Lake City area and is trying to establish a high-volume, profitable position. Whipple has suggested to you that she believes that while Food Queen certainly doesn't have the lowest prices on all of the 25,000 types of items it sells, on most any rational basis she believes that its prices are “on the whole” lower than the competition—Albros, Kruegers, and Safest. In thinking about this, you realize that to perform such an attestation engagement, suitable criteria must be used to evaluate the subject matter.

- For this engagement, what would you consider to be the subject matter?
- Provide an approach on how one might derive suitable criteria for such an engagement, given that costs are considered lowest on an overall basis, but not necessarily for every item.
- Discuss the nature of the required assertion from management for an engagement such as this.

Now consider the following: Whipple has suggested to you that when the engagement is complete she will use the results as part of an advertising campaign in which the ads suggest that Food Queen has the “certified lowest overall costs.” When you asked her what would happen if the engagement revealed that Food Queen didn’t have the lowest prices, she suggested that she would simply not use the report and wait a month or two and have you perform another engagement when she had had time to bring her prices down even lower.

- d. Are attestation engagements acceptable when the resulting report is to be used for advertising purposes?
- e. Assume that your examination revealed that, based on the criteria developed, Whipple’s assertion that Food Queen did have the lowest prices was fairly stated and that a general-use report was proper. Outline the nature of the allowable presentation in the advertising materials.

## Research and Discussion Case

LO 20-6 20–37.

Assume that you are a CPA interested in expanding your services to provide *SysTrust* Services. Access the AICPA website and find guidance that will help you achieve your goal. Provide both the document (or other item) name and a brief summary of the guidance it provides.

# Internal, Operational, and Compliance Auditing

To this point in the text, we have focused primarily on audits and other types of assurance services provided by independent public accountants. This chapter describes several additional types of auditing: internal, operational, and compliance auditing.

## Internal Auditing

### LO 21-1

Describe the functions performed by internal auditors.

Virtually every large corporation in the United States today maintains an internal auditing staff. This staff function has developed extremely rapidly, as prior to 1940 few organizations had internal auditing departments. In 1941, **The Institute of Internal Auditors (IIA)** was founded with only 25 members. Now the IIA is a worldwide organization with over 170,000 members and with local chapters in principal cities throughout much of the world. The growth of the IIA has paralleled the recognition of internal auditing as an essential control function in all types of organizations.

### What Is the Purpose of Internal Auditing?

It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

Internal auditors assist members of an organization in performing their responsibilities by furnishing them analyses, appraisals, recommendations, and counsel. In performing these functions, internal auditors can be thought of as a part of the organization's internal control. They represent a high-level control that functions by measuring and evaluating the effectiveness of other controls. As discussed in Chapter 7, generally accepted auditing standards include the internal auditing function as part of the "monitoring component" of an organization's internal control.

Internal auditors are not merely concerned with the organization's financial controls. Their work encompasses all of the organization's internal control. They evaluate and test the effectiveness of controls designed to help the organization meet all its objectives. Also, many progressive internal auditing departments provide a wide range of other assurance and consulting services to the management of their organizations.

### Evolution of Internal Auditing

Internal auditing has evolved to meet the needs of business and governmental and nonprofit organizations. Originally, a demand for internal auditing arose when managers of early large corporations recognized that annual audits of financial

The Institute of Internal Auditors (IIA) defines **internal auditing** as:

An independent, objective assurance and consulting activity designed to add value and improve an organization's operations.

## LEARNING OBJECTIVES

After studying this chapter, you should be able to:

- LO 21-1** Describe the functions performed by internal auditors.
- LO 21-2** Describe the internal auditors' role with respect to the Sarbanes-Oxley Act.
- LO 21-3** Identify the standards for the professional practice of internal auditing.
- LO 21-4** Explain the nature and the purpose of an operational audit.
- LO 21-5** Distinguish among the various types of compliance audits.
- LO 21-6** Describe the auditing and reporting requirements of *Government Auditing Standards* and the Single Audit Act.

statements by CPAs were not sufficient. A need existed for timely employee involvement beyond that of the certified public accountants to ensure accurate and timely financial records and to prevent fraud. These original internal auditors focused their efforts on financial and accounting matters.

Subsequently, the role of internal auditors expanded as a result of demands by the major stock exchanges and the Securities and Exchange Commission (SEC) that management accept more responsibility for the reliability of published financial statements. These demands resulted in expanded internal auditor responsibilities, including more detailed analysis of internal control, as well as testing of interim and other accounting information not considered in annual audits performed by certified public accountants.

Gradually, the role of internal auditors expanded to encompass overall operational policies and procedures. Companies in the defense industry were among the first to demand such services. These companies recognized the need for reliable operating reports because they were used extensively by management to make decisions. The reports often were expressed not in dollars but in terms of operating factors, such as quantities of parts in short supply, adherence to schedules, and quality of the product. Work by the internal auditors devoted to ensuring the dependability of these operating reports was better spent than additional audit effort devoted to financial and accounting matters.

As organizations became larger and more complex, they encountered additional operational problems that could be addressed by internal auditing. The internal auditors' role of determining whether operating units in the organization follow authorized accounting and financial policies was readily extended to include the determination of whether they follow all the organization's operating policies, and whether the established policies provide sound and effective control over all operations. The extension of internal auditing into these operational activities required internal auditors with specialized knowledge in other disciplines such as economics, law, finance, statistics, computer processing, engineering, and taxation.

Several events have been important to the evolution of the internal auditing profession. The first was the enactment of the Foreign Corrupt Practices Act of 1977. The accounting provisions of that act require public companies to establish and maintain effective internal accounting control. To ensure compliance with these provisions, many companies established or augmented their internal auditing departments.

Another event that affected the internal auditing profession was the issuance in 1987 of the *Report of the National Commission on Fraudulent Financial Reporting*. This report contains the commission's findings and recommendations about preventing fraudulent financial reporting by public companies. Among its recommendations was a suggestion that public companies establish an internal auditing function staffed with appropriately qualified personnel and fully supported by top management. The commission also recommended that the companies help ensure the internal auditing function's objectivity by positioning it suitably within the organization, maintaining a director of the internal auditing function with appropriate stature, and establishing effective reporting relationships between the director of internal auditing and the audit committee of the board of directors. Consistently, in 1998 the Blue Ribbon Committee Report on Audit Committee Effectiveness concluded that appropriate responsibility for the oversight of financial integrity and accountability of public companies may be viewed as a three-legged stool consisting of (1) management and internal audit, (2) the board of directors and its audit committee, and (3) the external auditors.

The reengineering of companies in the mid-1990s led companies to *outsource* many of their noncore functions, including, in some cases, internal auditing. When these functions are outsourced, a specialized service provider other than company employees performs a portion or all of the internal auditing function. In some cases, CPA firms that also performed the audit of the financial statements provided major portions of the internal auditing function for companies. Providing both internal and external auditing services for SEC reporting clients has since been prohibited by the Sarbanes-Oxley Act of 2002.

### Focus on Outsourcing the Internal Auditing Function

Prior to its elimination, CPA firm performance of all or a portion of the internal audit function for an audit client was extremely controversial. CPA firms argued that they could provide internal auditing services effectively and promised such benefits as lower costs and improved specialization, while allowing management to focus on core business issues. The AICPA positioned such services as “extended audit services” that were acceptable if the client understood its responsibility for establishing and maintaining internal control and directing the internal auditing function. Representatives of the Institute of Internal Auditors questioned the propriety of CPAs’ assuming responsibilities that are part of a corporation’s internal control when they also audit that company.

## The Internal Auditors’ Role in Sarbanes-Oxley Compliance

### LO 21-2

Describe the internal auditors’ role with respect to the Sarbanes-Oxley Act.

Internal auditors possess skills and experience that make them particularly valuable to a company’s compliance efforts related to the Sarbanes-Oxley Act. As a result, many companies have involved their internal audit departments in documenting and testing controls to support management’s assertion about the effectiveness of internal control over financial reporting. However, it is important to remember that it is management’s responsibility to ensure the organization is in compliance with the requirements of the Sarbanes-Oxley Act. The internal auditors’ role in documenting and testing controls can be significant, but it must be compatible with the overall mission and **charter** of the internal audit function, and it should not be seen as impairing the internal auditors’ objectivity.

The work of the internal auditors may also be used by the external auditors in fulfilling the external audit function. PCAOB *Standards* allow the external auditors to use certain work of the internal auditors in fulfilling their responsibilities to provide an opinion on internal control over financial reporting.

## Professional Standards of Internal Auditing

To maintain consistently high-quality services across the internal auditing profession, the IIA has issued *International Standards for the Professional Practice of Internal Auditing*. These standards, as presented in Figure 21.1, set forth the criteria by which the operations of an internal auditing department should be evaluated and measured.

**FIGURE 21.1** IIA *International Standards for the Professional Practice of Internal Auditing*

### ATTRIBUTE STANDARDS

#### 1000—Purpose, Authority, and Responsibility

The purpose, authority, and responsibility of the internal audit activity must be formally defined in an internal audit charter, consistent with the Definition of Internal Auditing, the Code of Ethics, and the *Standards*. The chief audit executive must periodically review the internal audit charter and present it to senior management and the board for approval.

#### Interpretation:

The internal audit charter is a formal document that defines the internal audit activity’s purpose, authority, and responsibility. The internal audit charter establishes the internal audit activity’s position within the organization, including the nature of the chief audit executive’s functional reporting relationship with the board; authorizes access to records, personnel, and physical properties relevant to the performance of engagements; and defines the scope of internal audit activities. Final approval of the internal audit charter resides with the board.

**1000.A1**—The nature of assurance services provided to the organization must be defined in the internal audit charter. If assurances are to be provided to parties outside the organization, the nature of these assurances must also be defined in the internal audit charter.

**1000.C1**—The nature of consulting services must be defined in the internal audit charter.

#### 1010—Recognition of the Definition of Internal Auditing, the Code of Ethics, and the *Standards* in the Internal Audit Charter

The mandatory nature of the Definition of Internal Auditing, the Code of Ethics, and the *Standards* must be recognized in the internal audit charter. The chief audit executive should discuss the Definition of Internal Auditing, the Code of Ethics, and the *Standards* with senior management and the board.

**FIGURE 21.1** (Continued)**ATTRIBUTE STANDARDS****1100—Independence and Objectivity**

The internal audit activity must be independent, and internal auditors must be objective in performing their work.

**Interpretation:**

*Independence is the freedom from conditions that threaten the ability of the internal audit activity to carry out internal audit responsibilities in an unbiased manner. To achieve the degree of independence necessary to effectively carry out the responsibilities of the internal audit activity, the chief audit executive has direct and unrestricted access to senior management and the board. This can be achieved through a dual-reporting relationship. Threats to independence must be managed at the individual auditor, engagement, functional, and organizational levels.*

*Objectivity is an unbiased mental attitude that allows internal auditors to perform engagements in such a manner that they believe in their work product and that no quality compromises are made. Objectivity requires that internal auditors do not subordinate their judgment on audit matters to others. Threats to objectivity must be managed at the individual auditor, engagement, functional, and organizational levels.*

**1110—Organizational Independence**

The chief audit executive must report to a level within the organization that allows the internal audit activity to fulfill its responsibilities. The chief audit executive must confirm to the board, at least annually, the organizational independence of the internal audit activity.

**Interpretation:**

Organizational independence is effectively achieved when the chief audit executive reports functionally to the board. Examples of functional reporting to the board involve the board:

- Approving the internal audit charter;
- Approving the risk-based internal audit plan;
- Receiving communications from the chief audit executive on the internal audit activity's performance relative to its plan and other matters;
- Approving decisions regarding the appointment and removal of the chief audit executive; and
- Making appropriate inquiries of management and the chief audit executive to determine whether there are inappropriate scope or resource limitations.

**1110.A1**—The internal audit activity must be free from interference in determining the scope of internal auditing, performing work, and communicating results.

**1111—Direct Interaction with the Board**

The chief audit executive must communicate and interact directly with the board.

**1120—Individual Objectivity**

Internal auditors must have an impartial, unbiased attitude and avoid any conflict of interest.

**Interpretation:**

*Conflict of interest is a situation in which an internal auditor, who is in a position of trust, has a competing professional or personal interest. Such competing interests can make it difficult to fulfill his or her duties impartially. A conflict of interest exists even if no unethical or improper act results. A conflict of interest can create an appearance of impropriety that can undermine confidence in the internal auditor, the internal audit activity, and the profession. A conflict of interest could impair an individual's ability to perform his or her duties and responsibilities objectively.*

**1130—Impairment to Independence or Objectivity**

If independence or objectivity is impaired in fact or appearance, the details of the impairment must be disclosed to appropriate parties. The nature of the disclosure will depend upon the impairment.

**Interpretation:**

*Impairment to organizational independence and individual objectivity may include, but is not limited to, personal conflict of interest, scope limitations, restrictions on access to records, personnel, and properties, and resource limitations, such as funding.*

*The determination of appropriate parties to which the details of an impairment to independence or objectivity must be disclosed is dependent upon the expectations of the internal audit activities and the chief audit executive's responsibilities to senior management and the board as described in the internal audit charter, as well as the nature of the impairment.*

**1130.A1**—Internal auditors must refrain from assessing specific operations for which they were previously responsible. Objectivity is presumed to be impaired if an internal auditor provides assurance services for an activity for which the internal auditor had responsibility within the previous year.

**1130.A2**—Assurance engagements for functions over which the chief audit executive has responsibility must be overseen by a party outside the internal audit activity.

FIGURE 21.1 (Continued)

**ATTRIBUTE STANDARDS**

**1130.C1**—Internal auditors may provide consulting services relating to operations for which they had previous responsibilities.

**1130.C2**—If internal auditors have potential impairments to independence or objectivity relating to proposed consulting services, disclosure must be made to the engagement client prior to accepting the engagement.

**1200—Proficiency and Due Professional Care**

Engagements must be performed with proficiency and due professional care.

**1210—Proficiency**

Internal auditors must possess the knowledge, skills, and other competencies needed to perform their individual responsibilities. The internal audit activity collectively must possess or obtain the knowledge, skills, and other competencies needed to perform its responsibilities.

**Interpretation:**

*Knowledge, skills, and other competencies is a collective term that refers to the professional proficiency required of internal auditors to effectively carry out their professional responsibilities. Internal auditors are encouraged to demonstrate their proficiency by obtaining appropriate professional certifications and qualifications, such as the Certified Internal Auditor designation and other designations offered by The Institute of Internal Auditors and other appropriate professional organizations.*

**1210.A1**—The chief audit executive must obtain competent advice and assistance if the internal auditors lack the knowledge, skills, or other competencies needed to perform all or part of the engagement.

**1210.A2**—Internal auditors must have sufficient knowledge to evaluate the risk of fraud and the manner in which it is managed by the organization, but are not expected to have the expertise of a person whose primary responsibility is detecting and investigating fraud.

**1210.A3**—Internal auditors must have sufficient knowledge of key information technology risks and controls and available technology-based audit techniques to perform their assigned work. However, not all internal auditors are expected to have the expertise of an internal auditor whose primary responsibility is information technology auditing.

**1210.C1**—The chief audit executive must decline the consulting engagement or obtain competent advice and assistance if the internal auditors lack the knowledge, skills, or other competencies needed to perform all or part of the engagement.

**1220—Due Professional Care**

Internal auditors must apply the care and skill expected of a reasonably prudent and competent internal auditor. Due professional care does not imply infallibility.

**1220.A1**—Internal auditors must exercise due professional care by considering the:

- Extent of work needed to achieve the engagement's objectives;
- Relative complexity, materiality, or significance of matters to which assurance procedures are applied;
- Adequacy and effectiveness of governance, risk management, and control processes;
- Probability of significant errors, fraud, or noncompliance; and
- Cost of assurance in relation to potential benefits.

**1220.A2**—In exercising due professional care, internal auditors must consider the use of technology-based audit and other data analysis techniques.

**1220.A3**—Internal auditors must be alert to the significant risks that might affect objectives, operations, or resources. However, assurance procedures alone, even when performed with due professional care, do not guarantee that all significant risks will be identified.

**1220.C1**—Internal auditors must exercise due professional care during a consulting engagement by considering the:

- Needs and expectations of clients, including the nature, timing, and communication of engagement results;
- Relative complexity and extent of work needed to achieve the engagement's objectives; and
- Cost of the consulting engagement in relation to potential benefits.

**1230—Continuing Professional Development**

Internal auditors must enhance their knowledge, skills, and other competencies through continuing professional development.

**1300—Quality Assurance and Improvement Program**

The chief audit executive must develop and maintain a quality assurance and improvement program that covers all aspects of the internal audit activity.

(continued)

**FIGURE 21.1** (Continued)**ATTRIBUTE STANDARDS****Interpretation:**

*A quality assurance and improvement program is designed to enable an evaluation of the internal audit activity's conformance with the "Definition of Internal Auditing" and the Standards and an evaluation of whether internal auditors apply the Code of Ethics. The program also assesses the efficiency and effectiveness of the internal audit activity and identifies opportunities for improvement.*

**1310—Requirements of the Quality Assurance and Improvement Program**

The quality assurance and improvement program must include both internal and external assessments.

**1311—Internal Assessments**

Internal assessments must include:

Ongoing monitoring of the performance of the internal audit activity; and periodic reviews performed through self-assessment or by other persons within the organization with sufficient knowledge of internal audit practices.

**Interpretation:**

*Ongoing monitoring is an integral part of the day-to-day supervision, review, and measurement of the internal audit activity. Ongoing monitoring is incorporated into the routine policies and practices used to manage the internal audit activity and uses processes, tools, and information considered necessary to evaluate conformance with the Definition of Internal Auditing, the Code of Ethics, and the Standards.*

*Periodic reviews are assessments conducted to evaluate conformance with the Definition of Internal Auditing, the Code of Ethics, and the Standards.*

*Sufficient knowledge of internal audit practices requires at least an understanding of all elements of the International Professional Practices Framework.*

**1312—External Assessments**

External assessments must be conducted at least once every five years by a qualified, independent reviewer or review team from outside the organization. The chief audit executive must discuss with the board:

- The need for more frequent external assessments; and
- The qualifications and independence of the external reviewer or review team, including any potential conflict of interest.

**Interpretation:**

*A qualified reviewer or review team demonstrates competence in two areas: the professional practice of internal auditing and the external assessment process. Competence can be demonstrated through a mixture of experience and theoretical learning. Experience gained in organizations of similar size, complexity, sector, or industry, and technical issues is more valuable than less relevant experience. In the case of a review team, not all members of the team need to have all the competencies; it is the team as a whole that is qualified. The chief audit executive uses professional judgment when assessing whether a reviewer or review team demonstrates sufficient competence to be qualified.*

*An independent reviewer or review team means not having either a real or an apparent conflict of interest and not being a part of, or under the control of, the organization to which the internal audit activity belongs.*

**1320—Reporting on the Quality Assurance and Improvement Program**

The chief audit executive must communicate the results of the quality assurance and improvement program to senior management and the board.

**Interpretation:**

*The form, content, and frequency of communicating the results of the quality assurance and improvement program is established through discussions with senior management and the board and considers the responsibilities of the internal audit activity and chief audit executive as contained in the internal audit charter. To demonstrate conformance with the Definition of Internal Auditing, the Code of Ethics, and the Standards, the results of external and periodic internal assessments are communicated upon completion of such assessments and the results of ongoing monitoring are communicated at least annually. The results include the reviewer's or review team's assessment with respect to the degree of conformance.*

**1321—Use of "Conforms with the International Standards for the Professional Practice of Internal Auditing"**

The chief audit executive may state that the internal audit activity conforms with the *International Standards for the Professional Practice of Internal Auditing* only if the results of the quality assurance and improvement program support this statement.

**Interpretation:**

The internal audit activity conforms with the *Standards* when it achieves the outcomes described in the Definition of Internal Auditing, Code of Ethics, and *Standards*. The results of the quality assurance and improvement program include the results of both internal and external assessments. All internal audit activities will have the results of internal assessments. Internal audit activities in existence for at least five years will also have the results of external assessments.

FIGURE 21.1 (Continued)

**ATTRIBUTE STANDARDS****1322—Disclosure of Nonconformance**

When nonconformance with the Definition of Internal Auditing, the Code of Ethics, or the *Standards* impacts the overall scope or operation of the internal audit activity, the chief audit executive must disclose the nonconformance and the impact to senior management and the board.

**PERFORMANCE STANDARDS****2000—Managing the Internal Audit Activity**

The chief audit executive must effectively manage the internal audit activity to ensure it adds value to the organization.

**Interpretation:**

*The internal audit activity is effectively managed when:*

- *The results of the internal audit activity's work achieve the purpose and responsibility included in the internal audit charter;*
- *The internal audit activity conforms with the Definition of Internal Auditing and the Standards; and*
- *The individuals who are part of the internal audit activity demonstrate conformance with the Code of Ethics and the Standards.*

*The internal audit activity adds value to the organization (and its stakeholders) when it provides objective and relevant assurance, and contributes to the effectiveness and efficiency of governance, risk management, and control processes.*

**2010—Planning**

The chief audit executive must establish risk-based plans to determine the priorities of the internal audit activity, consistent with the organization's goals.

**Interpretation:**

*The chief audit executive is responsible for developing a risk-based plan. The chief audit executive takes into account the organization's risk management framework, including using risk appetite levels set by management for the different activities or parts of the organization. If a framework does not exist, the chief audit executive uses his/her own judgment of risks after consultation with senior management and the board.*

**2010.A1**—The internal audit activity's plan of engagements must be based on a documented risk assessment, undertaken at least annually. The input of senior management and the board must be considered in this process.

**2010.A2**—The chief audit executive must identify and consider the expectations of senior management, the board, and other stakeholders for internal audit opinions and other conclusions.

**2010.C1**—The chief audit executive should consider accepting proposed consulting engagements based on the engagement's potential to improve management of risks, add value, and improve the organization's operations. Accepted engagements must be included in the plan.

**2020—Communication and Approval**

The chief audit executive must communicate the internal audit activity's plans and resource requirements, including significant interim changes, to senior management and the board for review and approval. The chief audit executive must also communicate the impact of resource limitations.

**2030—Resource Management**

The chief audit executive must ensure that internal audit resources are appropriate, sufficient, and effectively deployed to achieve the approved plan.

**Interpretation:**

*Appropriate refers to the mix of knowledge, skills, and other competencies needed to perform the plan.*

*"Sufficient" refers to the quantity of resources needed to accomplish the plan. Resources are effectively deployed when they are used in a way that optimizes the achievement of the approved plan.*

**2040—Policies and Procedures**

The chief audit executive must establish policies and procedures to guide the internal audit activity.

**Interpretation:**

*The form and content of policies and procedures are dependent upon the size and structure of the internal audit activity and the complexity of its work.*

**2050—Coordination**

The chief audit executive should share information and coordinate activities with other internal and external providers of assurance and consulting services to ensure proper coverage and minimize duplication of efforts.

**2060—Reporting to Senior Management and the Board**

The chief audit executive must report periodically to senior management and the board on the internal audit activity's purpose, authority, responsibility, and performance relative to its plan. Reporting must also include significant risk exposures and control issues, including fraud risks, governance issues, and other matters needed or requested by senior management and the board.

(continued)

**FIGURE 21.1** (Continued)**PERFORMANCE STANDARDS****Interpretation:**

*The frequency and content of reporting are determined in discussion with senior management and the board and depend on the importance of the information to be communicated and the urgency of the related actions to be taken by senior management or the board.*

**2070—External Service Provider and Organizational Responsibility for Internal Auditing**

When an external service provider serves as the internal audit activity, the provider must make the organization aware that the organization has the responsibility for maintaining an effective internal audit activity.

**Interpretation**

*This responsibility is demonstrated through the quality assurance and improvement program which assesses conformance with the Definition of Internal Auditing, the Code of Ethics, and the Standards.*

**2100—Nature of Work**

The internal audit activity must evaluate and contribute to the improvement of governance, risk management, and control processes using a systematic and disciplined approach.

**2110—Governance**

The internal audit activity must assess and make appropriate recommendations for improving the governance process in its accomplishment of the following objectives:

- Promoting appropriate ethics and values within the organization;
- Ensuring effective organizational performance management and accountability;
- Communicating risk and control information to appropriate areas of the organization; and
- Coordinating the activities of and communicating information among the board, external and internal auditors, and management.

**2110.A1**—The internal audit activity must evaluate the design, implementation, and effectiveness of the organization's ethics-related objectives, programs, and activities.

**2110.A2**—The internal audit activity must assess whether the information technology governance of the organization supports the organization's strategies and objectives.

**2120—Risk Management**

The internal audit activity must evaluate the effectiveness and contribute to the improvement of risk management processes.

**Interpretation:**

*Determining whether risk management processes are effective is a judgment resulting from the internal auditor's assessment that:*

- *Organizational objectives support and align with the organization's mission;*
- *Significant risks are identified and assessed;*
- *Appropriate risk responses are selected that align risks with the organization's risk appetite; and*
- *Relevant risk information is captured and communicated in a timely manner across the organization, enabling staff, management, and the board to carry out their responsibilities.*

*The internal audit activity may gather the information to support this assessment during multiple engagements. The results of these engagements, when viewed together, provide an understanding of the organization's risk management processes and their effectiveness.*

*Risk management processes are monitored through ongoing management activities, separate evaluations, or both.*

**2120.A1**—The internal audit activity must evaluate risk exposures relating to the organization's governance, operations, and information systems regarding the:

- Reliability and integrity of financial and operational information.
- Effectiveness and efficiency of operations and programs;
- Safeguarding of assets; and
- Compliance with laws, regulations, policies, procedures, and contracts.

**2120.A2**—The internal audit activity must evaluate the potential for the occurrence of fraud and how the organization manages fraud risk.

**2120.C1**—During consulting engagements, internal auditors must address risk consistent with the engagement's objectives and be alert to the existence of other significant risks.

**2120.C2**—Internal auditors must incorporate knowledge of risks gained from consulting engagements into their evaluation of the organization's risk management processes.

**2120.C3**—When assisting management in establishing or improving risk management processes, internal auditors must refrain from assuming any management responsibility by actually managing risks.

**FIGURE 21.1** (Continued)**PERFORMANCE STANDARDS****2130—Control**

The internal audit activity must assist the organization in maintaining effective controls by evaluating their effectiveness and efficiency and by promoting continuous improvement.

**2130.A1**—The internal audit activity must evaluate the adequacy and effectiveness of controls in responding to risks within the organization's governance, operations, and information systems regarding the:

- Reliability and integrity of financial and operational information;
- Effectiveness and efficiency of operations and programs;
- Safeguarding of assets; and
- Compliance with laws, regulations, policies, procedures, and contracts.

**2130.C1**—Internal auditors must incorporate knowledge of controls gained from consulting engagements into evaluation of the organization's control processes.

**2200—Engagement Planning**

Internal auditors must develop and document a plan for each engagement, including the engagement's objectives, scope, timing, and resource allocations.

**2201—Planning Considerations**

In planning the engagement, internal auditors must consider:

- The objectives of the activity being reviewed and the means by which the activity controls its performance;
- The significant risks to the activity, its objectives, resources, and operations and the means by which the potential impact of risk is kept to an acceptable level;
- The adequacy and effectiveness of the activity's risk management and control processes compared to a relevant control framework or model; and
- The opportunities for making significant improvements to the activity's risk management and control processes.

**2201.A1**—When planning an engagement for parties outside the organization, internal auditors must establish a written understanding with them about objectives, scope, respective responsibilities, and other expectations, including restrictions on distribution of the results of the engagement and access to engagement records.

**2201.C1**—Internal auditors must establish an understanding with consulting engagement clients about objectives, scope, respective responsibilities, and other client expectations. For significant engagements, this understanding must be documented.

**2210—Engagement Objectives**

Objectives must be established for each engagement.

**2210.A1**—Internal auditors must conduct a preliminary assessment of the risks relevant to the activity under review. Engagement objectives must reflect the results of this assessment.

**2210.A2**—Internal auditors must consider the probability of significant errors, fraud, noncompliance, and other exposures when developing the engagement objectives.

**2210.A3**—Adequate criteria are needed to evaluate controls. Internal auditors must ascertain the extent to which management has established adequate criteria to determine whether objectives and goals have been accomplished. If adequate, internal auditors must use such criteria in their evaluation. If inadequate, internal auditors must work with management to develop appropriate evaluation criteria.

**2210.C1**—Consulting engagement objectives must address governance, risk management, and control processes to the extent agreed upon with the client.

**2210.C2**—Consulting engagement objectives must be consistent with the organization's values, strategies, and objectives.

**2220—Engagement Scope**

The established scope must be sufficient to satisfy the objectives of the engagement.

**2220.A1**—The scope of the engagement must include consideration of relevant systems, records, personnel, and physical properties, including those under the control of third parties.

**2220.A2**—If significant consulting opportunities arise during an assurance engagement, a specific written understanding as to the objectives, scope, respective responsibilities, and other expectations should be reached and the results of the consulting engagement communicated in accordance with consulting standards.

**2220.C1**—In performing consulting engagements, internal auditors must ensure that the scope of the engagement is sufficient to address the agreed-upon objectives. If internal auditors develop reservations about the scope during the engagement, these reservations must be discussed with the client to determine whether to continue with the engagement.

**2220.C2**—During consulting engagements, internal auditors must address controls consistent with the engagement's objectives and be alert to significant control issues.

(continued)

**FIGURE 21.1** (Continued)**PERFORMANCE STANDARDS****2230—Engagement Resource Allocation**

Internal auditors must determine appropriate and sufficient resources to achieve engagement objectives based on an evaluation of the nature and complexity of each engagement, time constraints, and available resources.

**2240—Engagement Work Program**

Internal auditors must develop and document work programs that achieve the engagement objectives.

**2240.A1**—Work programs must include the procedures for identifying, analyzing, evaluating, and documenting information during the engagement. The work program must be approved prior to its implementation, and any adjustments approved promptly.

**2240.C1**—Work programs for consulting engagements may vary in form and content depending upon the nature of the engagement.

**2300—Performing the Engagement**

Internal auditors must identify, analyze, evaluate, and document sufficient information to achieve the engagement's objectives.

**2310—Identifying Information**

Internal auditors must identify sufficient, reliable, relevant, and useful information to achieve the engagement's objectives.

**Interpretation:**

*Sufficient information is factual, adequate, and convincing so that a prudent, informed person would reach the same conclusions as the auditor. Reliable information is the best attainable information through the use of appropriate engagement techniques. Relevant information supports engagement observations and recommendations and is consistent with the objectives for the engagement. Useful information helps the organization meet its goals.*

**2320—Analysis and Evaluation**

Internal auditors must base conclusions and engagement results on appropriate analyses and evaluations.

**2330—Documenting Information**

Internal auditors must document relevant information to support the conclusions and engagement results.

**2330.A1**—The chief audit executive must control access to engagement records. The chief audit executive must obtain the approval of senior management and/or legal counsel prior to releasing such records to external parties, as appropriate.

**2330.A2**—The chief audit executive must develop retention requirements for engagement records, regardless of the medium in which each record is stored. These retention requirements must be consistent with the organization's guidelines and any pertinent regulatory or other requirements.

**2330.C1**—The chief audit executive must develop policies governing the custody and retention of consulting engagement records, as well as their release to internal and external parties. These policies must be consistent with the organization's guidelines and any pertinent regulatory or other requirements.

**2340—Engagement Supervision**

Engagements must be properly supervised to ensure objectives are achieved, quality is assured, and staff is developed.

**Interpretation:**

*The extent of supervision required will depend on the proficiency and experience of internal auditors and the complexity of the engagement. The chief audit executive has overall responsibility for supervising the engagement, whether performed by or for the internal audit activity, but may designate appropriately experienced members of the internal audit activity to perform the review. Appropriate evidence of supervision is documented and retained.*

**2400—Communicating Results**

Internal auditors must communicate the results of engagements.

**2410—Criteria for Communicating**

Communications must include the engagement's objectives and scope as well as applicable conclusions, recommendations, and action plans.

**2410.A1**—Final communication of engagement results must, where appropriate, contain the internal auditors' opinion and/or conclusions. When issued, an opinion or conclusion must take account of the expectations of senior management, the board, and other stakeholders and must be supported by sufficient, reliable, relevant, and useful information.

FIGURE 21.1 (Continued)

## PERFORMANCE STANDARDS

**Interpretation:**

*Opinions at the engagement level may be ratings, conclusions, or other descriptions of the results. Such an engagement may be in relation to controls around a specific process, risk, or business unit. The formulation of such opinions requires consideration of the engagement results and their significance.*

**2410.A2**—Internal auditors are encouraged to acknowledge satisfactory performance in engagement communications.

**2410.A3**—When releasing engagement results to parties outside the organization, the communication must include limitations on distribution and use of the results.

**2410.C1**—Communication of the progress and results of consulting engagements will vary in form and content depending upon the nature of the engagement and the needs of the client.

**2420—Quality of Communications**

Communications must be accurate, objective, clear, concise, constructive, complete, and timely.

**Interpretation:**

*Accurate communications are free from errors and distortions and are faithful to the underlying facts. Objective communications are fair, impartial, and unbiased and are the result of a fair-minded and balanced assessment of all relevant facts and circumstances. Clear communications are easily understood and logical, avoiding unnecessary technical language and providing all significant and relevant information. Concise communications are to the point and avoid unnecessary elaboration, superfluous detail, redundancy, and wordiness. Constructive communications are helpful to the engagement client and the organization and lead to improvements where needed. Complete communications lack nothing that is essential to the target audience and include all significant and relevant information and observations to support recommendations and conclusions. Timely communications are opportune and expedient, depending on the significance of the issue, allowing management to take appropriate corrective action.*

**2421—Errors and Omissions**

If a final communication contains a significant error or omission, the chief audit executive must communicate corrected information to all parties who received the original communication.

**2430—Use of “Conducted in Conformance with the *International Standards for the Professional Practice of Internal Auditing*”**

Internal auditors may report that their engagements are “conducted in conformance with the *International Standards for the Professional Practice of Internal Auditing*,” only if the results of the quality assurance and improvement program support the statement.

**2431—Engagement Disclosure of Nonconformance**

When nonconformance with the Definition of Internal Auditing, the Code of Ethics, or the *Standards* impacts a specific engagement, communication of the results must disclose the:

- Principle or rule of conduct of the Code of Ethics or *Standard(s)* with which full conformance was not achieved;
- Reason(s) for nonconformance; and
- Impact of nonconformance on the engagement and the communicated engagement results.

**2440—Disseminating Results**

The chief audit executive must communicate results to the appropriate parties.

**Interpretation:**

*The chief audit executive or designee reviews and approves the final engagement communication before issuance and decides to whom and how it will be disseminated.*

**2440.A1**—The chief audit executive is responsible for communicating the final results to parties who can ensure that the results are given due consideration.

**2440.A2**—If not otherwise mandated by legal, statutory, or regulatory requirements, prior to releasing results to parties outside the organization, the chief audit executive must:

- Assess the potential risk to the organization;
- Consult with senior management and/or legal counsel as appropriate; and
- Control dissemination by restricting the use of the results.

**2440.C1**—The chief audit executive is responsible for communicating the final results of consulting engagements to clients.

**2440.C2**—During consulting engagements, governance, risk management, and control issues may be identified. Whenever these issues are significant to the organization, they must be communicated to senior management and the board.

(continued)

**FIGURE 21.1** (Continued)**PERFORMANCE STANDARDS****2450—Overall Opinions**

When an overall opinion is issued, it must take into account the expectations of senior management, the board, and other stakeholders and must be supported by sufficient, reliable, relevant, and useful information.

**Interpretation:**

The communication will identify:

- The scope, including the time period to which the opinion pertains;
- Scope limitations;
- Consideration of all related projects including the reliance on other assurance providers;
- The risk or control framework or other criteria used as a basis for the overall opinion; and
- The overall opinion, judgment, or conclusion reached.

The reasons for an unfavorable overall opinion must be stated.

**2500—Monitoring Progress**

The chief audit executive must establish and maintain a system to monitor the disposition of results communicated to management.

**2500.A1**—The chief audit executive must establish a follow-up process to monitor and ensure that management actions have been effectively implemented or that senior management has accepted the risk of not taking action.

**2500.C1**—The internal audit activity must monitor the disposition of results of consulting engagements to the extent agreed upon with the client.

**2600—Resolution of Senior Management's Acceptance of Risks**

When the chief audit executive believes that senior management has accepted a level of residual risk that may be unacceptable to the organization, the chief audit executive must discuss the matter with senior management. If the decision regarding residual risk is not resolved, the chief audit executive must report the matter to the board for resolution.

**LO 21-3**

Identify the standards for the professional practice of internal auditing.

*Purpose, Authority, and Responsibility*

The purpose, authority, and responsibility of the internal auditing department should be set forth in the department's charter, as approved by the organization's board of directors. Its purpose should be consistent with the IIA's definition of internal auditing, the Code of Ethics, and *Standards*.

*Independence and Objectivity*

Since internal auditors are employees of the organization, they are unlikely to have the perceived independence of external auditors. However, independence is still very important to internal auditors. They should maintain an impartial, objective attitude and avoid conditions that threaten the ability to carry out work in an unbiased manner. Independence of the internal auditing department is enhanced when the **chief audit executive**<sup>1</sup> reports to a level within the organization that allows the internal audit activity to fulfill its responsibilities. Ideally, the chief audit executive should report directly to the audit committee of the board of directors. Independence is also enhanced when potential conflicts of interest are considered in assigning staff to audit assignments. For example, it would be a conflict of interest for an internal auditor to audit an area in which that individual was recently employed. It is difficult, if not impossible, to remain objective in evaluating one's own operating decisions.

*Proficiency and Due Professional Care*

An internal auditing department should establish policies and procedures that ensure that staff members are competent to fulfill their assignments with professional proficiency. Ideally, the internal auditing department collectively should possess the skills and knowledge necessary to fulfill all the audit requirements of the organization. These skills and knowledge may be acquired through a combination of effective employment practices and continuing education programs.

<sup>1</sup> This title, used by the IIA, is equivalent to the director of internal auditing.

Internal auditors must apply due care in performing their work by considering factors that are critical to performing an engagement, including complexity, controls, materiality, and the probability of misstatements. Due care involves considering the use of technology-based and other data analysis techniques, and being alert to significant risks. In performing consulting engagements, internal auditors should consider the needs of the clients, complexity of the engagement, and the costs and benefits of the engagement.

#### *Quality Assurance and Improvement Program*

The chief audit executive should establish a quality assurance and improvement program that covers all aspects of the internal audit activity and continuously monitors its effectiveness. The quality assurance and improvement program must include both internal and external assessments of effectiveness. In addition, the results of the quality assurance and improvement program should be communicated to senior management and the board of directors along with any instances where noncompliance affects the overall scope or operation of the internal audit activity.

#### *Managing the Internal Audit Activity*

This group of standards provides guidance for the chief audit executive in managing the internal auditing function. The chief audit executive is responsible for properly administering the department to help assure that (1) audit activity is planned based on a risk assessment, (2) plans are approved by senior management and the board, (3) audit work is planned, controlled, and coordinated to ensure that maximum value is provided to the organization, and (4) the resources of the internal auditing department are efficiently and effectively employed.

#### *Nature of Work*

The nature of the internal auditors' work should primarily involve improving risk management, control, and governance processes.

#### *Engagement Planning*

The IIA's standards in this category recognize that if audit work is to be effective it must be adequately planned. Effective planning includes developing appropriate objectives, scope, timing, and resource allocations.

#### *Performing the Engagement*

In performing every engagement, the internal auditors should identify relevant information, perform appropriate analysis and evaluation of the information, prepare work papers that support their conclusions, and adequately supervise staff members assigned to the engagement.

#### *Communicating Results*

For audit work to have its intended effect, the results must be communicated to appropriate individuals accurately, objectively, completely, constructively, clearly, concisely, and on a timely basis. Communications should include the engagement's objectives as well as applicable conclusions and recommendations. When applicable, reports should indicate that the engagement was conducted in accordance with the IIA standards.

#### *Monitoring Progress*

This aspect of auditing standards involves monitoring the progress of the organization with respect to the internal auditors' recommendations. The chief audit executive should follow up to determine that management has taken appropriate action on recommendations, or that management has decided to accept the risk of not taking any action.

#### *Resolution of Senior Management's Acceptance of Risks*

When the chief audit executive believes that an unacceptable level of risk exists, the matter should be discussed with senior management. If the matter remains unresolved, both the chief audit executive and senior management should report the matter to the board of directors.

## Certification of Internal Auditors

Since 1974, The IIA has administered the **Certified Internal Auditor (CIA)** program. To become certified, a candidate must hold a bachelor's degree from an accredited college and successfully complete a four-part examination that is offered throughout the world. The four parts of the examination include: The Internal Audit Activity's Role in Governance, Risk and Control; Conducting the Internal Audit Engagement; Business Analysis and Information Technology; and Business Management Skills. Another requirement of certification is at least two years of work experience in internal auditing or its equivalent, although an advanced academic degree may be substituted for one year of work experience in meeting this requirement. When internal auditors become certified, they must meet requirements for continuing professional education. More information on internal auditing and the CIA examination is available from The Institute of Internal Auditors, 247 Maitland Avenue, Altamonte Springs, Florida 32701 or at [www.theiia.org](http://www.theiia.org).

## Operational Auditing

### LO 21-4

Explain the nature and the purpose of an operational audit.

The term **operational auditing** refers to comprehensive examination of an operating unit or a complete organization to evaluate its systems, controls, and performance, as measured by management's objectives. Whereas a *financial audit* focuses on the measurement of financial position, results of operations, and cash flows of an entity, an operational audit focuses on the *efficiency*, *effectiveness*, and *economy* of operations. The operational auditor appraises management's operating controls and systems over such varied activities as purchasing, data processing, receiving, shipping, office services, advertising, and engineering.

## Objectives of Operational Audits

Operational audits are often performed by internal auditors for their organizations. The major users of operational audit reports are managers at various levels, including the board of directors. Top management needs assurance that every component of an organization is working to attain the organization's goals. For example, management needs the following:

1. Assessments of the unit's performance in relation to management's objectives or other appropriate criteria.
2. Assurance that its plans (as set forth in statements of objectives, programs, budgets, and directives) are comprehensive, consistent, and understood at the operating levels.
3. Objective information on how well its plans and policies are being carried out in all areas of operations, as well as information on opportunities for improvement in effectiveness, efficiency, and economy.
4. Information on weaknesses in operating controls, particularly as to possible sources of waste.
5. Reassurance that all operating reports can be relied on as a basis for action.

Governmental auditors, such as those employed by the Government Accountability Office (GAO), perform operational audits of governmental programs that are administered by both governmental and nongovernmental organizations. Operational auditing is especially applicable to governmental programs where the effectiveness of the programs cannot be evaluated in terms of profits; they must be evaluated by measuring such elements as the number of families relocated, the number of individuals rehabilitated, and the extent of the improvement in environmental conditions. In addition to internal and governmental auditors, CPA firms perform operational audits for clients through their consulting services departments.

## General Approach to Operational Audits

In many respects, the auditor's work in performing an operational audit is similar to that of a financial statement audit, but there are some significant differences. The steps may be set forth as (1) definition of purpose, (2) familiarization, (3) preliminary survey, (4) program

**FIGURE 21.2**  
The Operational Audit

development, (5) fieldwork, (6) reporting the findings, and (7) follow-up. The operational audit process is illustrated in Figure 21.2.

#### *Definition of Purpose*

The broad statement of purpose of an operational audit usually includes the intention to appraise the performance of a particular organization, function, or group of activities. However, this broad statement must be expanded to specify precisely the scope of the audit and the nature of the report. The auditors must determine specifically which policies and procedures are to be appraised and how they relate to the specific objectives of the organization.

#### *Familiarization*

Before starting an operational audit, the auditors must obtain a comprehensive knowledge of the objectives, organizational structure, and operating characteristics of the unit being audited. This familiarization process might begin with a study of organizational charts, statements of the functions and responsibilities assigned, management policies and directives, and operating policies and procedures. At this stage, the auditors may read some of the published material available on the subject to acquaint themselves as fully as possible with the functions performed. This background information equips the auditor to visit the organization's facilities and interview supervisory personnel to determine their specific objectives, the standards used to measure accomplishment of those objectives, and the principal problems encountered in achieving those objectives. During these visits, the auditors will also observe the operations and inspect the available records and reports.

In summary, the auditors attempt to familiarize themselves as thoroughly as possible with the function being performed, particularly from the standpoint of administrative responsibility and control. The auditors' understanding of the organization is documented with questionnaires, flowcharts, and written narratives.

*Preliminary Survey*

The auditors' preliminary conclusions about the critical aspects of the operations and potential problem areas are summarized as the auditors' preliminary survey. This survey serves as a guide for the development of the audit program.

*Program Development*

The operational audit program is tailor-made to the particular engagement. It contains all the tests and analyses the auditors believe are necessary to evaluate the organization's operations. Based on the nature and difficulty of the audit work, appropriate personnel will be assigned to the engagement, and the work will be scheduled.

*Fieldwork*

The fieldwork phase involves executing the operational audit program. The auditors select the items to be reviewed to determine the adequacy of the procedures and how well they are followed. Just as in financial statement audits, the auditors will frequently select representative samples of the transactions from the records and inspect them to determine whether proper procedures have been followed and to discover the nature and extent of the problems encountered. In other cases, they may resort to inquiry or direct observation to satisfy themselves that the employees understand their instructions and are carrying out their work as intended.

Analysis is another important part of fieldwork. Actual performance by the organization is compared with various criteria, such as budgets, productivity goals, or performance by similar units. This analysis provides a basis for auditors' recommendations for improvements in effectiveness, efficiency, and economy.

As each phase of the fieldwork is completed, the auditors summarize the results and evaluate the material gathered. Deficiencies that appear to be significant are discussed with the supervisor involved. Frequently, corrective action may be taken at this time, although the primary purpose of this on-the-spot discussion is to make sure that all the relevant facts have been obtained.

During fieldwork, the auditors will document the planning, evidence gathered, analysis, interpretation, and findings in their *working papers*. The audit working papers should stand alone and support the auditors' report.

*Reporting the Findings*

On final completion of the fieldwork, the auditors should summarize their findings related to the basic purposes of the audit. The report will include suggested improvements in the operational policies and procedures of the unit and a list of situations in which compliance with existing policies and procedures is less than adequate. After

## Illustrative Cases

### Compliance Auditing: Two Examples

#### COMPLIANCE WITH THE CLEAN AIR ACT

The Environmental Protection Agency has issued guidelines for Oxygenated Gasoline Credit Programs under the Clean Air Act, which requires CPAs (or internal auditors) to perform agreed-upon procedures regarding a company's compliance with an EPA regulation that requires gasoline to contain at least 2 percent oxygen. Management's assertion indicates the company's compliance with the relevant requirements (which are specifically listed) of the Clean Air Act.

#### COMPLIANCE WITH THE FDIC IMPROVEMENT ACT OF 1991

The Federal Depository Insurance Corporation (FDIC) Improvement Act of 1991 requires that CPAs be engaged to perform agreed-upon procedures engagements to test large financial institutions' compliance with certain provisions related to the "safety and soundness" of the institutions. The assertion in this case states management's belief that the institution has complied with the listed provisions of the act.

they have completed the draft report, they should arrange an *exit conference* to review the findings with all persons directly concerned with the operations audited. The conference ensures that the auditors have an accurate and complete story; if there is a question about the facts, further investigation will be made until any doubt is resolved. If a serious disagreement on the interpretation of the facts remains, it is usually best to disclose both interpretations in the report. The conference also provides an opportunity for the affected management to consider and take timely action on the problems disclosed.

A formal report, such as the one illustrated by Figure 21.3, is then issued to top management. For each finding, a complete report will describe (1) the *criteria* used to evaluate the activity, (2) the *condition* (e.g., problem) that exists, (3) the *cause*, (4) the *effect*, and (5) *recommendations* for improvement.

### Follow-Up

The final stage in the operational auditors' work is the follow-up action to ensure that any deficiencies disclosed in the audit report are satisfactorily handled. This follow-up responsibility may be given to a line organization or staff group, but most frequently it is held to be a responsibility of the audit staff. In some instances, the auditors find it

**FIGURE 21.3**  
Introductory Language  
for an Operational  
Audit Report

Neal McGregor  
Vice President—Operations  
Baxter Corporation  
Kansas City, Missouri

Dear Mr. McGregor:

In September 20X1, we concluded an operational audit of the data processing operations.

#### Objectives, Scope, and Approach

The general objectives of this engagement, which were more specifically outlined in our letter dated June 30, 20X1, were as follows:

- To document, analyze, and report on the status of current operations.
- To identify areas that require attention.
- To make recommendations for corrective action or improvements.

Our operational audit encompassed the centralized data processing facilities and the on-site computer operations of the company's retailing division. Our evaluations included both the financial and operational conditions of the units. Financial data consulted in the course of our analyses were not audited or reviewed by us, and, accordingly, we do not express an opinion or any other form of assurance on them.

The operational audit involved interviews with management personnel and selected operations personnel in each of the units studied. We also evaluated selected documents, files, reports, systems, procedures, and policies as we considered appropriate. After analyzing the data, we developed recommendations for improvements. We then discussed our findings and recommendations with appropriate unit management personnel, and with you, prior to submitting this written report.

#### Findings and Recommendations

All significant findings are included in this report for your consideration. The recommendations in this report represent, in our judgment, those most likely to bring about improvements in the operations of the organization. The recommendations differ in such aspects as difficulty of implementation, urgency, visibility of benefits, and required investment in facilities and equipment or additional personnel. The varying nature of the recommendations, their implementation costs, and their potential impact on operations should be considered in reaching your decision on courses of action.

(Specific Findings and Recommendations)

desirable to make brief reexaminations after a reasonable lapse of time to ensure that all significant recommendations have been implemented.

## Compliance Auditing

### LO 21-5

Distinguish among the various types of compliance audits.

Society has always been concerned about compliance with laws and regulations by all types of organizations. As a result, compliance auditing has evolved to become an important part of the work of both external and internal auditors. **Compliance auditing** involves testing and reporting on whether an organization has complied with the requirements of various laws, regulations, and agreements. Congress and various regulators have adopted compliance auditing requirements for a wide variety of business, governmental, and nonprofit organizations. The Auditing Standards Board has developed general guidelines for all types of engagements that involve attesting to compliance with laws and regulations, and more specific guidelines for compliance auditing of federal financial assistance programs.

### Attesting to Compliance with Laws and Regulations

Section 601 of *Statement on Standards for Attestation Engagements (SSAE) No. 10*, “Attestation Standards: Revision and Recodification,”<sup>2</sup> provides guidance for CPAs when they are engaged either to apply agreed-upon procedures or perform an examination on an organization’s compliance with laws and regulations. *SSAE No. 10* prohibits CPAs from performing *reviews* of compliance with laws and regulations.

In compliance attestation engagements, CPAs address an organization’s **compliance with specified requirements**, or its internal control over compliance with specific laws and regulations. Management<sup>3</sup> provides an assertion about compliance in writing in a representation letter to the CPAs. That assertion also may be presented in a formal report that accompanies the CPAs’ report or be included in the CPAs’ report. The CPAs’ report provides assurance on either **management’s assertion** or directly on compliance.

#### *Applying Agreed-Upon Procedures to Test Compliance with Specified Requirements*

Engagements to apply agreed-upon procedures to test compliance with specified requirements are common compliance engagements. The objective of an agreed-upon procedures engagement is to assist users in evaluating an entity’s compliance with specified requirements based on procedures agreed upon by the users of the report. A major advantage of agreed-upon procedures engagements results from the fact that since the users participate in designing the procedures to be performed by the CPAs, it is likely that the work performed will meet their needs.

Agreed-upon procedures reports are restricted-use reports, intended for the audit committee, management, and other parties for whom the procedures were designed (e.g., the Environmental Protection Agency). The reports provide a summary of procedures performed and the CPAs’ findings. The findings section of the report should set forth any instances of **noncompliance** with relevant laws and regulations noted by the CPAs, regardless of whether they became aware of them as a result of the procedures performed or in some other way, such as through an informal discussion with an internal auditor. The format of a report on the application of agreed-upon procedures to compliance is illustrated in the accompanying box.

<sup>2</sup> *SSAE No. 10* revises and recodifies the first nine SSAEs. Guidance on compliance attestation was originally presented in *SSAE No. 3*, “Compliance Attestation.”

<sup>3</sup> Section 101 of *SSAE No. 10* provides that the report should identify the party responsible for the assertion or the subject matter of the assertion. The responsible party is defined as the person or persons, as either individuals or representatives of the entity, responsible for the subject matter. Management is deemed to be the “responsible party” throughout this chapter.

### Independent Accountant's Report

TO LENOS COMPANY:

We have performed the procedures enumerated below, which were agreed to by the Illinois Department of Education, solely to assist the users in evaluating Lenos Company's compliance with Section F.2 of Illinois Department of Education Regulation 74A of *Employment Health Requirements* during the period ended December 31, 20X1, included in the accompanying Management Report. Management is responsible for Lenos Company's compliance with these requirements. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

[Include paragraphs to enumerate procedures and findings.]

We were not engaged to and did not conduct an examination, the objective of which would be the expression of an opinion on compliance. Accordingly, we do not express such an opinion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of the Illinois Department of Education and is not intended to be and should not be used by anyone other than these specified parties.

#### *Applying Agreed-Upon Procedures to Test the Effectiveness of Controls over Compliance*

As indicated previously, CPAs also may be engaged to test the effectiveness of the organization's internal control over compliance. An organization's **internal control over compliance** is the process by which management obtains reasonable assurance that the organization has complied with specific requirements. The CPAs' report on the application of agreed-upon procedures to test the effectiveness of controls over compliance is similar to the report on compliance that is presented above. It describes the tests of controls performed and the related findings and includes the appropriate limitations on the distribution of the report and other caveats.

#### *Performing Examinations*

CPAs are sometimes engaged to perform an examination of a client's compliance with specified requirements (the subject matter) or of management's assertion related thereto. In performing an examination engagement, the CPAs begin by obtaining a thorough understanding of the requirements. Then they plan the engagement, consider the organization's internal control over compliance, perform sufficient procedures to form an opinion on compliance (or on management's assertion about compliance), and issue an opinion on compliance with specified requirements. An unqualified opinion on compliance with laws and regulations is shown in the accompanying box.

### Independent Accountant's Report

TO LENOS COMPANY:

We have examined Lenos Company's compliance with Section F.2 of Illinois Department of Education Regulation 74A of *Employment Health Requirements* during the period ended December 31, 20X1. Management is responsible for Lenos Company's compliance with those requirements. Our responsibility is to express an opinion on the Company's compliance based on our examination.

Our examination was conducted in accordance with standards established by the American Institute of Certified Public Accountants, and, accordingly, included examining, on a test basis, evidence about Lenos Company's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on Lenos Company's compliance with specified requirements.

In our opinion, Lenos Company complied, in all material respects, with the aforementioned requirements for the year ended December 31, 20X1.

The CPAs' examination report should be modified in the following circumstances:

- *Material noncompliance with specified requirements.* A qualified or adverse opinion should be issued when the auditors' procedures indicate that the organization did not comply with the requirements (reporting directly on the subject matter) or that management's report is not fairly stated.
- *Scope restriction.* A qualified opinion or disclaimer of opinion should be issued when the CPAs' procedures are restricted.
- *Involvement of another CPA firm in the examination.* In these circumstances, the principal CPA firm generally issues a report that indicates a division of responsibility.

Although the CPAs' examination report may generally be either on the subject matter or on management's assertion, when it is other than unqualified, the CPAs must report directly on the subject matter.

### Compliance Reporting by Broker-Dealers under PCAOB Requirements

In 2013, the SEC adopted amendments to the Securities Exchange Act of 1934 ("Exchange Act")<sup>4</sup> to implement a portion of the Dodd-Frank Wall Street Reform and Consumer Protection Act relating to brokers and dealers. The purpose was to strengthen and clarify **broker-dealer** annual financial reporting requirements and oversight of such information by CPAs. A broker-dealer is a person or firm in the business of buying and selling securities. Such a firm operates as a broker when it processes orders on behalf of clients, and as a dealer when it trades for its own account.

While broker-dealers for many years have filed annual audited financial statements and various supplemental schedules with the SEC, the amendments to the Exchange Act require additional reporting on compliance. Essential to this reporting is the broker-dealer's internal control over compliance with various SEC requirements (referred to as financial responsibility rules, such as maintaining adequate controls to safeguard client securities). Each broker-dealer who maintains custody of customer funds or securities is required to file an annual compliance report on whether

1. The broker-dealer has established and maintained internal control over compliance.
2. Internal control over compliance was effective during the most recent fiscal year.
3. Internal control over compliance was effective as of the end of the most recent fiscal year.
4. The broker-dealer was in compliance with various related rules addressing areas including the safeguarding customer securities and funds and maintaining necessary capital or reserves.
5. The information the broker-dealer used to assess compliance with point 4 was derived from its books and records.

A broker-dealer is required to engage a CPA to examine statements 2 through 5 and to issue a report based on that examination. PCAOB *Attestation Standard* 1, "Examination Engagements Regarding Compliance Reports of Brokers and Dealers," provides guidance for compliance audits. Both the broker-dealer's report and the auditor's compliance report describe identified material weaknesses in internal control over compliance and any noncompliance with a rule.

A broker-dealer that considers itself exempt from the requirements (ordinarily because that broker does not maintain custody of customer funds or securities) obtains an auditor's review report concerning the exemption. PCAOB *Attestation Standard* 2, "Review Engagements Regarding Exemption Reports of Brokers and Dealers," provides guidance for reviews.

<sup>4</sup> The specific Rules most directly involved with compliance reporting are 15 and 17. The 1934 Securities Exchange Act is available at: <http://www.sec.gov/about/laws/sea34.pdf>.

## Compliance Auditing of Government Entities and Organizations Receiving Federal Financial Assistance

### LO 21-6

Describe the auditing and reporting requirements of *Government Auditing Standards* and the Single Audit Act.

AICPA AU-C 935 provides guidance on performing tests of compliance in the following types of audits:

- Audits of the financial statements of entities receiving federal financial assistance in accordance with generally accepted auditing standards.
- Audits conducted in accordance with *Government Auditing Standards*.
- Audits conducted in accordance with the federal Single Audit Act.<sup>5</sup>

### *Audits in Accordance with Generally Accepted Auditing Standards*

As discussed in Chapter 2, auditors have a responsibility to design all audits to obtain reasonable assurance of detecting material misstatements resulting from violations of laws and regulations that have a *direct and material effect* on line-item amounts in the financial statements. Governmental organizations are subject to a variety of laws and regulations that affect their financial statements—many more than typical business enterprises. An important aspect of generally accepted accounting principles for governmental organizations is the recognition of various legal and contractual requirements. These requirements pertain to bases of accounting, fund structure, and other accounting principles. Therefore, in performing an audit of a governmental organization's financial statements, auditors are more likely to encounter laws and regulations that have a direct and material effect on the amounts in the organization's financial statements.

Governmental organizations receive funds from various sources, including taxes, special assessments, and bond issues. Laws and regulations often dictate the way the funds may be spent. While certain funds may be used for general government purposes, others are restricted to specific purposes, such as schools, libraries, or highways.

A governmental organization also may receive financial assistance from other governmental organizations in the form of grants, loans, loan guarantees, interest subsidies, insurance, and food commodities. This financial assistance often is provided subject to specified compliance requirements. For example, a federal agency may provide financial assistance to a governmental organization but require the organization to match the federal funding. In the event a governmental organization does not comply with the matching requirement, it may have to refund the federal financial assistance.

Auditors perform a number of procedures to identify the laws and regulations that have a direct effect on an organization's financial statements, including (1) discussing laws and regulations with management, program and grant administrators, and government auditors; (2) reviewing state and federal compliance requirement documents; (3) reviewing relevant grant and loan agreements; and (4) reviewing minutes of the legislative body of the governmental organization. Auditors also obtain written representations from management about the completeness of the laws and regulations identified and an acknowledgment of management's responsibility for compliance with them.

When auditors have an understanding of the important laws and regulations, they assess the risks that financial statement amounts might be materially affected by violations.<sup>6</sup> In making these assessments, they consider the controls designed to prevent violations, such as policies regarding acceptable operating practices, codes of conduct, and assignment of responsibility for complying and assessing compliance with legal and regulatory requirements. These risk assessments are then used to design the nature, timing, and extent of the auditors' substantive tests of compliance.

<sup>5</sup> AICPA AU-C 935 refers to the Single Audit Act of 1984. This act was amended in its entirety by the Single Audit Act Amendments of 1996.

<sup>6</sup> Generally, laws and regulations concerning compliance with financial assistance programs do not discuss compliance in terms of whether or not noncompliance might materially misstate the financial statements. These laws and regulations discuss the effect of noncompliance in terms of whether it has a direct and material effect on financial assistance programs.

### *Audits in Accordance with Government Auditing Standards*

The Government Accountability Office issues *Generally Accepted Government Auditing Standards* (GAGAS) for use in auditing federal entities and organizations that receive federal financial assistance. They include standards for financial audits and performance audits. These standards are included in a publication entitled **Government Auditing Standards**, which is commonly referred to as the “Yellow Book.” The standards apply (updated in 2011) only when required by law, regulation, or agreement. These standards impose additional requirements related to (1) ethics, (2) audit communication, (3) considering the results of previous audits, (4) noncompliance with provisions of contracts and grant agreements, (5) audit documentation, and (6) reporting.

*Ethical Principles* GAGAS place additional emphasis on ethical principles as the basis for the implementation of the standards, including a description of the following five key principles that should guide government audits:

1. The public interest—Observing integrity, objectivity, and independence in performing professional services assists the auditors in serving the public interest.
2. Integrity—Public confidence in government is maintained by auditors’ performing professional services with integrity.
3. Objectivity—Objectivity includes being independent in fact and appearance when providing audit and attest services, maintaining an attitude of impartiality, being intellectually honest, and being free from conflicts of interest.
4. Proper use of government information, resources, and position—These items should be used for official purposes and not for the auditors’ personal gain or otherwise inappropriately.
5. Professional behavior—Auditors should comply with laws and regulations and avoid any conduct that might bring discredit to the auditors’ work.

In addition, GAGAS contains a conceptual framework for independence similar to the AICPA conceptual framework presented in Chapter 3. It also contains descriptions of the application of the conceptual framework.

*Audit Communication* GAGAS require auditors to communicate information about the nature of the audit and the level of assurance provided not only to client management and those charged with governance, but also to appropriate oversight bodies requiring the audits, those responsible for acting on audit findings, and others authorized to receive such reports. In making these communications, the auditors should specifically address the planned work related to testing compliance with laws and regulations and internal control over financial reporting.

*Considering the Results of Previous Audits* GAGAS require the auditors to consider the results of previous audits and follow up on known significant findings and recommendations in prior-year audit reports. The auditors’ objective is to determine that client officers have taken appropriate corrective actions.

*Noncompliance with Provisions of Contracts and Grants* As discussed in Chapter 2, generally accepted auditing standards require the auditors to plan an audit to provide reasonable assurance of detecting violations of laws and regulations that have a direct and material effect on the financial statements. *Generally Accepted Government Auditing Standards* make it clear that this responsibility extends to provisions of contracts and grants that have a direct and material effect on the financial statements.

*Audit Documentation* *Generally Accepted Government Auditing Standards* have additional documentation requirements beyond those required by generally accepted auditing standards. These documentation requirements include:

- Before the report is issued, evidence of supervisory review of the work performed that supports findings, conclusions, and recommendations contained in the audit report.

- Any departures from *Generally Accepted Government Auditing Standards* and the impact on the audit or the auditors' conclusions.

**Reporting on Compliance with Laws and Regulations and Internal Control** In performing an audit of financial statements in accordance with *Government Auditing Standards*, in addition to issuing an independent auditor's report on the financial statements, the auditor must also issue written reports on compliance with laws and regulations and on internal control.<sup>7</sup>

The report on compliance is based on the auditors' tests of compliance with laws, regulations, grants, and contracts that have a direct and material effect on the amounts in the financial statements—tests that are required by generally accepted auditing standards. The report describes the scope of the auditors' tests of compliance with laws and regulations and presents the auditors' findings.

Auditors may discover violations of provisions of laws, regulations, contracts, or grants that result in what they estimate to be a material misstatement of the organization's financial statements. In these circumstances, they must consider the effect on their opinion on the financial statements. The resulting misstatement, if left uncorrected, would normally require them to issue a qualified or adverse opinion. Of course, management will usually decide to correct the financial statements, allowing the auditors to issue an unqualified opinion. Even though the financial statements are corrected, the auditors must still modify their report on compliance with laws and regulations to include a description of the material instances of noncompliance. If the noncompliance resulted from a weakness in internal control considered by the auditors to be a significant deficiency, they would also modify their report on internal control to describe the condition. The auditors should also report a description of any fraudulent or other illegal acts that they become aware of, unless they are inconsequential.

Auditors also may be required to report fraudulent or illegal acts directly to a government agency or another third party. For example, when the client is required by law or regulation to notify specific external parties about a fraudulent or illegal act and fails to do so, the auditors are required to communicate the problem directly to the appropriate party. When the client fails to take appropriate steps to address fraudulent or illegal acts, auditors may also be required to notify a government agency.

When performing an audit in accordance with *GAGAS*, the auditors should include all significant deficiencies in internal control in the audit report and identify those considered to be material weaknesses. If the auditors have sufficient appropriate audit evidence that a significant deficiency has been remediated (eliminated) before their report is issued, the report still includes the significant deficiency, but indicates that it has been remediated. The report also includes a description of the scope of the auditors' testing of internal control.<sup>8</sup>

**Reference to Separate Reports** *GAGAS* also require that if an auditor issues separate reports on the financial statements, compliance, and internal control, the report on the financial statements must include a final paragraph that refers to the reports on compliance and internal control, as shown below:

In accordance with *Government Auditing Standards*, we have also issued our reports dated July 15, 20X0, on our consideration of the City of Springfield's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grants. Those reports are an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

<sup>7</sup> *Government Auditing Standards* allow these reports on financial statements, internal control, and compliance to be presented separately or combined. The reporting options include (a) one report, all three combined; (b) two reports, with internal control and compliance combined; and (c) three separate reports.

<sup>8</sup> Auditors of SEC registrants also issue reports on internal control as a part of the audit. Chapter 18 presents details.

## Illustrative Case

### Conflict Minerals

The Dodd-Frank Wall Street Reform and Consumer Protection Act includes a section related to “conflict minerals” mined in the Democratic Republic of the Congo (or an adjoining country). Conflict minerals are certain minerals—tantalum, tungsten, tin, and gold—mined in that area, often from mines controlled by violent militia groups. Under the Act, certain SEC registrants are required to attempt to determine whether they use any of these minerals from that area in their products. These products include electronic devices such as cell phones, portable music players, and computers.

The Act requires companies to establish and maintain a “due diligence framework” that makes it possible to monitor compliance with the Act. Recently, Intel Corporation issued its report summarizing its analysis. While concluding that many of its products are DRC conflict free, for some products it found that it was unable to determine origin.

CPAs are able to follow Government Auditing Standards and attestation standards (chapter 19) and express an opinion on their client’s due diligence framework and compliance therewith (as contrasted to reporting directly on whether products are DRC conflict free). The following is the opinion paragraph from Ernst & Young’s report on Intel:

In our opinion, the design of the Company’s due diligence framework for the reporting period from January 1 to December 31, 2013, as set forth in the Design of Conflict Minerals Program section of the Conflict Minerals Report is in conformity, in all material respects, with the OECD Due Diligence Guidance, and the Company’s description of the due diligence measures it performed as set forth in the Description of Due Diligence Measures Performed section of the Conflict Minerals Report for the reporting period from January 1 to December 31, 2013, is consistent, in all material respects, with the due diligence process that the Company undertook.

### *Audits in Accordance with the Single Audit Act*

A major impetus for the demands for increased *compliance auditing* comes from the federal government, which provides more than \$500 billion in financial assistance annually through various federal financial assistance programs. This federal financial assistance must be spent in accordance with the respective programs’ requirements. Federal financial assistance is provided primarily to states and local governmental units, such as cities, counties, and school districts, and to nonprofit organizations, such as private colleges and universities and research institutes. Business organizations may also receive federal financial assistance.

Congress passed the **Single Audit Act** to provide a mechanism for improving the management of federal financial assistance programs by providing a statutory requirement to test compliance with laws and regulations and internal controls over program compliance requirements. The Single Audit Act applies to states, local governments, and nonprofit organizations that expend \$500,000 or more within a fiscal year in federal financial assistance. Audits in accordance with the Single Audit Act<sup>9</sup> are specifically designed to assess whether the billions of dollars in federal financial assistance are being managed and spent in accordance with applicable laws and regulations. Consequently, audits under the Single Audit Act are more extensive than audits of an organization’s financial statements in accordance with generally accepted auditing standards and *Government Auditing Standards*.

The requirements of a single audit include determining and reporting on whether (1) the financial statements are presented fairly in all material respects in accordance with generally accepted accounting principles, (2) the schedule of expenditures of federal awards (illustrated in Figure 21.4) is fairly presented in all material respects in relation to the financial statements taken as a whole, and (3) the entity complied with the provisions of laws, regulations, and contracts or grants that may have a direct and material effect on each major federal financial assistance program. The requirements also include obtaining an understanding of internal control pertaining to compliance with the provisions

<sup>9</sup> The Single Audit Act requires the Director of the Office of Management (OMB) to issue guidance for implementing the act. OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, provides that guidance.

**FIGURE 21.4** Schedule of Federal Financial Assistance

CITY OF ROSEBUD, NEW JERSEY Schedule of Federal Financial Assistance For the Year Ended June 30, 20X1				
Federal Grantor	Federal CFDA Number	Program or Award Amount	Receipts	Disbursements
Department of Housing and Urban Development, Community Development Block Grants/Entitlement Grants	14.218	\$ 808,432	\$ 562,453	\$ 641,941
Passed through the New Jersey Department of Transportation: Federal Transit—Capital Investment Grants	20.500	483,993	483,993	483,993
Department of Education, Title I Grants to Local Education Agencies	84.010	158,700	—	30,910
		<u>\$1,451,125</u>	<u>\$1,046,446</u>	<u>\$1,156,844</u>

of laws, regulations, contracts, or grants that may have a material effect on each major federal financial assistance program; assessing control risk; and performing tests of controls. With respect to internal control, auditors must report on the procedures performed, including any significant deficiencies identified, with specific identification of significant deficiencies that constitute material weaknesses.

**Identification of Major Programs** An important aspect of performing an audit in accordance with the Single Audit Act is auditor identification of the **major federal financial assistance programs**. Major federal financial assistance programs are those programs to which the auditor must apply procedures to test for compliance and to test the effectiveness of controls. A major program is determined using a risk-based approach that considers both the amount of the program's expenditures and the risk of material non-compliance. However, the auditor must test compliance and controls of programs with expenditures that, in the aggregate, equal 50 percent of total federal financial assistance program expenditures.<sup>10</sup> The *Illustrative Case* on page 812 provides an example of how the auditors identify major programs.

**Designing Compliance Procedures for Major Programs** Auditors approach a single audit in much the same way they approach an audit in accordance with generally accepted auditing standards, but they must consider the additional auditing requirements for individual major federal financial assistance programs. In performing an audit in accordance with generally accepted auditing standards, auditors are concerned with compliance with laws and regulations that could have a *direct* and *material* effect on the organization's financial statements. Under the Single Audit Act, auditors are also concerned with compliance with laws and regulations that could have a direct and material effect on each major federal financial assistance program. Because materiality must be considered on a program-by-program basis, materiality for planning the compliance procedures will typically be much less than that for the financial statements. Further, an amount that is material to one major federal financial assistance program may not be material to another major program because of differences in program size and the differing significance of particular compliance requirements to each program. This lower level of planning materiality results in an increase in the extent of tests of compliance.

In designing the tests of compliance procedures, auditors first assess the inherent risk of material noncompliance with laws and regulations applicable to each major program by considering various factors, such as the amount of the program expenditures and any changes made in the program. Auditors then assess the *control risk* related to the

<sup>10</sup> For low risk organizations, this percentage is reduced to 25 percent.

## Illustrative Case

### Identification of Major Programs

The City of Woodruff receives funds through four federal financial assistance programs. The following are the total amount of expenditures for the programs for the year and the auditors' assessments of the risk of material noncompliance of each program.

	Expenditures	Risk
Department of Education		
Title I—Grants to Local Education Agencies		
CFDA Number 84.010	\$1,350,422	Moderate
Department of Transportation		
Highway Planning and Construction		
CFDA Number 20.205	787,900	Low
Department of Housing and Urban Development		
Community Development		
Block Grants/Entitlement Grants		
CFDA Number 14.218	340,000	High
Department of Health and Human Services		
Community Services Block Grant		
CFDA Number 93.569	95,200	Moderate
Total expenditures	<u>\$2,573,522</u>	

Based on the amount of the expenditures and the risk of material noncompliance, the auditors have identified the first and third programs as major programs. Expenditures from these two programs total \$1,690,422 (\$1,350,422 + \$340,000), which exceeds the required percentage of coverage of 50 percent of total federal financial assistance program expenditures. The second and fourth programs were not identified as major programs due to the auditors' assessments of the risk of material noncompliance and total amount, respectively.

organization's administration of the programs. When controls are considered likely to be effective, the Single Audit Act requires auditors to obtain an understanding of controls over compliance for major programs, assess control risk, and perform tests of controls sufficient to support an assessment of low control risk. But, when such controls are considered unlikely to be effective, auditors do not have to perform tests of controls.

Based on the auditors' assessments of the risks of material noncompliance and the related levels of control risk, they design sufficient substantive procedures to support an opinion on major program compliance with applicable laws and regulations. To provide assistance in designing these procedures, the Office of Management and Budget (OMB) issued the *OMB Circular A-133 Compliance Supplement (Compliance Supplement)*, which specifies the compliance requirements and provides suggested audit procedures for a large number of federal financial assistance programs. For those major programs not included in the **Compliance Supplement**, auditors may determine the significant specific requirements to be tested by (1) following the *Compliance Supplement's* guidance for such programs; (2) considering knowledge obtained from prior years' audits; (3) discussing laws and regulations with management, lawyers, program administrators, or federal, state, and local auditors; and (4) reviewing grant and loan agreements.

**Compliance Requirements** Under the Single Audit Act, auditors must test for compliance with the specific requirements of all major programs. The **specific requirements** that must be audited are those that, if not complied with, could have a direct and material effect on a major program. These requirements and the related audit objectives are described below:

1. *Activities allowed or not allowed.* Determine that the organization complies with the specific requirements regarding the activities allowed or not allowed by the program.
2. *Allowable costs/cost principles.* Determine that the organization complies with federal cost accounting policies applicable to the program.

3. **Cash management.** Determine that the recipient/subrecipient followed procedures to minimize the time elapsing between the transfer of funds from the U.S. Treasury, or pass-through entity, and their disbursement.
4. **Davis-Bacon Act.** Determine that wages paid are not less than those established for the locality of the project (prevailing wage rates) by the Department of Labor.
5. **Eligibility.** Determine that individuals or groups of individuals that are being provided goods or services under a program are eligible for participation in and for the levels of assistance received under that program.
6. **Equipment and real property management.** Determine that the organization safeguards and maintains equipment purchased with federal assistance and uses the equipment for appropriate purposes.
7. **Matching, level of effort, earmarking.** Determine that the organization contributes the appropriate amount of its own resources to the program.
8. **Period of availability of federal funds.** Determine that federal funds were spent or obligated within the period of availability.
9. **Procurement and suspension and debarment.** Determine that the organization uses appropriate policies for purchases with federal funds, and that the organization does not contract with vendors that are suspended or debarred.
10. **Program income.** Determine whether program income is correctly recorded and used in accordance with the program requirements.
11. **Real property acquisition and relocation assistance.** Determine that the organization complied with property acquisition, appraisal, negotiation, and residential relocation requirements.
12. **Reporting.** Determine that the organization has complied with prescribed reporting requirements.
13. **Subrecipient monitoring.** Determine whether **recipients** monitor the compliance of **subrecipients**.
14. **Special tests and provisions.** Determine that the organization complies with other significant specific requirements that apply to the program.

*Evaluating the Results of Compliance Procedures of Major Programs* In evaluating whether an entity's noncompliance is material to a major program, auditors should consider the frequency of noncompliance, and whether it results in a material amount of questioned costs. A **questioned cost** is an expenditure that the auditor questions on the grounds that it does not meet the criteria for allowability, program eligibility, or other requirements or is not adequately supported with documentation. An example of a questioned cost is a payment of financial assistance to an individual who does not meet the eligibility requirements of a program. In evaluating the effect of the questioned cost on their reports, auditors not only consider the actual amount, but also develop an estimate of the total amount of the questioned costs. Thus, when auditors use audit sampling to select expenditures for testing, they consider the *projected amount* of questioned costs from the sample, as discussed in Chapter 9. Even if the estimated total questioned cost is not material enough to affect the auditors' opinion on compliance, they may be required to report the instances of noncompliance found and the resulting amounts of questioned costs. Auditors must report all questioned costs and likely questioned costs that exceed \$10,000 in the Schedule of Findings and Questioned Costs, such as the example in Figure 21.5.

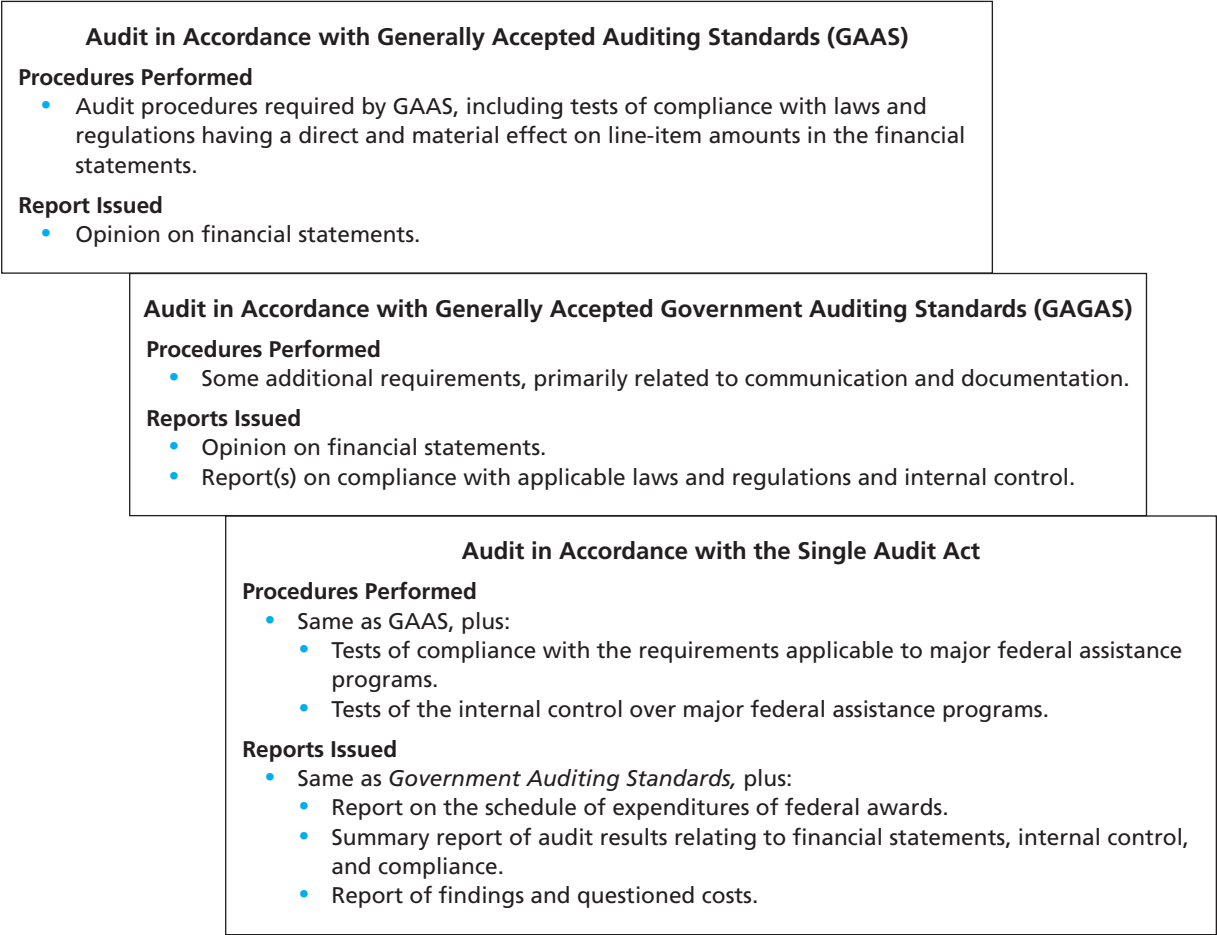

*Reporting for a Single Audit* In addition to the reports required for an audit in accordance with *Generally Accepted Government Auditing Standards*, auditors must report on:

- Whether the schedule of expenditures of federal awards is fairly presented in all material respects in relation to the financial statements taken as a whole.
- Whether the entity complied with the provisions of laws, regulations, and contracts or grants that may have a direct and material effect on each major federal financial assistance program.

**FIGURE 21.5**  
Schedule of Findings  
and Questioned Costs

CITY OF WAXVILLE, WASHINGTON Schedule of Findings and Questioned Costs April 30, 20X1		
Program	Finding/Noncompliance	Questioned Cost
Department of Housing and Urban Development, Community Development Block Grants/Entitlement Grants Program		
1. Grant No. 85-C-7061 Project No. C-1 CFDA No. 14.218	Approximately \$11,800 was expended for the payment of individual homeowners' property taxes and fire insurance. These are not allowable costs. The City intends to repay HUD for these costs.	\$11,800
2. Grant No. 85-C-7071 Project No. C-1 CFDA No. 14.218	A request for reimbursement of funds was in excess of the actual documented expenditures. The City intends to repay HUD for these costs.	41,060 \$52,860

**FIGURE 21.6** Auditing and Reporting on Organizations Receiving Federal Financial Assistance—A Summary

- The work performed on internal control relating to major federal financial assistance programs.

In addition, an auditor must prepare a *summary report* that summarizes the results of the audit as described in the auditor's opinion on the financial statements, reports on internal control, reports on compliance, and the schedule of findings and questioned costs that accompanies these reports.

---

## Compliance Auditing— A Summary

The auditors' compliance auditing and reporting requirements are summarized in Figure 21.6. Notice that the requirements build on each other. An audit in accordance with *Generally Accepted Government Auditing Standards* includes the requirements of generally accepted auditing standards and a Single Audit includes the requirements of both standards.

---

## Chapter Summary

This chapter described internal, operational, and compliance auditing. To summarize:

1. The Institute of Internal Auditors (IIA) defines *internal auditing* as an independent, objective assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluating and improving the effectiveness of risk management, control, and governance processes. The IIA's professional standards encompass attributes of internal auditors and performance of the internal audit function.
2. An *operational audit* is the examination of an operating unit or a complete organization to evaluate its performance, as measured by management's objectives. The stages of an operational audit might be summarized as definition of purpose, familiarization, preliminary survey, program development, fieldwork, reporting the findings, and follow-up.
3. *Compliance auditing* involves testing and reporting on whether an organization has complied with the requirements of various laws, regulations, and agreements.
4. The objective of a compliance audit engagement is the issuance of a report on the subject matter or an assertion by management regarding (a) the organization's compliance with specified requirements or (b) the organization's internal control over compliance with laws or regulations.
5. The objectives of compliance auditing of federal financial assistance programs are (a) to determine whether there have been violations of laws and regulations that may have a material effect on the organization's financial statements and major federal financial assistance programs and (b) to provide a basis for additional reports on compliance and internal controls. Compliance auditing is involved in audits of financial statements in accordance with generally accepted auditing standards, audits conducted in accordance with *Generally Accepted Government Auditing Standards*, and audits conducted in accordance with the federal Single Audit Act of 1984.
6. Audits of governmental organizations in accordance with generally accepted auditing standards must reflect the fact that such organizations are subject to a variety of laws and regulations that may have a direct and material effect on the amounts in the organization's financial statements.
7. In audits in accordance with *Generally Accepted Government Auditing Standards*, the auditors issue a report on the financial statements and also report on compliance with laws and regulations and on internal control.
8. Audits in conformity with the Single Audit Act of 1984 are specifically designed to help ensure that the billions of dollars in federal financial assistance are appropriately spent. The focus of these audits is on organizations receiving significant amounts of federal assistance in a year. The auditors are required to report on requirements of major programs for which federal assistance has been received.

## Key Terms Introduced or Emphasized in Chapter 21

**Broker-dealer (808)** A person or firm in the business of buying and selling securities. A broker-dealer operates as a broker when it processes orders on behalf of clients and as a dealer when it trades for its own account.

**Certified Internal Auditor (CIA) (802)** An individual who has passed an examination administered by The Institute of Internal Auditors and has met the experience requirements necessary to become certified.

**Charter (791)** The charter of the internal audit activity is a formal written document that defines the activity's purpose, authority, and responsibility. The charter should (a) establish the internal audit activity's position within the organization; (b) authorize access to records, personnel, and physical properties relevant to the performance of engagements; and (c) define the scope of internal audit activities.

**Chief audit executive (800)** Top position within the organization responsible for internal audit activities. Normally, this would be the internal audit director.

**Compliance auditing (806)** Performing procedures to test compliance with laws and regulations.

**Compliance Supplement (814)** A publication of the U.S. Office of Management and Budget that specifies audit procedures for federal financial assistance programs.

**Compliance with specified requirements (806)** An entity's compliance with specified requirements of laws, regulations, rules, contracts, or grants.

**Government Auditing Standards (810)** A document that contains standards for audits of government organizations, programs, activities, and functions and of government assistance received by contractors and other nonprofit organizations. These standards, often referred to as generally accepted government auditing standards (GAGAS), are to be followed by auditors when required by law or other requirement.

**The Institute of Internal Auditors (IIA) (789)** The international professional organization of internal auditors.

**Internal auditing (789)** An independent, objective assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

**Internal control over compliance (807)** The process by which management obtains reasonable assurance of compliance with specified laws and regulations.

**Major federal financial assistance program (award) (813)** A significant federal assistance program as determined by the auditors based on a risk-based approach. In a single audit, the auditors must provide an opinion on compliance related to major programs.

**Management's assertion (806)** Any declaration, or set of related declarations taken as a whole, made by management. In the context of compliance attestation, management's assertion deals with the entity's compliance with specified requirements, the effectiveness of the entity's internal control over compliance, or both.

**Noncompliance (806)** The failure to act in accordance with laws, regulations, agreements, or grants.

**Operational auditing (802)** The process of reviewing a department or other unit of a business, governmental, or nonprofit organization to measure the effectiveness, efficiency, and economy of operations.

**Questioned costs (815)** Those costs paid with federal assistance that appear to be in violation of a law or regulation, inadequately documented, unnecessary, or unreasonable in amount.

**Recipient (815)** An organization receiving federal financial assistance directly from the federal agency administering the program.

**Single Audit Act (812)** Legislation passed by the U.S. Congress that establishes uniform requirements for audits of federal financial assistance provided to state and local governments. The act was significantly amended in 1996.

**Specific requirements (of laws, regulations, rules, contracts, or grants) (814)** In compliance attestation engagements, management asserts that the organization is in compliance with specified requirements, and the CPAs attest to this assertion.

**Subrecipient (815)** An organization receiving federal financial assistance passed through from a recipient.

## Review Questions

- 21–1. Define internal auditing.
- 21–2. Describe the scope of activities of an internal auditing function.
- 21–3. Nearly every large corporation now maintains an internal auditing department, but 50 years ago relatively few companies carried on a formal program of internal auditing. What have been the principal factors responsible for this rapid expansion?

- 21-4. Identify the knowledge and skills that are necessary to the performance of modern internal auditing.
- 21-5. “The principal distinction between public accounting and internal auditing is that the latter activity is carried on by an organization’s own salaried employees rather than by independent professional auditors.” Criticize this quotation.
- 21-6. Compare the objectives of internal auditors with those of external auditors.
- 21-7. Identify the 11 categories of the IIA’s *International Standards for the Professional Practice of Internal Auditing*.
- 21-8. Evaluate this statement: “Internal auditors cannot be independent of the activities that they audit.”
- 21-9. Describe how the organizational status of the internal audit department affects its independence.
- 21-10. Briefly describe the factors that are important to the management of an internal auditing department.
- 21-11. Describe the requirements for becoming a Certified Internal Auditor.
- 21-12. Differentiate between financial statement audits and operational audits.
- 21-13. Describe the purpose of an operational audit.
- 21-14. Should the internal auditors generally disclose their findings to operating personnel of the department involved before transmitting the report to top management? Explain.
- 21-15. Describe the two types of agreed-upon procedures engagements that CPAs may perform relating to compliance with laws and regulations.
- 21-16. Evaluate this statement: “An agreed-upon procedures engagement on compliance with a law is designed to provide users with negative assurance on whether an entity has complied with that law.”
- 21-17. Describe the role of a broker-dealer.
- 21-18. Explain why tests of compliance with laws and regulations are considered to be substantive tests.
- 21-19. Explain the auditors’ responsibility for testing compliance with laws and regulations in an audit in accordance with generally accepted auditing standards.
- 21-20. Identify the three types of audits that a governmental organization might obtain.
- 21-21. Describe the additional documentation requirements of *Generally Accepted Government Auditing Standards*.
- 21-22. Describe the ethical principles set forth in *Generally Accepted Government Auditing Standards*.
- 21-23. “In an audit in accordance with *Generally Accepted Government Auditing Standards* the auditors must perform tests of compliance with all laws and regulations.” Criticize this quotation.
- 21-24. Describe the additional audit report required by *Government Auditing Standards*.
- 21-25. The auditors’ responsibility for reporting violations of laws and regulations under *Generally Accepted Government Auditing Standards* differs from their responsibility under generally accepted auditing standards. Compare these responsibilities.
- 21-26. Contrast the requirements of an audit in accordance with *Generally Accepted Government Auditing Standards* with the requirements of an audit in accordance with generally accepted auditing standards.
- 21-27. Explain why compliance with laws and regulations is so important in the audit of governmental organizations.
- 21-28. What is the purpose of the Single Audit Act?
- 21-29. When is an organization required to have an audit in accordance with the Single Audit Act?
- 21-30. Explain how major federal assistance programs are identified.
- 21-31. Describe what is meant by a questioned cost.
- 21-32. Distinguish between a subrecipient and a primary recipient. Provide an example of each.
- 21-33. Identify the 14 requirements that may be applicable to federal financial assistance programs.
- 21-34. In order to function effectively, the internal auditor must often educate auditees and other parties about the nature and purpose of internal auditing.
  - a. Define internal auditing.
  - b. Briefly describe three possible benefits of an internal audit department’s program to educate auditees and other parties about the nature and purpose of internal auditing.

**Questions** LO 21-1  
**Requiring**  
**Analysis**

Required:

(CIA, adapted)

- LO 21-1, 4, 5** 21–35. Steve Ankenbrandt, president of Beeb Corp., has been discussing the company’s internal operations with the presidents of several other multidivision companies. Ankenbrandt discovered that most of them have an internal audit staff. The activities of the staffs at other companies include financial audits, operational audits, and sometimes compliance audits.
- Required:* Describe the meaning of the following terms as they relate to the internal auditing function:
- Financial auditing.
  - Operational auditing.
  - Compliance auditing.
- (CIA, adapted)
- LO 21-3** 21–36. Throughout this book, emphasis has been placed on the concept of independence as the most significant single element underlying the development of the public accounting profession. The term “independent auditor” is sometimes used to distinguish the public accountant from an internal auditor. Nevertheless, The Institute of Internal Auditors points to the factor of independence as essential to an effective program of internal auditing. Distinguish between the meaning of *independence* as used by the American Institute of Certified Public Accountants in describing the function of the certified public accountant and the meaning of *independence* as used by The Institute of Internal Auditors to describe the work of the internal auditor.
- LO 21-1, 3** 21–37. You are conducting the first audit of the marketing activities of your organization. Your preliminary survey has disclosed indications of deficient conditions of a serious nature. You expect your audit work to document the need for substantial corrective action. You feel certain that your audit report will contain descriptions of a number of serious defects.
- Your preliminary meeting with the director of the marketing division and the principal subordinates gave you reason to believe that they will be defensive, that your audit report will receive a chilly reception, that your stated facts are likely to be challenged, and that any deficient conditions reported will be denied or minimized.
- Required:*
- Identify the aspect of the *International Standards for the Professional Practice of Internal Auditing* that applies to the problems described above.
  - Describe four techniques that you might use to improve the chances that your report will be well received and that appropriate corrective action will be taken.
- (CIA, adapted)
- LO 21-5** 21–38. CPAs may become involved in examinations of broker-dealers.
- Describe the information a broker-dealer who maintains custody of customer funds or securities is required to file in an annual compliance report on.
  - Which of the required information in part a will ordinarily be examined and reported upon by a CPA?
- LO 21-5** 21–39. Matt Gunlock, CPA, is performing an audit of the City of Ryan in accordance with generally accepted auditing standards.
- Required:*
- Must Matt be concerned with the city’s compliance with laws and regulations? Explain.
  - How should Matt decide on the nature and extent of the tests of compliance that should be performed in the audit?
- LO 21-6** 21–40. Wixon & Co., CPAs, is performing an audit of the City of Brummet for the year ended June 30, 200X, in accordance with *Generally Accepted Government Auditing Standards*. During the course of the audit, Gerald Yarnell, a senior auditor, discovers violations of laws and regulations that constitute material instances of noncompliance.
- Required:*
- Explain how these violations may affect the auditors’ reports.
  - How would your answer to (a) change if management elected to correct the financial statements for the violations?
- LO 21-6** 21–41. North County School District expended \$1,450,000 in federal financial assistance this year.
- Required:*
- Is North County School District required to have an audit in accordance with the Single Audit Act? Explain.
  - What are the requirements of an audit in accordance with the Single Audit Act?
- LO 21-6** 21–42. The City of Westmore is confused about the type of audit that it should obtain: an audit in accordance with generally accepted auditing standards, an audit in accordance with *Generally Accepted Government Auditing Standards*, or an audit in accordance with the Single Audit Act.
- Required:*
- Explain the differences between the three types of audits.
  - How should the City of Westmore decide which type of audit it is required to obtain?

## Objective Questions LO 21-1

All applicable questions are available with McGraw-Hill's *Connect® Accounting*.

### 21–43. Multiple Choice Questions

Select the best answer for each of the following questions. Explain the reasons for your selection.

a. Internal auditing can best be described as:

- (1) An accounting function.
- (2) A compliance function.
- (3) An activity primarily to detect fraud.
- (4) A control function.

(CIA, adapted)

**LO 21-1**

b. The independence of the internal auditing department will most likely be assured if it reports to the:

- (1) Audit committee of the board of directors.
- (2) President.
- (3) Controller.
- (4) Treasurer.

(CIA, adapted)

**LO 21-1**

c. When performing an operational audit, the purpose of a preliminary survey is to:

- (1) Determine the objective of the activity to be audited.
- (2) Determine the scope of the audit.
- (3) Identify areas that should be included in the audit program.
- (4) All of the above.

(CIA, adapted)

**LO 21-4**

d. Operational auditing is primarily oriented toward:

- (1) Future improvements to accomplish the goals of management.
- (2) Ensuring the accuracy of the data in management's financial reports.
- (3) Determination of the fairness of the entity's financial statements.
- (4) Compliance with laws and regulations.

**LO 21-6**

e. Which of the following bodies promulgates standards for audits of federal financial assistance programs?

- (1) Governmental Accounting Standards Board.
- (2) Financial Accounting Standards Board.
- (3) Government Accountability Office.
- (4) Governmental Auditing Standards Board.

(AICPA, adapted)

**LO 21-6**

f. As compared to an audit in accordance with GAAS, an audit in accordance with *Generally Accepted Government Auditing Standards* requires the auditors to:

- (1) Use a lower level of materiality.
- (2) Perform additional tests of internal control.
- (3) Issue an additional report on compliance with laws and regulations and internal control.
- (4) Fulfill all of the above requirements.

**LO 21-5**

g. In a compliance attestation engagement, CPAs may address an organization's:

	Compliance with Specified Requirements	Internal Control over Compliance with Specific Laws and Regulations
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

**LO 21-5**

h. The portion of internal control most directly related to a CPA's engagement to attest to compliance with laws and regulations is:

- (1) Internal control over compliance.
- (2) Internal control over financial reporting.

- (3) Internal control over laws and regulations.
- (4) Internal control over operations.

LO 21-5

- i. When issuing an unqualified audit report in a compliance attestation engagement, the CPA may report on:

	Management's Assertion	Subject Matter
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 21-5

- j. When issuing a qualified audit report in a compliance attestation engagement, the CPA may report on:

	Management's Assertion	Subject Matter
(1)	Yes	Yes
(2)	Yes	No
(3)	No	Yes
(4)	No	No

LO 21-6

- k. An important aspect of performing an audit in accordance with the Single Audit Act is to identify:
- (1) Major federal financial assistance programs.
  - (2) Government generally accepted assertions.
  - (3) Federal supplemental requirements.
  - (4) Title determination sub-acts.

LO 21-1

- l. The organization that administers the Certified Internal Auditor program is the:
- (1) American Institute of Certified Public Accountants—Certified Internal Auditor Division.
  - (2) The Institute of Internal Auditors.
  - (3) American Accounting Association
  - (4) Securities and Exchange Commission.

LO 21-6

#### 21-44. Simulation

Under the Single Audit Act, auditors must test for compliance with the specific requirements of all major programs. State whether each of the following is required under that act:

Statement	Is it required?
a. Determine that the organization complies with generally accepted accounting principles applicable to the program.	
b. Determine that the organization complies with specific requirements regarding the activities allowed or not allowed by the program.	
c. Determine that wages paid are not more than those established for the locality of the project by the Department of Labor.	
d. Determine that the organization contributes the appropriate amount of its own resources to the program.	
e. Determine that federal funds were spent or obligated within the period of availability.	
f. Determine whether program income is correctly recorded and used in accordance with the program requirements.	
g. Determine whether subrecipients monitor the compliance of recipients.	
h. Determine that only registered U.S. citizens work on the program.	
i. Determine that the organization does not contract with vendors that are suspended or debarred.	
j. Determine that the organization followed procedures to minimize the time elapsing between the transfer of funds from the U.S. Treasury and their disbursement.	

- LO 21-5, 6** 21–45. Match the following terms with the appropriate definition (or partial definitions). Each definition may be used once or not at all.

Term	Definition (or Partial Definition)
a. Compliance auditing	1. A document that contains standards for audits of government organizations, programs, activities, and functions and of government assistance received by contractors and other nonprofit organizations.
b. Compliance Supplement	2. A document that presents the major and minor program requirements for all federal contracts.
c. Government Auditing Standards	3. A publication of the U.S. Office of Management and Budget that specifies audit procedures for federal financial assistance programs.
d. Major federal financial assistance program	4. A supplement to the U.S. Business Code, published by the General Accountability Office, dealing with overall compliance issues.
e. Single Audit Act	5. An act requiring that every single municipality undergo an annual audit of its financial statements.
	6. Legislation passed by the U.S. Congress that establishes uniform requirements for audits of federal financial assistance provided to state and local governments.
	7. Performing procedures to test compliance with laws and regulations.
	8. A significant federal assistance program as determined by the auditors based on a risk-based approach. In a single audit, the auditors must provide an opinion on compliance related to major programs.
	9. The process of reviewing a department or other unit of a business, governmental, or nonprofit organization to measure the effectiveness, efficiency, and economy of operations.

## Problems

All applicable problems are available with McGraw-Hill's *Connect® Accounting*. 

- LO 21-1, 3** 21–46. You are the chief audit executive for the internal auditing function of a large municipal hospital. You receive monthly financial reports prepared by the accounting department, and your review of them has shown that total accounts receivable from patients have steadily and rapidly increased over the past eight months.

Other information in the reports shows the following conditions:

1. The number of available hospital beds has not changed.
2. The bed occupancy rate has not changed.
3. Hospital billing rates have not changed significantly.
4. The hospitalization insurance contracts have not changed since the last modification 12 months ago.

Your internal audit department performed a financial and operational audit of the accounts receivable accounting function 10 months ago. The working papers file for that assignment contains financial information, a record of the preliminary survey, documentation of the study, evaluation of controls, documentation of the procedures used to produce evidence about the validity and collectibility of the accounts, and a copy of your report that commented favorably on the controls and collectibility of the receivables.

However, the current increase in receivables has alerted you to the need for another audit. You remember news stories last year about the manager of the city water system who lost his job because his accounting department double-billed all the residential customers for three months. You plan to perform a preliminary survey of the problem, if indeed a problem exists.

*Required:*

- a. Write a memo to your senior auditor listing at least eight questions that should be used to guide and direct the preliminary survey. (*Hint:* The categories of questions used in the last preliminary survey were these: Who does the accounts receivable accounting? What data processing procedures and policies are in effect? and How is the accounts receivable accounting done? This time, you will use these categories and add a fourth category of questions: What financial or economic events have occurred in the past 10 months?)
- b. Describe the phases of the audit that would be performed after the preliminary survey is completed.

(CIA, adapted)

- LO 21-3** 21–47. Devry Corporation has established an independent foundation for the purposes of community improvement. The foundation employs an executive director and eight staff people. The internal auditors of the company were requested to do an audit of the foundation in 20X1 to determine problems with the recording of transactions, the handling of cash, and documentation of transactions. The following items were found:
1. The foundation used the cash basis of reporting rather than the accrual basis.
  2. The foundation lacked a copy of the plane ticket for airfare reimbursed for a trip taken by one of the volunteers.
  3. Excess funds were invested in instruments other than those specified by the organization's policy manual.
  4. The purchase of a desktop publishing system was expensed.
  5. The foundation does not employ anyone with formal accounting training.
  6. Many errors were made in recording transactions, which necessitated many year-end adjusting entries.
  7. Numerous certificates of deposit were found in many different locations (e.g., filing cabinets, desk drawers, and a safe deposit box).
  8. The checking account was reconciled by the individual who wrote the checks.
- Required:** Write an internal audit report (in proper form) to the executive committee of the foundation indicating findings and recommendations.

(CIA, adapted)

- LO 21-6** 21–48. In performing an audit in accordance with *Generally Accepted Government Auditing Standards*, the auditors are required to issue an additional combined report on compliance with laws and regulations and on internal control.

- Required:**
- a. Describe the nature of the procedures that the auditors must perform beyond those required by generally accepted auditing standards to provide a basis for this report.
  - b. Describe the specific contents of the auditors' combined report on compliance and internal control.

- LO 21-6** 21–49. In performing an audit in accordance with both generally accepted auditing standards and *Generally Accepted Government Auditing Standards*, the auditors are required to communicate information about weaknesses in the organization's internal control. However, the requirements are different.

- Required:**
- a. Describe the differences between these requirements.
  - b. Describe the major aspects of the report on internal control required by *Government Auditing Standards*.

## In-Class Team Case

- LO 21-6** 21–50. Robert Myers, CPA, has been engaged to audit the City of Mystic in accordance with the Single Audit Act. Robert is aware that the Single Audit Act requires additional tests of major federal financial assistance programs, and he is trying to identify those programs for this audit. The City of Mystic participates in four federal financial assistance programs with the following amounts of expenditures and assessed risk of material noncompliance.

Grant Program	Expenditures	Risk
Department of Education, Title I Grants to Local Education Agencies	\$ 2,370,000	High
Environmental Protection Agency, Ford Creek Modification	6,780,000	Moderate
Department of Housing and Urban Development		
Project # C94-MC-08-0009	5,500,000	Low
Project # C94-MC-08-0010	350,000	Moderate
Total grant awards	<u>\$15,000,000</u>	

- Required:**
- a. Identify the major federal assistance programs.
  - b. Describe the compliance testing requirements for major federal financial assistance programs under the Single Audit Act.

## ***AUDIT EVIDENCE***

Audit Evidence: “Audit evidence” means the information obtained by the auditor in arriving at the conclusions on which the audit opinion is based. Audit evidence encompasses the quantity and quality (or reliability) of evidence to be obtained by auditors. It is important for auditors to obtain sufficient, appropriate and reliable audit evidence to enable them draw reasonable conclusions on which to base their audit opinion.

### ***Ways of obtaining audit evidence (METHODS)***

The APB Statement of Auditing Standard No. 400 covers ‘audit evidence’. The Standard provides guidance on the quantity and quality of evidence which auditors should obtain and the procedures for obtaining the evidence. Audit evidence may be obtained from

- (a) An appropriate mix of tests of control and substantive procedures; and
- (b) Substantive procedures and enquiries made to ascertain the adequacy of the accounting system as a basis for the preparation of the financial statements

An auditor should understand the following matters in relation to audit evidence:

- (a) The nature of audit evidence;
- (b) The sufficiency of audit evidence;
- (c) The appropriateness of audit evidence;
- (d) The evaluation of audit evidence; and
- (e) Reliability of audit evidence

### ***The nature of audit evidence***

An auditor may use the following accounting data as sources of audit evidence to test audit objectives:

- (a) The books of original entry;

- (b) Related accounting manuals; and
- (c) Records, such as worksheets and spreadsheets which support the amounts in the financial statements

In recent times, there is a growing awareness of accounting data being kept in the electronic form, but there are still cases of records kept manually. Audit evidence should be corroborated. Corroborating audit evidence includes both written and electronic information, for example;

- (a) Cheques;
- (b) Records of electronic transfers;
- (c) Invoices;
- (d) Contracts;
- (e) Minutes of meetings; and
- (f) Confirmations, and written representations

### ***Appropriateness of audit evidence***

There is a relationship between sufficiency and appropriateness of audit evidence. Both sufficiency and appropriateness apply to audit evidence obtained from tests of control and substantive procedures. Appropriateness is the measure of the quality or reliability of audit evidence and its relevance to a particular assertion while sufficiency is the measure of the quantity of audit evidence.

The auditor's judgement as to what is sufficient and appropriate audit evidence is influenced by such factors as:

- (a) The auditor's assessment of the nature and degree of risk of mis-statement at both the financial statement level and the account balance or class of transaction level;
- (b) The nature of the accounting and internal control systems, including the control environment;
- (c) The materiality of the item being examined;
- (d) The experience gained during previous audits and the auditor's knowledge of the business and industry;
- (e) The findings from audit procedures, and from any audit work carried out in the course of preparing the financial statements, including indications of fraud

or error; and

(f) The source and reliability of information available

### ***Reliability of Audit Evidence***

The reliability of audit evidence is influenced by its source which may either be internal or external; and by its nature which may be visual, documentary or oral. The auditor must be aware of the following matters in assessing the reliability of audit evidence:

(a) Audit evidence from external sources (for example, confirmation received from a third party) is more reliable than that obtained from the entity's records;

(b) Audit evidence obtained from the entity's records is more reliable when the related accounting and internal control systems operate effectively.

(c) Audit evidence obtained directly by auditors is more reliable than that obtained by or from the entity

(d) Audit evidence in the form of documents and written representations are more reliable than oral representations; and

(e) Original documents are more reliable than photocopies, telexes or facsimiles

When the audit evidence obtained from different sources are consistent with one another, they become persuasive to the auditor. When the auditor's evaluation of audit evidence results in the fact that evidence from one source is inconsistent with that from another, it is the responsibility of the auditor to determine what additional procedures must be undertaken to resolve the inconsistency

Because of cost considerations, the auditor may examine a sample of the transactions that make up the account balance or class of transactions. The auditor must consider the relationship between the cost of obtaining audit evidence and the usefulness of the information obtained. The auditor,

however, is not relieved of any blame if he omits a necessary procedure as a result of any constraint.

### ***Procedures for obtaining audit evidence***

Auditors normally obtain audit evidence by inspection, observation, enquiry, confirmation, computation and analytical procedures. The choice of one or a combination of the procedures which the auditor may adopt is dependent, in part, upon the period of time during which the audit evidence sought is available and the form in which the accounting records are maintained

#### ***Inspection***

Inspection involves the following:

- (a) Examination of records, documents or tangible assets;
- (b) Provision of audit evidence of varying degrees of reliability depending on their nature and source and the effectiveness of internal controls over their processing

Three major categories of documentary audit evidence are listed below in descending degree of reliability as audit evidence:

- (a) Evidence created and provided to auditors by third parties;
- (b) Evidence created by third parties and held by the entity; and
- (c) Evidence created and held by the entity.

Inspection provides reliable audit evidence about the existence of the tangible assets inspected, but not necessarily as to the ownership or value of such assets.

#### ***Observation***

The auditor by observation looks at a procedure being performed by others. For example, the auditor observes the counting of stock by the entity's staff or the performance of internal control procedures as part of the conduct of an audit.

#### ***Enquiry and Confirmation***

*Enquiry* involves seeking information within and outside the entity. Enquiry may be formal or informal. Responses to enquiries obtained from third parties may confirm or disprove information previously made available to the auditor.

*Confirmation* involves obtaining response to an enquiry to corroborate information previously made available to the auditors in the course of the audit. Examples of direct confirmation are as follows:

- (a) Confirmation of debts by communication with debtors;
- (b) Confirmation of legal cases by communication with the entity's solicitors;
- and
- (c) Confirmation of bank balances by communication with the entity's bankers, etc.

### ***Computation***

The auditor uses computation to check the arithmetical accuracy of source documents and accounting records. Computation also involves performing independent calculations.

### ***Analytical procedures***

Analytical procedures consist of the analysis of relationship between:

- (a) Items of financial data;
- (b) Items of financial and non-financial data, derived from the same period;
- and
- (c) Comparable financial information deriving from different periods or different entities.

Analytical procedures are used to identifying consistencies and predicted patterns or significant fluctuations and unexpected relationships, and the results of investigations performed.

# 1

## CHAPTER

# Nature, Objective and Scope of Audit

### 1.1 - Meaning, Objectives and Scope of Audit

#### Meaning of Audit

An Audit is independent examination of Financial Information of any entity, whether profit oriented or not, and irrespective of its size or legal form, when such an examination is conducted with a view to expressing an opinion thereon.

This definition has the following implications:

- (a) Audit is independent examination.
- (b) Examination is of financial information when the objective is to express an opinion.
- (c) Requirement of audit applies in case of every entity, whether profit oriented or not (Commercial entities or NGOs), whatever is the business size of entity (Small Size entity or large size entity), whatever is the legal form of the entity (proprietor, partnership or company).

#### Points to be ensured that F.S. not misled anybody

Auditor engaged to perform the task of performing audit need to ensure the following:

- (a) Ledger balances agree with the entries made in the books of account.
- (b) Sufficient and Appropriate evidences are available for entries made in books of account.
- (c) All transactions are being recorded in books of account, i.e. there is no omission.
- (d) Information contained in the financial statements is clear and unambiguous.
- (e) Amounts shown in financial statements are properly classified, described and disclosures are made in conformity with applicable Accounting Standards.
- (f) Financial statements reflect true and fair view of financial results and financial position

#### Objectives of Audit

- (a) The objective of an audit of financial statements, prepared within a framework of recognised accounting policies and practices and relevant statutory requirements, if any, is to enable an auditor to **express an opinion** on such financial statements.
- (b) The auditor's opinion helps determination of the **true and fair view** of the financial position and operating results of an enterprise.
- (c) The user, however, should not assume that the auditor's opinion is an assurance as to the future viability of the enterprise or the efficiency or effectiveness with which management has conducted the affairs of the enterprise.

	(d) Auditor should review and assess the conclusions drawn from the audit evidence obtained and from his knowledge of business of the entity as the basis for the expression of his opinion on the financial information.		
<b>Objectives of Auditor</b>	Covered in SA 200		
<b>Scope of Audit</b>	<p>The scope of audit is determined by the auditor having regard to following:</p> <p>(a) Terms of the Audit Engagement</p> <p>(b) Requirement of Relevant Statute.</p> <p>(c) Pronouncements of the ICAI.</p> <p>However, the terms of engagement cannot supersede the requirements of statute or pronouncements of ICAI.</p>		
	<b>Points to be considered in determining Scope of Audit</b>	<ol style="list-style-type: none"> <li>1. Audit should cover the examination of all aspects of an entity relevant to financial statements.</li> <li>2. Auditor should assess the sufficiency and appropriateness of the information contained in the accounting records and other source data. For this purpose, auditor should               <ol style="list-style-type: none"> <li>(a) evaluate accounting systems and internal controls</li> <li>(b) perform necessary tests, enquiries and other verification procedure of accounting transactions and account balances.</li> </ol> </li> <li>3. To determine whether the information is properly disclosed in the financial statements, audit may involve               <ol style="list-style-type: none"> <li>(a) comparing the financial statements with the underlying records</li> <li>(b) considering the judgements used by management in preparing the financial statements.</li> </ol> </li> <li>4. Auditor is not expected to perform duties which fall outside the scope of his competence.</li> <li>5. Limitations, if any, on the scope of audit that impair the auditor's ability to express an unmodified opinion should be set out in his report.</li> </ol>	
	<b>Aspects to be covered in Audit</b>	<b>Examination of Accounting System &amp; Internal Control</b>	<ul style="list-style-type: none"> <li>◆ To ascertain whether it is appropriate for the business and helps in proper recording of all the transactions.</li> <li>◆ To determine the Nature, Timing and Extent (NTE) of Audit Procedures to be performed.</li> </ul>
		<b>Reviewing the system &amp; procedures</b>	<ul style="list-style-type: none"> <li>◆ To find out whether they are adequate and comprehensive.</li> </ul>
		<b>Vouching of the transactions</b>	<ul style="list-style-type: none"> <li>◆ To ensure authenticity and validity of transactions.</li> <li>◆ To check the arithmetical accuracy of the books of account.</li> </ul>

			<ul style="list-style-type: none"> <li>◆ To ascertain proper distinction into capital and revenue items.</li> </ul>
		<b>Verification of Assets &amp; Liabilities</b>	<ul style="list-style-type: none"> <li>◆ To ensure existence and valuation of the assets and liabilities appearing in the balance sheet.</li> </ul>
		<b>Statutory Compliances</b>	<ul style="list-style-type: none"> <li>◆ In case of entities governed by some law, rules or regulations, for example in case of audit of a company incorporated under Companies Act, 2013.</li> </ul>
		<b>Expression of Opinion</b>	<ul style="list-style-type: none"> <li>◆ On true and fair view of state of Affairs as reflected by Balance Sheet.</li> <li>◆ On true and fair view of Financial Results as reflected by Statement of Profit and Loss.</li> <li>◆ On true and fair view of Cash Flows as reflected by Cash Flow Statement.</li> </ul>
		<b>Reporting on Other matters</b>	As required by the law governing the entity.

### Important Questions

**Q. No. 1:** The person conducting the audit should take care to ensure that financial statements would not misled anybody. Describe briefly the points the auditor should ensure for.

**Q. No. 2:** The objective of an audit of financial statements, prepared within a framework of recognised accounting policies and practices and relevant statutory requirements, if any, is to enable an auditor to express an opinion on such financial statements.

Or

State the objectives of Audit according to SA 200

**Q. No. 3:** List the points that merit consideration in regard to scope of audit.

**Q. No. 4:** State briefly six important aspects to be considered by an auditor while conducting an audit.

or

State the matters which the statutory auditor should look into before framing an opinion on accounts on finalisation of audit of accounts. Discuss overall audit approach.

or

State the principal aspects to be covered in an audit concerning financial statement of account.

[Nov. 15 (5 Marks)]

**Q. No. 5:** The duties of the auditor are limited to verification of the arithmetical accuracy of the books of the account. Comment.

### 1.2 - Types of Audit

**Audit required under law**

- (a) Companies governed by the Companies Act, 2013;
- (b) Banking companies governed by the Banking Regulation Act, 1949;
- (c) Electricity supply companies governed by the Electricity Supply Act, 1948;
- (d) Co-operative societies registered under the Co-operative Societies Act, 1912;

	<p>(e) Public and charitable trusts registered under various Religious and Endowment Acts;</p> <p>(f) Corporations set up under an Act of Parliament or State Legislature such as the LIC of India.</p> <p>(g) Specified entities under various sections of the Income-tax Act, 1961.</p>
<b>Voluntary Audits</b>	<ul style="list-style-type: none"> <li>◆ Audits of the accounts of proprietary entities, partnership firms, HUF, etc.</li> <li>◆ In respect of such entities, there is no basic legal requirement of audit. Many of such enterprises as a matter of internal rules require audit.</li> <li>◆ Some may be required to get their accounts audited on the directives of Government for various purposes like sanction of grants, loans, etc.</li> <li>◆ But the important motive for getting accounts audited lies in the advantages that follow from an independent professional audit.</li> </ul>

### Important Questions

**Q. No. 6: Discuss the types of audits required under law.**

**[Nov. 11 (5 Marks)]**

### 1.3 - Advantages of Audit of Financial Statements

<b>1. Protect the interest of fund providers</b>	It safeguards the financial interests of persons who are not associated with the management of the organisation e.g. partners or shareholders.
<b>2. Moral check on employees</b>	It acts as a moral check on employees from committing defalcations or embezzlement.
<b>3. Settlement of Taxes, etc.</b>	Auditing statements of accounts are helpful in settling of taxes, negotiating loans and for determining the purchase consideration for a business.
<b>4. Settlement of Trade Disputes</b>	Audited statements are useful for settling trade disputes for higher wages or bonus.
<b>5. Detection of Wastages</b>	Audited statements also help in detection of wastages and losses and shows the different ways by which these might be checked especially those that occurred due to absence or inadequacy of internal checks or internal control measures.
<b>6. Proper maintenance of books of account</b>	Independent audit ascertains whether the necessary books of account and allied records have been properly kept and helps the client in making good deficiencies or inadequacies in this respect.
<b>7. Appraisal of controls</b>	As an appraisal function, audit reviews the existence and operations of various controls in the organisations and reports weaknesses, inadequacies etc.
<b>8. Admission/retirement of Partner</b>	Audited accounts are of great help in the settlement of accounts at the time of admission or death of the partner.
<b>9. Grant of License</b>	Government may require audited and certified statements before it gives assistance or issues the license for a particular trade.

### Important Questions

**Q. No. 7: What is the importance of having the accounts audited by independent professional auditors?**

**[May 01 (8 Marks)]**

Or

**What are the advantages of Independent audit?**

**[May 12 (8 Marks)]**

Or

**Discuss the following: Advantages of Independent Auditor.**

**[May 15 (5 Marks)]**

**1.4 - Inherent Limitations of Audit**

As per SA 200 "Overall Objectives of the Independent Auditor and the Conduct of an Audit in accordance with Standards on Auditing" the auditor is not expected to, and cannot, reduce audit risk to zero and cannot therefore obtain absolute assurance that the financial statements are free from material misstatement due to fraud or error. This is because there are inherent limitations of an audit, which result in most of the audit evidence on which the auditor draws conclusions and bases the auditor's opinion being persuasive rather than conclusive. The inherent limitations of an audit arise from:

<b>1. The Nature of Financial Reporting</b>	The preparation of financial statements involves judgment by management in applying the requirements of the entity's applicable FRF to the facts and circumstances of the entity. Consequently, some financial statement items are subject to an inherent level of variability which cannot be eliminated by the application of additional auditing procedures.
<b>2. Nature of Audit Procedures</b>	There are practical and legal limitations on the auditor's ability to obtain audit evidence. For example: <ul style="list-style-type: none"> <li>◆ Management &amp; others do not provide complete information intentionally/unintentionally.</li> <li>◆ Audit procedures used to gather audit evidence may be ineffective against fraud detection.</li> <li>◆ Audit is not an official investigation into alleged wrongdoings:</li> </ul>
<b>3. Timeliness of Financial Reporting &amp; the Balance between Benefit &amp; Cost</b>	<ul style="list-style-type: none"> <li>◆ User expectation that the auditor will form an opinion on the F.S. within a reasonable period of time and at a reasonable cost.</li> <li>◆ It results into use of Test checking and putting most of efforts over the areas having risk of material misstatement with corresponding less efforts in other areas.</li> </ul>
<b>4. Other Matters that affect the Limitations of an Audit</b>	In the case of certain assertions or subject matters, the potential effects of the limitations on the auditor's ability to detect material misstatements are particularly significant. Such assertions or subject matters include: <ul style="list-style-type: none"> <li>(a) Fraud, particularly fraud involving senior management or collusion.</li> <li>(b) The existence and completeness of related party relationships and transactions.</li> <li>(c) The occurrence of non-compliance with laws and regulations.</li> <li>(d) Future events or conditions that may cause an entity to cease to continue as a going concern.</li> </ul>

**Important Questions****Q. No. 8: Discuss Limitations of audit.****[May 11 (8 Marks)]****Or****"The process of auditing is such that it suffers from certain limitations". Discuss.****Or**

**ABC Ltd. requested the auditor to provide for absolute assurance in respect of its ten branches scattered in Mumbai and confirm that financial statements are free from material misstatements due to fraud or error. Advise.**

**Q. No. 9: DEF & Co. Chartered Accountants successfully carried out the audit of Shree Garments for the financial year 2017-2018. After the completion of the audit, there were found material misstatements due to fraud in the financial statements which were not noticed and reported by the auditor. Management alleges that it is failure on the part of auditor. Comment.**

### 1.5 - Relationship of Auditing with other Disciplines

<b>Auditing and Accounting</b>	<ul style="list-style-type: none"> <li>◆ Accounting and auditing are closely related with each other as auditing reviews the financial statements which are nothing but a result of the overall accounting process.</li> <li>◆ Auditing begins when accounting ends.</li> <li>◆ It requires that the auditor must have a thorough and sound knowledge of generally accepted principles of accounting before he can review the financial statements.</li> </ul>
<b>Auditing and Law</b>	<ul style="list-style-type: none"> <li>◆ Auditing involves examination of various transactions from the view point of whether or not these have been properly entered into as per the requirements of law, in particular, when an entity is governed by any law, for example companies.</li> <li>◆ It necessitates that an auditor should have a good knowledge of business and corporate laws affecting the entity. He should be familiar with the law of contracts, negotiable instruments, etc.</li> <li>◆ In analysing the impact of various transactions particularly from the accounting aspect, an auditor ought to have a good knowledge about the direct as well as indirect tax laws.</li> </ul>
<b>Auditing and Behavioural Science</b>	<p>The discipline of behavioural science is closely linked with the subject of auditing. The knowledge of human behaviour is indeed very essential for an auditor so as to effectively discharge his duties, because of below mentioned aspects:</p> <ul style="list-style-type: none"> <li>◆ While performing audit, auditor is required to interact with a lot of people in the organisation.</li> <li>◆ Management auditor is expected to deal with human beings rather than financial figures.</li> <li>◆ One of the basic elements in designing the internal control system is personnel.</li> <li>◆ Internal control system in an organisation cannot work until and unless the people who are working in the organisation are competent and honest.</li> </ul>
<b>Auditing and Statistics &amp; Mathematics</b>	<ul style="list-style-type: none"> <li>◆ While performing audit, auditor examines the transaction on test checking basis, wherein auditor is required to select the samples.</li> <li>◆ Discipline of statistics plays an important role as the auditor is also expected to have the knowledge of statistical sampling so as to arrive at meaningful conclusions.</li> <li>◆ The knowledge of mathematics is also required on the part of auditor particularly at the time of verification of inventories.</li> </ul>
<b>Auditing and Data Processing</b>	<ul style="list-style-type: none"> <li>◆ Today, a number of organisations are carrying out their financial accounting activities with the help of computers which can document, record, collate, allocate and value accounting data and information in very large quantity at very high speed.</li> <li>◆ To carry out audit in an computerised environment, the auditor should have good knowledge of the components, general capability of the system and the related terms.</li> <li>◆ In fact, EDP auditing in itself is developing as a discipline.</li> </ul>

# ***FUNDAMENTALS AND PRINCIPLES OF AUDIT***

## **1.0 LEARNING OBJECTIVES**

After studying this chapter, readers will be able to:

- ◆ Appreciate fundamental principles of auditing.
- ◆ Develop auditing skills and applicable techniques.
- ◆ Understand the concepts of audit independence, objectivity, integrity, confidentiality, due care and competence.
- ◆ Understand the concept of true and fair view associated with expressing an audit opinion.

## **1.1 INTRODUCTION**

This chapter covers fundamentals and principles of auditing. Readers will be acquainted with the various concepts of auditing, develop auditing skills and explore various techniques required for effective financial statement audit.

The auditor may be engaged to perform statutory and non-statutory roles of auditing. In this regard, the professional body to which an accountant belongs sets out the fundamental principles expected to guide his conduct in rendering services to his varied clients. The guidance is contained in a set of rules usually referred to as “Code of Ethics for Members.” The Code when taken with the ethical guidance issued by the professional bodies, for example, the “Rules of Professional Conduct for Members” issued by The Institute of Chartered Accountants of Nigeria, ensure that the professional accountant maintains the highest quality of performance and public confidence in the profession.

The auditor also needs to ensure compliance with the accounting and auditing standards in the discharge of his professional duties. There are sanctions for erring members, ranging from loss of membership status in grievous cases, to reprimands and fines on non-grievous cases.

The auditor should have good knowledge of auditing techniques, their limitations, audit evidence and documentation. The use of auditing techniques, audit evidence and proper documentation enable the auditor to accomplish his or her statutory (or other) roles in a manner that leaves other professionals who may need to review or evaluate his working papers in no doubt as to the nature of work done, actually meeting professional standards and really supporting the audit opinion.

The need for strict adherence to ethical rules and guidance on independence, objectivity, integrity, confidentiality, skills, due care and competence enable the auditor to act in a professional manner and earns the auditor the respect of the investing public and entrepreneurship. It also enables the auditor to moderate his or her conduct, on regular basis, so as not to run foul of the regulations of his professional bodies, as well as the law. A recent development is the passing of a law under which a professional accountant, whether in practice or in business, who fails to see to proper compliance with accounting standards in Nigeria, may, on conviction, be fined or jailed.

The concepts of true and fair view, materiality and judgement guide the auditor in the conduct of his assignment. The concepts help the auditor to know the level and quantum of the transactions and balances to which he should pay attention, and matters which need to be considered in the expression of opinion.

## 1.2 DEVELOPMENT AND OBJECTIVES OF AUDIT

### **Auditing**

Auditing is broadly defined as a systematic process of objectively obtaining and evaluating evidence in respect of certain assertions about economic actions and events, to ascertain the degree of correspondence between those assertions and established criteria and reporting the results to interested parties.

Auditing usually covers a particular period of time. Auditing may be narrowly defined as a written report on the examination of financial statements for a particular period of time.

### **Independent auditing**

The International Federation of Accountants (IFAC), recognising the responsibilities of the accountancy profession and considering its own role to be that of providing guidance, encouraging continuity of efforts and promoting harmonisation, has deemed it necessary to establish an international “Code of Ethics for Professional Accountants” to be the basis on which the ethical requirements (code of ethics, detailed rules, guidelines, standards of conduct, etc.) for professional accountants in each country should be based.

In Nigeria, the auditor is expected to comply with the ‘Rules of Professional Conduct for Members,’ issued by The Institute of Chartered Accountants of Nigeria.

The Auditors’ Code 011 titled ‘Fundamental Principles of Independent Auditing’ published by the Auditing Practices Board (APB) in the United Kingdom sets out the fundamental principles expected to guide the conduct of auditors in rendering services to their varied clients. The Code when taken with the ethical standards issued by the professional bodies to which the auditor belongs (for example, the Code of Conduct issued by The Institute of Chartered Accountants of Nigeria) and if regularly followed, ensure that the professional accountant maintains the highest quality of performance and public confidence.

The Auditors' Code describes 'independent audit' as providing reasonable assurance that published audited financial reports are free from material misstatement and are in accordance with legislation and relevant accounting standards.

The Nigerian Accounting Standards Board (NASB) is charged with the responsibility of developing and publishing accounting standards to be observed in the preparation of financial statements in Nigeria. The Companies and Allied Matters Act makes it mandatory for auditors to ensure that the financial statements prepared in Nigeria comply with the accounting standards issued by the NASB. The Nigerian Accounting Standards Board Act, 2003 further seeks to promote and enforce compliance with the accounting standards to be observed in the preparation of financial statements.

It is noteworthy to mention that users have much confidence in the audited financial reports, bearing the seal of a Chartered Accountant. Auditors add to the reliability and quality of financial reporting. The reports of the auditors add credibility to the financial information prepared and published by the directors or officers of an entity.

The auditor also prepares a management report which contains matters which have come to his attention in the course of the assignment, together with recommendations for improvement in the internal control and business of the company. The management report, also called domestic report, is normally addressed to the directors of the company.

### **Fundamental principles of independent auditing**

The Auditors' Code, published by APB, prescribes nine fundamental principles of independent auditing, as follows:

(a) **Accountability**

Auditors act in the interests of primary stakeholders, whilst having regard to the wider public interest.

The identity of primary stakeholders is determined by reference to the statute or agreement requiring an audit: in the case of companies, the primary stakeholders are the general body of investors.

(b) **Integrity**

Auditors should act with integrity, discharging their responsibilities with honesty, fairness and truthfulness. Integrity helps to insulate auditors from matters of conflict of interests and elevate their objectivity.

Confidential information obtained in the course of the audit is disclosed only when required in the public interest, or by operation of law.

(c) **Objectivity and independence**

Auditors should be seen to be objective in all their dealings with their clients. They express opinions independent of the entity and its directors.

(d) **Competence**

This is the ability to carry out professional duty with great knowledge and skills. Auditors should exhibit competence, derived from the acquired qualifications, training and practical experience. Auditing demands understanding of financial reporting and business issues, together with expertise in accumulating and assessing the evidence necessary to form an opinion.

(e) **Rigour**

Auditors approach their work with thoroughness and attitude of professional scepticism. This was emphasised in the famous pronouncement of Lord Dennins, which states that “an auditor is not a blood hound, but should approach his job with professional scepticism believing that someone, somewhere, has made a mistake and that a check needs to be carried out to ensure that no such mistake was made and this forms the whole essence of auditing.” Auditors assess critically the information and explanations obtained in the course of their work and such additional evidence as they consider necessary for the purpose of their audits.

(f) **Judgement**

Auditors apply professional judgement, taking account of materiality in the context of the matters on which they are reporting.

(g) **Clear communication**

Auditors’ reports contain clear expressions of opinion which are set out in writing for proper understanding.

(h) **Association**

Auditors allow their reports to be included in documents containing other information only if they consider that the additional information is not in conflict with the matters covered by their reports and that they have no cause to believe it to be misleading.

(i) **Providing value**

Auditors add to the reliability and quality of financial reporting. They provide to directors and officers constructive observations arising from the audit process, thereby contributing to the effective operation of the business entity.

**Objective and general principles governing the audit of financial statements.**

Auditing Practices Board’s Statement of Auditing Standard 100 titled ‘Objective and General Principles Governing an Audit of Financial Statements’ says that the “objective of an audit of financial statements is to enable auditors to give an opinion on those financial statements taken as a whole, and thereby provide reasonable assurance that the financial statements give a true and fair view

(where relevant) and have been prepared in accordance with relevant accounting or other requirements.”

The standard states the following matters which the auditor should consider in undertaking the audit of financial statements:

- (a) the auditor should carry out procedures designed to obtain sufficient and appropriate evidence in accordance with the auditing standards, determine with reasonable confidence whether the financial statements are free of material mis-statements;
- (b) evaluation of the overall presentation of the financial statements in order to ascertain whether they have been prepared in accordance with relevant legislation and accounting standards; and
- (c) issuing of a report, containing a clear expression of the auditor’s opinion on the financial statements.

In Nigeria, financial statements are prepared with the objective that they present a true and fair view of the state of affairs of the entity and of the profit or loss for that period, and comply with the Companies and Allied Matters Act, CAP C20, LFN 2004.

In the preparation of financial statements, there are inherent uncertainties and use of judgement in making accounting estimates and selecting appropriate accounting policies. Consequently, financial statements may be prepared in different ways and still present a true and fair view.

The auditor’s opinion adds credibility to the financial statements prepared by the directors. Users have reasonable assurance that the financial statements which carry the seal of the independent auditor, present a true and fair view of the state of affairs of the reporting entity. However, the user should not assume that the opinion of the auditor is a guarantee as to the future viability of the entity or an assurance that the efficiency or effectiveness with which management has conducted the affairs of the entity in one year will continue in future years.

### **Responsibility for the financial statements**

The directors are responsible for the preparation of financial statements which give a true and fair view of the state of affairs and of the profit or loss for that period. The directors should ensure that the financial statements comply with the provisions of the Companies and Allied Matters Act, Cap. C 20, LFN 2004.

The directors are obliged to ensure that:

- (a) Proper accounting records are maintained;
- (b) Internal control procedures are instituted which, as far as is reasonably possible, safeguard the assets, prevent and detect fraud and other irregularities;
- (c) Applicable accounting standards are followed;
- (d) Suitable accounting policies are adopted and consistently applied;
- (e) Judgements and estimates made are reasonable and prudent; and

- (f) The going concern basis is used, unless it is inappropriate to presume that the company will continue in business.

It is the responsibility of the auditors to form an independent opinion based on the audit of the financial statements and to report to the members thereon. The audit of the financial statements does not relieve the directors of any of their responsibilities on the financial statements.

### **Scope of Audit Assignment**

The auditor should consider the following matters in determining the scope of work:

- (a) The relevant statements of accounting standards;
- (b) The auditing standards;
- (c) The requirements of relevant professional bodies; and
- (d) Legislation, regulations and the terms of the audit engagement.

The auditor should note that although the basic principles of auditing are the same in the public and the private sectors, auditors of public sector often have wider objectives, additional duties and statutory responsibilities laid down in legislation, directives or codes of practice of the public sector entities.

### **Reasonable assurance**

The term 'reasonable assurance' is central to an independent audit, as certain degree of judgement has to be exercised in the conduct of the audit. The level of assurance which the auditor provides when reporting on financial statements may be regarded as reasonable in the particular context but cannot be taken to be absolute.

The auditor exercises judgement in the conduct of his work, especially on:

- (a) The gathering of evidence, particularly in deciding the nature, timing and extent of audit procedures; and
- (b) The drawing of conclusions based on the evidence gathered; particularly assessing the reasonableness of the estimates made by the directors in preparing the financial statements.

Due to the inherent limitations of any audit, the extent to which the risks that auditors take by giving inappropriate opinions on financial statements can be reduced or restricted. The limitations include those that may result from:

- (a) Inability of the auditor to examine all items within an account balance or class of transactions as it may not be cost effective to do so;
- (b) Inherent limitations which may be embedded in any accounting control system;
- (c) The possibility of management override, collusion or misrepresentation for fraudulent purposes; and
- (d) Audit evidence, in certain cases, being persuasive rather than conclusive.

At the planning stage of an audit, the auditor should take cognisance of the possibility that material mis-statement may exist and should plan to perform

the audit with that possibility in mind. In this regard, the auditor examines critically and with professional scepticism the information and explanations provided, and not assume that they are necessarily correct.

Auditors, in addition to audit risk, are exposed to loss or injury to their professional practice from litigation, adverse publicity or other events arising in connection with the financial statements that they have audited and reported upon. The audit risk and exposure are present even where the auditors have performed their assignments in accordance with the auditing standards and reported appropriately on those financial statements.

### **Ethical Principles**

In carrying out the audit of financial statements, auditors should comply with the ethical guidance issued by their relevant professional bodies. Ethics is more of a norm or a certain code of conduct expected of a group of individuals or a professional body. It dictates some degree of inward values expected of such groups of individuals or body.

The ethical principles which govern the auditors' professional responsibilities include:

- (a) Integrity;
- (b) Objectivity;
- (c) Independence;
- (d) Professional competence and due care; professional behaviour; and
- (e) Confidentiality.

In Nigeria, the auditor should comply with the 'Rules of Professional Conduct for Members' issued by The Institute of Chartered Accountants of Nigeria and the accounting standards issued by the Nigerian Accounting Standards Board. The 'Rules of Professional Conduct for Members' cover the following matters:

- (a) Fundamental principles;
- (b) Integrity, objectivity and independence;
- (c) Conflicts of interest;
- (d) Confidentiality;
- (e) Changes in professional appointment;
- (f) Consultancy;
- (g) Association with non-members;
- (h) Fees;
- (i) Obtaining professional work;
- (j) The names and letterheads of practising firms;
- (k) Second and other opinions;
- (l) Members in business; and
- (m) Enforcement of ethical standards.

### 1.3 AUDITING TECHNIQUES AND THEIR LIMITATIONS, AUDIT EVIDENCE AND DOCUMENTATION

#### **Audit Evidence**

“Audit evidence” means the information obtained by the auditor in arriving at the conclusions on which the audit opinion is based. Audit evidence encompasses the quantity and quality (or reliability) of evidence to be obtained by auditors. It is important for auditors to obtain sufficient, appropriate and reliable audit evidence to enable them draw reasonable conclusions on which to base their audit opinion.

#### **Ways of obtaining audit evidence**

The APB Statement of Auditing Standard No. 400 covers ‘audit evidence’. The Standard provides guidance on the quantity and quality of evidence which auditors should obtain and the procedures for obtaining the evidence. Audit evidence may be obtained from:

- (a) An appropriate mix of tests of control and substantive procedures; and
- (b) Substantive procedures and enquiries made to ascertain the adequacy of the accounting system as a basis for the preparation of the financial statements.

An auditor should understand the following matters in relation to audit evidence:

- (a) The nature of audit evidence;
- (b) The sufficiency of audit evidence;
- (c) The appropriateness of audit evidence;
- (d) The evaluation of audit evidence; and
- (e) Reliability of audit evidence.

#### **The nature of audit evidence**

An auditor may use the following accounting data as sources of audit evidence to test audit objectives:

- (a) The books of original entry;
- (b) Related accounting manuals; and
- (c) Records, such as worksheets and spreadsheets which support the amounts in the financial statements.

In recent times, there is a growing awareness of accounting data being kept in the electronic form, but there are still cases of records kept manually. Audit evidence should be corroborated. Corroborating audit evidence includes both written and electronic information, for example;

- (a) Cheques;
- (b) Records of electronic transfers;
- (c) Invoices;
- (d) Contracts;
- (e) Minutes of meetings; and
- (f) Confirmations, and written representations.

### **Sufficiency of audit evidence**

Sufficiency is the measure of the quantity of audit evidence. The auditor at times relies on evidence that is persuasive rather than convincing in forming an opinion on a set of financial statements. Relying on persuasive evidence could be as a result of:

(a) **Cost considerations**

The auditor may examine a sample of the transactions that make up the account balances or class of transactions. Examination of **all** the transactions on a test basis would be convincing.

(b) **The nature of evidence**

The auditor may be presented with an inconclusive evidence which would be conclusive, when taken in conjunction with other ones.

Consequently, the auditor often seeks audit evidence from different sources or of a different nature to support the same assertion in order to provide reasonable, but not absolute, assurance that the financial statements are free from material mis-statement.

### **Appropriateness of audit evidence**

There is a relationship between sufficiency and appropriateness of audit evidence. Both sufficiency and appropriateness apply to audit evidence obtained from tests of control and substantive procedures. Appropriateness is the measure of the quality or reliability of audit evidence and its relevance to a particular assertion while sufficiency is the measure of the quantity of audit evidence.

The auditor's judgement as to what is sufficient and appropriate audit evidence is influenced by such factors as:

- (a) The auditor's assessment of the nature and degree of risk of mis-statement at both the financial statement level and the account balance or class of transaction level;
- (b) The nature of the accounting and internal control systems, including the control environment;
- (c) The materiality of the item being examined;
- (d) The experience gained during previous audits and the auditor's knowledge of the business and industry;
- (e) The findings from audit procedures, and from any audit work carried out in the course of preparing the financial statements, including indications of fraud or error; and
- (f) The source and reliability of information available.

Auditors should consider the implications of their inability to obtain sufficient appropriate audit evidence in their report.

### **The Evaluation of audit evidence**

An evidence is considered appropriate when it is both relevant and reliable

- (a) **Relevance:**  
A relevant audit evidence should relate to the audit objective being tested; and
- (b) **Reliability:**  
A useful audit evidence should be able to support the true state of an assertion or audit objective.

### **Tests of control**

Internal control is a means whereby an entity's board or entity's senior management obtains a reasonable assurance that the entity's set objectives are achieved. These constitute all management mechanisms such as approved authorisation process, policies and procedures that should be followed in fulfilling organisational objectives, in order to give assurance that the procedures are followed in conducting the business of the entity.

Auditors usually select a sample of transactions passing through the procedures and test whether they were appropriately conducted in accordance with the laid down guidelines. In conducting tests of control for the purpose of obtaining audit evidence, the auditor should consider the sufficiency and appropriateness of the audit evidence obtained to support the assessed level of control risk.

Audit evidence may be obtained from the accounting and internal control systems in the following areas of design and operations:

- (a) **Design:**  
The accounting and internal control systems are capable of preventing or detecting material mis-statements during the period covered by the audit.
- (b) **Operation:**  
The systems exist and have operated effectively throughout the relevant period covered by the audit.

The tests described above are referred to as 'compliance testing'; which is test of controls that provide audit evidence to ensure that they are working as designed. This is different from substantive tests, which are designed to provide audit evidence that transactions reported in the financial statements are accurate, complete and valid.

### **Substantive procedures**

In conducting substantive tests for the purpose of obtaining audit evidence, auditors should consider the extent to which the evidence obtained from substantive procedures together with any information obtained from tests of controls support the relevant financial statements.

As a basis for the preparation of financial statements, the directors make certain assertions. The assertions constitute representations of the directors that are embodied in the financial statements. The directors, by approving the financial statements, are making representations about the information therein.

The following matters constitute representations or assertions usually made by the directors in approving financial statements:

- (a) **Existence:**  
An asset or a liability exists at a given date.
- (b) **Rights and Obligations:**  
An asset or a liability pertains to the entity at a given date.
- (c) **Occurrence:**  
A transaction or event took place which pertains to the entity during the particular period.
- (d) **Completeness:**  
There are no unrecorded assets, liabilities, transactions or events, or undisclosed items.
- (e) **Valuation:**  
An asset or liability is recorded at an appropriate carrying value.
- (f) **Measurement:**  
A transaction or event is recorded at the proper amount and revenue or expense is allocated to the proper period.
- (g) **Presentation and Disclosure:**  
An item is disclosed, classified and described in accordance with the applicable reporting framework (for example, relevant legislation and applicable accounting standards).

The auditor should obtain evidence to support each financial statement assertion. The audit evidence presented in support of one assertion (for example, existence of stock) does not compensate for failure to obtain audit evidence regarding another (for example, its valuation). Tests may, however, provide audit evidence for more than one assertion (for example, testing subsequent receipts from the entity's debtors may provide some audit evidence regarding both their existence and valuation).

In planning an assignment, the auditor prepares programmes comprising detailed audit procedures and objectives. The objectives cover the financial statement assertions made by the directors. The auditor seeks to ensure that both the objectives and the audit programmes enable him to satisfy himself that the planned work will result in the appropriate evidence being obtained.

In conducting substantive tests, the auditor should consider the nature, timing and extent of substantive procedures. These may depend, amongst other factors, on the following matters:

- (a) The auditor's assessment of the control environment and accounting systems generally;
- (b) The inherent and control risks relating to each assertion;
- (c) Evidence obtained from audit work performed during the preparation of the financial statements; and

- (d) Where tests of control provide satisfactory evidence as to the effectiveness of accounting and internal control systems, the extent to which relevant substantive procedures may be reduced, but not entirely eliminated.

### **Reliability of Audit Evidence**

The reliability of audit evidence is influenced by its source which may either be internal or external; and by its nature which may be visual, documentary or oral. The auditor must be aware of the following matters in assessing the reliability of audit evidence:

- (a) Audit evidence from external sources (for example, confirmation received from a third party) is more reliable than that obtained from the entity's records;
- (b) Audit evidence obtained from the entity's records is more reliable when the related accounting and internal control systems operate effectively;
- (c) Audit evidence obtained directly by auditors is more reliable than that obtained by or from the entity;
- (d) Audit evidence in the form of documents and written representations are more reliable than oral representations; and
- (e) Original documents are more reliable than photocopies, telexes or facsimiles.

When the audit evidence obtained from different sources are consistent with one another, they become persuasive to the auditor. When the auditor's evaluation of audit evidence results in the fact that evidence from one source is inconsistent with that from another, it is the responsibility of the auditor to determine what additional procedures must be undertaken to resolve the inconsistency.

Because of cost considerations, the auditor may examine a sample of the transactions that make up the account balance or class of transactions. The auditor must consider the relationship between the cost of obtaining audit evidence and the usefulness of the information obtained. The auditor, however, is not relieved of any blame if he omits a necessary procedure as a result of any constraint.

### **Procedures for obtaining audit evidence**

Auditors normally obtain audit evidence by inspection, observation, enquiry, confirmation, computation and analytical procedures. The choice of one or a combination of the procedures which the auditor may adopt is dependent, in part, upon the period of time during which the audit evidence sought is available and the form in which the accounting records are maintained.

### **Inspection**

Inspection involves the following:

- (a) Examination of records, documents or tangible assets;
- (b) Provision of audit evidence of varying degrees of reliability depending on their nature and source and the effectiveness of internal controls over their processing;

Three major categories of documentary audit evidence are listed below in descending degree of reliability as audit evidence:

- (a) Evidence created and provided to auditors by third parties;
- (b) Evidence created by third parties and held by the entity; and
- (c) Evidence created and held by the entity.

Inspection provides reliable audit evidence about the existence of the tangible assets inspected, but not necessarily as to the ownership or value of such assets.

### **Observation**

The auditor by observation looks at a procedure being performed by others. For example, the auditor observes the counting of stock by the entity's staff or the performance of internal control procedures as part of the conduct of an audit.

### **Enquiry and Confirmation**

**Enquiry** involves seeking information within and outside the entity. Enquiry may be formal or informal. Responses to enquiries obtained from third parties may confirm or disprove information previously made available to the auditor.

**Confirmation** involves obtaining response to an enquiry to corroborate information previously made available to the auditors in the course of the audit. Examples of direct confirmation are as follows:

- (a) Confirmation of debts by communication with debtors;
- (b) Confirmation of legal cases by communication with the entity's solicitors; and
- (c) Confirmation of bank balances by communication with the entity's bankers, etc.

### **Computation**

The auditor uses computation to check the arithmetical accuracy of source documents and accounting records. Computation also involves performing independent calculations.

### **Analytical procedures**

Analytical procedures consist of the analysis of relationship between:

- (a) Items of financial data;
- (b) Items of financial and non-financial data, derived from the same period; and
- (c) Comparable financial information deriving from different periods or different entities.

Analytical procedures are used to identifying consistencies and predicted patterns or significant fluctuations and unexpected relationships, and the results of investigations performed.

### **Documentation**

It is the duty of the auditor to document matters which are important in providing evidence to support the audit opinion and evidence that the audit

was carried out in accordance with auditing standards, accounting standards and relevant regulations.

The International Federation of Accountants (IFAC) published the International Standard on Auditing titled 'Documentation' which establishes standards and provides guidance regarding documentation in the context of the audit of financial statements.

The Auditing Practices Board (APB) Statement of Auditing Standard 230 on 'Working papers' provides guidance on 'Working papers'.

The Public Company Accounting Oversight Board (PCAOB) has also recently issued Auditing Standard No. 3 - Audit Documentation. In this section, 'documentation' and 'working papers' are used interchangeably.

"Documentation" means the materials (working papers) prepared by and for, or obtained and retained by the auditor in connection with the performance of the audit. The PCAOB auditing standard No. 3 describes 'audit documentation' as 'the written record of the basis for the auditor's conclusions that provides the support for the auditor's representations, whether those representations are contained in the auditor's report or otherwise'. Working papers may be in the form of data stored on paper, film, electronic media or other media.

Working papers:

- (a) assist in the planning and performance of the audit;
- (b) assist in the supervision and review of the audit work; and
- (c) record the audit evidence resulting from the audit work performed to support the auditor's opinion.

### **Duties of Auditors on Working Papers**

It is the duty of the Auditor to:

- (a) Prepare working papers which are sufficiently complete and detailed to provide an overall understanding of the audit;
- (b) Record in the working papers information on planning the audit work, the nature, timing and extent of the audit procedures performed, the results thereof, and the conclusions drawn from the audit evidence obtained;
- (c) Record auditor's reasoning on all significant matters which require the exercise of judgement, together with the auditor's conclusion thereon;
- (d) Document areas involving difficult questions of principle or judgement; and
- (e) Record the relevant facts known to the auditor at the time the conclusions were reached on matters of judgement or principles.

The extent of working papers to be prepared and retained is a matter of professional judgement. In determining the extent of working papers to be prepared and retained the auditor should consider:

- (a) The legal and professional requirements; and

- (b) What would be necessary to provide another auditor who has no previous experience with the audit with an understanding of the work performed.

### **Form and Content of Working Papers**

The following matters may affect the form and content of working papers:

- (a) Nature of the engagement;
- (b) Form of the auditor's report;
- (c) Nature and complexity of the business;
- (d) Nature and condition of the entity's accounting and internal control systems;
- (e) Needs in the particular circumstances for direction, supervision and review of work performed by assistants;
- (f) Specific audit methodology and technology used in the course of the audit;
- (g) Use of standardised working papers, for example, checklists, specimen letters, standard organisation of working papers;
- (h) Need to facilitate the delegation of work while providing a means to control its quality; and
- (i) Schedules, analyses and other documentation prepared by the entity and the need to be satisfied that those materials have been properly prepared.

### **Contents of Working Papers**

The contents of working papers will generally include the following:

- (a) Information concerning the legal and organisational structure of the entity;
- (b) Extracts or copies of important legal documents, agreements and minutes;
- (c) Information concerning the industry, economic and legislative environment within which the entity operates;
- (d) Evidence of the planning process including audit programmes and any changes thereto;
- (e) Evidence of the auditor's understanding of the accounting and internal control systems;
- (f) Evidence of inherent and control risk assessments and any revisions thereof;
- (g) Evidence of the auditor's consideration of the work of internal auditing and conclusions reached;
- (h) Analysis of transactions and balances;
- (i) Analyses of significant ratios and trends;
- (j) A record of the nature, timing and extent of audit procedures performed and the results of such procedures;
- (k) Evidence that the work performed by assistants was supervised and reviewed;
- (l) An indication as to who performed the audit procedures and when they were performed;

- (m) Details of procedures applied regarding components whose financial statements are audited by another auditor;
- (n) Copies of communications with other auditors, experts and other third parties;
- (o) Copies of letters or notes concerning audit matters communicated to or discussed with the entity, including the terms of the engagement and material weaknesses in internal control;
- (p) Letters of representation received from the entity;
- (q) Conclusions reached by the audit concerning significant aspects of the audit, including how exceptions and unusual matters, if any, disclosed by the auditor's procedures were resolved or treated; and
- (r) Copies of the financial statements and auditor's report. (Chitty, 2004; IFAC ISA 230).
- (s) Checklists for compliance with statutory disclosure requirements and accounting standards; and
- (t) Management letter setting out internal control weaknesses in the system to the client.

### **Confidentiality, Safe Custody, Retention and Ownership of Working Papers**

'Working papers are the property of the auditors. Although portions of or extracts from the working papers may be made available to the entity at the discretion of the auditor, they are not a substitute for the entity's accounting records' (IFAC ISA 230).

The auditor should therefore adopt appropriate procedures:

- (a) For maintaining the confidentiality and safe custody of the working papers; and
- (b) For retaining the working papers for a period sufficient to meet the needs of the practice and in accordance with legal and professional requirements of record retention.

## **1.4 INDEPENDENCE, OBJECTIVITY, INTEGRITY, CONFIDENTIALITY, SKILLS, CARE AND COMPETENCE**

### **Independence**

IFAC Code of Ethics for Professional Accountants states that "it is in the public interest and, therefore, required by this Code of Ethics, that members of assurance teams, firms and, when applicable, network firms be independent of assurance clients".

The Code states that "Assurance engagements are intended to enhance the credibility of information about a subject matter by evaluating whether the subject matter conforms in all material respects with suitable criteria. The International Standard on Assurance Engagements issued by The International Auditing and Assurance Standards Board (IAASB), describes the objectives and elements of assurance engagements to provide, either a high or a moderate

level of assurance. IAASB has also issued specific standards for certain assurance engagements. For example, International Standards on Auditing provide specific standards for audit (high level assurance) and review (moderate level assurance) of financial statements”.

The Code provides guidance to auditors in determining whether a particular engagement is an assurance engagement and states that, this will depend upon whether the assurance engagement exhibits all of the following elements:

- (a) A three party relationship involving:
  - (i) A professional accountant;
  - (ii) A responsible party; and
  - (iii) An intended user;
- (b) A subject matter;
- (c) Suitable criteria;
- (d) An engagement process; and
- (e) A conclusion.

There is a broad range of engagements to provide a high or moderate level of assurance. Such engagements may include:

- (a) Engagements to report on a broad range of subject matters covering financial and non-financial information;
- (b) Attest and direct reporting engagements;
- (c) Engagements to report internally and externally; and
- (d) Engagements in the private and public sector.

The subject matter of an assurance engagement may take many forms, such as the following:

- (a) Data (for example, historical or prospective financial information, statistical information, performance indicators);
- (c) Systems and processes (for example, internal controls); or
- (d) Behaviour (for example, corporate governance, compliance with regulation, human resource practices).

The Code further identifies that not all engagements performed by professional accountants are assurance engagements. Other engagements frequently performed by professional accountants that are not assurance engagements include:

- (a) Agreed-upon procedures;
- (b) Compilation of financial or other information;
- (c) Preparation of tax returns when no conclusion is expressed, and tax consulting;
- (d) Management consulting; and
- (e) Other advisory services.

The Code also provides a conceptual approach to independence which requires the following:

Independence requires:

(a) **Independence of mind**

The state of mind, that permits the provision of an opinion without being affected by influences that compromise professional judgement, allowing an individual to act with integrity, and exercise objectivity and professional scepticism; and

(b) **Independence in appearance**

The avoidance of facts and circumstances that are so significant that a reasonable and informed third party, having knowledge of all relevant information, including safeguards applied, would reasonably conclude that a firm's, or a member of the assurance team's integrity, objectivity or professional scepticism had been compromised.

### **Rules of Professional Conduct**

The 'Rules of Professional Conduct for Members' issued by The Institute of Chartered Accountants of Nigeria provides guidance on integrity, objectivity and independence. The Rules require that a member should behave with integrity in all professional, business and financial relationships. The Rules also call for a degree of objectivity and independence to be exercised by a member of the Institute in financial reporting and similar roles outside the audit.

### **Integrity and objectivity**

IFAC Code of Ethics states that "integrity implies not merely honesty but fair dealing and truthfulness. The principle of objectivity imposes the obligation on all professional accountants to be fair, intellectually honest and free of conflicts of interest".

The Code identifies that, professional accountants serve in many different capacities and should demonstrate their objectivity in varying circumstances. Professional accountants in public practice undertake assurance engagements, and render tax and other management advisory services. Other professional accountants prepare financial statements as a subordinate of others, perform internal auditing services, and serve in financial management capacities in industry, commerce, the public sector and education. They also educate and train those who aspire to be admitted into the profession. Regardless of service or capacity, professional accountants should protect the integrity of their professional services and maintain objectivity in their judgement.

In selecting the situations and practices to be specifically dealt with, in ethics requirements relating to objectivity, the Code states that adequate consideration should be given to the following factors:

- (a) Professional accountants are exposed to situations which involve the possibility of pressures being exerted on them. These pressures may impair their objectivity;
- (b) It is impracticable to define and prescribe all such situations where these possible pressures exist. Reasonableness should prevail in

- establishing standards for identifying relationships that are likely to, or appear to, impair a professional accountant's objectivity;
- (c) Relationships should be avoided which allow prejudice, bias or influence of others to override objectivity;
  - (d) Professional accountants have an obligation to ensure that personnel engaged on professional services adhere to the principle of objectivity; and
  - (e) Professional accountants should neither accept nor offer gifts or entertainment which might reasonably be believed to have a significant and improper influence on their professional judgement or those with whom they deal. What constitutes an excessive gift or offer of entertainment varies from country to country but professional accountants should avoid circumstances which would bring their professional standing into disrepute.

In addition to the above, the 'Rules of Professional Conduct for Members' issued by the Institute of Chartered Accountants of Nigeria provides a framework within which members can identify actual or potential threats to objectivity and assess the safeguards which may be available to offset such threats.

### **Professional Competence**

The IFAC Code of Ethics for Professional Accountants states that professional accountants should not portray themselves as having expertise or experience which they do not possess.

Professional competence may be divided into two separate phases:

- (a) **Attainment of professional competence**  
The attainment of professional competence requires initially a high standard of general education followed by specific education, training and examination in professionally relevant subjects, and whether prescribed or not, a period of work experience. This should be the normal pattern of development for a professional accountant.
- (b) **Maintenance of professional competence**
  - (i) The maintenance of professional competence requires a continuing awareness of developments in the accountancy profession including relevant national and international pronouncements on accounting, auditing and other relevant regulations and statutory requirements.
  - (ii) A professional accountant should adopt a program designed to ensure quality control in the performance of professional services consistent with appropriate national and international pronouncements.

The 'Rules of Professional Conduct for Members' issued by The Institute of Chartered Accountants of Nigeria provides that a member should not accept or perform work which he or she is not competent to undertake, unless he or she obtains such advice and assistance as will, enable him or her competently carry out the work.

### Confidentiality

The IFAC Code of Ethics states that professional accountants have an obligation to respect the confidentiality of information about a client's or employer's affairs acquired in the course of professional services. The duty of confidentiality continues even after the end of the relationship between the professional accountant and the client or employer. The Code states that:

- (a) Confidentiality should always be observed by a professional accountant unless specific authority has been given to disclose information or there is a legal or professional duty to disclose.
- (b) Professional accountants have an obligation to ensure that staff under their control and persons from whom advice and assistance is obtained respect the principle of confidentiality.
- (c) Confidentiality is not only a matter of disclosure of information, It also requires that a professional accountant acquiring information in the course of performing professional services does, neither use, nor appear to use that information for personal advantage, or for the advantage of a third party.
- (d) A professional accountant has access to a lot of confidential information about a client's or employer's affairs not otherwise disclosed to the public. Therefore, the professional accountant should be relied upon not to make unauthorised disclosures to other persons. This does not apply to disclosure of such information in order to properly discharge the professional accountant's responsibility according to the profession's standards.
- (e) It is in the interest of the public and the profession that, the profession's standards relating to confidentiality be defined and guidance given on the nature and extent of the duty of confidentiality and the circumstances in which disclosure of information acquired during the course of providing professional services shall be permitted or required.
- (f) It should be recognised, however, that confidentiality of information is part of statute or common law and therefore detailed ethical requirements in respect thereof, will depend on the law of the country of each member body.

Matters which should be considered in determining whether confidential information may be disclosed are as follows:

- (a) When disclosure is authorised - when authorisation to disclose is given by the client or the employer, the interests of all the parties including those third parties whose interests might be affected should be considered.
- (b) When disclosure is required by law - examples of when a professional accountant is required by law to disclose confidential information are:
  - (i) To produce documents or to give evidence in the course of legal proceedings; and
  - (ii) To disclose to the appropriate public authorities infringements of the law which come to light.

- (c) There is a professional duty or right to disclose when need arises:
  - (i) To comply with technical standards and ethics requirements; such disclosure is not contrary to this section;
  - (ii) To protect the professional interests of a professional accountant in legal proceedings;
  - (iii) To comply with the quality (or peer) review of a member body or professional body; and
  - (iv) To respond to an inquiry or investigation by a member body or regulatory body.

When the professional accountant has determined that confidential information can be disclosed, the following points should be considered:

- (a) Whether or not all the relevant facts are known and substantiated, to the extent it is practicable to do so; when the situation involves unsubstantiated fact or opinion, professional judgement should be used in determining the type of disclosure to be made, if any;
- (b) What type of communication is expected and the addressee; in particular, the professional accountant should be satisfied that the parties to whom the communication is addressed are appropriate recipients and have the responsibility to act on it; and
- (c) Whether or not the professional accountant would incur any legal liability having made a communication and the consequences thereof.

In all such situations, the professional accountant should consider the need to consult legal counsel and/or the professional organisation(s) concerned.

The 'Rules of Professional Conduct for Members' issued by the Institute of Chartered Accountants of Nigeria provides, in relation to confidentiality, that

- (a) Information confidential to a client or employer acquired in the course of professional work should not be disclosed except where consent has been obtained from the client, employer or other proper source, or where there is a legal right or duty to disclose.
- (b) Where a legal right or duty of disclosure does exist, the client or employer should normally be notified in advance of the disclosure being made.

### **Skills, care and diligence**

The 'Rules of Professional Conduct for Members' issued by The Institute of Chartered Accountants of Nigeria provides that a member should carry out his or her professional work with due skill, care, diligence and expedition and with proper regard for technical and professional standards expected of him or her as a member. A member should conduct himself or herself with courtesy and consideration towards all with whom he comes into contact, during the course of performing his or her work. Under the section on Professional Competence and Due Care of the Fundamental Principles as contained in the IFAC Code of Ethics for Professional Accountants, it is stated that "a professional accountant should perform professional services with due care, competence and diligence and has a continuing duty to maintain professional knowledge

and skill at a level required to ensure that a client or employer receives the advantage of competent professional service based on up-to-date developments in practice, legislation and techniques”.

### **Publicity**

The IFAC Code of Ethics for Professional Accountants provides guidance on Publicity. It states that in the marketing and promotion of themselves and their work, professional accountants should:

- (a) Not use means which bring the profession into disrepute;
- (b) Not make exaggerated claims for the services they are able to offer, the qualifications they possess, or experience they have gained; and
- (c) Not denigrate the work of other accountants.

The ‘Rules of Professional Conduct for Members’ issued by the Institute of Chartered Accountants of Nigeria provides as follows:

In relation to practice promotion, a member may seek publicity for his or her services, achievements and products and may advertise his or her services, achievements and products in any way consistent with the dignity of the profession in that he should not project an image inconsistent with that of a professional person bound to high ethical and technical standards.

In relation to advertisement, the code states that advertisement must comply with the law and should be legal. An advertisement should be clearly distinguishable as such.

## **1.5 TRUE AND FAIR VIEW, MATERIALITY AND JUDGEMENT**

### **True and Fair View**

The concept of “true and fair view” occupies a central place in financial reporting. The concept which has been debated over time has a powerful, direct effect on accounting practice and it is the ultimate test for financial statements. The Companies and Allied Matters Act requires the auditors to include in their report whether the financial statements show a true and fair view of the affairs of the entity at a balance sheet date. The auditing standards also put the concept of “true and fair view” in perspective.

The “true and fair view” is a dynamic concept in that, over time, the concept has always moved in sympathy with changes in accounting and business practice. The more the laws change and the more accounting and auditing standards change, the more the requirements which the auditor must meet to ensure the financial statements upon which he or she is reporting, meet the concept of ‘true and fair’ view. The concept affects the interpretation of the components of financial reporting and comes to play in setting procedures for the conduct of audit in an accounting practice.

It is important to note that financial statements will not give a “true and fair view” unless the information they contain is sufficient in quantity and quality

to satisfy the reasonable expectations of the readers to whom they are addressed. The concept of “true and fair view” influences accounting standards and other authoritative pronouncements.

### **Materiality**

The APB Statement of Auditing Standard 220 covers ‘Materiality and the audit’. The International Auditing and Assurance Standards Board of IFAC issued International Statement on Auditing 320 on ‘Audit Materiality’.

The International Statement on Auditing on Audit Materiality states that information is considered to be material to the financial statements if the misstatement or omission of such information may reasonably be expected to ‘influence the economic decisions of users’ of those financial statements, including their assessments of management’s stewardship.

Auditors must consider the effect of possible misstatement of relatively small amounts in that a relatively small error in a month end procedure may be an indication of possible material misstatement when the cumulative effect on the financial statements is considered at the end of the financial period.

A misstatement or the aggregate of all misstatements in financial statements is material if, considering the surrounding circumstances:

- (a) It is probable that, the decision of a person who is relying on the financial statements; and
- (b) Who has a reasonable knowledge of business and economic activities (the user), would be changed or influenced by such misstatement or the aggregate of all misstatements.

### **Steps in establishing materiality**

The steps to be followed in establishing materiality of an audit item are:

- (a) Set a threshold at the planning stage about materiality;
- (b) Record misstatements identified in the course of the audit; and
- (c) Document the likely misstatements and compare with materiality.

When immaterial information is given in the financial statements, the result may distort the understandability of the other information provided. In such circumstances, the auditors need to consider the exclusion of such immaterial information. However, the requirements of legislation, accounting standards and auditing standards must be considered in determining the nature of information to be given in the financial statements.

### **Principal factors affecting materiality**

The auditor must exercise judgement in determining whether information is material. An item may be material considering its size and nature. The principal factors which may affect materiality are as follows:

- (a) The size of the item when taken in the context of the financial statements as a whole and of the other information readily available in the market

place to investors and users that would affect their evaluation of the financial statements;

- (b) Consideration may be given to the nature of the item in relation to:
  - (i) the basis of transaction or other event giving rise to it;
  - (ii) the significance of the event or transaction;
  - (iii) the legality, sensitivity, normality and potential consequences of the item; and
  - (iv) the disclosure requirement of such item.

The auditor should determine materiality by a combination of these factors, rather than any one in particular. When there are two or more similar items, the auditor should consider the aggregate.

### **Consideration of materiality**

In planning the conduct of an audit, auditors seek to provide reasonable assurance that the financial statements are free of material mis-statement and give a true and fair view. Auditors exercise professional judgement in determining what is material. Both the amount (quantity) and the nature (quality) of mis-statements are considered in determining materiality. There exists a difficulty in ascribing general mathematical definition to 'materiality', in that it has both qualitative and quantitative aspects.

Auditors must consider the possibility of misstatements of relatively small amounts that, cumulatively, could have a material effect on the financial statements. For example, a relatively small error in a month-end procedure could be an indication of a potential material misstatement, if that error is repeated each month during the financial year that is being audited.

Auditors should also pay attention to the nature of mis-statements relating to qualitative aspects of a matter. Examples of qualitative mis-statements would be the inadequate or inaccurate description of an accounting policy when it is likely that a user of the financial statements could be misled by the description.

### **Materiality and audit work**

In planning and conduct of an audit, auditors must consider:

- (a) Materiality and its relationship with audit risk; and
- (b) Materiality when determining the nature, timing and extent of audit procedures.

At the planning stage, the assessment of materiality based on the latest available reliable financial information, assists in the determination of an efficient and effective audit approach. The preliminary materiality assessment helps auditors decide such questions as what items to examine, and whether to use sampling techniques. This enables auditors to select audit procedures that, in combination, reduce audit risk to an acceptably low level.

In practice, the assessment of materiality at the audit planning stage, may differ from that at the time of evaluating the results of audit procedures. This may be caused by a change in circumstances, or a change necessitated by the outcome of the audit. For example, if the actual results of operations and financial position are different from those they expected when the audit was planned.

Auditors must consider the implications of factors which result in the revision of their preliminary materiality assessment on their audit approach. In this circumstance, auditors may modify the nature, timing and extent of planned audit procedures. For example, if, after planning for specific audit procedures, auditors determine that the acceptable materiality level falls short of the initial materiality level, the risk of failing to detect a material mis-statement necessarily increases. The risk may be compensated for by the auditors carrying out more audit work.

### **Evaluating the effect of mis-statements**

In evaluating whether the financial statements give a true and fair view, auditors should assess the materiality of the aggregate of uncorrected mis-statements.

The following constitute aggregate of uncorrected mis-statements:

- (a) Specific mis-statements identified by the auditor, including uncorrected mis-statements identified during the audit of the previous period if they affect the current period's financial statements; and
- (b) Auditors' best estimate of other mis-statements which cannot be quantified specifically (for example projected errors).

The auditor must consider whether the aggregate of uncorrected mis-statements is material. If the auditor concludes that the mis-statements may be material, the auditor should consider reducing audit risk by extending audit procedures or requesting the directors to adjust the financial statements. If the directors refuse to adjust the financial statements and the results of extended audit procedures do not enable the auditor to conclude that the aggregate of uncorrected mis-statements is not material, the auditor should consider the implications in the preparation of his or her report.

## **1.6 SUMMARY AND CONCLUSIONS**

This chapter is designed to give readers a headstart in auditing. The ground work has been laid to enable readers to grasp the very principles and fundamental concepts that will prepare their minds for the core discourses to follow. Consequently, concepts such as the integrity, ethical tone of the auditor that will not only impact on their understanding of the nobility of the profession they are preparing for, but will also help them prepare their minds for the career pursuit in auditing, have been given adequate coverage.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

**1.7 REVISION QUESTIONS****1.7.1. MULTIPLE CHOICE QUESTIONS**

1. “Independent audit’ is described as providing reasonable assurance that published audited financial reports are free from material misstatement and are in accordance with legislation and relevant accounting standards
  - (A) True
  - (B) Independent audit is performed by independent accountants
  - (C) False
  - (D) Once the auditor issues his opinion, the audit is independent
  - (E) Independent audit is conducted once in a while
  
2. In the conduct of any audit of financial statements, auditors should comply with the ethical guidance issued by their relevant professional bodies
  - (A) It is not mandatory to comply with ethical codes
  - (B) Since monitoring is slow, the auditor should not bother
  - (C) Auditors should comply with ethical guidance issued by their professional bodies
  - (D) Paying fines makes complying unnecessary
  - (E) False
  
3. An audit of the financial statements of an entity does not relieve the directors of any of their responsibilities on the financial statements
  - (A) The directors are absolved of their responsibility because the company law states as such
  - (B) The directors at the board meeting resolved as such
  - (C) A clean audit report relieves the directors of their responsibilities on the financial statements
  - (D) True
  - (E) False
  
4. “Documentation” means the material (working papers) prepared by and for, or obtained and retained by the auditor in connection with the performance of the audit.
  - (A) Documentation is not necessary nowadays
  - (B) True
  - (C) False
  - (D) Electronic data is disputed by the courts
  - (E) Documentation and working papers are not the same.
  
5. The concept of “true and fair view” is central to financial reporting.
  - (A) False
  - (B) True and fair view is no longer in vogue
  - (C) The concept of true and fair view has been outlawed
  - (D) True
  - (E) True and fair view is at the bottom of financial reporting.

**1.7.2 SHORT ANSWER QUESTIONS**

- (1) Mention the fundamental principles of independent auditing contained in the ethical code for professional accountants.
- (2) State the matters which the auditor should consider in determining the scope of the audit work.

- (3) List matters contained in the ethical principles which govern auditors' professional responsibilities.
- (4) What do you understand by 'independence of mind' in relation to ethical conduct of a professional accountant?
- (5) When is there a professional duty or right to disclose information which the auditor obtained in the course of an audit?

*Refer to Suggested Solutions in Appendix I on page 301.*

## ***REGULATORY AND ETHICAL ISSUES***

### **2.0 LEARNING OBJECTIVES**

After studying this chapter, readers will be able to:

- ◆ Know the scope and terms of engagement of auditors as provided in: Companies and Allied Matters Act CAP C20, 2004; Banks and Other Financial Institutions Act 25 of 1991; Insurance Act of 2007; Pension Act 2004.
- ◆ Know the instruments establishing various organisations such as Securities and Exchange Commission (SEC), Nigeria Deposit Insurance Corporation (NDIC) etc.
- ◆ Understand the professional pronouncements and their applications, i.e. guidelines and standards of the Institute and other international bodies.
- ◆ Understand supervision and monitoring of auditors: Quality control, working papers, peer review; Functions and responsibility; Threat to auditors' independence and their resolutions; Conflicts of interest, beneficial shareholding, financial involvement with or in the affairs of clients, personal relationships, audit fee etc.

The regulatory provisions and issues may be discussed, as follows:

### **2.1 COMPANIES AND ALLIED MATTERS ACT (CAMA) CAP C20, 2004**

The Companies and Allied Matters Act, (CAMA) CAP C20, LFN 2004 is the principal law which sets the tone for the incorporation and conduct of business in Nigeria.

#### **Appointment of auditors**

Section 357 of the Companies and Allied Matters Act provides for the appointment of auditors. The section states as follows:

- (a) Every company shall at each annual general meeting appoint an auditor or auditors to audit the financial statements of the company, and to hold office from the conclusion of that, until the conclusion of the next, annual general meeting.
- (b) At any annual general meeting a retiring auditor, however appointed, shall be reappointed without any resolution being passed unless:
  - (i) he is not qualified for re-appointment;
  - (ii) a resolution has been passed at that meeting appointing some other person instead of him or providing expressly that he shall not be re-appointed; and

- (iii) he has given the company notice in writing of his unwillingness to be re-appointed.

Where notice is given of an intended resolution to appoint some other person or persons in place of a retiring auditor, and by reason of the death, incapacity or disqualification of that other person or of all those other persons, as the case may be, the resolution cannot be proceeded with, the retiring auditor shall not be automatically re-appointed by virtue of this sub-section.

Where at an annual general meeting, no auditors are appointed or re-appointed, the directors may appoint a person to fill the vacancy:

- (a) The company shall, within one week of the power of the directors becoming exercisable, give notice of that fact to the Corporate Affairs Commission; and if a company fails to give required notice the company and every officer of the company who is in default shall be guilty of an offence and liable to a fine of ₦100 for every day during which the default continues;
- (b) The first auditors of a company may be appointed by the directors at any time before the company is entitled to commence business and auditors so appointed shall hold office until the conclusion of the next annual general meeting:

Provided that:

- (i) the company may at a general meeting remove any such auditors and appoint in their place any other person who has been nominated for appointment by any member of the company and of whose nomination notice has been given to the members of the company not less than 14 days before the date of the meeting; and
- (c) The company may, in a general meeting convened for that purpose, appoint the first auditors and thereupon the said powers of the directors shall cease.

The directors may fill any casual vacancy in the office of auditor but while any such vacancy continues, the surviving or continuing auditor or auditors, if any, may act.

### **Qualification of auditors**

The provisions of the Institute of Chartered Accountants of Nigeria Act 1965 shall have effect in relation to any investigation or audit for the purpose of this Act so however that none of the following persons shall be qualified for appointment as auditor of a company, that is

- (a) an officer or servant of the company;
- (b) a person who is a partner of or in the employment of an officer or servant of the company; or
- (c) a body corporate,

The disqualification shall extend and apply to persons who in respect of any period of an audit were in the employment of the company or were otherwise connected therewith in any manner.

A person shall also not qualify for appointment as an auditor of a company if he is disqualified for appointment as auditor of any other body corporate which is that company's subsidiary or holding company or a subsidiary of that company's holding company, or would be so disqualified if the body corporate were a company.

A firm is qualified for appointment as auditor of a company if, but only if, all the partners are qualified for appointment as auditors of it.

No person shall act as auditor of a company at a time when he knows that he is disqualified for appointment to that office and if an auditor of a company to his knowledge becomes so disqualified during his term of office, he shall thereupon vacate his office and give notice in writing to the company that he has vacated it by reason of that disqualification.

A person who acts as auditor in contravention or fails without reasonable excuse to give notice of vacating his office shall be guilty of an offence and liable to a fine of 500 and, for continued contravention, to a daily default fine of 50, (Section 358).

### **Auditors' Report**

The auditors of a company shall make a report to its members on the accounts examined by them, and on every balance sheet and profit and loss account, and on all group financial statements, copies of which are to be laid before the company in a general meeting during the auditors' tenure of office.

The auditors' report shall state the matters set out in the Sixth Schedule to the Companies and Allied Matters Act as follows:

- (a) Basis of preparation of the entity's financial statements (i.e. that the financial statements have been prepared on the basis of the entity's accounting policies);
- (b) Respective responsibilities of the directors and the auditors;
- (c) Basis of the auditors' opinion;
- (d) Whether proper books of account have been kept;
- (e) Compliance with the provisions of the Companies and Allied Matters Act, Cap. C 20 LFN 2004; and
- (f) Compliance with the statements of accounting standards issued by the Nigerian Accounting Standards Board.

The Companies and Allied Matters Act, CAP C20, LFN 2004 further provides that:

- (a) It shall be the duty of the company's auditors, in preparing their report to carry out such investigations as may enable them to form an opinion as to the following matters whether;

- (i) proper accounting records have been kept by the company and proper returns adequate for their audit have been received from branches not visited by them; and
  - (ii) the company's balance sheet and (if not consolidated) its profit and loss account are in agreement with the accounting records and returns.
- (b) If the auditors are of the opinion that proper accounting records have not been received from branches not visited by them, or if the balance sheet and (if not consolidated) the profit and loss account are not in agreement with the accounting records and returns, the auditors shall state that fact in their report.
- (c) Where certain requirements (i.e. Part V and VI of the Third Schedule and Parts I to III of the Fourth Schedule) of the Companies and Allied Matters Act are not complied with in the accounts, it shall be the auditors' duty to include such matters in their report, so far as they are reasonably able to do so, a statement giving the required particulars.
- (d) It shall be the auditors' duty to consider whether the information given in the directors' report for the year for which the accounts are prepared is consistent with those accounts; and if they are of opinion that it is not, they shall state that fact in their report, (Section 359).

### **Audit Committee**

The Companies and Allied Matters Act, CAP C20, LFN 2004 provides that:

- (a) In addition to the auditors report made to the members on the entity's financial statements, the auditor shall in the case of a public company also make a report to an audit committee which shall be established by the public company.
- (b) The audit committee shall consist of an equal number of directors and representatives of the shareholders of the company (subject to a maximum number of six members) and shall examine the auditors' report and make recommendations thereon to the annual general meeting as it may think fit, provided, however, that such member of the audit committee shall not be entitled to remuneration and shall be subject to re-election annually.
- (c) Any member may nominate a shareholder as a member of the audit committee by giving notice in writing of such nomination to the secretary of the company at least 21 days before the annual general meeting.
- (d) Subject to such other additional functions and powers that the company's articles of association may stipulate, the objectives and functions of the audit committee shall be to:
  - (i) ascertain whether the accounting and reporting policies of the company are in accordance with legal requirements and agreed ethical practices;
  - (ii) review the scope and planning of audit requirements;

- (iii) review the findings on management matters in conjunction with the external auditor and departmental responses thereon;
- (iv) keep under review the effectiveness of the company's system of accounting and internal control;
- (v) make recommendations to the Board with regard to the appointment, removal and remuneration of the external auditors of the company; and
- (vi) authorise the internal auditor to carry out investigations into any activities of the company which may be of interest or concern to the committee, (Section 359).

### **Auditors' Duties and Powers**

- (a) It shall be the duty of the company's auditors, in preparing their report to carry out such investigations as may enable them to form an opinion as to the following matters whether:
  - (i) proper accounting records have been kept by the company and proper returns adequate for their audit have been received from branches not visited by them; and
  - (ii) the company's balance sheet and (if not consolidated) its profit and loss account are in agreement with the accounting records and returns.
- (b) Every auditor of a company shall have a right of access at all times to the company's books, accounts and vouchers, and be entitled to require from the company's office such information and explanations as he thinks necessary for the performance of the auditor's duties.
- (c) It shall be the auditors' duty to consider whether the information given in the directors' report for the year for which the accounts are prepared is consistent with those accounts (Section 360).

### **Remuneration of Auditors**

- (a) The remuneration of the auditors of a company-
  - (i) in the case of an auditor appointed by the directors, may be fixed by the directors if the general meeting empowers the directors to do so; or
  - (ii) shall be fixed by the company in general meeting.
- (b) "Remuneration" includes sums paid by the company in respect of the auditors' expenses. (Section 361).

### **Removal of Auditors**

- (a) A company may by ordinary resolution remove an auditor before the expiration of his term of office, notwithstanding anything in any agreement between it and him.

Where a resolution removing an auditor is passed at a general meeting of a company, the company shall within 14 days give notice of that fact in the prescribed form to the Corporate Affairs Commission and if a

company fails to give the required notice the company and every officer of it who is in default shall be guilty of an offence and liable to a daily default fine of 100.

- (b) Nothing shall be taken as depriving the auditor removed of compensation or damages payable to him in respect of the termination of his appointment as auditor or of any appointment terminating with that as auditor. (Section 362).

### **Auditors' Right to Attend Company's Meetings**

- (a) A company's auditors shall be entitled to attend any general meeting of the company and to receive all notices of and other communications relating to any general meeting which a member of the company is entitled to receive and to be heard at any general meeting which they attend on any part of the business of the meeting which concerns them as auditor.
- (b) An auditor of a company who has been removed shall be entitled to attend:
  - (i) the general meeting at which his term of office would otherwise have expired; and
  - (ii) any general meeting at which it is proposed to fill the vacancy caused by his removal, and to receive all notices of, and other communications relating to, and such meeting which any member of the company is entitled to receive, and to be heard at any such meeting which he attends on any part of the business of the meeting which concerns him as former auditor of the company. (Section 363)

### **Supplementary provisions relating to auditors**

- (a) A special notice shall be required for a resolution at a general meeting of a company:
  - (i) appointing as auditor a person other than a retiring auditor;
  - (ii) filling a casual vacancy in the office of auditor;
  - (iii) re-appointing as auditor a retiring auditor who was appointed by the directors to fill a casual vacancy; and
  - (iv) removing an auditor before the expiration of his term of office.
- (b) On receipt of notice of such an intended resolution the company shall forthwith send a copy of it:
  - (i) to the person proposed to be appointed or removed, as the case may be;
  - (ii) to the retiring auditors; and
  - (iii) where the casual vacancy was caused by the resignation of an auditor who resigned.

- (c) Where notice is given of such a resolution the retiring auditor (or, as case may be, the auditor proposed to be removed) makes with respect to the intended resolution representations in writing to the company not exceeding a reasonable length, and requests their notification to members of the company, the company shall (unless the representations are received by it too late for it to do so:
  - (i) in any notice of the resolution given to members of the company, state the fact of the representations having been made; and
  - (ii) send a copy of the representations to every member of the company to whom notice of the meeting is or has been made;
- (d) If a copy of any such representations is not sent out as required because they were received too late or because of the company's default, the auditor may (without prejudice to his right to be heard orally) require that the representations shall be read out at the meeting; and
- (e) Copies of the representations need not be sent out and the representations need not be read out at the meeting if, on the application either of the company or of any other person claiming to be aggrieved, the court is satisfied that the rights conferred are being abused to secure needless publicity for defamatory matter; and the court may order the company's costs on the application to be paid in whole or in part by the auditor, notwithstanding that he is not a party to the application. (Section 364)

### **Resignation of Auditors**

- (a) An auditor of a company may resign his office by depositing a notice in writing to that effect at the company's registered office; and any such notice shall operate to bring his term of office to an end on the date of which the notice is deposited, or on such later date as may be specified in it.
- (b) An auditor's notice of resignation shall not be effective unless it contains either:
  - (i) a statement to the effect that there are no circumstances connected with his resignation which he considers should be brought to the notice of the members or creditors of the company; or
  - (ii) a statement of any such circumstances as are mentioned above.
- (c) Where a notice under this section is deposited at a company's registered office, the company shall within 14 days send a copy of the notice-
  - (i) to the Corporate Affairs Commission; and
  - (ii) if the notice contained a statement, to every person who is entitled to be sent copies of the financial statements.
- (d) The company or any person claiming to be aggrieved may, within 14 days of the receipt by the company of a notice containing a statement, apply to the court for an order.

- (e) If in such an application the court is satisfied that the auditor is using the notice to secure needless publicity for defamatory matter, it may, by order, direct that copies of the notice need not be sent out; and the court may further direct the company's costs on the application to be paid in whole or in part by the auditor, notwithstanding that he is not a party to the application.
- (f) The company shall, within 14 days of the court's decision, send to the persons mentioned:
  - (i) if the court makes an order a statement setting out the effect of the order; and
  - (ii) if not, a copy of the notice containing the statement.
- (g) If default is made in complying with certain provisions the company and every officer of it who is in default shall be guilty of an offence and liable to a daily default fine of 100. (Section 365)

### **Right of Resigning Auditor to Requisition for Company Meeting**

- (a) Where an auditor's notice of resignation contains a statement, there may be deposited with the notice a requisition signed by the auditor calling on the directors of the company forthwith to duly convene an extra-ordinary general meeting of the company for the purpose of receiving and considering such explanation of the circumstances connected with his resignation as he may wish to place before the meeting.
- (b) Where an auditor's notice of resignation contains such a statement, the auditor may request the company to circulate to its members before:
  - (i) the general meeting at which his term of office would otherwise have expired; or
  - (ii) any general meeting at which it is proposed to fill the vacancy caused by his resignation or convened on his requisition, a statement in writing (not exceeding a reasonable length) of the circumstances connected with his resignation.
- (c) If a resigning auditor requests the circulation of a statement the company shall (unless the statement is received by it too late for it to comply):
  - (i) in any notice of the meeting given to members of the company, state the fact of the statement having been made; and
  - (ii) send a copy of the statement to every member of the company to whom notice of the meeting is or has been sent.
- (d) If the directors do not within 21 days from the date of the deposit of a requisition under this section proceed duly to convene a meeting for a day not more than 28 days after the date on which the notice convening the meeting is given, every director who fails to take all reasonable steps to ensure that a meeting is convened as mentioned above shall be guilty of an offence and liable to a fine of 500.

- (e) If a copy of the statement is not sent out as required because it was received too late or because of the company's default, the auditor may (without prejudice to his right to be heard orally) require that the statement be read out at the meeting.
- (f) Copies of a statement need not be sent out and the statement need not be read out at the meeting if, on the application, either of the company or of any other person who claims to be aggrieved, the court is satisfied that the rights conferred are being abused to secure needless publicity for defamatory matter; and the court may order the company's costs on such an application to be paid in whole or in part by the auditor, notwithstanding that he is not a party to the application.
- (g) An auditor who has resigned his office shall be entitled to attend any such meeting and to receive all notices of and other communications relating to any such meeting which any member of the company is entitled to receive, and to be heard at any such meeting which concerns him as former auditor of the company. (Section 366).

#### **Powers of Auditors in Relation to Subsidiaries**

- (a) Where a company has a subsidiary, then-
  - (i) if the subsidiary is a body corporate incorporated in Nigeria it shall be the duty of the subsidiaries and its auditors to give the auditors of the holding company such information and explanation as those auditors may reasonably require for the purposes of their duties as auditors of the holding company;
  - (ii) in any other case, it shall be the duty of the holding company, if required by its auditors to do so, to take all such steps as are reasonably open to it to obtain from the subsidiary such information and explanation as are mentioned above.
- (b) if a subsidiary or holding company fails to comply with the provisions, the subsidiary or holding company, and every officer of it who is in default, shall be guilty of an offence and liable to a fine; and if an auditor fails without reasonable excuse to comply he shall be guilty of an offence and so liable. (Section 367).

#### **Liability of Auditors for Negligence**

- (a) A company's auditor shall in the performance of his duties, exercise all such care, diligence and skill as is reasonably necessary in each particular circumstance.
- (b) Where a company suffers loss or damage as a result of the failure of its auditor to discharge the fiduciary duty imposed on him the auditor shall be liable for negligence and the directors may institute an action for negligence against him in the court.
- (c) If the directors fail to institute an action against the auditor, any member may do so after the expiration of 30 days' notice to the company, of his intention to institute such action, (Section 368).

**False Statements to Auditors**

- (a) An officer of a company commits an offence if he knowingly or recklessly makes to a company's auditors a statement (whether written or oral) which:
  - (i) conveys or purports to convey to the auditors any such information or explanation which the auditors require, or are entitled to require, as auditors of the company; and
  - (ii) is misleading, false or deceptive in a material particular.
- (c) A person guilty of an offence shall be liable to imprisonment for one year or to a fine of ₦500 or both, (Section 369).

**2.2 BANKS AND OTHER FINANCIAL INSTITUTIONS ACT 25 OF 1991**

The Banks and Other Financial Institutions Act 1991 (BOFIA) regulates the operations of banks and other financial institutions in Nigeria.

**Publication of annual accounts of banks**

- (a) Subject to the prior approval in writing of the Central Bank, a bank, shall not later than four months after the end of its financial year:
  - (i) cause to be published in a daily newspaper printed in and circulating in Nigeria and approved by the Central Bank;
  - (ii) exhibit in a conspicuous position in each of its offices and branches in Nigeria; and
- (b) Forward to the Central Bank, copies of the bank's balance sheet and profit and loss account duly signed and containing the full and correct names of the directors of the bank.
- (c) Every published account of a bank shall disclose, in detail, penalties paid as a result of contravention of the provisions of this Act and provisions of any policy guidelines in force during the financial year in question and the auditor's report shall reflect such contravention;
- (d) The balance sheet and profit and loss account of a bank shall bear on their face the report of an approved auditor and shall contain statements on such matters as may be specified by the Bank, from time to time;
- (e) For the purpose of subsection (3) of this section, an "approved auditor" shall be an auditor approved for the purpose of section 29 of this Act; and
- (f) Any bank which fails to comply with any of the requirements of this section is in respect of each such failure guilty of an offence and liable on conviction to a fine of ₦10,000 each day during which the offence continues. (Section 27).

**Contents and form of accounts**

- (a) Every balance sheet and every profit and loss account of a bank shall give a true and fair view of the state of affairs of the bank as at the end of the reporting period;

- (b) Every balance sheet and every profit and loss account of a bank forwarded to the Bank shall comply with the requirements of any circular which has been issued by the Central Bank thereon; and
- (c) Any person being a director of any bank who fails to take all reasonable steps to secure compliance with any of the prescribed provisions in respect of any account is guilty of an offence and liable to pay to the Bank a fine of ₦1,000 or to imprisonment for five years or to both such fine and imprisonment. (Section 28).

### **Appointment, power and report of approved auditor**

- (a) Every bank shall appoint annually a person approved by the Central Bank, referred to as “approved auditor”, whose duties shall be to make to the shareholders a report upon the annual balance sheet and profit and loss account of the bank and every such report shall contain statements as to the matters and such other information as may be prescribed, from time to time, by the Central Bank;
- (b) For the purpose of this section, the approved auditor shall be an auditor who is:
  - (a) a member of one of the professional bodies recognised in Nigeria;
  - (b) approved by the Central Bank;
  - (c) resident in Nigeria; and
  - (d) carrying on in Nigeria professional practice as accountant and auditor.
- (c) Any person:
  - (i) having any interest in a bank otherwise than as a depositor;
  - (ii) who is a director, officer or agent of a bank;
  - (iii) which is a firm in which a director of a bank has any interest as partner or director;
  - (iv) who is indebted to a bank, shall not be eligible for appointment as the approved auditor for that bank; and
  - (v) a person appointed as such auditor who subsequently:
    - ◆ acquires such interest; or
    - ◆ becomes a director, officer or agent of the bank; or
    - ◆ becomes indebted to a partner in a firm in which a director of a bank is interested as partner or director, shall cease to be such auditor.
- (d) If any bank fails to appoint an approved auditor, the Central Bank shall appoint a suitable person for that purpose and shall fix the remuneration to be paid by the bank to such auditor;
- (e) Any approved auditor who acts in contravention of or fails deliberately or negligently to comply with any of the required provisions is guilty of an offence and liable on conviction to pay to the Central Bank a fine of not less than ₦200,000 and not exceeding ₦500,000;

- (f) The report of the approved auditor shall be read together with the report of the board of directors at the annual general meeting of the shareholders of the bank and two copies of each report with the auditor's analysis of bad and doubtful advances in a form specified, from time to time, by the Central Bank shall be sent to the Central Bank.
- (g) If an auditor appointed under this section, in the course of his duties as an auditor of a bank, is satisfied that:
  - (i) there has been a contravention of this Act, or that an offence under any other law has been committed by the bank or any other person; or
  - (ii) losses have been incurred by the bank which substantially reduce its capital funds; or
  - (iii) any irregularity which jeopardises the interest of depositors or creditors of the bank, or any other irregularity has occurred; or
  - (iv) he is unable to confirm that the claims of depositors or creditors are covered by the assets of the bank, and he shall immediately report the matter to the Central Bank.
- (h) The approved auditor shall forward to the Central Bank two copies of the domestic report on the bank's activities not later than three months after the end of the bank's financial year.
- (i) Any approved auditor who acts in contravention of or fails deliberately or negligently to comply with any of the required provisions is guilty of an offence and liable on conviction to a fine not exceeding 500,000 and where the approved auditor is a firm, the individual partner or partners shall in addition be liable on conviction to imprisonment for a term not exceeding five years and to the fine required to be paid by the firm.
- (j) The appointment of an approved auditor shall not be determined without prior approval of the Central Bank. (Section 29).

### **2.3 INSURANCE ACT 2007**

#### **Classification of insurance business**

- (a) The Act provides for two main classes of insurance as follows:
  - (i) Life insurance business; and
  - (ii) General insurance business.
- (b) In the case of life insurance, there shall be three categories:
  - (i) individual life insurance business;
  - (ii) group life insurance and pension business; and
  - (iii) health insurance business.
- (c) In the case of general insurance, there shall be eight categories:
  - (i) fire insurance business;
  - (ii) general accident insurance business;

- (iii) motor vehicle insurance business
- (iv) marine and aviation insurance business;
- (v) oil and gas insurance business;
- (vi) engineering insurance business;
- (vii) bonds credit guarantee and suretyship insurance business; and
- (viii) miscellaneous insurance business. (Section 2).

### **Minimum paid-up share capital**

No insurer shall carry on insurance in Nigeria unless the insurer has and maintained, while carrying on that business, a paid-up share capital of the following amounts as the case may require, in the case of:

- (a) Life insurance business, not less than ₦150,000,000;
- (b) General insurance, not less than ₦200,000,000;
- (c) Composite insurance business, not less than ₦350,000,000; or
- (d) Reinsurance business, not less than ₦350,000,000 (Section 9).

### **Records to be kept by insurer**

- (a) An insurer shall keep and maintain at its principal office the following-
  - (i) the Memorandum and Articles of Association or other evidence of the constitution of the insurer;
  - (ii) a record containing the names and addresses of the owners of the insurance business whether known as or called shareholders or otherwise;
- (b) the minutes of any meeting of the owners and of the policy-making executive (whether known as or called the Board of Directors or otherwise);
- (c) a register of all policies in which shall be entered in respect of every policy issued, the names and address of the policy-holder, the date when the policy was effected and a record of any transfer, assignment or nomination of which the insurer has notice;
- (d) a register of claims in which shall be entered every claim made together with the date of claim, the name and address of the claimant and the date on which the claim was settled, or in the case of a claim which is repudiated, the date of repudiation and the grounds for the rejection or in the case of litigation, the particulars of the litigation and the decision of the court in the matter;
- (e) a register of investment showing those which are attributable to the insurance funds and those which are not, and also any alteration in their values from time to time;
- (f) a register of its assets;
- (g) a register of reinsurance ceded in showing separately those ceded in Nigeria and those ceded outside Nigeria;
- (h) a cash book;
- (i) a current account book;
- (j) a register of open policies in respect of marine insurance transactions;
- (k) management report by external auditors; and

- (l) An insurer shall in respect of its life insurance business maintain and keep the following additional record, that is
  - (i) a register of assured under group policies;
  - (ii) a register of loans on policies;
  - (iii) a register of cash surrendered values; and
  - (iv) a register of lapsed and expired policies (Section 17).

### **Records to be Kept by Re-insurer**

- (a) A re-insurer shall keep and maintain at its principal office the following:
  - (i) the Memorandum and Articles of Association or other evidence of the constitution of the reinsure;
  - (ii) records containing the names and address of the owners of the re-insurer (whether known as or called shareholders or otherwise);
  - (iii) minutes of any meeting of the owners and of the policy-making executive (whether known as the Board of Directors or otherwise);
  - (iv) a register of all treaties, in which shall be entered in respect of every treaty issued, the name of the cedant, and the date when the treaty was effected;
  - (v) a register of all claims, in which shall be entered every claim made together with the date of claim, the name of the cedant or insured, their proportionate share and the date the claim is settled;
  - (vi) a register of events showing those which are attributable to the insurance funds and those which are not also any alteration in value from time to time;
  - (vii) a register of assets;
  - (viii) a register of business or retrocession, showing separately those ceded within and outside Nigeria;
  - (ix) a register of new and existing clients;
  - (x) a cash book; and
  - (xi) domestic or management report prepared by external auditors.
- (b) A life re-insurer shall keep the following additional records:
  - (i) a register of assured under group policies;
  - (ii) a register of cancelled, lapsed and expired policies; and
- (c) a register of claims showing the name of the cedant and when the claim is settled. (Section 18).

### **Separation of Accounts and Reserve Funds**

- (a) Where an insurer carries on the two classes of insurance business, all the receipts of each of those classes of insurance business shall be entered in a separate and distinct account and shall be carried to and form a separate insurance fund with the appropriate name so that in case of life insurance there shall be:
  - (i) the individual life insurance business fund;
  - (ii) the group life insurance business and pension fund; and
  - (iii) health insurance business.

- (b) Each insurance fund shall represent the liabilities in respect of all contracts of insurance of that particular class and shall consist:
  - (i) in the case of life insurance business, the life business funds shall be a sum not less than the mathematical reserve; and
  - (ii) in the case of general insurance business of the provisions for unexpired risk and provisions estimated to provide for the expenses of adjustment or settlement of such claims.
- (c) The insurance fund of each particular class shall:
  - (i) be absolutely the security of the policy holders of that class as though it belonged to an insurer carrying on other business than insurance business of that class;
  - (ii) not be liable for any contract of the insurer for which it would not have been liable had the business of the insurer been only that of particular insurance class; and
  - (iii) not be applied, directly or indirectly, for any purposes other than those of the class of business to which the fund is applicable. (Section 19).

#### **Provisions for Unexpired Risks and Claims**

- (a) An insurer shall in respect of its general business, establish and maintain the following provisions applicable in respect of each class of insurance business:
  - (i) provisions for unexpired risks which shall be calculated on a time apportionment basis of the risks accepted in the year;
  - (ii) provision for outstanding claims which shall be credited with an amount equal to the total estimated amount of all outstanding claims with a further amount representing 10 per centum of the estimated figure for outstanding claims in respect of claims incurred but not reported at the end of the year under review; and
  - (iii) provision for outstanding claims (Section 20).

#### **Contingency Reserves**

- (a) An insurer shall establish and maintain contingency reserves to cover fluctuations in securities and variation in statistical estimates.
- (b) The contingency reserves shall be credited with an amount not less than 3 per centum of the total premium or 20 per centum of the net profits (whichever is greater) and the amount shall accumulate until it reaches the amount of the minimum paid-up capital or 50 per centum of the net premiums (whichever is greater). (Section 21).

#### **Reserve for Life Insurance Business**

An insurer shall in respect of its life insurance business maintain the following reserve:

- (a) A general reserve fund which shall be credited with an amount equal to the net liabilities on policies in force at the time of the actuarial valuation

and an additional 25 per cent of net premium for every year between valuation date; and

- (b) A contingency reserve fund which shall be credited with an amount equal to 1 per cent of the gross premiums or 10 percent of the profits (whichever is greater) and accumulated until it reached the amount of the minimum paid-up capital. (Section 22).

### **Reserve of Re-insurers**

A re-insurer shall establish a general reserve fund which shall be credited with an amount:

- (a) Not less than 50 per centum of his insurer's gross profit for the year where the fund is less than the authorised capital of the insurer; and
- (b) Not less than 25 per centum of the re-insurer gross profit for the year where the fund is equal to or exceed the authorised capital of the re-insurer. (Section 23).

### **Solvency Margin**

- (a) An insurer shall in respect of its business other than its life insurance business, maintain at all times a margin of solvency being the excess of the value of its admissible assets in Nigeria over its liabilities in Nigeria consisting of:
  - (i) Provisions for unexpired risks;
  - (ii) Provision for outstanding claims;
  - (iii) Provisions for claims incurred but not yet reported; and
  - (iv) Funds to meet other liabilities.
- (b) The solvency margin referred to in subsection (1) of this section shall not be less than 15 per centum of the gross premium income less reinsurance premium paid out during the year review or the minimum paid-up capital which ever is greater;
- (c) For the purpose of calculating the solvency margin, all monies owned by policy holders, brokers or agents by way of premiums due to but not received by the insurer as at the end of the relevant year shall not count as admissible assets or be included in determining qualifying liabilities;
- (d) Any amount due as liability to re-insurers which are attributable to outstanding premium in respect of the current year excluded under the above shall be excluded from liabilities;
- (e) An auditor who audits a balance sheet profit and loss and revenue account of an insurer under section 28 of this Act shall insure a certification stating the extent to which the insurer has satisfied the margin of solvency required under this section;
- (f) If the Commission is not satisfied with a certification issued under this section, it may conduct an independent investigation on the matter with a view to determining what action to take against the insurer or the auditor;

- (g) Where an investigation conducted discloses a false certification by an auditor, the Commission may make a report on the auditor to the appropriate professional body for necessary disciplinary action;
- (h) Where an insurer or reinsurance company fails to account of its being insolvent, any auditor or official of the Commission who in the 3 previous years certifies the said company as being solvent shall be held liable;
- (i) In this section - “admissible assets” means assets designated as admissible assets consisting of the following:
  - (i) Cash and bank balance;
  - (ii) Quoted investment at market value;
  - (iii) Unquoted stock at cost;
  - (iv) Land and building;
  - (v) Furniture and fittings;
  - (vi) Office equipment;
  - (vii) Motor vehicles;
  - (viii) Prepaid expenses made to member of staff;
  - (ix) Amount due from retrocession;
  - (x) Staff loans and advance; and
  - (xi) Claims receivable. (Section 23).

### **Investment**

- (a) An insurer shall at all times in respect of the insurance transacted by it in Nigeria, invest and hold invested in Nigeria assets equivalent to not less than the amount of policy holder’s funds in such accounts of the insurer;
- (b) The policy-holder’s funds shall not be invested in property and securities except:
  - (i) shares of limited liability companies;
  - (ii) shares in other securities of a co-operative society registered under a law relating to co-operative societies;
  - (iii) loans to building societies approved by the Commission;
  - (iv) loans on real property, machinery and plant in Nigeria;
  - (v) loans on life policies within their surrender values;
  - (vi) cash deposit in or bills of exchange accepted by licensed banks; and
  - (vii) such investments as may be prescribed by the Commission.
- (c) No insurer shall:
  - (i) in respect of its general insurance business, invest more than 35 per centum of its assets as defined in subsection (1) of this section in real property; or
  - (ii) in contract of its life insurance business, invest more than 35 per centum of its assets as defined in subsection (1) of this section in real property.

- (d) An insurer which contravenes the provisions of this section commits an offence and is liable on conviction to a fine of ₦50,000. (Section 25).

**Statements of Accounts, etc.**

- (a) An insurer shall not later than 30 June of each year submit in writing to the Commission the following:
  - (i) a balance sheet duly audited showing the financial position of the insurance business of the insurer and its subsidiaries at the close of that year together with a copy of the relevant profit and loss account which the insurer is to present to its shareholders at its annual general meeting;
  - (ii) a revenue account applicable to each class of insurance business for which the insurer is required to keep separate account of receipts and payment; and
  - (iii) a statement of investments representing the insurance funds.
- (b) The returns and accounts required to be submitted under subsection (1) (a) and (b) of this section shall be in such form as may be approved by the Commission;
- (c) An insurer which fails, neglects or refuses to file the returns and accounts under this section commits an offence and is liable on conviction to a fine of ₦5,000 per day for each day of default.
- (d) An insurer shall in each year after receipt of the approval of the Commission, publish its general annual balance sheet together with its profit and loss accounts in at least one newspaper having wide circulation in Nigeria.
- (e) No insurer shall distribute any dividends until the Commission has approved the annual returns of the insurer within 30 days of its submission to the Commission. (Section 26).

**Life Insurance accounts**

- (a) An insurer transacting life insurance business shall submit to the Commission every three years in the prescribed form, the following:
  - (i) an abstract of the report if an actuary and valuation report of the life insurance business;
  - (ii) a summary and valuation of the life policies;
  - (iii) a table showing premium, policy reserve values and guaranteed surrender values together with the relationship between premium paid and such guaranteed surrender values; and
  - (iv) a certificate of solvency signed by an actuary stating that the value of the assets representing the funds maintained by the insurer in respect of the life insurance business exceeds the value of the liabilities.
- (b) The commission may require an insurer transacting business to:

- (i) cause the person who is for the time being the actuary of the insurer to make an investigation into its financial condition (including evaluation of its liabilities) in respect of that business as at a specified date;
  - (ii) cause an abstract of that person's report of the investigation to be made and submitted to it;
  - (iii) prepare and submit to it a statement of its life insurance business or part thereof as at the date of the request; and
  - (iv) show sufficient evidence that not more than 40 per centum of the actuarial surplus declared is appropriated for shareholders.
- (c) An insurer transacting life insurance shall at the expiration of each year:
  - (i) prepare with reference to that year in the prescribed form a statement and exhibit of the life policies; and
  - (ii) submit the statement and exhibit together with such other document and information relating to the relevant accounts and balance sheet (including copies of reports on the affairs of the insurer for the year as submitted to the policy-holders of the insurer as the Commission may from time to time require.
- (d) On receipt of the documents mentioned in subsections (2) and (3) of this section, the Commission shall, if it appears to it that the statement furnished by an insurer under any of those subsections is inaccurate or is prepared in the prescribed form, or is defective in any material particular:
  - (i) require from the insurer such further information as it may consider necessary;
  - (ii) call on the insurer to submit for its examination any book of account, register or any other document;
  - (iii) require the insurer to confirm on oath or by or a sworn declaration the authenticity of any statement submitted by the insurer;
  - (iv) refuse to approve the insurer's annual statement unless or until the inaccuracies have been supplied.
- (e) An insurer who fails, neglects or refuses to file the required returns or accounts under this section is guilty of an offence and liable on conviction to a fine of ₦5,000 per day for every day of default.
- (f) An insurer shall in each year after receipt of the approval of the Commission publish its general annual balance sheet together with its profit and loss account in at least one newspaper having wide circulation in Nigeria. (Section 27).

### **Audits**

- (a) The balance sheet profit and loss account and revenue account of an insurer in respect of the insurance business transacted by the insurer, shall be audited annually by an external auditor.

- (b) At the conclusion of the audit, the auditor shall issue certificate signed by him stating whether in his opinion:
  - (i) He has obtained adequate information from the books and records of the insurer;
  - (ii) The books of the insurer have been properly kept and the affairs and transactions of the insurer have been properly recorded;
  - (iii) The accounts and balance sheet of the insurer are in accordance with the information given to him for the purpose of his audit;
  - (iv) The accounts and balance sheet are in accordance with the applicable provisions of this Part of this Act; and
  - (v) The balance sheet of the insurer and the profit and loss account respectively gives a true and fair view of the financial position of the insurer. (Section 28).

### **Actuarial Valuation**

- (a) An insurer transacting life insurance business shall in respect of its life insurance business once in every period of three years, cause an investigation to be made into its financial position by an actuary appointed or secured by the insurer;
- (b) An investigation under subsection (1) of this section shall include:
  - (i) a valuation of the assets and liabilities of the insurer; and
  - (ii) a determination of any excess over those liabilities of the assets representing the funds maintained by the insurer.
- (c) For the purpose of an investigation under this section, the value of any asset and the amount of liability shall be determined in accordance with applicable valuation regulations. (Section 29).

## **2.4 PENSION REFORM ACT, 2004**

### **Objective of the Act**

The objectives of the Scheme shall be to:

- (a) ensure that every person who worked in either the Public Service of the Federation, Federal Capital Territory or Private Sector receives his retirement benefits as and when due;
- (b) assist improvident individuals by ensuring that they save in order to cater for their livelihood during old age; and
- (c) establish a uniform set of rules, regulations and standards for the administration and payments of retirement benefits for the Public Service of the Federation, Federal Capital Territory and the Private Sector.

### **Establishment of the Commission**

There is established a body to be known as the National Pension Commission. The Commission:

- (a) shall be a body corporate with perpetual succession and a common seal; and
- (b) may sue and be sued in its corporate name.

The Commission may acquire, hold or dispose of any moveable or immoveable property for the purpose of its function.

### **Objectives of the Commission**

The principal object of the Commission shall be to regulate, supervise and ensure the effective administration of pension matters in Nigeria.

### **Composition of the Commission**

The Commission shall consist of:

- (a) a part-time chairman who shall possess a university degree or its equivalence with not less than 20 years experience;
- (b) a Director-General who shall:
  - (i) be the Chief Executive Officer responsible for the day-to-day administration of the Commission;
  - (ii) possess professional skill and with not less than twenty years cognate experience relating to pension matters and or Insurance. Actuarial Science or other related field; and
  - (iii) be a fit and proper person;
- (c) four full-time Commissioners who shall each:
  - (i) possess professional and cognate experience in Finance and Investment, or Accounting or Pension Management or Actuarial Science or Business Administration or other related field; and
  - (ii) be fit and proper persons,
- (d) part -time members of the Commission who shall be representatives each of:
  - (i) The Head of the Civil Service of the Federation,
  - (ii) The Federal Ministry of Finance,
  - (iii) The Nigeria Labour Congress,
  - (iv) The Nigeria Union of Pensioners,
  - (v) The Nigeria Employers' Consultative Association,
  - (vi) The Central Bank of Nigeria; and
  - (vii) the Securities and Exchange Commission.

There shall be 4 specialised departments of the Commission, namely:

- (a) Technical;
- (b) Administration;
- (c) Inspectorate; and
- (d) Finance and Investment to be headed by 4 Commissioners.

The Chairman, the Director-General and other members of the Commission other than ex-officio members shall be appointed by the President, one each from the six geo-political zones of Nigeria, subject to the confirmation of the Senate.

The Commission's Secretary and Legal Adviser shall be appointed by the Commission and his terms of employment shall be as stipulated by the Commission.

The Chairman, the Director-General and the Commissioners shall hold office for a term of 4 years and may be re-appointed a further term of 4 years. In the event of a vacancy, the President shall appoint a new member from the appropriate zone to complete the tenure of his successor.

### **Functions and Powers of the Commission**

The Commission shall:

- (a) regulate and supervise the Scheme established under this Act;
- (b) issue guidelines for the investment of pension funds;
- (c) approve, licence, regulate and supervise pension fund administrators, custodians and other institutions relating to pension matters as the Commission may, from time to time, determine;
- (d) establish standards, rules and guidelines for the management of the pension funds under this Act;
- (e) ensure the maintenance of a National Data Bank on all pension matters;
- (f) carry out public awareness and education on the establishment and management of the Scheme;
- (g) promote capacity building and institutional strengthening of pension fund administrators and custodians;
- (h) receive and investigate complaints of impropriety levelled against any pension fund administrator, custodian or employer or any of their staff or agent; and
- (i) perform such other duties which, in the opinion of the Commission, are necessary or expedient for the discharge of its functions under this Act.

The Commission shall have the power to:

- (a) formulate, direct and oversee, the overall policy on pension matters in Nigeria;
- (b) fix the terms and conditions of service including remuneration of the employees of the Commission;
- (c) request or call for information from any employer or pension administrator or custodian or any other person or institution on matters relating to retirement benefit;
- (d) charge and collect such fees, levy or penalties, as may be specified by the Commission;
- (e) establish and acquire offices and other premises for the use of the Commission in such locations as it may deem necessary, for the proper performance of its functions under this Act;
- (f) establish standards, rules and regulations for the management of the pension funds under this Act;
- (g) investigate any pension fund administrator, custodian or other party involved in the management of pension funds;
- (h) impose administrative sanctions or fines on erring employers or pension fund administrators or custodians;
- (i) order the transfer of management or custody, of all pension funds or assets being managed by a pension fund administrator, or held by a

custodian whose licence has been revoked under this Act, or subject to insolvency proceedings to another pension fund administrator or custodian, as the case may be; and

- (j) do such other things which in its opinion are necessary to ensure, the efficient performance of the functions of the Commission under this Act.

### **Funds of the Commission**

The Commission shall establish and maintain a fund from which all its expenses will be defrayed. The fund established shall consist of:

- (a) the initial take-off grant from the Federal Government;
- (b) annual subvention from the Federal Government;
- (c) fees, fines and commissions charged by the Commission;
- (d) income from any investments of the Commission; and
- (e) all sums of money or income accruing to the Commission by way of testamentary dispositions and endowments.

### **Estimates, Accounts and Audit of the Commission**

The Commission shall cause to be prepared, not later than the thirtieth day of September in each year, an estimate of its income and of expenditure for the succeeding year.

The Commission shall cause to be kept proper accounts and records in relation thereto. Such account shall, not later than 4 months after the end of each year, be audited by auditors appointed by the Commission from the list and in accordance with the guidelines supplied by the Auditor-General for the Federation.

The Commission shall not later than 6 months after the end of each year submit to the President and the Public Account Committee of the National Assembly a report on the activities and administration of the Commission during the immediately preceding year and shall include in such report the audited accounts of the Commission and the auditors report thereon.

## **2.5 NIGERIAN ACCOUNTING STANDARDS BOARD ACT 2003**

### **Establishment of the Nigerian Accounting Standards Board**

The Nigerian Accounting Standards Board Act, 2003 states as follows:

There is established a Board to be known as the Nigerian Accounting Standards Board. The Board shall be:

- (a) a body corporate with perpetual succession and a common seal; and
- (b) may sue and be sued in its corporate name.

The Board may acquire, hold or dispose any property movable or immovable for the purpose of carrying out its functions.

### **Membership of the Board**

There is established for the Board, a Governing Council which shall have overall control of the Board.

The Council shall consist of:

- (a) a Chairman who shall be a professional accountant with considerable professional experience in accounting practices;
- (b) two representatives each of the following:
  - (i) Institute of Chartered Accountants of Nigeria; and
  - (ii) Association of National Accountants of Nigeria
- (c) a representative each of the following:
  - (i) Federal Ministry of Commerce;
  - (ii) Federal Ministry of Finance;
  - (iii) Central Bank of Nigeria
  - (iv) Corporate Affairs Commission;
  - (v) Federal Inland Revenue Service;
  - (vi) Nigeria Deposit Insurance Corporation;
  - (vii) Securities and Exchange Commission;
  - (viii) Auditor-General for the Federation;
  - (ix) Accountant-General of the Federation;
  - (x) Chartered Institute of Taxation of Nigeria;
  - (xi) Nigerian Association of Chambers of Commerce, Industries, Mines and Agriculture.
- (d) the Executive Secretary of the Board

The Chairman and other members of the Council, other than ex-officio members, shall be appointed by the President, on the recommendation of the Minister.

The Chairman and other members of the Council, other than ex-officio members shall each hold office:

- (a) for a term of 4 years in the first instance and may be reappointed for a further term of 4 and no more; and
- (b) on such terms and conditions as may be specified in their letters of appointment.

### **Functions of the Board**

The Board shall:

- (a) develop and publish in the public interest accounting standards to be observed in the preparation of financial statements;
- (b) promote the general acceptance and adoption of such standards by preparers and users of financial statements;
- (c) promote and enforce compliance with the accounting standards developed or reviewed by the Board;
- (d) review from time-to-time the accounting standards developed in line with the prevalent social, economic and political environment;
- (e) receive from time to time notices of non-compliance with its standards from the prepare, user or auditor of an account;
- (f) receive copies of all qualified reports together with detailed explanations for such qualifications from auditors of the accounts within a period of 60 days from the date of such qualification;

- (g) advise the Minister on the making of regulations under Section 356 of the Companies and Allied Matters Act, Cap. C 20, LFN 2004;
- (h) advise the Federal Government on matters relating to accounting standards; and
- (i) perform such other duties which in the opinion of the Council, are necessary or expedient to ensure the efficient performance of the functions of the Board under the Act.

### **Powers of the Board**

The Board shall have powers to:

- (a) identify accounting statements which require standardisation and establish the order of priority for addressing them;
- (b) determine the scope and objectives of each standards;
- (c) prescribe the methods and procedure for the productions of standards;
- (d) prescribe the time table for the production of each standards;
- (e) approve discussion papers, exposure drafts and standards;
- (f) enforce and approve enforcement of compliance with accounting standards in Nigeria; and
- (g) exercise such powers as are necessary or expedient for giving effect to the provisions of this Act.

### **Development of Statements of Accounting Standards**

The Board shall observe the following procedure in the development of statement of accounting standards:

- (a) choice of a topic for standardisation;
- (b) prepare and publish exposure draft;
- (c) conduct a public hearing where necessary; and
- (d) issue a statement of accounting standards.

Know the instruments establishing various organisations such as SEC, NDIC, etc.

### **The Nigerian Accounting Standards Board (NASB)**

Section 344 of Companies and Allied Matters Act, CAP C20, 2004 provides that the directors of every company shall in respect of each year of the company; prepare financial statements for the year to contain the necessary details as provided in the Act.

Section 355 (1) CAMA states as follows:” The Financial statements of a company prepared under section 344 of the Act, shall comply with the requirements of schedule 2 to the Act with respect to their form and content, and with the accounting standards laid down in the Statements of Accounting Standards issued from time to time by the Nigerian Accounting Standards Board to be constituted by the Minister after due consultation with such accounting bodies as he may deem fit in the circumstances for this purpose provided that such accounting standards do not conflict with the provisions of this Act”

Following the above provision, the Nigerian Accounting Standards Board (NASB) was reconstituted with the following members:

- (a) Central Bank of Nigeria (CBN);
- (b) Federal Ministry of Finance;
- (c) Nigerian Accounting Teachers Association;
- (d) Nigeria Association of Chambers of Commerce, Industry, Mines and Agriculture;
- (e) Nigeria Stock Exchange;
- (f) Securities and Exchange Commission;
- (g) The Chartered Institute of Bankers of Nigeria;
- (h) Federal Ministry of Commerce and Tourism;
- (i) Federal Inland Revenue Service Board;
- (j) Nigeria Deposit Insurance Corporation;
- (k) The Office of the Auditor-General for the Federal;
- (l) Corporate Affairs Commission;
- (m) The Institute of Chartered Accountants of Nigeria;
- (n) Chartered Institute of Taxation of Nigeria; and
- (o) Association of National Accountants of Nigeria.

The Board from time to time issues Statements of Accounting Standards (SAS) which seek to provide a guide for accounting policies and accounting methods that should be followed by companies in the preparation of their financial statements relative to income recognition, loss recognition, balance sheet classification and many other provisions. The Board since inauguration has issued twenty-one consecutive Statements of Accounting Standards (SAS) to date.

The Nigerian Accounting Standards Board (NASB) is charged with the responsibility for developing and publishing accounting standards to be observed in the preparation of financial statements in Nigeria. The Companies and Allied Matters Act makes it mandatory for auditors to ensure that financial statements prepared in Nigeria comply with accounting standards issued by the NASB.

The Nigerian Accounting Standards Board Act 2003 further seeks to promote and enforce compliance with the accounting standards to be observed in the preparation of financial statements. NASB Act 2003 prescribes stiff penalties for non-compliance with accounting standards issued by the NASB. These include:

- (a) Fines at the discretion of the Board
- (b) ₦5 million fine
- (c) One year imprisonment, or both, on conviction
- (d) Proscription or de-listing of the firm of accountants.

## 2.6 SECURITIES AND EXCHANGE COMMISSION (SEC)

In 1962, a year after the establishment of the Lagos Stock Exchange, an ad-hoc consultative and advisory body known as the Capital Issues Committee was established under the aegis of the Central Bank of Nigeria (CBN). Its mandate was to examine applications from companies seeking to raise capital from the market and to recommend the timing of such issues. The Committee, however, had no legal backing, but operated non-officially as a capital market consultative and advisory body within the Central Bank of Nigeria.

An increase in the level of economic activities, and consequently capital market activities after cessation of the civil war hostilities, coupled with the promulgation of the Nigerian Enterprises Promotion Decree in 1972, necessitated the creation of another body, the Capital Issues Commission in March, 1973 to take over the activities of the Capital Issues Committee.

The new body statutorily backed by the Capital Issues Commission Decree of 1973 which established a board of nine members, including a representative of the Central Bank of Nigeria, serving as Chairman, while the other eight members were drawn from some Federal Ministries, the industrial and finance sectors.

Following the acceptance of the recommendations of the Financial System Reviewing Committee in 1976, the Federal Government endorsed the establishment of the Securities and Exchange Commission to supersede the Capital Issues Commission. Consequently, the Securities and Exchange Commission Decree No. 71 of 1979 was promulgated, effective retrospectively from April 1, 1978, thus establishing the Commission and vesting wider power on it to regulate and develop the Nigerian capital market, in addition to determining the prices of issues and setting the basis of allotment of securities. Unlike its two predecessors, the Commission at this stage was excised from the CBN, although it continued to receive further funding from the apex bank. It also had an enlarged 12-member board with a CBN representative as its Chairman. Other members were drawn from the Ministries of Finance, Trade and Industries, The Nigerian Stock Exchange and the Nigerian Enterprises Promotion Board; other members were nominated on basis of personal merit.

The Commission, however, took off effectively on January 1, 1980 with a staff of fifty one; seven of them were on secondment (for a period of three years) from the Central Bank of Nigeria (CBN), while others were newly recruited. Nine years after the establishment of the Securities and Exchange Commission, the enabling law, Decree No. 7 of 1979 was re-enacted as Securities and Exchange Commission Decree No. 29 of 1988 with additional provisions to address observed lapses in the previous arrangement and to enable the Commission pursue its functions more effectively.

To further enhance the Commission's pursuit of its objects of investor protection and capital market, another review was carried out in 1996 by a 7-man panel

headed by Chief Dennis Odife. A new Act known as “The Investment and Securities Act No. 45 of 1999” was promulgated on May 26, 1999 based on the panel’s recommendations. The Act repealed the SEC Act of 1988. The new Act is expected to promote a more efficient and virile capital market, pivotal to meeting the nation’s economic and developmental aspirations.

Part II Section 8 of the Act stipulated twenty five functions in the previous Act. New roles were added to the existing roles of the Securities and Exchange Commission. Among the various new roles of the Commission are to:

- (a) Register and regulate Securities Exchange; Capital Trade Points; Futures, Options and Derivatives Exchanges; Commodity Exchanges and any other recognised Investment Exchange;
- (b) Prepare adequate guidelines and organised training programmes and disseminate information necessary for the establishment of securities exchange and capital trade points;
- (c) Funds, Capital Trade Points, Futures, Options and Derivatives as well as other intermediaries and self-regulatory organisations in the securities industry;
- (d) Keep and maintain separate registers of foreign direct investment and foreign portfolio investments;
- (e) Promote investors’ education and the training of categories of intermediaries in the security industry. In addition, the Act empowers the Commission to establish specialised departments for the purpose of regulating:
  - (i) Securities Exchange; Capital Trade Points; Options and Commodity Exchange;
  - (ii) Capital market operators including corporate members securities exchange and individuals; professional firms, that is, accountants, solicitors, surveyors, engineers and other professionals who undertake investment business either as investment advisers or consultants;
  - (iii) Collective investments including all collective investment schemes such as unit trusts, esusu schemes, pension funds and other such schemes; and
  - (iv) Mergers, acquisitions, takeover and other forms of business combinations under the Act.

Another major new provision is the establishment of Investors’ Protection Fund. The Act provides that a Securities Exchange or Capital Trade Point shall establish and maintain the fund to be administered by their individual governing councils respectively.

The Securities and Exchange Commission is also a member of International Organisation of Securities Commission (IOSCO).

## 2.7 NIGERIA DEPOSIT INSURANCE CORPORATION

The Nigeria Deposit Insurance Corporation (NDIC), was established as part of the reform measures taken to strengthen the safety net for the banking sector following the introduction in 1986 of a major economic reform programme, the Structural Adjustment Programme (SAP) by government to correct the observed imbalances in the economy. The establishment of NDIC became imperative given the rapid growth in the number of licensed banks in the late 80s' and early 90s' and the financial sector reforms that subsequently followed the Structural Adjustment Programme.

In addition to this, there was also the long-term need to create and sustain an enabling environment that will engender banking stability by protecting the banking sector against destructive runs, protecting bank depositors and to ensure fair play amongst the competing banks. These considerations were informed by the lessons of history of bank failures in Nigeria in the 50s, the experience of other countries where deposit insurance schemes are being operated and the prevailing distressed financial conditions of the banks in particular and other financial intermediaries in the financial sector in general, among others. The NDIC was formally established by Decree No. 22 of 1988 and commenced operations in 1989.

Section 5 of the Decree No 22 of 1988 establishing NDIC provides the following functions for the Corporation:

- (a) Insuring all deposit liabilities of licensed banks and such other financial institutions operating in Nigeria within the meaning of sections 20 and 26 of this Decree so as to engender confidence in the Nigerian Banking system;
- (b) Giving assistance in the interest of depositors, in case of imminent or actual financial difficulties of banks particularly where suspension of payments is threatened: and avoiding damage to public confidence in the banking system;
- (c) Guaranteeing payments to depositors, in case of imminent or actual suspension of payments by insured banks or financial institutions up to the maximum amount as provided for in section 26 of this Decree;
- (d) Assisting monetary authorities in the formulation and implementation of banking policy so as to ensure sound banking practice and fair competition among banks in the country;
- (e) Pursuing any other measures necessary to achieve the functions of the Corporation provided such measures and actions are not repugnant to the functions of the Corporation.

## 2.8 CENTRAL BANK OF NIGERIA

The Central Bank of Nigeria Act of 1991 provides for the continuance of the Central Bank of Nigeria (CBN) and its overall control and administration of the monetary and banking policies of the Federal Government of Nigeria both within and outside Nigeria. It simply establishes the Central Bank of Nigeria as the Apex Financial Regulatory Institution in Nigeria.

### **Principal objects of the Central Bank**

The principal objects of the Central Bank are:

- (a) Issue legal tender currency in Nigeria;
- (b) Maintain external reserves to safeguard the international value of the legal tender currency;
- (c) Promote monetary stability and a sound financial system in Nigeria; and
- (d) Act as banker and financial adviser to the Federal Government.

The Central Bank has powers to:

- (a) Issue demand drafts;
- (b) Purchase and sell gold coins or bullion;
- (c) Open accounts for and accept deposits from Federal, State and local governments and parastatals;
- (d) Purchase, sell, discount and rediscount inland bills of exchange and promissory notes;
- (e) Purchase, sell, discount and rediscount treasury bills, treasury certificates and project-tied bonds issued by State Governments, local governments and parastatals;
- (f) Purchase and sell securities of the Federal Government;
- (g) Grant advances for fixed deposits not exceeding three months against publicly issued treasury bills;
- (h) Determine exchange rate of the Naira;
- (i) Sole right of issuing notes and coins;
- (j) Power to print notes and mint coins;
- (k) Denominate currency notes and coins;
- (l) Buy and sell Nigerian currency;
- (m) Maintain accounts with central banks and other banks outside Nigeria
- (n) Act as correspondent, banker or agent for any central bank or other monetary authority;
- (o) Promote the establishment of bank clearing systems;
- (p) Grant temporary advances to commercial banks;
- (q) Act as clearing house for banks to facilitate the clearing of cheques and credit instruments;
- (r) Banker to other bankers;
- (s) Carry out open market operations for the purpose of maintaining monetary stability in the Nigerian economy;
- (t) Sell or place by allocation to each bank any stabilisation securities issued;
- (u) Issue and manage Federal Government loans;
- (v) Act as banker to State and local governments;
- (w) Power to issue directives on cash reserves; and
- (x) Publish minimum re-discount rate

### **Prohibited Activities**

The Central Bank shall not:

- (a) Engage in trade or otherwise have a direct interest in any commercial, agricultural or industrial undertaking except for the purpose of its business, provided that all such interest so acquired shall be disposed of at the earliest suitable time;
- (b) Grant loan upon the security of any shares;
- (c) Purchase, acquire or lease real property except for the provision of business premises for the Central Bank and its agencies and residences for the Governor, Deputy Governors and officers and other employees of the Central Bank;
- (d) Draw or accept bills payable otherwise than on demand;
- (e) Pay interest on deposits except deposits in respect of cash reserve and special deposits made by various banks to the Central Bank, to maintain the required ratio of the deposit liabilities;
- (f) Accept for discount or as security for an advance made by the Central bills or notes signed by members of the Board or by officers and other employees of the Bank; and
- (g) Open accounts for or accept deposits from persons other than Federal, State, local governments, institutions and corporations of all such governments, banks and other credit or financial institutions, central banks and other banks outside Nigeria.

### **Audit**

The accounts of the Central Bank shall be audited by an auditor or auditors appointed by the Board.

- (a) The President may direct that the Auditor-General of the Federation to conduct an examination of the accounts of the Central Bank.
- (b) Publication of annual accounts and reports:  
The Central Bank shall within two months after the close of each financial year, transmit to the President a copy of its annual accounts certified by the auditor.
- (c) The Central Bank shall within four months from the close of each financial year, submit to the President a report on its operations during the year.
- (d) Any report required to be submitted to the President shall be published by the Central Bank in such a manner as the Governor of Central Bank may direct.
- (e) The Board of Central Bank shall ensure that accounts submitted be published in the Gazette.
- (f) The Central bank shall publish a monthly return of its assets and liabilities.
- (g) A copy of the return shall be forwarded to the President and shall be published in the Gazette.
- (h) The gold tranche position at the International Monetary Fund shall form part of the external reserve assets of the Bank.

**Exemption from Stamp Duty**

The Central Bank shall not be liable for the payment of any stamp duty under the Stamp Duties Act in respect of its notes issued as currency.

**Exemption from Income Tax**

The Central Bank of Nigeria shall be exempted from the payment of tax under the Companies Income Tax Act.

**Exemption from Companies and Allied Matters Act**

The provisions of the Companies and Allied Matters Act shall not apply to the Central Bank.

## **2.9 BUREAU OF PUBLIC ENTERPRISES**

The Bureau of Public Enterprises (BPE) is the Secretariat of the National Council on Privatisation (NCP) and is charged with the overall responsibility of implementing the policies and decisions of the Council. The functions of the Bureau as provided for in the Act include:

- (a) Implementing the Council's policy on privatisation and commercialisation;
- (b) Preparing public enterprises approved by the Council for privatisation and commercialisation;
- (c) Advising Council on further public enterprises that may be privatised or commercialised;
- (d) Advising Council on capital restructuring needs of the public enterprises to be privatised;
- (e) Ensuring the update of accounts of all commercialised enterprises for financial discipline;
- (f) Making recommendations to the Council on the appointment of Consultants, advisers, investment bankers, issuing houses stockbrokers, solicitors, trustees, accountants and other professionals required for the purpose of either privatisation or commercialisation;
- (g) Ensuring the success of the privatisation and commercialisation exercise through effective post transactional performance monitoring and evaluation; and
- (h) Providing secretarial support to the Council and carrying out such other duties and responsibilities as may be assigned to it from time to time by the Council and its committees.

**The Rationale**

Experience worldwide has shown that Public Enterprises have failed to live up to expectations. They tend to consume a large proportion of national resources without discharging the responsibilities thrust upon them. More importantly, they fail to allocate these resources efficiently. Public enterprises consume about ₦200 billion of national resources annually, by way of grants, subsidies, import duty waivers, tax exemptions, and the like.

The current move towards economic liberalisation, competition and privatisation is partly informed by the gross failure of public enterprises to live up to expectation. In the case of Nigeria, it is clear that Nigeria cannot afford to spend or subsidise a few public enterprises with resources equal to more than twice the nation's capital expenditure budget.

Furthermore, donors and creditors expect Nigeria to direct her scarce resources to alleviate poverty through investment in health, education and rural development - social programmes that will benefit millions of Nigerians. There is virtually no public enterprise in Nigeria today that functions well.

While they were created to alleviate the shortcomings of the private sector and spearhead the development of Nigeria, many of them have stifled entrepreneurial development and fostered economic stagnation. NITEL, NEPA and the Nigerian National Petroleum Corporation (NNPC) are the best examples of these. Public enterprises have served as platforms for patronage and the promotion of political objectives, and consequently suffer from operational interference by civil servants and political appointees.

Public Commissions and Study Groups have undertaken various studies on the performance of public enterprises in Nigeria. Adebo (1969), Udoji (1973), Onosode (1981) and Al-Hakim (1984) chaired these commissions.

The findings of the studies were consistent in establishing that public enterprises were infested with problems such as:

- (a) Abuse of monopoly powers;
- (b) Defective capital structures resulting in heavy dependence on the treasury for funding;
- (c) Bureaucratic bottlenecks;
- (d) Mismanagement;
- (e) Corruption; and
- (f) Nepotism.

The scope of the Privatisation Programme, which commenced in 1999, includes the partial or total divestment of the shares owned by the Federal Government, its parastatals and other agencies in public enterprises active or dominant in at least thirteen key sectors. The cumulative value of investment to be transferred from the public sector is in excess of \$100 billion.

Clearly then, there is abundant evidence that public enterprises have not served their customers, their employees, or the taxpayers well. The simple fact is that when the government owns, nobody owns; and when nobody owns, nobody cares. The experience in the last thirty years has been one in which the public enterprises have:

- (a) Created economic inefficiency;
- (b) Incurred huge financial losses;
- (c) Absorbed disproportionate share of credit especially in the form of Paris and London club loans, as well as domestic loans and advances; and
- (d) Contributed to consistent fiscal deficits.

Over time, political and personal considerations have proved to be significant influences on numerous public enterprises policy matters (including investment, tendering, pricing, choice of machinery, employment levels, and management appointments). All have been unsustainable, and achieved at significant cost to the Treasury.

The benefits of privatisation are immense, and the sooner these are realised, the better. Privatisation, in whatever forms chosen, will:

- (a) Reduce corruption;
- (b) Modernise technology;
- (c) Strengthen domestic capital markets;
- (d) Dismantle monopolies and open markets;
- (e) Promote efficiency and better management;
- (f) Reduce debt burden and fiscal deficits;
- (g) Resolve massive pension funding problems;
- (h) Broaden base of ownership;
- (i) Generate funds for the Treasury;
- (j) Promote corporate governance;
- (k) Attract foreign investment; and
- (l) Reverse capital flight.

## 2.10 PROFESSIONAL PRONOUNCEMENTS AND THEIR APPLICATIONS

Guidelines and standards of the Institute and other International Bodies.

### **Ethics**

- (a) Ethics refers to a system or code of conduct based on moral duties, values and obligations that indicates how we should behave within a constituted body or society.
- (b) Professionalism refers to the conduct, aims, or qualities that characterise or mark a profession or professional person in the context of the professional body to which the person belongs.
- (c) Without independence, the user will place little reliance on the report of the auditors.

### **Code of Ethics Issued by the Institute of Chartered Accountants of Nigeria**

In Nigeria, the auditor must comply with the 'Rules of Professional Conduct for Members' issued by the Institute of Chartered Accountants of Nigeria and accounting standards issued by the Nigerian Accounting Standards Board. The Ethical Code covers the following matters:

- (a) fundamental principles;
- (b) integrity, objectivity and independence;
- (c) conflicts of interest;
- (d) confidentiality;
- (e) changes in professional appointment;
- (f) consultancy;

- (g) association with non-members;
- (h) fees;
- (i) obtaining professional work;
- (j) the names and letterheads of practicing firms;
- (k) second and other opinions;
- (l) members in business; and
- (m) enforcement of ethical standards.

### **Professional conduct for the members of the Institute of Chartered Accountants of Nigeria**

The following guidelines on professional conduct are issued by the Institute to guide its members in the efficient discharge of their professional duties. The contents of the 'Rules of Professional Conduct for Members' serve as a guide to members of the Institute which require strict observance of these rules of conduct as condition for its membership. If a member cannot find the guidance he or she requires either in the Institute of Chartered Accountants of Nigeria Act, in the Rules and Regulations of the Institute or in official statements by the Council he or she is always free to seek further advice through the Registrar/Chief Executive of the Institute. The decision as to whether or not a particular situation constitutes a breach lies entirely with the Investigating Panel, after due consideration of representation(s) if any by the member committing the alleged breach. The Accountants' Disciplinary Tribunal deals with deserving cases recommended by the Investigating Panel.

### **Fundamental principles**

- (a) A member should behave with integrity in all professional and business relationships. Integrity implies not mere honesty but fair dealing and truthfulness;
- (b) A member should strive for objectivity in all professional and business judgements. Objectivity is the state of mind which has regard to all considerations relevant to the task in hand but no other;
- (c) A member should not accept or perform work which he or she is not competent to undertake unless he or she obtains such advice and assistance as will enable him or her competently carry out the work;
- (d) A member should carry out his or her professional work with due skill, care, diligence and expedition and with proper regard for technical and professional standards expected of him or her as a member; and
- (e) A member should conduct himself or herself with courtesy and consideration towards all with whom he comes into contact during the course of performing his or her work.

### **Integrity, Objectivity and Independence**

- (a) Integrity: A member should behave with integrity in all professional, business and financial relationships. Integrity implies not mere honesty but fair dealing and truthfulness.

- (b) **Objectivity:** Objectivity is essential for any professional person exercising professional judgement. It is as essential for members in business as for practicing members. Objectivity is the state of mind which has regard to all considerations relevant to the task in hand but no other. It is sometimes described as 'independence of mind'. The need for objectivity is particularly evident in the case of a practicing accountant carrying out an audit or some other reporting role where his or her professional opinion is likely to affect rights between parties and the decisions they take.
- (c) **Independence:** A member must exercise objectivity and independence required of an auditor. He or she must have both independence of mind and independence in appearance.
- (d) An accountant should always act with integrity, honesty and probity, and maintain a professional attitude in the performance of his responsibilities. He should, if in public practice, not follow any other occupation which is inconsistent with his professional duties.
- (g) A member should exercise his profession with independence and objectivity. He must be in a position to give an honest and unbiased opinion. Under no circumstances must a member knowingly allow his name to be associated with a financial statement that is misleading. Pursuant to the above and, in order to exercise his independence, an accountant, in public practice, must not:
  - (i) possess any direct and/or indirect beneficial interest in any Company for which he or his firm acts as auditors;
  - (ii) accept fees, the amount of which is based on the success of an assignment, except where this cannot be avoided because of legislation or agreement to which he is not a party;
  - (iii) accept fees, the amount of which is based on the turnover of the company for which he is acting as auditor;
  - (iv) act for any two opposing parties in respect of a negotiation, claim or settlement unless appointed as an arbitrator under due process of law;
  - (v) carry out the work as an auditor concurrently with carrying out work for the client in an executive capacity.

**Note:** "Indirect beneficial interest" means interest through a nominee.

### **Conflicts of Interest**

- (a) A member should not accept or continue an engagement in which there is or likely to be a significant conflict of interests between the firm and its client.
- (b) There is, on the face of it, nothing improper in a firm having two or more clients whose interests may be in conflict. In such a case, however, the work of the firm should be so managed as to avoid the interests of one client adversely affecting those of another. Where the acceptance or

continuance of an engagement would, even with safeguards, materially prejudice the interests of any client, the appointment should not be accepted or continued, or one of the appointments should be discontinued.

### **Confidentiality**

- (a) Information confidential to a client or employer acquired in the course of professional work should not be disclosed except where consent has been obtained from the client, employer or other proper source, or where there is legal right or duty to disclose; and
- (b) Where a legal right or duty of disclosure does exist, the client or employer should normally be notified in advance of the disclosure being made.

A member should respect the confidentiality of information entrusted to him by his employer or his client, and should not disclose any such information to a third party without the specific authority of his employer or client unless:

- (i) He knows or suspects his clients to have committed the offence of treason or treasonable felony. The duty to disclose is obligatory in this case;
- (ii) The disclosure is reasonably necessary to protect the interest of members e.g. to enable the member to sue for his fees or to defend an action for (say) negligence;
- (iii) He is required to disclose by due legal process or in the interest of the public.

When a member is required to provide information about a client's affairs by the Police, the Inland Revenue or any other authority, he should decline to give the information unless and until he is satisfied that there is statutory authority for demanding the information. He should seek the advice of his solicitor where necessary.

A member should not voluntarily appear in Court as a witness against a client or former client unless served with a subpoena or any other form or witness summons. He could refuse particular questions which he is not obliged to answer. He must produce any documents in his ownership or possession if the Court so directs.

A member should not make improper use of any knowledge he may gain in the course of his work. He should ensure that the staff under his control also observes this requirement.

### **Changes in a professional appointment**

Recurring Work: Clients have the right to choose their auditors and other professional advisers, and to change to others if they so desire.

Nevertheless, it is necessary - in the interests of the public, the existing auditor or adviser and prospective auditor or adviser - for a member who is asked to act by a prospective client in respect of an audit or recurring reporting assignment, or the provision of recurring accounting services and taxation work

of a compliance nature, to communicate with the existing auditor or adviser, and for the latter to reply promptly as to any considerations which might affect the prospective auditor or adviser's decision whether or not to accept appointment.

- (a) **Statutory Provisions:** Firms must adhere to the statutory provisions relating to any change in an audit appointment, in particular those contained in sections 362 to 366 of the Companies and Allied Matters Act 2004, and in particular the proposed auditor should ensure that the previous auditor has validly vacated office.
- (b) **Unpaid fees:** A member in public practice should not accept an audit hitherto carried out by another member, without first ensuring that the other member has been properly removed from office as auditor and that all outstanding fees due to the other member have been fully paid.
- (c) **Confidentiality:** The prospective auditor or adviser should ordinarily treat in confidence any information provided by the existing auditor or adviser. However, it may be essential to the fulfilment of a prospective auditor's or adviser's obligations that he should disclose such information. It may, for example, be unavoidable for the prospective auditor or adviser to disclose to officers or employees of the client matters brought to his attention by the predecessor firm which needed to be properly investigated. Such disclosure should be no wider than is necessary.
- (d) **Defamation:** It is likely that an existing auditor or adviser who communicates to a prospective successor matters damaging to the client or to any individuals concerned with the client's business will have a strong measure of protection were any action for defamation to be brought against him, in that the communication will be protected by qualified privilege. This means that he should not be liable to pay damages for defamatory statements even if they turn out to be untrue, provided that they are made without malice. The chances of an incumbent being held to have acted maliciously are remote provided that:
  - (i) he states only what he sincerely believes to be true; and
  - (ii) he does not make reckless imputations against a client or individuals connected with it which he can have no reason for believing to be true.
- (e) **Joint auditor:** A member whose firm is nominated as a joint auditor should communicate with all existing auditors and be guided by similar principles to those set out in relation to nomination as an auditor. Where it is proposed that a joint audit appointment becomes sole appointment, the surviving auditor should communicate formally with the other joint auditor as though for a new appointment.
- (f) **Vacancy:** A member whose firm is invited to accept nomination on the death of a sole practitioner auditor should endeavour to obtain such information as he may need from the latter's alternate (where appropriate), the administrators of the estate or other source.

- (g) **Transfer of Books and Papers:** A replaced auditor or adviser should transfer promptly to the client, or to his successor after the latter has been duly appointed, all books and papers which are in his possession and which belong to the client unless he is exercising a lien thereon for unpaid fees. Members should be aware that the courts have held that no lien can exist over books or documents of a registered company which, either by statute or by article of association of the company have to be available for public inspection.
- (h) **Co-operation with a Successor:** The incoming auditor or adviser often needs to ask his predecessor for information as to the client's affairs, lack of which might prejudice the client's interests. Such information should be promptly given and, unless there is good reason to the contrary, such as a significant amount of work involved, no charge should be made.
- (i) **Additional work:** A member invited to undertake recurring or non-recurring work which is additional to and related to continuing work carried out by another professional adviser should normally notify that other professional adviser of the work he has been asked to undertake.
- (j) **Consultancy:** If a member in practice (the practitioner) obtains the advice of a member (consultant) on a consultancy basis on behalf of a client, the consultant or any practicing firm with which he or his consultancy organisation is associated should not, without the consent of the practitioner, accept from that client within one year of completion of the consultancy assignment any work which was, at the time the consultant was first retained in relation to that client's affairs, being carried out by the practitioner;
- (k) The same considerations apply where a practitioner introduces one of his clients to the consultant for the purposes of consultancy.

### **Association With Non-Members**

- (a) **Mixed Accountancy Practices:** A member engaged in public practice with a non-member partner or fellow director of a company is responsible for ensuring that the non-member conforms to the ethical standards governing the provision by members of public accountancy services;
- (b) **Use of Offices, Name, etc:** A member should so conduct his or her firm that a client or potential client cannot mistake it for any other firm or business and cannot mistake any other associated firm business for his;
- (c) **Work for or obtained through Non-members:** A member should not enter into arrangements to provide public accountancy services to clients of another firm or to clients introduced by another firm of public accountants not controlled by chartered accountants (the requesting firm) unless he or she has satisfied himself or herself that the requesting firm's professional work is obtained in accordance with ethical standards governing the provision by members of public accountancy services.

### **Fees**

Members are expected to charge fees for the service rendered to clients. The Institute has advised that a member is entitled to charge for his or her services:

- (a) Such specific fee as he or she has agreed with the client; or
- (b) A fee calculated in accordance with any agreement with the client; or
- (c) In the absence of an agreement, a fee calculated by reference to the custom of the profession or in accordance with regulations of the Institute in force, at the time the fees were charged.

In the last event it is customary, where the basis of the fee has not been agreed with a client that a member should charge a fee, which is fair and reasonable having regards to:

- (a) the seniority and professional expertise of the persons necessarily engaged on the work;
- (b) the time expended by each;
- (c) the degree of risk and responsibility which the work entails; and
- (d) the priority and importance of the work to the client together with any expenses properly incurred.

The Institute's minimum charge-out rates in respect of fees for professional services are intended to set a benchmark for such fees below which members are not ordinarily expected to charge. A member in public practice must not charge or accept fees for acting as auditor, the amount of which is below any minimum fee chargeable under any scheme approved by the Institute.

### **Fee Quotation and Estimates**

A member should inform a client in writing prior to commencement of any engagement of the basis upon which any fee he proposes to charge that client for his services will be calculated and, on request and where practicable, the level of fees likely to be charged for any assignment.

### **Audit Work**

Firms should not quote for new work, a level of fees which is lower than that charged by an existing auditor or quote by tender levels of fees which they have reason to believe are significantly lower than those quoted by other tendering firms as their objectivity could in those circumstances be threatened. Such firms should ensure that their work complies with Auditing Standards and Guidelines and, in particular, quality control procedures. In the event of a complaint being made to the Institute (which might have arisen as a result of a Professional Practice Monitoring Committee's inspection), where fees were a feature in obtaining or retaining the work, firms should be prepared to demonstrate that the work done was in accordance with Auditing Standards; and the client was not misled as to the basis on which fees for the current year and the subsequent years were to be determined.

### **Fee Information and Disputes**

A member should furnish, either in the fee account or subsequently on request, and without further charge, such details as are reasonable to enable the client to understand the basis on which the fee account has been prepared.

### **Percentage and Contingent Fees**

Unless the circumstances dictate otherwise or the client clearly objects, fees should normally be charged on time rates in respect of audit work, reporting assignment and similar non-audit roles. In all circumstances, a member in public practice should refrain from quoting or charging fees for audit work, reporting assignment and similar non-audit roles using criteria other than the basis or bases approved by the Institute.

## **OBTAINING PROFESSIONAL WORK**

### **Practice Promotion**

Subject to the guidance which follows, a member may seek publicity for his or her services achievements and products and may advertise his services, achievements and products in any way consistent with the dignity of the profession in that he should not project an image inconsistent with that of a professional person bound by high ethical and technical standards.

### **Advertising**

Advertisements must comply with the law and should be legal, decent, clear, honest and truthful. An advertisement should be clearly distinguishable as such. The preceding considerations are of equal application to letterheads, invoices and similar practice documents.

### **Fees**

If reference is made in promotional material to fees, the basis on which fees are calculated, or to hourly or other charging rates, the greatest care should be taken to ensure that such reference does not mislead as to the precise range of services and time commitment that the reference is intended to cover. Members should not make comparisons in such material between their fees and of other accounting practices, whether members or not.

The danger of giving a misleading impression is particularly pronounced when constraints of space limit the amount of information which can be given. For this reason, it will seldom be appropriate to include information about fees in short advertisements. A member may be offered a free consultation at which levels of fees will be discussed.

### **Disparaging Statements**

Promotional material may contain any factual statement the truth of which a member is able to justify, but should not make disparaging references to or disparaging comparisons with the services of others.

Particular care is needed in claims of size or quality. For example, it is impossible to know whether a claim to be 'the largest firm' in an area is a reference to the number of partners or staff, the number of offices or the amount of fee income. A claim to be 'the best firm' is subjective and cannot be substantiated.

### **Harassment**

A member should, under no circumstances, promote or seek to promote his or her services, or the services of another member, in such a way or to such an extent as to amount to harassment of a prospective client.

### **Cold Calling**

- (a) In relation to audit or other financial reporting work, a member should not make an unsolicited personal visit or telephone call to a person who is not a client with a view to obtaining professional work from the non-client.
- (b) Promotional or technical material may be sent to non-client by mail or other means, subject to certain conditions. Such a distribution should not, in the case of audit or other financial reporting work, be followed by a personal visit or telephone call except at the specific request of the recipient.
- (c) The same constraints apply to direct mail as to other promotional or technical material.
- (d) Unsolicited promotional or technical material should not be sent to a non-client by facsimile transmission or other electronic means.

A member may send a letter introducing his or her firm and its range of services to another professional adviser, such as a solicitor or banker, and follow it up by a telephone call or visit. Such a follow-up should not be made in respect of audit or other financial reporting needs of the professional adviser.

### **Introductions**

A member should not give or offer any commission, fee or reward to a third party, not being either his or her employee or another public accountant governed by ethical standards comparable to those observed by members in return for the introduction of a client.

### **Responsibility for Promotional Activities**

Promotional activities carried out in the name of a firm should be construed as promotional activities carried out by the individual principals of that practice, whether carried out personally or through agents. The names and letterheads of practising firms

### **Names**

- (a) 'Firm' includes partnership, a corporation and a sole practitioner, the main business of which is the provision of services customarily provided by chartered accountants, while the term 'letterhead' means any part of the firm's notepaper and documents used by the firm for communicating with clients or other parties.

- (b) Public practice should refrain from practising in or under a name which does not comprise proper name(s) only, such name(s) being that or those of one or more of the current or former proprietor(s) and/or partner(s) of the Firm.
- (c) A practice name should be consistent with the dignity of the profession in the sense that it should not project an image inconsistent with that of a professional practice bound to high ethical and technical standards. A practice name should not be misleading.
- (d) Use of the description 'Chartered Accountants' is governed by the law establishing the Institute.
- (e) Firms entitled to use the description 'Chartered Accountants' are encouraged to do so, on their letterheads, in advertisements and generally. A firm which describes itself as 'Chartered Accountants' on its notepaper may include a list of the services it particularly wishes to offer. However, it should not incorporate any of that list of services into the general description of the firm (e.g. 'Chartered accountants and Tax Advisers') lest, this should suggest that these services are not offered by other chartered accountants.
- (f) Principals in a firm describing itself as 'Chartered Accountants' should adopt a distinguishing name for any separate firm of public accountants in which they may practise which is not itself entitled to the description 'Chartered Accountants'.

### **Persons Named on Letterheads**

- (a) It should be clear from the letterhead of a practice whether any person named thereon, or other persons named only in the name of the firm, is a partner of the practice, a sole practitioner or, in the case of a corporate practice, a director.
- (b) Firms should distinguish chartered accountants mentioned on the letterhead of a practice from persons not entitled to be so described by the use of designatory letters or otherwise.
- (c) No person named on the letterhead of a practice should be described by a title, description or designatory letters to which he or she is not entitled.

## **SECOND AND OTHER OPINIONS**

### **Specific Circumstances**

Where the opinion of a member, whether in practice or otherwise, is sought on the application of accounting standards or principles to specific circumstances or transactions, either completed or contemplated of an entity with which the member does not have an ongoing professional relationship to provide audit services, he should be alert to the possibility of his opinion creating undue pressure on the judgement and objectivity of the auditor. Accordingly, he should seek to minimise the risk of giving inappropriate guidance by ensuring that he has access to all relevant information.

### **General Circumstances**

A member giving an opinion on the application of accounting standards or principles, relating to a hypothetical situation and not based on the specific facts or circumstances of a particular organisation, should ensure that the nature of the opinion is made clear.

## **MEMBERS IN BUSINESS**

### **Employed member**

'Employed member' includes reference to members, whether employed or not, who are engaged in work relevant to their qualification as a member otherwise than in a practicing office.

An employed member owes certain legal duties towards his or her employer. Additionally, he or she has ethical duties towards his Institute, and, in particular, he should observe the same code of ethics and the same standards of behaviour and competence as apply to all other members of the Institute.

### **Financial and Other Involvement**

An employed member should recognise the problems which may be created by financial involvement or personal relationships which, whether sanctioned by his or her contract of employment or not, could nevertheless by reason of their nature or degree threaten his or her objectivity. Where any doubt exists, the involvement or relationship should be disclosed.

### **Professional and Technical Standards**

- (a) A member is required to carry out his or her professional work with proper regard for the technical and professional standards expected of him as a member. The standards include Statements of Accounting Standards issued by the Nigerian Accounting Standards Board and, where appropriate, the rules and regulations of the Securities and Exchange Commission and requirements of the Companies and Allied Matters Act 2004. However, an employed member who, in the performance of his professional work, may be subject to contrary directions from his employers may be faced with a conflict of loyalties in seeking to apply the fundamental principle. The difficulty is of particular importance where the outcome of the work is to be published.
- (b) Where a member has sole responsibility for the preparation and approval of information, including management information, which is to be made public or is to become available, on however restricted a basis, outside the organisation to which it refers, he or she should ensure that such information complies with the applicable standards, and relevant statutes and regulation or, if it does not so comply, that the reasons for non-compliance are stated truthfully, unambiguously and fairly.

**Enforcement of ethical standards**

- (a) The power of the Institute to enforce ethical standards is by the Institute of Chartered Accountants of Nigeria Act conferred on the Accountants Disciplinary Tribunal which is in respect of this power independent of the Council.

**CODE OF ETHICS FOR PROFESSIONAL ACCOUNTANTS ISSUED BY THE INTERNATIONAL FEDERATION OF ACCOUNTANTS**

The auditor should comply with the Code of Ethics for Professional Accountants issued by the International Federation of Accountants. The Code states that “in order to achieve the objectives of the accountancy profession, professional accountants have to observe a number of prerequisites or fundamental principles”.

The fundamental principles are:

- (a) **Integrity**  
A professional accountant should be straight-forward and honest in performing professional services.
- (b) **Objectivity**  
A professional accountant should be fair and should not allow prejudice or bias, conflict of interest or influence of others to override objectivity.
- (c) **Professional Competence and Due Care**  
A professional accountant should perform professional services with due care, competence and diligence and has a continuing duty to maintain professional knowledge and skill at a level required to ensure that a client or employer receives the advantage of competent professional service based on up-to-date developments in practice, legislation and techniques.
- (d) **Confidentiality**  
A professional accountant should respect the confidentiality of information acquired during the course of performing professional services and should not use or disclose any such information without proper and specific authority or unless there is a legal or professional right or duty to disclose.
- (e) **Professional Behaviour**  
A professional accountant should act in a manner consistent with the good reputation of the profession and refrain from any conduct which might bring discredit to the profession. The obligation to refrain from any conduct which might bring disrepute to the profession requires IFAC member bodies to consider, when developing ethical requirements, the responsibilities of a professional accountant to clients, third parties, other members of the accountancy profession, staff, employers, and the general public.

**(f) Technical Standards**

A professional accountant should carry out professional services in accordance with the relevant technical and professional standards. Professional accountants have a duty to carry out with care and skill, the instructions of the client or employer insofar as they are compatible with the requirements of integrity, objectivity and, in the case of professional accountants in public practice, independence.

In addition, they should conform to the technical and professional standards issued by:

- (i) IFAC (e.g. International Standards on Auditing);
- (ii) International Accounting Standards Board;
- (iii) The member's professional body or other regulatory body; and
- (iv) Relevant legislation.

**2.11 ACCOUNTING STANDARDS AND GUIDELINES**

The following sections deal with accounting standards and guidelines issued by the Institute of Chartered Accountants of Nigeria, International Accounting Standards (IAS) and International Financial Reporting Standards (IFRS).

**Accounting Standards and Guidelines**

The practice of Accountancy worldwide is governed by sets of rules and guidelines. These rules and guidelines are compiled into standards. There are two sets of standards governing accounting practice in Nigeria. They are:

- (a) International Standards:
  - (i) IAS: International Accounting Standards
  - (ii) SIC: Standing Interpretations Committee.
- (b) Local Standards:
  - (i) SAS: Statement of Accounting Standards
  - (ii) AG: Auditing Guidelines

**(a) International Accounting Standards (IAS)**

Each standard discusses the Accounting treatment of a particular item or group of items. A summary of the international standards are as follows:

- IAS 1 - Presentation of Financial Statement.
- IAS 2 - Inventories.
- IAS 3 - (Superseded by IAS 27 and IAS 28).
- IAS 4 - (Superseded by IAS 16, IAS 22 and IAS 38).
- IAS 5 - (Superseded by IAS 1).
- IAS 6 - (Superseded by IAS 15).
- IAS 7 - Cash flow Statements.
- IAS 8 - Net profit or loss for the Period, Fundamental Errors and changes in Accounting Policies.
- IAS 9 - (Superseded by IAS 38).
- IAS 10 - Events after the Balance Sheet date.

- IAS 11 - Construction Contracts.
- IAS 12 - Income Taxes.
- IAS 13 - (Superseded by IAS 1).
- IAS 14 - Segment Reporting.
- IAS 15 - Information Reflecting the Effects of Changing Prices.
- IAS 16 - Property, Plant and Equipment.
- IAS 17 - Leases.
- IAS 18 - Revenue.
- IAS 19 - Employee Benefits.
- IAS 20 - Accounting for Government Grants and Disclosure of Government Assistance.
- IAS 21 - The Effects of Changes on Foreign Exchange in Rates.
- IAS 22 - Business Combinations.
- IAS 23 - Borrowing Costs.
- IAS 24 - Related Party Disclosures.
- IAS 25 - (Superseded by IAS 39 and IAS 40).
- IAS 26 - Accounting and Reporting by Retirement benefit Plans
- IAS 27 - Consolidated Financial Statements and Accounting for Investments in Subsidiaries.
- IAS 28 - Accounting for Investments in Associates.
- IAS 29 - Financial Reporting in Hyperinflationary Economics.
- IAS 30 - Disclosures in the Financial Statements of Bank and Similar Financial Institutions.
- IAS 31 - Financial Reporting of Interests in Joint Ventures.
- IAS 32 - Financial Instruments: Disclosure and Presentation
- IAS 33 - Earnings Per Share.
- IAS 34 - Interim Financial Reporting.
- IAS 35 - Discontinuing Operations.
- IAS 36 - Impairment of Assets.
- IAS 37 - Provisions, Contingent Liabilities and Contingent Assets.
- IAS 38 - Intangible Assets.
- IAS 39 - Financial Instruments: Recognition and Measurement.
- IAS 40 - Investment property.
- IAS 41 - Agriculture (effective January 1, 2003).

(b) **Standard Interpretations Committee (SIC)**

These contain the interpretations of International Accounting Standards.

- SIC 1 - Consistency - Different cost formulas for inventories (IAS 2).
- SIC 2 - Consistency - Capitalisation of Borrowing Costs (IAS 23).
- SIC 3 - Elimination of Unrealised Profits and Losses on Transactions with Associates (IAS 28).
- SIC 5 - Classification of Financial Instruments Contingent Settlement Provisions (IAS32).
- SIC 6 - Costs of Modifying Business Software (Framework).
- SIC 7 - Introduction of the Euro (IAS 21).
- SIC 8 - First-Time Application of IAS as the Primary Basis of Accounting (IAS 1).

- SIC 9 - Business Combinations - Classification either as Acquisitions or Uniting of Interests (IAS 22).
- SIC 10 - Government Assistance No specific Relation to Operating Activities (IAS 20).
- SIC 11 - Foreign Exchange - Capitalisation of Losses Resulting from Severe Currency Devaluations (IAS 21).
- SIC 12 - Consolidation - Special Purpose Entities (IAS 27).
- SIC 13 - Jointly controlled Entities - Non-Monetary Contributions by Ventures (IAS 31).
- SIC 14 - Property, Plant and Equipment or Loss of Items (IAS 16)
- SIC 15 - Operating leases - Incentives (IAS 17)
- SIC 16 - Share Capital - Reacquired own Equity Instruments (Treasury Shares) IAS 32.
- SIC 17 - Equity - Costs of an Equity Transaction (IAS 32)
- SIC 18 - Consistency - Alternative Methods (IAS 1)
- SIC 19 - Reporting Currency - Measurement and Presentation of Financial Statements under (IAS 21 and IAS 29).
- SIC 20 - Equity Accounting Methods - Recognition of Losses (IAS 27)
- SIC 21 - Income Taxes - Recovery of Revalue Combinations- Subsequent Adjustment of fair Values and Goodwill Initially Reported (IAS 22).
- SIC 22 - Business combinations- Subsequent adjustments of fair values and goodwill initially reported (IAS 22).
- SIC 23 - Property, Plant and Equipment - Major Inspection or overhaul Costs (IAS 16).
- SIC 24 - Earnings per share - financial Instruments and other contract that may be settled in shares (IAS 33).
- SIC 25 - Income Taxes - changes in the Tax status of an enterprise or it's shareholders (IAS 12).

**Note:** No SIC Interpretation was issued as SIC 4. Draft interpretation SIC D4, Classification of Financial Instruments Issuer's settlement option, was withdrawn.

(c) **Statement Of Accounting Standards**

The publications of Nigerian Accounting Standards Board (NASB) are as follows:

- SAS 1 - Disclosure of Accounting Policies
- SAS 2 - Information to be disclosed in Financial Statements
- SAS 3 - Accounting for Property, Plant and Equipment
- SAS 4 - Stocks
- SAS 5 - Construction Contracts
- SAS 6 - Extraordinary items and Prior Year Adjustments.
- SAS 7 - Foreign Currency Conversions and Translations
- SAS 8 - Accounting for Employees' Retirement Benefits
- SAS 9 - Accounting for Depreciation

- SAS 10 - Accounting by Banks and Non-Bank Financial Institutions (Part I).
- SAS 11 - Leases
- SAS 12 - Accounting for Deferred Taxes
- SAS 13 - Accounting for Investments
- SAS 14 - Accounting in the Petroleum Industry: Upstream Activities
- SAS 15 - Accounting by Banks and Non-Bank Financial Institutions (Part II).
- SAS 16 - Accounting for Insurance Business
- SAS 17 - Accounting in the Petroleum Industry: Downstream Activities.
- SAS 18 - Statement of Cash Flows
- SAS 19 - Accounting for taxes
- SAS 20 - Abridged Financial Statements
- SAS 21 - Earnings per share
- SAS 22 - On Research and Development Cost
- SAS 23 - On Provisions, Contingent Liabilities and Contingent Assets
- SAS 24 - Segment Reporting, Added: 2007-04-20
- SAS 25 - Telecommunications Activities Added: 2008-02-11
- SAS 26 - Business Combinations Added: 2008-02-11
- SAS 27 - Consolidated and Separate Financial Statements Added: 2008-02-11
- SAS 28 - Investments in Associates Added: 2008-02-11
- SAS 29 - Interests in Joint Ventures Added: 2008-02-11
- SAS 30 - Interim Financial Reporting Added: 2008-02-11

(d) **Auditing Standards and Guidelines (AG)**

These are the publications of Auditing Standards Committee (ASC) of ICAN.

AG 1 - Auditing Guideline on Engagement Letters

AG 2 - Auditing Guideline: Prospectus and Reporting Accountant

(e) **Adaptation of International Standards on Auditing (IS) as Nigerian Standards On Auditing (NS)**

The Institute of Chartered Accountants of Nigeria (ICAN) as a member of the International Federation of Accountants (IFAC) is committed to the Federation's broad mission of the worldwide development and enhancement of an accountancy profession with harmonized standards, able to provide "services of consistent high quality in the public interest".

As a condition of its membership, The Institute of Chartered Accountants of Nigeria is obliged to support the work of IFAC by informing its members of pronouncements developed by IFAC and by using its best endeavours, to work towards implementation, when and to the extent possible under local circumstances, of those pronouncements and specifically to incorporate the principles on which they are based.

IFAC's International Standards on Auditing (ISAs) in Nigerian auditing pronouncements.

IFAC to date has issued over thirty International Standards on Auditing (ISA) and one International Standard on Quality Control, some of which are listed below:

### **Name Of Standard**

ISQC1	Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements. The Nigerian equivalent is NSQC1 as adopted.
ISA 200	Objective and general principles governing an audit of financial statements. The Nigerian equivalent is NSA 200 (Nigerian Standards on Auditing) as adopted.
NSA 210	Terms of audit engagements.
NSA 220	Quality control for audits of historical financial (Revised) information.
NSA 230	Documentation.
NSA 240	The auditor's responsibility to consider fraud in an audit of financial statements.
NSA 250	Consideration of laws and regulations in an audit of financial statements.
NSA 260	Communication of audit matters with those charged with governance.
NSA 300	Planning an audit of financial statements.
NSA 315	Understanding the entity and its environment and assessing the risks of material misstatement.
NSA 320	Audit materiality.

### **Key**

ISQC	International Standards on Quality Control
ISA	International Standards on Auditing

### **Members' Education and Training**

ICAN has a 'Members' Education and Training Unit' which is responsible for the training of members of the Institute and non-members through the under listed training programmes.

- (a) Mandatory Continuing Professional Education (MCPE) strictly for ICAN members only;
- (b) Executive Mandatory Continuing Profession Education (EMCPE) this is for ICAN members in senior management positions in organisations;
- (c) Continuing Professional Education (CPE) for ICAN members and non-members;

- (d) In-house: this is organised by the Institute for ICAN members in organisations who desire that the MCPE be held in their chosen location (i.e. in-plant).

A member of the Institute is expected to earn minimum of thirty credit hours in a year. A member earns fifteen credit hours at every seminar attended. The four courses listed above are termed (“structured”). Other activities/events of the Institute and courses attended by members outside the ones organised by the Institute (unstructured) attract credit hours, but such courses must be accredited by the Institute.

### **Sanctions for Non-Compliance:**

Every member is expected to obtain a minimum of sixty credit hours within a 2-year cycle. A member in default would be suspended from membership at the end of 2 years for six months in the first instance and thereafter expunged from membership list if he/she fails to make up the deficiencies in credit hours.

Those Exempted:

- (i) Members who are sixty years and above and who have indicated in writing to the Institute their intention to retire from practising the accountancy profession;
- (ii) Members who are certified as medically unfit;
- (iii) Traditional Rulers;
- (iv) Members on special national or state engagements.

### **Programme for the Year**

The Unit publishes an annual programme of its training courses.

### **International Financial Reporting Standards (IFRS)**

The International Accounting Standards Committee (IASC) issued International Accounting Standards (IAS) from 1973 to 2000. The International Accounting Standards Board (IASB) replaced the IASC in 2001. Since 2001, the IASB amended some international accounting standards and has proposed to amend or replace some international accounting standards with new International Financial Reporting Standards (IFRS). The IASB has adopted or proposed certain new IFRSs on topics for which there were no previous international accounting standards. Interpretations of Standards have also been issued on the standards.

To date, the following IFRS's have been issued:

Preface to International Financial Reporting Standards May 2002

- IFRS 1 First-time Adoption of International Financial Reporting Standards  
June 2003
- IFRS 2 Share-based Payment - February 2004
- IFRS 3 Business Combinations - March 2004
- IFRS 4 Insurance Contracts - March 2004
- IFRS 5 Non-current Assets Held for Sale and Discontinued Operations -  
March 2004

IFRS 6	Exploration for and Evaluation of Mineral Assets - December 2004
IFRS 7	Financial Instruments: Disclosures
IFRS 8	Operating Segments

## 2.12 QUALITY CONTROL, WORKING PAPERS, PEER REVIEW

### Introduction

APB statement of auditing standard 240 deals with “Quality Control for audit work”. It takes Quality Control to be of paramount importance to the independent audit function.

The standard describes quality control policy and processes as those “designed to provide reasonable assurance as to the appropriateness of the auditors’ report and of adherence to auditing standards, ethical and other regulatory requirements.

Many quality assurance frameworks take a holistic approach to quality, encompassing a wide range of business considerations including; client and employee satisfaction, and commercial performance. Firms are encouraged to embed procedures to meet the requirements of the statement of auditing standards on quality control into a wider quality assurance framework”. (Chitty, 2004).

Wider quality assurance objectives may be achieved by the auditors by discussing audit performance with boards of directors, audit committees (where they exist) and senior management.

### Small firms

In order to satisfy quality control requirements,

- (a) Firms should develop different policies and processes on various matters pertaining to the practice.
- (b) The nature, timing and extent of those policies and processes will depend on many factors, including the size and nature of the firm.
- (c) The policies and processes adopted by small firms need not be complex or time consuming to be effective.
- (d) Quality control encompasses several different roles and functions within the audit firm, including responsibilities for quality control policy and processes and monitoring.
- (e) For small firms and sole practitioners, a single individual may perform some of these roles and functions but in some circumstances they may wish to use the services of a suitably qualified external consultant.

### Quality Drivers

Compliance with quality control standard in setting quality drivers for the purpose of complying with quality control standard, the following matters should be considered:

- (a) distinction of individual responsibilities and the collective responsibilities of the firm;

- (b) personal accountability and team working;
- (c) building quality into processes and monitoring the results;
- (d) Individual responsibilities and the collective responsibilities of the firm; and
- (e) involvement of all members of an audit team who should feel responsible for the performance of their work in accordance with professional standards.

The audit engagement partner has an especially important role in promoting a quality culture within the audit team. The appointment of a suitably senior audit partner within the firm to take overall responsibility for quality control policy and processes will assist this process.

### **Personal Accountability and Team Working**

- (a) Personal accountability can provide an important motive for ensuring that quality control policy and processes are applied in practice while it is important to clarify responsibilities within the firm and the audit team; and
- (b) It is also necessary that consultation takes place to ensure that the collective wisdom of, first the team, and then the firm, is applied in resolving difficult or contentious matters.

### **Building quality into processes and monitoring the results**

- (a) Quality processes are aimed at 'getting it right first time' as well as monitoring performance after the event.
- (b) Monitoring provides the stimulus for performance as well as important information on the application of quality control and processes which can be used to improve them.

### **Definitions**

The APB Statement of Auditing Standard 240 on 'Quality Control for audit work provides the following definitions:

- (a) 'audit engagement partner' - the partner or other person in the firm who assumes responsibility for the conduct of the audit and for issuing an auditors' report on the financial statements on behalf of the firm.
- (b) 'audit staff' - the personnel involved in an individual audit, including experts employed by the auditors, other than the audit engagement partner.
- (c) 'client service partner' - a partner who takes primary responsibility for coordinating the range of services provided to an audit client.
- (d) 'competencies' - the knowledge, skills and abilities of audit engagement partners and audit staff.
- (e) 'firm' - sole practitioners, partnerships, limited liability partnerships and other corporate entities engaged in the provision of auditing services.
- (f) 'independent partner' - a partner with sufficient experience and authority to perform an 'independent review', other than the audit engagement partner, who is not engaged in the performance of the audit or the

- provision of other services and who is free of all other responsibilities for the audited entity and any entities in the same group of entities.
- (g) 'independent review' - an objective, independent assessment of the quality of the audit undertaken before the issue of the auditors' report.
  - (h) 'listed companies' - entities whose capital instruments are listed or publicly traded on a stock exchange or market, including domestic and foreign exchange and markets, and markets other than main markets.
  - (i) 'monitoring' - periodic reviews of working papers for completed audits by, wherever possible, reviewers independent of those who performed the audit.
  - (j) 'partner' - sole practitioners, partners in partnerships and limited liability partnerships and directors of other corporate entities engaged in the provision of auditing services.
  - (k) 'quality control policy and processes' - policy and processes designed to provide reasonable assurance as to the appropriateness of the auditors' report, and of adherence to auditing standards, ethical and other regulatory requirements.
  - (l) 'suitably qualified external consultant' - another registered auditor or an employee (with appropriate experience) of either a professional accountancy body whose members may register as auditors or a specialist organisation, such as a training consortium, which provides review services.

### **Senior audit partner responsible for quality control**

Considering the importance of audit quality, the development, documentation and communication of quality control and processes should be made the responsibility of a senior audit partner. Where a firm operates in more than one office, the firm may appoint several individuals to undertake quality control activities in their local offices but one senior audit partner should take ultimate responsibility for quality control matters within the firm.

The senior audit partner with overall responsibility for quality control has the experience, seniority and authority necessary to fulfil the role, and the influence to help ensure that the quality of audit engagements conducted by the firm is never compromised by commercial considerations.

Partners having concerns on quality control issues should discuss their concerns, and agree appropriate actions, with the senior audit partner responsible for establishing quality control policy and processes.

### **Establishment of policy and processes**

The establishment of quality control policy and processes within a firm involves:

- (a) setting a framework within which all relevant requirements, including the requirements of auditing standards and ethics, can be met.
- (b) size and nature of the practice and its organisation.

**Communication**

Communication of quality control involves:

- (a) communication of quality control policy and processes to all audit staff and audit;
- (b) engagement partners for effective implementation;
- (c) use of internal training, electronic and paper circulars, and staff manuals to communicate quality control policy and processes.

**Documentation**

Appropriate documentation of quality control policy and processes normally includes:

- (a) a description of the policy and processes and the objectives they are designed to achieve.
- (b) Records of amendments to policies and processes
- (c) A record of how policy and processes and changes to them have been communicated.

**Acceptance and continuance of audit engagements**

Before accepting a new audit engagement firms, should ensure that they:

- (a) are competent to undertake the work;
- (b) consider carefully whether there are threats to their independence and objectivity and, if so, whether adequate safeguards can be established;
- (c) assess the integrity of the owners, directors and management of the entity; and comply with the ethical requirements of the professional accountancy bodies in relation to changes in appointment.

The firm should regularly reconsider the above matters whether the firm should continue in office as auditor. The following matters should be considered in deciding whether to continue in office as auditors:

- (a) the identity of those who control the entity, its owners, directors and managers (or their equivalents),
- (b) the nature of the entity's activities;
- (c) the reasons for the proposed appointment and the reasons for the retirement or removal of any incumbent or predecessor auditors.
- (d) potential audit risks associated with the engagement.

**Professional clearance**

- (a) Before accepting a new engagement, the prospective auditor should communicate in writing with the incumbent auditors
- (b) ascertain whether the incumbent auditors have information which the prospective auditors should be aware, before deciding whether or not to accept the appointment.
- (c) The responsibility for the decision to accept or decline an audit appointment rests solely with the prospective auditors, regardless of the outcome of these enquiries.

## Resources

Resource considerations should take into account the following:

- (a) require resources to be developed and implemented by a firm and periodically review plans for recruitment;
- (b) have available adequate number of audit engagement partners and audits staff with the competencies necessary to meet their needs;
- (c) project personnel needs in order to establish number and characteristics of the individuals required; and
- (d) have recruitment processes including procedures to help determine whether recruits are individuals of integrity and have the capacity to develop the competencies necessary to perform the firm's work.

Competencies are developed through:

- (a) professional education and development (including technical and management training, in-house courses and external training);
- (b) work experience and coaching by other members of the audit team; and
- (c) development and maintenance of technical competencies by the provision of technical circulars, libraries and technical departments.

## Assignment of Personnel to Audit Engagements

- (a) Each audit engagement should have an engagement partner who should take responsibility for the engagement on behalf of the firm;
- (b) Audit engagement partners are responsible for the conduct of the audits to which they have been appointed, ethical and other regulatory requirements, and for the issue of the auditors' report on behalf of the firm;
- (c) Firms should assign audit staff with the competencies necessary to perform the audit work expected of them to individual audit engagements;
- (d) firms should establish processes to assess individuals' knowledge, skills and abilities;
- (e) Firms should 'develop policies and processes to provide reasonable assurance that:
  - (i) audit engagement partners have the competencies necessary to perform their role;
  - (ii) audit engagement partners' responsibilities are clearly defined and communicated to them;
  - (iii) the identity and role of the audit engagement partner is known to the directors and senior management of the audited entity;
  - (iv) audit engagement partners have appropriate support (e.g. another partner), where necessary, at meetings with the directors and senior management of the audited entity that will involve matters that are, or may be, material to the auditors' report; and
  - (v) audit engagement partners have sufficient time to discharge their responsibilities' ( Chitty, 2004).

Competencies which a firm must consider include:

- (a) understanding and practical experience of auditing (through participation in audit engagements and appropriate training);
- (b) Understanding applicable accounting, auditing, ethical and other technical standards;
- (c) Knowledge of specific industries;
- (d) Professional judgement;
- (e) Understanding the firm's quality control policy and processes; and
- (f) Drive and career path.

### **Consultation**

Firms should establish procedures to:

- (a) facilitate consultation and to ensure that sufficient resources are available to enable appropriate consultation to take place in relation to difficult or contentious matters;
- (b) Document results of consultation that are relevant to audit conclusions;
- (c) Deal with difficult or contentious matters; and
- (d) Resolve conflicts.

Firms establish the likely circumstances in which consultation is encouraged or required, and who is to be consulted. Consultation may be:

- (a) on technical matters from the firm's technical department or from an expert within the firm; and
- (b) necessary in relation to ethical matters affecting either the firm or individual partners and others within it.

Consultation procedures are designed to ensure that individuals of appropriate seniority and experience within the firm are consulted on all difficult or contentious issues and that the results of consultations relevant to audit conclusions are properly documented.

## **THE AUDIT ENGAGEMENT PARTNER**

### **Leadership and Responsibilities**

- (a) Audit engagement partners should, in all cases, take responsibility on behalf of the audit firm, for the quality of the audit engagements to which they are assigned; and
- (b) Audit engagement partners are responsible for finalising and signing the auditors' report on behalf of the firm and for applying the firm's quality control policy and processes to individual audit engagements in an appropriate manner.

### **Direction, Supervision and Review**

Audit engagement partners should ensure that audit work is directed, supervised and reviewed in a manner that provides reasonable assurance that the work has been performed competently.

Direction of audit staff involves:

- (a) Being informed of their responsibilities, the nature of the entity's business, accounting or auditing problems that may arise, and the overall audit plan;
- (b) Being encouraged to raise any questions they may have with more experienced team members;
- (c) Understanding the objectives of the work to avoid drawing inappropriate conclusions as a result of misunderstandings; and
- (d) Being educated on appropriate team-working and training.

Supervision is closely linked to both direction and review and includes:

- (a) considering the progress of the audit;
- (b) considering whether audit staff have the competencies necessary to perform the audit work expected of them and sufficient time to carry out their work, whether they understand their instructions and whether the work is being carried out in accordance with the overall audit plan and audit programme;
- (c) Addressing significant accounting and auditing questions raised during the audit, assessing their significance and modifying the overall audit plan and audit programme as appropriate; and
- (d) Identifying matters for further consideration during the audit.

Work performed by audit staff is reviewed by other more senior audit staff or the audit engagement partner. Reviewers should consider whether:

- (a) the work has been performed in accordance with the firm's procedures and in accordance with the audit programme;
- (b) The work performed is adequate in light of the results obtained and has been adequately documented;
- (c) Significant audit matters have been raised for further consideration;
- (d) Appropriate consultations have taken place and the results of such consultations have been documented;
- (e) The objectives of the audit procedures have been achieved; and
- (f) The conclusions are consistent with the results of the work performed.

Audit engagement partners perform an overall review of working papers. The review is sufficient for them to be satisfied that the working papers contain sufficient appropriate evidence to support the conclusions reached and for the auditors' report to be issued. Although the review may not cover all working papers, it covers:

- (a) all critical areas of judgement, especially any relating to difficult or contentious matters identified during the audit.
- (b) audit evidence relating to high risk areas; and
- (c) any other areas which the audit engagement partner considers important.

Audit engagement partners document the extent of their review and its timing so as to demonstrate that it was completed before the auditors' report was signed.

The audit engagement partner reads the auditors' report, the financial statements and the information issued with the financial statements" (Chitty, 2004).

Review notes recording questions or points raised in the course of the audit need not be retained at the end of the audit provided that the working papers have been updated thereto and, in particular, record the reasoning on all significant matters which require the exercise of judgement.

### **2.13 INDEPENDENT REVIEW**

Firms should ensure that:

- (a) an independent review is undertaken for all audit engagements where the audited entity is a listed company;
- (b) policies setting out the circumstances in which an independent review should be performed for other audit engagements, whether on the grounds of the public interest or audit risk, are established;
- (c) independent review should take place before the issue of the auditors' report in order to provide an objective, independent assessment of the quality of the audit;
- (d) Firms' policies should set out in detail the manner in which this objective is to be achieved; and
- (e) The independent review is performed by one or more independent partners having sufficient experience and authority to fulfil the role on the particular engagement.

"The independent review involves consideration of the following matters in order to assess the quality of the audit:

- (i) the objectivity of the audit engagement partner and key audit staff and the independence of the firm. This normally includes a review of the summary of factors that could be perceived as threatening either, the audit team's objectivity or the independence of the firm;
- (ii) The rigour of the planning process including the analysis of the key components of audit risk identified by the audit team and the adequacy of the planned responses to those risks;
- (iii) The results of audit work and the appropriateness of the key judgements made, particularly in high risk areas;
- (iv) The significance of any potential changes to the financial statements that the firm is aware of but which the management of the audited entity has declined to make;
- (v) Whether all matters which may reasonably be judged by the auditors to be important and relevant to the directors, identified during the course of the audit, have been considered for reporting to the board of directors and/or the audit committee (or their equivalents); and
- (vi) The appropriateness of the draft auditors' report" (Chitty, 2004).

The independent review:

- (a) Does not necessarily involve a detailed review of all audit working papers, nor does it affect the responsibilities of the audit engagement partner;
- (b) Its purpose is to provide an independent assessment of the quality of the audit, including the key decisions and significant judgements made;
- (c) The extent of the review depends on the complexity of the engagement, the risks associated with the audit and the experience of the audit;
- (d) engagement partner and the audit staff;
- (e) The independent review partner is involved sufficiently early to allow for all materials matters identified during the review process to be dealt with properly;
- (f) Towards the end of the audit the independent partner considers the adequacy of proposed disclosures in the financial statements relating to significant matters identified during the course of the audit;
- (g) In all cases, the independent review is complete before the issue of the auditors' report; and
- (h) The scope and conclusions of the independent review are documented.

Monitoring

- (a) Firms should appoint a senior audit partner to take responsibility for monitoring the quality of audits carried out by the firm.
- (b) The responsibility for monitoring the quality of audit performance is different from the responsibility for the establishment of quality control policy and processes. Wherever possible, the two responsibilities are undertaken by different senior audit partners.
- (c) The objective of monitoring reviews is to provide an independent assessment of:
  - (i) the appropriateness of the auditors' report, and the conduct of the audit in accordance with auditing standards, ethical and other regulatory requirements;
  - (ii) whether the firm's own quality control policy and processes have been applied in practice and appropriate consultation has taken place in relation to difficult or contentious issues' (Chitty, 2004).

The senior audit partner responsible for the monitoring process should:

- (a) Develop procedures for the systematic review of the conduct of a sample of completed audit engagements. The review is undertaken by competent individuals who, wherever possible, are independent of those performing the audit.
- (b) Develop appropriate course of action where failures are identified. Courses of action may involve communication of the findings within the firm, additional training and professional development.
- (c) Ensure changes to the firm's policies and procedures and disciplinary action against those who repeatedly fail to comply with the firm's standards.

**Appendix - Summary of Key Roles Described**

Partner who takes responsibility for establishing quality control policy and processes:

Must be: a senior audit partner of the firm

Cannot be: an external consultant

Partner who takes responsibility for monitoring the quality of audits:

Must be: a senior audit partner (wherever possible a different partner to the partner responsible for establishing quality control policy and processes).

Cannot be: an external consultant Audit engagement partner.

Must be: a partner or other person in the firm who is authorised to issue an auditors' report on behalf of the firm.

Cannot be: the 'independent partner' for the audited entity or any other entities in the same group of entities.

Individual who performs an 'independent review':

Must be: an 'independent partner' with sufficient experience and authority to fulfil the role; or a suitably qualified external consultant

Cannot be: a partner engaged in the performance of the audit or the provision of other services or with any other responsibilities for the audited entity or any entities within the same group of entities

***(Source: ACCA Auditing Handbook 2004/2005)***

**2.14 SUPERVISION AND MONITORING OF AUDITORS****Functions and Responsibility**

Audit engagement partners should ensure that audit work is directed, supervised and reviewed in a manner that provides reasonable assurance that the work has been performed competently.

**Direction and Supervision**

Direction of audit staff involves:

- (a) Being informed of their responsibilities, the nature of the entity's business, accounting or auditing problems that may arise, and the overall audit plan;
- (b) Being encouraged to raise any questions they may have with more experienced team members;
- (c) Understanding the objectives of the work to avoid drawing inappropriate conclusions as a result of misunderstandings; and
- (d) Being educated on appropriate team-working and training.

Supervision is closely linked to 'both direction and review and includes:

- (a) Considering the progress of the audit;
- (b) Considering whether audit staff have the competencies necessary to perform the audit work expected of them and sufficient time to carry out their work, whether they understand their instructions and whether the

- work is being carried out in accordance with the overall audit plan and audit programme;
- (c) Addressing significant accounting and auditing questions raised during the audit, assessing their significance and modifying the overall audit plan and audit programme as appropriate; and
  - (d) Identifying matters for further consideration during the audit.

Work performed by audit staff is reviewed by other more senior audit staff or the audit engagement partner. Reviewers consider whether:

- (a) The work has been performed in accordance with the firm's procedures and in accordance with the audit programme;
- (b) The work performed is adequate in light of the results obtained and has been adequately documented;
- (c) Significant audit matters have been raised for further consideration;
- (d) Appropriate consultations have taken place and the results of such consultations have been documented;
- (e) The objectives of the audit procedures have been achieved; and
- (f) The conclusions are consistent with the results of the work performed.

Audit engagement partners perform an overall review of working papers. The review is sufficient for them to be satisfied that the working papers contain sufficient appropriate evidence to support the conclusions reached and for the auditors' report to be issued. Although the review may not cover all working papers, it covers:

- (a) All critical areas of judgement, especially any relating to difficult or contentious matters identified during the audit;
- (b) Audit evidence relating to high risk areas; and
- (c) Any other areas which the audit engagement partner considers important.

Audit engagement partners document the extent of their review and its timing so as to demonstrate that it was completed before the auditors' report was signed.

The audit engagement partner reads the auditors' report, the financial statements and the information issued with the financial statements' (Chitty, 2004).

Review notes, recording questions or points raised in the course of the audit need not be retained at the end of the audit provided that the working papers have been updated thereto and, in particular, record the reasoning on all significant matters which require the exercise of judgement.

### **Monitoring**

Firms should appoint a senior audit partner to take responsibility for monitoring the quality of audits carried out by the firm.

The responsibility for monitoring the quality of audit performance is different from the responsibility for the establishment of quality control policy and processes. Wherever possible, the two responsibilities are undertaken by different senior audit partners.

The objective of monitoring reviews is to provide an independent assessment of:

- (a) The appropriateness of the auditors' report, and the conduct of the audit in accordance with auditing standards, ethical and other regulatory requirements; and
- (b) Whether the firm's own quality control policy and processes have been applied in practice and appropriate consultation has taken place in relation to difficult or contentious issues.

The senior audit partner responsible for the monitoring process:

- (a) Develops procedures for the systematic review of the conduct of a sample of completed audit engagements. The review is undertaken by competent individuals who, wherever possible, are independent of those performing the audit;
- (b) Develops appropriate course of action where failures are identified. Courses of action may involve communication of the findings within the firm, additional training and professional development; and
- (c) Ensures changes to the firm's policies and procedures and disciplinary action against those who repeatedly fail to comply with the firm's standards.

## **2.15 THREAT TO AUDITORS' INDEPENDENCE AND THEIR RESOLUTIONS**

The IFAC Code of Ethics for Professional Accountants gives a comprehensive coverage of threats to auditors' independence and their resolution. The Rules of Professional Conduct for Members also cover the same topic. Excerpts of the sections in the IFAC Code are adapted or reproduced in the following sections:

### **Threats to Independence**

Independence is potentially affected by:

- (a) self-interest,
- (b) self-review,
- (c) advocacy,
- (d) familiarity and
- (e) intimidation threats.

"Self-Interest Threat" refers to when a firm or a member of the assurance team could benefit from a financial interest in, or other self-interest conflict with, an assurance client.

Examples of circumstances that may create self-interest threat include:

- (a) A direct financial interest or material indirect financial interest in an assurance client;

- (b) A loan or guarantee to or from an assurance client or any of its directors or officers;
- (c) Undue dependence on total fees from an assurance client;
- (d) Concern about the possibility of losing the engagement
- (e) Having a close business relationship with an assurance client;
- (f) Potential employment with an assurance client; and
- (g) Contingent fees relating to assurance engagements.

“Self-Review Threat” occurs when:

- (a) any product or judgement of a previous assurance engagement or non-assurance engagement needs to be re-evaluated in reaching conclusions on the assurance engagement; or
- (b) when a member of the assurance team was previously a director or officer of the assurance client, or was an employee in a position to exert direct and significant influence over the subject matter of the assurance engagement.

Examples of circumstances that may create self-review threat include:

- (a) A member of the assurance team being, or having recently been, a director or officer of the assurance client;
- (b) A member of the assurance team being, or having recently been, an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement;
- (c) Performing services for an assurance client that directly affect the subject matter of the assurance engagement; and
- (d) Preparation of original data used to generate financial statements or preparation of other records that are the subject matter of the assurance engagement.

“Advocacy Threat” occurs when a firm, or a member of the assurance team, promotes, or may be perceived to promote, an assurance client’s position or opinion to the point that objectivity may, or may be perceived to be, compromised. Such may be the case if a firm or a member of the assurance team were to subordinate their judgement to that of the client.

Examples of circumstances that may create advocacy threat include:

- (a) Dealing in, or being a promoter of, shares or other securities in an assurance client; and
- (b) Acting as an advocate on behalf of an assurance client in litigation or in resolving disputes with third parties. “Familiarity Threat” occurs when, by virtue of a close relationship with an assurance client, its directors, officers or employees, a firm or a member of the assurance team becomes too sympathetic to the client’s interests.

Examples of circumstances that may create familiarity threat include:

- (a) A member of the assurance team having an immediate family member or close family member who is a director or officer of the assurance client;

- (b) A member of the assurance team having an immediate family member or close family member who, as an employee of the assurance client, is in a position to exert direct and significant influence over the subject matter of the assurance engagement;
- (c) A former partner of the firm being a director, officer of the assurance client or an employee in a position to exert direct and significant influence over the subject matter of the assurance engagement;
- (d) Long association of a senior member of the assurance team with the assurance client; and
- (e) Acceptance of gifts or hospitality, unless the value is clearly insignificant, from the assurance client, its directors, officers or employees.

“Intimidation Threat” occurs when a member of the assurance team may be deterred from acting objectively and exercising professional scepticism by threats, actual or perceived, from the directors, officers or employees of an assurance client.

Examples of circumstances that may create intimidation threat include:

- (a) Threat of replacement over a disagreement on the application of an accounting principle; and
- (b) Pressure to reduce inappropriately the extent of work performed in order to reduce fees.

### **Safeguards**

The firm and members of the assurance team have a responsibility to remain independent by taking into account the context in which they practice the threats to independence and the safeguards available to eliminate the threats or reduce them to an acceptable level.

When threats are identified:

- (a) Appropriate safeguards should be identified and applied to eliminate the threats or reduce them to an acceptable level;
- (b) This decision should be documented;
- (c) The nature of the safeguards to be applied will vary depending upon the circumstances;
- (d) Consideration should always be given to what a reasonable and informed third party having knowledge of all relevant information; including safeguards applied, and would reasonably conclude to be unacceptable; and
- (e) The consideration will be affected by matters such as the significance of the threat, the nature of the assurance engagement, the intended users of the assurance report and the structure of the firm.

Safeguards fall into three broad categories:

- (a) Safeguards created by the profession, legislation or regulation;
- (b) Safeguards within the assurance client; and
- (c) Safeguards within the firm’s own systems and procedures.

The firm and the members of the assurance team should select appropriate safeguards to eliminate or reduce threats to independence, other than those that are clearly insignificant, to an acceptable level.

Safeguards created by the profession, legislation or regulation, include the following:

- (a) Educational, training and experience requirements for entry into the profession;
- (b) Continuing education requirements;
- (c) Professional standards and monitoring and disciplinary processes;
- (d) External review of a firm's quality control system; and
- (e) Legislation governing the independence requirements of the firm.

Safeguards within the assurance client include the following:

- (a) When the assurance client's management appoints the firm, persons other than management ratify or approve the appointment;
- (b) The assurance client has competent employees to make managerial decisions;
- (c) Policies and procedures that emphasise the assurance client's commitment to fair financial reporting;
- (d) Internal procedures that ensure objective choices in commissioning non-assurance engagements; and
- (e) A corporate governance structure, such as an audit committee, that provides appropriate oversight and communications regarding a firm's services.

Audit committees have an important corporate governance role when they are independent of client management and, in performing their statutory role, assist the board of directors in satisfying themselves that a firm of auditors is independent in carrying out its audit role.

There should be regular communication between the firm and the audit committee (or other governance body if there is no audit committee) of listed entities, in the course of the audit, regarding relationships and other matters that might, in the firm's opinion, reasonably be thought to bear on independence.

The Companies and Allied Matters Act makes provision for the establishment of audit committees and stipulates their functions. The audit committee shall consist of an equal number of directors and representatives of the shareholders

of the company (subject to a maximum number of six members) and shall examine the auditors' report and make recommendations thereon to the annual general meeting as it may think fit.

Firms should establish policies and procedures relating to independence, communications with audit committees, or others charged with governance.

Safeguards within the firm's own systems and procedures may include firm-wide safeguards such as the following:

- (a) Firm leadership that stresses the importance of independence and the expectation that members of assurance teams will act in the public interest;
- (b) Policies and procedures to implement and monitor quality control of assurance engagements;
- (c) Documented independence policies regarding the identification of threats to independence, the evaluation of the significance of these threats and the identification and application of safeguards to eliminate or reduce the threats, other than those that are clearly insignificant to an acceptable level;
- (d) Internal policies and procedures to monitor compliance with firm policies and procedures as they relate to independence;
- (e) Policies and procedures that will enable the identification of interests or relationships between the firm or members of the assurance team and assurance clients;
- (f) Policies and procedures to monitor and, if necessary, manage the reliance on revenue received from a single assurance client;
- (g) using different partners and teams with separate reporting lines for the provision of non-assurance services to an assurance client;
- (h) Policies and procedures to prohibit individuals who are not members of the assurance team from influencing the outcome of the assurance engagement;
- (i) Timely communication of a firm's policies and procedures, and any changes thereto, to all partners and professional staff, including appropriate training and education thereon;
- (j) Designating a member of senior management as responsible for overseeing the adequate functioning of the safeguarding system;
- (k) Means of advising partners and professional staff of those assurance clients and related entities from which they must be independent;
- (l) A disciplinary mechanism to promote compliance with policies and procedures; and
- (m) Policies and procedures to empower staff to communicate to senior levels within the firm any issue of independence and objectivity that concerns them; this includes informing staff of the procedures open to them.
- (n) Safeguards within the firm's own systems and procedures may include engagement specific safeguards such as the following:
- (o) Involving an additional professional accountant to review the work done or otherwise advise as necessary. This individual could be someone from outside the firm, or someone within the firm or network firm who was not otherwise associated with the assurance team;
- (p) Consulting a third party, such as a committee of independent directors, a professional regulatory body or another professional accountant;
- (q) Rotation of senior personnel;
- (r) Discussing independence issues with the audit committee or others charged with governance;
- (s) Disclosing to the audit committee, or others charged with governance, the nature of services provided and extent of fees charged;

- (t) Policies and procedures to ensure members of the assurance team do not make, or assume responsibility for, management decisions for the assurance client;
- (u) Involving another firm to perform or re-perform part of the assurance engagement;
- (v) Involving another firm to re-perform the non-assurance service to the extent necessary to enable it to take responsibility for that service; and
- (w) Removing an individual from the assurance team, when that individual's financial interests or relationships create a threat to independence.

When the safeguards available, such as those described above, are insufficient to eliminate the threats to independence or to reduce them to an acceptable level, or when a firm chooses not to eliminate the activities or interests creating the threat, the only course of action available will be the refusal to perform, or withdrawal from, the assurance engagement.

## **2.16 CONFLICTS OF INTEREST, BENEFICIAL SHAREHOLDING, FINANCIAL INVOLVEMENT WITH OR IN THE AFFAIRS OF CLIENTS, PERSONAL RELATIONSHIPS, AUDIT FEE, ETC.**

The IFAC Code of Ethics for Professional Accountants gives a comprehensive coverage of conflicts of interest. The Rules of Professional Conduct for Members also cover the same topic. Excerpts of the sections in the IFAC Code are adapted or reproduced in the following sections for clarity.

### **Loans and Guarantees**

Ordinarily, banks and other financial institutions grant loans and advances to their varied customers as part of their normal business. Members of the assurance teams who are customers of such banks and other financial institutions may be granted loans and advances in the ordinary course of business. Loans and advances granted in the ordinary course of business may not necessarily constitute a threat to the independence of the auditors, but there are circumstances whereby such facilities granted may constitute a threat to independence.

### **Loan to the Firm**

A loan from, or a guarantee thereof, by an assurance client, that is, a bank or a similar institution to the firm would not create a threat to independence, provided:

- (a) The loan is made under normal lending procedures, terms and requirements; and
- (b) The loan is immaterial to both the firm and the assurance client.

If the loan is material to the assurance client or the firm it may be possible, through the application of safeguards, to reduce the self-interest threat created to an acceptable level. Such safeguards might include:

- (a) Involving an additional professional accountant from outside the firm;  
or
- (b) Network firm, to review the work performed.

### **Loan to a Member of the Assurance Team**

A loan from, or a guarantee thereof, by an assurance client, that is, a bank or a similar institution, to a member of the assurance team or their immediate family would not create a threat to independence provided the loan is made under normal lending procedures, terms and requirements. Examples of such loans include:

- (a) home mortgages;
- (b) bank overdrafts;
- (c) car loans; and
- (d) credit card balances.

Deposits and brokerage accounts of a firm or member of the assurance team with an assurance client.

In the same vein, deposits made by, or brokerage accounts of, a firm or a member of the assurance team with an assurance client that is a bank, broker or similar institution would not create a threat to independence provided the deposit or account is held under normal commercial terms.

Examples of self-interest threat created that would be so significant that no safeguard could reduce the threat to an acceptable level, unless the loan or guarantee is immaterial to both the firm and the member of the assurance team and the assurance client, are:

- (a) If the firm, or a member of the assurance team, makes a loan to an assurance client that is not a bank or similar institution, or guarantees such an assurance client's borrowing.
- (b) if the firm or a member of the assurance team accepts a loan from, or has borrowing guaranteed by, an assurance client that is not a bank or similar institution.

### **Close Business Relationships with Assurance Clients**

The Code of Ethics for Professional Accountants issued by the International Federation of Accountants provides that:

"A close business relationship between a firm or a member of the assurance team and the assurance client or its management, or between the firm, a network firm and an audit client, will involve a commercial or common financial interest and may create self-interest and intimidation threats".

The following are examples of such relationships:

- (a) Having a material financial interest in a joint venture with the assurance client or a controlling owner, director, officer or other individual who performs senior managerial functions for that client;

- (b) Arrangements to combine one or more services or products of the firm with one or more services or products of the assurance client and to market the package with reference to both parties; and
- (c) Distribution or marketing arrangements under which the firm acts as a distributor or marketer of the assurance client's products or services, or the assurance client acts as the distributor or marketer of the products or services of the firm.

### **Case of an Audit Client**

In the case of an audit client, unless the financial interest is immaterial and the relationship is clearly insignificant to the firm, the network firm and the audit client, no safeguards could reduce the threat to an acceptable level.

### **Case of Assurance Client which is not an Audit Client**

In the case of an assurance client that is not an audit client, unless the financial interest is immaterial and the relationship is clearly insignificant to the firm and the assurance client, no safeguards could reduce the threat to an acceptable level.

Consequently, in both these cases the only possible courses of action are to:

- (a) Terminate the business relationship;
- (b) Reduce the magnitude of the relationship so that the financial interest is immaterial and the relationship is clearly insignificant; or
- (c) Refuse to perform the assurance engagement.

Unless any such financial interest is immaterial and the relationship is clearly insignificant to the member of the assurance team, the only appropriate safeguard would be to remove the individual from the assurance team.

### **Case Involving an Interest Held by the firm or Member of the Assurance Team or Their Immediate Family**

In the case of an audit client, business relationships involving an interest held by the firm, a network firm or a member of the assurance team or their immediate family in a closely held entity when the audit client or a director or officer of the audit client, or any group thereof, also has an interest in that entity, do not create threats to independence provided:

- (a) The relationship is clearly insignificant to the firm, the network firm and the audit client;
- (b) The interest held is immaterial to the investor, or group of investors; and
- (c) The interest does not give the investor, or group of investors, the ability to control the closely held entity.

### **Purchase of Goods and Services from an Assurance Client by the Firm or a Member of the Assurance Team**

The purchase of goods and services from an assurance client by the firm (or from an audit client by a network firm) or a member of the assurance team would not generally create a threat to independence provided the transaction

is in the normal course of business and on an arm's length basis. However, such transactions may be of a nature or magnitude so as to create a self-interest threat. If the threat created is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level. Such safeguards might include:

- (a) Eliminating or reducing the magnitude of the transaction;
- (b) Removing the individual from the assurance team; or
- (c) Discussing the issue with those charged with governance, such as the audit committee.

### **Family and Personal Relationships**

The Code of Ethics for Professional Accountants issued by the International Federation of Accountants further provides that:

“Family and personal relationships between a member of the assurance team and a director, an officer or certain employees, depending on their role, of the assurance client, may create self-interest, familiarity or intimidation threats. It is impracticable to attempt to describe in detail the significance of the threats that such relationships may create. The significance will depend upon a number of factors including the individual's responsibilities on the assurance engagement, the closeness of the relationship and the role of the family member or other individual within the assurance client. Consequently, there is a wide spectrum of circumstances that will need to be evaluated and safeguards to be applied to reduce the threat to an acceptable level as discussed below”.

When an immediate family member of a member of the assurance team is a director, an officer or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement, or in such a position during any period covered by the engagement, the threats to independence can only be reduced to an acceptable level by removing the individual from the assurance team. The closeness of the relationship is such that no other safeguard could reduce the threat to independence to an acceptable level.

If application of this safeguard is not used, the only course of action is to withdraw from the assurance engagement. For example, in the case of an audit of financial statements, if the spouse of a member of the assurance team is an employee in a position to exert direct and significant influence on the preparation of the audit client's accounting records or financial statements, the threat to independence could only be reduced to an acceptable level by removing the individual from the assurance team.

When a close family member of a member of the assurance team is a director, an officer, or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement, threats to independence may be created. The significance of the threats will depend on factors such as:

- (a) The position, the close family member holds with the client; and
- (b) The role of the professional accountant on the assurance team.

The significance of the threat should be evaluated and, if the threat is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level. Such safeguards might include:

- (a) Removing the individual from the assurance team;
- (b) Where possible, structuring the responsibilities of the assurance team so that the professional does not deal with matters that are within the responsibility of the close family member; or
- (c) Policies and procedures to empower staff to communicate to senior levels within the firm any issue of independence and objectivity that concerns them.

In addition, self-interest, familiarity or intimidation threats may be created when a person who is other than an immediate or close family member of a member of the assurance team, has a close relationship with the member of the assurance team and is a director, an officer or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement.

Therefore, members of the assurance team are responsible for identifying any such persons and for consulting in accordance with firm procedures. The evaluation of the significance of any threat created and the safeguards appropriate to eliminate the threat or reduce it to an acceptable level, will include considering matters such as the closeness of the relationship and the role of the individual within the assurance client.

Consideration should be given to whether self-interest, familiarity or intimidation threats may be created by a personal or family relationship between a partner or employee of the firm who is not a member of the assurance team and a director, an officer or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement. Therefore partners and employees of the firm are responsible for identifying any such relationships and for consulting in accordance with firm procedures. The evaluation of the significance of any threat created and the safeguards appropriate to eliminate the threat or reduce it to an acceptable level will include considering matters such as the closeness of the relationship, the interaction of the firm professional with the assurance team, the position held within the firm, and the role of the individual within the assurance client.

An inadvertent violation of this section as it relates to family and personal relationships would not impair the independence of a firm or a member of the assurance team when:

- (a) The firm has established policies and procedures that require all professionals to report promptly to the firm any breaches resulting from changes in the employment status of their immediate or close family members or other personal relationships that create threats to independence;
- (b) Either the responsibilities of the assurance team are re-structured so that the professional does not deal with matters that are within the responsibility of the person with whom he or she is related or has a personal relationship, or, if this is not possible, the firm promptly removes the professional from the assurance engagement; and
- (c) Additional care is given to reviewing the work of the professional.

When an inadvertent violation of this section relating to family and personal relationships has occurred, the firm should consider whether any safeguards should be applied. Such safeguards might include:

- (a) Involving an additional professional accountant who did not take part in the assurance engagement to review the work done by the member of the assurance team; or
- (b) Excluding the individual from any substantive decision-making concerning the assurance engagement.

### **Employment with Assurance Clients**

“A firm or a member of the assurance team’s independence may be threatened if a director, an officer or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement, has been a member of the assurance team or partner of the firm. Such circumstances may create self-interest, familiarity and intimidation threats particularly when significant connections remain between the individual and his or her former firm. Similarly, a member of the assurance team’s independence may be threatened when an individual participates in the assurance engagement knowing, or having reason to believe, that he or she is or may, join the assurance client some time in the future”. If a member of the assurance team, partner or former partner of the firm has joined the assurance client, the significance of the self-interest, familiarity or intimidation threats created will depend upon the following factors:

- (a) The position the individual has taken at the assurance client;
- (b) The amount of any involvement the individual will have with the assurance team;
- (c) The length of time that has passed since the individual was a member of the assurance team or firm; and
- (d) The former position of the individual within the assurance team or firm.

The significance of the threat should be evaluated and, if the threat is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level. Such safeguards might include:

- (a) Considering the appropriateness or necessity of modifying the assurance plan for the assurance engagement; or
- (b) Assigning an assurance team to the subsequent assurance engagement that is of sufficient experience in relation to the individual who has joined the assurance client.

In the course of their work, auditors may provide advice on sources of capital that meet the client specifications or criteria, and provide structuring advice and assist a client in analysing the accounting effects of proposed transactions.

Safeguards that should be considered include:

- (a) Policies and procedures to prohibit individuals assisting the assurance client from making managerial decisions on behalf of the client;
- (b) Using professionals who are not members of the assurance team to provide the services; and
- (c) Ensuring the firm does not commit the assurance client to the terms of any transaction or consummate a transaction on behalf of the client.

## **FEES AND PRICING**

### **Fees - Relative Size**

When the total fees generated by an assurance client represent a large proportion of a firm's total fees, the dependence on that client or client group and concern about the possibility of losing the client may create a self-interest threat".

The significance of the threat will depend upon factors such as:

- (a) The structure of the firm; and
- (b) Whether the firm is well established or newly created.
- (c) The significance of the threat should be evaluated and, if the threat is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level. Such safeguards might include:
  - (i) Discussing the extent and nature of fees charged with the audit committee, or others charged with governance;
  - (ii) Taking steps to reduce dependency on the client;
  - (iii) External quality control reviews; and
  - (iii) Consulting a third party, such as a professional regulatory body or another professional accountant.

A self-interest threat may also be created when the fees generated by the assurance client represent a large proportion of the revenue of an individual partner. The significance of the threat should be evaluated and, if the threat is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level.

Such safeguards might include:

- (a) Policies and procedures to monitor and implement quality control of assurance engagements; and

- (b) Involving an additional professional accountant who was not a member of the assurance team to review the work done or otherwise advise as necessary.

### **Fees - Overdue**

“A self-interest threat may be created if fees due from an assurance client for professional services remain unpaid for a long time, especially if a significant part is not paid before the issue of the assurance report for the following year.

Generally the payment of such fees should be required before the report is issued”. The following safeguards may be applicable:

- (a) Discussing the level of outstanding fees with the audit committee, or others charged with governance;
- (b) Involving an additional professional accountant who did not take part in the assurance engagement to provide advice or review the work performed; and
- (c) The firm should also consider whether the overdue fees might be regarded as being equivalent to a loan to the client and whether, because of the significance of the overdue fees, it is appropriate for the firm to be re-appointed.

### **Pricing**

When a firm obtains an assurance engagement at a significantly lower fee level than that charged by the predecessor firm, or quoted by other firms, the self-interest threat created will not be reduced to an acceptable level unless:

- (a) The firm is able to demonstrate that appropriate time and qualified staff are assigned to the task; and
- (b) All applicable assurance standards, guidelines and quality control procedures are being complied with.

### **Contingent Fees**

“Contingent fees are fees calculated on a predetermined basis relating to the outcome or result of a transaction or the result of the work performed. For the purposes of this section, fees are not regarded as being contingent if a court or other public authority has established them.

A contingent fee charged by a firm in respect of an assurance engagement creates self-interest and advocacy threats that cannot be reduced to an acceptable level by the application of any safeguard.

Accordingly, a firm should not enter into any fee arrangement for an assurance engagement under which the amount of the fee is contingent on the result of the assurance work or on items that are the subject matter of the assurance engagement.

A contingent fee charged by a firm in respect of a non-assurance service provided to an assurance client, may also create self-interest and advocacy threats.

If the amount of the fee for a non-assurance engagement was agreed to, or contemplated, during an assurance engagement and was contingent on the result of that assurance engagement, the threats could not be reduced to an acceptable level by the application of any safeguard.

Accordingly, the only acceptable action is not to accept such arrangements". For other types of contingent fee arrangements, the significance of the threats created will depend on factors such as:

- (a) The range of possible fee amounts;
- (b) The degree of variability;
- (c) The basis on which the fee is to be determined;
- (d) Whether the outcome or result of the transaction is to be reviewed by an independent third party; and
- (e) The effect of the event or transaction on the assurance engagement.

The significance of the threats should be evaluated and, if the threats are other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threats to an acceptable level. Such safeguards might include:

- (a) Disclosing to the audit committee, or others charged with governance, the nature and extent of fees charged;
- (b) Review or determination of the final fee by an unrelated third party; or
- (c) Quality and control policies and procedures.

### **Gifts and Hospitality**

"Accepting gifts or hospitality from an assurance client may create self-interest and familiarity threats. When a firm or a member of the assurance team accepts gifts or hospitality, unless the value is clearly insignificant, the threats to independence cannot be reduced to an acceptable level by the application of any safeguard. Consequently, a firm or a member of the assurance team should not accept such gifts or hospitality".

### **Actual or Threatened Litigation**

"When litigation takes place, or appears likely, between the firm or a member of the assurance team and the assurance client, a self-interest or intimidation threat may be created.

The relationship between client management and the members of the assurance team must be characterised by complete candor and full disclosure regarding all aspects of a client's business operations. The firm and the client's management may be placed in adversarial positions by litigation, affecting management's willingness to make complete disclosures and the firm may face a self-interest threat". The significance of the threat created will depend upon such factors as:

- (a) The materiality of the litigation;
- (b) The nature of the assurance engagement; and
- (c) Whether the litigation relates to a prior assurance engagement.

Once the significance of the threat has been evaluated, the following safeguards should be applied, if necessary, to reduce the threats to an acceptable level:

- (a) Disclosing to the audit committee, or others charged with governance, the extent and nature of the litigation;
- (b) If the litigation involves a member of the assurance team, removing that individual from the assurance team; or
- (c) Involving an additional professional accountant in the firm who was not a member of the assurance team to review the work done or otherwise advise as necessary.

If such safeguards do not reduce the threat to an appropriate level, the only appropriate action is to withdraw from, or refuse to accept, the assurance engagement.

### **Resolution of Ethical Conflicts**

From time to time professional accountants encounter situations which give rise to conflicts of interest. Such conflicts may arise in a wide variety of ways, ranging from the relatively trivial dilemma to the extreme case of fraud and similar illegal activities. The professional accountant should be constantly conscious of and be alert to factors which give rise to conflicts of interest. It should be noted that an honest difference of opinion between professional accountant and another party is not in itself an ethical issue. However, the facts and circumstances of each case need investigation by the parties concerned.

It is recognised, however, that there can be particular factors which occur when the responsibilities of a professional accountant may conflict with internal or external demands of one type or another. Hence:

- (a) There may be the danger of pressure from an overbearing supervisor, manager, director or partner; or when there are family or personal relationships which can give rise to the possibility of pressures being exerted upon them. Indeed, relationship or interests which could adversely influence, impair or threaten a professional accountant's integrity should be discouraged;
- (b) A professional accountant may be asked to act contrary to technical and/or professional standards;
- (c) A question of divided loyalty as between the professional accountant's superior and the required professional standards of conduct could occur; and
- (d) Conflict could arise when misleading information is published which may be to the advantage of the employer or client and which may not benefit the professional accountant as a result of such publication.

"In applying standards of ethical conduct professional accountants may encounter problems in identifying unethical behaviour or in resolving an ethical conflict. When faced with significant ethical, professional accountants should follow the established policies of the employing organisation to seek a resolution of such conflict".

If those policies do not resolve the ethical conflict, the following should be considered:

- (a) Review the conflict problem with the immediate superior. If the problem is not resolved with the immediate superior and the professional accountant determines to go to the next managerial level, the immediate superior should be notified of the decision. If it appears that the superior is involved in the conflict problem, the professional accountant should raise the issue with the next higher level of management. When the immediate is the Chief Executive Officer (or equivalent) the next higher reviewing level may be the Executive Committee, Board of Directors, Non-Executive Directors, Trustee, Partners' Management Committee or Shareholders;
- (b) Seek counselling and advice on a confidential basis with an independent advisor or the applicable professional accountancy body to obtain an understanding of possible courses of action; and
- (c) If the ethical conflict still exists fully exhausting all levels of internal review, the professional accountant as a last resort may have no other recourse on significant matters (e.g. fraud) resign and submit an information memorandum to an appropriate representative of that organisation.

In Nigeria, the banking laws and regulations require cases of fraud to be reported to the regulatory authorities.

Any professional accountant in a senior position should endeavour to ensure that policies are established within his or her employing organisation to seek resolution of conflicts.

The professional bodies should provide confidential counselling and advice to members who experience ethical conflicts. The Institute of Chartered Accountants of Nigeria requires a member who is in doubt as to his or her ethical position in any matter to seek advice of the Institute through the Registrar/Chief Executive.

## **2.17 SUMMARY AND CONCLUSIONS**

This Chapter extensively dealt with provisions of the Companies and Allied Matters Act 2004 on auditors' appointment, duties, remuneration, rights and obligations, etc; Provisions of Insurance, Pension Reforms, Nigerian Accounting Standards Board, Securities and Exchange Commission, Nigeria Deposit Insurance Corporation and Central Bank of Nigeria Acts which are relevant to the auditor on the conduct of an audit exercise.

The various professional pronouncements in respect of guidelines, standards, code of ethics, and general conduct for Professional Accountants issued by the Institute of Chartered Accountants of Nigeria (ICAN) and the International Federation of Accountants (IFAC) were fully discussed.

Readers are also provided with the opportunity of familiarising themselves with an up-to-date Local and International Auditing Standards/Guidelines to be followed while carrying out an audit assignment.

The need for quality control as regards Working Papers, Audit Personnel's supervision/monitoring, independent and peer review were also treated.

Finally, the chapter is concluded with discussions on issues on threats to auditors independence and their resolutions, conflict of interest including beneficial shareholding and financial involvement of an auditor in client's affairs.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

## **2.18 REVISION QUESTIONS**

### **2.18.1 MULTIPLE CHOICE QUESTIONS**

1. The Companies and Allied Matters Act provides that every company shall at each annual general meeting appoint an auditor or auditors to audit the financial statements of the company, and to hold office from the conclusion of that, until the conclusion of the next, annual general meeting.
  - (A) The auditor should hold office in perpetuity
  - (B) The auditor should participate in the tendering process annually
  - (C) True
  - (D) False
  - (E) The provision has recently been repealed.
  
2. The Banks and Other Financial Institutions Act provides that a bank shall not later than four months after the end of its financial year cause to be published in a daily newspaper printed in and circulating in Nigeria and approved by the Central Bank; copies of the bank's balance sheet and profit and loss account duly signed
  - (A) True
  - (B) Untrue
  - (C) The accounts may be published any time before the end of the next financial year
  - (D) The provisions of the Companies and Allied Matters Act supersede those of the Banks and Other Financial Institutions Act, in this respect
  - (E) The accounting standards supersede the Banks and Other Financial Institutions Act.
  
3. The Nigeria Deposit Insurance Corporation (NDIC), was established as part of the reform measures taken to strengthen the safety net for the banking sector following the introduction in 1986 of a major economic reform programme, the Structural Adjustment Programme (SAP) by government to correct the observed imbalances in the economy.
  - (A) True
  - (B) Untrue
  - (C) SAP was approved by the National Assembly
  - (D) NDIC is a parastatal of the Nigerian Stock Exchange
  - (E) NDIC is a subsidiary of Central Bank of Nigeria.

4. Quality control policy and processes are designed to provide reasonable assurance as to the appropriateness of the auditors' report and of adherence to auditing standards, ethical and other regulatory requirements
  - (A) True
  - (B) Untrue
  - (C) Quality control is not required on audit of quoted companies.
  - (D) Regulatory authorities are responsible for quality control.
  - (E) Since financial statements are published, they pass the quality control test.
  
5. Wider quality assurance objectives may be achieved by the auditors by discussing audit performance with
  - (A) boards of directors,
  - (B) audit committees (where they exist)
  - (C) senior management
  - (D) regulatory authorities
  - (E) board of directors, audit committees and senior management.

### 2.18.2 SHORT ANSWER QUESTIONS

- (1) State the circumstances in which the remuneration of the auditors of a company may be fixed by the directors
  
- (2) Where a company suffers loss or damage as a result of the failure of its auditor to discharge the fiduciary duty imposed on him, what options are available under the Companies and Allied Matters Act to the directors?
  
- (3) In which circumstances shall a person not be eligible for appointment as the approved auditor of a bank under the Banks and Other Financial Institutions Act?
  
- (4) The Nigerian Accounting Standards Board Act 2003 seeks to promote and enforce compliance with the accounting standards to be observed in the preparation of financial statements. NASB Act 2003 prescribes stiff penalties for non-compliance with accounting standards issued by the NASB. State three penalties prescribed by the Act.
  
- (5) Family and personal relationships between a member of the assurance team and a director, an officer or certain employees, depending on their role, of the assurance client, may create self-interest, familiarity or intimidation threats. State what the audit firm should do to reduce the threats to independence to an acceptable level.

*Refer to Suggested Solutions in Appendix I on page 301.*

## ***INTERNAL AUDIT AND CONTROL***

### **3.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to:

- ◆ Understand the scope and objectives of internal audit.
- ◆ Review the relationship between external and internal audits.
- ◆ Understand Internal Control Systems.
- ◆ Explore the options, opportunities and challenges for outsourcing the internal audit function.

### **3.1 INTRODUCTION**

At the planning stage of an audit, the external auditors should consider the activities of internal audit and their effect, if any, on external audit procedures. This chapter considers the scope and objectives of internal audit. The scope and objectives of internal audit vary widely and depend on the size and structure of the entity and the requirements of its management and directors.

The student taking professional examinations of the Institute of Chartered Accountants of Nigeria should have understanding of the separate roles of internal audit and external audit, and how they are interrelated. It is important to know that the role of internal audit is determined by management and the directors who set its objectives. However, the external auditors are engaged to report independently on the financial statements; their role is statutory in nature.

The external auditors' primary concern is whether the financial statements are free of material misstatement. The internal audit function's objectives vary according to the requirements of management and the directors and, generally, less emphasis is placed on materiality consideration.

The means of achieving their respective objectives are often similar and thus certain of the work of internal auditors may be useful in determining the nature, and timing of external audit procedures. If an entity has an audit committee, monitoring the activities of the internal audit function and the relationship between the entity's internal and external auditors is often one of that committee's responsibilities.

As part of the planning of an audit, an auditor should have understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach.

The auditor should use professional judgement to assess the components of audit risk and to design audit procedures to ensure it is reduced to an acceptably low level.

Auditors are only concerned with those policies and procedures within the accounting and internal control systems that are relevant to the financial statement assertions. The understanding of relevant aspects of the accounting and internal control systems, together with the inherent and control risk assessment, enables auditors to:

- (a) assess the adequacy of the accounting system as a basis for preparing the financial statements;
- (b) identify the types of potential misstatements, that could occur in the financial statements;
- (c) Consider factors that affect the risk of misstatements; and
- (d) Design appropriate audit procedures.

The learning objectives of this chapter have been carefully considered in structuring the topics in this chapter. A careful study of this chapter will enable the reader to understand the scope and objectives of internal audit, understand the relationship between external and internal audits as well as internal control systems. At the end of this chapter, the reader should be able to answer typical examination questions on internal audit and control.

### **3.2 SCOPE AND OBJECTIVES OF INTERNAL AUDIT**

The APB statement of auditing standard 500 is titled “Considering the work of internal audit”

At the planning stage of an audit, the external auditors should consider the activities of internal audit and their effect, if any, on external audit procedures

The standard describes ‘Internal audit’ as an appraisal or monitoring activity established by management and the directors for the review of the accounting and internal control systems as a service to the entity. Internal audit functions by:

- (a) examining,
- (b) evaluating and reporting to management and the directors on the adequacy and effectiveness of components of the accounting and internal control systems.

The external auditors have sole responsibility for:

- (a) The audit opinion expressed;
- (b) Determining the nature, timing and extent of external audit procedures;
- (c) All judgements relating to the audit of the financial statements of the external auditors;
- (d) That responsibility is not reduced by any use, made of internal audit work; and
- (e) However, internal audit work may serve to provide external auditors with audit evidence.

“The scope and objectives of internal audit vary widely and depend on the size and structure of the entity and the requirements of its management and directors.

Generally, internal audit activities include one or more of the following:

- (a) Review of the accounting and internal control systems: the establishment of adequate accounting and internal control systems is a responsibility of management and the directors which demands proper attention on a continuous basis. Often internal audit is assigned specific responsibility for reviewing, the design of the systems, monitoring their operation and recommending improvements thereto;
- (b) Examination of financial and operating information: this may include review of the means used to identify, measure, classify and report such information and specific enquiry, into individual items including detailed testing of transactions, balances and procedures;
- (c) Review of the economy, efficiency and effectiveness of operations including non-financial controls of an organisation;
- (d) Review of compliance with laws, regulations and other external requirements and with internal policies and directives and other requirements including appropriate authorisation of transactions; and
- (e) Special investigations into particular areas, for example suspected fraud” (Chitty, 2004).

### **3.3 REVIEW OF THE RELATIONSHIP BETWEEN EXTERNAL AND INTERNAL AUDITS**

#### **Roles of External Audit and Internal Audit**

The role of internal audit is determined by management and the directors who set its objectives. External auditors are engaged to report independently on the financial statements; their role is statutory. The external auditors’ primary concern is whether the financial statements are free of material misstatement.

The internal audit function’s objectives vary according to the requirements of management and the directors, and generally, less emphasis is placed on materiality consideration.

#### **Evaluating Specific Internal Audit Work**

APB SAS 500 on ‘Considering the work of internal audit’ further states that “when the external auditors use specific internal audit work to reduce the extent of their audit procedures, they should evaluate that work to confirm its adequacy for their purposes”.

‘The evaluation of specific internal audit work involves consideration of the adequacy of the scope of work and related audit programmes and whether the assessment of the internal audit function remains appropriate. This evaluation may include consideration of whether:

- (a) the work is performed by persons having adequate technical training and proficiency as internal auditors;
- (b) the work of assistants is properly supervised, reviewed and documented;
- (c) sufficient appropriate audit evidence is obtained to afford a reasonable basis for the conclusions reached;
- (d) the conclusions reached are appropriate in the circumstances;
- (e) any reports prepared by internal audit are consistent with the results of the work performed;
- (f) any exceptions or unusual matters disclosed by internal audit are properly resolved;
- (g) amendments to the external audit programme are required as result of matters identified by internal audit work; and
- (h) there is a need to test the work of internal audit to confirm its adequacy (Chitty, 2004).

The nature, timing and extent of the testing, if any, of the specific internal audit work which the external auditors consider necessary depends on:

- (a) Their judgement as to the risk and materiality of the area concerned;
- (b) The assessment of the internal audit function; and
- (c) The results of the other evaluation procedures.

Such tests may include examination of items already examined by internal audit, examination of other similar items and observation of internal audit procedures.

In the event that the external auditors conclude that the internal audit work is not adequate for their purposes:

- (a) They extend their procedures beyond those originally planned; and
- (b) Ensure that sufficient appropriate audit evidence, is obtained to support the conclusions reached.

### **3.4 ACCOUNTING AND INTERNAL CONTROL SYSTEMS AND AUDIT RISK ASSESSMENTS**

As part of the planning of an audit, an auditor should:

- (a) Obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach; and
- (b) Use professional judgement to assess the components of audit risk and to design audit procedures to ensure it is reduced to an acceptably low level.

The following definitions are contained in APB Statement of Auditing Standard 300 on 'Accounting and internal control systems and audit risk assessments':

**'Audit risk'** means the risk that auditors may give an inappropriate audit opinion on financial statements. Audit risk has three components: inherent risk, control risk and detection risk.

**‘Inherent risk’** is the susceptibility of an account balance or class of transactions to material misstatement, either individual or when aggregated with misstatements in other balances or classes, irrespective of related internal controls.

**‘Control risk’** is the risk that a misstatement could occur in an account balance or class of transactions and that could be material, either individually or when aggregated with misstatements in other balances or classes, would not be prevented, or detected and corrected on a timely basis by the accounting and internal control systems.

**‘Detection risk’** is the risk that auditors’ substantive procedures (tests of details of transactions and balances or analytical procedures) do not detect a misstatement that exists in an account balance or class of transactions that could be material, either individually or when aggregated with misstatements in other balances or classes.

**‘Accounting system’** means the series of tasks and records of an entity by which transactions are processed as a means of maintaining financial records. Such systems identify, assemble, analyse, calculate, classify, record, summarise and report transactions and other events.

Internal control system comprises the control environment and control procedures. It includes all the policies and procedures (internal controls) adopted by the directors and management of an entity to assist in achieving their objective of ensuring, as far as practicable, the orderly and efficient conduct of its business, including adherence to internal policies, the safeguarding of assets, the prevention and detection of fraud and error, the accuracy and completeness of the accounting records, and timely preparation of reliable financial information.

Internal controls may be incorporated within computerised accounting systems. However, the internal control system extends beyond those matters which relate directly to the accounting system.

Control environment means the overall attitude, awareness and actions of directors and management regarding internal controls and their importance in the entity.

The control environment encompasses the management style, and corporate culture and values shared by all employees. It provides the background against which the various other controls are operated. However, a strong control environment does not, by itself, ensure the effectiveness of the overall internal control system. Factors reflected in the control environment include:

- (a) The philosophy and operating style of the directors and management;
- (b) The entity’s organisational structure and methods of assigning authority and responsibility (including segregation of duties and supervisory controls); and

- (c) The directors' methods of imposing control, including the internal audit function, the functions of the board of directors and personnel policies and procedures.

Control procedures are those policies and procedures in addition to the control environment which are established to achieve the entity's specific objectives. They include, in particular procedures designed to prevent or to detect and correct errors. The latter may be a particular focus of high level controls in small or owner-managed entities. Specific control procedures include:

- (a) Approval and control of documents;
- (b) Controls over computerised system and the information technology environment;
- (c) Checking the arithmetical accuracy of the records;
- (d) Maintaining and reviewing control accounts and trial balances;
- (e) Reconciliations;
- (f) Comparing the results of cash, security and stock counts with accounting records;
- (g) Comparing internal data with external sources of information; and
- (h) Limiting direct physical access to assets and records.

Auditors are only concerned with those policies and procedures within the accounting and internal control systems that are relevant to the financial statement assertions. The understanding of relevant aspects of the accounting and internal control systems, together with the inherent and control risk assessment enables auditors to:

- (a) Assess the adequacy of the accounting system as a basis for preparing the financial statements;
- (b) Identify the types of potential misstatements that could occur in the financial statements;
- (c) Consider factors that affect the risk of misstatements; and
- (d) Design appropriate audit procedures" (Chitty, 2004)

At the planning stage of the audit, the auditors should consider:

- (a) The likelihood of error in the light of inherent risk; and
- (b) The system of internal control (control risk) in order to determine the extent of work and hence the level of detection risk required; to satisfy themselves that the risk of error in the financial statements is sufficiently low.

### **Inherent risk**

APB SAS 300 on 'Accounting and internal control systems' states that "in developing the audit approach and the detailed procedures, auditors should assess inherent risk in relation to financial statement assertions, about material account balances and classes of transactions, taking account of factors relevant both to the entity as a whole and to the specific assertions".

In the absence of information to assess the inherent risk for a specific account balance, or class of transactions, the auditors should assume that the inherent risk is high. However, when an assessment results in the inherent risk not to be high, the auditors must document the reasons and are able to reduce the work which would otherwise have been carried out' (Chitty, 2004).

To assess inherent risk:

- (a) Auditors use their professional judgement to evaluate numerous factors having regard to their experience of the entity from previous audits;
- (b) Any controls established by management to compensate for a high level of inherent risk; and
- (c) Their knowledge of any significant changes which have taken place.

Examples of the factors are:

At the entity level

- (a) The integrity of directors and management;
- (b) Management experience and knowledge and changes in management during the period;
- (c) Unusual pressures on directors or management, such as tight reporting deadlines, market expectations or other circumstances that might predispose them to misstate the financial statements;
- (d) The nature of the entity's business;
- (e) Factors affecting the industry in which the entity operates.

At the account balance and class of transaction level:

- (a) Financial statement accounts likely to be susceptible to misstatements;
- (b) The complexity of underlying transactions and other events which might require the use of the work of an expert;
- (c) The degree of judgement involved in determining account balances;
- (d) Susceptibility of assets to loss or misappropriation, for example, assets which are highly desirable and movable such as cash;
- (e) The quality of the accounting systems;
- (f) The completion of unusual and complex transactions, particularly at or near period end; and
- (g) Transactions not subjected to ordinary processing (Chitty, 2004).

### **Accounting System and Control Environment**

APB SAS 300 on 'Accounting and internal control systems' states that "in planning the audit, auditors should obtain and document an understanding of the accounting system and control environment sufficient to determine their audit approach".

Auditors obtain an understanding of the accounting system sufficient, to enable them to identify and understand by documenting:

- (a) major classes of transactions in the entity's operations;
- (b) how such transactions are initiated;

- (c) significant accounting records, supporting documents and accounts in the financial statements; and
- (d) the accounting and financial reporting process, from the initiation of significant transactions and other events to their inclusion in the financial statements.

In order to assess the likely effectiveness of control procedures, the auditor must have an understanding of the control environment.

A strong control environment, for example, one with strong budgetary controls and an effective internal audit function, increases the effectiveness of control procedures.

A small entity's control environment may be strengthened by the close involvement of the directors, including their review of financial information.

Based on their understanding of the accounting system and control environment:

- (i) Auditors can make a preliminary assessment of the adequacy of the system as a basis for the preparation of the financial statements; and
- (ii) The likely mix of tests of control and substantive procedures.

An auditor must obtain an understanding of the accounting system, control environment and control procedures (i.e. the systems) as one exercise. However, in order to design and select the appropriate audit tests, it may be necessary for them to undertake additional work to obtain a more detailed understanding of specific control procedures.

When seeking an understanding of the accounting systems and control environment, sufficient to plan the audit the auditors should:

- (a) Gain knowledge of the design and operation of the systems;
- (b) Understand and assess inherent risks; and
- (c) Perform 'walk-through tests' that is: tracing one or more transactions through the accounting system and observing the application of relevant aspects of the internal control system.

The nature, timing and extent of the procedures performed by auditors to obtain an understanding of the systems vary, because of:

- (a) Materiality considerations;
- (b) The size and complexity of the entity;
- (c) Their assessment of inherent risk;
- (d) The complexity of the entity's computer systems;
- (e) The type of internal controls involved; and
- (f) The nature of the entity's documentation of specific internal controls.

Usually, the auditors' understanding of the systems is obtained through previous experience with the entity updated as necessary by:

- (a) Enquiries of appropriate supervisory and other personnel at various organisational levels within the entity, together with reference to

documentation such as procedures manuals, job descriptions and systems descriptions;

- (b) Inspection of relevant documents and records produced by the systems; and
- (c) Observation of the entity's activities and operations, including the information technology function's organisation, personnel performing control procedures and the nature of transaction processing (Chitty, 2004).

### **Internal Controls and their Inherent Limitations**

Internal controls established by the directors relating to the accounting system are concerned with achieving objectives such as:

- (a) Transactions are executed in accordance with proper, general or specific authorisation;
- (b) All transactions and other events are promptly recorded at the correct amount, in the appropriate accounts and in the proper accounting period, so as to permit preparation of financial statements in accordance with the applicable reporting framework (e.g. relevant legislation and applicable accounting standards);
- (c) Access to assets is permitted only in accordance with proper authorisation; and
- (d) Recorded assets are compared with the existing assets at reasonable intervals and appropriate action is taken with regard to any differences.

An internal control system can only provide the directors with reasonable confidence that their objectives are reached because of inherent limitations such as:

- (a) The usual requirement that the cost of an internal control is not disproportionate to the potential loss which may result from its absence;
- (b) Most systematic internal controls tend to be directed at routine transactions rather than non-routine transactions;
- (c) The potential for human error due to carelessness, distraction, mistakes of judgement and the misunderstanding of instruction;
- (d) The possibility of circumvention of internal controls through collusion with parties outside or inside the entity;
- (e) The possibility that a person responsible for exercising an internal control could abuse that responsibility, for example by overriding an internal control; and
- (f) The possibility that procedures may become inadequate due to changes in conditions or that compliance with procedures may deteriorate over time (Chitty, 2004).

These factors indicate why auditors cannot obtain all their evidence from tests of the system of internal control.

### **Control Risk in the Small Business**

Auditors must obtain an appropriate level of audit evidence to support their audit opinion regardless of the size of the entity.

However, many internal controls relevant to large entities are not practical in the small business; for example, in small businesses accounting procedures may be performed by few persons, who may have both operating and custodial responsibilities and, consequently, segregation of duties may be severely limited. Inadequate segregation of duties may, in some cases, be offset by other control procedures and close involvement of an owner or manager in strong supervisory controls where they have direct personal knowledge of the entity and involvement in transactions though, this in itself may introduce other risks. In circumstances where segregation of duties is limited and evidence of supervisory controls is lacking, the audit evidence necessary to support the auditors' opinion on the financial statements may have to be obtained entirely through the performance of substantive procedures and any audit work carried out in the course of preparing the financial statements.

**Control Risk**

If auditors, after obtaining an understanding of the accounting system and control environment, expect to be able to rely on their assessment of control risk to reduce the extent of their substantive procedures, they should make a preliminary assessment of control risk for material financial statement assertions, and should plan and perform tests of control to support that assessment.

If, as a result of their work on the accounting system and control environment, auditors decide it is likely to be inefficient or impossible to rely on any assessment of control risk to reduce their substantive procedures, no such assessment is necessary and control risk is assumed to be high. The auditors may adopt substantive procedures in such cases.

**Preliminary Assessment of Control Risk**

The preliminary assessment of control risk is the process of evaluating the likely effectiveness of an entity's accounting and internal control systems in preventing and correcting material misstatements. This entails consideration of the design of the accounting and internal control systems to assess their likely effectiveness. There is, however, always some control risk because of the inherent limitations of any internal control system. The more effective the entity's accounting and internal control systems are assessed to be, the lower the auditors' assessment of control risk.

Where auditors obtain satisfactory audit evidence from tests of control as to the effectiveness of the accounting and internal control systems, the extent of substantive procedures may be reduced.

Auditors may conclude that the accounting and internal control systems are not effective, or they may decide that it is likely to be inefficient to adopt an audit approach which relies on tests of control. In these circumstances they plan the audit approach on the basis that sufficient and appropriate audit evidence needs to be obtained entirely from substantive procedures and from any audit work carried out in the preparation of the financial statements.

### **Relationship Between the Assessments of Inherent and Control Risks**

Management often react to situations where inherent risk is high by designing accounting and internal control systems to prevent and detect misstatements and therefore, in many cases, inherent risk and control risk are highly interrelated. In such situations, the effects of inherent and control risk may be more appropriately determined by making a combined assessment” (Chitty, 2004).

### **Documentation of Understanding and Assessment of Control Risk**

When control risk is assessed at less than high, auditors should document the basis for that conclusion in their working paper file.

Different techniques may be used to document information relating to accounting and internal control systems and the assessment of control risk. Selection of a particular technique is a matter for the auditors’ judgement.

Common techniques, used alone or in combination, are narrative descriptions, questionnaires, checklists and flow-charts. The form and extent of this documentation is influenced by the size and complexity of the entity and the nature of the entity’s accounting and internal control systems.

Generally, the more complex the entity’s accounting and internal control systems are, the more extensive the auditors’ procedures, the more extensive the documentation needs to be.

### **Test of Control**

Tests of control are performed to obtain audit evidence about the effective operation of the accounting and internal control systems - that is, that properly designed controls identified in the preliminary assessment exist in fact and have operated effectively throughout the relevant period. They include tests of elements of the control environment where strengths in the control environment are used by auditors to reduce control risk assessments.

In the process of obtaining the understanding of the accounting and internal control systems, some tests of control on one assertion may provide audit evidence about the effectiveness of the operation of internal controls relevant to another assertion and, consequently, serve as tests of control for the other assertion. For example, “in obtaining the understanding of the accounting and internal control systems pertaining to cash, auditors may obtain audit evidence about the effectiveness of the bank reconciliation process, through enquiry and observation.

In these circumstances, when auditors conclude that procedures performed to obtain the understanding of the accounting and internal control systems also provide audit evidence about the operating effectiveness of policies and procedures relevant to a particular financial statement assertion, they may use that evidence, on its own or (if not in itself sufficient) with other appropriate audit evidence, to support a control risk assessment at less than high.

Tests of control may include:

- (a) Corroborative enquiries about, and observation of, internal control functions;
- (b) Inspection of documents supporting controls or events to gain audit evidence that internal controls have operated properly, for example, verifying that a transaction has been authorised or a reconciliation approved;
- (c) Examination of evidence of management reviews, for example minutes of management meetings at which financial results are reviewed and corrective action taken;
- (d) Re-performance of control procedures, for example reconciliation of bank accounts, to ensure they were correctly performed by the entity; and
- (e) Testing of the internal controls operating on specific computerised applications or over the overall information technology function, for example access or program change controls (Chitty, 2004).

When obtaining evidence about the effective operation of internal controls, relevant factors for auditors to consider are:

- (a) How they were applied;
- (b) The consistency with which they were applied during the period; and
- (c) By whom they were applied.

The concept of effective operation recognises that some deviations may have occurred. Deviations from prescribed controls may be caused by such factors as:

- (a) Changes in key personnel;
- (b) Significant seasonal fluctuations in volume of transactions; and
- (c) Human error; in particular, staff changes in key internal control functions may increase control risk.

If there have been such changes in the period under review, auditors may need to modify their tests of control to confirm effective operation during and after the period of change.

In a computer environment, auditors may find it necessary, or may prefer to use computer-assisted audit techniques. The use of such techniques, for example file interrogation tools or audit test data, may be appropriate when the accounting and internal control systems provide no visible evidence documenting the performance of internal controls which are programmed into a computerised accounting system.

### **Quality and Timeliness of Audit Evidence**

Certain types of audit evidence obtained by auditors are more reliable than others. Usually, auditors' observations provide more reliable audit evidence than merely making enquiries. Audit evidence obtained by some tests of control, such as observation, pertains only to the point in time at which the procedure was applied.

Auditors may decide to perform some tests of control at an interim audit visit advance of the period end. However, they cannot rely on the results of such test without considering the need to obtain further evidence relating to the remainder of the period. Factors to be considered include:

- (a) The results of the interim tests;
- (b) The length of the remaining period;
- (c) Whether any changes have occurred in the accounting and internal control systems during the remaining period;
- (d) The nature and amount of the transactions and other events and the balances involved;
- (e) The control environment; and
- (f) The nature, timing and extent of the substantive procedures which they plan to undertake (Chitty, 2004).

### **Final Assessment of Control Risk**

Having undertaken tests of control, auditors should evaluate whether the preliminary assessment of control risk is supported.

Whenever deviations are detected:

- (a) Auditors make specific enquiries in order to consider their implications; or
- (b) It may be that, in the circumstances, they can obtain sufficient appropriate audit evidence to conclude that, despite those deviations, their preliminary assessment is supported. On the other hand, if they conclude that the deviation rate is such that the preliminary assessment is not supported, they amend their assessment of control risk, unless audit evidence obtained from other tests of control supports that assessment.

If the evaluation of deviations results in auditors concluding that the assessed level of control risk needs to be revised, they should modify the nature, timing and extent of their planned substantive procedures.

### **Detection Risk**

APB SAS 300 on 'Accounting and internal control systems' states that "auditors should consider the assessed levels of inherent and control risk in determining the nature, timing and extent of substantive procedures required to reduce audit risk to an acceptable level". In this regard, the auditors should be aware that the level of detection risk relates to the auditors' substantive procedures (tests of details of transactions and balances and analytical procedures). It is primarily the consequence of the fact that auditors do not, and cannot, examine all available evidence; auditors seek reasonable confidence and so do not examine all items, not all evidence concerning any item that is examined. Moreover, as audit evidence is generally persuasive rather than conclusive, some detection risk is usually present even if they examine all evidence available of an account balance or an entire class of transactions.

### **Audit Opinion**

Auditors must obtain sufficient appropriate audit evidence as to whether the financial statements are free of material misstatement. Internal controls, even if fairly simple and unsophisticated, may contribute to this evidence.

The auditors' control risk assessment, together with the inherent risk assessment, influences the nature, timing and extent of substantive procedures to be performed to reduce detection risk, and therefore audit risk, to an acceptably low level.

Regardless of the assessed levels of inherent and control risks, auditors should perform some substantive procedures for financial statement assertions of material account balances and transaction classes. Substantive procedures may comprise only analytical procedures where such procedures provide sufficient appropriate evidence.

When both inherent and control risks are assessed as high, auditors consider whether substantive procedures can provide sufficient appropriate audit evidence to reduce detection risk, and therefore audit risk, to an acceptably low level. For example, they may not be able to obtain sufficient evidence about the completeness in income in the absence of some internal controls. When auditors determine that detection risk regarding a material financial statement assertion cannot be reduced to an acceptably low level, they consider the implications for their report (Chitty, 2004).

### **Communication of Weaknesses**

As a result of obtaining an understanding of the accounting and internal control systems and of performing audit procedures, auditors may become aware of weaknesses in the systems. This should be communicated to the directors or management using 'management reports'.

### **Risk Assessments and Internal Control**

International Standard on Auditing 400 titled 'Risk assessments and internal control' states as follows:

- (a) The auditors should obtain an understanding of the accounting system sufficient to identify and understand:
  - (i) Major classes of transactions in the entity's operations;
  - (ii) How such transactions are initiated;
  - (iii) Significant accounting records, supporting documents and accounts in the financial statements; and
  - (iv) The accounting and financial reporting process, from the initiation of significant transactions and other events to their inclusion in the financial statements.
- (b) The auditor should obtain an understanding of the control environment sufficient to assess directors' and management's attitudes, awareness and actions regarding internal controls and their importance in the entity.
- (c) The auditor should obtain an understanding of the control procedures sufficient to develop the audit plan.

- (d) The auditor should obtain and document an understanding of the accounting system and control environment sufficient to determine their audit approach.
- (e) The preliminary assessment of control risk for a financial statement assertion should be high, unless the auditor:
  - (i) Is able to identify internal controls relevant to the assertion which are likely to prevent or detect and correct a material misstatement; and
  - (ii) Plans to perform tests of control to support the assessment.

When auditors conclude that they do not wish to rely on tests of control, they plan the audit approach, on the basis that sufficient appropriate audit evidence, needs to be obtained entirely from substantive procedures, and from any audit work carried out in the preparation of the financial statements.

The auditor should document in the audit working papers:

- (a) The understanding obtained of the entity's accounting and internal control systems; and
- (b) The assessment of control risk.

The higher the assessment of inherent and control risk, the more evidence the auditor should obtain from the performance of substantive procedures.

When the auditor determines that; detection risk regarding a financial statement assertion for a material account balance or class of transactions cannot be reduced to an acceptably low level, the auditor should express a qualified opinion or disclaimer of opinion.

The auditor should make management aware, on a timely basis and at an appropriate level of responsibility, of material weaknesses in the design or operation of the accounting and internal control systems, which have come to the auditor's attention" (Chitty, 2004).

### 3.5 CORPORATE GOVERNANCE

Global interest in corporate governance has increased in recent times due to large scale corporate failures, resulting to huge losses to all stakeholders. The case of Enron, Worldcom, Parmalat and recent failures affecting financial industries is still fresh in the public mind. These issues have generated the need for regulations, stipulating standard rules regarded as best practices in corporate governance.

#### **Definition of Corporate Governance**

Corporate governance is defined as the system by which the affairs of companies are directed and controlled by those charged with the responsibility. It is an internal system encompassing policies, processes and people, which serves the needs of shareholders and other stakeholders. This is achieved by directing and controlling management activities with good business shrewdness,

objectivity, accountability and integrity. Good corporate governance is reliant on a sound internal control system, existing legislation, and a healthy board culture which safeguards policies and processes.

### **Corporate Governance in Nigeria**

Realising the need to align with international best practices, in 2002 the Securities and Exchange Commission (SEC) in collaboration with the Corporate Affairs Commission (CAC) set up a committee with a mandate to identify weaknesses in the current corporate governance practices in Nigeria and come up with necessary recommendations that will improve corporate governance in Nigeria. The Committee was given the following terms of reference:

Identify weaknesses in the current corporate governance practices in Nigeria with respect to public companies;

- (a) Examine practices in other jurisdictions with a view to the adoption of international best practices in corporate governance in Nigeria;
- (b) Make recommendations on necessary changes in current practices; and
- (c) Examine any other issues relating to corporate governance in Nigeria.

The Committee's report known as Code of Best Practices on Corporate Governance in Nigeria, was approved by the Boards of the Securities and Exchange Commission (SEC) being the regulatory authority of the capital market and the Corporate Affairs Commission (CAC) being the regulatory authority of companies in Nigeria.

### **CODES OF BEST PRACTICES ON CORPORATE GOVERNANCE**

The code of best practices on Corporate Governance is treated under the following:

- (a) Board of Directors;
- (b) Shareholders; and
- (c) Audit Committee.

### **BOARD OF DIRECTORS**

This is further divided into the following sub-sections:

#### **Responsibilities of the Board of Directors**

The board of directors should be in control of the affairs of the company in lawful and efficient manner such that the company continuously improves on its value creation.

The board should, with due regard to the other stake-holder's interest, ensure that the value created is shared among the shareholders and employees.

The functions of the board should include but not limited to the following:

- (i) Strategic planning;
- (ii) Selection, performance appraisal and compensation of senior executive;
- (iii) Succession planning;

- (iv) Communication with shareholders;
- (v) Ensuring the integrity of financial controls and reports; and
- (vi) Ensuring that ethical standards are maintained and that the company complies with the laws of Nigeria.

The chairman's primary responsibility is to ensure effective operation of the board and he should as far as possible, maintain a distance from the day to day running of the company which should be the primary responsibility of the chief executive office and management team.

### **Composition of The Board of Directors**

The board should be composed in such a way as to ensure diversity of experience without compromising compatibility, integrity, availability and independence.

Membership of the board should possess the following attributes:

- (i) Upright personal characteristics;
- (ii) Relevant core competencies;
- (iii) Knowledge on board matters;
- (iv) Entrepreneurial bias; and
- (v) Sense of accountability integrity, commitment to the task of corporate and institutional building.

The position of the chairman and chief executive officer should ideally be separated and held by different persons.

There should be a strong non-executive independent director as vice-chairman of the board, where the position of the chairman and chief executive officer are combined in one individual.

### **Board of Directors**

The board should meet regularly at least once in a quarter with sufficient notices and a formal schedule of matters specifically reserved for its decision, in order to maintain effective control over the company and monitor the executive and management.

An agreed procedure should exist for directors to take independent professional advice; the cost of which should be borne by the company in furtherance of their duty, if necessary.

The advice and services of the company secretary who should be appointed by the board and is responsible for ensuring that board procedures are followed and that applicable rules and regulations are complied with, should be accessible to all directors. His removal should be decided by the board.

The advice and services of other professionals in areas where such advice will improve the quality of contribution of the directors to the overall decision making process should also be accessible to all directors.

### **Non-Executive Directors**

Non-executive directors should bring independent judgment to bear on issues such as integrity, performance, resources including key appointments and standard of conducts.

Shareholders approval is required where directors service contract is to exceed three years.

Other than their fees and allowances, non-executive directors should not be dependent on the company for their income. They should be independent and not be involved in business relationship with the company that could fetter or encumber their independent judgment.

They should neither participate in the company's share option scheme nor be pensionable by the company.

Appointment as non-executive director should be for a specified period and re-appointment should be dependent on performance.

It should be a matter for the entire board to decide the appointment of non-executive directors, which should be done through a defined formal selection process.

Skills mix of executive and non-directors should reflect the range of the competency needs of the company.

Proper company a board orientation should be undertaken by newly appointed directors, and where necessary formal training aimed at making them effective in the discharge of their duties should be given at the company's cost.

### **Executive Directors**

There should be full and clear disclosure of directors' total emoluments and those of the chairman and highest paid director including pension contributions, stock options, where the earnings are in excess of ₦500,000.

In the determination of their remuneration, executive directors should not play an active role.

### **Compensation of Board Members**

The remuneration of executive directors should not be fixed in shareholders meeting but by the board.

The remuneration should be recommended by remuneration committees, wholly or mainly composed of non-executive independent directors and chaired by a non-executive director.

The following should be disclosed in relation to directors' remuneration:

- (a) Directors emoluments and that of the chairman and highest paid director;

- (b) Relevant information about stock options and any pension contribution; and
- (c) Future service contract.

### **Reporting and Control**

It is the duty of the board to present a balance, reasonable and transparent assessment of the company's position.

In financial and non-financial reporting, there is an overriding need to promote transparency.

It is the primary responsibility of the board to ensure good internal controls.

The board should ensure that an objective and professional relationship is maintained with the external auditors.

External auditors should not be involved in business relationships with the company.

An audit committee of at least three non-executive directors with written terms of reference which deal clearly with its authority and duties should be established by the board.

A report on the effectiveness of the company's system of internal control should be presented by the directors in the annual report.

In compliance with the Companies and Allied Matters Act, the directors should report that, the business is a going concern with supporting assumptions or qualifications as necessary, with written terms of reference.

## **SHAREHOLDERS**

### **Shareholders' Rights and Privileges**

- (a) The company through the directors, should ensure that shareholders' statutory and general rights are protected at all times;
- (b) It should be the responsibility of shareholders to elect directors and approve the terms and conditions of their directorships;
- (c) The venue of the annual general meeting should be carefully chosen such that the majority of shareholders can attend and vote at the meeting and not be disenfranchised in terms of distance and cost;
- (d) Before the annual general meeting, notices should be sent at least 21 working days with such details as annual reports, audited financial statements and other information that will enable them vote properly on any issue;
- (e) A separate resolution should be proposed by the board at the general meeting on each substantial issue in such a way that they can be voted for in an organised manner;
- (f) The board should ensure that decisions reached at the general meetings are implemented;

- (g) There should be at least one director on the board to represent minority shareholders;
- (h) Unless they are in a competing business or have conflicts of interest, that warrant their exclusion, shareholders holding more than 20% of the total issued share capital of the company should have a representative on the board;
- (i) The board should ensure equal treatment of all shareholders such that none is given preferential treatment or superior access to information or other materials; and
- (j) The annual general meeting should be used by the board to communicate with the shareholders and encourage their participation.

### **Institutional Investors**

- (a) Shareholders' activism whether by institutional or by organised shareholders' group should not be discouraged by the board;
- (b) Institutional and non-institutional shareholders with larger holdings should act and influence the standard of corporate governance positively and thereby ensure optimisation of stakeholders' value; and
- (c) Information made available to institutional shareholders should also be made available to other shareholders at the same time in such a manner as to ensure that neither group enjoys preferential treatment.

### **Audit Committees**

- (a) Audit committees should be established by companies with the key objective of raising standard of corporate governance.
- (b) The committee should not be under the influence of any dominant personality on the main board, neither should they get in the way and obstruct executive management.
- (c) They should not act as a barrier between external auditors and the executive directors or encourage the main board to abdicate its responsibilities in reviewing and approving the financial statements.
- (d) Audit committees should be made up of strong and independent persons.

### **Composition of the Audit Committee**

- (a) Audit committee should be established in accordance with CAMA Section 359 (3), with not more than one executive director;
- (b) A majority of the non-executives serving on the committee should be independent of the company in terms of management or business or other relationship, which could materially interfere with the exercise of their independent judgement as committee members;
- (c) A non-executive director nominated by members of the audit committee should be the chairman of the committee;
- (d) Membership of the audit committee should be for a fixed tenure, however any member of the committee should be eligible for re-election after his tenure; and
- (e) The secretary of the audit committee should be the company secretary, auditor or such other person nominated by the committee.

### **Qualification and Experience of Members of Audit Committee**

- (a) Members of the audit committee should be capable of reading and understanding basic financial statements and make valuable contributions to the committee's deliberation;
- (b) Audit committee should review not only external auditor's reports but also, most importantly, the report of the internal auditor; and
- (c) Members of the committee should possess the following qualities:
  - (i) Integrity;
  - (ii) Dedication;
  - (iii) A thorough understanding of the business, its products and services;
  - (iv) A reasonable knowledge of the risks facing the company and the essential controls the company has in place;
  - (v) Inquisitiveness and dependable judgement; and
  - (vi) Ability to offer new or different perspective and constructive suggestions.

### **Terms of Reference for Audit Committee**

In line with Section 359 (6) (a-e) of the Companies and Allied Matters Act, Cap. C 20, LFN 2004, the committee should be given terms of reference.

The performance of the committee and its members should be evaluated periodically and the form of such evaluation should be decided by the company.

The committee should maintain a constructive dialogue between the external auditors and the board and enhance the credibility of the financial disclosures and the interest of the shareholders.

### **Meetings**

- (a) The number of members of the audit committee will determine the quorum for the meetings and it should be specified in the terms of reference of the committee.
- (b) The committee should meet at least three (3) times in a year.
- (c) The committee should hold a meeting with the external auditors at least once a year, without the presence of any executive member.

### **Enforcement and Compliance**

It has generally been argued that in this issue, voluntary compliance should be encouraged and where it becomes necessary and applicable, appropriate sanctions should be applied. This is the position adopted by Securities and Exchange Commission (SEC), and Corporate Affairs Commission (CAC) in the enforcement of compliance with corporate governance code of best practices in Nigeria.

SEC and CAC will give due consideration to the compliance or otherwise of the provisions of the code in the treatment of issues brought before them.

### 3.6 OUTSOURCING THE INTERNAL AUDIT FUNCTIONS

#### **Outsourcing**

Outsourcing involves the transfer of management's day-to-day execution of an entire business function to an external service provider. An outsourcing arrangement is a contract between an organisation and an outsourcing vendor to provide internal audit services. Some institutions consider entering into these arrangements to enhance the quality of their control environment by obtaining the services of a vendor with the knowledge and skills to critically assess, and recommend improvements to their internal control systems. The internal audit services under contract can be limited to helping internal audit staff in an assignment for which they lack expertise. Such an arrangement is typically under the control of the institution's manager of internal audit, and the outsourcing vendor reports to him or her.

Entities often use outsourcing vendors for audits of areas requiring more technical expertise, such as electronic data processing. Such uses are often referred to as internal audit assistance or audit co-sourcing. Some outsourcing arrangements are structured so that an outsourcing vendor performs virtually all the procedures or tests of the system of internal control. Under such an arrangement, a designated manager of internal audit in the entity oversees the activities of the outsourcing vendor and typically is supported by internal audit staff. The outsourcing vendor may assist the audit staff in determining risks to be reviewed and may recommend testing procedures, but the internal audit manager is responsible for approving the audit scope, plan, and procedures to be performed. Furthermore, the internal audit manager is responsible for the results of the outsourced audit work, including findings, conclusions, and recommendations. The outsourcing vendor may report these results jointly with the internal audit manager to the audit committee.

#### **Internal Audit**

Effective internal control is a foundation for the safe and sound operation of any organisation. The board of directors and senior management of an entity are responsible for ensuring that the system of internal control operates effectively. Their responsibility cannot be delegated to others within the institution or to outside parties. An important element in assessing the effectiveness of the internal control system is an internal audit function. When properly structured and conducted, internal audit provides directors and senior management with vital information about weaknesses in the system of internal control so that management can take prompt, remedial action.

The Institute of Internal Auditors define Internal auditing as an independent, objective assurance and consulting activity designed to add value and improve an organisation's operations. It helps an organisation accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

In addressing various quality and resource issues, many institutions have been engaging independent public accounting firms and other outside professionals (outsourcing vendors) in recent years to perform work that traditionally has been done by internal auditors. These arrangements are often called internal audit outsourcing, internal audit assistance, audit co-sourcing, or extended audit services.

### **Reasons for Outsourcing the Internal Audit Function**

The reasons for outsourcing the internal audit functions are:

- (a) **Available Resources**  
Appropriate internal audit resources may be scarce or unavailable in certain situations and for a number of reasons. Whether selected as a temporary alternative or permanent solution, outsourcing may be necessary to acquire timely, professional internal audit services and competent internal auditing staff.
- (b) **Size of the Organisation**  
Both large and small organisations may need to take advantage of outsourcing alternatives. Common reasons include temporary staff shortages, specialty skills, coverage of remote business locations, special project work, and supplemental staff to meet tight deadlines. Small organisations may also find it necessary to explore outsourcing due to the inability to hire permanent or full-time internal audit staff.

### **Types of Outsourcing Alternatives**

Organisations may need to define the types of outsourcing engagements or practices to be considered. Outsourcing alternatives include:

- (a) **Total outsourcing**; where 100 percent of the internal audit services are obtained from external sources, usually on an ongoing basis.
- (b) **Partial outsourcing**; where less than 100 percent of the internal audit services are obtained from external sources, usually on an ongoing basis.
- (c) **Co-sourcing**; where external resources participate on joint engagements with in-house internal audit staff. Engagements may be ongoing or for specific terms.
- (d) **Sub-contracting**; where a specific engagement or portion of some engagement is performed by an external party, typically for a limited time period. Management and oversight of the engagement is normally provided by in-house internal audit staff.

### **Advantages and Disadvantages of Outsourcing**

- (a) Outsourcing affords the client the luxury of having access to global expertise and cutting edge technology in internal auditing. Because internal audit is not a core experience area for many companies, many internal audit functions are not adequately equipped with either intellectual or human capital, to execute their mandate effectively. Outsourcing it to professionals provides the organisation with the best expertise in this area.

- (b) Due to the prohibitive cost involved; most organisations do not make sufficient investment to improve their internal audit functions and generally lack access to updated methodologies and technologies because of the prohibitive costs. This results in high staff turnover as they struggle to hire and retain talented personnel, who wish to make a career in internal auditing. Outsourcing saves the organisation this dilemma.

The following items, while not all-inclusive, should be considered when outsourcing the internal audit function:

- (a) Independence of the service providers;
- (b) Allegiance of in-house versus external service provide;
- (c) Professional standards followed by the service provider;
- (d) Qualifications of the service provider;
- (e) Staffing, training, turnover, rotation of staff, management;
- (f) Flexibility in staffing resources to meet engagement needs or special requests;
- (g) Availability of resources;
- (h) Retention of institutional knowledge for future assignments;
- (i) Access to best practice or insight to alternative approaches;
- (j) Culture of the organisation receptiveness to service providers;
- (k) Insight into the organisation by the service provider;
- (l) Coverage of remote locations;
- (m) Coordination with in-house internal audit services;
- (n) Coordination with external auditor;
- (o) Use of internal auditing as a training ground for internal promotions;
- (p) Retention, access to and ownership of working papers;
- (q) Acquisition and availability of specialty skills;
- (r) Cost considerations; and
- (s) Good standing membership in an appropriate professional organisation.

### 3.7 SUMMARY AND CONCLUSIONS

Internal audit and control is one of the key factors in audit and assurance services. In this chapter, adequate coverage of the nature of/and relationship between external and internal audit functions, has been given. The basis of internal audit work was also discussed. The concept of internal control, and corporate governance were also given adequate attention. Audit risks and related audit opinions with respect to external audit assurance were adequately treated. Issues regarding the Audit Committee of the Board (of corporate entities) and its composition as provided for in the statute, as well as its functions and relationships with the board, external and internal auditors, were given sufficient treatment.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

### 3.8 REVISION QUESTIONS

#### 3.8.1 MULTIPLE CHOICE QUESTIONS

1. 'Internal audit' as an appraisal or monitoring activity established by management and the directors for the review of the accounting and internal control systems as a service to the entity. Internal audit functions by
  - (A) examining
  - (B) evaluating
  - (C) reporting to management
  - (D) the directors on the adequacy and effectiveness of components of the accounting and internal control systems
  - (E) All the above four cases.
  
2. The role of internal audit is determined by management and the directors who set its objectives while the external auditors are engaged to report independently on the financial statements; the role of the external auditors is statutory
  - (A) True
  - (B) Untrue
  - (C) Internal auditors and the external auditors being chartered accountants do not have to document tests of internal control
  - (D) The need to state conclusions of tests conducted is done away with
  - (E) All the above four cases.
  
3. An effective internal audit function
  - (A) often allows a modification in the nature and timing
  - (B) a reduction in the extent, of procedures performed by the external auditors
  - (C) cannot eliminate the modification of the nature and timing of procedures entirely
  - (D) Dispenses of the need for external audit
  - (E) A - C above.
  
4. The effectiveness of the internal audit function may be an important factor in the external auditors' assessment of the control environment, and their related asset
  - (A) Not these days
  - (B) At times
  - (C) True
  - (D) Untrue
  - (E) Not applicable.
  
5. As part of the planning of an audit, an auditor should obtain an understanding of the accounting and internal control systems sufficient to plan the audit and develop an effective audit approach
  - (A) Not these days
  - (B) At times
  - (C) True
  - (D) Untrue
  - (E) Not applicable.

### 3.8.2 SHORT ANSWER QUESTIONS

1. The scope and objectives of internal audit vary widely and depend on the size and structure of the entity and the requirements of its management and directors. State four internal audit activities you have come across.
2. In what circumstances do the internal audit function's objectives vary?
3. In some cases, after considering the activities of internal audit, the external auditors may decide that internal audit work will have no effect on external audit procedures. What should the external auditor do when faced with such situation?
4. State five factors which the auditor may adopt in assessing inherent risk at the entity level.
5. State four matters which the auditor must consider in assessing control risk in small business

*Refer to Suggested Solution in Appendix I on page 301.*

# ***AUDIT PLANNING AND CONTROL PROCEDURE***

## **4.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to:

- ◆ Understand the process of reviewing the client's operational background with regard to its financial, legal and personnel situations and the industry environment in which it operates.
- ◆ Know the allocation and supervision of work and responsibilities.
- ◆ Understand the designing the audit programme.
- ◆ Understand the impact of relevant legislations on the performance of an audit.
- ◆ Evaluate the quality of the audit and maintain adequate working papers.
- ◆ Understand planning, documenting and monitoring of time and costs.
- ◆ Establish procedures for obtaining audit evidence including balance and transaction testing, analytical procedures and management representation.
- ◆ Understand quality control and peer review.

## **4.1 INTRODUCTION**

Auditors should plan the audit work so as to perform the audit in an effective manner. Planning entails developing a focus and direction for the audit. This is done by the auditor in a document which contains a general strategy and a detailed approach for the expected nature, timing and extent of the audit.

The auditor develops the general audit strategy in an overall audit plan to set the direction for the audit and provide guidance for the development of the audit programme. The audit programme sets out the detailed procedures required to implement the strategy as part of planning for the audit.

Planning is necessary for audits of entities of all sizes. The objectives of planning the audit work, which takes place before the detailed audit work begins, include; ensuring that appropriate attention is devoted to the different areas of the audit; potential problems are identified; and facilitating review. The auditor needs to have a good understanding of the clients business to enable him or her prepare an audit plan. The process involves the review of the client's operational background with regard to its financial, legal and personnel situations and the industry environment in which it operates.

The functions and responsibility of the auditor when properly understood, enable the members of the audit team to, readily know the extent of their responsibility and how to go about conducting the audit work allocated to each member of the audit team. The functions and responsibility of the auditor under the law, are not diminished by relying on representations made by the directors.

This chapter examines the impact of relevant legislations on the performance of an audit. An understanding of the laws enables the auditor to test compliance or otherwise of his or her clients with the provisions of the laws. The auditor should recognise that non-compliance by the entity with law or regulations may materially affect the financial statements.

This chapter covers the evaluation of the quality of the audit and maintaining adequate working papers. Proper documentation enables the auditor to accomplish his or her statutory (or other) roles in a manner that leaves other professionals who may need to review or evaluate his working papers, in no doubt as to the nature of work done actually meeting professional standards and really supporting the audit opinion.

Planning, documenting and monitoring of time and costs are essential parts of an audit. The auditor should prepare time and cost estimate as part of the audit plan. It is necessary for audits of entities of all sizes. Planning of time and costs assist in the proper assignment of work to members of the audit team, and in briefing the members of the audit team.

Establishing procedures for obtaining audit evidence, including balance and transaction testing, analytical procedures and management representation, enable the auditor obtain, review and assess audit trail supporting his or her audit opinion. Obtaining management representation does not absolve the auditor from blame.

Analytical procedures are used by the auditor to assist in planning the nature, timing and extent of other audit procedures. They are used as substantive procedures when their use can be more effective or efficient than other procedures in reducing detection risk for specific financial statement assertions; and as part of the overall review of the financial statements when completing the audit.

The learning objectives of this chapter have been carefully considered in structuring the topics in this chapter. A careful study of this chapter will enable the reader to know the very essence of audit planning and control procedures.

At the end of this chapter, readers should be able to answer typical examination questions on audit planning and control procedures.

## **4.2 PLANNING**

APB statement of auditing standard 200 covers Planning. The standard requires the auditor to plan the audit work so as to perform the audit in an effective manner.

Planning involves:

- (a) Developing a general strategy; and
- (b) A detailed approach for the expected nature, timing and extent of the audit.

The auditor develops the general audit strategy in an overall audit plan to set the direction for the audit and provide guidance for the development of the audit programme.

The auditor also develops audit programme which sets out the detailed procedures required to implement the strategy as part of planning for the audit.

### **Planning the Work**

Planning is necessary for audits of entities of all sizes. The objectives of planning the audit work, which takes place before the detailed audit work begins, include:

- (a) Ensuring that appropriate attention is devoted to the different areas of the audit;
- (b) Ensuring that potential problems are identified; and
- (c) Facilitating review' (Chitty D, 2004).

Planning also assists:

- (i) In the proper assignment of work to members of the audit team and their briefing, and in the co-ordination of work done by other auditors and experts, so that the audit may be performed in an efficient and timely manner; and
- (ii) In obtaining an understanding of the entity's affairs and, all members of the audit team in understanding the nature and scope of the work they are to carry out before the audit field work starts.

Obtaining knowledge of the organisation's business is required as an important part of planning the work. The auditors' experience with the entity and knowledge of its business assist in the identification of events, transactions and practices which may have a material effect on the financial statements. Planning varies according to the size of the entity and the complexity of the audit. (Chitty, 2004).

Auditors need to discuss elements of the overall audit plan and certain audit procedures with:

- (a) The entity's management and staff; and
- (b) The audit committee (where such a committee is in place) in order to improve the effectiveness of the audit and to co-ordinate audit procedures with work of the entity's personnel, including internal auditors.

The overall audit plan and the detailed audit procedures to be performed, however, remain the auditors' responsibility. When such discussions occur, care is required not to compromise the independence and validity of the audit.

### **The Overall Audit Plan**

The standard requires the auditor to develop and document an overall audit plan describing the expected scope and conduct of the audit.

The amount of detail in the record of the overall audit plan is to be sufficient to guide the development of the detailed audit procedures to be performed. However, the precise form and content of the overall audit plan, and the formality with which it considers matters affecting the scope of the audit and the audit work to be undertaken, vary depending on the:

- (a) Size of the entity;
- (b) Complexity of the audit;
- (c) Need for member of the audit team to be briefed; and
- (d) Specific methodology and technology the auditors use.

Matters for auditors to consider in developing the overall audit plan may include:

### **Knowledge of the Entity's Business**

The following are to be considered:

- (a) General economic factors and industry conditions affecting the entity's business;
- (b) Important characteristics of the entity, its business, principal business strategies, its financial performance and its reporting requirements, including changes since the previous audit;
- (c) The operating style and control consciousness of directors and management; and
- (d) The auditors' cumulative knowledge of the accounting and internal control systems and any expected changes in the period.

### **Risk and Materiality**

The following are to be considered:

- (a) The setting of materiality for audit planning purposes;
- (b) The expected assessments of risks of error and the identification of significant audit areas;
- (c) Any indication, including the experience of past years, that misstatements that could have a material effect on the financial statements might arise because of fraud or for any other reason; and
- (d) The identification of complex accounting areas including those involving accounting estimates.

### **Nature, Timing and Extent of Procedures**

The following are to be considered:

- (a) The relative emphasis expected to be placed on tests of control and substantive procedures;
- (b) The effect on the audit of the use of information technology by the entity or the auditors;
- (c) The work of any internal audit function and its expected effect on external audit procedures;

- (d) Procedures which need to be carried out at or before the year end; and
- (e) The timing of significant phases of the preparation of the financial statements.

### **Co-ordination, Direction, Supervision and Review**

Auditors should note the following:

- (a) The involvement of other auditors, including other offices of the same firm, in the audit of components, for example, subsidiary undertakings, branches and divisions;
- (b) The involvement of, and communication with, experts, other third parties and internal auditors;
- (c) The number of locations; and
- (d) Staffing requirements.

### **Other matters include:**

- (a) Any regulatory requirements arising from the decision to retain the engagement;
- (b) The possibility that the going concern basis may be inappropriate;
- (c) The terms of the engagement and any statutory responsibilities; and
- (d) The nature and timing of reports or other communication with the entity that are expected under the engagement (Chitty, 2004).

### **Changes to the Audit Work Planned**

The audit work planned should be reviewed and, if necessary, revised during the course of the audit. That review should cover the following:

- (a) Changes in conditions, or unexpected results of audit procedures, may require changes to the overall audit plan or the planned audit procedures;
- (b) Changes to the planned audit procedures are documented so that there is an accurate record of the nature, timing and extent of the audit procedures performed; and
- (c) A record of changes to the overall audit plan may be necessary to explain the general strategy finally adopted for the audit.

### **Knowledge of the Business (KOB)**

APB statement of auditing standard 210 covers “Knowledge of the business” (KOB).

### **Obtaining the Knowledge**

#### **Prior to Acceptance of an Engagement**

Prior to acceptance of an engagement, auditors obtain a preliminary knowledge of the industry and of the ownership, directors, management and operations of the entity to be audited, sufficient to enable them to consider their ability to undertake the audit.

Knowledge obtained prior to acceptance of an engagement generally includes:

- (a) Knowledge from previous relevant experience;
- (b) Knowledge from enquiries of predecessor auditors;
- (c) Specific rules or regulations pertaining to the industry;
- (d) Accounting standards applicable to the industry;
- (e) An initial perception of the viability of the business; and
- (f) The perceived integrity of the directors and management.

Auditors also require sufficient knowledge to enable them to assess whether there is a requirement for staff with specialist audit expertise (for example computer audit specialists) or other experts. (Chitty, 2004)

### **Following Acceptance of an Engagement**

Following acceptance of an engagement, the auditor should:

- (a) Obtain further and more detailed knowledge and information sufficient to enable them to plan the audit and develop an effective audit approach;
- (b) Obtain the required knowledge at the start of the engagement. Obtaining the required knowledge of the business is a continuous and cumulative process of gathering and assessing the information and relating the resulting knowledge to audit evidence and information at all stages of the audit; and
- (d) Information obtained as the audit progresses enable auditors to update and augment that knowledge, and may require them to reassess it.

### **Updating Knowledge for Succeeding Periods**

In succeeding periods, auditors should:

- (a) Consider the information gathered previously; and
- (b) Perform procedures designed to identify significant changes that have taken place since the last audit.

### **Sources of Knowledge**

Auditors can obtain knowledge of the industry and the entity from a number of sources including:

- (a) Previous experience with the entity and its industry;
- (b) Visits to the entity's premises and plant facilities;
- (c) Discussion with people within the entity (for example directors, internal auditors, computer personnel and senior operating personnel);
- (d) Discussion with other auditors and with legal and other advisors who have provided services to the entity or within the industry;
- (e) Discussion with knowledgeable people outside the entity (for example economists, industry regulators);
- (f) Publications related to the industry (for example government statistics, surveys, texts, trade journals, reports prepared by banks and securities dealers, financial newspapers);
- (g) Legislation and regulations that significantly affect the entity;

- (h) Documents produced by the entity (for example minutes of meetings, material sent to shareholders or filed with regulatory authorities, promotional literature, prior years' annual and financial reports, budgets, internal management reports, interim financial reports, management policy manuals, manuals of accounting and internal control systems, charts of accounts, job descriptions, marketing and sales plans); and
- (i) Professional literature giving industry-specific guidance.

### **Using the Knowledge**

Understanding the business and using this information appropriately assists auditors in:

- (i) Assessing risks and identifying problems;
- (ii) Planning and performing the audit effectively and efficiently; and
- (iii) Evaluating audit evidence.

Auditors make judgements about many matters throughout the course of the audit where knowledge of the business is important, for example:

- (a) Considering risks pertaining to the entity's business activities and the directors' response thereto;
- (b) Identifying areas where special audit considerations and skills may be necessary;
- (c) Developing the overall audit plan and the audit programme;
- (d) Considering the complexity of the entity's information systems and any effect on the audit approach;
- (e) Determining a materiality level and assessing whether the materiality level chosen remains appropriate;
- (f) Assessing inherent risk and control risk;
- (g) Assessing audit evidence to establish its appropriateness and the validity of the related financial statement assertions;
- (h) Evaluating accounting estimates and representations by the directors or management;
- (i) Recognising conflicting information (for example contradictory representations);
- (j) Recognising unusual circumstances (for example undisclosed related party transactions, possible fraud or non-compliance with law or regulations, or unexpected relationships of statistical operating data with reported financial results);
- (k) Making informed enquiries and assessing the reasonableness of answers; and
- (l) Considering the appropriateness of accounting policies and financial statement disclosures. (Chitty, 2004)

The audit engagement partner must ensure that the audit team obtains such knowledge of the business of the entity being audited as may reasonably be expected to be sufficient to enable it to carry out the audit work effectively. Such knowledge may be transmitted initially by:

- (a) Means of the overall audit plan;

- (b) An audit briefing meeting; and
- (c) Subsequently during the course of the audit.

The audit engagement partner also ensures that the audit team:

- (a) Understands the need to be alert; and
- (b) Shares additional information.

#### **4.3 REVIEWING THE CLIENT'S OPERATIONAL BACKGROUND WITH REGARD TO ITS FINANCIAL, LEGAL AND PERSONNEL SITUATIONS AND THE INDUSTRY ENVIRONMENT IN WHICH IT OPERATES**

Auditors should have or obtain knowledge of the business of the entity to be audited which is sufficient to enable them to identify and understand the events, transactions and practices that may have a significant effect on the financial statements or the audit thereof.

Knowledge of the business is used by auditors in:

- (a) Assessing risks of error;
- (b) Determining the nature, timing and extent of audit procedures; and
- (c) Considering the consistency and reliability of the financial statements as a whole when completing the audit.

The auditors' level of knowledge for an engagement normally includes:

- (a) General knowledge of the economy and the industry within which an entity operates; and
- (b) A more particular knowledge of how the entity operates. The level of knowledge required by auditors is less than that possessed by the directors.

The extent to which auditors need to formally document their knowledge of the business depends:

- (a) Upon its complexity and the number of persons who will be engaged on the audit; and
- (b) The need to cover possible departure, illness or incapacity of key members of the audit team.

Auditors prepare such documentation to a level sufficient to facilitate proper planning of the audit.

#### **Matters to Consider in Relation to Knowledge of the Business**

The auditor should consider the following matters in relation to knowledge of the business:

##### **General Economic Factors**

- (a) General level of economic activity (for example recession, growth);
- (b) Interest rates and availability of financing;
- (c) Inflation;
- (d) Government policies;

- (i) monetary policies,
- (ii) fiscal policy,
- (iii) taxation – corporate and others,
- (iv) financial incentives (for example government aid programmes),
- (v) tariffs, trade restrictions; and
- (e) Foreign currency rates and controls.

### **The Industry – Conditions Affecting the Client's Business**

- (a) The market and competition;
- (b) Cyclical or seasonal activity;
- (c) Changes in product technology;
- (d) Business risk (for example high technology, high fashion, ease of entry for competition);
- (e) Declining or expanding operations;
- (f) Adverse conditions (for example declining demand, excess capacity, and serious price competition);
- (g) Key ratios and operating statistics;
- (h) Specific accounting practices and problems;
- (i) Environmental requirements and problems;
- (j) Regulatory framework; and
- (k) Specific or unique practices (for example relating to labour contracts, financing methods, accounting methods).

### **The Entity**

Directors, management and ownership

- (a) Corporate structure – private, public, government (including any recent or planned changes);
- (b) Beneficial owners, important stakeholders and related parties, local, foreign, business reputation and experience) and any impact on the entity's transactions;
- (c) The relationships between owners, directors and management;
- (d) Attitudes and policies of owners;
- (e) Capital structure (including any recent or planned changes); and
- (f) Organisational structure.

### **Group Structure**

- (a) Subsidiaries' audit arrangements;
- (b) Directors' objectives, philosophy, strategic plans;
- (c) Acquisitions, mergers or disposals of business activities (planned or recently executed);
- (d) Sources and methods of financing (current, historical);
- (e) Board of directors;
- (f) Composition of board;
- (g) Business reputation and experience of individuals independence from and control over operating management;
- (i) Frequency of meetings;
- (j) Existence and membership of audit committee and scope of its activities;

- (k) Existence of policy on corporate conduct; and
- (l) Changes in professional advisors (for example lawyers).

### **Operating Management**

- (a) Experience and reputation;
- (b) Turnover;
- (c) Key financial personnel and their status in the organisation;
- (d) Staffing of accounting department;
- (e) Incentive or bonus plans as part of remuneration (for example based on profit);
- (f) Use of forecasts and budgets;
- (g) Pressures on management (for example over-extended dominance by one individual, support for share price, unreasonable deadlines for announcing results);
- (h) Management information systems;
- (i) Internal audit function (existence, quality); and
- (j) Attitude to internal control environment.

The entity's business - products, markets, suppliers, expenses, operations

- (a) Nature of business (for example, manufacturer, wholesaler, financial services, import/ export);
- (b) Location of production facilities, warehouses, offices;
- (c) Employment (for example, by location, supply, wage levels, union contracts, pension commitments, government regulation);
- (d) Products or services and markets (for example, major customers and contracts, terms of payment, profit margins, market share, competitors, export, pricing policies, reputation of products, warranties, order books, trends, marketing strategy and objectives manufacturing processes);
- (e) Important suppliers of goods and services (for example, long-term contracts, stability of supply, terms of payment, imports, methods of delivery);
- (f) Stocks (for example, locations, quantities);
- (g) Franchise, licences, patents;
- (h) Important expense categories;
- (i) Research and development;
- (j) Foreign current assets, liabilities and transactions by currency, hedging;
- (k) Legislation and regulations that significantly affect the entity;
- (l) Information systems – current, plan to change; and
- (m) Debt structure, including covenants and restrictions.

Financial performance - factors concerning the entity's financial condition and profitability are as follows:

- (a) Accounting policies;
- (b) Earnings and cash flow trends and forecasts;
- (c) Leasing and other financial commitments;
- (d) Availability of lines of credit;

- (e) Off balance sheet finance issues;
- (f) Foreign exchange and interest rate exposures; and
- (g) Comparison with industry trends.

Reporting environment: external influences which affect the directors in the preparation of the financial statements are as follows:

- (a) Legislation;
- (b) Regulatory environment and requirements;
- (c) Taxation;
- (d) Accounting requirements;
- (e) Measurement and disclosure issues peculiar to the business;
- (f) Audit reporting requirements; and
- (g) Users of the financial statements.

#### **4.4 ALLOCATION AND SUPERVISION OF WORK AND RESPONSIBILITIES**

##### **Assignment of Personnel to Audit Engagements**

Each audit engagement should have an engagement partner who should take responsibility for the engagement on behalf of the firm. The audit engagement partner is responsible for the conduct of the audit to which he or she has been appointed in accordance with ethical and other regulatory requirements, and for the issue of the auditor's report on behalf of the firm.

Firms should assign audit staff with the competencies necessary to perform the audit work expected of them to individual audit engagements.

Firms should establish processes to assess individuals' knowledge, skills and abilities.

Firms should develop policies and processes to provide reasonable assurance that:

- (a) Audit engagement partners have the competencies necessary to perform their roles;
- (b) Audit engagement partners' responsibilities are clearly defined and communicated to them;
- (c) The identity and role of the audit engagement partner is known to the directors and senior management of the audited entity;
- (d) Audit engagement partners have appropriate support (e.g. another partner), where necessary, at meetings with the directors and senior management of the audited entity that will involve matters that are, or may be, material to the auditors' report; and
- (e) Audit engagement partners have sufficient time to discharge their responsibilities. (Chitty, 2004)

Competencies expected from audit staff will include:

- (a) Understanding and practical experience of auditing (through participation in audit engagements and appropriate training);

- (b) Understanding applicable accounting, auditing, ethical and other technical standards;
- (c) Knowledge of specific industries;
- (d) Professional judgement; and
- (e) Understanding the firm's quality control policy and processes. (Chitty, 2004).

### **Direction, Supervision and Review**

Audit engagement partners should ensure that audit work is directed, supervised and reviewed in a manner that provides reasonable assurance that the work has been performed competently.

Direction of audit staff involves:

- (a) Being informed of their responsibilities, the nature of the entity's business, accounting or auditing problems that may arise, and the overall audit plan;
- (b) Being encouraged to raise any questions they may have with more experienced team members;
- (c) Understanding the objectives of the work to avoid drawing inappropriate conclusions as a result of misunderstandings; and
- (d) Being educated on appropriate team-working and training.

Supervision is closely related to both direction and review. These include:

- (a) Considering the progress of the audit;
- (b) Considering whether audit staffs have the competencies necessary to perform the audit work expected of them and sufficient time to carry out their work, whether they understand their instructions and whether the work is being carried out in accordance with the overall audit plan and audit programme;
- (c) Addressing significant accounting and auditing questions raised during the audit, assessing their significance and modifying the overall audit plan and audit programme as appropriate;
- (d) Identifying matters for further consideration during the audit; and
- (e) Work performed by audit staff is reviewed by other more senior audit staff or the audit engagement partner. Reviewers consider whether:
  - (i) The work has been performed in accordance with the firm's procedures and in accordance with the audit programme;
  - (ii) The work performed is adequate in the light of results obtained and has been adequately documented;
  - (iii) Significant audit matters have been raised for further consideration;
  - (iv) Appropriate consultations have taken place and the results of such consultations have been documented;
  - (v) The objectives of the audit procedures have been achieved; and
  - (vi) The conclusions are consistent with the results of the work performed' (Chitty, 2004).

Audit engagement partners perform an overall review of working papers. The review is sufficient for them to be satisfied that the working papers contain sufficient appropriate evidence to support the conclusions reached and for the auditors' report to be issued. The review should cover substantially the working papers especially in the following areas:

- (a) All critical areas of judgement, especially any relating to difficult or contentious matters identified during the audit;
- (b) Audit evidence relating to high risk areas; and
- (c) Any other areas which the audit engagement partner considers important.

Audit engagement partners document the extent of their review and its timing so as to demonstrate what was completed before the auditors' report was signed.

Review notes recording questions or points raised in the course of the audit, need not be retained at the end of the audit provided that, the working papers have been updated thereto and, in particular, record the reasoning on all significant matters which require the exercise of judgement.

### **Individual Responsibilities and the Collective Responsibilities of the Firm**

This covers the following points:

- (a) Involvement of all members of an audit team who should feel responsible for the performance of their work in accordance with professional standards;
- (b) The audit engagement partner has an especially important role in promoting a quality culture within the audit team; and
- (c) The appointment of a suitably senior audit partner within the firm to take overall responsibility for quality control policy and processes will assist this process.

## **4.5 DESIGNING THE AUDIT PROGRAMME**

The APB Statement of Auditing Standard 200 on Planning requires auditors to develop and document the nature, timing and extent of planned audit procedures required to implement the overall audit plan.

In developing the detailed audit procedures to be performed, auditors consider the assessments of risks of error and the amount of audit evidence that the procedures are planned to provide. They also consider the co-ordination of audit work with any work on preparing the financial statements, the timing of tests of controls and substantive procedures, and the co-ordination of any assistance expected from the entity, the composition of the audit team and the involvement of other auditors or experts (Chitty, 2004).

The documentation may take the form of an audit programme which:

- (a) Sets out the audit procedures the auditors intend to adopt;

- (b) Includes reference to other matters such as the audit objectives, timing, sample;
- (c) Determine the size and basis of selection for each area;
- (d) Serves as a set of instructions to the audit team; and
- (e) Serves as a means to control and record the proper execution of the work.

The level of detail in the audit programme depends on the complexity of the audit, the extent of other documentation and experience of the members of the audit team.

#### **4.6 EXAMINING THE IMPACT OF RELEVANT LEGISLATIONS ON THE PERFORMANCE OF AUDIT.**

The APB Statement of Auditing Standard 120 covers “Consideration of law and regulations”. The IFAC International Standard on Auditing 250 also covers “Consideration of law and regulations in an audit of financial statements”.

In planning an audit, the auditor should recognise that “non-compliance by the entity with law or regulations may materially affect the financial statements” (ISA 250). Consequently, the auditor should plan the audit procedures to include:

- (a) An assessment of the compliance of the entity with laws or regulations affecting the business of the entity; and
- (b) An evaluation and report on the results thereof.

The APB SAS 120 provides the following definitions:

Non-compliance with law or regulations’ refers to acts, omission or commission by the entity being audited, either intentional or unintentional, which are contrary to law (comprising common law and statute) or regulations. Such acts include transactions entered into by, or in the name of, the entity or on its behalf by its directors or employees. Non-compliance with law or regulations does not include personal misconduct (unrelated to the business activities of the entity) by the entity’s directors or employees. It does not also include civil wrongs, for example breach of duties in contract or tort.

Directors’ means the directors of a company, partners, proprietors, committee of management or trustees or other forms of entity, or equivalent persons responsible for directing the entity’s operations and preparing its financial statements.

Management means those persons who may include directors, who have executive responsibility for the conduct of the entity’s operations and the preparation of its financial statements.

Whether an act constitutes non-compliance with law or regulations is a legal determination that is ordinarily beyond the auditors’ professional competence. However, auditors’ training, experience and understanding of the entity and

its industry may enable them to recognise that some acts coming to their attention may constitute non-compliance with law or regulations' (Chitty, 2004).

The determination as to whether a particular act constitutes non-compliance with law or regulations is generally:

Based on the advice of an informed expert qualified to practice law, but ultimately can be determined only by a court of law. Laws and regulations vary considerably in their relation to the financial statements. Some laws and regulations relate directly to the preparation of, or the inclusion or disclosure of specific items, in the financial statements. Laws and regulations provide a legal framework within which an entity conducts its business. Thus, some entities operate in heavily regulated industries (such as banks) while others are subject only to the many laws and regulations that generally relate to the operating aspects of the business.

Therefore, determining the type of procedures necessary in a particular instance needs to take account of the particular entity concerned and the complexity of the regulations with which it is required to comply (Chitty, 2004).

Non-compliance with law or regulations may result in financial consequences for the entity, such as fines or litigation. The Central Bank of Nigeria Act and Banks and Other Financial Institutions Act require auditors to report non-compliance with the law and fines paid in the process.

### **Responsibilities of the Directors**

It is the responsibility of the directors:

- (a) To take appropriate steps to provide reasonable assurance that the entity complies with law and regulations applicable to its activities;
- (b) To establish arrangements for preventing any non-compliance with law or regulations and detecting any that occurs; and
- (c) To prepare financial statements that give a true and fair view of the state of affairs of a company and its profit or loss for the financial year.

The assignment of particular responsibilities to management or the audit process does not relieve the directors of these fundamental responsibilities.

In addition, directors and officers of companies have responsibility to provide information required by the auditors, to which they have a legal right of access under the Companies and Allied Matters Act, Cap. C 20 LFN 2004.

The following steps, among others, may assist the directors in discharging their responsibilities for the prevention and detection of non-compliance with law or regulations:

- (a) Maintaining an up-to-date register of significant laws and regulations with which the entity has to comply within its particular industry;
- (b) Monitoring legal requirements and any changes therein and ensuring that operating procedures are designed to meet these requirements;

- (c) Instituting and operating appropriate systems of internal control;
- (d) Developing a Code of Conduct, ensuring employees are properly trained in and understand its provisions, monitoring compliance and taking appropriate disciplinary action in cases of non-compliance; and
- (e) Engaging legal advisers to assist in monitoring legal requirements, and maintaining a record of complaints.

In large entities, these policies and procedures may be supplemented by assigning appropriate responsibility to:

- (a) An internal audit function;
- (b) A legal department;
- (c) A compliance function; and/or
- (d) An audit committee.

In certain sectors or activities (for example financial services), there are detailed laws and regulations that specially require directors to have systems to ensure compliance. These laws and regulations could, if breached, have a material effect on the financial statements. In addition, the directors are required to report certain instances of non-compliance to the proper authorities on a timely basis” (Chitty, 2004). For example, In Nigeria banks are required by law to report cases of fraud and attempted fraud to the Central Bank.

Considering the responsibility of the directors to prepare financial statements that give a true and fair view of the state of affairs of a company and of its profit or loss for the financial year, it is necessary, where possible non-compliance with law or regulations has occurred, which may result in a material misstatement in the financial statements, for the directors to ensure that the matter is appropriately reflected and/or disclosed in the financial statements.

## **RESPONSIBILITIES OF THE AUDITORS**

### **Prevention**

APB SAS 120 on Consideration of law and regulations states that: “it is not the auditors’ function to prevent non-compliance with law or regulations. The fact that an audit is carried out may, however, act as a deterrent”.

### **Detection**

The auditors plan, perform and evaluate their audit work in order to have a reasonable expectation of detecting material misstatements in the financial statements of the entity audited. When doing so, they recognise that material misstatements may arise from non-compliance with law or regulations. However, an audit cannot reasonably be expected to detect all possible non-compliance with law and regulations. In an audit, there is the unavoidable risk that some material misstatements of the financial statements will not be detected, even though the audit is properly planned and performed in accordance with auditing standards. This risk is higher with regard to misstatements resulting from non-compliance with law or regulations due to such factors as the following:

- (a) There are many laws and regulations, relating principally to the operating aspects of the entity, that typically do not have a material effect on the financial statements and where the consequences of any non-compliance are not captured by the accounting and internal financial control systems;
- (b) The effectiveness of audit procedures is affected by the inherent limitations of the accounting and internal control systems and by the use of selective testing rather than the examination of all transactions;
- (c) Much of the evidence obtained by the auditors is persuasive rather than conclusive in nature; and
- (d) Non-compliance with law or regulations may involve conduct designed to conceal it, such as collusion, forgery, override or intentional misrepresentations being made to the auditors (Chitty, 2004).

### **The Auditors' Consideration of Compliance with Law and Regulations**

“The auditors plan, and perform the audit with an attitude of professional scepticism. They should recognise that the audit may reveal conditions or events that could lead to questioning whether, an entity is complying with law and regulations. For audit purposes, laws and regulations relevant to the audit, can be regarded as falling into two main categories:

- (a) Those which relate directly to the preparation of, or the inclusion or disclosure of specific items in, the financial statements of the entity, and;
- (b) Those which provide a legal framework within which the entity conducts its business and which are central to the entity's ability to conduct its business and where non-compliance may reasonably be expected to result in the entity ceasing operations, or call into question its continuance as a going concern (Chitty, 2004).

APB SAS 120 requires the auditors to “obtain sufficient appropriate audit evidence about compliance with those laws and regulations which relate directly to the preparation of, or the inclusion or disclosure of specific items in the financial statements”.

Those laws and regulations which relate directly to the preparation of, or the inclusion or disclosure of specific items in, the financial statements include:

- (a) Those which specify the form and content of financial statements, such as, Schedule to the Companies and Allied Matters Act, 2004; and
- (b) Those laws which require auditors expressly to report non-compliance, such as, the requirements of the Companies and Allied Matters Act, 2004 relating to the maintenance of proper accounting records or the disclosure of particulars of directors remuneration in a company's financial statements.

Financial reporting requirements for particular industries e.g. banks. Where statutory requirements exist which require the auditors to report, as part of the audit of the financial statements, whether the entity complies with certain provisions of laws or regulations, for example the Companies and Allied Matters Act, 1990, the auditors need to have a sufficient understanding of such laws and regulations in order to consider them when auditing the assertions relating to the determination of the amounts to be recorded and the disclosures to be made; and to test for compliance with such provisions.

The auditors should perform procedures to help identify possible or actual instances of non-compliance with those laws and regulations which provide a legal framework within which the entity conducts its business and which are central to the entity's ability to conduct its business and hence to its financial statements, by:

- (a) Obtaining a general understanding of the legal and regulatory framework which is applicable to the entity and the industry, and of the procedures followed to ensure compliance with that framework;
- (b) Inspecting correspondence with relevant licensing or regulatory authorities;
- (c) enquiring of the directors instances of non-compliance with law or regulations; and
- (d) obtaining written confirmation from the directors that they have disclosed to the auditors all those events of which they are aware which involve possible non-compliance, together with the actual contingent consequences which may arise therefrom.

To obtain this general understanding, the auditors should:

- (a) Enquire of management as to the laws or regulations (and any changes therein) that may be central to the entity's ability to conduct its business;
- (b) Enquire of management concerning the entity's policies and procedures regarding compliance with laws and regulations, in particular, those which may be central to its ability to conduct its business;
- (c) Discuss with management the policies or procedures adopted for identifying, evaluating and accounting for litigation, claims and assessments;
- (d) Use their existing knowledge of the entity's industry and business and of its regulatory environment; and
- (e) Discuss the legal and regulatory framework with auditors of subsidiaries in other countries (Chitty 2004).

APB SAS 120 stipulates that "when carrying out their procedures for the purpose of forming an opinion on the financial statements, the auditors should in addition be alert to instances of possible or actual non-compliance with law or regulations which might affect the financial statement".

The auditor may adopt the following procedures to bring to the fore instances of non-compliance with the law and regulations:

- (a) Reading minutes of board and management meetings;
- (b) Enquiring of the entity's directors and legal counsel concerning litigation, claims and assessments; and
- (c) Perform substantive tests of details of transactions or balances.

#### **4.7 EVALUATING THE QUALITY OF THE AUDIT AND MAINTAINING ADEQUATE WORKING PAPERS**

APB Statement of Accounting Standard 230 covers "Working papers". IFAC International Standard on Auditing 230 also covers "Documentation". APB SAS 230 states that "auditors should document in their working papers matters which are important in supporting their report". In this context, Working papers are the material that auditors prepare or obtain, and retain in connection with the performance of the audit. Working papers may be in the form of data stored on paper, film, electronic media or other media.

Working papers support, amongst other things, the statement in the auditors' report as to the auditors' compliance or otherwise with auditing standards, and thus record compliance with auditing standards to the extent that it is important in supporting their report.

Working papers are the record of:

- (a) The planning and performance of the audit;
- (b) The supervision and review of the audit work; and
- (c) The audit evidence resulting from the audit work performed which the auditors consider necessary and on which they have relied to support their report.

##### **Form and Content of Working Papers**

APB SAS 230 states that "working papers should record the auditors' planning, the nature, timing and extent of the audit procedures performed, and the conclusions drawn from the audit evidence obtained." Auditors should record in their working papers their reasoning on all significant matters which require the exercise of judgement, and their conclusions thereon.

The extent of working papers is a matter of professional judgement since it is neither necessary nor practical to document every matter auditors consider. Auditors base their judgement as to the extent of working papers upon what would be necessary to provide an experienced auditor, with no previous connection with the audit, with an understanding of the work performed and the basis of the decisions taken. Even then, that experienced auditor may only be able to obtain a comprehensive understanding of all aspects of the audit by discussing them with the auditors who prepared them.

It is in those areas of the audit that involve difficult questions of principle or judgement that auditors' judgement may be questioned subsequently, particularly by a third party who has the benefit of hindsight. In such circumstances it is important to be able to demonstrate the relevant facts that were known at the time the auditors reached their conclusion.

Auditors draw conclusions relating to specific financial statement assertions. However, all such conclusions are arrived at within the context of their report. That report relates to the financial statements taken as a whole, and not to the individual assertions embodied in the financial statements' (Chitty, 2004).

The following matters may affect the form and content of working papers:

- (a) The nature of the engagement;
- (b) The form of the auditors' report;
- (c) The nature and complexity of the entity's business;
- (d) The nature and condition of the entity's accounting and internal control systems;
- (e) The needs in the particular circumstances for direction, supervision and review of the work of members of the audit team; and
- (f) The specific methodology and technology the auditors use.

'Working papers are designed and organised to meet the circumstances and the auditors' needs for each individual audit. The use of standardised working papers (for example checklists, specimen letters, standard organisation of working papers) may improve the efficiency with which, such working papers are prepared and reviewed. While they facilitate the delegation of work and provide a means to control its quality, it is never appropriate to follow mechanically, a standard approach to the conduct and documentation of the audit without regard to the need to exercise professional judgement (Chitty, 2004).

The auditors may utilise schedules, analyses and other documentation prepared by the entity, to improve audit efficiency. In such cases, the auditors must see evidence that such information is properly prepared.

Detailed contents of Permanent and Current audit working papers were discussed earlier in Chapter I of this Study Pack.

Generally, working papers may include the following, where relevant:

- (a) Information concerning the legal and organisational structure of the entity;
- (b) Extracts or copies of important legal documents, agreements and minutes;
- (c) Information concerning the industry, economic environment and legislative environment within which the entity operates;
- (d) Evidence of the planning process and any changes thereto;
- (e) Evidence of the auditors' understanding of the accounting and internal control systems;
- (f) Evidence of inherent and control risk assessments and any revisions thereof;
- (g) Evidence of the auditors' consideration of the work of internal audit and their conclusions thereon;
- (h) Analyses of transactions and balances;

- (i) Analyses of significant ratios and trends;
- (j) A record of the nature, timing and extent of auditing procedures undertaken and the results of such procedures;
- (k) Details of procedures regarding components whose financial statements are audited by other auditors;
- (l) Copies of communications with other auditors, experts and other third parties;
- (m) Copies of correspondence with the entity, reports to directors or management and notes of discussions with the entity's directors or management concerning audit matters;
- (n) Letters of representation from the entity's directors or management;
- (o) A summary of the significant aspects of the audit including details of the information available, the amounts involved, management's views, the conclusions reached and how these matters are resolved or treated; and
- (p) Copies of the approved financial statements and auditors' reports. (Chitty, 2004; IFAC ISA 230).

Working papers typically records:

- (a) When and by whom audit procedures are undertaken; and
- (b) When and by whom working papers are reviewed.

Points raised during the review of working papers need not be retained providing the working papers demonstrate evidence of the extent of the review process and are updated to record the resolution of any significant matters noted.

In the case of recurring audits, some working paper files may be classified as 'permanent' audit files which are updated with new information of continuing importance, as distinct from 'current' audit files which contain information relating primarily to the audit of a single period.

### **Confidentiality, Safe Custody and Ownership of Working Papers**

APB SAS 230 states that "auditors should adopt appropriate procedures for maintaining the confidentiality and safe custody of their working papers".

Auditors comply with ethical guidance as to the confidentiality of working papers. Portions of, or extracts from, the working papers may be made available to the entity at the discretion of the auditors, provided such disclosure does not undermine the independence or the validity of the audit process. Information is generally not made available to other third parties (including parent companies or subsidiary undertakings or their auditors) without the permission of the entity (Chitty, 2004).

The auditors should exercise judgement to determine the appropriate period of retention bearing in mind the following:

- (a) Possible needs of their client, for example that audited information may need to be included in a prospectus at some future date;
- (b) Their own needs, including any regulatory requirements; and

- (c) Prior to their destruction, auditors consider whether there is likely to be a need to refer to them again.

Working papers are the property of the auditors. Although portions of or extracts from the working papers may be made available to the entity at the discretion of the auditor, they are not a substitute for the entity's accounting records (IFAC ISA 230).

#### **4.8 PLANNING, DOCUMENTING AND MONITORING OF TIME AND COSTS**

##### **Planning**

At the planning stage of an audit, the auditors must prepare time and cost estimate as part of the audit plan. It is necessary for audits of entities of all sizes. The objectives of time planning which takes place before the detailed audit work begins include:

- (a) Ensuring that appropriate time is devoted to the different tasks and activities covering all areas of the audit;
- (b) Ensuring that potential problems are identified, and appropriate time estimate made to cover such matters;
- (c) Ensuring proper documentation of time and cost;
- (d) Ensuring proper monitoring of time and cost;
- (e) Ensuring timely completion and rendering of time sheets;
- (f) Ensuring that appropriate fee is charged for the audit; and
- (g) Facilitating review.

##### **Planning of time and costs also assist:**

- (a) In the proper assignment of work to members of the audit team and their briefing;
- (b) In the co-ordination of work done by other auditors and experts, so that the audit may be performed in an efficient and timely manner; and
- (c) In obtaining an understanding of the entity's affairs and, all members of the audit team in understanding the nature and scope of other work they are to carry out before the audit field work starts; within the time allocated to each aspect of the audit.

##### **Establishment of Policy and Processes**

The establishment of time and cost procedures as part of the quality control policy and processes within a firm involves:

- (a) Setting a framework within which all relevant requirements, including the requirements of time estimating, recording, monitoring and costing, can be met; and
- (b) Determine the size and nature of the practice and its organisation.

##### **Communication**

Communication of time and cost policy and processes usually involve:

- (a) Communication of time and cost policy and processes to all audit staff and audit engagement partners for effective implementation; and

- (b) Use of internal training, electronic and paper circulars, and staff manuals to communicate time and cost policy and processes.

### **Documentation**

Appropriate documentation of time and cost policy and processes normally includes:

- (a) A description of the policy and processes and the objectives they are designed to achieve;
- (b) Records of amendments to policies and processes; and
- (c) A record of how policy and processes and changes to them have been communicated.

### **Assignment of Personnel to Audit Engagements, Time Estimation and Recording**

Each audit engagement should have an engagement partner who should take responsibility for the engagement on behalf of the firm.

Audit engagement partners are responsible for the conduct of the audits to which they have been appointed, timely rendering of the bill and collection of amount billed.

Firms should assign audit staff with the competencies necessary to perform the audit work expected of them to individual audit engagements. Firms should establish processes to record, monitor and render time costs.

### **Timekeeping**

Audit engagement partners should ensure that audit work is directed, supervised and reviewed in a manner that provides reasonable assurance that the work has been performed efficiently and competently. They are also responsible for timely billing, rendering and collection of amount billed.

#### **Timekeeping involves:**

- (a) Knowing the firm's policy and procedures on time and cost processes;
- (b) Knowing the time budget for the tasks and activities assigned;
- (c) Timely arrival on assignments;
- (d) Keeping daily record of tasks and activities and time expended on them;
- (e) Timely completion, approval and submission of timesheets; and
- (f) Being educated on appropriate team-working and training.

### **Monitoring**

Firms should appoint a senior audit partner to take responsibility for monitoring the time aspects of audits carried out by the firm.

The responsibility for monitoring the time aspects of audit performance is different from the responsibility for the establishment of quality control policy and processes. Wherever possible, the two responsibilities are undertaken by different senior audit partners.

The objective of monitoring time and costs is to provide an independent assessment of:

- (a) The appropriateness of the time cost, billing and recovery of costs on audit; and
- (b) Whether the firm's own time and cost policy and processes have been applied.

The senior audit partner responsible for the monitoring process:

- (a) Develops procedures for the systematic review of time cost, billing and recovery on completed audit engagements;
- (b) Develops appropriate course of action where significant variances between estimated time cost and actual cost are identified. Courses of action may involve communication of the findings within the firm and additional training; and
- (c) Ensures changes to the firm's policies and procedures and disciplinary action against those who repeatedly fail to comply with the firm's standards.

#### **4.9 ESTABLISHING PROCEDURES FOR OBTAINING AUDIT EVIDENCE INCLUDING BALANCE AND TRANSACTION TESTING, ANALYTICAL PROCEDURES AND MANAGEMENT REPRESENTATION**

##### **Analytical Procedures**

###### **Introduction**

APB statement of auditing standard 410 covers 'Analytical Procedures'.

The standard requires auditors to apply analytical procedures at the planning and overall review stages of the audit.

The standard defines 'Analytical procedures' as the analysis of relationships between:

- (a) Items of financial data, or between items of financial and non-financial data, deriving from the same period; or
- (b) Comparable financial information deriving from different periods or different entries, to identify consistencies and predicted patterns or significant fluctuations and unexpected relationships, and the results of investigations thereof.

Analytical procedures are designed primarily to assist in planning the audit and as part of the evaluation of the financial statements.

Analytical procedures may also be performed as substantive procedures designed to obtain evidence directly.

###### **Nature and Purpose of Analytical Procedures**

Analytical procedures include the consideration of comparisons of the entity's financial information with, for example:

- (a) Comparable information for prior periods;
- (b) Anticipated results of the entity, from budgets or forecasts;
- (c) Predictive estimates prepared by the auditors, such as an estimation of the depreciation charge for the year; and
- (d) Similar industry information, such as a comparison of the entity's ratio of sales to trade debtors with industry averages, or with the ratio relating to other entities of comparable size in the same industry.

Analytical procedures also include consideration of relationships:

- (a) Between elements of financial information that are expected to conform to a predicted pattern based on the entity's experience, such as the relationship of gross profit to sales; and
- (b) Between financial information and relevant non-financial information, such as the relationship of payroll costs to number of employees (Chitty, 2004).

Various methods may be used in performing the analytical procedures. These range from simple comparisons to complex analyses using advanced statistical techniques. Analytical procedures may be applied to consolidated financial statements, financial statements of components (such as subsidiary undertakings, divisions or branches) and individual elements of financial information. The auditors' choice of procedures, methods and level of application is a matter of professional judgement.

Analytical procedures are used by auditors:

- (a) To assist in planning the nature, timing and extent of other audit procedures;
- (b) As substantive procedures when their use can be more effective or efficient than other procedures in reducing detection risk for specific financial statement assertions; and
- (c) As part of the overall review of the financial statements when finalising the audit.

### **Analytical Procedures in Planning the Audit**

Auditors should apply analytical procedures at the planning stage to assist in:

- (a) Understanding the entity's business;
- (b) Identifying areas of potential audit risk; and
- (c) Planning the nature, timing and extent of other audit procedures.

Analytical procedures at this stage are usually based on the entity's interim financial information, budgets and management accounts. Discussions with the entity's management, focused on identifying significant changes in the business since the prior financial period, may also be useful.

Application of analytical procedures may indicate:

- (a) Aspects of the entity's business of which the auditors were previously unaware; and

- (b) Assist in determining the nature, timing and extent of other audit procedures.

### **Analytical Procedures as Substantive Procedures**

The decision about whether to use analytical procedures as substantive procedures and the nature, timing and extent of their use is based on the auditors' judgement about the expected effectiveness and efficiency of the available procedures in reducing detection risk for specific financial statements assertions.

Auditors usually enquire of management as to the availability and reliability of information needed to apply analytical procedures and the results of any such procedures performed by the entity.

It may be efficient to use analytical data prepared by the entity, provided the auditors are satisfied that such data is properly prepared.

When intending to apply analytical procedures as substantive procedures, auditors consider a number of factors such as:

- (a) The plausibility and predictability of the relationships identified for comparison and evaluation. For example, there is a strong relationship between certain selling expenses and turnover in businesses where the sales force is paid by commission;
- (b) The objectives of the analytical procedures and the extent to which their results are reliable;
- (c) The degree to which information can be disaggregated, for example, analytical procedures may be more effective when applied to financial information on individual sections of an operation or to financial statements of components of a diversified entity, than when applied to financial information relating to the entity as a whole;
- (d) The availability of information, both financial (such as budgets or forecasts) and non-financial (such as the number of units produced or sold);
- (e) The relevance of the information available, for example, whether budgets are established as results to be expected rather than as goals to be achieved;
- (f) The comparability of the information available, for example, broad industry data may need to be supplemented to make it comparable with that of an entity that produces and sells specialised products; and
- (g) The knowledge gained during the previous audits, together with the auditors' understanding of the effectiveness of the accounting and internal control systems and the types that in prior periods have given rise to accounting adjustments (Chitty, 2004).

The reliability of the information used in analytical procedures is likely to be enhanced:

- (a) If it comes from sources independent of, rather than internal to, the entity;

- (b) If the information is produced internally, its reliability is enhanced if it is produced independently of the accounting system or there are adequate controls over its preparation; and
- (c) If the necessity for the evidence on the reliability of such information depends on the results of other audit procedures and on the importance of the results of analytical procedures as a basis for the auditors' opinion.

The extent of reliance that auditors place in the results of analytical procedures when used as substantive procedures may also depend on the following factors:

- (a) Other procedures directed towards the financial statement assertions. For example, other procedures auditors undertake in reviewing the collectibility of debtors, such as the review of subsequent cash receipts, may confirm or dispel questions arising from the application of analytical procedures to an aged profile of customers' accounts;
- (b) The accuracy with which the expected results of analytical procedures can be predicted. For example, auditors normally expect greater consistency in comparing discretionary expenses, such as research or advertising; and
- (c) The frequency with which a relationship is observed, for example, a pattern repeated monthly as opposed to annually.

The application of analytical procedures is based on the expectation that relationships between data exist and continue in the absence of known conditions to the contrary. The presence of these relationships provides audit evidence as to the financial statement assertions relating to the data produced by the accounting system. However, reliance on the results of analytical procedures depends on the auditors' assessments of the risk that the analytical procedures may identify relationships as expected whereas, in fact, a material misstatement exists (Chitty, 2004).

### **Analytical Procedures as Part of the Overall Review when Completing the Audit**

APB SAS 410 titled "Analytical procedures" states that, "when completing the audit, auditors should apply analytical procedures in forming an overall conclusion as to whether the financial statements as a whole are consistent with their knowledge of the entity's business".

The conclusions drawn from the results of such procedures are intended to:

- (a) Corroborate conclusions formed during the audit regarding individual components or elements of the financial statements; and
- (b) Assist in arriving at the overall conclusion as to whether the financial statements as a whole are consistent with the auditors' knowledge of the entity's business. However, they may also identify areas requiring further audit procedures.

### **Investigating Significant Fluctuations or Unexpected Relationships**

APB SAS 410 states that when significant fluctuations or unexpected relationships are identified that are inconsistent with other relevant information or that deviate from predicted patterns, auditors should:

- (a) Investigate; and
- (b) Obtain adequate explanations and appropriate corroborative evidence.

The investigation of significant fluctuations and unexpected relationships ordinarily begins with enquiries of management, followed by corroboration of management's responses:

- (a) By comparing them with the auditors' knowledge of the entity's business and with other evidence obtained during the course of the audit; or
- (b) If the analytical procedures are being carried out as substantive procedures, by undertaking additional audit procedures where appropriate to confirm the explanations earlier received from entity's management.

Where the explanation obtained from the entity's management is considered inadequate, the auditors may determine the additional audit procedures to be undertaken to obtain an explanation for the fluctuation or relationship noted.

## **MANAGEMENT REPRESENTATIONS**

### **Introduction**

APB Statement of Auditing Standard 440 covers "Management Representations". SAS 440 establishes standards and provides:

- (a) Guidance on the use of management representations as audit evidence;
- (b) The procedures to be applied in evaluating and documenting management representations; and
- (c) The action to be taken if management refuses to provide confirmation of appropriate representations.

In the course of an audit, many representations are made to the auditors. The representations may be:

- (a) either unsolicited or in response to specific enquiries;
- (b) critical to obtaining sufficient appropriate audit evidence on which to base their audit opinion; and
- (c) on general matters, for example that the directors have made all accounting records available to the auditors.

The possibility of misunderstanding between auditors and management is reduced when oral representations are confirmed in writing. Written confirmation of representations may take the form of:

- (a) A representation letter from management; or
- (b) A letter from the auditors outlining their understanding of management's representations, duly acknowledged and confirmed in writing by management; or

- (c) Minutes of meetings of the board of directors, or similar body, at which such representations are approved.

An example of representations from management in the form of a letter is set out in the latter part of this section.

APB SAS 440 states that; “auditors should obtain written confirmation of appropriate representations from management before their report is issued”.

The standard describes, in the context of management representations, ‘management’ as including directors, officers and others who perform senior managerial function.

The standard defines ‘Directors’ as the ‘directors of a company or other body, the partners, proprietors, committee of management or trustees of other forms of entities, or equivalent persons responsible for directing the reporting entity’s affairs and preparing its financial statements.

### **Acknowledgement by the Directors of their Responsibility for the Financial Statements**

Auditors should obtain evidence that the directors acknowledge their collective responsibility for the preparation of the financial statements and have approved the financial statements.

The directors’ acknowledgement of such collective responsibility and approval may be obtained by the auditors receiving a signed copy of the financial statements which incorporate a statement of the directors’ responsibility for the financial statements.

Relevant minutes of meetings of the board of directors or similar body, or by attending such a meeting; or a written representation from the directors.

When auditors have responsibility for reporting on the financial statements of a group of companies, acknowledgement by the directors of their responsibility for the financial statements applies to both the group financial statements and the financial statements of the parent undertaking (Chitty, 2004).

### **Representations by Management as Audit Evidence**

Auditors often rely on representations by management as part of their audit evidence by:

- (a) Obtaining representations from the directors as to their responsibility for the financial statements; and
- (b) Relying on representations by management.

Auditors should obtain written confirmations of representations from management on matters which are material to the financial statements and when those representations are critical to obtaining sufficient appropriate audit evidence.

The auditors should discuss such matters with those responsible for giving the written confirmation before they sign it to ensure that they understand what they are confirming.

When representations to the auditors relate to matters which are material to the financial statements, they:

- (a) Seek corroborative audit evidence;
- (b) Evaluate whether the representations made by management appear reasonable and are consistent with other audit evidence obtained, including other representations; and
- (c) Consider whether the individuals making the representations can be expected to be well-informed on the particular matters' (Chitty, 2004).

The auditors should not regard representations by management to be a substitute for other audit evidence that auditors expect to be available. If sufficient appropriate audit evidence regarding a matter that may have a material effect on the financial statements is not available, this constitutes a limitation on the scope of the audit, even if a representation from management has been received on the matter. In these circumstances it may be necessary for the auditors to consider the implications for the purpose of their report.

Management representations may be the only audit evidence available in certain instances, such as:

- (a) Where knowledge of the facts is confined to management (for example, when the facts are a matter of management intentions); or
- (b) When the matter is principally one of judgement or opinion (for example, on the trading position of a particular customer).

In some exceptional cases, the matter may be of such significance that the auditors refer to the representations in their report as being relevant to a proper understanding of the basis of their opinion.

If a representation appears to be contradicted by other audit evidence, the auditors should:

- (a) Investigate the circumstances to resolve the matter; and
- (b) Consider whether it casts doubt on the reliability of other representations.

The investigation of apparently contradictory audit evidence regarding a representation received involve further enquiries of management to ascertain whether the representation has been misunderstood or whether the other audit evidence has been misinterpreted, and obtaining corroboration of management's responses.

If management is unable to provide an explanation or if the explanation is not considered adequate, further audit procedures may be required to resolve the matter.

### **Basic Elements of a Management Representation Letter**

When requesting a management representation letter, the auditors ought to request that it should be:

- (a) Addressed to them;
- (b) Contain specified information;
- (c) Appropriately dated;
- (d) Approved by those with specific knowledge of the relevant matters; and
- (e) Discussed and agreed by the board of directors or similar body, and on their behalf by the chairman and secretary, before they approve the financial statements, to ensure that the board as a whole is aware of the representations on which the auditors intend to rely in expressing their opinion on those financial statements.

The auditors may also wish to consider whether to take the opportunity to remind the directors that, under section 369 of the Companies and Allied Matters Act, it is an offence to mislead the auditors.

A management representation letter is normally dated on the day the financial statements are approved by the directors.

If there is any significant delay between the date of the management representation letter and the date of the auditors' report, the auditors may consider it necessary to obtain further representations regarding the intervening period for the purpose of their report.

### **Action if Management Refuses to Provide Written Confirmation of Representations**

If management refuses to provide written confirmation of a representation that the auditors consider necessary, the auditors should:

- (a) Consider the implications of this scope limitation for their report.
- (b) Not place reliance on other representations made by management during the course of the audit.

### **Example of Management Representation Letter**

Company letterhead)  
(To the auditors)

We confirm to the best of our knowledge and belief, and having made appropriate enquiries of other directors and officials of the company, the following representations given to you in connection with your audit of the financial statements for the period ended 31 December .....

- (a) We acknowledge as directors our responsibilities under the Companies and Allied Matters Act for preparing financial statements which give a true and fair view and for making accurate representations to you. All the accounting records have been made available to you for the purpose of your audit and all the transactions undertaken by the company have

been properly reflected and recorded in the accounting records. All other records and related information, including minutes of all management and shareholders' meetings, have been made available to you.

- (b) The legal claim by ABC Nigeria Limited has been settled out of court by a payment of ₦5 million. No further amounts are expected to be paid, and no similar claims have been received or are expected to be received.
- (c) In connection with deferred tax not provided, the following assumptions reflect the intentions and expectations of the company:
  - (i) Capital investment of ₦10 million is planned over the next three years;
  - (ii) There are no plans to sell revalued properties; and
  - (iii) We are not aware of any indications that the situation is likely to change so as to necessitate the inclusion of a provision for tax payable in the financial statements.
- (d) The company has not had, or entered into, at any time during the period any arrangement, transaction or agreement to provide credit facilities including loans, quasi-loans or credit transactions) for directors or to guarantee or provide security for such matters.
- (e) There have been no events since the balance sheet date which necessitate revision of the figures included in the financial statements or inclusion of a note thereto.

We confirm that the above representations are made on the basis of enquiries of management and staff with relevant knowledge and experience (and, where relevant, of inspection of supporting documentation) sufficient to satisfy ourselves that we can properly make each of the above representations to you.

As minuted by the board of directors at its meeting on..... (date)

.....  
**Chairman**

.....  
**Secretary**

#### 4.10 QUALITY CONTROL AND PEER REVIEW

##### Introduction

APB statement of auditing standard 240 deals with "Quality Control for audit work". It takes Quality Control to be of paramount importance to the independent audit function.

The standard describes quality control policy and processes as those "designed to provide reasonable assurance as to the appropriateness of the auditors' report and of adherence to auditing standards, ethical and other regulatory requirements.

Many quality assurance frameworks take a holistic approach to quality, encompassing a wide range of business considerations including client and employee satisfaction, and commercial performance. Firms are encouraged to embed procedures to meet the requirements of the statement of auditing standards on quality control into a wider quality assurance framework". (Chitty, 2004).

Wider quality assurance objectives may be achieved by the auditors by discussing audit performance with boards of directors, audit committees (where they exist) and senior management.

#### 4.11 SUMMARY AND CONCLUSIONS

In this chapter we have laid down the necessary ground work for effective public audit assurance practice. Detailed discussions have been given on cardinal points relating to audit and assurance services. Such topics as audit planning, documentation, responsibilities of directors, and senior management, as distinct from that of the auditors were given adequate coverage. Methodology for carrying out an engagement and responsibilities of engaged Partners and field staff, were adequately covered.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

#### 4.12 REVISION QUESTIONS

##### 4.12.1 MULTIPLE CHOICE QUESTIONS

1. Auditors should plan the audit work so as to perform the audit in an effective manner
  - (A) True
  - (B) Untrue
  - (C) Writing audit planning summary is enough
  - (D) Writing management report will suffice
  - (E) Auditors' prior year knowledge will suffice.
2. The objectives of planning the audit work, which takes place before the detailed audit work begins, include:
  - (A) Ensuring that appropriate attention is devoted to the different areas of the audit
  - (B) Ensuring that potential problems are identified
  - (C) Facilitating review
  - (D) A-C
  - (E) Meeting with the entity's major suppliers.
3. Matters for auditors to consider in developing the overall audit plan, with particular regard to the knowledge of the entity's business, may include:
  - (A) General economic factors and industry conditions affecting the entity's business
  - (B) Important characteristics of the entity, its business, principal business strategies, its financial performance and its reporting requirements, including changes since the previous audit

- (C) The operating style and control consciousness of directors and management
  - (D) The auditors' cumulative knowledge of the accounting and internal control systems and any expected changes in the period
  - (E) All the above four cases.
4. The documentation of audit programme should
- (A) set out the audit procedures the auditors intend to adopt
  - (B) include reference to other matters such as the audit objectives, timing, sample size and basis of selection for each area
  - (C) serve as a set of instructions to the audit team
  - (D) serve as a means to control and record the proper execution of the work
  - (E) A-D above.
5. In planning an audit, the auditor should recognise that non-compliance by the entity with law or regulations may materially affect the financial statements. Consequently, the auditor should plan the audit procedures to include
- (A) an assessment of the compliance of the entity with laws or regulations affecting the business of the entity
  - (B) an evaluation and report on the results of the assessment of the compliance with laws and regulations
  - (C) Visit to the local FM station
  - (D) Raising progressive billings
  - (E) Visit to the Federal High Court.

#### 4.12.2 SHORT ANSWER QUESTIONS

1. Comment on the statement that 'Planning varies according to the size of the entity and the complexity of the audit'.
2. State two bodies within an entity that the auditors need to discuss elements of the overall audit plan and certain audit procedures with in order to improve the effectiveness of the audit and to co-ordinate audit procedures.
3. Work performed by audit staff is reviewed by other more senior audit staff or the audit engagement partner. State five matters which such reviewers consider in an audit engagement.
4. Why should an audit firm appoint a senior audit partner to take responsibility for monitoring the time aspects of audits carried out by the firm?
5. Why should auditors apply analytical procedures at the planning stage of an audit?

*Refer to Suggested Solutions in Appendix I on page 301.*

## ***VERIFICATION OF ASSETS AND LIABILITIES***

### **5.0 LEARNING OBJECTIVES**

After studying this chapter, the reader should be able to:

- ◆ Understand verification principles.
- ◆ Know how to verify current assets, fixed assets and liabilities.
- ◆ Know how to verify intangible assets, and others.
- ◆ Vouch Income and Expenditures.
- ◆ Understand the process of audit documentation.

### **5.1 INTRODUCTION**

In the conduct of the audit of an entity, the auditor is presented with audit evidence and other information supporting the assertions, classes of transactions and balances. The auditor checks the evidence and information presented in the primary documents. The auditor checks the initiation, authorisation, postings, amongst others. The auditor approaches his or her work with professional scepticism. The auditor does not readily believe what he or she has been presented with. This enables the auditor to identify errors which need to be corrected to ensure early detection of any material misstatements in the financial statements on which the auditor is providing an audit opinion.

The auditor uses verification principles to substantiate the evidence provided. Verification principles include:

- (a) Confirm authorisation;
- (b) Checking existence;
- (c) Confirmation of costs or value
- (d) Confirmation of title
- (e) Physical inspection
- (f) Completeness check
- (g) Presentation and disclosure.

Verification procedures in relation to assets and liabilities contained in a set of financial statements rely heavily on the original transactions being accurately recorded and appropriate distinction made between expenditure of capital nature and revenue. Verification procedures also rely on the transactions being properly authorised in line with the entity's authorisation procedures.

This chapter covers verification of current assets, fixed assets and liabilities. The readers will readily understand the various verification methods which the auditor uses in the conduct of his or her duties.

The chapter also covers verification of intangible assets such as goodwill, patents, trademarks, copyrights, reserve and equity, income and expenditure, revenue and expenses, sales and purchases, wages and salaries, and other income and expenditure.

The auditor must have good knowledge of verification principles and their documentation. The use of verification principles and their documentation enable the auditor to accomplish his or her statutory (or other) roles in a manner that leaves other professionals, who may need to review or evaluate his working papers, in no doubt as to the nature of work actually done in meeting professional standards and in supporting the audit opinion.

The learning objectives of this chapter have been carefully considered in structuring the topics in this chapter. A careful study of this chapter will enable the readers to understand the verification principles of auditing and the verification of various classes of assets and liabilities. At the end of this chapter, the student should be able to answer typical examination questions on the verification principles, verification of current assets, fixed assets and liabilities and verification of intangible assets.

## 5.2 VERIFICATION PRINCIPLES

Business entities keep records of their business activities on daily basis. The business of the clients may arise from buying, producing, and selling goods, services, and paying and collecting cash in connection with those activities. Recording of the transactions in the books of the clients are reflected in the revenue, expense, asset and liability accounts.

In the course of preparation of financial statements, the directors make certain financial statements assertions. The assertions constitute representations of the directors that are embodied in the financial statements. The directors, by approving the financial statements confirm the representations made by them. The following matters constitute representations or assertions usually made by the directors in approving financial statements:

- (a) **Existence:** an asset or a liability exists at a given date;
- (b) **Rights and Obligations:** an asset or a liability pertains to the entity at a given date;
- (c) **Occurrence:** a transaction or event took place which pertains to the entity during the relevant period;
- (d) **Completeness:** there are no unrecorded assets, liabilities, transactions or events, or undisclosed items;
- (e) **Valuation:** an asset or liability is recorded at an appropriate carrying value;

- (f) **Measurement:** a transaction or event is recorded at the proper amount and revenue or expense is allocated to the proper period; and
- (g) **Presentation and disclosure:** an item is disclosed, classified and described in accordance with the applicable reporting framework (for example relevant legislation and applicable accounting standards).

The above therefore are the fundamentals of all verification exercises.

The auditor must obtain audit evidence to support each financial statement assertion. The audit evidence presented in support of one assertion (for example, existence of stock) does not compensate for failure to obtain audit evidence regarding another (for example, its valuation). Tests may, however, provide audit evidence about more than one assertion (for example, testing subsequent receipts from debtors may provide some audit evidence regarding both their existence and valuation).

In conducting substantive tests, the auditor must consider the nature, timing and extent of substantive procedures. These may depend, amongst other factors, on the following matters:

- (a) The auditors' assessments of the control environment and accounting systems generally;
- (b) The inherent and control risks relating to each assertion;
- (c) Evidence obtained from audit work performed during the preparation of the financial statements; and
- (d) Where tests of control provide satisfactory evidence as to the effectiveness of accounting and internal control systems, the extent of relevant substantive procedures may be reduced, but not entirely eliminated.

Auditors normally obtain audit evidence by:

- (a) Inspection;
- (b) Observation;
- (c) Enquiry and confirmation;
- (d) Computation; and
- (e) Analytical procedures.

The choice of one or a combination of the procedures which the auditors may adopt is dependent, in part, on the type of audit, the time the audit is conducted and the form in which the accounting records are maintained.

### **Inspection**

Inspection provides reliable audit evidence about the existence of the tangible assets inspected but not necessarily as to the ownership or value of such assets.

It involves examining records, documents or tangible assets and provides audit evidence of varying degrees of reliability depending on their nature and source and the effectiveness of internal controls over their processing.

Inspection also provides three major categories of documentary audit evidence, listed in ascending degree of reliability, viz:

- (a) Evidence created and held by the entity;
- (b) Evidence created by third parties and held by the entity; and
- (c) Evidence created and provided to auditors by third parties.

### **Observation**

The auditor, by observation, looks at a procedure being performed by others, for example the auditors observe the counting of stock by the entity's staff or the performance of internal control procedures as part of the conduct of an audit.

### **Enquiry and Confirmation**

Enquiry involves seeking information within and outside the entity. Enquiry may be formal or informal. Responses to enquiries obtained from third parties may confirm or disprove information previously made available to the auditors.

Confirmation involves obtaining response to an enquiry to corroborate information previously made available to the auditors in the course of the audit.

Examples of direct confirmation are as follows:

- (a) Confirmation of debts by communication with debtors;
- (b) Confirmation of legal cases by communication with the entity's solicitors; and
- (c) Confirmation of bank balances by communication with the entity's bankers.

### **Computation**

The auditor uses computation to check the arithmetical accuracy of source documents and accounting records. Computation also involves re-performing independent calculations.

### **Analytical Procedures**

Analytical procedures consist of the analysis of relationships between:

- (a) Items of financial data;
- (b) Items of financial and non-financial data, deriving from the same period; or
- (c) Comparable financial information deriving from different periods or different entities.

Analytical procedures are used in identifying consistencies and predicted patterns or significant fluctuations and unexpected relationships, and the results of investigations thereof.

Verification of assets is essential in auditing. Verification is a form of substantive test. The auditor has a duty to verify the assets and liabilities which appear on the balance sheet. The auditor also has a duty to verify that no other assets and liabilities which ought to appear on the balance sheet have been omitted from the financial statements.

At this juncture, it is important to know that an auditor must have a good understanding of his or her client's business. He should document the client's business and conduct tests of control and substantives tests on class of transactions and balances usually generated by the entity. All items considered to be material must be covered in the substantive tests.

Auditors are not necessarily suggesting that the risk of material misstatement is particularly at the maximum, in the financial statements presented for audit. Before performing substantive tests on each asset, the auditor would have gathered sufficient information or updated the information previously at his disposal about the client to make preliminary materiality judgement and to assess inherent and control risk.

Verifications of the following accounts are considered below as part of substantive tests in the course of an audit:

- (a) Current assets;
- (b) Fixed assets;
- (c) Liabilities;
- (d) Goodwill, patents, trademarks, copyright and franchise accounts;
- (e) Reserve and equity;
- (f) Income and expenditure;
- (g) Revenue and expenses;
- (h) Sales and Purchases;
- (i) Wages and Salaries; and
- (j) Other income and expenditure account items.

Verification may be in the form of:

- (a) Confirmation of authorisation;
- (b) Checking existence;
- (c) Confirmation of costs or value;
- (d) Confirmation of title;
- (e) Physical inspection;
- (f) Ensuring completeness; and
- (g) Presentation and disclosure.

### 5.3 VERIFICATION OF CURRENT ASSETS AND LIABILITIES

#### Verification of Current Assets

##### Inventory

##### Audit objectives

The audit objectives applicable to inventories are:

- (a) **Completeness**  
This is to ensure that:
  - (i) Inventories represent all raw materials, work-in-progress, and finished goods that the entity owns, including those on hand, in transit or on the premises of others.

- (ii) All shipments of goods during the period covered by the financial statements.
- (b) **Accuracy**  
This is to ensure that:
  - (i) The detailed perpetual inventory records are correct and agree with the general ledger inventory control account.
  - (ii) Costs associated with inventories have been properly classified and accumulated.
  - (iii) Cost of sales is based on correct costs and quantities, is properly summarised and posted to the costs of sales and inventory control accounts, and, where appropriate, is credited in the perpetual inventory records.
- (c) **Existence/Occurrence**  
This is to ensure that:
  - (i) Recorded inventories physically exist in saleable condition and represent property held for sale in the ordinary course of business.
  - (ii) Recorded cost of sales relate specifically to goods actually shipped during the period covered by the financial statements.
- (d) **Cut-off**  
This is a procedure to ensure that production costs incurred are charged to work-in-progress and on completion are transferred to finished goods such that cost of goods sold are recorded in the period when the sales are made.
- (e) **Valuation**  
This is to ensure that:
  - (i) Costs associated with inventories and costs of sales are determined and accumulated using generally accepted accounting principles consistently applied.
  - (ii) Inventories are stated at cost or net realisable value, whichever is lower.
- (f) **Rights and obligation**  
This is to confirm that:  
The entity has legal title or ownership rights to the inventory; inventory excludes goods that are the property of others or have been billed to customers.
- (g) **Presentation and Disclosure**  
This is to ensure that:
  - (i) Inventories and cost of sales are properly described and classified in the financial statements.
  - (ii) All encumbrances against inventory are adequately disclosed.

The auditor achieves these objectives by performing substantive tests or a combination of substantive tests and tests of control, structure, policies and procedures.

### **Planning the Inventory Observation**

The client has the primary responsibility for planning and taking the physical inventory. The auditor should observe stocktaking and should include observation of stocktaking in his planning of the audit. The client and auditor should agree on the timing of the inventory after considering the following factors:

- (a) The inventory should be counted at year-end if it is subject to significant volatility of movement or quantities, or if the control procedures for accounting for movement are ineffective;
- (b) If those procedures are effective, the count can be taken before year-end or, if the client used cycle counts, on a staggered basis throughout the year; and
- (c) If the inventory is taken at once, both client and auditor usually prefer a month in the last quarter of the fiscal year.

Unless the client has effective control procedures that address proper cut-off, the auditor should discourage the client from taking inventories of different departments over a period of several days; this could result in double-counting of inventory.

The auditor should review and comment on the written instructions of inventory plans. Often the client personnel responsible for the inventory hold one or more instructional meetings with those who are to supervise the stock-taking. The auditor's presence at the meetings usually facilitates the plans for observing the inventory.

There may be a need for large number of audit staff to be present when a complete physical inventory is taken at a time than if cycle counts or staggered inventories are taken.

Audit staffing requirements must be determined based on the following variables:

- (a) Timing of inventories at various locations;
- (b) Difficulty of observing them; and
- (c) Number of counting teams the client provides.

### **Observing the Physical Inventory**

The auditor must keep in mind the objectives of observing a physical inventory, namely:

- (a) To ascertain that the inventory exists;
- (b) To observe that the count is accurate;
- (c) To ensure the description of the inventory is accurate; and
- (d) To ensure that its condition is properly recorded.

An auditor is neither a taker nor an expert appraiser of inventory quality, quantities, or condition; nonetheless, an auditor should intelligently apply common sense. Well-arranged inventory is more likely to be accurately counted than poorly arranged inventory. Signs of age and neglect are often obvious, for

example, dust on cartons or rust and corrosion of containers, and they naturally raise questions about the inventory's usefulness. The condition of the inventory is particularly important if the product must meet technical health specifications. Before observing the inventory auditor should know enough about the client's business to be able to recognise, at least in broad terms:

The product under observation and the measures appropriate to determining its quality and condition.

Thus, an auditor should spend some time examining the inventory being counted. However, the client, and everyone else concerned, should recognise that the auditor is not acting as an expert appraiser.

The auditor should spend most of the time observing the client's procedures in operation. The diligence of the counting teams should be noted as to:

- (a) How carefully they count, weigh, and measure;
- (b) How well they identify and describe the inventory; and
- (c) What methods they use to make sure no items are omitted or duplicated.

The auditor should also observe:

- (a) Whether supervisory personnel are present;
- (b) How planned recounting procedures are executed;
- (c) Whether cut-off procedures are performed;
- (d) How inventory count documents are controlled;
- (e) How individual areas or departments are controlled and "cleared"; and
- (f) Whether instructions are followed.

The auditor should do some test counts in order to:

- (a) Confirm the accuracy of the client's counting;
- (b) Record evidence to corroborate the existence of the inventory for later tracing to the inventory summary sheet; and
- (c) Perform random selection, independent counting and comparison with quantities recorded by the clients, provide evidence that all items on hand are accurately included in the client's recorded counts.

The auditor should use judgement in determining how many test counts to perform. In the absence of specific reasons to do otherwise:

- (a) The auditor usually performs a small number of test counts in relation to the total number of items in the inventory;
- (b) Where there are an unacceptable number of errors in a particular location, the client would ordinarily recount the inventory; and
- (c) The auditor should record the test counts for subsequent tracing to the inventory summarisation.

Client inventory counts are commonly recorded at least in duplicate, with one copy retained at the scene of the count and another collected for summarisation. The client normally controls the summarisation process, and the auditor makes

notations of tag or count sheet numbers or other control data on a test basis for later tracing to the summarised records to provide corroborative evidence that the process was adequately controlled.

As part of the review of plans and observation of the physical inventory procedures, the auditor should note and evaluate the procedures followed in separately identifying and counting items moved from one place to another (such as from department to department) and goods on hand belonging to others, such as consignments, bailment, goods on approval, and property of customers returned for repair or held awaiting delivery instructions. All items belonging to others should be counted and recorded separately, both because they should be subject to control and to preclude their mistaken or purposeful substitution for the client's inventory.

In order to adequately identify work-in-progress, especially its stage of completion, auditors should:

- (a) Check the bill of materials or similar document; and
- (b) Identify items in process and their condition or stage of completion.

### **Perpetual Inventories (Cycle Counts)**

All procedures applicable to wall-to-wall physical inventory observation can be readily adapted to cycle count observation. The auditor can:

- (a) Review the cycle counting schedules, plans, and instructions; and
- (b) Observe the physical arrangement and condition of the inventory.

The diligence and proficiency of the inventory count teams in counting, identifying inventory, and controlling records of test counts, would prevent omissions or duplications, and help in identifying and segregating slow-moving, obsolete, or damaged goods. In a situation where the entire inventory is not being counted at the same time, the auditor must take steps to ensure that the items counted are properly identified. The auditor can make few test counts either independently or with the count teams and can observe and, if desired, participate in reconciling the counts to perpetual records and investigating differences.

Effective cycle counting depends on:

- (a) Effective control procedures for inventory quantities; and
- (b) Timely recording throughout the production process.

Once the client's procedures for controlling inventory quantities and related cycle counting are found to be effective, the auditor can choose to observe and test physical inventory procedures at any other time.

The auditor also needs evidence that the perpetual inventories procedures observed:

- (a) Were functioning before;
- (b) Can be expected to function after they were observed; and
- (c) That they are applied to substantially all inventory items.

A formal schedule of counts and specific assignments (covering both personnel to perform the counts and supervisory responsibility) is preferable. Many companies, however, operate under a loose policy of counting all items at least once a year and assign the counting to the stock keepers to do as time allows. In those instances, the auditor can review work sheets, entries in the perpetual inventory records and other evidence of the regularity of test counting, and can evaluate the results. Evidence of proper count procedures include:

- (a) Frequent counting; Absence of substantial differences between counts and records over a period of time;
- (b) Quality of investigation of differences that occur and those investigating differences;
- (c) And quality of storeroom, housekeeping and inventory identification.

### **Difficult Inventories**

Certain types of materials - for example, logs in a river, piles of coal and scrap metal, chemicals - by their nature may be difficult to count, and an auditor may have to use ingenuity to substantiate quantities on hand. Measurement of a pile of metals, for example, may be difficult for a number of reasons:

- (a) The pile may have sunk into the ground to an unknown depth;
- (b) The metals may be of varying weights, precluding the use of an average; and
- (c) The pile may be of uneven density.

The quality of chemicals and similar materials may be impossible to determine without specialised knowledge, and the auditor may find it necessary to draw samples from various levels of holding tanks and send them for independent analysis. Irregularities have been perpetrated by substituting water for materials stored in tanks.

### **Alternative Procedures when Observation is Impracticable**

The auditor should not readily take observation of inventories as impracticable or impossible. In a situation where the client does not or cannot take a physical inventory, or if the auditor cannot be present at the stocks taking, the auditor may be able to form an opinion regarding the reasonableness of inventory quantities by applying any of the following alternative procedures:

### **Examining Other Physical Evidence that may be Tantamount to Observing Physical Inventories**

If the auditor is engaged after the physical inventory has been taken, subsequent physical tests may be a satisfactory substitute for observing the inventory-taking. The auditor may also examine written instructions for the inventory-taking, review the original tags or sheets, and make other suitable tests. In any event, the auditor must:

- (a) Examine or observe some physical evidence of the existence of the inventory; and
- (b) Make appropriate tests of intervening transactions or control procedures applied to them.

If the auditor is satisfied that inventories are fairly stated; he or she is in a position to express an unqualified opinion. Otherwise, there may be no practicable substitute for observation of inventory-taking, and an auditor may have to express a qualified opinion or disclaimer, depending on the materiality of the inventories and on whether failure to observe was unavoidable or resulted from management's decision to limit the scope of the audit.

### **Substantiating Through Further Examination of Accounting Documents**

Sometimes procedures for substantiating inventories must be based on examining other accounting documents and records. For example, in an initial audit, the auditor generally would not have observed the physical inventory at the previous year-end, which is a principal factor in determining cost of sales for the current year. If reputable independent accountants expressed an unqualified opinion on the prior-year statements, a successor auditor may accept that opinion and perhaps merely review the predecessor auditor's working papers supporting the prior-year balances. If no audit was made for the preceding year, the auditor may have no alternative but to substantially expand the tests of accounting records to attempt to obtain reasonable assurance about the beginning inventories in order to be able to express an opinion on the current year's results of operations.

Those expanded tests may include a detailed examination of physical inventory sheets and summaries, including review and testing of cut-off data, examination of perpetual inventory records and production records, and review of individual product and overall gross profit percentages. In connection with the latter procedures, cost accumulations for selected inventory items should be tested and significant changes in unit costs directly traced to factors such as technological changes, mass buying economies and changes in freight rates, changes in labour costs, and changes in overhead rates.

Changes in gross profit percentages should be further related to changes in unit sales prices and changes in the profitability of the sales mix, if applicable. An auditor who is unable to form an opinion on the opening inventory may decide to qualify the audit opinion or disclaim an opinion with respect to results of operations for the year under audit.

### **Testing Ownership and Cut-off**

The auditor must determine that the client holds title to the inventories. Where materials are imported by the entity, the shipping documents determine the ownership of the consignment. The test of ownership of such materials includes:

- (a) Shipping documents showing consignee, Free on Board (FOB) terms and bill of lading; and
- (b) Actual receipts of the materials into the client's warehouse.

In the case of the cut-off test, the auditor needs to ensure:

- (a) The completeness of primary documents such as purchase and sales invoices;

- (b) The invoices so issued followed pre-numbered serials;
- (c) Purchases are generally recorded when received; and
- (d) Sales are made when the transactions took place.

Determination of ownership would depend on proper control of receiving and shipping activities and cut-offs at year-end and, if different, at the physical inventory date.

At the time of the inventory observation, the auditor should:

- (a) Visit the receiving and shipping departments;
- (b) Record the last receiving and shipping document numbers; and
- (c) Ascertain that each department has been informed that no receipts after or shipments before the cut-off date should be included in inventory.

After the inventory, the auditor should:

- (a) Review the records of those departments; and
- (b) Compare the last receiving and shipping numbers with accounting department records to ensure that a proper cut-off was achieved.

Special care should be taken to control the movement of inventory when manufacturing operations are not suspended during the physical inventory. If there are consignment inventories, inventories in public warehouses, or customer inventories, those procedures must be expanded. Inventory held by others should be substantiated by direct confirmation in writing with the custodians.

If such inventory is material, the auditor should apply one or more of the following procedures to obtain reasonable assurance with respect to the existence of the inventory:

- (a) Test the owner's procedures for investigating the stock-keeper and evaluating the store keeper's performance;
- (b) Obtain an independent accountant's report on the store-keeper's control procedures relevant to custody of goods and, if applicable, pledging of receipts, or apply alternative procedures at the warehouse to gain reasonable assurance that information received from the warehouseman is reliable;
- (c) Observe physical counts of the goods, if practicable and reasonable; and
- (d) If warehouse receipts have been pledged as collateral, confirm with lenders pertinent details of the pledged receipts.

If goods are billed to customers and held for them, care must be exercised to exclude the goods from inventory and to determine that the customers have authorised billing before delivery. Goods belonging to customers or others should be counted and, if significant in amount, should be confirmed with their owners. The auditor should be alert to the possibility of such goods and should ensure that the client properly segregates and identifies them.

The auditor should also be alert for liens and encumbrances against the inventories. These are normally evident from reading minutes and agreements, or as a result of confirmations with lenders relating to loans or loan agreements.

It may be necessary to investigate whether additional liens and encumbrances have been filed with relevant authorities.

### **Valuation of Inventory**

Generally accepted accounting principles require that inventories be reported at the lower of historical cost or market (current replacement cost), provided that the carrying value should not exceed net realisable value (estimated selling price minus costs of completion and disposal) or be lower than net realisable value reduced by the normal profit margin. To achieve the valuation objective for inventories, the auditor should test the inventory costing. In addition, he should:

- (a) Review and test procedures for identifying obsolete or slow-moving items;
- (b) Review the costing of damaged or obsolete items to determine that the assigned value does not exceed net realisable value; and
- (c) Review and test the determination of market prices to determine whether market value is lower than cost.

The auditor should:

- (a) Consider not only finished goods but also work in process and raw materials that will eventually become finished goods in the review for obsolete items;
- (b) Compare quantities with those in previous inventories on test basis to identify slow-moving items or abnormally large or small balances; and
- (c) Reviews of usage records can provide further indications of slow-moving items.

If the client does not maintain perpetual records, the auditor may examine purchase orders or production orders to determine how recently certain items of inventory were acquired. Many companies have formulae or rules of thumb that translated overall judgements on obsolete stocks into practical detailed applications, for example:

- (a) All items over a year's supply;
- (b) All items that have not moved within six months; and
- (c) All items bearing certain identifying numbers with regard to date or class of product.

The auditor should review whether the rules are realistic and comprehensive enough as well as whether they are fully and accurately applied. In addition to reviewing and testing the client's rules, the auditor must evaluate, based on an understanding of the client's business climate, whether inventory can be realised in the normal course of operations. Past experience can be a good guide to the net realisable value of items that must be disposed of at salvage prices.

When certain finished goods are declared obsolete or severe markdowns are required, consideration should be given to related raw materials and work-in-process inventories write down.

### **Verification of Cash Sales**

Cash sales are included under this topic because of the level of cash transactions in Nigerian economy. In the supermarkets, restaurants, filling stations, etc, transactions are made predominantly by cash. Physical and accounting controls on cash pose problems. Segregation of duties between access to merchandise and access to cash receipts is difficult, hence control procedures are put in place to improve accountability. For effective control, customers are encouraged to demand for receipts to cover cash payments.

Steps in verification of cash sales are:

- (a) Obtain records of the entity's daily cash sales;
- (b) Check the records of cash receipts with the totals of the cash register;
- (c) Investigate and obtain necessary explanations for any discrepancy;
- (d) Check the procedures for cash transactions; and
- (e) Conduct cash count.

### **Cash Balances**

It is assumed that the auditor, using appropriate combination of risk assessment activities and substantive tests, would have reduced audit risk to an appropriately low level with regard to cash receipts from customers, cash disbursements to vendors, and other cash transactions. Because cash is so liquid and transferable, the risk of theft is greater than that of any other asset. Accordingly, the auditor focuses on how responsive the client's control structure policies and procedures are to the inherent characteristic risk.

Failure to detect cash defalcations is frequently a source of embarrassment to the auditor. It may be the basis for litigation; particularly if it involves material fraud that a client contends should have been detected by an auditor following a testing plan that gave appropriate consideration to the inherent risk associated with cash and the client's response to that risk. Cash defalcations are concealed by unauthorised charges to income statement accounts, resulting in income statement containing misclassified or fictitious expenses.

The nature, timing and extent of substantive tests of cash are strongly influenced by the auditor's assessment of inherent and control risk. The effectiveness of control procedures also affects the timing of substantive tests.

### **Audit Objectives**

The objectives of auditing cash are to obtain reasonable assurance that:

- (a) Recorded cash on hand and in financial institutions, exists, and is accurate and complete, and the client has legal title to it at the balance sheet date;

- (b) All items properly included as part of cash are realisable in the amounts stated; for example, foreign currency on hand or on deposit in foreign countries is properly valued;
- (c) Cash restricted as to availability or use is properly identified and disclosed; and
- (d) Cash receipts, disbursements, and transfers between bank accounts are recorded in the proper period.

Cut-off objective with respect to cash receipts from customers and disbursements to vendors should be met to prevent end-of-period “window dressing” of working capital accounts. Recording bank transfers in the wrong period could be a tell-tale of a defalcation.

### **Substantive Tests of Cash Balances**

Substantive tests are as follows:

- (a) Testing completeness, accuracy, and existence of year-end balances so as to:
  - (i) Confirm balances and other information with banks and other financial institutions;
  - (ii) Prepare, review bank reconciliations; and
  - (iii) Cash count.
- (b) Testing bank transfer cut-off.
- (c) Review restrictions on cash balances and related disclosures.

### **Confirmation of Bank Balances**

The auditor should ordinarily confirm balances at year-end by direct correspondence with all banks the client has conducted business with during the year, regardless of whether all year-end reconciliation's are reviewed or tested. Usual practice is to confirm all bank accounts open at any time during the year under audit. The auditor should ask the client to request the financial institution to communicate directly with the auditor.

### **Indebtedness and Other Arrangements**

A bank may have arrangements with or provide services to the client other than maintaining deposits or granting loans.

Auditor should confirm:

- (a) Amount(s) on deposit kept as a condition for a loan;
- (b) Items held as agent or trustee, securities or other items in safekeeping or for collection for the account of the client; and
- (c) Other arrangements - such as oral and written guarantees, commitments to buy foreign currencies, repurchase or reverse repurchased agreements, and letters of credit and lines of credit.

### **Bank Reconciliation Procedures**

Periodic reconciliation of cash receipts and disbursements to the amounts shown on bank statements is key control procedure to meet the asset protection

objective for cash. The reconciliation procedure will be more effective if in addition to reconciling the balances, the detailed items listed on the bank statements are reconciled to the detailed items recorded in the accounts during the period covered by the bank statement. Reconciling detailed items listed on the bank statements ensures that all items recorded in the accounts, including offsetting items within receipts or disbursements, are also recorded on the bank statement and vice versa.

Effective segregation of duties requires that the person reconciling bank balance to account balances does not have functions relating to:

- (a) Cash receipts;
- (b) Cash disbursements; and
- (c) Preparing or approving vouchers for payment.

It also requires that the person performing the reconciliation obtains the bank statements directly from the bank and makes specific comparisons, like comparing paid cheques and other debits and credits listed on the bank statement with entries in the accounts, examining cheques for signatures and endorsements, and reconciling bank transfers.

The client's reconciliation of bank accounts and the appropriate division of duties with respect to cash balances and transactions are important control procedures. The auditor's assessment of how effective the client's reconciliations are determined by the nature, timing, and extent of many of the substantive tests of cash. Other factors are:

- (a) Adequacy of the accounting system;
- (b) Competence of employees doing the reconciliations; and
- (c) Segregation of duties.

The more effective the auditor finds the client's reconciliations to be, that is, the lower the assessed level of control risk, the less detailed the auditor's reconciliation procedures have to be.

Those procedures may range from simply reviewing the client's reconciliations at year-end, if control risk has been assessed as low, to performing independent reconciliations covering the entire year using the proof of cash form. Generally, performing proof of cash reconciliations for the entire year is considered necessary only in special situations, such as when a defalcation is believed to have occurred. Between those two extremes falls the auditor's judgemental discretion.

### **Review and Test of Client's Reconciliations**

If the auditor has assessed control risk as low, then merely reviewing the client's reconciliations at year-end may be appropriate. The steps in reviewing a client's bank reconciliation are:

- (a) Obtain copies of the client's bank reconciliations and establish their mathematical accuracy;

- (b) Reconcile the total of the bank balances on the reconciliations to the general ledger balance. This will generally require using a summary of the individual cash account balances in the general ledger account;
- (c) Scan the bank reconciliation for significant unusual reconciling items and adjustments, and obtain evidence to support them by inquiry or examination of appropriate documents.

In addition to the review procedures the auditor may decide to test the client's reconciliations. The tests may be performed at an interim date, if the auditor has assessed that the client's reconciliations are subject to effective supervisory control procedures. If supervision during the intervening period is not considered effective, the auditor would probably perform the tests at year-end. The following procedures in addition to steps (a) and (b) above are typically performed in testing the client's reconciliations:

- (a) Determine that paid cheques, deposits, and debit and credit advices appearing on the cut-off bank statements and issued on or before the balance sheet date appear on the year-end reconciliations;
- (b) Trace to the cash disbursements records outstanding cheques listed on bank reconciliations but not returned with the cut-off statements;
- (c) Trace deposits in transit on the bank reconciliations to the cut-off bank statements and the cash receipts records, and determine whether there are any unusual delays between the date received per the books and the date deposited per the bank statements;
- (d) Trace other reconciling items to supporting documentation and entries in the cash records;
- (e) Investigate old or unusual reconciling items. If cheques remain uncashed after a specified period of time, the reason should be determined and the amounts restored to the cash account; and
- (f) Determine the exact nature of items on the year-end bank statements not accounted for by the reconciliation procedures, such as debits or credits followed by offsetting entries of identical amounts that appear to be, or are represented by the client to be, bank errors and corrections not so coded. If information in the client's records is inadequate, clarification should be requested from the bank. In these circumstances, the auditor should consider performing a "proof of cash" reconciliation (described below) if the client's reconciliation process does not include one. These procedures assume that the testing is performed as of the balance sheet date and that cut-off statements for a reasonable period after the balance sheet date are obtained from the bank.

### **Bank Transfer Schedule**

To ensure there has been a proper cut-off at year-end, the auditor should determine whether significant transfers of funds occurred among the client's

various bank accounts near the balance sheet date. All transfers of funds within the organisation should be considered - whether among branches, divisions, or affiliates - to make sure that cash is not “double counted” in two or more bank accounts and that “kiting” has not occurred.

The auditor should determine:

- (a) That each transaction represented as a transfer is in fact an authorised transfer;
- (b) That debits and credits representing transfers of cash are recorded in the same period; and
- (c) That the funds are actually deposited in the receiving bank in the appropriate period.

**Kiting** is a way of concealing cash shortage caused by a defalcation, such as misappropriating cash receipts that were perpetrated previously. It involves the careful and deliberate use of the “float” (the time necessary for a cheque to clear the bank it was drawn on). Drawing a cheque on one bank, depositing it in another bank just before year-end, so that deposit appears on the bank statement and the recording of the transfer in the receipts is not done until after year-end amounts to kiting. The float period will cause the cheque not to clear the bank it was drawn on until after year-end, and the amount transferred is included in the balances of both bank accounts. Since the transfer is not recorded as a receipt or a disbursement until the following year, it will not appear as an outstanding cheque or a deposit in transit on the reconciliation of either bank account. The effect is to increase receipts per the bank statement; if the misappropriation of cash receipts and the kiting take place in the same period, receipts per the bank statement will agree with receipt per the cash receipts journal at the date of the bank reconciliation. (If the misappropriation of cash receipts takes place in the period before the kiting, a proof of cash may also reveal the kiting). Kiting requires that the transfer process be repeated continually until the misappropriated funds have been restored. Kiting could have a wider meaning to encompass writing cheques against inadequate funds with the intent of depositing sufficient funds later, but before the cheques clear the bank.

Bank transfer schedule is an effective tool that assists the auditor in ensuring that:

- (a) all transfers of funds among bank accounts near the balance sheet date are recorded in the books in the proper accounting period;
- (b) cash has not been double-counted; and
- (c) there is no apparent kiting.

The schedule should indicate, for each transfer:

- (a) The date the cheque affecting the transfer was recorded as a cash disbursement;
- (b) The date it was recorded as a cash receipt, the date it cleared the bank it was drawn on; and

- (c) The date it was deposited and cleared in the bank.

When kiting is suspected, the auditor should:

- (a) Compile bank transfers and the client's cash receipts and disbursement records;
- (b) Obtain dates on the bank transfer schedule from the cash records and the dates on the cheque showing when it was received by the bank it was deposited in and when it was paid by the bank it was drawn on;
- (c) Compare date the cheque was recorded as a disbursement with the date it was recorded as a receipt; the dates should be the same;
- (d) If they are not and the entries are in different fiscal years, an adjusting entry may be necessary to prevent double-counting of cash, depending on the offsetting debit or credit to the entry that was made in the year being audited;
- (e) Compare the bank dates (paid and cleared) with the corresponding dates the transaction was recorded in the books (received and disbursed) for each transfer;
- (f) If those dates are in different accounting periods, the transfer should appear on the bank reconciliation as a reconciling item; and
- (g) Lastly, investigate unusually long time lags between dates recorded and dates for possible holding of cheques at year end - a cut-off problem.

### **Reviewing Cash Restrictions and Related Disclosures**

The auditor should review the evidence previously obtained and, if necessary, perform further procedures to ensure that all appropriate disclosures related to cash have been made. The following may indicate restrictions on the availability or use of cash that should be disclosed:

- (a) Bank confirmations;
- (b) Responses to inquiry letter;
- (c) Loan agreements;
- (d) Minutes of board of directors' meetings; and
- (e) Bond indentures.

Inquiry of client management may also indicate the need for disclosures of cash balances that are restricted or the property of others. If the entity has substantial funds in other countries or in foreign currencies, the auditor should determine whether there are any restrictions on their availability and that appropriate disclosures have been made.

### **Verification of Fixed Assets**

Most businesses use fixed assets, e.g., property, plant, and equipment in the process of generation of income. Expenditure to maintain or improve assets acquired are normal. A major audit consideration is whether such expenditure should be classified as expenses of current period or an addition to the cost of assets.

The general rule is to capitalise expenditure if it will prolong the useful or productive life of the asset into future periods. There should be proper distinction between revenue and capital expenditure. Companies often have policies defining which expenditure are to be capitalised. The auditor must exercise judgement in determining whether the policies are appropriate and being complied with.

### **Audit Objectives**

The audit objectives for fixed assets are that:

- (a) The fixed assets in the accounts exist;
- (b) The fixed assets are owned or leased under capital leases by the entity;
- (c) No material items were charged to expense that should have been capitalised;
- (d) Additions and disposals have been duly authorised and accurately recorded;
- (e) Cost or other basis of initially recording value is appropriate;
- (f) Appropriate methods of depreciation have been applied, on a consistent basis;
- (g) The carrying value of fixed assets is appropriate in periods subsequent to acquisition, considering such factors as utilisation, location and technological changes; and
- (h) Assets pledged as collateral are identified and properly disclosed.

### **Verification Methods**

Obtain a schedule of each asset showing:

- (a) **Opening Balance**  
Review previous year's working papers and the client's records to provide necessary understanding of the accounting principles, policies and methods employed.
- (b) **Additions**
  - (i) Examine purchase order and other supporting documents;
  - (ii) Vouch the cost vide invoices, cost includes all expenditures necessary to make an asset ready for its intended use; and
  - (iii) Vouch the authority for acquisition by review of minutes of board of directors or other committees to confirm whether major additions were appropriately authorised.
- (c) **Disposals**
  - (i) Vouch the authority;
  - (ii) Examine relevant documentation;
  - (iii) Compare acquisition cost with underlying records, re-compute accumulated depreciation and the resulting gain/loss and balancing charge/allowance;
  - (iv) Verify proceeds as reasonable;
  - (v) Pay attention to scrap value; and
  - (vi) Confirm proper accounting treatment.

- (d) **Depreciation and Other Write Downs**
  - (i) Review client's methods and policies;
  - (ii) Examine adequacy and appropriateness of policy;
  - (iii) Vouch authorisation policy;
  - (iv) Vouch revaluations ;
  - (v) Check calculations; and
  - (vi) Consider changes in business condition that may warrant reviews of estimated useful life of the assets.
- (e) The stated procedure must agree the physical assets to the closing Naira value of the assets.
- (f) Internal control procedures as regards additions, disposals, accounting and maintenance of fixed assets are relevant. The auditor should also make use of fixed assets registers.

### **Presentation, Disclosures and Value**

- (a) Accounting policies appropriate to the entity must be adopted. This must be consistently applied and adequately disclosed;
- (b) The entity must adhere to relevant Accounting Standards;
- (c) Materiality in the context of the individual company must be considered;
- (d) Proper classification of assets should be done;
- (e) There should be proper disclosure and accurate description; and
- (f) Clear distinction between capital and revenue is important. It could be a matter of accounting policy - research and development - or matter of opinion - repair expenditure is a charge against revenue, but may include elements of improvement which is capital.

### **Other Matters Considered**

- (a) Letter of representation. Obtain management representation on carrying values and classifications of fixed assets.
- (b) Reasonableness and professional scepticism. Auditors should diligently investigate and seek adequate assurance on the truth and fairness of the financial statements. This he does with professional scepticism. If therefore, he comes across anything that seems wrong, unlikely, unreasonable, or suspicious, he is said to be "put upon enquiry". In that case he should diligently investigate the matter and be assured of the truth of the matter.
- (c) Assets pledged as collateral are identified and disclosed, along other necessary disclosures.
- (d) Appropriate depreciation methods are properly applied, on a basis consistent with the previous year, to all items of assets that should be depreciated.
- (e) Taxation. Tax and capital allowances should be in accordance with the asset accounts and the applicable laws.
- (f) Insurance certificates of assets, e.g., motor vehicles, should be examined to provide further corroborative proof of realising audit objectives.

- (g) Assets leased under capital leases by the client are verified and properly described.
- (h) Assets held by third parties are equally included in the balance sheet and properly described.

## **VERIFICATION OF LIABILITIES**

### **Audit Objectives**

The auditor should approach accrued liabilities with the view, that liabilities are more likely to be understated or omitted from the accounts than overstated. Therefore, audit objectives should focus on ascertaining that accrued liabilities are not understated, but without ignoring the possibility that the opposite may occur.

The auditor's objectives in examining liability transactions and accounts are to obtain reasonable assurance that:

- (a) All obligations for amounts payable, long-term debt, and capitalised leases and all equity accounts have been properly valued, classified, described, and disclosed;
- (b) All off-balance-sheet obligations have been identified and considered (e.g., operating leases, product financing arrangements, build and operate contracts, etc);
- (c) All liability and equity transactions, accounts, and changes therein have been properly authorised and are obligations of the entity or ownership rights in the entity;
- (d) Interest, discounts, premiums, dividends, and other debt-related and equity-related transactions and accounts have been properly valued, classified, described, and disclosed; and
- (e) All terms, requirements, instructions, commitments, and other debt-related and equity-related matters have been identified, complied with and disclosed, as appropriate.

### **Substantive Tests of Balances**

A convenient way to document substantive tests of liabilities at balance sheet date is obtaining or making detailed schedules of liabilities by categories, owing the movement in each account during the period. The auditor should compare the list with the accounts and reconcile the total to the general ledger.

Tests of details of debt and equity transactions and balances consist of obtaining confirmations from third parties, re-performing computations, and examining documents and records. The following are some examples:

### **Authorisation**

- (a) The auditor should trace authorisation to board minutes, or where such authority was delegated, should be traced to the delegated officer's signature.

**(b) Confirmations**

Confirm debt payable and terms with holder; outstanding stock with holder and registrar; and dividend and interest payable. Ensure the recorded liabilities relate to values of goods and services received by the entity.

**Examination of Lease Documents**

Terms in finance lease must be evaluated to determine whether it should be accounted for as an operating or capital lease. If leases are capitalised, the auditor must test computations of the carrying amounts of assets and debt, and compare them with the underlying lease contract.

**Rights and Obligations**

- (a) Ascertain that all accounts payables, accrued expenses and other liabilities are legal obligations of the entity at the balance sheet date;
- (b) Check presentation and disclosure as to amount falling due within or after one year; and
- (c) Consider the description and classification of liabilities in the financial statements. If material loss could arise from unfulfilled purchase commitments, the auditor should identify the commitments and assess the potential need for a provision. In all, the auditor should ensure compliance with all statutory provisions and other accounting requirements.

**Letter of Representation**

Management must explicitly assert the existence, rights and obligations, completeness and appropriate presentation, and disclosure in the financial statements. These assertions are made in a letter of representation.

**Inclusion of all Liabilities**

It is not enough for the auditor to be satisfied that all the liabilities recorded in the books are correct and are incorporated in the financial' statements. Auditors must be satisfied that there are no unrecorded liabilities, transactions or undisclosed items. The auditor should appreciate the possibilities of the existence of undisclosed liabilities. He also has an obligation to take reasonable steps to unearth them.

The auditors discharge these obligations by:

- (a) Diligently enquiring of the directors and other officers and by obtaining letter of representation;
- (b) Examining post balance sheet events, where applicable; and
- (c) Examining minutes of meeting of the board and management where the existence of unrecorded liabilities may be mentioned.

**Provisions**

A clear understanding of the words - provision and reserves - is imperative. The correct usages of these two words are:

Provision - any amount retained as reasonably necessary for the purpose of providing for any liability or loss which is either likely to be incurred, or certain to be incurred but uncertain as to amount or as to the date on which it will arise.

Thus a provision:

- (a) Is a debit to profit and loss account reducing profit and therefore dividends;
- (b) Is in respect of a likely or certain future payment; and
- (c) Arises where the amount or the rate of payment is uncertain.

Reserve - that part of shareholders' funds not accounted for by the nominal value of issued share capital or by the share premium account.

The need for the creation of provisions is an important consideration for directors who are responsible for the financial statements. Post balance sheet events can often give an indication of the amount of provision required. The auditor has a duty to see that any provisions set up are used for the purpose for which they were set up and that any provisions, which are no longer needed, are written back to profit and loss account.

Items should be provided for, only when the company has a firm commitment (not merely an intention) to the expenditure. It should be noted that the only costs to be provided for should be those incremental costs necessary to sort out a past problem. Any costs that will bring benefits in the future should be charged in the future period.

## Share Capital

*When there are new issues*

Share capital is a special sort of liability of a company. When share capital has been issued during the year, auditors should:

- (a) Ensure that the issue is within the limits authorised by Memorandum and Articles of Association of the entity;
- (b) Ensure that the issue was subject to directors' minutes and shareholders' approval, where applicable;
- (c) Ascertain and evaluate the system for the control of issue; and
- (d) Verify that the system has been properly operated. This will involve examining the prospectus (where applicable), application and allotment sheets, the share register, cash received records, share certificate counterfoils, and refunds to unsuccessful applicants.

Where Stock Exchange approval was required, the auditors should:

- (a) Ensure that permission has been obtained. If it has not been given all the money subscribed is returnable;
- (b) Ensure that all the money is maintained in a separate bank account until all conditions were satisfied;
- (c) Ensure that the minimum subscription has been received. If there are not enough subscribers then the whole amount is returnable; and

- (d) Vouch the payment of underwriting and other fees.

*Where there are no new issues*

When no new issue of shares has been made, the auditor should:

- (a) Determine the total of shares of each class as stated in the balance sheet and obtain a list of shareholdings, which in total should agree with the balance sheet total;
- (b) Test the balances in the share register with the list;
- (c) If this is not possible at the balance sheet date, it may be permissible to do it earlier provided that the auditor is satisfied with the system of control over transfers; and
- (d) Where the share register is maintained by an independent firm of registrars, the auditor should obtain a certificate as to the accuracy and completeness of the shares and their holdings. The certificate should state that the balances on the share registers agree with the issued capital at the balance sheet date.

### **Accounting Estimates**

An important aspect of evaluating the application of accounting principles, particularly as they relate to the valuation objective for many accounts, involves evaluating accounting estimates. Accounting estimates are:

- (a) Financial statement approximations that are necessary because the measurement of an account is uncertain until the outcome of future events is known, e.g., uncollectible receivables, obsolete inventory, useful lives of assets, actuarial assumptions in pension plans, and warranty claims; and
- (b) Financial statement approximations that come about in respect of relevant data concerning events which could not be accumulated on a timely, cost-effective basis.

Examples of accounting estimates are:

- (a) Allowances to reduce inventory and accounts receivable to their estimated realisable value;
- (b) Provisions to allocate the cost of fixed assets over their estimated useful lives;
- (c) Accrued revenue;
- (d) Deferred tax;
- (e) Provision for a loss from a lawsuit;
- (f) Losses on construction contracts in progress; and
- (g) Provision to meet warranty claims.

Management is responsible for making the accounting estimates whilst the auditor is to evaluate their reasonableness. Even when management's estimating process involves competent personnel using relevant and reliable data and the most likely assumptions about the factors that affect an accounting estimate, subjectivity can still creep into those estimates which in turn may lead to bias. As a result, the auditor should evaluate accounting estimates

with an attitude of professional scepticism. The auditor's objective in evaluating accounting estimates is to obtain sufficient evidence to provide reasonable assurance that all material accounting estimates have been developed, are reasonable, and are presented and disclosed in conformity with the Nigerian Standards on Auditing.

### **Basic Approaches to Establish Reasonableness of an Estimate**

The auditor should use any or a combination of these basic approaches in assessing the reasonableness of an estimate, viz:

- (a) Review and test the process management used to develop the estimate;
- (b) Independently develop an expectation of the estimate to corroborate the reasonableness of management's estimate; and
- (c) Review events or transactions occurring after the date of the financial statements (but before the audit is completed) that provide an actual amount to compare the estimate with.

In the application of the approach in (a) above, the auditor should:

- (a) Obtain an understanding of the process management established to develop the estimate;
- (b) Assess the inherent and control risks related to management's process for developing the estimate; and
- (c) Identify and evaluate the key factors and assumptions used by management to formulate the estimate.

The following are helpful procedures to identify and evaluate the key factors and assumptions that are unique to auditing accounting estimates:

- (a) Analysing historical data used in developing the assumptions to assess whether it is comparable and consistent with data of the period under audit, and determining whether it is sufficiently reliable;
- (b) Considering whether changes in the business or industry or in other facts or circumstances may cause factors different from those considered in the past to become significant to the accounting estimate;
- (c) Reviewing available documentation of the assumptions used in developing the accounting estimate, and inquiring about any other relevant plans, goal, and objectives of the entity; and considering their relationship to the assumptions;
- (d) Evaluating whether the assumptions are consistent with one another, with the supporting data, and with relevant historical data;
- (e) Concentrate on those key factors and assumptions that are:
  - (i) Material to the estimate;
  - (ii) Sensitive to variations; and
  - (iii) Subject to deviations from historical patterns.
- (f) Considering using the work of a specialist.

When errors or irregularities are found as a result of substantive tests, the auditor should ascertain the reason for them and consider the implications.

## 5.4 VERIFICATION OF INTANGIBLE ASSETS

### Goodwill

#### Introduction

Goodwill is the difference between the value of a business as a whole and the aggregate of the fair values of its separable net assets.

Separable net assets are those assets (and liabilities) which can be identified and sold (or discharged) separately without necessarily disposing of the business as a whole. They include identifiable intangibles.

Other definitions of goodwill include:

- (a) The value attributable to a company's average strength in areas such as technical skill and knowledge;
- (b) The value of the business community's attitudes to the entity; and
- (c) That part of the value of a business which arises from all its advantageous circumstances, which generate earnings above an assumed norm (super profits).

#### Types of Goodwill

Goodwill can be classified into two, viz:

(a) **Non-purchased or Inherent Goodwill**

All businesses have an element of non-purchased goodwill, in that as going concerns they are worth more (positive goodwill) or less (negative goodwill) than the aggregate of the fair values of their separable net assets.

(b) **Purchased Goodwill**

Purchased goodwill is goodwill, which is established as a result of the purchase of a business. Purchased goodwill will not always be a positive amount; at some time in the life of a business, its market value may stand at a discount in relation to the fair value of the separable net assets employed. This gives rise to 'negative goodwill'.

Negative goodwill arises from circumstances that are not advantageous to the entity, such as weak markets or marketing.

#### Factors Contributing to Goodwill

Positive goodwill arises from advantageous circumstances such as an effective management team, weakness of competitors, a prime location or established customers. Other factors which are believed to contribute towards goodwill are good labour relations, a secret or patented manufacturing process, effective advertising, high standing in the society through contributions to and participation in community activities and an excellent reputation for quality and reliability of products.

Purchased goodwill will also depend on the acquirer's reasons for the purchase, such as economy of scale, fiscal advantages from tax losses, diversification of risk or combined market dominance and other factors which affect the price such as general economic conditions and cost of financing.

### **Characteristics of Goodwill**

Goodwill is intangible, intrinsic to the business and incapable of realisation separate from the business; these characteristics of goodwill distinguish it from most other items in the accounts. Its other characteristics are that:

- (a) The value of goodwill has no reliable, predictable relationship to any costs which may have been incurred;
- (b) Individual intangible factors which may contribute to goodwill cannot be valued;
- (c) The value of goodwill may fluctuate widely according to internal and external circumstances over relatively short periods of time; and
- (d) The assessment of the value of goodwill is subjective, in the sense that not only its value but also the assessment of its actual existence is subjective.

Thus, any amount attributed to goodwill is arrived at by estimation to the specific point in time at which it is measured, and is only valid for that point in time, and in the circumstances then prevailing.

### **Audit Objective**

The audit emphasis for intangible assets should be on determining that:

- (a) The carrying value of the assets can be fully recovered;
- (b) That there has not been permanent impairment of their value; and
- (c) That the remaining period of amortisation is appropriate.

The audit objectives of goodwill and related intangible assets accounts are to confirm the assertions by management, explicit or otherwise, embodied in the financial statements as to:

#### *Existence*

That the goodwill reported in the financial statements through measurement or disclosure exists at the date of the balance sheet. It may be desirable to confirm the existence of certain material intangible assets by direct correspondence with third parties.

#### *Rights and obligations*

An asset pertains to the entity at a given date. It must be established that the entity has the rights and obligations associated with the goodwill reported in the financial statements.

#### *Occurrence*

A transaction or event took place that pertains to the entity during the period. For example, the transaction that gave rise to the goodwill occurred within the financial reporting period.

#### *Completeness*

There are no unrecorded assets, liabilities, transactions or events, or undisclosed items relating to the matter. For example, all of the entity's goodwill is reported in the financial statements through measurement or disclosure.

*Valuation*

Goodwill is recorded at an appropriate carrying value. Documentation for an account balance seldom provides conclusive evidence of value. Auditors require extensive judgement to substantiate the values of the intangible asset. For example, that the values of the goodwill reported in the financial statements through measurement or disclosures were determined in accordance with the Nigerian Standard on Auditing.

*Measurement*

A transaction or event is recorded at the proper amount and revenue or expense is allocated to the proper period. For example, the amounts associated with the goodwill reported in the financial statements through measurement or disclosure were determined in accordance with the Nigerian Standards on Auditing, and the revenues or expenses associated with the goodwill reported in the financial statements were allocated to the correct financial reporting period.

*Presentation and Disclosure*

An item is disclosed, classified and described in accordance with the Nigerian Standards on Auditing. For example, the classification, description and disclosure of goodwill in the financial statements are in accordance with the Nigerian Standards on Auditing.

**Substantive Tests**

In performing a substantive test, the auditor should:

- (a) Evaluate the desirability of goodwill and determine the need for amortisation thereof;
- (b) Quantify the amount of the amortisation where a provision is required. Provide details of the calculation of the provision;
- (c) Compare the amount of the provision to the amount established by the entity and quantify the difference. Summarise the amounts identified;
- (d) Obtain a listing of amortisation established at the previous year-end and ensure all significant movements have been reviewed; and
- (e) Discuss findings on the above procedures with management.

Based upon the preceding procedures, the auditor should:

- (a) Determine the appropriateness of the client's amortisation of goodwill;
- (b) Review the client's methods and policies of amortisation;
- (c) Confirm that the accounting policies applied for determining goodwill amortisation are:
  - (i) Consistent with those applied in the previous year;
  - (ii) In accordance with relevant accounting principles; and
  - (iii) Are appropriately disclosed in the entity's financial statements.
- (d) State whether any exceptions were noted in the steps enumerated above, and if so;
  - (i) Confirm that they have been recorded on the working papers and that the nature and level of substantive procedures have been amended as necessary; and

- (ii) Confirm that all exceptions have been carried forward to the summary of unadjusted differences.
- (e) Consider whether the above substantive procedures have provided any evidence that the entity's goodwill amortisation are not fairly stated in its accounts; and
- (f) If there is such evidence, document it and discuss with management.

### **Disclosure Requirements**

- (a) The accounting policy followed in respect of goodwill should be properly explained in the notes to the accounts;
- (b) The amount of goodwill recognised as a result of any acquisitions during the year should be shown separately for each acquisition where material;
- (c) Where the amortisation treatment is selected, purchased goodwill should be shown as a separate item under intangible fixed assets in the balance sheet, until fully written off;
- (d) The movement on the goodwill account during the year, showing-
  - (i) The cost, accumulated amortisation and net book value of goodwill at the beginning and end of the year, and the amount of goodwill amortised through the profit and loss account during the year;
  - (ii) The period selected for amortising the goodwill to each major acquisition; and
  - (iii) The above-stated procedures are of equal application to the audit of other intangible assets like patents, trademarks, copyrights and franchise.

## **5.5 DEBENTURE LOANS AND BORROWINGS**

A debenture is a certificate of agreement of loans which is given under the company's stamp and carries an undertaking that the debenture holder will get a fixed return in terms of interest rates and the principal amount whenever the debenture matures. It is a long-term debt instrument used by governments and large companies to obtain funds. It can also be defined as "a debt secured only by the debtor's earning power, not by a lien on any specific asset." A debenture is usually unsecured in the sense that there are no liens or pledges on specific assets. It is, however, secured by all properties not otherwise pledged. In the case of bankruptcy, debenture holders are considered general creditors. The advantage of debentures to the issuer is that they leave specific assets burden free, and thereby leave them open for subsequent financing. Debentures are generally freely transferable by the debenture holder. Debenture holders have no voting rights and the interest given to them is a charge against profit. In auditing, debentures verification is given the same treatment as long term loans. The following are the verification procedures for debentures:

- (a) Request for a schedule of the amounts due at the beginning of the year, additions during the year, redemptions during the year, and the total sub due at the end of the year;

- (b) Make a record for the audit file the terms and conditions of the debenture loans as evidenced in the debenture deed;
- (c) Agree opening balances with previous years working papers;
- (d) Vouch new debenture loans with prospectus, board minutes, memorandum and articles of association, and register of debenture holders;
- (e) Vouch payments with debenture deeds, ensure that terms are correctly interpreted, check entries into cash book, and trace repayments to register of debenture holders;
- (f) Interest payments should be checked to debenture deeds, cash book and ensure that the amount paid is agreed to the percentage of the amount outstanding;
- (g) Agree total amount outstanding with register of debenture holders; and
- (h) Ensure that disclosure is in accordance with the Companies and Allied Matters Act.

## 5.6 INCOME AND EXPENDITURE

### ***Income***

There is a close relationship between income and revenue. In some cases, income is associated with net income which connotes total revenue less expenses. Revenue is sometimes associated with non-profit organisations while income is associated with cash flow derived from business transactions. The amount of money or its equivalent received during a period of time in exchange for labour or services, from the sale of goods or property, or as profit from financial investments may be regarded as income.

The International Accounting Standards Board (IASB) “Framework for the Preparation and Presentation of Financial Statements” defines income as “increases in economic benefits during the accounting period in the form of inflows or enhancements of assets or decreases of liabilities that result in increases in equity, other than those relating to contributions from equity participants.” The IASB definition of income encompasses both revenue and gains.

The objective of substantive procedure for income is to confirm the assertions made in the financial is correct, complete, and reported in accordance with the International Accounting Standards and the Statement of Accounting Standards.

The following substantive procedures may be adopted in verifying income:

- (a) Obtain schedules of the various classes of income reported in the financial statement; and
- (b) For each of the schedules obtained, carry out the following audit actions:

### ***Sales of Goods***

- (a) Verify that, the entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;

- (b) Verify that, the entity retains neither continuing managerial involvement to the degree usually associated, with ownership nor effective control over the goods sold;
- (c) Verify that the amount has been measured reliably;
- (d) Verify that it is probable that the economic benefits or service potential associated with the transaction will flow to the entity; and
- (e) Verify that the costs incurred or to be incurred in respect of the transaction can be measured reliably.

### ***Interest, Royalties and Dividends***

The following substantive procedures may be used:

- (a) Verify that it is probable that the economic benefits or service potential associated with the transaction does flow to the entity;
- (b) Verify that the amount of the income has been measured reliably;
- (c) Verify that interest has been recognised on a time proportion basis that takes into account the effective yield on the asset;
- (d) Verify that royalties are recognised as they are earned in accordance with the substance of the relevant agreement; and
- (e) Verify that dividends or their equivalents are recognised when the entity's right to receive payment is established.

### ***Disclosure***

The requirement should include the following:

- (a) Confirm consistency and proper disclosure of the accounting policies adopted for the recognition of income including the methods adopted to determine the stage of completion of transactions involving the rendering of services;
- (b) Verify that there is disclosure of the amount of each significant category of income recognised during the period including income arising from:
  - (i) The rendering of services;
  - (ii) The sale of goods;
  - (iii) Interest; and
  - (iv) Royalties.
- (c) Verify that there is disclosure of the amount of income arising from exchanges of goods or services included in each significant category of income.

### ***Expenditure***

Substantive procedures for expenditure aims at ensuring that assertions about expenditure in financial statements are correct, properly recorded and properly disclosed.

The following substantive procedures may be applied in the verification of expenditure:

- (a) Obtain schedules of all expenditure in their various classes;
- (b) Obtain specimen signatures of officials mandated to authorise and approve various classes of expenditure;

- (c) Select a representative sample from each class of expenditure for detail substantive testing;
- (d) Verify that each expense is properly authorised and approved including approval limits for each authorising official;
- (e) Verify that expenditure are properly classified;
- (f) Check calculations and additions for all invoices selected;
- (g) Check that value for the expense is received by inspecting delivery documents or performance reports;
- (h) Check entries in expenditure register and verify that they are correctly analysed;
- (i) Check posting to the general ledger; and
- (j) Trace expenditure total to the final accounts.

## 5.7 REVENUE AND EXPENSES

### ***Revenue***

Revenue is the gross inflow of economic benefits or service potentials during the reporting period when those inflows result in an increase in net assets/equity, other than increases relating to contributions from owners. Revenue includes only the gross inflows of economic benefits or service potential received and receivable by the entity on its own account. Amounts collected as agent of the government or another government organisation or on behalf of other third parties are not economic benefits or service potential which flow to the entity, and do not result in increases in assets or decreases in liabilities. Therefore, they are excluded from revenue. Similarly, in a custodial or agency relationship, the gross inflows of economic benefits or service potential include amounts collected on behalf of the principal and which do not result in increases in net assets/equity for the entity. The amounts collected on behalf of the principal are not revenue. Instead, revenue is the amount of any commission received or receivable for the collection or handling of the gross flows.

The primary issue in accounting for revenue is determining when to recognise revenue. Revenue is recognised when it is probable that future economic benefits or service potential will flow to the entity and these benefits can be measured reliably.

Substantive procedures for the verification of revenue lay more emphasis on recognition, measurement, classification, timing, and disclosures. Specific classes of revenue may be verified using substantive procedures more suitable for it.

### ***Rendering of Services***

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction should be recognised by reference to the stage of completion of the transaction at the reporting date. Substantive procedures may include the following:

- (a) Verify that the amount of revenue is measured reliably;
- (b) Verify that it is probable that the economic benefits or service potential associated with the transaction will flow to the entity;
- (c) Verify that the stage of completion of the transaction at the reporting date is measured reliably; and
- (d) Verify that the costs incurred for the transaction and the costs to complete the transaction is measured reliably.

### ***Sale of Goods***

Substantive procedures may include the following:

- (a) Verify that the entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- (b) Verify that the entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) Verify that the amount of revenue has been measured reliably;
- (d) Verify that it is probable that the economic benefits or service potential associated with the transaction will flow to the entity; and
- (e) Verify that the costs incurred or to be incurred in respect of the transaction can be measured reliably.

### **Interest, Royalties and Dividends**

The following substantive procedures may be used:

- (a) Verify that it is probable that the economic benefits or service potential associated with the transaction does flow to the entity;
- (b) Verify that the amount of the revenue has been measured reliably;
- (c) Verify that interest has been recognised on a time proportion basis that takes into account the effective yield on the asset;
- (d) Verify that royalties are recognised as they are earned in accordance with the substance of the relevant agreement; and
- (e) Verify that dividends or their equivalents are recognised when the entity's right to receive payment is established.

### ***Disclosure***

Substantive procedures should include the following:

- (a) Confirm consistency and disclosure of the accounting policies adopted for the recognition of revenue, including the methods adopted to determine the stage of completion of transactions involving the rendering of services;
- (b) Verify that there is disclosure of the amount of each significant category of revenue recognised during the period including revenue arising from:
  - (i) The rendering of services;
  - (ii) The sale of goods;
  - (iii) Interest; and
  - (iv) Royalties.

- (c) Verify that there is disclosure of the amount of revenue arising from exchanges of goods or services included in each significant category of revenue.

### ***Expenses***

Expenses are the economic costs that a business incurs through its operations to earn revenue. Examples of expense include payments to suppliers, employee wages, factory leases and depreciation. In accounting, 'expense' has a very specific meaning. It is an outflow of cash or other valuable assets from a person or company to another person or company. This outflow of cash is generally one side of a trade for products or services that have equal or better current or future value to the buyer than to the seller. Technically, an expense is an event in which an asset is used up or a liability is incurred. In terms of the accounting equation, expenses reduce owners' equity. Expenses are the decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurring of liabilities that result in decreases in equity, other than those relating to distribution to equity participants.

Substantive procedures for expenses aim at ensuring that assertions about expenses in financial statements are correct, properly recorded and properly disclosed. The following substantive procedures may be applied in the verification of expenses:

- (a) Obtain schedules of all expenses in their various classes;
- (b) Obtain specimen signatures of officials mandated to authorise and approve various classes of expenses;
- (c) Select a representative sample from each class of expenses for detail substantive test;
- (d) Verify that each expense is properly authorised and approved including approval limits for each authorising official;
- (e) Verify that expenses are properly classified;
- (f) Check calculations and additions for all invoices selected;
- (g) Check that value for the expense is received by inspecting delivery documents or performance reports;
- (h) Check entries in expenses register and verify that they are correctly analysed;
- (i) Check posting to the general ledger; and
- (j) Trace expense total to the final accounts.

## **5.8 SALES AND PURCHASES**

### ***Sales***

The audit objective is to ensure that sales invoices are properly authorised, recorded in the books of accounts to avoid understatement or overstatement of sales, and delivery made to customers.

The following substantive procedures may be applied:

- (a) Verify sales with customer orders;
- (b) Check that invoices are properly authorised;
- (c) Check price charged with official price list;
- (d) Check entries in sales day book with invoices and credit notes;
- (e) Verify that the functions of recording sales, maintaining customer accounts, and preparing statements are well segregated;
- (f) Match sales invoices with dispatch notes;
- (g) Check that all sales invoices are recorded;
- (h) Match cash receipts with invoices;
- (i) Verify that sales returns and adjustments are properly recorded and authorised;
- (j) Verify that there are proper cut-off procedures and duly complied with;
- (k) Verify that there are proper safeguards to ensure that debtors statements cannot be altered before despatch;
- (l) Verify that writing-off of bad debts are properly authorised;
- (m) Trace sales invoices to summaries;
- (n) Check summary totals to sales ledger control accounts; and
- (o) Check additions in the sales ledger control accounts.

### **Purchases**

The audit objective is to ensure that all purchases are accounted for, authorised and properly presented. The auditor should adopt the following procedures:

- (a) Randomly select a number of invoices and credit notes for detailed checking;
- (b) Obtain specimen signatures of all officials authorised to approve purchases;
- (c) Compile a schedule of the items selected and also the test to be applied;
- (d) Verify that each invoice is supported by a properly signed requisition;
- (e) Verify that each invoice is supported by an authorised copy order;
- (f) Verify that each invoice is backed by a goods received notes as evidence of delivery;
- (g) Verify that prices are authorised by the appropriate signatories;
- (h) Recompute the entries in the invoice;
- (i) Check calculations, extensions, and additions;
- (j) Check that invoices are correctly coded for ledger accounts classification;
- (k) Verify that appropriate acknowledgments such as initials or signatures appear on each purchase document;
- (l) Verify that each correct invoice has been passed for payment;
- (m) Check that each invoice is entered in the invoice register;
- (n) Check that each invoice has been posted to the purchase ledger account;
- (o) Check for completeness of purchase orders by enquiring into missing numbers;
- (p) Investigate outstanding orders;
- (q) Enquire into unmarked Goods Received notes;
- (r) Enquire into unprocessed invoices;

- (s) Check additions of invoice register; and
- (t) Agree invoice register total with purchases total account.

## 5.9 WAGES AND SALARIES

Substantive tests may be conducted, as follows:

### 5.9.1 Wages

- (a) Check gross pay with approved pay rate;
- (b) Check calculation of gross pay with number of hours worked;
- (c) Check that extra hours such as overtime is properly authorised;
- (d) Check calculation of approved deductions;
- (e) Trace deductions to check-off ledgers;
- (f) Check totals of wage sheets to wages summary;
- (g) Check additions in the summary sheet;
- (h) Check posting of summary sheet total to wages nominal ledger;
- (i) Check net cash payments to cash book;
- (j) Check that there is proper approval for wage payment; and
- (k) Verify that there is adequate procedure for the treatment of unclaimed wages and ensure that this is properly complied with.

### 5.9.2 Salaries

- (a) Verify that the engagement of new employees and discharges have been carried out in line with the organisation's policies;
- (b) Check gross salaries to employee records;
- (c) Verify proper authorisation of overtime;
- (d) Check calculation of employee salaries including re-computation of deductions;
- (e) Confirm receipt of cash paid to employees;
- (f) Confirm payment of salaries through bank transfers to employees;
- (g) Re-compute payroll sheet;
- (h) Trace totals of salary sheets to summaries;
- (i) Check additions of summary sheet;
- (j) Trace summary sheet total to nominal ledger;
- (k) Trace total of net pay to cash book;
- (l) Trace total of deductions to check-off accounts; and
- (m) Verify that there is proper approval for the payment of salaries.

## 5.10 OTHER INCOME AND EXPENDITURE ACCOUNT ITEMS

Other income refers to income derived from activities not in the normal course of business of an entity; sometimes called other revenue. Examples are interest on customers' notes, dividends and interest from investments, profit from the disposal of assets other than inventory, gain on foreign exchange, and miscellaneous rent income.

Substantive procedures to verify other income may include the following:

- (a) Obtain schedule of classes of other income;
- (b) Verify the sources of the income;
- (c) Verify that the income is properly lodged in the bank and classified;
- (d) Verify that the entity has right to the receipt of the income;
- (e) Check posting to the General Ledger; and
- (f) Verify that the income is properly disclosed in the financial statement.

## 5.11 AUDIT DOCUMENTATION

### ***Definition***

Audit documentation means the record of audit procedures performed, relevant audit evidence obtained, and conclusions the auditor reached.

The International Standards on Auditing (ISA 230), Audit Documentation, emphasises the following areas as key points for audit documentation:

### ***Objectives of Audit Documentation***

- (a) The auditor should prepare, on a timely basis, audit documentation that provides:
  - (i) A sufficient and appropriate record of the basis for the auditor's report; and
  - (ii) Evidence that the audit was performed in accordance with ISAs (International Standards on Auditing) and applicable legal and regulatory requirements.
- (b) Preparing sufficient and appropriate audit documentation on a timely basis helps to enhance the quality of the audit and facilitates the effective review and evaluation of the audit evidence obtained and conclusions reached before the auditor's report is finalised. Documentation prepared at the time the work is performed is likely to be more accurate than documentation prepared subsequently;
- (c) Compliance with the requirements of this ISA together with the specific documentation requirements of other relevant ISAs is ordinarily sufficient to achieve the objectives in (b) above.
- (d) In addition to these objectives, audit documentation serves a number of purposes, including:
  - (i) Assisting the audit team to plan and perform the audit;
  - (ii) Assisting members of the audit team responsible for supervision to direct and supervise the audit work, and to discharge their review responsibilities in accordance with ISA 220, "Quality Control for Audits of Historical Financial Information;"
  - (iii) Enabling the audit team to be accountable for its work;
  - (iv) Retaining a record of matters of continuing significance to future audits;
  - (v) Enabling an experienced auditor to conduct quality control reviews and inspections in accordance with ISQC 1 (International Standards on Quality Control), "Quality Control for Firms that

- Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements”; and
- (vi) Enabling an experienced auditor to conduct external inspections in accordance with applicable legal, regulatory or other requirements.

### ***Nature of Audit Documentation***

Audit documentation may be recorded on paper or on electronic or other media. It includes, for example, audit programs, analyses, issues memoranda, summaries of significant matters, letters of confirmation and representation, checklists, and correspondence (including e-mail) concerning significant matters. Abstracts or copies of the entity’s records, for example, significant and specific contracts and agreements, may be included as part of audit documentation if considered appropriate. Audit documentation, however, is not a substitute for the entity’s accounting records. The audit documentation for a specific audit engagement is assembled in an audit file.

The auditor ordinarily excludes from audit documentation superseded drafts of working papers and financial statements, notes that reflect incomplete or preliminary thinking, previous copies of documents corrected for typographical or other errors, and duplicates of documents.

### ***Form, Content and Extent of Audit Documentation***

The auditor should prepare the audit documentation so as to enable an experienced auditor, having no previous connection with the audit, to understand:

- (a) The nature, timing, and extent of the audit procedures performed to comply with ISAs and applicable legal and regulatory requirements; Audit procedures performed include audit planning, as addressed in ISA 300, “Planning an Audit of Financial Statements”;
- (b) The results of the audit procedures and the audit evidence obtained; and
- (c) Significant matters arising during the audit and the conclusions reached thereon.

The form, content and extent of audit documentation depend on factors such as:

- (a) The nature of the audit procedures to be performed;
- (b) The identified risks of material misstatement;
- (c) The extent of judgment required in performing the work and evaluating the results;
- (d) The significance of the audit evidence obtained;
- (e) The nature and extent of exceptions identified;
- (f) The need to document a conclusion or the basis for a conclusion not readily determinable from the documentation of the work performed or audit evidence obtained;
- (g) The audit methodology and tools used; and

- (h) It is, however, neither necessary nor practicable to document every matter the auditor considers during the audit.

Oral explanations by the auditor, on their own, do not represent adequate support for the work the auditor performed or conclusions the auditor reached, but may be used to explain or clarify information contained in the audit documentation.

### ***Documentation of the Identifying Characteristics of Specific Items or Matters Being Tested***

In documenting the nature, timing and extent of audit procedures performed, the auditor should record the identifying characteristics of the specific items or matters being tested. Recording the identifying characteristics serves a number of purposes. For example, it enables the audit team to be accountable for its work and facilitates the investigation of exceptions or inconsistencies.

Identifying characteristics will vary with the nature of the audit procedure and the item or matter being tested. For example:

- (a) For a detailed test of entity-generated purchase orders, the auditor may identify the documents selected for testing by their dates and unique purchase order numbers;
- (b) For a procedure requiring selection or review of all items over a specific amount from a given population, the auditor may record the scope of the procedure and identify the population (for example, all journal entries over a specified amount from the journal register);
- (c) For a procedure requiring systematic sampling from a population of documents, the auditor may identify the documents selected by recording their source, the starting point and the sampling interval (for example a systematic sample of shipping reports selected from the shipping log for the period from April 1 to September 30, starting with report number 12345 and selecting every 125th report);
- (d) For a procedure requiring inquiries of specific entity personnel, the auditor may record the dates of the inquiries and the names and job designations of the entity personnel; and
- (e) For an observation procedure, the auditor may record the process or subject matter being observed, the relevant individuals, their respective responsibilities, and where and when the observation was carried out.

### ***Significant Matters***

Judging the significance of a matter requires an objective analysis of the facts and circumstances. Significant matters include, amongst others:

- (a) Matters that give rise to significant risks (as defined in ISA 315, “Understanding the Entity and its Environment and Assessing the Risks of Material Misstatement”;
- (b) Results of audit procedures indicating;
  - (i) that the financial information could be materially misstated, or a need to revise the auditor’s previous assessment of the risks of material mis-statement and the auditor’s responses to those risks;

- (ii) Circumstances that cause the auditor significant difficulty in applying necessary audit procedures; and
- (iii) Findings that could result in a modification to the auditor's report.

The auditor may consider it helpful, to prepare and retain as part of the audit documentation, a summary (sometimes known as a completion memorandum) that describes the significant matters identified during the audit and how they were addressed, or that includes cross-references to other relevant supporting audit documentation that provides such information. Such a summary may facilitate effective and efficient reviews and inspections of the audit documentation, particularly for large and complex audits. Further, the preparation of such a summary may assist the auditor's consideration of the significant matters.

The auditor should document, discussions of significant matters with management and others on a timely basis.

The audit documentation includes records of the significant matters discussed, and when and with whom the discussions took place. It is not limited to records prepared by the auditor but may include other appropriate records such as agreed minutes of meetings, prepared by the entity's personnel. Others with whom the auditor may discuss significant matters include those charged with governance, other personnel within the entity, and external parties, such as persons providing professional advice to the entity.

If the auditor has identified information that contradicts or is inconsistent with the auditor's final conclusion regarding a significant matter, the auditor should document how the auditor addressed the contradiction or inconsistency in forming the final conclusion. The documentation of how the auditor addressed the contradiction or inconsistency, however, does not imply that the auditor needs to retain documentation that is incorrect or superseded.

### **Documentation of Departures from Basic Principles or Essential Procedures**

The basic principles and essential procedures in ISAs are designed to assist the auditor in meeting the overall objective of the audit. Accordingly, other than, in exceptional circumstances, the auditor complies with each basic principle and essential procedure that is relevant in the circumstances of the audit.

Where, in exceptional circumstances, the auditor judges it necessary to depart from a basic principle or an essential procedure, that is relevant in the circumstances of the audit, the auditor should document how the alternative audit procedures performed achieve the objective of the audit, and, unless otherwise clear, the reasons for the departure. This involves the auditor documenting how the alternative audit procedures performed were sufficient and appropriate to replace that basic principle or essential procedure.

The documentation requirement does not apply to basic principles and essential procedures that are not relevant in the circumstances, i.e., where the circumstances envisaged in the specified basic principle or essential procedure do not apply.

### ***Identification of Preparer and Reviewer***

In documenting the nature, timing and extent of audit procedures performed, the auditor should record:

- (a) Who performed the audit work and the date such work was completed; and
- (b) Who reviewed the audit work performed and the date and extent of such review.

The requirement to document who reviewed the audit work performed does not imply a need for each specific working paper to include evidence of review. The audit documentation, however, evidences who reviewed specified elements of the audit work performed and when.

### ***Assembly of the Final Audit File***

The auditor should complete the assembly of the final audit file on a timely basis, after the date of the auditor's report. ISQC 1 requires firms to establish policies and procedures for the timely completion of the assembly of audit files. As ISQC 1 indicates, 60 days after the date of the auditor's report is ordinarily an appropriate time limit within which to complete the assembly of the final audit file.

The completion of the assembly of the final audit file after the date of the auditor's report is an administrative process that does not involve the performance of new audit procedures or the drawing of new conclusions. Changes may, however, be made to the audit documentation during the final assembly process if they, are administrative in nature. Examples of such changes include:

- (a) Deleting or discarding superseded documentation;
- (b) Sorting, collating and cross-referencing working papers;
- (c) Signing off on completion checklists relating to the file assembly process; and
- (d) Documenting audit evidence that the auditor has obtained, discussed and agreed with the relevant members of the audit team before the date of the auditor's report.

After the assembly of the final audit file has been completed, the auditor should not delete or discard audit documentation before the end of its retention period.

ISQC 1 requires firms to establish policies and procedures for the retention of engagement documentation. As ISQC 1 indicates, the retention period for audit engagements ordinarily is no shorter than five years from the date of the auditor's report, or, if later, the date of the group auditor's report.

When the auditor finds it necessary to modify existing audit documentation or add new audit documentation after the assembly of the final audit file has been completed, the auditor should, regardless of the nature of the modifications or additions, document:

- (a) When and by whom they were made, and (where applicable) reviewed;
- (b) The specific reasons for making them; and
- (c) Their effect, if any, on the auditor's conclusions.

When exceptional circumstances arise after the date of the auditor's report that require the auditor to perform new or additional audit procedures or that lead the auditor to reach new conclusions, the auditor should document:

- (a) The circumstances encountered;
- (b) The new or additional audit procedures performed, audit evidence obtained, and conclusions reached; and
- (c) When and by whom the resulting changes to audit documentation were made, and (where applicable) reviewed.

Such exceptional circumstances include the discovery of facts regarding the audited financial information that existed at the date of the auditor's report that might have affected the auditor's report had the auditor then been aware of them.

## 5.12 SUMMARY AND CONCLUSIONS

Assets, are important components of an organisation's resources; this chapter was therefore devoted to the audit of assets and liabilities. Detailed coverage of various forms of assets (including tangible and intangible assets) and the relevant audit procedures associated with all the classes of assets and liabilities were given adequate coverage. The chapter concludes with audit documentation with respect to assets and liabilities as well as income and expenditure.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

## 5.13 REVISION QUESTIONS

### 5.13.1 MULTIPLE CHOICE QUESTIONS

1. The auditor's purpose for considering a class of transactions relating to inventory as a cycle is
  - A. To ensure all goods purchased before year-end are received before physical inventory count
  - B. To ensure obsolete inventory items are segregated and excluded
  - C. Restricting substantive tests from those that would otherwise be required
  - D. To discover whether a client has counted a particular inventory item or group of items
  - E. To detect write offs.

2. The auditor's count of the client's cash should be co-ordinated to coincide with the
  - A. Assessment of the internal control structure with respect to cash
  - B. Close of business on the balance sheet date
  - C. Count of inventories
  - D. Count of marketable securities
  - E. Budget date.
3. Which of the following is the best evidence of property ownership at the balance sheet date
  - A. Insurance policy on the property.
  - B. Tenement rate paid.
  - C. Original Certificate of Occupancy held in the client's safe.
  - D. Closing statement.
  - E. Development levy paid.
4. The auditor should make some test counts to
  - A. Confirm the accuracy of the client's counts
  - B. Record evidence to corroborate the existence of the inventory for later tracing to the inventory summary sheet
  - C. Random selection of inventory items and which are independently counted and compared with quantities recorded by the clients
  - D. A-C above
  - E. Solely rely on clients counts.
5. Which of the following is not one of the auditing techniques that might be used by an auditor to detect kiting between inter-related company banks?
  - A. Review composition of authenticated deposit slips.
  - B. Review subsequent bank statements received directly from the banks
  - C. Prepare a schedule of bank transfers.
  - D. Prepare year-end bank reconciliations.
  - E. Reliance on client's reconciliations.

#### 5.13.2 SHORT ANSWER QUESTIONS

1. Often an important aspect of the audit of financial statement is the observation of the taking of the physical inventory. Required:
  - (a) What are the general objectives or purposes of the observation of the taking of the physical inventory? (Do not discuss the procedures or techniques involved in the making of the observation).
  - (b) Why would an auditor make and record test counts of inventory quantities during observation of the taking of the physical inventory?
2. State two factors that would influence the timing of the inventory.
3. Explain the term, "goodwill". State two matters which the auditor must consider before observing the inventory at year end.
4. What is kiting?

*Refer to Suggested Solutions in Appendix I on page 301.*

# ***APPLICATION OF INFORMATION TECHNOLOGY IN AUDITING***

## **6.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to:

- ◆ Identify the impact of IT on Audit Functions.
- ◆ Appreciate the role of Auditors in IT security control implementation.
- ◆ Appreciate the opportunities created and challenges posed by IT application.
- ◆ Understand IT General Controls such as the COBIT, COSO and SOX Frameworks.
- ◆ Identify and apply a select number of Computer-Assisted Audit Techniques (CAATs) in the audit function.

## **6.1 INTRODUCTION**

Whilst computers have virtually replaced a lot of the manual tasks hitherto performed by human beings, such as transaction processing, payroll processing, and online teller operations as in the case of ATMs in the financial institutions, traditional auditing still retains its core objectives, of ensuring reliability of internal controls over processes and that of raising assurance of the accuracy and consistency of processing, through the normal testing and vouching processes. The `explosion' in the use of Information Technology devices and models such as, complex networks, the internet, and indeed the convergence of both telecommunication devices and networking infrastructure on a single terminal, has created virtual offices where employees and customers alike, do perform the most sophisticated transaction processing. Examples are banking transactions which use mobile phones, accounts update, ATM and vending machine operations, from the confines of people's homes and/or offices. These models while creating vast business opportunities for companies and institutions have also created a great deal of audit risks and challenges which, if unchecked, can cause devastating impacts on companies and organisations. It is noteworthy, that in the mesh of these internetworking infrastructure powered by cyberspace – the internet – and even the employees, can become potential risk agents.

## 6.2 IMPACT OF INFORMATION TECHNOLOGY ON THE AUDIT FUNCTION

The transition from ‘pen/paper technology’ to electronic environment has created obvious challenges for the auditor. First, there is the invisibility of data and processing, In other words, traditional paper work in which the auditor can see and feel the printed marks evidencing transaction is now disappearing, as transactions are carried out online and in most cases ‘real-time form.’

Secondly, there is also the radical change in the control structure *electronic controls replacing manual controls*; for example, an auditor who opts to vouch the authenticity of a transaction carried out manually will generally look for the authorising signatures on the papers evidencing the transactions. In an electronic processing environment such authority is evidenced by the use of user identification codes and passwords which are all invisible to the naked eye. To this extent, the auditor is faced with the challenge of acquiring the necessary IT skills to see through the ‘wires’ or be “boxed up” in a corner, and may at best fall back to his “Black Box” to the extent he can see through the ‘dark box.’

The third challenge is that of speed of processing which puts auditors on their ‘toes’. Whilst an irregularity occurring in a manual environment has fifty per cent chance of being tracked before it is consummated by the perpetrators, it is not often the case within electronic environment, as the perpetrators may be done with their acts before the auditors discover. This is evident in most online frauds such as super-zapping of customers accounts, Salami Techniques, Piggybacking. A case has recently been reported of an employee of the Institute who upon receiving housing loan in excess of half a million naira which was credited to his bank account, wanted to make withdrawals the next day, only to discover that he had suffered an ATM/Cash Card fraud in excess of 500,000. The bank denied liability, claiming that the victim could have compromised his ATM credentials. This type of fraud could not have been as swift as that in a manual environment.

Fourthly, IT dynamics always challenges the auditors’ competence in the business place. Changes in the IT environment occur very frequently, such that auditors are left continually catching up with the trends. Where their ‘catch-up speed’ is slower than developments their organisations may be at the receiving end.

## 6.3 REASONS FOR CARRYING OUT INFORMATION SYSTEMS AUDITING

The observable trend is that there are innumerable risks associated with mechanising the business environment. These may include but not limited to:

- (a) Data loss or other kinds of disasters;
- (b) Malicious destruction of electronic information;
- (c) Information theft;
- (d) Hacking by malicious agents;
- (e) Espionage activities;

- (f) Computer viruses & worms;
- (g) Unauthorised access to information and data;
- (h) Computer fraud and abuse; and
- (i) Privacy violations.

The above situations, if unchecked, could upset the balance of business controls. Since the risks should be checked, as in all cases (manually or electronically), IS auditing function should be fully in place and piloted by trained IS auditors.

#### 6.4 AUDITORS' ROLE IN INFORMATION TECHNOLOGY CONTROLS IMPLEMENTATION

'IT governance nomenclature,' is the term used to describe how those persons entrusted with governance of an entity will consider IT in their supervision, monitoring, control and direction of the entity. "How IT is applied within the entity will have an immense impact on whether the entity will attain its vision, mission or strategic goals" (Robert S. Roussey, CPA Professor at University of South California). Auditors have a role to play in ensuring that IT controls are well implemented for the overall control objective of the organisation.

Such roles as may be ascribed to auditors include:

- (a) Serving as specialists in the IT Strategy Committee, to offer advice on matters patterning to IT controls;
- (b) Auditors should be members of the IT steering committee as key advisors;
- (c) Auditors should ascertain the management framework for IT governance, e.g. COBIT, COSO;
- (d) Auditors should get involved in the business plan development. The strategic alignment need makes this imperative;
- (e) Auditors should evaluate IT business processes, ensuring that the processes fit with the organisation's culture and structure, and the management of risks effectively;
- (f) Auditors should contribute to the implementation of IT governance by facilitating the training and awareness of risk management controls best practices;
- (g) Auditors should develop an inventory of corporate assets and apply risk assessment and ranking models to identify the technical support policies, procedures as well as policies to help users perform more efficiently and report problems;
- (h) Being conversant with the hardware/software configuration, installation, testing, packaging of management standards, policies and procedures;
- (i) Disaster recovery/backup and recovery procedures, to enable continued processing despite adverse conditions

#### 6.5 INTERNAL CONTROL ENVIRONMENT

In accounting and auditing, **internal control** is defined as a process effected by an organisation's structure, work and authority flows, people and management information systems, designed to assist the organisation to accomplish specific

goals or objectives. The COSO report further states that internal control is a means whereby an entity's board or senior management obtains reasonable assurance of the achievements of the set objectives. COSO maintains that the strength or weakness of an entity's internal control environment rests on what is called "the foundations of the internal control", namely; integrity, ethical values and the competence on the part of the personnel. The availability of the logistics stated above are described as the invisible control environment. Essentially, internal controls are process and people-driven and the people's 'mind-set' could make or mar its effectiveness.

The IT environment is similar to this notion of effective internal control. While this environment recognises people-oriented controls as postulated by COSO, it also ensures that computer applications used in running the business of the entity has adequate controls so as to create the necessary assurance of integrity, reliability and accuracy of processing.

COSO states that 'internal control' has five components, just as in IT environment, listed as follows:

- (a) Control Environment - sets the tone for the organisation, influencing the control consciousness of its people. It is the foundation for all other components of internal control.
- (b) Risk Assessment - the identification and analysis of relevant risks to the achievement of objectives, forming a basis for how the risks should be managed.
- (c) Information and Communication - systems or processes that support the identification, capture, and exchange of information in a form and time frame that enable people to carry out their responsibilities.
- (d) Control Activities - the policies and procedures that help ensure management directives are carried out.
- (e) Monitoring - processes used to assess the quality of internal control performance over time.

## **6.6 INFORMATION TECHNOLOGY GENERAL CONTROLS (ITGC) – COBIT FRAMEWORK**

ITGC represents the foundation of the IT control structure. They assist in ensuring the reliability of data generated by IT systems. They support the assertion that systems operate as intended and that output is reliable. ITGC usually include the following types of controls:

- (a) Control Environment, or those controls designed to shape the corporate culture or "tone at the top" as enunciated by COSO;
- (b) Change management procedures - controls designed to ensure changes to meet business requirements and are authorised;
- (c) Source code/document version control procedures - controls designed to protect the integrity of program code;
- (d) Software development life cycle standards - controls designed to ensure IT projects are effectively managed;

- (e) Security policies, standards and processes - controls designed to secure access based on business need, for now;
- (f) Incident management policies and procedures - controls designed to address operational processing errors;
- (g) Technical support policies and procedures - policies to help users perform more efficiently and report problems;
- (h) Hardware/software configuration, installation, testing, management standards, policies and procedures; and
- (i) Disaster recovery/backup and recovery procedures, to enable continued processing despite adverse conditions.

## **6.7 INFORMATION TECHNOLOGY APPLICATION CONTROLS**

IT application or program controls are fully-automated (i.e., performed automatically by the systems) designed to ensure the complete and accurate processing of data, from input to output. These controls vary based on the business purpose of the specific application. The controls may also help to ensure the privacy and security of data transmitted between applications. Categories of IT application controls include:

- (a) Completeness checks - controls that ensure all records were processed from initiation to completion;
- (b) Validity checks - controls that ensure only valid data are input or processed;
- (c) Identification - controls that ensure all users are uniquely and irrefutably identified;
- (d) Authentication - controls that provide an authentication mechanism in the application system;
- (e) Authorisation - controls that ensure only approved business users have access to the application system;
- (f) Problem management - controls that ensure all application problems are recorded and managed in a timely manner;
- (g) Change management - controls that ensure all changes on production environment are implemented with preserved data integrity; and
- (h) Input controls - controls that ensure data integrity fed from upstream sources into the application system.

## **6.8 INTERNAL CONTROL FRAMEWORKS - COBIT and COSO**

### **Control Objective for Information Technology (COBIT)**

COBIT is a widely-utilised framework containing best practices for both ITGC and application controls. It consists of domains and processes. The basic structure indicates that IT processes satisfy business requirements which is enabled by specific IT control activities. It also recommends best practices and methods of evaluation of an enterprise's IT controls.

### Committee of Sponsoring Organisations (COSO)

COSO identifies five components of internal control: **control environment**, **risk assessment**, **control activities**, **information and communication** and **monitoring**. The components should be in place to achieve financial reporting and disclosure objectives. COBIT provides a similar and detailed guidance for IT, while the interrelated Val IT concentrates on higher-level IT governance and value-for-money issues. The five components of COSO can be visualised as the horizontal layers of a three-dimensional cube, with the COBIT objective domains-applying to each individually and in aggregate. The four COBIT major domains are: plan and organise, acquire and implement, deliver and support, and monitor and evaluate.

## 6.9 INFORMATION TECHNOLOGY CONTROLS AND THE SARBANES-OXLEY ACT (SOx)

The discussion of ITGC would have been incomplete without a mention of Sarbanes-Oxley Act. SOx requires the chief executive and chief financial officers of public companies to attest to the accuracy of financial reports (Section 302) and require public companies to establish adequate internal controls over financial reporting (Section 404). Passage of SOx resulted in an increased focus on IT controls, as these support financial processing and therefore fall into the scope of management's assessment of internal control under Section 404 of SOx.

The COBIT framework may be used to assist with SOx compliance, although COBIT is considerably wider in scope. The 2007 SOx guidance from the PCAOB and SEC state that IT controls should only be part of the SOx 404 assessment to the extent that specific financial risks are addressed, which significantly reduces the scope of IT controls required in the assessment.

This scoping decision is part of the entity's SOx 404 top-down risk assessment. In addition, Statements on Auditing Standards No. 109 (SAS109) discusses the IT risks and control objectives pertinent to a financial audit and is referenced by the SOx guidance.

IT controls that typically fall under the scope of a SOx 404 assessment may include:

- (a) Specific application (transaction processing) control procedures that directly mitigate identified financial reporting risks. There are typically a few such controls within major applications in each financial process, such as accounts payable, payroll, general ledger, etc. The focus is on "key" controls (those that specifically address risks), not on the entire application;
- (b) IT general controls that support the assertions that programs function as intended and that key financial reports are reliable, primarily change control and security controls;

- (c) IT operation controls which ensure that problems with processing are identified and corrected.

Specific activities that may occur to support the assessment of the key controls above include:

- (a) Understanding the organisation's internal control program and its financial reporting processes;
- (b) Identifying the IT systems involved in the initiation, authorisation, processing, summarisation and reporting of financial data;
- (c) Identifying the key controls that address specific financial risks;
- (d) Designing and implementing controls designed to mitigate the identified risks and monitoring them for continued effectiveness;
- (e) Documenting and testing IT controls;
- (f) Ensuring that IT controls are updated and changed, as necessary, to correspond with changes in internal control or financial reporting processes; and
- (g) Monitoring IT controls for effective operation over time.

In order to comply with Sarbanes-Oxley, companies and institutions should appreciate how the financial reporting process works and ascertain the areas where technology plays a critical role. In considering which controls to include in the program, organisations should recognise that IT controls can have a direct or indirect impact on the financial reporting process. For instance, IT application controls that ensure completeness of transactions can be directly related to financial assertions.

In another development, Access Controls which may exist within these applications or within equally important supporting systems such as databases, networks and operating systems, may not directly align to a financial assertion. Similarly, Application Controls are generally aligned with a business process that gives rise to financial reports.

While there are many IT systems operating within an organisation, Sarbanes-Oxley compliance only focuses on those that are associated with a significant account or related business process and mitigate specific material financial risks. This focus on risk enabled management to significantly reduce the scope of IT general control testing in 2007 relative to prior years. Readers wishing to get more details on SOx and its related sections may visit the net or get hold of Public Company Accounting Oversight Board (PCAOB) auditing standards No.5, SEC interpretative guidance and/or American Institute of Certified Public Accountants (AICPA) auditing standard No. 109.

## **6.10 INTRODUCTION TO INFORMATION SYSTEMS AUDIT PROCESS**

IS audit process encompasses the entire practice of Information Systems auditing, including procedures and a thorough methodology which allows an Information Systems auditor to perform an audit on any IT area in a professional manner – ISACA Technical Review Manual.

In practice, the IS audit environment presents three scenarios:

- (a) Data input scenario;
- (b) Data processing stage; and
- (c) Output/Result stage, all of which constitutes the IS audit universe.

Generally, the audit activity that should be covered in the above stages is spelt out in three areas namely:

- (a) Application systems reviews;
- (b) System development reviews; and
- (c) Installation and facilities reviews

#### **6.10.1 Application Review**

This process covers audit of controls over business systems that are supported by computers. For example, applications could include:

- (a) General ledger;
- (b) Payroll;
- (c) Accounts receivable; and
- (d) Banking applications in the case of financial institutions.

Application controls are classified into:

- (a) Input controls;
- (b) Processing controls;
- (c) Output controls;
- (d) Documentation; and
- (e) Programming/Change controls.

#### **6.10.2 System Development Reviews**

This has to do with the audit of application development process. The stages in this process include review of:

- (i) Feasibility study;
- (ii) Application Development process;
- (iii) Application Testing;
- (iv) Implementation;
- (v) Documentation; and
- (vi) Maintenance.

#### **6.10.3 Installations and Facilities Review**

These are audits of operations and support functions of the computer environment. These are also called Computer Information Systems (CIS) operations review. These will cover such things as: Proper controls over installation and facilities to ensure that computer systems are operating efficiently and adequately secured from loss or damage. The following areas should be covered under the review:

- (a) Security of installations/facilities and should include:
  - (i) Physical access to the computer area;
  - (ii) Environmental controls;

- (iii) Data security; and
  - (iv) Disaster recovery issues (the ability to recover and process in the event of an interruption or disaster).
- (b) Organisation of the computer functions to ensure adequate segregation of duties. Segregation of duties ensures that no one can manipulate the processing or data for unauthorised purposes. For example, the programming function should be separate from the operating of the computer.
- (c) Data Control covering:  
Examination of controls governing the receipt of data for processing; these controls should include methods that ensure that all data was received for processing and that only authorised transactions were received.
- (d) Computer equipment; accounting for individual computer equipment, maintenance procedures should maximise the life and usefulness of the equipment.
- (e) Computer equipment controls should include:
  - (i) Periodic preventive maintenance;
  - (ii) Documented maintenance agreements;
  - (iii) Service request procedures;
  - (iv) Documented procedures for use of equipment; and
  - (v) Review of equipment should include perishables and non-perishables.
- (f) Library
  - (i) Library contain files used by applications and systems/ sub-system for data processing activities;
  - (ii) Magnetic tape files may also be controlled by the library; and
  - (iii) Controls should include: library management systems (manual or automated) which provides records of file location, contents, and retention periods, inventory procedures for accounting for files; and cleaning, maintenance and replacement procedures.
- (e) Programs and Systems
  - (i) Establish procedures to ensure that systems and programs in live working environment are authorised and fully documented,
  - (ii) The IS auditor should evaluate the controls over support systems such as *operating systems, database management systems, telecommunications software and utility programs*.

### **6.11 INFORMATION SYSTEMS AUDIT APPROACH**

An audit approach is a series of documented audit procedures designed to achieve planned audit objectives. It comprises of:

- (a) Statement of scope of the audit;
- (b) Defined measurable audit objectives; and
- (c) An audit program

The audit methodology should be setup and should have the approval of the audit management such that consistency is maintained in the audit approach. The audit methodology as documented is a formal document and should made available to audit staff for careful perusal.

The table overleaf shows a standard IS audit methodology as adopted from the Information System Audit and Control Association Examination Technical Manual 2009.

**Table 1: Typical Phases of an Information Systems Audit Activity**

S/No.	Audit Phase	Description of audit activity
1	Audit Subject	Identify the area to be audited.
2	Audit Objective	<ul style="list-style-type: none"> <li>Identify the purpose of the audit. For example, an objective might be to determine that program source code changes occur in a well-defined and controlled environment.</li> </ul>
3	Audit Scope	<ul style="list-style-type: none"> <li>Identify the specific systems, function or unit of the organization to be included in the review. For example, in the previous program changes example, the scope statement might limit the review to a single application system or to a limited period of time.</li> </ul>
4.	Pre-audit Planning	<ul style="list-style-type: none"> <li>Identify technical skills and resources needed.</li> <li>Identify the sources of information for test or review such as functional flowcharts, policies, standards, procedures and prior audit work papers.</li> <li>Identify locations or facilities to be audited.</li> </ul>
5.	Audit procedures and steps for data gathering	<ul style="list-style-type: none"> <li>Identify and select the audit approach to verify and test the controls.</li> <li>Identify a list of individuals to interview.</li> <li>Identify and obtain departmental policies, standards and guidelines for review.</li> <li>Develop audit tools and methodology to test and verify control.</li> </ul>
6.	Procedures for evaluating the test or review results	Organization specific
7.	Procedures for communicating with management	Organization specific
8.	Audit report preparation	<ul style="list-style-type: none"> <li>Identify follow-up review procedures.</li> <li>Identify procedures to evaluate/test operational efficiency and effectiveness.</li> <li>Identify procedures to test controls.</li> <li>Review and evaluate the soundness of documents, policies and procedures.</li> </ul>

(Source: ISACA Technical Manual 2009)

## 6.12 APPLICATION OF COMPUTER ASSISTED AUDIT TECHNIQUES (CAATs)

### Introduction

Business activities are now largely driven by computer. Performing an audit of any Computerised enterprise without a computer is hardly an option. Therefore CAATs refer to the use of certain computer software that can be used by an auditor to perform audits and to achieve audit excellence.

#### 6.12.1 CAAT Vs Traditional Audit approach

Traditionally auditors have come under criticisms because they reach audit conclusions based upon limited samples. It is not uncommon for an auditor to sample 20-40 transactions and declare a problem or conclude that “controls appear to be effective.” Management upon receiving the verdict of the auditors may question the validity of the audit conclusions. Management realises that they conduct thousands or perhaps millions of transactions a year and the auditor only sampled a handful. The auditors will then state that they conducted the sample based upon Generally Accepted Audit Standards (GAAS) and that their sample was statistically valid. The auditors are then forced to defend their audit approach.

Another common criticism of the audit profession occurs after a problem emerges. Whenever a problem occurs within a department, management might ask, “What was the auditor doing?” If the audit department had reviewed the area recently it becomes a sticky situation as the Audit Manager attempts to explain that the reason the problem was not identified was because the problem was outside of the scope of the audit. The audit manager might also try to explain that the sample was “a statistically valid sample with a 95% confidence level.” The Audit Committee cares only that a problem went undetected by the audit function.

#### 6.12.2 CAATs to the Rescue

CAATs addresses the problems highlighted above. CAATs, as it is commonly used, is the practice of analysing large volumes of data which look for anomalies. A well designed CAATs audit will not be a sample, but rather a one hundred per cent review of all transactions. Using CAATs the auditor will extract every transaction which the business unit performed during the period reviewed.

The auditor will then test the data to determine if there are any problems. For example, using CAATs, the auditor can find payroll data such as duplicated employee names or numbers or other data anomalies.

The CAATs auditor could also easily look for duplicate vendors or transactions. When such a duplicate is identified, they can approach management with the knowledge that they tested 100% of the transactions and that they identified 100% of the exceptions.

### 6.12.3 Classification of CAATs

There are probably four classes of CAATs, namely:

- (a) Data analysis;
- (b) Network Security Monitoring Software/Utilities;
- (c) OS and DBMS security Monitoring software/utilities; and
- (d) Software and code testing tools.

### 6.12.4 Specialised Software

In general terms, CAATs can refer to any computer program utilised to improve the audit process. Generally, however, it is used to refer to any data extraction and analysis software. This would include programs such as SAS, Excel, Access, Crystal Reports, Business Objects, etc. There are, however, two main companies that have developed specialised data analytic software specifically for auditors. They are Audit Command Language (ACL) and Interactive Data Extraction and Analysis (IDEA). A third one is InformationActive's ActiveData For Excel. This particular software is normally attached to excel spreadsheet as an add-in program.

### 6.12.5 Features of CAATs

The general feature of CAAT tools includes the ability to perform varied analytical procedures and queries as listed below:

- (a) Data Queries;
- (b) Statistics;
- (c) Stratification;
- (d) Summarisation;
- (e) Missing Numbers detection;
- (f) Duplicate Items detection;
- (g) Aging of Transactions such as inventory and receivables aging;
- (h) Sampling Functions;
- (i) Field Manipulations;
- (j) Payroll Audit as in Ghost Worker Detection; and
- (k) Exporting and Importing data files across and between different software platform such as; Access, Excel, Word, and even publish audit reports as PDF documents directly from the CAAT software.

## 6.13 GUIDELINES FOR ESTABLISHING AN INFORMATION SYSTEMS AUDIT FUNCTION

Organisations wishing to set up an IS audit function may consider the following guide:

### (a) The Information Systems Audit Charter

This is a key element in the development of the IS audit function. The charter should specify among other issues:

- (i) Objectives;
- (ii) Scope; and
- (iii) Reporting level of the IS audit function.

In developing the IS audit charter, consideration should be given to the internal audit charter, where it exists.

(b) **Organisation and Management Issues**

This has to be addressed to offer structure to the IS audit function and the following issues are considered:

- (i) Identifying the staff skill level required and ways to obtain such expertise;
- (ii) Establishing salary guidelines which conform to organisation's policies and provide competitive and fair compensation;
- (iii) Identify the activities required to support the organisation's external auditors;
- (iv) Formulating the audit schedule to plan for IS audit activities; and
- (v) Developing standards and procedures to support the IS audit function.

(c) **Staff Skills Level**

This will generally depend on the complexity of the computer systems and environment. The lowest level of skilled staff should be able to use IS audit tools, techniques and control concepts in computerised systems. They should also possess good interpersonal skills and solid understanding of management concepts. A Certified Information Systems Auditors' (CISA) qualification will surely be imperative and non-negotiable for a very complex IS environment.

- (d) Finally, the organisation must procure the necessary IS audit resources such as computer laptops; a close ration of one-to-one to each IS audit personnel is recommended, and the CAAT software of choice.
- (e) Necessary training and retraining of the IS audit personnel is also a non-negotiable consideration.

## 6.14 SUMMARY AND CONCLUSIONS

In this era of information technology where all kinds of IT models and designs are deployed in the business process, traditional auditing has to change towards the direction of IT auditing. This chapter discussed the importance of IT driven audit function; various Computer Assisted Audit Techniques (CAATs) available and concludes with general guidelines for establishing an Information Systems Audit Department.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

**6.15 REVISION QUESTIONS****6.15.1 MULTIPLE CHOICE QUESTIONS**

1. One of the following is not a risk associated with mechanising the business environment.
  - (A) Data loss
  - (B) Malicious destruction
  - (C) Authorised access to information and data
  - (D) Computer virus
  - (E) Privacy violation
  
2. One of the following is not a component of internal control as defined by the Committee of Sponsoring Organisations of the Treadway Commission (COSO)
  - (A) Control environment
  - (B) Risk assessment
  - (C) Information and communication
  - (D) Monitoring
  - (E) Outsourcing
  
3. ITGC represents the foundation of IT ———.
  - (A) Control structure
  - (B) General control
  - (C) System
  - (D) Governing control
  - (E) Communication
  
4. The controls that ensure that all application problems are recorded and managed in a timely manner is called ———.
  - (A) Authentication
  - (B) Authorisation
  - (C) Change management
  - (D) Problem management
  - (E) Input controls
  
5. How many components of internal control have been identified by the Committee of Sponsoring Organisations of the Treadway Commission (COSO)?
  - A. 4
  - B. 5
  - C. 2
  - D. 4
  - E. 1

**6.15.2 SHORT ANSWER QUESTIONS**

1. What is the name given to the process effected by an organisation's structure, work and management information systems, designed to help it accomplish specific goals and objectives?
  
2. One of the challenges auditors have to face with the impact of IT is the invisibility of data and processing as transactions are now carried out —.

3. Serving as a specialist in the IT strategy committee to offer advice on matters pertaining to IT controls is one of such \_\_\_\_\_ that may be ascribed to an auditor.
4. The IT control structure that helps ensure the reliability of data generated by IT systems and also support the assertion that systems operate as intended and the output is reliable is called \_\_\_\_\_.
5. The types of control that ensures that all records are processed from initiation to completion is called \_\_\_\_\_.

*Refer to Suggested Solutions in Appendix I on page 347*

# ***INTRODUCTION TO PUBLIC SECTOR AUDIT***

## **7.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to understand:

- ◆ Appointment, powers and functions of the Auditor-General for the Federation, States and Local Governments.
- ◆ Auditing for compliance with legislative and related authorities.
- ◆ The role of Public Accounts Committee in the audit process.
- ◆ Internal audit in the public sector.
- ◆ Value-for-Money Audit.
- ◆ Due Process and Public Procurement Act.

## **7.1 INTRODUCTION**

A student making his first attempt at the professional examinations of the Institute of Chartered Accountants of Nigeria needs to be well grounded in the basics of public sector audit. The student needs to master the definitions of basic terms and terminologies used in public sector audit, which is a segment of the public sector financial management.

## **7.2 APPOINTMENT, POWERS AND FUNCTIONS OF THE AUDITORS-GENERAL FOR THE FEDERATION, STATES AND LOCAL GOVERNMENTS**

### **Appointment of Auditor-General**

The Auditor-General for the Federation is appointed by the President on the recommendation of the Federal Civil Service Commission, subject to confirmation by the Senate. He is appointed in accordance with the provision of Sec. 86 of the 1999 Constitution of the Federal Republic of Nigeria. The power to appoint a person to act in the office of the Auditor-General is vested in the President.

At the level of a State, a similar dispensation is put in place under the 1999 Constitution, for the Governor to appoint the Auditor-General on the recommendation of the State Civil Commission, subject, however, to the confirmation of the relevant House of Assembly. The appointment of the Auditor-General for Local Government of a State undergoes the same process outlined above.

### **Acting Capacity**

No person acts in the office of the Auditor-General for a period exceeding six months, except with the sanction of a resolution duly passed by the Senate.

### **Tenure of Office of Auditor-General**

- (a) A person holding the office of the Auditor-General for the Federation can be removed from office by the President acting on an advice supported by two-thirds majority of the Senate, praying that he be so removed for inability to discharge the functions of his office. Auditor-General shall be so removed only on account of:
  - (i) Infirmary of mind, body or any other cause; or
  - (ii) Misconduct.
- (b) The Auditor-General cannot be removed from office before such retiring age as may be prescribed by law, save in accordance with the provisions of aforementioned paragraph.

### **Powers and Functions of Auditor-General**

According to the Financial Regulations No 103 (December 2006), the Officer responsible under the Constitution of the Federation for the audit and report on the public accounts of the Federation, including all persons and bodies established by law entrusted with the collection, receipt, custody, issue, or payment of Federal Public monies or with the receipt, custody, issue, sale, transfer or delivery of any stamps, securities, stores or other property of the Government of the Federation and for the certification of the Annual Accounts of that Government is the Auditor-General for the Federation. The Auditor-General shall examine and ascertain in such manner as he may think fit the accounts relating to public funds and property and shall ascertain whether in his opinion:

- (a) The accounts have been properly kept;
- (b) All public monies have been full accounted for, and the rules and procedures applied are sufficient to secure effective checks on the assessment, collection and proper allocation of revenue;
- (c) Monies have been expended for the purposes for which they were appropriated and the expenditure have been made as authorised; and
- (d) Essential records are maintained and the rules and procedures applied are sufficient to safeguard and control public property and funds.

### **Free Access to Books and Accounts**

By virtue of the responsibilities and functions of the Auditor-General for the Federation, the officer and/or his/her representatives are permitted free access, at all reasonable times, to all files, safes, documents, books and other records relating to the accounts of all Federal Ministries/Extra-Ministerial Departments or units. They are also entitled to require and receive from members of the public services such information, reports and explanations as they may deem necessary for the proper performance of their functions.

The Auditor-General is empowered to conduct periodic checks of all government statutory corporation, commissions, authorities, agencies, including all persons and bodies established by an Act of the National Assembly.

The Auditor-General shall, within ninety days of receipt of the Accountant-General's financial statements, submit his reports to each House of the National Assembly, and each House shall cause the reports to be considered by a committee of the House of the National Assembly responsible for public accounts.

In the exercise of his functions under the Constitution, the Auditor-General is not subjected to the direction or control of any other authority or person.

### **Audit of Public Accounts**

- (a) The Auditor-General for the Federation shall be appointed in accordance with the provisions of section 86 of the Constitution of Federal Republic of Nigeria;
- (b) The public accounts of the Federation and of all offices and courts of the Federation shall be audited and reported on, by the Auditor-General who shall submit his reports to the National Assembly.  
For that purpose, the Auditor-General or any person authorised by him in that behalf shall have access to all the books, records, returns and other documents relating to those accounts; and
- (c) Nothing in sub-section 2 of this section shall be construed as authorising the Auditor-General to audit the accounts of or appoint auditors for government statutory corporations, commissions, authorities, agencies, including all persons and bodies established by an Act of the National Assembly.

Nonetheless the Auditor-General shall:

- (i) Provide such bodies with:
  - ◆ A list of auditors qualified to be appointed by them as external auditors and from which the bodies shall appoint their external auditors;
  - ◆ Guidelines on the level of fees to be paid to external auditors; and
- (ii) Comment on their annual accounts and auditors' reports thereon.
- (d) The Auditor-General shall have power to conduct periodic checks of all government statutory corporations, commission, authorities, agencies, including all persons and bodies established by an Act of the National Assembly.
- (e) The Auditor-General shall, within ninety days of receipt of the Accountant-General's financial statement, submit his reports under this section to each House of the National Assembly and each House shall cause the report to be considered by a committee of the House of the National Assembly responsible for public accounts.

- (f) In the exercise of his functions under this Constitution, the Auditor-General shall not be subject to the direction or control of any other authority or person.

### **7.3 AUDITING FOR COMPLIANCE WITH LEGISLATIVE AND RELATED AUTHORITIES**

The Auditor-General performs the external audit function of the examination of financial statements of the government and its allied activities in a financial year. The Auditor-General performs post-audit functions. The post-audit refers to the audit performed after the close of transactions in a particular period; it is a post-mortem audit. The audit takes place after the end of the financial year.

The appointment, termination and mode of operation of the Auditor-General are governed by the provisions of the Audit Act of 1956, the Nigerian Constitution and Financial Regulations of 1976 as amended.

#### **Functions**

The 'green paper' on the Role of the Comptroller and Auditor-General lists the following as the functions of the Auditor-General:

#### **Financial and Regularity Audit**

A financial audit is to ensure that:

- (a) Systems of accounting and financial control are efficient and operating properly; and
- (b) Financial transactions have been correctly authorised and accounted for.

A Regularity Audit - is that which verifies that expenditure has been incurred on approved services and in accordance with statutory and other regulations and authorities governing them (sometimes called Compliance Audit).

#### **Economy and Efficiency Audit**

This is a measurement of how economic resources are efficiently employed and deployed. It is also to highlight areas of wastes; extravagant or unrewarding expenditure. It looks into failure to maximise receipts, financial arrangements that are detrimental to the treasury and weaknesses leading to them.

#### **Effectiveness Audit**

This is an examination to assess whether programmes or projects undertaken to meet established policy goals or objectives have met their respective aims. It is also called Programme Results Audit. It aims at focused or comprehensive audit in government.

#### **Value-for-money Audit**

This is variously called Performance Audit; or Economy and Efficiency Audit. The essence is to determine whether an entity is acquiring, managing or utilising its resources in the most economical and efficient manner. It traces the causes

of any inefficiencies or uneconomical practices. Value-for-money Audit is defined as an objective professional and systematic assessment of:

- (a) The nature and function of an authority's managerial systems and procedures;
- (b) The economy and efficiency with which its services are processed; and
- (c) The effectiveness of its performance in achieving objectives.

Phases of value-for-money audit are:

- (a) **Proposal Phase:** aims at justifying the study of a particular area, authorise initial resources and determine further considered initial analysis of financial statistics, audit costs and other performance indicators.
- (b) **The Scooping Phase:** aims at gathering sufficient details. It embraces gathering working information, studying related legislations and testing controls act. At this stage there will be comprehensive management systems and objective review.
- (c) **Planning Phase:** aims at planning to fully develop identified potentials. The planning and control processes are properly analysed and methods of reviewing operating results are examined through analysis of control and reporting systems.
- (d) **Implementation Phase:** aims at reporting the audit results to those responsible for receiving or acting on them.
- (e) **Evaluation Phase:** is to evaluate the audit result, methodology and performance of the audit staff. The focus here will be assessment of efficiency and effectiveness review. Value-for-money audit aims to identify ineffectiveness in the system and under-utilisation of resources.

### Composition of office of Auditor-General

The Office of the Auditor-General comprises the following directorates:

- (a) Personnel Management Directorate
- (b) Finance & Supply
- (c) Planning Research and Statistics Directorate
- (d) Project Monitoring and Evaluation Directorate

The various divisions under the set-up are:

- (a) Treasury Accounts, which handles the audit of accounts and financial statements;
- (b) State Accounts, which audits the transactions of Pay Officers operating in various states;
- (c) Public Enterprises, which oversees the audit of parastatals;
- (d) Project Audit which investigates justifications of spending on government projects;
- (e) Pension which conducts pre-audit of gratuities and pensions;
- (f) Losses and Investigations that handles all cases of loss of funds; and
- (j) Annual report and P. A.C., which handle all reports and links with Public Accounts Committee deliberations.

### **Audit Queries and Alarms**

Audit queries are observations or points raised by the audit in a particular transaction seeking further clarifications. Such queries raised by Internal Auditor are pre-audit queries while those raised by the Auditor-General are termed post-audit queries.

Queries serve as an important part of the mechanism of financial control as well as valuable means of detecting and preventing errors, fraud etc.

The guidelines on Civil Service Reforms gave prominence to queries by specifying time limit for replying audit queries and possible sanctions for failure to respond. Matters on which queries may be raised can be classified as:

- (a) Irregularities resulting in losses to the government due to either fraudulent activity of the functionaries or their negligence or incompetence;
- (b) Irregularities not directly or immediately resulting in losses to government but which infringe upon budgetary and proper financial management; and
- (c) Irregularities arising through poor or inefficient management and accounting, which may lead to losses to the government.

## **7.4 ROLE OF PUBLIC ACCOUNTS COMMITTEE (PAC) IN THE AUDIT PROCESS**

### **Power to Conduct Investigation**

In line with the provisions of the Constitution, each House of the National Assembly shall have power by resolution published in its journal or in the Official Gazette of the Government of the Federation to direct or cause to be directed an investigation into:

- (a) Any matter or thing with respect to which it has power to make laws; and
- (b) The conduct of affairs of any person, authority, ministry or government department charged, or intended to be charged, with the duty of or responsibility for:
  - (i) Executing or administering laws enacted by the National Assembly, and
  - (ii) Disbursing or administering moneys appropriated or to be appropriated by the National Assembly.

The powers conferred on the National Assembly under the provisions of this section are exercisable only for the purpose of enabling it to:

- (a) Make laws with respect to any matter within its legislative competence and correct any defects in existing laws; and
- (b) Expose corruption, inefficiency or wastes in the execution and administration of laws within its legislative competence and in the disbursement or administration of funds appropriated by it.

### **Power as to Matters of Evidence**

For the purposes of any investigation under section 88 of this Constitution and subject to the provisions thereof, the Senate or House of Representatives or a committee appointed in accordance with section 62 of this Constitution shall have power to:

- (a) Produce all such evidence, written or oral, direct or circumstantial, as it may think necessary or desirable, and examine all persons as witnesses whose evidence may be material or relevant to the subject matter; and
- (b) Require such evidence to be given on oath.

This committee is invariably known as Public Accounts Committee. The purpose of the provision of the constitution and the establishment of the PAC is to expose corruption, inefficiency or waste in the execution of disbursement or administration of funds appropriated by it.

Public Accounts Committee is empowered to:

- (a) Examine such audited accounts of the Federation and of all offices and courts of the Federation and the Auditor-General report thereon as may be referred to it.
- (b) Examine:
  - (i) The Accounts and reports of ministries and Departments of the Government of the Federation;
  - (ii) The Audited Accounts of statutory corporations, boards and such other government bodies; and
  - (iii) The causes which led to, or might have led to, any excess over approved appropriations.

In the performance of its functions, the PAC is further empowered to:

- (i) Procure all such evidence, oral or written and examine such persons as it may deem necessary or desirable; and
- (ii) Require any person to produce any books, documents or records, as it may deem necessary and desirable.

The composition of PAC is geared towards functioning like a court of enquiry empowered to look into civil and criminal cases as regards allocation and disbursement and use of public funds by public officers who have been entrusted with the responsibility of judiciously using the funds, carrying out government programmes, and recommending appropriate actions against officers found wanting in carrying out their duties.

### **Basis of PAC activities**

The major bases of the PAC activities are the report of the Auditor-General. In these reports, statement of how the accounts of the government departments, agencies and ministries are examined is stated and queries raised and the response to these queries is also stated.

Consequently, all cases that are of prime importance or which the committee feels should be properly examined are then picked out of the report. Other bases of PAC activities are the cases referred to the committee by the House in respect of issues examined by it during deliberation.

### **Problems of PAC**

These include:

- (a) Political instability (either through violent change as in the military regimes or change of political party) leading to continuous changes in the composition of the committee;
- (b) Financial Statements to be examined are often in arrears;
- (c) Members are not knowledgeable in accounting and financial reporting;
- (d) Lack of co-operation and information from the expected facilitators; and
- (e) Resolutions are not always implemented amongst others.

## **7.5 INTERNAL AUDIT IN THE PUBLIC SECTOR**

The Institute of Internal Auditors defined internal auditing as “the independent appraisal activity within an organisation for the review of the accounting, financial and other operations as a basis for protective and constructive service to management.”

### **Objectives and Scope**

The basic objective of internal auditing is to assist the management in the effective discharge of its responsibilities. The internal audit department provides this assistance by furnishing management with analysis, appraisals, recommendations and comments regarding the activities reviewed. Internal auditors can be concerned with any phase of the operations of the department/ministry. This may involve going beyond accounting and financial records to obtain a full understanding of the operation under review. Internal auditing is a managerial control in itself and a duty performed by personnel employed for such specific purpose. Internal audit exists in every Ministry/Department to carry out pre-auditing of all activities of the establishment. Pre-audit is the audit performed with the main objective of checking before payment for a transaction takes place in order to ensure compliance with the rules governing each transaction.

In order to attain the overall objective, internal audit activities should include:

- (a) Reviewing and appraising the soundness, adequacy and application of accounting, financial and other administration controls, and promoting effective controls at reasonable cost;
- (b) Ascertaining the extent of compliance with established policies, plans and procedures;
- (c) Ascertaining the extent to which the assets of the department/ministry are accounted for and safeguarded from losses of all kinds;
- (d) Ascertain the reliability of data developed or produced;

- (e) Preserving the integrity of files on which those transactions and related data are stored; and
- (f) Appraising the quality of performance in carrying out assigned responsibilities.

### **Operation of Internal Audit**

Internal auditor derives his powers from the power as delegated by the Auditor-General. Internal auditor has full access to all the department/ministry's records, properties and personnel that could be relevant to the subject under review. The internal auditor should be free to review and appraise policies, plans, procedures and records. Most of the actions carried out by the internal auditor fall within the following responsibilities executed by him in the establishment:

- (a) **Operation Audit:** which focuses on a particular activity within the establishment e.g. audit of Agricultural and Rural Development in a local government.
- (b) **Functional Audit:** which focuses on a particular function e.g. audit of salary preparation etc.
- (c) **Organisational Audit:** which focuses on all activities with the establishment globally viewed. It includes (i) & (ii) above.
- (d) **Investigation:** Focuses on ad-hoc assignments.
- (e) **Management Audit:** Focuses on advising on policies introduced from time to time by the establishment.

### **Responsibilities of Internal Auditor**

The Internal Auditor is responsible for:

- (a) Reviewing, evaluating and reporting on the adequacy or otherwise of the controls installed and operated and the extent to which they assure propriety, security, completeness and accuracy of operations of the establishment;
- (b) Performing the responsibility imposed by the Civil Service Reforms. The Reforms state that he shall carry out complete and continuous audit of accounts and records of revenue and expenditure, plant stores and assume the duty of Stock Verifier where none exists in an establishment; and
- (c) Confirmation of reliability and accuracy of extracted financial information to management.

### **Matters Influencing Setting up of Internal Audit Unit**

These include:

- (a) The necessity of the internal audit unit in the circumstances of the government, bearing in mind the provisions of Civil Service Reforms/guidelines and relevant extant laws;
- (b) Determining the size and structure of the unit;
- (c) Preparation of Audit Manual;
- (d) Recruitment of appropriate staff for respective office; and
- (e) Training and inducting the staff.

The above-stated procedures are of equal application to the audit of other tiers of government - the State and Local Governments.

## 7.6 SUMMARY AND CONCLUSIONS

This chapter has provided full coverage of the statutory as well as the constitutional provisions regarding the appointment and functions of the Auditor-General for the Federation. Similarly, functions of the Public Accounts Committee which is a unit of the National Assembly, were also detailed. The information provided in this chapter will enable readers have full understanding of the workings of the office of the Auditor-General for the Federation, as well as of the States and equivalent officers in the Local Governments, together with requirement for the audit of Public Accounts/Value-for-money audit.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

## 7.7 REVISION QUESTIONS

### 7.7.1 MULTIPLE CHOICE QUESTIONS

1. Which of the following is not part of the functions of the Auditor-General for the Federation
  - (A) The accounts have been properly kept.
  - (B) All public monies have been fully accounted for, and the rules and procedures applied are sufficient to secure an effective check on the assessment, collection and proper allocation of revenue.
  - (C) Ensuring the voted representatives occupy their seat in the assembly.
  - (D) Monies have been expended for the purposes for which they were appropriated and the expenditures have been made as authorised.
  - (E) Essential records are maintained and the rules and procedures applied are sufficient to safeguard and control public property and funds.
  
2. Offences on which the Auditor-General may raise queries in accordance with the guidelines on Civil Service Reforms can be classified as
  - (A) Irregularities resulting in losses to the government due to either fraudulent activity of the functionaries or their negligence or incompetence
  - (B) Irregularities not directly or immediately resulting in losses to government but which infringe upon budgetary and proper financial management
  - (C) Irregularities arising through poor or inefficient management and accounting, which may lead to losses to the government
  - (D) All the above
  - (E) None of the above.
  
3. In the exercise of his functions under the Constitution, the Auditor-General is:
  - (A) Subjected to the direction or control of National Assembly
  - (B) Subjected to the direction or control of the President
  - (C) Subjected to the direction or control of both the President and National Assembly

- (D) Not subjected to the direction or control of any other authority or person
  - (E) Independent to the judiciary only.
4. Auditor-General is not permitted
- (A) Access to State House
  - (B) Access to Minutes of Council of State
  - (C) Free access to books and accounts of the institution being audited
  - (D) To conduct an inquest
  - (E) All of the above.

#### 7.7.2 SHORT ANSWER QUESTIONS

1. Who appoints the Auditor-General for the Federation?
2. For how long can a person act in the office of the Auditor-General of a state?
3. What are the powers of Public Accounts Committee?
4. Describe what the phases of Value-for-money audit are.
5. What are the functions of an internal auditor in relation to public sector account?

*Refer to Suggested Solution in Appendix I on page 301*

## ***AUDIT REPORTING***

### **8.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to understand:

- ◆ The structure and framework of statutory audit report, appreciate instances of statement statutory and non-statutory, qualified and unqualified.
- ◆ Reviewing subsequent events, going concern status, management representation and the truth and fairness of financial statements.
- ◆ The relationship of Auditors with Audit Committees and Third Parties.

### **8.1 INTRODUCTION**

Students writing the professional examinations of The Institute of Chartered Accountants of Nigeria need to understand the basics of assurance reporting. The final outcome of any audit is the issuance of the report of the auditors. The report may be **qualified** or **unqualified**. The auditors' responsibility is to give an opinion on the financial statements, based on the result of the audit. The phrase "we have audited" implies that the auditor is providing the highest level of assurance that can be given. It is important that the reader of the document in which the financial statements appear know precisely what is covered by the auditors' report and, by inference, what is not.

It is the auditors' responsibility to obtain knowledge about subsequent events up to the effective date of signing the auditors' report on the financial statements. After the financial statements and audit report have been issued, however, an auditor may become aware of new information regarding the client. If the new information refers to a condition that did not exist at the date of the audit report, or if it refers to the final resolutions of contingencies or other matters disclosed in the financial statements or the auditors' report, the auditors may not have further obligation thereon. The new information may, however, relate to facts existing at the date of the audit report that might have affected the financial statements or auditors' report had the auditors been aware of them. For example, the auditors may learn on April 14, 2008, after the financial statements for 2007 were issued, that a large receivable on December 5, 2007 believed at the balance sheet date to be collectible was in fact uncollectible because, the customer had been declared bankrupt on December 5, 2007.

In those circumstances, the auditors are obligated to pursue the matter further. They may issue a disclaimer in the circumstance if the directors do not agree to

an update of the auditors' report. The continuation of an entity as a going concern is assumed in financial reporting in the absence of significant information to the contrary.

The audit committee should normally receive information regarding the scope and results of the audit that may assist the audit committee in overseeing the financial reporting and disclosure process, for which management is responsible. The auditors normally communicate with the management of the entity which they are auditing.

The auditors obtain representation from management in the course of conducting the audit of an entity. Obtaining management representation does not absolve the auditor from any blame, in case of proven negligence.

The concepts of true and fair view, materiality and judgement guide the auditors in the conduct of the audit in that they assist the auditors to know the level and quantum of the transactions and balances to which attention has to be given and matters which should be considered in the rendering of the audit opinion.

## 8.2 AUDIT REPORT: STATUTORY AUDIT

The auditor's report that appears in illustration 8-1 overleaf indicates the wording of the standard report as prescribed by SAS No. 58, *"Report on Audited Financial Statements."*

### Organisation and Wording

The following paragraphs explain the language used in the standard report on audited financial statements of an entity:

- (a) **Title**  
The title should include the phrase "Auditor's Report." This is intended to remind the reader of the credibility an audit adds to the financial statements because of the auditor's independence.
- (b) **Introductory paragraph**  
The opening paragraph of the report identifies the financial statements that are audited and states that management is responsible for them. The auditor's responsibility is to give an opinion on those statements based on the result of the audit. The phrase "we have audited" implies that the auditor is providing the highest level of assurance that can be given. The introductory paragraph also specifies the dates and periods covered by the financial statements that are audited.

It is important that the reader of the document in which the financial statements appear knows precisely what is covered by the auditor's report and, by inference, what is not. Since an annual report or prospectus contains much more than financial statements, the reader should be told specifically what has been audited (the financial statements and the related notes that are, as stated on each page of the financial statements and what, by implication, has not been audited, such as the Chairman's Statements and Report of Directors,

financial ratios, and information about stock prices. An example of a report of the auditors is set out below:

### **ILLUSTRATION 8-1: STANDARD AUDIT REPORT**

#### **REPORT OF THE AUDITORS**

##### **To Members of XYZ Limited**

We have audited the financial statements of XYZ LIMITED as at December 31, 2008, which have been prepared on the basis of the accounting policies on page x.

##### **Respective Responsibilities Of Directors And Auditors**

The company's directors are responsible for the preparation of the financial statements. It is our responsibility to form an independent opinion, based on our audit, on those statements and report our opinion to you.

##### **Basis of Opinion**

We conducted our audit in accordance with the Nigerian Standards on Auditing. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgement made by the directors in the preparation of the financial statements; and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion, we also evaluated the overall adequacy of the presentation of information in the financial statements.

The financial statements are in agreement with the books of accounts which have been properly kept, and we obtained the information and explanation we required.

##### **Opinion**

In our opinion, the financial statements give a true and fair view of the state of affairs of the company as at December 31, 2008 and of the profit and cash flow for the year then ended and have been properly prepared in accordance with the Companies and Allied Matters Act, CAP C20, LFN 2004, and relevant statements of accounting standards issued by the Nigerian Accounting Standards Board.

(c) **Scope Paragraph**

The scope paragraphs describe the auditor's basis for forming the opinion on the financial statements. Informing the reader that the audit was conducted in accordance with the Nigerian Standards on Auditing, which are adaptations of International Standards on Auditing, is tantamount to affirming that the auditor has complied with the standards established by the auditing profession for performing an audit. The auditor's objective in performing an audit is to gather enough evidence to enable him to provide reasonable assurance, not a guarantee, that the financial statements do not contain material mis-statements. A mis-statement is considered material if it is probable that the judgement of a reasonable person relying on the financial statements would have been changed or influenced by the mis-statement.

The scope sketches what an audit entails. It highlights that evidence about the accounting measurements and disclosures in the financial statements were obtained only on a test basis. The report specifically states that assessing the client's accounting principles, the estimates that are part of the financial statements and the overall financial statement presentation are the key elements of an audit. Lastly, the auditor explicitly states that the evidence obtained and evaluated in the course of the audit was sufficient to support the opinion given.

(d) **Opinion Paragraph**

The opinion paragraph of the auditor's report – usually the third, and final, paragraph – states the auditor's conclusions reached from the work performed. The auditor's opinion represents a judgement made after evaluating evidence about the assertions implicit in the financial statements; the phrase “in our opinion” is intended to convey this element of judgement, as opposed to a statement of fact or guarantee.

The conclusion the auditor reaches in most audits, is that the financial statements “give a true and fair view ... in accordance with”. The opinion illustrated here is technically called an **unqualified opinion**, i.e., it is not qualified by any exceptions. A less technical term for an unqualified opinion is a “clean” opinion. Although authoritative audit literature describes other types of opinions (qualified opinions, adverse opinions, and disclaimers of opinion), the usual expectation is that the auditor will be able to render a positive, unqualified opinion. Anything less is usually undesirable, and often unacceptable either to the client or to regulatory bodies. Users of financial statements are best served if the client's financial statements do “give a true and fair view” in conformity with accepted accounting principles. Thus, auditors have a responsibility to both the public and their clients to assist clients in receiving unqualified opinions by seeking to improve their financial reporting practices, whenever practicable.

(e) **Routine Variations In the Standard Report**

Routine variations in the wording of the standard report include the party or parties to whom it is addressed, the identification of the statements reported on, the period(s) covered, and the date of the report. An auditor should not alter the standard report unless there are problems or unusual conditions to be highlighted. Alterations should follow the carefully drawn rules referred to in the other sections of this chapter. This is so because, any departure from the standard words is usually regarded as some sort of warning to the reader.

(f) **Addressing The Report**

The report may be addressed to the client company itself or to its board of directors or shareholders. The auditors have a responsibility to the owners of a business enterprise and therefore the report should be addressed to the members of the company (normally the shareholders), partners or proprietors. An auditor's ultimate responsibility is to the shareholders rather than the company or its management.

Sometimes an auditor is retained to audit the financial statements of a non-client company on behalf of a client. In that case, the report should be addressed to the client and not the company being audited or its directors or shareholders.

(g) **Identification of Financial Statements**

The financial statements should be clearly identified, usually in the introductory paragraph. The exact name of the company should be used and the statements audited should be enumerated. Generally, these are accounting policies, the balance sheet, the statement of income and retained earnings, and the statement of cash flows - generally referred to as the financial statements. If any other statements are covered by the report, they should also be enumerated.

(h) **Periods Covered**

The periods reported on should also be specified. It is a standard norm to report on the financial statements of one year with the comparative figures for the previous year. Companies whose securities are registered with the Securities and Exchange Commission are required to present a five-year financial summary in their annual report and accounts. A continuing auditor should update his or her report on the individual financial statements of the one or more prior periods presented on a comparative basis with those of the current period.

(i) **Dating the Report**

Inevitably, an auditor's report is issued on a date later than the end of the period being reported on because it takes time to close the books, prepare financial statements and complete final auditing procedures.

International Auditing and Assurance Board (IAAB) states that: “the auditor should date the report on the financial statements no earlier than the date on which the auditor has obtained sufficient appropriate audit evidence on which to base the opinion on the financial statements. Sufficient appropriate audit evidence should include evidence that the entity’s complete set of financial statements has been prepared and that those with the recognised authority have asserted that they have taken responsibility for them.”

The date of the auditor’s report informs the reader that the auditor has considered the effect of events and transactions of which he became aware and that occurred up to that date. The auditor’s responsibility for events and transactions after the date of the auditor’s report is addressed in International Standard on Auditing (ISA) 560, “*Subsequent Events*.”

The auditor’s report should be dated after the audit field work is completed. It is dated after all statements and all other information contained in financial statements have been approved by the directors, and the auditors have considered all necessary available evidence. Matters that may require follow-up with the client, particularly if performed off the client’s premises, generally do not affect the date of the auditor’s report.

“The date of an auditors’ report on a reporting entity’s financial statements is the date on which the auditors signed their report expressing an opinion on those statements.” Please see, *Auditors’ Report on Financial Statements*.

### **Dual Dating**

The following may require adjustment or disclosure in the financial statements:

- (a) Subsequent events that occur after the date of the auditor’s report but before the report is issued; and
- (b) Such events that come to the auditor’s attention after the report is dated and issued.

If such an event is disclosed, the auditor can either re-date the report as of the date of that event or use “dual dating.” In practice, unless the time period is very short, dual dating is more common because of the additional work necessary for the extended period if the report is re-dated.

An auditor may be required or requested to re-issue a report after it was first issued. If the auditor is aware of subsequent events that occurred after the date of the original report, these alternatives are possible:

- (a) For events that require adjustment of the previously issued financial statements, the report should be dual dated.
- (b) For events that require disclosure only, the auditor may dual date the report, or the disclosure may be included in an additional (usually the last) note to the financial statements.

## Uncertainties

Management is expected to evaluate and reach a reasoned conclusion on all matters materially affecting financial position and results of operations, and an auditor is expected to review and form an opinion on those conclusions. Sometimes, however, the financial statements are affected by uncertainties concerning future events, such as a lawsuit, the outcome of which cannot be reasonably estimated by neither management nor the auditor. Such uncertainties may give rise to explanatory paragraphs in the auditor's report, or possibly even to disclaimers when the uncertainties are pervasive.

SFAS 5, Accounting for Contingencies classified potential losses due to uncertainties as "probable," "reasonably possible," or "remote."

- (a) If loss is probable, management must provide for it in the financial statements, either by accruing it, if the amount is susceptible to reasonable determination or by disclosing it, if the amount is susceptible to reasonable determination or by disclosing it, if the amount cannot be reasonably estimated. No explanatory language is needed in the auditor's standard report if the auditor agrees that the provision or disclosure is appropriate; if the amount cannot be reasonably estimated, however, the auditor should add an explanatory paragraph to the report because of the uncertainty.
- (b) Likewise, a "remote" uncertainty would not require an explanatory paragraph in the standard report.
- (c) If a material loss is "reasonably possible," however, management is required to disclose the uncertainty in the notes to the financial statements, including an estimate of the amount, and the auditor would normally add an explanatory paragraph to the report.

For instance, if the outcome of a matter having an impact on the financial statements depends on the decisions of others, it may be impossible for management and the auditor to reach a valid conclusion about it because competent evidential matter simply does not exist. The most common events of that kind are lawsuits and tax disputes. The mere existence of an unresolved question does not relieve management or the auditor of the responsibility for forming a judgement about the outcome. The outcome of many tax disputes, for instance, can be reasonably determined by an informed analysis. In some cases, however, the best possible efforts result in a judgement that no valid conclusion can be formed. In that event, the auditor should describe the uncertainty in a separate explanatory paragraph following the opinion paragraph of the report, along with an indication that its outcome cannot presently be determined. The separate paragraph may be shortened to refer to disclosures made in a note to the financial statements.

An example of the wording of a report containing an explanatory paragraph describing an uncertainty affecting the financial statements is given hereunder:

*(Separate paragraph following the opinion paragraph)*

As discussed in Note x to the financial statements, the company has filed an appeal with the Supreme Court as defendant against a judgement awarded against the company. The ultimate outcome of the litigation cannot at present be determined. Accordingly, no provision for any liability that may result upon adjudication has been made in the company's financial statements.

## **THE LIKELIHOOD AND MATERIALITY OF UNCERTAINTIES**

### **Tests of Likelihood of Uncertainties**

The auditor should use professional judgement in considering whether a loss resulting from the resolution of an uncertainty is sufficiently likely and material to require adding an explanatory paragraph in the report.

- (a) If the likelihood of a material loss were only remote, no explanatory paragraph would be necessary.
- (b) If it is probable (likely) that a material loss will occur, but management cannot make a reasonable estimate of the amount or range of the potential loss and thus cannot accrue the loss in the financial statements, the auditor should add an explanatory paragraph.
- (c) If the chance of a material loss is "reasonably possible" (that is, more than remote but less than probable), whether or not an explanatory paragraph should be added depends on the likelihood of the loss occurring (for example, where a client defendant appeals against a judgement awarded to a Superior Court), and on by how much the possible loss exceeds the auditor's materiality threshold.

### **Tests of Materiality of Uncertainties**

SAS 58, *Report on Audited Financial Statements*, offers the following guidance regarding materiality considerations in situations where uncertainties exist: "Materiality judgements involving uncertainties are made in the light of the surrounding circumstances. Some uncertainties relate primarily to financial position, while others more closely relate to results of operations or cash flows. Thus, for purposes of evaluating the materiality of a possible loss, the auditor should consider which, if any, of the financial statements is the more appropriate base in the circumstances.

Some uncertainties are unusual in nature, or infrequent in occurrence and thus more closely related to financial position than to normal, recurring operations (for example, litigation relating to alleged breach of contractual obligations). In such instances, the auditor should consider the possible loss in relation to shareholder's equity and other relevant balance sheet components such as total assets, total liabilities, current assets and current liabilities.

In other instances, the nature of an uncertainty may be more closely related to normal, recurring operations (for example, litigation with a party to a royalty agreement concerning whether a royalty fee should be paid on certain revenue). In such circumstances, the auditor should consider the possible loss in relation to relevant income statement components such as income from continuing operations."

### **Lack of Consistency**

Auditor's report shall identify those circumstances in which generally accepted accounting principles (GAAP) have not been consistently observed in the current period in relation to the preceding period.

The consistency standard requires an auditor to inform readers in the report if GAAP have not been applied consistently from period to period. Consistency within a period and between periods is presumed unless otherwise disclosed.

The objective is to ensure that changes in accounting principles that materially affect the comparability of financial statements between periods are highlighted in the auditor's report as well as in the financial statements.

Changes in accounting principles occur fairly often. Companies from time to time change managements, operating philosophies, or judgements about which accounting principles are most appropriate for the company. Any significant change in accounting principle or method of applying a principle should be referred to in the auditor's report in an explanatory paragraph (following the opinion paragraph). The paragraph should identify the development and refer to the note in the financial statements that discusses the change.

### **Departures From Unqualified Opinions**

SAS 58, *Reports on Audited Financial Statements*, classifies departures from the standard unqualified reports as **qualified opinions**, **adverse opinions**, and **disclaimers of opinion**. These departures are discussed as follows.

#### **Qualified opinions**

There are two basic reasons for qualifying an opinion, viz:

- (a) Limitations on the scope of the audit; and
- (b) Departures from General Accepted Accounting Principles (GAAP), International Standard on Auditing (ISA), Nigeria Standard on Auditing (NSA).

#### **Scope of Limitations**

An audit can be limited in scope:

- (a) By circumstances beyond the client's control that preclude the auditor from employing the auditing procedures that would otherwise be considered necessary; and
- (b) By client-imposed restrictions.

#### **Circumstances Precluding Necessary Auditing Procedures**

Sometimes an auditor is not able to carry out procedures that customarily are considered necessary in the circumstances as a basis for rendering unqualified opinion. In most instances, the auditor is able to design and perform alternative procedures that provide sufficient assurance that the relevant audit objectives and procedures have been achieved. Those common instances in which the auditor might not be able to perform alternative procedures are when conditions make it very difficult to confirm accounts receivable or observe inventories.

If an auditor cannot obtain satisfaction by means of alternative auditing procedures, he should:

- (a) Describe the problem;
- (b) Modify the standard report; and
- (c) Describe the problem in a separate paragraph and refer to it in both the scope paragraph and the opinion paragraph if the auditor decides to express a qualified opinion (rather than disclaim an opinion).

### **Client-imposed Restrictions**

The most common client-imposed restrictions are limitations preventing observation of physical inventories, confirmation of accounts receivable, or examination of a significant subsidiary. Usually, if scope is limited by client-imposed restrictions, auditors should disclaim an opinion because the client's election to limit the auditor's scope implies also an election to limit the auditor's responsibility. Very rarely, if a client-imposed scope limitation applies to an isolated transaction or a single account, a qualified opinion may be acceptable.

### **Departures from GAAP**

Financial statements should be presented in conformity with Generally Accepted Accounting Principles; any departures from GAAP are infringements. Such departures are rare in practice because most companies believe that an auditor's opinion qualified because of a departure from GAAP carried intolerable implications, and so they use accounting principles that are generally accepted. Such qualified opinions are rarely acceptable in SEC filings. Nevertheless, instance of departures sometimes occur; the most common ones are described and examples presented in the following paragraphs:

#### **Departure Related to Accounting Changes**

SAS 58, *Reports on Audited Financial Statements*, requires the auditor to evaluate a change in accounting principle in order to be satisfied that:

- (a) The newly adopted accounting principle is GAAP;
- (b) The method of accounting for the effect of the change is in conformity with GAAP; and
- (c) Management's justification for the change is reasonable.

In other words, the presumption that an entity should not change an accounting principle may be overcome only if the entity justifies the use of an alternative acceptable principle on the basis that it is preferable.

Auditors shall express a qualified opinion or, if the effect is material, express an adverse opinion on the financial statements if:

- (a) There are no reasonable justification for the change;
- (b) The change does not meet other conditions previously mentioned, the auditor should express a qualified opinion; and
- (c) The effect of the change is sufficiently material.

Accounting changes that result in qualified or adverse opinions should also trigger similar opinions in future years as long as the change continues to have a material effect on either, the subsequent year's financial statements, or those of the year of the change when presented for comparative purposes.

### **Adverse Opinions**

An adverse opinion expresses a belief that financial statements are not presented fairly in conformity with generally accepted accounting principles or otherwise do not present fairly, what they purport to present. It is required when an auditor believes that one or more departures from GAAP are sufficiently material to make the statements as a whole misleading. It should be noted that an auditor can not sidestep an adverse opinion by disclaiming an opinion.

When an adverse opinion is issued, the opinion paragraph should include a reference to a separate paragraph in the auditor's report that discloses all the reasons for the adverse opinion, including any reservations, the auditor may have regarding fair presentation in conformity with GAAP, other than those that gave rise to the adverse opinion.

Adverse opinions are rare. It is much better for all concerned to correct the conditions before such an opinion is issued, and when it is within the client's power to correct them. Adverse opinions are sometimes issued on financial statements of a regulated company that are prepared in accordance with a basis of accounting prescribed by a governmental agency, and are presented other than in filings with the agency. In that situation, the auditor generally should issue either a qualified or an adverse opinion. Depending on the materiality of the departures from GAAP, an additional paragraph of the report, shall express an opinion on whether the financial statements are presented in conformity with the prescribed basis of accounting.

### **Disclaimers of Opinion**

Auditors give disclaimers of opinion when they do not have enough evidence upon which to form an opinion. A disclaimer can result from an inability to obtain sufficient competent evidential matter, because the scope of the audit was seriously limited. In addition, while SAS 58, *Reports on Audited Financial Statements*, indicates that the addition of an explanatory paragraph to the auditor's report serves adequately to inform financial statement users when there are uncertainties, an auditor may decline to express an opinion in some cases involving uncertainties.

SAS 58, *Reports on Audited Financial Statements*, requires that the reasons for a disclaimer must be given in a separate paragraph of the report. The auditor is also required to disclose in a separate paragraph any reservations about fair presentation in conformity with GAAP. It would be misleading for an auditor to issue a disclaimer if a basis for an adverse or a qualified opinion existed. Adverse opinions and disclaimers of opinion are never interchangeable, nor can an auditor's report contain both an adverse opinion and a disclaimer of

opinion. A report may, however, contain an opinion that is qualified for more than one reason. For example, an opinion may be qualified because of a scope of limitation and because of a departure from GAAP.

### **Comparison Between Adverse Opinion and Disclaimer of Opinion**

There is a fundamental difference between departures from GAAP which affect the quality of the financial statements, and scope of limitations, which affect the sufficiency and competence of audit evidence.

- (a) Departures from GAAP call for a qualified opinion because of the auditor's reservations about the quality of the financial statements;
- (b) Where departures from GAAP become glaring as to make the financial statements useless, it is an adverse opinion;
- (c) A scope limitation, that affects the degree of assurance contained in the opinion and arising from:
  - (i) client-imposed limitations; and
  - (ii) the result of circumstances; will result in an expression of disclaimer of opinion.

The following tabulation helps to keep in perspective the distinctions among qualified opinion, adverse opinion and disclaimers of opinion.

Condition	Degree of Materiality or Pervasiveness	Types of opinion
Departures from GAAP	Low	Qualified opinion
Departures from GAAP	High	Adverse opinion
Scope limitations: Client-imposed	High	Disclaimer of opinion
Due to circumstance	Low	Qualified opinion

## **8.3 REVIEWING SUBSEQUENT EVENTS**

### **Types of Subsequent Events**

Subsequent events are situations or transactions that occur subsequent to the balance sheet date, but prior to the issuance of the financial statements and auditor's report, that have material effect on the financial statements and therefore require adjustment or disclosure in the statements. Subsequent events that occur after the balance sheet date, but before the issuance of the financial statements and the auditor's report are usually of two categories, viz:

- (a) Those that require the adjustments of account balances; and
- (b) Those that should not be recorded but should be disclosed in the financial statements.

The first type of subsequent event is described as the developments that provide additional evidence with respect to conditions that existed at the balance sheet date, and affect the estimates inherent in the process of preparing financial statements. All information that becomes available prior to the issuance of the financial statements should be used by management in its evaluation of the

conditions on which the estimates were based. The financial statements are adjusted for any changes in estimates resulting from the use of such evidence.

The second type of subsequent event is one that provides evidence about conditions that did not exist at the balance sheet date but arose afterwards. These events should be reflected in the financial statements of the year in which they occurred, and should not result in adjustment of the statements of the year being reported on. Some of these events, however, may be significant enough to require disclosure; otherwise the prior-year financial statements would be misleading. They include all transactions and other events and circumstances having significant financial impact. Some examples are business acquisition and casualty losses.

The distinction is often a fine one to make. Deteriorating market conditions subsequent to year-end could be a new condition that merely requires disclosure, or it could be evidence of a condition that was inherent in the inventory at year-end, which calls for adjusting it to net realisable value. Similarly, a subsequent event that reveals that estimated expenses are insufficient because of conditions occurring after the balance sheet date should be disclosed. On the other hand, if the reason for the insufficiency is newly discovered evidence of conditions, that existed at the balance sheet date, that evidence should be reflected in the expense and related asset or liability accounts on the face of the statements.

There is a third type of subsequent event - one occurring after year-end that requires neither adjustment nor disclosure in the financial statements. Events that do not affect the interpretation of financial statements should not be disclosed because describing them in notes could cause misleading or confusing inferences. Since every event may have a financial impact, it is often very difficult to distinguish between events that should and those that should not be disclosed in the financial statements. Strikes, changes in customers or management, and new contracts and agreements are examples of events that ordinarily should not be disclosed in the financial statements, although management may have a responsibility to make public disclosure apart from the financial statements. If the events occur before the annual report to shareholders is printed, the Chairman's letter is often used as a convenient method of communication.

International Standard on Auditing, ISA 560, "*Subsequent Events*" states that "the auditor should perform audit procedures designed to obtain sufficient appropriate audit evidence, that all events up to the date of the auditor's report that may require adjustment of, or disclosure in, the financial statements have been identified. These procedures are in addition to procedures which may be applied to specific transactions occurring after period end to obtain audit evidence as to account balances as at period end, for example, the testing of inventory cut-off and payments to creditors.

The auditor is not, however, expected to conduct a continuing review of all matters to which previously applied audit procedures have provided satisfactory conclusions.

The audit procedures to identify events that may require adjustment of, or disclosure in, the financial statements would be performed as near as practicable to the date of the auditor's report. Such audit procedures take into account the auditor's risk assessment and ordinarily include the following:

- (a) Reviewing the procedures that management has established to ensure that subsequent events are identified;
- (b) Reading minutes of the meetings of shareholders, those charged with governance, including established committees such as relevant executive committees and the audit committee, held after period end and inquiring about matters discussed at meetings for which minutes are not yet available;
- (c) Reading the entity's latest available interim financial statements and, as considered necessary and appropriate, budgets, cash flow forecasts and other related management reports;
- (d) Inquiring, or extending previous oral or written inquiries, of the entity's legal counsel concerning litigation and claims;
- (e) Inquiring of management as to whether any subsequent events have occurred which might affect the financial statements. Examples of inquiries of management on specific matters are: the current status of items that were accounted for on the basis of preliminary or inconclusive data;
- (f) Whether new commitments, borrowings or guarantees have been entered into;
- (g) Whether sales or acquisition of assets have occurred or are planned;
- (h) Whether the issue of new shares or debentures or an agreement to merge or liquidate has been made or is planned;
- (i) Whether any assets have been appropriated by Government or destroyed, for example, by fire or flood;
- (j) Whether there have been any developments regarding risk areas and contingencies;
- (k) Whether any unusual accounting adjustments have been made or are contemplated;
- (l) Whether any events have occurred or are likely to occur which will bring into question the appropriateness of accounting policies used in the financial statements as would be the case, for example, if such events call into question the validity of the going concern assumption; and
- (m) "When a component, such as a division, branch or subsidiary, is audited by another auditor, the auditor would consider the other auditor's procedures regarding events after period end and the need to inform the other auditor of the planned date of the auditor's report."

### **Auditor's Responsibility for Subsequent Events**

The auditor's responsibility for subsequent events depends on whether they occurred before or after the date of his report. Auditors have no responsibility to seek any additional evidence in the period between the date of the auditor's report and the date the financial statements and auditor's report are issued. Nevertheless, many auditors believe that while they have no responsibility to seek additional evidence during that period, they do have a responsibility not to ignore information that comes to their attention.

### **Auditing Procedures in the Subsequent Period**

The auditor has responsibility to determine whether relevant subsequent events have occurred and discuss auditing procedures required to be performed in the subsequent period. That work generally falls into two major categories:

- (a) Procedures performed for the purpose of keeping abreast of events occurring in the subsequent period; and
- (b) Completion of auditing procedures performed for other purposes.

The latter category consists of substantive tests and other auditing procedures that involve reviewing transactions occurring in the subsequent period as part of the audit of year-end account balances. These procedures include tests of the client's cash `cut-offs', sales and purchase `cut-offs', and reviews of collections and payments after year-end. The auditor, however, has no responsibility to carry out any auditing procedures for the period after the report date.

The procedures for keeping abreast of events occurring in the subsequent period may be summarised as follows:

- (a) Read all available information relating to the client's financial affairs: interim financial statements; minutes of meetings of stockholders, directors, and any appropriate committees; pertinent variance and other management reports, and the like. An auditor who understands the client knows which areas are sensitive or volatile and what information about them is likely to be available;
- (b) Make inquiries about such things as financing activities, unusual entries or adjustments in the accounts, and potential problems discovered during the audit. An auditor who has developed a close working relationship with the client can make those inquiries easily and expeditiously;
- (c) Inquire of client's legal counsel concerning litigation, claims, and assessments; and
- (d) Obtain a letter of representation from client officers describing subsequent events or disclaiming knowledge of any.

In addition, as part of the subsequent-period review, the auditor may compare the latest available interim financial statements with the financial statements being reported on, as well as making other comparisons considered appropriate in the circumstances.

It is sometimes necessary in the subsequent period to perform analytical procedures or other substantive tests in a recognised problem area. The purpose is to form an opinion on whether a client has measured the impact of a subsequent event reasonably. Sometimes, however, tests are required to satisfy the auditor that a possible subsequent event did not occur; an example is tests of the net realisable value of inventories due to changed market conditions subsequent to year-end.

### **Responsibilities after Report Date**

Clearly, the auditor is not obligated to keep watch indefinitely; the responsibility ends with the issuance of the financial statements. There is a significant distinction between the discovery of subsequent events before the financial statements are issued and later discovery of facts that existed at the date of auditor's report. The distinction is as follows:

- (a) If the new information refers to:
  - (i) A condition that did not exist at the date of the audit report; or
  - (ii) Final resolutions of contingencies or other matters disclosed in the financial statements or the auditor's report; and
  - (iii) The auditor having no further obligation.
- (b) If the new information:
  - (i) Relates to facts existing at the date of the audit report;
  - (ii) Would have affected the financial statements; or
  - (iii) Would have affected the auditor's report had the auditor been aware of them.

The auditor is obligated to pursue the matter. The obligation exists in those circumstances even if the auditor has resigned or has been discharged.

While the distinction between the two kinds of new information is conceptually clear, in practice it is often difficult to tell, at least initially, whether the new information refers to a new or a pre-existing condition. The auditor should ordinarily discuss the information with the client and request that the client make any necessary investigations. These could be situations in which the auditor would find it desirable to seek the advice of legal counsel.

### **Auditing Procedure in the Subsequent Period**

The auditor is guided on steps to be taken on subsequent events as follows:

- (a) If the information is found to be reliable and to have existed at the date of the auditor's report, the client should be advised to disclose the *facts* and their *effects* on the financial statements;
- (b) Revised financial statements and auditor's report should be issued;
- (c) The reason for the revisions should be described in a note to the financial statements and referred to in the auditor's report; and
- (d) The auditor may include an explanatory paragraph to emphasise the revision.

Where the client's management refuses to make the appropriate disclosures:

- (a) When management does not amend the financial statements in circumstances where the auditor believes they need to be amended and the auditor's report has not been released to the entity, the auditor should express a qualified opinion or an adverse opinion;
- (b) When the auditor's report has been released to the entity, the auditor would notify those persons ultimately responsible for the overall direction of the entity, not to issue the financial statements and the auditor's report thereon to third parties. If the financial statements are subsequently released, the auditor needs to take action to prevent reliance on the auditor's report. The action taken will depend on the auditor's legal rights and obligations;
- (c) The auditor should obtain the advice of legal counsel;
- (d) The auditor should notify each member of the client's board of directors of that refusal;
- (e) The auditor should notify each member of the client's director of the steps the auditor wish to take to prevent future reliance on the auditor's report;
- (f) Unless the auditor's counsel recommends otherwise, the auditor should notify the client that the auditor's report is no longer to be associated with the financial statements;
- (g) Where applicable, the auditor should notify the SEC, stock exchanges, and any other regulatory bodies involved, of the situation and the withdrawal of the report;
- (h) The auditor should request that steps be taken to accomplish the necessary public disclosure/notification; and
- (i) The auditor should also notify any others who are known to be currently relying or who are likely to rely on the financial statements and the related auditor's report.

The disclosures made by the auditor to regulatory agencies and other parties should, if possible, describe the information and its effect on the financial statements and the auditor's report. The description should be precise and factual and should avoid references to conduct, motives, and the like.

### 8.3.1 Going Concern Status

When forming an opinion as to whether financial statements give a true and fair view, IAS 1, *Presentation of Financial Statements*, stipulates that the auditors are required to consider the entity's ability to continue as a going concern, and any relevant disclosures in the financial statements.

One specific type of uncertainty the auditor must consider is the client's continued existence as a "going concern." The concept that financial statements are prepared on the basis of a going concern is one of the basic tenets of financial accounting. Because the going concern

assumption is so basic, the standard auditor's report does not make reference to it.

SAS 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, responds to the fact that an auditor may detect risk during an audit that can lead to the need to question an entity's ability to continue as a going concern (i.e., have the ability to continue operation and meet obligations). "The auditor has a responsibility to evaluate whether there is substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time, not to exceed one year beyond the date of the financial statements being audited (hereinafter referred to as a reasonable period of time).

The auditor's evaluation is based on his knowledge of relevant conditions and events that exist at or have occurred prior to the completion of fieldwork. Information about such conditions or events is obtained from the application of auditing procedures planned and performed to achieve audit objectives that are related to management's assertions embodied in the financial statements being audited."

An entity's going concern is in doubt when it can continue in operation and meet its obligations only on condition that:

- (a) It sells substantial amounts of its assets outside the ordinary course of business; and
- (b) its creditors are willing to forgive or restructure its debt.

Doubts about the entity's continued existence should also raise questions about:

- (a) Realisable value of assets;
- (b) The order of payment of liabilities;
- (c) The proper classification and carrying amounts of both; and
- (d) The appropriateness of necessary financial statement disclosures.

### **What Auditor Needs To Do**

If the auditor concludes there is substantial doubt about the entity to continue as a going concern for a reasonable period of time (not to exceed one year from the date of the financial statements), the auditor should:

- (a) Determine that this fact is appropriately disclosed in the financial statements; and
- (b) Reflect that conclusion in explanatory paragraph.

In a properly planned audit, it should not be necessary to design auditing procedures specifically directed at the going concern issue. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose. For example, conditions and events that could raise doubts may be identified through some of the following procedures:

- (a) Analytical procedures;
- (b) Review of subsequent events;
- (c) Review of compliance with the terms of debt and loan agreements;
- (d) Reading of minutes of meetings of stockholders, board of directors, and important committees of the board;
- (e) Inquiry of the entity's lawyers about litigation, claims and assessments; and
- (f) Confirmation with related and third parties of the details of arrangements to provide or maintain financial support.

In considering the evidence provided by those procedures, it may be necessary for the auditor to obtain additional information about conditions and events identified that could create substantial doubt about the entity's ability to continue as a going concern. SAS 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, gives the following examples of such conditions and events, some of which are interrelated:

*Negative trends:* These are situations where the following trends are the order of the day:

- (a) Recurring operating losses;
- (b) Working capital deficiencies;
- (c) Negative cash flows from operating activities;
- (d) Adverse key financial ratios.

*Other indications of possible financial difficulties*

These consist of:

- (a) Default on loan or similar agreements;
- (b) Dividends in arrears;
- (c) Denial of usual trade credit from suppliers;
- (d) Restructuring of debt;
- (e) Non-compliance with statutory capital requirements;
- (f) Need to seek new sources or methods of financing or to dispose of substantial assets (outside the course of business).

*Internal matters*

Internal matters may be discussed, as follows:

- (a) Work stoppages or other labour difficulties;
- (b) Substantial dependence on the success of a particular project;
- (c) Uneconomic long-term commitments;
- (d) Need to overhaul operations.

*External matters that have occurred* – Examples are:

- (a) Legal proceedings, legislation, or similar matters that might jeopardise an entity's ability to operate;
- (b) Loss of a key franchise, licence, or patent; loss of a principal customer or supplier;

- (c) Uninsured or underinsured catastrophe such as fire, flood, drought, earthquake;
- (d) If substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time, auditors should:
  - (i) Obtain information about management's mitigation plans; and
  - (ii) Assess the likelihood that such plans can be effectively implemented.

Management's mitigation plans might include:

- (a) Plans to dispose of assets, reduce, or
- (b) Delay expenditure, borrow money, or
- (c) Restructure debt, or increase ownership equity.

On the receipt of these plans, the auditor should evaluate them, as follows:

- (a) Consider whether there is adequate evidence supporting management's ability to carry out the plans. For example, plans to dispose of assets could be difficult or impossible to accomplish;
- (b) Ascertain if there are restrictive covenants in loan agreements limiting such disposals;
- (c) Request management to provide information about significant management's plans, and
- (d) Consider whether there is adequate support for the significant assumptions underlying the plans.

If after evaluating management's plans, the auditor concludes that substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time; the auditor should then consider:

- (a) The adequacy of financial statement disclosure about the entity's possible inability to continue as a going concern; and
- (b) Include an explanatory paragraph (following the opinion paragraph) in the audit report to reflect that conclusion.

### **Contents of auditors' disclosures**

Auditors' disclosures about the entity's ability to continue as a going concern might include the following information:

- (a) Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time;
- (b) The possible effects of such conditions and events;
- (c) Management's evaluation of the significance of those conditions and events and mitigating factors;
- (d) Possible discontinuance of operations;
- (e) Management's plans, including relevant prospective financial information; and

- (f) Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities.

An illustration of an explanatory paragraph in the auditor's report relating to going concern is set out below:

*The company's financing arrangements expire and amounts outstanding are payable on March 31, 2005. The company has been unable to re-negotiate or obtain replacement financing. This situation indicates the existence of a material uncertainty which may cast significant doubt on the company's ability to continue as a going concern and therefore it may be unable to realise its assets and discharge its liabilities in the normal course of business. The financial statements and notes thereto do not disclose this fact.*

*In our opinion, except for this omission of information included in the preceding paragraph, the financial statements give a true and fair view of the financial position of the company at June 30, 2005 and the results of its operations and its cash flows for the year then ended in accordance with ...*

If, after considering management's plans, substantial doubt about the entity's ability to continue as a going concern does NOT exist, the auditor should still consider whether the principal conditions and events that initially generated the doubt need to be disclosed. The consideration of disclosure should include the possible effects of those conditions and events and any mitigating factors, including management's plans.

Statement of Accounting Standard No. 59 says, "the auditor is not responsible for predicting future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of reference to substantial doubt in an auditor's report should not be viewed as providing assurance as to an entity's ability to continue as a going concern."

### **8.3.2 Management representation**

The auditor is required by SAS 19, *Client Representations*, to obtain a letter of representation from management confirming that they are responsible for the financial statements and have made all pertinent information available to the auditor, and stating their belief in the accuracy and completeness of that information. The representation letter provides written evidence that the auditor has made certain inquiries from management; ordinarily it documents oral responses given to the auditor, thus reducing the possibility of errors or misunderstanding.

A representation letter is a competent evidence, but it is not sufficient on its own, to provide the auditor with a reasonable basis for forming an opinion. In the context of management representations, 'management' includes directors, officers and others who perform senior managerial functions.

### **Written Representations**

An auditor should obtain representation modified to meet the circumstances of the particular engagement and the nature and basis of presentation of the financial statements. For example, if the auditor is reporting on consolidated financial statements, the written representations obtained from the parent company's management should specify that they pertain to the consolidated financial statements. If the auditor is reporting on the parent company's separate financial statements as well, the letter should also extend to them.

Written representations relating to management's knowledge or intent should be obtained when the auditor believes they are necessary to complement other auditing procedures. For example, even if the auditor has performed test for unrecorded liabilities and has not detected any, written representation should be obtained to document that management has no knowledge of any liabilities that have not been recorded. Liabilities known to management but not accrued, through oversight, might be brought to the auditor's attention in this manner. Written representation does not relieve auditor of responsibility for planning the audit to identify material unrecorded liabilities. Information may be omitted or intentionally withheld from the auditor. Accordingly, the auditor should still perform all the usual tests to corroborate representations made by management.

### **ILLUSTRATION OF CLIENT REPRESENTATION LETTER**

#### ***All-Well Black PLC***

*July 30, 2008*

*(to The Auditor)*

*In connection with your audit of the financial statements of All-Well Black PLC for the year ended May 31, 2008 for the purpose of expressing an opinion as to whether the financial statements present a true and fair view of the financial position, results of operations, and cash flows of All-Well Black PLC in conformity with generally accepted accounting principles, we confirm, to the best of our knowledge and belief, as at July 29, 2008, the date of your report, the following representations made to you during audit.*

- (a) *We are responsible for the fair presentation in the financial statements, results of operations, and cash flows in conformity with generally accepted accounting principles.*
- (b) *We have made available to you all financial and accounting records and related data and all minutes of the meetings of shareholders, directors, and committees of directors. The most recent meeting held was the July 25, 2008 Board of Directors meeting. We are not aware of any accounts, transactions, or material agreements not fairly described and properly recorded in the financial and accounting records underlying the financial statements.*
- (c) *We are not aware of:*
  - (i) *any irregularities involving management or those employees who have significant roles in the internal control structure, or any irregularities involving other employees that could have a material effect on the financial statements, or*
  - (ii) *any violations or possible violations of laws or regulations whose effects would be considered for disclosure in the financial statements or as a basis for recording a loss contingency.*
- (d) *There have been no communications from regulatory agencies concerning non-compliance with or deficiencies in financial reporting practices that could have a material effect on the financial statements. The company has complied with all aspects of contractual agreements that would have a material effect on the financial statements in the event of non-compliance.*
- (e) *All cash and bank accounts and all other properties and assets of the company of which we are aware are included in the financial statements at May 31, 2008. The company has satisfactory title to all owned assets, and all liens, encumbrances, or security interests having any important consequence on any asset of the company are disclosed in the statements or notes thereto.*
- (f) *The receivables in the aggregate gross amount of ₦250,000,000 at May 31, 2008 represent bona fide claims against debtors for sales or other charges arising or before that date and are not subject to discount except for normal cash discounts. These receivables do not include any amounts that are collectible after one year. The amount of ₦800,000 carried as an allowance for uncollectible accounts is sufficient to provide for any losses that may be sustained on realisation of the receivables.*
- (g) *Inventories at May 31, 2008 in the aggregate amount of ₦13,000,000 are stated at the lower of cost or market, cost being determined on the basis FIFO, and consistently with the prior*

year; and provision was made to reduce all slow-moving, obsolete, or unusable inventories to their estimated net realisable values. Inventory quantities at May 31, 2006 were determined from the company's perpetual inventory records, which have been adjusted on the basis of physical inventories taken by competent employees at March 31, 2008. Liability, if unpaid, for all items included in inventories is recorded at May 31, 2005, and all quantities billed to customers at that date are excluded from the inventory balances.

- (h) *All liabilities of the company of which we are aware are included in the financial statements at May 31, 2008. There are no other material liabilities or gain or loss contingencies that ought to be accrued or disclosed and no unasserted claims or assessments that our legal counsel has advised us are probable of assertion and should be disclosed.*
- (i) *Commitments for future purchases are for quantities not in excess of anticipated requirements and at prices that will not result in loss. Provision has been made for any material loss to be sustained in the fulfilment of, or from the inability to fulfil, any sales commitments.*
- (j) *We have no plans or intentions that may materially affect the carrying value or classification of assets and liabilities.*
- (k) *The financial statements and related notes include all disclosures necessary for a fair presentation of the fanatical position, results of operations, and cash flows of the company in conformity with generally accepted accounting principles, and disclosure otherwise required to be included therein by the laws and regulations to which the company is subject.*

*The following have been properly recorded or disclosed in the financial statements:*

- (a) *Related party transactions and related amounts receivable or payable, including sales, purchases, loans, transfers, leasing arrangements, and guarantees.*  
*There are no:*
  - (i) *Capital stock repurchases options or agreements or capital stock reserved for options, warrants, conversions, or other requirements.*
  - (ii) *Arrangements with financial institutions involving compensating balances, arrangements involving restrictions on cash balances and lines of credit, or similar arrangements.*
  - (iii) *Agreements to repurchase assets previously sold.*

- (iv) *Guarantees, whether written or oral, under which the company is contingently liable to a bank or other lending institution.*

*No matters or occurrences have come to our attention up to the date of this letter that would materially affect the financial statements and related disclosures for the year ended May 31, 2008 or, although not affecting such financial statements or disclosures, have caused or are likely to cause any material change, adverse or otherwise, in the financial position, results of operations, or cash flow of the company*

---

*Finance Director*

---

*Chairman/Chief Executive Officer*

### **Dating and Signing**

The representation letter should be addressed to the auditor and dated not earlier than the date of the auditor's report, but not later than the report release date. Both the chief executive and chief financial officer should ordinarily sign representation letters. Other members of management may sign the letter instead if the auditor is satisfied that they are responsible for and knowledgeable about the matters covered by the representations.

### **Scope Limitations**

Management should neither refuse to furnish a written representation that the auditor believes is essential nor refuse to sign the representation letter. Either of the refusals constitutes a limitation on the scope of the audit which may attract a qualified opinion. Auditors should consider whether management's refusal to furnish written representations affect the reliability of their other representations. Executives are expected to understand their legal and ethical responsibilities for financial statement representation. Thus, they should also understand that the representation letter only specifies some of those responsibilities but does not increase them. Refusal to sign the letter should be seen as a 'tell-tale', either of withheld evidence or of inadequately understood responsibilities; either destroys the basis for an unqualified opinion.

### **8.3.3 Truth and Fairness of Financial Statements**

Generally accepted accounting principles provide a consistent frame of reference against which each of management's assertions that are implicit in the financial statements can be evaluated. Obviously, an auditor must be thoroughly familiar with generally accepted accounting principles to comply responsibly with the demands of truth and fairness in the financial statements.

Generally accepted accounting principles can be described as “the conventions, rules, and procedures necessary to define accepted accounting practice at a particular time”, `APB Statement No. 4, *Basic Concepts and Accounting Principles Underlying Financial Statements of Business Enterprise*. They are not limited to the principles in pronouncements of authoritative bodies such as the Nigerian Accounting Standards Board (NASB). They also include practices that have achieved acceptance through common usage as well as principles in non-authoritative pronouncements of bodies of recognised statutes. And the auditor’s report shall state whether the financial statements are presented in accordance with generally accepted accounting principles.

As a result, accountants over the years have had to contend with specific situations arising in practice and have developed and adopted numerous rules, conventions and doctrines, which are now called principles. Some of those principles have been promulgated formally by authoritative bodies of the profession (such as the NASB). All of those accepted conventions make up the body of GAAP.

The SAS 5, *The Meaning of “Present Fairly in Conformity With Accepted Accounting Principles” in the Independent Auditor’s Report*, enumerated the various judgements that the auditor should make in rendering an unqualified opinion. The auditor’s positive opinion about fair presentation in conformity with generally accepted accounting principles implies a belief that the financial statements have each of the following qualities:

- (a) The accounting principles selected and applied have general acceptance;
- (b) The accounting principles are appropriate in the circumstance;
- (c) The financial statements, including the related notes, are informative on matters that may affect their use, understanding, and interpretation;
- (d) The information presented in the financial statements is classified and summarised in a reasonable manner; that is, neither too detailed nor too condensed; and
- (e) The financial statements reflect the underlying events and transaction in a manner that presents financial position, results of operations, and cashflows stated within a range of acceptable limits i.e., limits that are reasonable and practicable to attain in financial statements.

It should be noted that financial statements will not give a “true and fair view” unless the information they contain is sufficient in quantity and quality to satisfy the reasonable expectations of the readers to whom they are addressed. The concept of “true and fair view” influences accounting standards and other authoritative pronouncements.

## 8.4 AUDITORS' RELATIONSHIP WITH AUDIT COMMITTEES

The Audit Committee is a body established under Section 359 of the Companies and Allied Matters Act., 2004 to which the auditor of a public company will report in addition to the auditor's duty to report to the members of the company in accordance with Section 359 (1) of the Act. The Audit Committee shall consist of equal number of directors and representatives of the shareholders of the public company with a maximum number of six members. Any member of a company may nominate a shareholder as a member of the Audit Committee if a notice is given to the Company Secretary at least 21 days before the Annual General Meeting. The members of the Audit Committee are not entitled to remuneration.

According to Section 359 (4), the Audit Committee shall examine the auditors' report and make recommendations thereon on the Annual General Meeting. Section 359 (6) states that subject to such other additional function and powers that the company's Articles of Association may stipulate, the objectives and functions of the Audit Committee shall be to:

- (a) Ascertain whether the accounting and reporting policies of the company comply with legal requirements and agreed ethical practices;
- (b) Review the scope and planning of audit requirements;
- (c) Review the findings on management letters in conjunction with the external auditor and departmental responses thereon;
- (d) Keep under review the effectiveness of the company's system of accounting and internal control;
- (e) Make recommendations to the Board in regard to the appointment, removal and remuneration of the external auditors of the company;
- (f) Authorise the internal auditor to carry out investigations into any activities of the company, which may be of interest or concern to the Committee.

SAS 61, *Communication with Audit Committees*, requires the auditor to determine that certain matters related to the conduct of and audit are communicated to those who oversee the financial reporting process generally – that is, an Audit Committee or other formally designated group.

This Statement requires the auditor to ensure that the Audit Committee receives additional information regarding the scope and results of the audit that may assist the Committee in overseeing the financial reporting and disclosure process for which management is responsible. Communications can also be made with management or other individuals within the entity who may benefit from such information.

### Items Communicated by the Auditor

Items communicated by the auditor can be written or oral.

- (a) If oral, the communication should be documented in the working papers; and

- (b) Written communication should contain indication that it is intended solely for use by the Audit Committee, board of directors, and, at times, management.

It is important for an Audit Committee to be informed about:

- (a) The level of responsibility the auditor assumes under GAAP for the financial statements and for considering the entity's internal control structure;
- (c) Significant accounting policies that the entity has selected for new or unusual transactions and changes and method used to account for them;
- (d) Management judgements on the process used by management in formulating sensitive accounting estimates and basis for the auditor's conclusion about such estimates;
- (e) Significant audit adjustments - adjustments arising from the audit that could have significant effect on the entity's financial reporting process;
- (f) Other information in documents containing audited financial statements (the auditor should discuss with Audit Committee the responsibility for other information, e.g., annual reports to shareholders, in documents containing audited financial statements);
- (g) Disagreements with management over the application of accounting principles, scope of audit, disclosures and wording of auditor's report;
- (h) Consultation by management with other accountants. Major issues discussed with management prior to retention; and
- (i) Difficulties encountered in performing the audit (in dealing with management, such as unreasonable delays or timetable).

Auditors should at least annually:

- (a) Disclose in writing to the Audit Committee and discuss as appropriate:
  - (i) all relationship that may reasonably be thought to bear on the firm's independence and the objectivity of the audit engagement partner and the audit staff;
  - (ii) the related safeguards that are in place; and
- (b) Confirm in writing to the Audit Committee that, in their professional judgement, the firm is independent and the objectivity of the audit engagement partner and audit staff is not impaired.

Audit Committees are formally designated oversight functions of the financial reporting process. The communications required are incidental to the audit; therefore, they need not occur prior to the issuance of the auditor's report on the financial statements. However, they should be made in time and, based on the auditor's judgement, may be given before the report. The communication of recurring matters need not be repeated.

## 8.5 AUDITORS' RELATIONSHIP WITH THIRD PARTIES

### Communication of Audit Matters With Those Charged With Governance

#### Introduction

- (a) *Communication of Audit Matters with Those Charged with Governance*, ISA 260 establishes standards and provides guidance on communication of audit matters arising from the audit of financial statements between the auditor and those charged with governance of an entity. These communications relate to audit matters of governance interest as defined hereunder;
- (b) The auditor should communicate audit matters of governance interest arising from the audit of financial statements with those charged with governance of an entity;
- (c) **Governance** is the term used to describe the role of persons entrusted with the supervision, control and direction of an entity. Those who are charged with governance ordinarily are accountable for ensuring that the entity achieves its objectives, with regard to reliability of financial reporting, effectiveness and efficiency of operations, compliance with applicable laws, and reporting to interested parties. Those charged with governance include management only when it performs such functions;
- (d) **Audit matters of governance interest** are those matters that arise from the audit of financial statements and, in the opinion of the auditor, are both important and relevant to those charged with governance in overseeing the financial reporting and disclosure process. Audit matters of governance interest include only those matters that have come to the attention of the auditor as a result of the performance of the audit. The auditor is not required to design audit procedures for the specific purpose of identifying matters of governance interest.

#### Relevant Persons

The auditor should determine the relevant persons who are charged with governance and with whom audit matters of governance interest are communicated.

The structures of governance vary from country to country reflecting cultural and legal backgrounds. This diversity makes it difficult to establish a universal identification of the persons who are charged with governance and with whom the auditor communicates audit matters of governance interest. The auditor uses judgement to determine those persons with whom audit matters of governance interest are communicated, taking into account the governance structure of the entity, the circumstances of the engagement and any relevant legislation. The auditor also considers the legal responsibilities of those persons. The relevant persons in entities with supervisory boards or with audit committees, could be those bodies.

When the entity's governance structure is not well defined, and/or those charged with governance are not clearly identified by the circumstances of the engagement, or by legislation, the auditor comes to an agreement with the entity about whom to communicate audit matters of governance interest with. Examples of such entities include some owner-managed entities, some not for profit organisations, and some government agencies. To avoid misunderstandings, an audit engagement letter should explain that the auditor will communicate only those matters of governance interest, that come to attention as a result of the performance of an audit and that the auditor is not required to design audit procedures for the specific purpose of identifying matters of governance interest. The engagement letter may also:

- (a) Describe the form in which any communications on audit matters of governance interest will be made;
- (b) Identify the relevant persons with whom such communications will be made; and
- (c) Identify any specific audit matters of governance interest which it has been agreed are to be communicated.

The effectiveness of communication is enhanced by developing a constructive working relationship between the auditor and those charged with governance. This relationship is developed while maintaining an attitude of professional independence and objectivity.

### **Audit Matters of Governance Interest to be Communicated**

The auditor should consider audit matters of governance interest that arise from the audit of the financial statements and communicate them with those charged with governance. Such matters include the following:

- (a) The general approach and overall scope of the audit, including any expected limitations thereon, or any additional requirements;
- (b) The selection of, or changes in, significant accounting policies and practices that have, or could have, a material effect on the entity's financial statements;
- (c) The potential effect on the financial statements of any material risks and exposures, such as pending litigation, that are required to be disclosed in the financial statements;
- (d) Audit adjustments, whether or not recorded by the entity that have, or could have, a material effect on the entity's financial statements;
- (e) Material uncertainties related to events and conditions that may cast significant doubt on the entity's ability to continue as a going concern;
- (f) Disagreements with management about matters that, individually or in aggregate, could be significant to the entity's financial statements or the auditor's report. This communication include consideration of whether the matter has, or has not, been resolved and the significance of the matter;

- (g) Expected modifications to the auditor's report;
- (h) Other matters warranting attention by those charged with governance, such as material weaknesses in internal control, questions regarding management integrity, and fraud involving management; and
- (i) Any other matters agreed upon in the terms of the audit engagement.

All uncorrected mis-statements aggregated by the auditor during the audit that were determined by management to be immaterial to the financial statements taken as a whole, should be communicated to those charged with governance. The uncorrected misstatement communicated to those charged with governance need not include the misstatement below a designated amount.

As part of the auditor's communication, those charged with governance are informed that:

- (a) The auditor's communication of matters include only those audit matters of governance interest that have come to the attention of the auditor as a result of the performance of the audit; and
- (b) An audit of financial statements is not designed to identify all matters that may be relevant to those charged with governance. Accordingly, the audit does not ordinarily identify all such matters.

### **Timing of Communication**

The auditor should communicate audit matters of governance interest on a timely basis. This enables those charged with governance to take appropriate action. In order to achieve timely communication, the auditor discusses with those charged with governance the basis and timing of such communication. In certain cases, because of the nature of the matter, the auditor may communicate that matter sooner than previously agreed.

### **Forms of Communication**

The auditor's communication with those charged with governance may be made orally or in writing. The auditor's decision whether to communicate orally or in writing is affected by factors such as the following:

- (a) The size, operating structure, legal structure, and communication processes of the entity being audited;
- (b) The nature, sensitivity and significance of the audit matters of governance interest to be communicated; and
- (c) The arrangements made with respect to periodic meetings or reporting of audit matters of governance interest.

When audit matters of governance interest are communicated orally, the auditor documents in the working papers the matters communicated and any responses to those matters. This documentation may take the form of a copy of the minutes of the auditor's discussion with those charged with governance. In certain circumstances, depending on the nature, sensitivity, and significance of the matter, it may be advisable for the auditor to confirm in writing with those charged with governance any oral communication on audit matters of governance interest. Ordinarily, the auditor initially discusses audit matters of governance interest with management, except where those matters relate to questions of management competence or integrity. These initial discussions with management are important in order to clarify facts and issues, and to give management an opportunity to provide further information. If management agrees to communicate a matter of governance interest with those charged with governance, the auditor may not need to repeat the communication, provided that the auditor is satisfied that such communications has effectively and appropriately been made.

### **Confidentiality**

The requirements of The Institute of Chartered Accountants of Nigeria (ICAN) and/or other regulations may impose obligations of confidentiality that restrict the auditor's communication of audit matters with third parties. The auditor should refer to such requirements, laws and regulations before communicating with those charged with such third parties. In some circumstances, the potential conflicts with the auditor's ethical and legal obligations of confidentiality and reporting may be complex. In these cases, the auditor may wish to consult with legal counsel.

## **8.6 NON-STATUTORY AUDIT**

The audit of small business is influenced by a number of special considerations, which are due to:

- (a) The intrinsic characteristics of small businesses;
- (b) The nature of the professional relationship between such businesses and their auditors; and
- (c) Other factor, such as the small size of the audit team and any special legal consideration affecting small businesses.

The impact of these considerations on the conduct of the audit can vary; some can often be beneficial, resulting in increased efficiency and effectiveness of the audit and, in turn, savings of cost to the client. In particular, the assistance with accountancy work normally provided to small businesses by their auditors can often be a source of audit evidence and can significantly reduce the extent of the work necessary purely for the sake of the audit.

Auditors of small businesses can provide a cost-effective audit service to their clients by planning their work to take full advantage of the opportunities afforded by such engagements to obtain the audit evidence they require in the most appropriate and economical manner.

### **Professional Relationship Between Small Businesses and their Auditors**

The owner-manager of a small business often needs professional advice and assistance on a wide range of accounting and related financial and business issues which are not available 'in-house'. The accounting firm appointed to act as auditors is therefore usually also engaged to provide other services, such as:

- (a) Accounting
  - (i) assisting with the keeping of accounting records;
  - (ii) advising on the selection and application of accounting policies; and
  - (iii) assisting with the preparation of financial statements.
- (b) Systems-advising on accounting systems and internal control procedures:
  - (i) advising on computer systems
- (c) Taxation
  - (i) assisting with the preparation of income and corporation tax returns;
  - (ii) computations and preparation of VAT returns; and
  - (iii) general tax advice and tax planning advice.
- (d) Other matters - advising on business and share valuations;
  - (i) advising on the owner-manager's responsibilities as company director;
  - (ii) assisting with preparation of budgets and forecasts;
  - (iii) assisting with obtaining finance; and
  - (iv) providing management consultancy services.

It is common for auditors to provide some or all of these services to a small business. This can enable them to obtain useful information about the business and about its owner-manager's aims, management style and ethos. The auditors also have the opportunity to keep up-to-date their knowledge of the business, which will help them to plan and conduct audit.

### **Fraud and Error**

Certain conditions or events may increase the risk of fraud or error. One of the examples given is "... management dominated by one person (or a small group) and no effective oversight board or committee." Although this situation applies in virtually all small businesses, the guidance in the SAS 110, *Fraud and Error*, is not intended to imply that all small businesses are to be regarded by their auditors as necessarily involving a higher inherent risk of fraud or error than larger businesses.

Accordingly, whilst the presence of a dominant owner-manager is an important factor in the overall control environment, the auditors' assessment of its impact is conditioned by their knowledge of the particular small business and of its owner-manager. The owner-manager's attitude to control can have a significant influence on the auditors' approach.

Examples of conditions or events, which may increase the risk of fraud or error, include:

- (a) The owner-manager has a specific identifiable motive to distort the financial statements, combined with the opportunity to do so;
- (b) The owner-manger makes no distinction between personal and business transaction;
- (c) The owner-manager's life-style is materially inconsistent with the level of his or her remuneration;
- (d) The owner-manager or key personnel have not taken annual leave for a long period of time;
- (e) Frequent changes of professional advisers;
- (f) The start-date for the audit has been repeatedly delayed;
- (g) Unexplained demands to prepare the accounts and complete the audit in an unreasonable short period of time;
- (h) Limitations placed on the scope of the audit, particularly if these appear to be unreasonable or illogical;
- (i) A significant level of cash transactions without adequate documentation;
- (j) Numerous unexplained aspects of audit evidence (such as difference between the accounting records and third-party confirmation, or unexpected results of analytical procedures);
- (k) Inappropriate use of accounting estimates;
- (l) Unusual transactions around the year-end which have a material effect on profit;
- (m) Unusual related party transactions; and
- (n) Payments of fees or commissions to agents and consultants which appear excessive.

## 8.7 SUMMARY OF AUDITOR'S RESPONSIBILITIES

All entities have the same basic audit requirements; the difference is just in matters of degree. Hence auditors' responsibilities as regards the objective and general principles governing statutory audit of financial statements prevail.

Auditors should:

- (a) Obtain engagement letter.
- (b) Obtain knowledge about the entity in sufficient quantity.
- (c) Consider the law and regulations governing the entity. These are:
  - (i) Law and regulations which relate directly to the preparation of the financial statements.
  - (ii) Laws and regulations which provide a framework for the conduct of the business.

- (iii) Other laws and regulations.
- (d) The going concern basis in financial statements.
- (e) Review subsequent events.
- (f) Consider other information contained in the financial statements.
- (g) Degree of accuracy in preparing financial statements and materiality in the audit.
- (h) Evidence the work done by use of working papers.
- (i) Ensure proper quality control of the audit work.
- (j) Obtain representations by management as part of audit evidence.

## 8.8 SUMMARY AND CONCLUSIONS

The chapter has covered in fair detail, the structure and framework of statutory audit reports as well as the incidence of non-statutory audit reports.

It also addressed the need or otherwise for Qualified Audit reports, after due consideration of issues bordering on materiality, Inconsistencies, Client-imposed Restrictions, observed departures from Generally Accepted Accounting Principles (GAAP), Subsequent Events, and the Going Concern factor.

Finally the chapter briefly discusses the auditor's relationship with Audit Committees of Corporate Clients, and other stakeholders.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

## 8.9 REVISION QUESTIONS

### 8.9.1 MULTIPLE CHOICE QUESTION

1. "Subsequent events" for reporting purposes are defined as events that occur subsequent to the
  - (A) Balance sheet date
  - (B) Date of the auditor's report
  - (C) Balance sheet date but prior to the date of the auditor's report
  - (D) Date of the auditor's report and concern contingencies that are not reflected in the financial statements
  - (E) Incorporation date.
2. A written undertaking between the auditor and client concerning the auditor's responsibility for discovering illegal acts is usually set forth in a (an)
  - (A) Client representation letter
  - (B) Management letter
  - (C) Letter of inquiry
  - (D) Engagement letter
  - (E) Disengagement Letter.

3. When obtaining evidence regarding litigation against a client, ICAN would be least interested in determining
  - (A) An estimate of when the matter will be resolved.
  - (B) The period in which the underlying cause of the litigation occurred.
  - (C) The probability of an unfavourable outcome.
  - (D) An estimate of the potential loss
  - (E) All the above.
  
4. In the course of an audit exercise, the auditor decides that modification of the standard report is not adequate to indicate deficiencies in the financial statements taken as a whole, and the client is not willing to correct the deficiencies. The auditor should therefore
  - (A) Perform a review of the financial statements
  - (B) Issue a special report
  - (C) Withdraw from the engagement
  - (D) Express an adverse opinion
  - (E) Do nothing.
  
5. In an audit of contingent liabilities, which of the following procedure would be least effective
  - (A) Reviewing a bank confirmation letter
  - (B) Examining customer confirmation
  - (C) Examination of invoices for professional services
  - (D) Reading the minutes of the board of directors
  - (E) Reviewing Assets Verification Procedure.

### 8.9.2 SHORT ANSWER QUESTIONS

1. Explain the classification of potential losses due to uncertainties as “probable,” “reasonably possible,” or “remote.”
2. What matters are usually covered in a representation letter? When, and by whom, is it signed?
3. Name and describe the different types of subsequent events auditors must consider in the audit of a client’s financial statements.
4. What procedures must the auditor follow where he intends to use the work of an “expert”?
  - (a) Give the definition of an “expert” in relation to an audit?
  - (b) Under what circumstances will an auditor use the work of an “expert”?
  - (c) What factors determine the need to use the work of an “expert”?
5. There are circumstances in which auditors should qualify their opinions in reporting on financial statements and other circumstances in which they should disclaim an opinion on the financial statements. Explain the general nature of the circumstances that would make each course necessary.

# ***INTRODUCTION TO ASSURANCE SERVICES***

## **9.0 LEARNING OBJECTIVES**

After studying this chapter, readers should be able to:

- ◆ Understand the difference between assurance and other professional services.
- ◆ Appreciate steps involved in carrying out an assurance service.
- ◆ Understand the basics of an assurance report.
- ◆ Understand the meaning of due diligence.
- ◆ Identify how to carry out a due diligence review.
- ◆ Understand the meaning of forensic audit and steps for carrying out a forensic audit.

## **9.1 DEFINITION AND SCOPE OF ASSURANCE SERVICES**

### **Definition**

Assurance has been defined as Independent Professional Services that improve information quality or its context for decision makers. This broad concept includes audit and attestation services and is distinct from consulting because, it focuses primarily on improving information rather than on providing advice. Assurance services reduce the information risk; risk that the information provided is incorrect, on more than just financial data. The major purpose of assurance services is to provide independent and professional opinions that improve the quality of information to management as well as other decision makers within a given firm. Audits can be considered a type of assurance service. However audits are only designed to test the validity of the financial statement. Under an assurance service, accountants can provide a variety of services ranging from information systems, security reviews to customer satisfaction surveys. Unlike audit and attestation services, that are often highly structured, assurance services tend to be customised and implemented when performed for a smaller group of decision makers within the firm. Often, organisations should make decisions on matters which they have incomplete or inaccurate data for, and decisions made on such data may be incorrect and increase the overall business risk. In this respect, assurance services can be very helpful in reducing such risk and help managers or decision makers to take more confident decisions within a given organisation. Assurance services can test financial and non-financial information; due to this, assurance services

are sometimes classified as consulting services. However, assurance services are not consulting because in consulting services generally accountants use their professional knowledge to make recommendations for a future event or a procedure. In contrast, assurance services are designed to test the validity of past data of the business cycles.

Assurance services are intended to enhance the credibility of information about a subject matter, by evaluating whether the subject matter conforms in all material respects with suitable criteria. The International Standard on Assurance Services issued by the International Auditing and Assurance Standards Board, describes the objectives and elements of assurance services to provide either a high or a moderate level of assurance. The International Auditing and Assurance Standards Board has also issued specific standards for certain assurance services. For example, International Standards on Auditing provide specific standards for audit (high level assurance) and review (moderate level assurance) of financial statements.

## 9.2 SCOPE OF ASSURANCE SERVICES

Whether a particular service is an assurance service or not will depend upon exhibiting all the following elements:

- (a) A three-party relationship involving:
  - (i) A professional accountant;
  - (ii) A client; and
  - (iii) An intended user;
- (b) A subject matter;
- (c) Suitable criteria;
- (d) A service process; and
- (e) A conclusion.

The client and the intended user will often be from separate organisations but need not be. A client and an intended user may both be within the same organisation. The relationship between the client and the intended user needs to be viewed within the context of a specific assurance service.

There is a broad range of services to provide a high or moderate level of assurance. Such services may include:

- (a) Services to report on a broad range of subject matters covering financial and non-financial information;
- (b) Attest and direct reporting services;
- (c) Services to report internally and externally; and
- (d) Services in the private and public sector.

The subject matter of an assurance service may take many forms, such as the following:

- (a) Data (for example, historical or prospective financial information, statistical information, performance indicators).

- (b) Systems and processes (for example, internal controls).
- (c) Behaviour (for example, corporate governance, compliance with regulation, human resource practices).

Not all services performed by professional accountants are assurance services. Other services frequently performed by professional accountants that are not assurance services include:

- (a) Agreed-upon procedures;
- (b) Compilation of financial or other information;
- (c) Preparation of tax returns when no conclusion is expressed, and tax consulting;
- (d) Management consulting; and
- (e) Other advisory services.

### 9.3 DEFINITION AND OBJECTIVE OF AN ASSURANCE SERVICE

“Assurance Service” means a service in which a professional accountant expresses a conclusion designed to enhance the degree of confidence of the intended users other than the client about the outcome of the evaluation or measurement of a subject matter against criteria.

The outcome of the evaluation or measurement of a subject matter is the information that results from applying the criteria to the subject matter. For example:

The recognition, measurement, presentation and disclosure represented in the financial statements (outcome) result from applying a financial reporting framework for recognition, measurement, presentation and disclosure, such as International Financial Reporting Standards (criteria) to an entity’s financial position, financial performance and cash flows (subject matter).

In this section, the term “subject matter information” will be used to mean the outcome of the evaluation or measurement of a subject matter. It is the subject matter information about which the professional accountant gathers sufficient appropriate evidence to provide a reasonable basis for expressing a conclusion in an assurance report.

Subject matter information can fail to be properly expressed in the context of the subject matter and the criteria, and can therefore be mis-stated, potentially to a material extent. This occurs when the subject matter information does not properly reflect the application of the criteria to the subject matter, for example, when an organisation’s financial statements do not give a true and fair view of its financial position, financial performance and cash flows, in accordance with International Financial Reporting Standards, or when an entity’s assertion that its internal control is effective is not fairly stated.

In some assurance services, the evaluation or measurement of the subject matter is performed by the client, and the subject matter information is in the form of an assertion by the client that is made available to the intended users.

These services are called “assertion-based services.” In other assurance services, the professional accountant either directly performs the evaluation or measurement of the subject matter, or obtains a representation from the client that has performed the evaluation or measurement that is not available to the intended users. The subject matter information is provided to the intended users in the assurance report. These assurance services are called “direct reporting assurance services.”

There are two types of assurance services a professional accountant can render a reasonable assurance service and a limited assurance service. The objective of a reasonable assurance service is a reduction in assurance service risk to an acceptably low level in the circumstances of the service as the basis for a positive form of expression of the professional accountant’s conclusion. The objective of a limited assurance service is a reduction in assurance service risk to a level that is acceptable in the circumstances of the service, but where that risk is greater than for a reasonable assurance service, as the basis for a negative form of expression of the professional accountant’s conclusion.

### **Acceptance of an Assurance Service By a Professional Accountant**

A professional accountant can only accept an assurance service only where his preliminary knowledge of the service circumstances indicates that:

- (a) Relevant ethical requirements, such as independence and professional competence will be satisfied; and
- (b) The service exhibits all of the following characteristics:
  - (i) The subject matter is appropriate;
  - (ii) The criteria to be used are suitable and are available to the intended users;
  - (iii) The professional accountant has access to sufficient appropriate evidence to support the his conclusion;
  - (iv) The professional accountant’s conclusion, in the form appropriate to either a reasonable assurance service or a limited assurance service, is to be contained in a written report; and
  - (v) The professional accountant is satisfied that there is a rational purpose for the service. If there is a significant limitation on the scope of the accountants’ work, it may be unlikely that the service has a rational purpose. Also, a professional accountant may believe the client intends to associate the professional accountant’s name with the subject matter in an inappropriate manner.

### **Elements of an Assurance Service**

The following elements of an assurance service are discussed in this section:

- (a) A three party relationship involving a professional accountant, a client, and intended users;
- (b) An appropriate subject matter;
- (c) Suitable criteria;
- (d) Sufficient appropriate evidence; and

- (e) A written assurance report in the form appropriate to a reasonable assurance service or a limited assurance service.

### **Three-party Relationship**

Assurance services involve three separate parties: a professional accountant, a client and intended users.

The client and the intended users may be from different entities or the same entity. As an example of the latter case, in a two-tier board structure, the supervisory board may seek assurance about information provided by the management board of that entity.

The relationship between the client and the intended users needs to be viewed within the context of a specific service and may differ from more traditionally defined lines of responsibility. For example, an entity's senior management (an intended user) may engage a professional accountant to perform an assurance service on a particular aspect of the entity's activities that is the immediate responsibility of a lower level of management (the client), but for which the senior management is ultimately responsible.

### **Professional Accountant**

The term "professional accountant" as used in this chapter is broader than the term "auditor" as used in ISAs and ISREs, which relates only to professional accountants performing audit or review services with respect to historical financial information. A professional accountant may be requested to perform assurance services on a wide range of subject matters. Some subject matters may require specialised skills and knowledge beyond those ordinarily possessed by an individual professional accountant. A professional accountant does not accept a service, if preliminary knowledge of the service circumstances indicates that ethical requirements regarding professional competence will not be satisfied. In some cases this requirement can be satisfied by the professional accountant using the work of persons from other professional disciplines, referred to as experts. In such cases, the professional accountant is satisfied that those persons carrying out the service collectively possess the requisite skills and knowledge, and that the professional accountant has an adequate level of involvement in the service and understanding of the work for which any expert is used.

### **Client**

The client is the person (or persons) who:

- (a) In a direct reporting service, is responsible for the subject matter; or
- (b) In an assertion-based service, is responsible for the subject matter information (the assertion), and may be responsible for the subject matter. An example of when the client is responsible for both the subject matter information, and the subject matter, is when an entity engages a professional accountant to perform an assurance service regarding a report it has prepared about its own sustainability practices. An example

of when the client is responsible for the subject matter information but not the subject matter, is when a government organisation engages a professional accountant to perform an assurance service regarding a report about a private company's sustainability practices that the organisation has prepared and is to distribute to intended users. The client may or may not be the party who engages the professional accountant (the engaging party).

The client ordinarily provides the professional accountant with a written representation that evaluates or measures the subject matter against the identified criteria, whether or not it is to be made available as an assertion to the intended users. In a direct reporting service, the professional accountant may not be able to obtain such a representation when the engaging party is different from the client.

### **Intended Users**

The intended users are the person, persons or class of persons for whom the professional accountant prepares the assurance report. The client can be one of the intended users, but not the only one.

Whenever practical, the assurance report is addressed to all the intended users, but in some cases there may be other intended users. The professional accountant may not be able to identify all those who will read the assurance report, particularly where there is a large number of people who have access to it. In such cases, particularly where possible readers are likely to have a broad range of interests in the subject matter, intended users may be limited to major stakeholders with significant and common interests. Intended users may be identified in different ways, for example, by agreement between the professional accountant and the client or engaging party, or by law.

Whenever practical, intended users or their representatives are involved with the professional accountant and the client (and the engaging party if different) in determining the requirements of the service. Regardless of the involvement of others however, and unlike an agreed-upon procedures service (which involves reporting findings based upon the procedures, rather than a conclusion):

- (a) The professional accountant is responsible for determining the nature, timing and extent of procedures; and
- (b) The professional accountant is required to pursue any matter he becomes aware of, that leads him to question whether a material modification should be made to the subject matter information.

In some cases, intended users (for example, bankers and regulators) impose a requirement on, or request the client (or the engaging party if different) to arrange for, an assurance service to be performed for a specific purpose. When services are designed for specified intended users or a specific purpose, the professional accountant considers including a restriction in the assurance report that limits its use to those users or that purpose.

## Subject Matter

The subject matter, and subject matter information, of an assurance service can take many forms, such as:

- (a) Financial performance or conditions (for example, historical or prospective financial position, financial performance and cash flows) for which the subject matter information may be the recognition, measurement, presentation and disclosure represented in financial statements;
- (b) Non-financial performance or conditions (for example, performance of an entity) for which the subject matter information may be key indicators of efficiency and effectiveness;
- (c) Physical characteristics (for example, capacity of a facility) for which the subject matter information may be a specification document;
- (d) Systems and processes (for example, an entity's internal control or IT system) for which the subject matter information may be an assertion about effectiveness; and
- (e) Behaviour (for example, corporate governance, compliance with regulation, human resource practices) for which the subject matter information may be a statement of compliance or a statement of effectiveness.

Subject matters have different characteristics, including the degree to which information about them is qualitative versus quantitative, objective versus subjective, historical versus prospective, and relates to a point in time or covers a period. Such characteristics affect the:

- (a) Precision with which the subject matter can be evaluated or measured against criteria; and
- (b) The persuasiveness of available evidence.

The assurance report notes characteristics of particular relevance to the intended users. An appropriate subject matter is:

- (a) Identifiable, and capable of consistent evaluation or measurement against the identified criteria; and
- (b) Such that the information about it can be subjected to procedures for gathering sufficient appropriate evidence to support a reasonable assurance or limited assurance conclusion, as appropriate.

## Criteria

Criteria are the benchmarks used to evaluate or measure the subject matter including, where relevant, benchmarks for presentation and disclosure. Criteria can be formal, for example in the preparation of financial statements, the criteria may be International Financial Reporting Standards or International Public

Sector Accounting Standards: when reporting on internal control, the criteria may be an established internal control framework or individual control objectives specifically designed for the service; and when reporting on compliance, the criteria may be the applicable law, regulation or contract.

Examples of less formal criteria are an internally developed code of conduct or an agreed level of performance (such as the number of times a particular committee is expected to meet in a year).

Suitable criteria are required for reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment. Without the frame of reference provided by suitable criteria, any conclusion is open to individual interpretation and misunderstanding. Suitable criteria are context-sensitive, that is, relevant to the assurance service circumstances. Even for the same subject matter, there can be different criteria. For example, one client might select the number of customer complaints resolved to the acknowledged satisfaction of the customer for the subject matter of customer satisfaction; another client might select the number of repeat purchases in the three months following the initial purchase.

**Suitable Criteria Exhibit the Following Characteristics:**

- (a) **Relevance:** relevant criteria contribute to conclusions that assist decision-making by the intended users.
- (b) **Completeness:** criteria are sufficiently complete when relevant factors that could affect the conclusions in the context of the assurance service circumstances are not omitted. Complete criteria include, where relevant, benchmarks for presentation and disclosure.
- (c) **Reliability:** reliable criteria allow reasonably consistent evaluation or measurement of the subject matter including, where relevant, presentation and disclosure, when used in similar circumstances by similarly qualified professional accountants.
- (d) **Neutrality:** neutral criteria contribute to conclusions that are free from bias.
- (e) **Understandability:** understandable criteria contribute to conclusions that are clear, comprehensive, and not subject to significantly different interpretations.

The evaluation or measurement of a subject matter on the basis of the professional accountant's own expectations, judgments and individual experience would not constitute suitable criteria.

The professional accountant assesses the suitability of criteria for a particular service by considering whether they reflect the above characteristics. The relative importance of each characteristic to a particular service is a matter of judgment. Criteria can either be established or specifically developed.

Established criteria are those embodied in laws or regulations, or issued by authorised or recognised bodies of experts that follow a transparent due process. Specifically developed criteria, are those designed for the purpose of the assurance service. Whether criteria are established or specifically developed affects the work that the professional accountant carries out to assess their suitability for a particular assurance service.

Criteria need to be available to the intended users to allow them to understand how the subject matter has been evaluated or measured. Criteria are made available to the intended users in one or more of the following ways:

- (a) Publicly;
- (b) Through inclusion in a clear manner in the presentation of the subject matter information;
- (c) Through inclusion in a clear manner in the assurance report; and
- (d) By general understanding, for example the criterion for measuring time in hours and minutes.

Criteria may also be available only to specific intended users, for example the terms of a contract, or criteria issued by an industry association that are available only to those in the industry. When identified criteria are available only to specific intended users, or are relevant only to a specific purpose, use of the assurance report is restricted to those users or for that purpose.

### **Evidence**

The professional accountant plans and performs an assurance service with an attitude of professional scepticism to obtain sufficient appropriate evidence about whether the subject matter information is free of material mis-statement. The professional accountant considers materiality, assurance service risk, and the quantity and quality of available evidence when planning and performing the service, in particular when determining the nature, timing and extent of evidence-gathering procedures.

### **Professional Scepticism**

The professional accountant plans and performs an assurance service with an attitude of professional scepticism recognising that circumstances may exist that cause the subject matter information to be materially misstated. An attitude of professional scepticism means the professional accountant makes a critical assessment, with a questioning mind, of the validity of evidence obtained and is alert to evidence that contradicts or brings into question the reliability of documents or representations by the client. For example, an attitude of professional scepticism is necessary throughout the assurance service process for the professional accountant to reduce the risk of overlooking suspicious circumstances, of over generalising when drawing conclusions from observations, and of using faulty assumptions in determining the nature, timing and extent of evidence gathering procedures and evaluating the results thereof. An assurance service rarely involves the authentication of documentation, nor is the professional accountant trained as or expected to be an expert in such authentication. However, the professional accountant considers the reliability of the information to be used as evidence, for example photocopies, facsimiles, filmed, digitised or other electronic documents, including consideration of controls over their preparation and maintenance where relevant.

### **Materiality**

Materiality is relevant when the professional accountant determines the nature, timing and extent of evidence-gathering procedures, and when assessing whether the subject matter information is free of mis-statement. When considering materiality, the professional accountant understands and assesses what factors might influence the decisions of the intended users. For example, when the identified criteria allow for variations in the presentation of the subject matter information, the professional accountant considers how the adopted presentation might influence the decisions of the intended users. Materiality is considered in the context of quantitative and qualitative factors, such as relative magnitude, the nature and extent of the effect of these factors on the evaluation or measurement of the subject matter, and the interests of the intended users. The assessment of materiality and the relative importance of quantitative and qualitative factors in a particular assurance service are matters for the professional accountant's judgment.

### **Assurance Service Risk**

Assurance service risk is the risk that the professional accountant expresses an inappropriate conclusion when the subject matter information is materially mis-stated. In a reasonable assurance service, the professional accountant reduces assurance service risk to an acceptably low level in the circumstances of the service to obtain reasonable assurance as the basis for a positive form of expression of the professional accountant's conclusion. The level of assurance service risk is higher in a limited assurance service than in a reasonable assurance service because of the different nature, timing or extent of evidence-gathering procedures. However in a limited assurance service, the combination of the nature, timing and extent of evidence gathering procedures is at least sufficient for the professional accountant to obtain a meaningful level of assurance as the basis for a negative form of expression. To be meaningful, the level of assurance obtained by the professional accountant is likely to enhance the intended users' confidence about the subject matter information to a degree that is clearly more than inconsequential.

In general, assurance service risk can be represented by the following components, although not all of these components will necessarily be present or significant for all assurance services:

- (a) The risk that the subject matter information is materially misstated, which in turn consists of:
  - (i) Inherent risk: the susceptibility of the subject matter information to a material mis-statement, assuming that there are no related controls;
  - (ii) Control risk: the risk that a material mis-statement that could occur will not be prevented, or detected and corrected, on a timely basis by related internal controls. When control risk is relevant to the subject matter, some control risk will always exist because of the inherent limitations of the design and operation of internal control; and

- (b) Detection risk: the risk that the professional accountant will not detect a material mis-statement that exists. The degree to which the professional accountant considers each of these components is affected by the service circumstances, in particular by the nature of the subject matter and whether a reasonable assurance or a limited assurance service is being performed.

### **Nature, Timing and Extent of Evidence-gathering Procedures**

The exact nature, timing and extent of evidence-gathering procedures will vary from one assurance service to the another. In theory, infinite variations in evidence gathering procedures are possible. In practice, however, these are difficult to communicate clearly and unambiguously. The professional accountant attempts to communicate them clearly and unambiguously and uses the form appropriate to a reasonable assurance service or a limited assurance service.

“Reasonable assurance” is a concept relating to accumulating evidence necessary for the professional accountant to conclude in relation to the subject matter information taken as a whole. To be in a position to express a conclusion in the positive form required in a reasonable assurance service, it is necessary for the professional accountant to obtain sufficient appropriate evidence as part of an iterative, systematic service process involving:

- (a) Obtaining an understanding of the subject matter and other assurance service circumstances which, depending on the subject matter, includes obtaining an understanding of internal control;
- (b) Based on that understanding, assessing the risks that the subject matter information may be materially misstated;
- (c) Responding to assessed risks, including developing overall responses, and determining the nature, timing and extent of further procedures;
- (d) Performing further procedures clearly linked to the identified risks, using a combination of inspection, observation, confirmation, recalculation, re-performance, analytical procedures and inquiry. Such further procedures involve substantive procedures including, where applicable, obtaining corroborating information from sources independent of the client, and depending on the nature of the subject matter, tests of the operating effectiveness of controls; and
- (e) Evaluating the sufficiency and appropriateness of evidence.

“Reasonable assurance” is less than absolute assurance. Reducing assurance service risk to zero is very rarely attainable or cost beneficial as a result of factors such as the following:

- (a) The use of selective testing;
- (b) The inherent limitations of internal control;
- (c) The fact that much of the evidence available to the professional accountant is persuasive rather than conclusive;
- (d) The use of judgment in gathering and evaluating evidence and forming conclusions based on that evidence; and

- (e) In some cases, the characteristics of the subject matter when evaluated or measured against the identified criteria.

Both reasonable assurance and limited assurance services require the application of assurance skills and techniques and the gathering of sufficient appropriate evidence as part of an iterative, systematic service process that includes obtaining an understanding of the subject matter and other service circumstances. The nature, timing and extent of procedures for gathering sufficient appropriate evidence in a limited assurance service are, however, deliberately limited relative to a reasonable assurance service. For some subject matters, there may be specific pronouncements to provide guidance on procedures for gathering sufficient appropriate evidence for a limited assurance service. In the absence of a relevant pronouncement, the procedures for gathering sufficient appropriate evidence will vary with the circumstances of the service, in particular, the subject matter, and the needs of the intended users and the engaging party, including relevant time and cost constraints. For both reasonable assurance and limited assurance services, if the professional accountant becomes aware of a matter that leads the professional accountant to question whether a material modification should be made to the subject matter information, he pursues the matter by performing other procedures sufficient to enable him to report.

### **Quantity and Quality of Available Evidence**

The quantity or quality of available evidence is affected by:

- (a) The characteristics of the subject matter and subject matter information. For example, less objective evidence might be expected when information about the subject matter is future oriented rather than historical; and
- (b) Circumstances of the service other than the characteristics of the subject matter, when evidence that could reasonably be expected to exist is not available because of, for example, the timing of the professional accountant's appointment, an entity's document retention policy, or a restriction imposed by the client. Ordinarily, available evidence will be persuasive rather than conclusive.

An unqualified conclusion is not appropriate for either type of assurance service in the case of a material limitation on the scope of the professional accountant's work, that is, when:

- (a) Circumstances prevent the professional accountant from obtaining evidence required to reduce assurance service risk to the appropriate level; or
- (b) The client or the engaging party imposes a restriction that prevents the professional accountant from obtaining evidence required to reduce assurance service risk to the appropriate level.

### Assurance Report

The professional accountant provides a written report containing a conclusion that conveys the assurance obtained about the subject matter information. ISAs, ISREs and ISAEs establish basic elements for assurance reports. In addition, the professional accountant considers other reporting responsibilities, including communicating with those charged with governance when it is appropriate to do so.

In an assertion-based service, the professional accountant's conclusion can be worded either:

- (a) In terms of the client's assertion (for example: "In our opinion the client's assertion that internal control is effective, in all material respects, based on XYZ criteria, is fairly stated"); or
- (b) Directly in terms of the subject matter and the criteria (for example: "In our opinion internal control is effective, in all material respects, based on XYZ criteria"). In a direct reporting service, the professional accountant's conclusion is worded directly in terms of the subject matter and the criteria.

In a reasonable assurance service, the professional accountant expresses the conclusion in the positive form, for example: "In our opinion internal control is effective, in all material respects, based on XYZ criteria." This form of expression conveys "reasonable assurance." Having performed evidence-gathering procedures of a nature, timing and extent that were reasonable given the characteristics of the subject matter and other relevant service circumstances described in the assurance report, the professional accountant has obtained sufficient appropriate evidence to reduce assurance service risk to an acceptably low level.

In a limited assurance service, the professional accountant expresses the conclusion in the negative form, for example, "Based on our work described in this report, nothing has come to our attention that causes us to believe that internal control is not effective, in all material respects, based on XYZ criteria." This form of expression conveys a level of "limited assurance" that is proportional to the level of the professional accountant's evidence-gathering procedures given the characteristics of the subject matter and other service circumstances described in the assurance report.

A professional accountant does not express an unqualified conclusion for either type of assurance service when the following circumstances exist and, in the professional accountant's judgment, the effect of the matter is or may be material:

- (a) There is a limitation on the scope of the professional accountant's work. The professional accountant expresses a qualified conclusion or a disclaimer of conclusion depending on how material or pervasive the limitation is. In some cases the professional accountant considers withdrawing from the service.

- (b) In those cases where:
  - (i) The professional accountant's conclusion is worded in terms of the client's assertion, and that assertion is not fairly stated, in all material respects; or
  - (ii) The professional accountant's conclusion is worded directly in terms of the subject matter and the criteria, and the subject matter information is materially misstated, he expresses a qualified or adverse conclusion depending on how material or pervasive the matter is.
- (c) When it is discovered after the service has been accepted, that the criteria are unsuitable or the subject matter is not appropriate for an assurance service. The professional accountant expresses:
  - (i) A qualified conclusion or adverse conclusion depending on how material or pervasive the matter is, when the unsuitable criteria or inappropriate subject matter is likely to mislead the intended users; or
  - (ii) A qualified conclusion or a disclaimer of conclusion depending on how material or pervasive the matter is, in other cases. In some cases the professional accountant considers withdrawing from the service.

### **Inappropriate Use of the Professional Accountant's Name**

A professional accountant is associated with a subject matter when the professional accountant's reports on information about that subject matter or consents to the use of his name in a professional connection with that subject matter. If he is not associated in this manner, third parties can assume no responsibility of the professional accountant. If the professional accountant learns that a party is inappropriately using his name in association with a subject matter, he requires the party to cease doing so. The professional accountant also considers what other steps may be needed, such as informing any known third party users, of the inappropriate use of the professional accountant's name or seeking legal advice.

## **9.4 DUE DILIGENCE**

### **Definition of Due Diligence**

Due Diligence is a term used for a number of concepts involving either the performance of an investigation of a business or person, or the performance of an act with a certain standard of care. It can be a legal obligation, but the term will more commonly apply to voluntary investigations. A common example of due diligence in various industries is the process through which a potential acquirer evaluates a target company or its assets for acquisition.

In business transactions, the due diligence process varies for different types of companies. The relevant areas of concern may include the financial, legal, labour, tax, IT, environment and market/commercial situation of the company.

Other areas include intellectual property, real and personal property, insurance and liability coverage, debt instrument review, employee benefits and labour matters, immigration, and international transactions.

In the perspective of private-sector world of business and finance, the term due diligence refers to the process through which an investor researches an organisation's financial and organisational health to guide an investment decision. The decision to fund or not to fund is based upon a balance of objective data analysis, insight into the general state of organisational health and stability, and intuition. A due diligence review is the process through which all the factors that make up that equation are uncovered and understood. It is the process in which a program officer seeks the truth about an organisation.

Due diligence in civil litigation, is the effort made by an ordinarily prudent or reasonable party to avoid harm to another party. Failure to make this effort may be considered negligence. This is conceptually distinct from investigative due diligence, involving a general obligation to meet a standard of behaviour. Quite often a contract will specify that a party is required to provide due diligence. Due care should not be confused with Due diligence. Due care should be spelt out in full as duty of care. It is a legal concept by itself. Duty of care may be very wide, far reaching, and also a grey area subject to argument. When read carefully, care is the passive mode; diligence is the active mode. First the duty of care (due care) arises, making it a requirement. In order to fulfil this duty, due diligence is exercised. The flow may be continuous, but these two concepts are different. When due diligence is called for, then there will be a set of demands to be complied with, depending on the context.

In criminal law, due diligence is the only available defence to a crime that is one of strict liability. Once the criminal offence is proven, the defendant should prove beyond a reasonable doubt that they did everything possible to prevent the act from happening. It is not enough that they took the normal standard of care in their industry - they should show that they took every reasonable precaution.

Information security due diligence is often undertaken during the information technology procurement process to ensure risks are known and managed, and during mergers and acquisitions due diligence reviews to identify and assess the business risks.

Due diligence is a somewhat technical phrase used to describe a range of assignments, legal obligations, reports and investigations which take place in business, manufacturing and law. Its most frequently heard version is the one pertaining to business, where due diligence refers to the steps taken by venture capitalists before investing a round of capital in a start-up, the ongoing investigation as to how the funds are being distributed, or the precautionary steps taken by a larger company in deciding to acquire a smaller company.

In venture capitalism, due diligence involves looking into the past and present of the people and structure of a company requesting venture funding. For instance, venture capitalists are cautious of investing in companies that lack people with credentials or a proven track record. Depending on the overall level of caution in the investment environment at the time, a due diligence investigation may be more or less stringent. Typically a venture capital firm will have a dozen or more investigators whose task is to research specific details of the personal history of people in the company. Of course, due diligence is not a magic potion against investment failures. Even a company made up of well-educated high achievers can falter due to unpredictable market conditions, unforeseen competition, or technical setbacks. Due diligence generally refers to the background checks conducted after a venture partner has already made a decision about the company.

In law, due diligence refers to precautions that are supposed to be taken by a person or company in some context. For example, did the company thoroughly check its product beforehand to ensure it was non-toxic or was not a strangulation hazard? If the company did not and bad results come of the negligence, it can be held criminally liable

### **Objectives of Due Diligence**

The first step in planning a due diligence program is to define its objectives. There may be different interest groups with different objectives in the given investments. However some of the more common objectives are:

- (a) Verification that the business is essentially what it seems to be. Determining this, by means of interviews, document study and on-site inspections, is the fundamental objective of due diligence.
- (b) Verification that the investment complies with investors' criteria. Many investors have vital criteria for businesses in which they will invest. These criteria may involve historical earnings, financial ratios, projected earning potential, tangible book value in relation to price, quality of management and type of business. The criteria reflect what investors hope to get for their money

The objective of the due diligence process should be to quantify major items and monetary values, not simply to identify assets, liabilities, defects or problems.

### **Responsibility of Professionals**

Accountants, attorneys, investment bankers, loan officers and other professionals involved in securities transactions have an obligation to conduct independent due diligence. Full disclosure is not just their clients' responsibility. Accountants may be required to provide formal opinion letters regarding the business. Investment bankers and others routinely write "fairness opinions" outlining their view of the transaction. Their objective is not just to provide competent professional service to their clients but to establish a record demonstrating they conducted adequate due diligence under the circumstances.

### **Scope of Due Diligence Programme**

While planning the scope and nature of a due diligence program, an investor should determine the degree of business and legal risk he will accept. Scope in this context consists of the depth of questioning on any subject and the quantity of original documents to be reviewed. A comprehensive and systematic due diligence program is absolutely necessary because risk multiplies when all aspects of a business are not objectively reviewed. One should however balance the amount of due diligence against the resources available in terms of time and cost.

An intense, well-run due diligence program cannot guarantee success for the investor, but it can most certainly reduce the chances of incurring losses. Conversely, no amount of information appraisal will totally eliminate risk or generate certainty that the contemplated transaction will succeed; however, that is no excuse for carrying out less work in a due diligence engagement.

### **What can be Considered Adequate Due Diligence?**

There can actually never be enough due diligence in evaluating an investment, but there are certain essentials that can lessen the investor's risk and possibly justify reducing the scope of due diligence. They include the following:

- (a) Stable and proven management;
- (b) Audited financial statements with short, easily understood notes;
- (c) History of consistent earnings;
- (d) Few subsidiaries, divisions or joint ventures;
- (e) Strong market position;
- (f) Absence of material litigation;
- (g) No real estate or operations with potential environmental problems;
- (h) Earnings primarily from operations;
- (i) Not dependent upon one or few customers or clients;
- (j) No intangible assets;
- (k) No intercompany transactions;
- (l) No discontinued operations or restructuring;
- (m) Little or no extraordinary income or expenses;
- (n) Strong internal controls; and
- (o) Few and readily accessible locations.

The absence of the above list will increase the signal for maximum due diligence. It would be necessary to conduct extensive due diligence if a number of significant adverse risk factors arose. Reducing its scope of due diligence can possibly be justified if key elements of the business are in favourable condition.

### **Constructing a Due Diligence Questionnaire**

On commencement of a due diligence programme, a list of information and documents that eventually may be required should be compiled. Such a large quantity of information on so many subjects is needed that an effort should be made to avoid matters of little importance or those that are irrelevant. The objective of data collection is to obtain enough information to make an informed

business decision. An exact amount of information cannot be recommended, but the following questions can help develop a due diligence questionnaire:

- (a) Is the information necessary to understand the business?
- (b) Is it necessary for negotiations and to write the contracts to conclude the deal?
- (c) If the information is not requested now, will it be needed at a later date?
- (d) Could mistakes be avoided by obtaining the information?
- (e) Is the information necessary to affect a smooth transition and for those managing the investment to be effective?
- (f) Since it is impossible to predict which subject or document will prove to be of great importance, it is better to include a subject than to delete it.

A due diligence checklist records answers and identifies what is missing. The checklist should ask questions to cover the following areas of the proposed investment;

- ◆ Capital structure
- ◆ Management
- ◆ R & D and Technology
- ◆ Real Estate facilities
- ◆ Markets, competitions and customers
- ◆ Marketing
- ◆ Pricing
- ◆ Advertising and public relations
- ◆ Purchasing
- ◆ Human resources
- ◆ Employees
- ◆ Compensations and benefits
- ◆ Corporate Culture
- ◆ Legal
- ◆ Information system
- ◆ Budgeting and Planning
- ◆ Insurance and bonding
- ◆ Environmental issues
- ◆ Debt and Banking
- ◆ Investments and Cash Management
- ◆ Taxes
- ◆ Accounting general questions
- ◆ Accounting policies
- ◆ Cash
- ◆ Accounts and notes receivables
- ◆ Inventories
- ◆ Fixed and other assets
- ◆ Liabilities
- ◆ Backlog and Income Recognition
- ◆ Cost of Sales, Selling and Administrative Expenses
- ◆ Intercompany transactions
- ◆ Investment Questions and Issues.

## 9.5 FORENSIC AUDIT

Forensic audit is the specialty practice area of accountancy that describes services which result from actual or anticipated disputes or litigation. Forensic means suitable for use in a court of law, and it is to that standard and potential outcome that forensic auditors generally have to work. Forensic auditors, also referred to as forensic accountants or investigative auditors, often have to give expert evidence at the eventual trial. It includes the audit of accounting records to prove or disprove a fraud. Includes the interview process of all related parties to a fraud, when applicable. It also includes the act of serving as an expert witness when matters are brought up in court. The term forensic in the accounting profession deals with the use or application of financial data in resolving allegations of fraud. Forensic audit evidence is oriented to a court of law.

The need of forensic audit is almost always reactive; this distinguishes it from fraud audit, which is actively involved in prevention and detection in corporate or regulatory environment. Forensic auditors are engaged to react to complaints arising in criminal matters, statements of claims arising in civil litigations, and rumours and inquiries arising in corporate investigations.

In contrast to financial audit, forensic audit put things together rather than taking them apart. The process of forensic auditing sometimes is more intuitive than deductive, although intuition and deduction play important roles. Forensic auditing is less procedural as it is intended to work more effectively in detecting fraud. Professional scepticism is the basic mindset for forensic audit.

### Need for Forensic Auditing

Complexities in business and changes in social and legal expectations have enhanced the need for forensic auditing. Wherever a potential loss, real financial loss, or risk of loss is perceived, a forensic audit may be commissioned. It can be applied in the following areas

- (a) **Corporate Investigations:** Organisations frequently are faced with circumstances of possible wrongdoings that may require investigations. The forensic auditor assists in investigating allegations ranging from kickbacks and wrongful dismissals to internal situations involving allegations of management or employee wrongdoing.
- (b) **Litigation Support:** In cases of loss of profit, construction claims, product liability, shareholder disputes, bankruptcies and breach of contracts, forensic auditors assist counsel in investigating and assessing the integrity and amount relating to such cases.
- (c) **Criminal Matters:** In criminal matters, forensic auditors as expert witnesses are increasingly important in court cases in variety of situations such as arson, scams, fraud, vendor frauds, customer frauds, investment scams, and stock market manipulations.
- (d) **Insurance claims:** To assess the integrity and the quantum of claim, the assistance of the forensic auditor is often required.

- (e) **Government:** Forensic accountants assist Governments to achieve regulatory compliance by ensuring that companies follow the appropriate legislation.

### **Qualities of a Forensic Auditor**

Most aspects of forensic audit fall outside the normal training of financial auditors. The following qualities are necessary to perform adequately as a forensic auditor:

- (a) Ability to identify fraud with minimal initial information;
- (b) Identification of financial issues. When confronted with situations arising from a complain, allegation, rumour, etc., he should be able to quickly identify the financial issues significant to the matter;
- (c) Knowledge of investigation techniques;
- (d) Knowledge of evidence. He should understand what constitutes evidence. For example, the meaning of “best” and “primary” evidence, the rules of evidence in court, and what constitute evidence in court;
- (e) Interpretation of financial information;
- (f) Presentation of financial findings. He should have the ability to communicate in findings in a language that is understandable by a lay person and without any ambiguity;
- (g) Investigative skills. Investigative skills are needed for litigation support;
- (h) Investigative mentality. The forensic auditor should, along with accounting skills, develop an investigative mentality that allows him to go beyond the limits established in generally accepted auditing standards;
- (i) Scope is not restricted as a result of materiality;
- (j) Sampling is not recommended; and
- (k) Non-assumption of integrity of management.

### **Steps in Forensic Auditing**

The following steps are adopted by the forensic auditor in performing an audit:

- (a) Verify compliance with regulatory, legal and evidential matters;
- (b) Review documents related to legal and general business functions;
- (c) Test the organisation’s motivational and ethical climate;
- (d) Document management, administrative, and organisational policies, procedures, and practices;
- (e) Gather and preserve evidence to corroborate asset losses, fraudulent transactions;
- (f) Establish accounting, audit, and internal control;
- (g) Conduct a review of internal controls;
- (h) Assess the strengths and weaknesses of those controls;
- (i) Design scenarios of potential fraud losses based on identified weaknesses in internal controls;
- (j) Identify questionable and exceptional transactions;
- (k) Identify questionable and exceptional account balances and variations;
- (l) Distinguish between simple and human errors and omissions in entries and fraudulent entries;

- (m) Follow the flow of funds that support documents;
- (n) Follow the flow of funds into and out of an organisation's bank account;
- (o) Search for underlying support documents for questionable transactions;
- (p) Review such documents for peculiarities; examples are fake billings, destruction of data, improper account classification, irregularities in financial data, substitution of copies of documents for the original; and
- (q) Document and report fraud loss for criminal, civil, or insurance claims.

### **Differences Between Forensic Audit and Financial Audit**

The procedure for financial audits are designed to detect material mis-statements, not material frauds. Financial auditors depend on a sample and rely on examination of audit trail instead of the examination of the events and activities behind the documents. Financial audit procedures are based on uncovering material deviations in financial data and significant variances from acceptable accounting and auditing standards. Forensic auditors look behind and beyond the transactions and audit trail to focus on substance of the transactions instead. Unlike the financial auditor, the forensic auditor asks the following questions:

- (a) Where are the weakest links in the system chain of controls?
- (b) How are offline transactions handled, and who authorises them?
- (c) What possible deviations can occur in the system different from conventional good accounting practice?
- (d) What simple way exists to compromise the system?
- (e) What is the nature of work environment in the organisation?
- (f) How can higher management bypass the control systems in the organisation?

Forensic audit has the following peculiar characteristics:

- (a) It is more a mindset than a mythology;
- (b) Forensic audit approach is different from financial audit approach;
- (c) Forensic audit is learned from experience not from text books; and
- (d) Forensic audit views fraud as an intentional misrepresentation of material financial facts; financial audit views fraud as an intentional misrepresentation of financial fact of a material nature.

## **9.6 SUMMARY AND CONCLUSIONS**

The chapter makes an introduction to assurance services. Elements and scope of assurance services were discussed, including the various forms of assurance reports. Issues on due diligence as an aspect of audit and assurance, were covered.

Similarly forensic services as distinct from financial audit was explained, with steps required for an effective forensic investigation, provided.

*Refer to Comprehensive Questions and Suggested Solutions in Appendix II, on page 321.*

## 9.7 REVISION QUESTIONS

### 9.7.1 MULTIPLE CHOICE QUESTIONS

1. The various elements which are peculiar to an assurance engagement do not include the following:
  - (A) Existence of a three party relationship involving the practitioner the responsible party and the intended user
  - (B) Non-existence of suitable criteria
  - (C) Identification of the subject matter
  - (D) Written assurance report in appropriate form to include appropriate conclusion
  - (E) Availability of sufficient appropriate evidence.
2. Which of the following is not an example of assurance engagements
  - (A) A statutory audit
  - (B) Reports and statements of Accounting Policies
  - (C) Reports on Corporate Social Responsibility Performance
  - (D) Reports on Environmental Performance
  - (E) Report for Lenders and Other Investors.
3. One of the following is not a peculiar characteristics of forensic audit
  - (A) It is more a mind set than a mythology
  - (B) Forensic audit approach is different from financial audit approach
  - (C) Forensic audit is learned from experience not from text books
  - (D) Forensic audit is the same as assurance service
  - (E) Forensic audit views fraud as an intentional misrepresentation of material financial facts; financial audit views fraud as an intentional misrepresentation of financial fact of a material nature.
4. One of the following questions is not necessary in developing a due diligence questionnaire
  - (A) Is the information necessary to understand the business
  - (B) Is it necessary for negotiations and to write the contracts to conclude the deal
  - (C) If the information is not requested now, will it be needed at a later date
  - (D) Could mistakes be avoided by obtaining the information
  - (E) The academic qualifications of management staff.

### 9.7.2 SHORT ANSWER QUESTIONS

5. It is noted that there can actually be enough due diligence when evaluating an investment, however there are certain essentials that can lessen the investor's risk and possibly reduce the scope of due diligence. List these essentials.
6. The term "Due Diligence" may mean different things in different professions and industries; what do you understand by the term Due Diligence in the perspective of private sector world of business and finance.
7. Complexities in business and changes in social and legal expectations have enhanced the need for forensic auditing. What are the areas where forensic audit can be applied?

8. What are the qualities that are required of a good forensic auditor?
9. List the steps necessary by a forensic auditor to perform a forensic audit.

*Refer to suggested solution in Appendix I on page 301.*

## ***APPENDICES***

## ***APPENDIX I***

# ***SUGGESTED SOLUTIONS TO REVISION QUESTIONS***

### **CHAPTER 1**

1. A
2. C
3. D
4. C
5. D

### **SHORT ANSWER SOLUTIONS**

1. Fundamental principles of independent auditing:  
The Auditors' Code, published by APB, prescribes nine fundamental principles of independent auditing as follows:
  - (a) **Accountability**  
Auditors act in the interests of primary stakeholders, whilst having regard to the wider public interest. The identity of primary stakeholders is determined by reference to the statute or agreement requiring an audit: in the case of companies, the primary stakeholder is the general body of shareholders.
  - (b) **Integrity**  
Auditors act with integrity, fulfilling their responsibilities with honesty, fairness and truthfulness.  
Confidential information obtained in the course of the audit is disclosed only when required in the public interest, or by operation of law.
  - (c) **Objectivity and independence**  
Auditors are objective. They express opinions independently of the entity and its directors.
  - (d) **Competence**  
Auditors act with professional skill, derived from their qualification, training and practical experience.  
This demands an understanding of financial reporting and business issues, together with expertise in accumulating and assessing the evidence necessary to form an opinion.
  - (e) **Rigour**  
Auditors approach their work with thoroughness and with an attitude of professional scepticism. They assess critically the information and explanations obtained in the course of their work and such additional evidence as they consider necessary for the purposes of their audit.
  - (f) **Judgement**  
Auditors apply professional judgement taking account of materiality in the context of the matters on which they are reporting.
  - (g) **Clear Communication**  
Auditors' reports contain clear expressions of opinion and set out information necessary for a proper understanding of that opinion.

**(h) Association**

Auditors allow their reports to be included in documents containing other information only if they consider that the additional information is not in conflict with the matters covered by their report and they have no cause to believe it to be misleading.

**(i) Providing Value**

Auditors add to the reliability and quality of financial reporting; they provide to directors and officers constructive observations arising from the audit process; and thereby contribute to the effective operation of business, capital markets and the public sector.

**2. Scope**

The auditor considers the following matters in determining the scope of work:

- (a) the relevant statements of accounting standards,
- (b) the auditing standards,
- (c) the requirements of relevant professional bodies,
- (d) legislation and regulations and
- (e) the terms of the audit engagement

**3. Ethical principles**

In the conduct of any audit of financial statements auditors should comply with the ethical guidance issued by their relevant professional bodies.

The ethical principles which govern auditors' professional responsibilities include:

- (a) integrity;
- (b) objectivity;
- (c) independence;
- (d) professional competence and due care;
- (e) professional behaviour; and
- (f) confidentiality.

In Nigeria, the auditor should comply with the 'Rules of Professional Conduct for Members issued by the Institute of Chartered Accountants of Nigeria and accounting standards issued by the Nigerian Accounting Standards Board. The 'Rules of Professional Conduct for Members' covers the following matters:

- (a) fundamental principles
- (b) integrity, objectivity and independence
- (c) conflicts of interest
- (d) confidentiality
- (e) changes in professional appointment
- (f) consultancy
- (g) association with non-members
- (h) fees
- (i) obtaining professional work
- (j) the names and letterheads of practicing firms
- (k) second and other opinions
- (l) members in business
- (m) enforcement of ethical standards

**4. Independence of mind:**

The state of mind that permits the provision of an opinion without being affected by influences that compromise professional judgement, allowing an individual to act with integrity, and exercise objectivity and professional scepticism.

5. Matters which should be considered in determining whether confidential information may be disclosed are as follows:
- (a) When disclosure is authorised. When authorisation to disclose is given by the client or the employer the interests of all the parties including those third parties whose interests might be affected should be considered.
  - (b) When disclosure is required by law. Examples of when a professional accountant is required by law to disclose confidential information are:
  - (c) To produce documents or to give evidence in the course of legal proceedings; and
  - (d) To disclose to the appropriate public authorities infringements of the law which come to light.

When there is a professional duty or right to disclose:

- (a) To comply with technical standards and ethics requirements; such disclosure is not contrary to this section;
- (b) To protect the professional interests of a professional accountant in legal proceedings;
- (c) To comply with the quality (or peer) review of a member body or professional body; and
- (d) To respond to an inquiry or investigation by a member body or regulatory body.

When the professional accountant has determined that confidential information can be disclosed, the following points should be considered:

- (a) Whether or not all the relevant facts are known and substantiated, to the extent it is practicable to do so; when the situation involves unsubstantiated fact or opinion, professional judgement should be used in determining the type of disclosure to be made, if any;
- (b) What type of communication is expected and the addressee; in particular, the professional accountant should be satisfied that the parties to whom the communication is addressed are appropriate recipients and have the responsibility to act on it; and
- (c) Whether or not the professional accountant would incur any legal liability having made a communication and the consequences thereof.

In all such situations, the professional accountants should consider the need to consult legal counsel and/or the professional organisation(s) concerned. The 'Rules of Professional Conduct for Members' issued by the Institute of Chartered Accountants of Nigeria provides, in relation to confidentiality, that:

- ◆ information confidential to a client or employer acquired in the course of professional work should not be disclosed except where consent has been obtained from the client, employer or other proper source, or where there is a legal right or duty to disclose.
- ◆ Where a legal right or duty of disclosure does exist, the client or employer should normally be notified in advance of the disclosure being made.

## CHAPTER 2

- 1. C
- 2. A
- 3. A
- 4. A
- 5. E

## SHORT ANSWER SOLUTIONS

1. Remuneration of auditors
  - (a) The remuneration of the auditors of a company-
    - (i) in the case of an auditor appointed by the directors, may be fixed by the directors; or
    - (ii) shall be fixed by the company in general meeting or in such manner as the company in general meeting may determine.
  - (b) "Remuneration" includes sums paid by the company in respect of the auditors' expenses. (Section 361).
  
2. Liability of auditors for negligence
  - (a) A company's auditor shall in the performance of his duties, exercise all such care, diligence and skill as is reasonably necessary in each particular circumstance.
  - (b) Where a company suffers loss or damage as a result of the failure of its auditor to discharge the fiduciary duty imposed on him the auditor shall be liable for negligence and the directors may institute an action for negligence against him in the court.
  - (c) If the directors fail to institute an action against the auditor any member may do so after the expiration of 30 days' notice to the company of his intention to institute such action. (Section 368)
  
3. Any person:
  - (a) having any interest in a bank otherwise than as a depositor; or
  - (b) who is a director, officer or agent of a bank; or
  - (c) which is a firm in which a director of a bank has any interest as partner or director; or
  - (d) who is indebted to a bank, shall not be eligible for appointment as the approved auditor for that bank;
  - (e) and a person appointed as such auditor who subsequently – acquires such interest; or becomes a director, officer or agent of the bank; or becomes indebted to a partner in a firm in which a director of a bank is interested as partner or director, shall cease to be such auditor.
  
4. NASB Act 2003 prescribes stiff penalties for non-compliance with accounting standards issued by the NASB. These include
  - (a) Fines at the discretion of the Board
  - (b) 5 million fine
  - (c) One year imprisonment, or both, on conviction
  - (d) Proscription or delisting of the firm of accountants
  
5. Family and Personal Relationships
 

The Code of Ethics for Professional Accountants issued by the International Federation of Accountants further provides that "Family and personal relationships between a member of the assurance team and a director, an officer or certain employees, depending on their role, of the assurance client, may create self-interest, familiarity or intimidation threats. It is impracticable to attempt to describe in detail the significance of the threats that such relationships may create. The significance will depend upon a number of factors including the individual's responsibilities on the assurance engagement, the closeness of the relationship and the role of the family member or other individual within the assurance client. Consequently, there is a wide spectrum of circumstances that will need to be evaluated and safeguards to be applied to reduce the threat to an acceptable level".

When an immediate family member of a member of the assurance team is

- (a) a director, an officer or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement, or
- (b) in such a position during any period covered by the engagement, the threats to independence can only be reduced to an acceptable level by removing the individual from the assurance team. The closeness of the relationship is such that no other safeguard could reduce the threat to independence to an acceptable level.

If application of this safeguard is not used, the only course of action is to withdraw from the assurance engagement. For example, in the case of an audit of financial statements, if the spouse of a member of the assurance team is an employee in a position to exert direct and significant influence on the preparation of the audit client's accounting records or financial statements, the threat to independence could only be reduced to an acceptable level by removing the individual from the assurance team.

When a close family member of a member of the assurance team is a director, an officer, or an employee of the assurance client in a position to exert direct and significant influence over the subject matter of the assurance engagement, threats to independence may be created. The significance of the threats will depend on factors such as:

- (a) The position the close family member holds with the client; and
- (b) The role of the professional on the assurance team.

The significance of the threat should be evaluated and, if the threat is other than clearly insignificant, safeguards should be considered and applied as necessary to reduce the threat to an acceptable level. Such safeguards might include:

- (a) Removing the individual from the assurance team;
- (b) Where possible, structuring the responsibilities of the assurance team so that the professional does not deal with matters that are within the responsibility of the close family member; or
- (c) Policies and procedures to empower staff to communicate to senior levels within the firm any issue of independence and objectivity that concerns them.

### CHAPTER 3

- 1. E
- 2. A
- 3. E
- 4. C
- 5. C

### SHORT ANSWER SOLUTIONS

- 1. The scope and objectives of internal audit vary widely and depend on the size and structure of the entity and the requirements of its management and directors. Generally, internal audit activities include one or more of the following:
  - (a) review of the accounting and internal control systems: the establishment of adequate accounting and internal control systems is a responsibility of management and the directors which demands proper attention on a continuous basis. Often internal audit is assigned specific responsibility for reviewing the design of the systems, monitoring their operation and recommending improvements thereto.

- (b) Examination of financial and operating information: this may include review of the means used to identify, measure, classify and report such information and specific enquiry into individual items including detailed testing of transactions, balances and procedures;
  - (c) Review of the economy, efficiency and effectiveness of operations including non financial controls of an organisation;  
Review of compliance with laws, regulations and other external requirements and with internal policies and directives and other requirements including appropriate authorisation of transactions; and
  - (d) Special investigations into particular areas, for example suspected fraud.
2. The internal audit function's objectives vary
- (a) according to the requirements of management and the directors and,
  - (b) generally, less emphasis is placed on materiality consideration.
3. In some cases, after considering the activities of internal audit, the external auditors may decide that internal audit work will have no effect on external audit procedures. Nevertheless, external auditors normally find it helpful to be aware of conclusions drawn by internal audit.

In the event that the external auditors conclude that the internal audit work is not adequate for their purposes,

- (a) they should extend their procedures beyond those original planned and
  - (b) ensure that sufficient appropriate audit evidence is obtained to support the conclusions reached.
4. To assess inherent risk
- (a) Auditors use their professional judgement to evaluate numerous factors
  - (b) Having regard to their experience of the entity from previous audits
  - (c) Any controls established by management to compensate for a high level of inherent risk and
  - (d) Their knowledge of any significant changes which have taken place.

Examples of the factors are:

At the entity level

- (a) The integrity of directors and management
  - (b) Management experience and knowledge and changes in management during the period,
  - (c) Unusual pressures on directors or management, such as tight reporting deadlines, market expectations or other circumstances might predispose them to misstate the financial statements,
  - (d) The nature of the entity's business
  - (e) Factors affecting the industry in which the entity operates
5. Control risk in the small business
- (a) Auditors must obtain an appropriate level of audit evidence to support their audit opinion regardless of the size of the entity.
  - (b) However, many internal controls relevant to large entities are not practical in the small business; for example, in small businesses accounting procedures may be performed by few persons who may have both operating and custodial responsibilities and, consequently, segregation of duties may be severely limited.
  - (c) Inadequate segregation of duties may, in some cases, be offset by other control procedures and close involvement of an owner or manager in strong supervisory controls where they have direct personal knowledge of the

- entity and involvement in transactions though this in itself may introduce other risks.
- (d) In circumstances where segregation of duties is limited and evidence of supervisory controls is lacking, the audit evidence necessary to support the auditors' opinion on the financial statements may have to be obtained entirely through the performance of substantive procedures and any audit work carried out in the course of preparing the financial statements.

#### SHORT ANSWER SOLUTIONS

1. Planning the work  
Planning is necessary for audits of entities of all sizes. The objectives of planning the audit work, which takes place before the detailed audit work begins, include:
  - (a) Ensuring that appropriate attention is devoted to the different areas of the audit;
  - (b) Ensuring that potential problems are identified; and
  - (c) Facilitating review.

Planning also assists

- (a) in the proper assignment of work to members of the audit team and
- (b) their briefing, and
- (c) in the co-ordination of work done by other auditors and experts, so that the audit may be performed in an efficient and timely manner.
- (d) In obtaining an understanding of the entity's affairs and,
- (e) all members of the audit team in understanding the nature and scope of the work they are to carry out before the audit field work starts.

Obtaining knowledge of the entity's business is required as an important part of planning the work. The auditors' experience with the entity and knowledge of its business assist in the identification of events, transactions and practices which may have a material effect on the financial statements.

Planning varies according to the size of the entity and the complexity of the audit.

2. Auditors need to discuss elements of the overall audit plan and certain audit procedures with
  - (a) the entity's management and staff, and
  - (b) with any audit committee in order to improve the effectiveness of the audit and to co-ordinate audit procedures with work of the entity's personnel, including internal auditors.

The overall audit plan and the detailed audit procedures to be performed, however, remain the auditors' responsibility. When such discussions occur, care is required not to compromise the independence and validity of the audit.

3. Work performed by audit staff is reviewed by other more senior audit staff or the audit engagement partner. Reviewers consider whether:
  - (a) the work has been performed in accordance with the firm's procedures and in accordance with the audit programme.
  - (b) The work performed is adequate in light of the results obtained and has been adequately documented;
  - (c) Significant audit matters have been raised for further consideration;
  - (d) Appropriate consultations have taken place and the results of such consultations have been documented;
  - (e) The objectives of the audit procedures have been achieved; and
  - (f) The conclusions are consistent with the results of the work performed.

Audit engagement partners perform an overall review of working papers. The review is sufficient for them to be satisfied that the working papers contain sufficient appropriate evidence to support the conclusions reached and for the auditors' report to be issued.

Although the review may not cover all working papers, it covers:

- (a) all critical areas of judgement, especially any relating to difficult or contentious matters identified during the audit.
- (b) audit evidence relating to high risk areas;
- (c) any other areas which the audit engagement partner considers important.

Audit engagement partners document the extent of their review and its timing so as to demonstrate that it was completed before the auditors' report was signed. Review notes recording questions or points raised in the course of the audit need not be retained at the end of the audit provided that the working papers have been updated thereto and, in particular, record the reasoning on all significant matters which require the exercise of judgement.

#### 4. **Monitoring**

Firms should appoint a senior audit partner to take responsibility for monitoring the time aspects of audits carried out by the firm.

The responsibility for monitoring the time aspects of audit performance is different from the responsibility for the establishment of quality control policy and processes. Wherever possible, the two responsibilities are undertaken by different senior audit partners.

The objective of monitoring time and costs to provide an independent assessment of:

- (a) the appropriateness of the time cost, billing and recovery of costs on audit;
- (b) whether the firm's own time and cost policy and processes have been applied.

The senior audit partner responsible for the monitoring process

- (a) develops procedures for the systematic review of time cost, billing and recovery on completed audit engagements.
- (b) develops appropriate course of action where significant variances between estimated time cost and actual cost are identified. Courses of action may involve communication of the findings within the firm and additional training.
- (c) ensures changes to the firm's policies and procedures and disciplinary action against those who repeatedly fail to comply with the firm's standards.

5. Auditors should apply analytical procedures at the planning stage to assist in:
- (a) understanding the entity's business,
  - (b) identifying areas of potential audit risk and
  - (c) planning the nature, timing and extent of other audit procedures.

Analytical procedures at this stage are usually based on interim financial information, budgets and management accounts. Discussions with management, focused on identifying significant changes in the business since the prior financial period, may also be useful.

Application of analytical procedures may indicate

- (a) aspects of the entity's business of which the auditors were previously unaware and
- (b) assist in determining the nature, timing and extent of other audit procedures.

## CHAPTER 5

- 1. D
- 2. B
- 3. C
- 4. D
- 5. E

## SHORT ANSWER SOLUTIONS

1. (a) The auditor should keep in mind the objectives of observing a physical inventory, namely:
- (b) To ascertain that the inventory exists.
  - (c) To observe that the count are accurate.
  - (d) Ensure the description of the inventory are accurate; and
  - (e) Its condition properly recorded.

The auditor makes and records test counts of inventory for the following purposes:

- (a) Confirm the accuracy of the client's counting and
- (b) Record evidence to corroborate the existence of the inventory for later tracing to the inventory summary sheet.
- (c) Random selection, independent counting and comparison with quantities recorded by the clients, provide evidence that all items on hand are accurately included in the client's recorded counts.

If the auditor's test counts disclose an unacceptable number of errors in a particular location, the client would ordinarily perform a recount of the inventory.

2. The factors that would influence the timing of the inventory are:
- (a) When the inventory is subject to significant volatility of movement of quantities, or if the control procedures for accounting for movement are ineffective, it should be counted at year-end;
  - (b) If those procedures are effective, the count can be taken before year-end or, if the client used cycle counts, on a staggered basis throughout the year;
  - (c) If the inventory is taken at one time, both client and auditor usually prefer a month in the last quarter of the fiscal year.

3. “Goodwill is the difference between the value of a business as a whole and the aggregate of the fair values of its separable net assets”. Separable net assets are those assets (and liabilities) which can be identified and sold (or discharged) separately without necessarily disposing of the business as a whole. They include identifiable intangibles. Other Definitions Include:
  - (a) The value attributable to a company’s average strength in areas such as technical skill and knowledge;
  - (b) The value of the business community’s attitudes to the entity;
  - (c) That part of the value of a business which arises from all its advantageous circumstances which generate earnings above an assumed norm (super profits).
4. Auditors should consider the following factors before observing the year-end inventories:
  - (a) Timing of inventories at various locations,
  - (b) Difficulty of observing them, and
  - (c) Number of counting teams the client provides.

The auditor should also observe inventory exercise so as to ascertain:

- (a) Whether supervisory personnel are present,
- (b) How planned recounting procedures are executed,
- (c) Whether cut-off procedures are performed,
- (d) How inventory count documents are controlled,
- (e) How individual areas or departments are controlled and cleared, and
- (f) Whether instructions are followed.

The auditor’s assessment of how effective the client’s reconciliations are would determine the nature, timing, and extent of many of the substantive tests of cash. Other factors are:

- (a) The adequacy of the accounting system,
- (b) The competence of employees conducting the reconciliations, and
- (c) The segregation of duties.

The more effective the auditor finds the client’s reconciliations to be, that is, the lower the assessed level of control risk, the less detailed the auditor’s reconciliation procedures have to be. Those procedures may range from simply reviewing the client’s reconciliations at year-end, if control risk has been assessed as low, to performing independent reconciliations covering the entire year using the proof of cash form. Generally, performing proof of cash reconciliation for the entire year is considered necessary only in special situations, such as when a defalcation is believed to have occurred. Between those two extremes falls the auditor’s judgmental discretion.

5. Kiting is a way of concealing cash shortages caused by a defalcation, such as misappropriating cash receipts that were perpetrated previously. It involves the careful and deliberate use of the “float” (the time necessary for a cheque to clear the bank it was drawn on). Drawing a cheque on one bank, depositing it in another bank just before year-end, so that deposit appears on the bank statement and the recording of the transfer in the receipts is not done until after year-end amounts to kiting. The float period will cause the cheque not to clear the bank it was drawn on until after year-end, and the amount transferred is included in the balances of both bank accounts. Since the transfer is not recorded as a receipt or a disbursement until the following year, it will not appear as an outstanding cheque or a deposit in transit on the reconciliation of either bank account. The effect is to increase receipts per the bank statement; if the misappropriation of cash receipts and the kiting take

place in the same period, receipts per the bank statement will agree with receipt per the cash receipts journal at the date of the bank reconciliation. (If the misappropriation of cash receipts takes place in the period before the kiting, a proof of cash may also reveal the kiting). Kiting requires that the transfer process be repeated continually until the misappropriated funds have been restored. Kiting could have a wider meaning to encompass writing cheques against inadequate funds with the intent of depositing sufficient funds later, but before the cheques clear the book.

## SHORT ANSWER SOLUTIONS

1. The Auditor-General for the Federation is appointed by the President on the recommendation of the Federal Civil Service Commission subject to confirmation by the Senate. He is appointed in accordance with the provision of Sec 86 of the Constitution of Federal Republic of Nigeria.
2. A person shall act in the office of the Auditor-General for a period not exceeding six months. Any extension of the acting period must be with the sanction of a resolution of the Senate.
3. Public Accounts Committee is empowered to:
  - (a) Examine such audited accounts of the Federation and of all offices and courts of the Federation and the Auditor-General report thereon as may be referred to it.

- (b) Examine:
  - (i) The Accounts and reports of ministries and Departments of the Government of the Federation.
  - (ii) The Audited Accounts of statutory corporations, boards and such other government bodies.
  - (iii) The causes which led to, or might have led to, any excess over approved appropriations.

In the performance of the above-named functions, the PAC is further empowered to:

- (a) Procure all such evidence, oral or written and examine such persons as it may deem necessary or desirable.
- (b) Require any person to produce any books, documents or records, as it may deem necessary and desirable.

The composition of PAC is geared towards functioning like a court of enquiry empowered to look into civil and criminal cases as regards allocation and disbursement and use of public funds by public officers who have been entrusted with the responsibility of judiciously using the funds, carrying out government programmes, and recommending appropriate actions against officers found wanting in carrying out his duties.

#### 4. **Value-for-money audit**

This is also known as Performance Audit by British classification. It is also called Economy and Efficiency Audit. The essence is to determine whether an entity is acquiring, managing or utilizing its resources (staff, building materials space etc.) in an economical and efficient manner and the causes of any inefficiencies or uneconomical practices. Value for Money Audit is defined as an objective professional and systematic assessment of:

- (a) The nature and function of an authority's managerial systems and procedures.
- (b) The economy and efficiency with which its services are processed.
- (c) The effectiveness of its performance in achieving objectives.

#### **Phases of value-for-money audit**

- (a) Proposal Phase which aims at justifying the study of a particular area, authorise, initial resources and determine further considered initial analysis of financial statistics, audit costs and other performance indicators.
- (b) The Scooping Phase, which aims at gathering sufficient details. It embraces, gathering working information, studying related legislations, testing controls act. At this stage there will be comprehensive management systems and objective review.
- (c) Planning Phase, aims at planning to fully develop identified potentials. The planning and control processes are properly analysed and methods of reviewing operating results are examined through analysis of control and reporting systems.
- (d) Implementation Phase: aims at reporting the audit results to those responsible for receiving or acting on them.
- (e) Evaluation Phase: is to evaluate the audit result, methodology and performance of the audit staff. The focus here will be assessment of efficiency and effectiveness review. Value-for-money audit aims to identify ineffectiveness in the system and underutilisation of resources.

5. An internal auditor in the public sector is responsible for:
- Reviewing, evaluating and reporting on the adequacy or otherwise of the controls installed and operated and the extent to which they assure propriety, security, completeness and accuracy of operations of the establishment;
  - Performing the responsibility imposed by the Civil Service Reforms. The Reforms state that he shall carry out complete and continuous audit of accounts and records of revenue and expenditure, plant stores and assume the duty of Stock Verifier where none exists in an establishment;
  - Confirmation of reliability and accuracy of extracted financial information to management.

## CHAPTER 8

- C
- D
- D
- D
- C

## SHORT ANSWER SOLUTIONS

- Accounting Standards require that potential losses due to uncertainties be classified as “probable,” “reasonably possible,” or “remote.”:
  - If a loss is probable, management must provide for it in the financial statements, either by accruing it if the amount is susceptible to reasonable determination or by disclosing it if the amount cannot be reasonably estimated. No explanatory language is needed in the auditor’s standard report if the auditor agrees that the provision or disclosure is appropriate; if the amount cannot be reasonably estimated, however, the auditor should add an explanatory paragraph to the report because of the uncertainty.
  - Likewise, a “remote” uncertainty would not require an explanatory paragraph in the standard report.
  - If a material loss is “reasonably possible,” however, management is required to disclose the uncertainty in the notes to the financial statements, including an estimate of the amount, and the auditor would normally add an explanatory paragraph to the report.

For instance, if the outcome of a matter having an impact on the financial statements depends on the decisions of others, it may be impossible for management and the auditor to reach a valid conclusion about it because competent evidential matter simply does not exist. The most common events of that kind are lawsuits and tax disputes. The mere existence of an unresolved question does not relieve management or the auditor of the responsibility for forming a judgement about the outcome.

The outcome of many tax disputes, for instance, can be reasonably determined by an informed analysis. In some cases, however, the best possible efforts result in a judgement that no valid conclusion can be formed. In that event, the auditor should describe the uncertainty in a separate explanatory paragraph following the opinion paragraph of the report, along with an indication that its outcome cannot presently be determined. The separate paragraph may be shortened to refer to disclosures made in a note to the financial statements.

2. When Required

The representation letter should be addressed to the auditor and should be dated no earlier than the date of the auditor's report, but no later than the report release date. Both the chief executive and chief financial officers should ordinarily sign representation letters. Other members of management may sign the letter instead, however, if the auditor is satisfied that they are responsible for and knowledgeable about the matters covered by the representations.

3. Subsequent Events an Auditor Must Consider

After the financial statements and audit report have been issued an auditor may become aware of new information regarding the client. If the new information refers to:

- (a) A condition that did not exist at the date of the audit report, or
- (b) Final resolutions of contingencies or other matters disclosed in the financial statements or in the auditor's report, then the auditor has no further obligation.

If, however, the new information:

- (i) Relates to facts existing at the date of the audit report; and
- (ii) Would have affected the financial statements or
- (iii) Would have affected the auditor's report had the auditor been aware of them, the auditor is obligated to pursue the matter.

The auditor has obligation in those circumstances even if he has resigned or has been discharged.

While the distinction between the two kinds of new information is conceptually clear, in practice it is often difficult to tell, at least initially, whether the new information refers to a new or a pre-existing condition. The auditor should ordinarily discuss the information with the client and request that the client make any necessary investigations.

4. Definition of an Expert

An expert is a person or firm possessing special skill, knowledge and experience in a particular field other than accounting and auditing. An expert is synonymous with a "specialist". The expert may be engaged by the client or by the auditor.

- (a) Circumstances under which the Auditor may use the work of an Expert, (any four):
  - (i) Where the auditor has difficulty in ascertaining the value of certain assets; e.g. land and buildings, plant and machinery, works of art, precious stones and other solid minerals.
  - (ii) Where the auditor is unable to determine qualities or physical conditions of assets e.g. minerals in stockpiles, underground mineral and petroleum resources and the remaining useful life of plant and machinery.
  - (iii) Where determination of values of certain assets is by means of special techniques or methods outside the training of the auditor e.g. an actuarial valuation.
  - (iv) Where there is need for measurement of work completed and work in progress for the purpose of revenue recognition and the techniques for measurement are outside the accounting profession.
  - (v) Where the auditor is unable to interpret legal documents such as agreements, statutes and regulations.

A general outline of the specific items the auditor expects the expert's report to cover

- ◆ the intended use of the expert's work by the auditor including the possible communication to the client of the expert's identify and extent of involvement.
  - ◆ documentation or further information required as audit evidence.
  - (vi) Evaluation of the work of the expert: the auditor should ensure that the expert's work constitutes appropriate audit evidence in support of the financial information. In this regard, he should consider:
    - ◆ The source of the data – To ensure it is appropriate in the circumstances
    - ◆ The assumptions and methods used – to ensure their consistency with prior period. The results of the expert's work – in the light of the auditor's overall knowledge of the business and of the result of his audit procedures.
  - (vii) Audit Reporting: The auditor should satisfy himself that the substance of the Expert's findings, advice or opinion is properly reflected in the financial statements.
- (b) Factors determining the need for an expert
- (i) The materiality of the item being examined in relation to the financial information as a whole. The persuasion to use the work of an expert will be greater where the item is material.
  - (ii) The nature and complexity of the item including the risk of error therein.
  - (iii) The availability of other audit evidence available with respect to the item.
  - (iv) The time and cost of obtaining the expert advice in relation to the value to be derived.
  - (v) The skills and competence of the expert – the expert's professional certification, license or membership of appropriate professional body and the experience and reputation of the expert in the relevant field.
  - (vi) the objectivity of the expert – the risk that an expert's objectivity will be impaired increases when the expert is employed by the client or is related in some other manner to the client. For example, by being financially dependent on the client or having an investment in the client organisation.
- (c) Procedures to be followed by the auditor when the works of others is required
- (i) Communication with the Expert: If while planning the audit, the auditor intends to use the work of an expert, he should communicate with the expert to confirm the terms of the expert's engagement. In particular, the auditor should ascertain the following:
    - ◆ The scope and objective of the expert's work
    - ◆ The expert's relationship, if any, with the client
    - ◆ The extent of the expert's access to appropriate records and files.
    - ◆ The assumptions and methods intended to be used by the expert and if appropriate their consistency with those used in a prior period.
    - ◆ The auditor should also provide the expert with the following relevant information.

5. Circumstances for departure from unqualified opinions  
SAS 58, *Reports on Audited Financial Statements*, classifies departures from the standard unqualified report as qualified opinions, adverse opinions, and disclaimers of opinion. These departures are:

#### Qualified opinions

There are two basic reasons for qualifying an opinion, viz:

- (a) Limitations on the scope of the audit and
- (b) Departures from GAAP.

#### Scope limitations

An audit can be limited:

- (a) by circumstances beyond the client's control that preclude the auditor from employing the auditing procedures that would otherwise be considered necessary, or
- (b) by client-imposed restrictions.

#### Circumstances precluding necessary auditing procedures

Sometimes an auditor is not able to carry out procedures that customarily are considered necessary in the circumstances as a basis for rendering unqualified opinion. In most instances, the auditor is able to design and perform alternative

procedures that provide sufficient assurance that the relevant audit objectives have been achieved. Those common instances in which the auditor might not be able to perform alternative procedures are when conditions make it impracticable or impossible to confirm accounts receivable or observe inventories. If an auditor cannot obtain satisfaction by means of alternative auditing procedures, the auditor should:

- (a) describe the problem and
- (b) modify the standard report, or
- (c) if the auditor decides to express a qualified opinion (rather than disclaim an opinion), the problem should be described in a separate paragraph and referred to in both the scope paragraph and the opinion paragraph.

#### Client-Imposed restrictions

The most common client-imposed restrictions are limitations preventing observation of physical inventories, confirmation of accounts receivable, or examination of a subsidiary. Usually, if scope is limited by client-imposed restrictions, auditors should disclaim an opinion because the client's election to limit the auditor's scope implies also an election to limit the auditor's responsibility. On rare occasions, if a client-imposed scope limitation applies to an isolated transaction or a single account, a qualified opinion may be acceptable.

8. Auditor's evaluation of doubt about a client going concern status If the auditor concludes there is substantial doubt about the entity to continue as a going concern for a reasonable period of time the auditor should:
- (a) determine that this fact is appropriately disclosed in the financial statements, and
  - (b) reflect that conclusion in explanatory paragraph.

In a properly planned audit, it should not be necessary to design auditing procedures specifically directed at the going concern issue. The results of auditing procedures designed and performed to achieve other audit objectives should be sufficient for that purpose.

For example, conditions and events that could raise doubts may be identified through some of the following procedures:

- (a) analytical procedures;
- (b) review of subsequent events;
- (c) review of compliance with the terms of debt and loan agreements;
- (d) reading of minutes of meetings of stockholders, board of directors, and important committees of the board;
- (e) inquiry of the entity's lawyers about litigation, claims and assessments; and
- (f) confirmation with related and third parties of the details of arrangements to provide or maintain financial support.

In considering the evidence provided by those procedures, it may be necessary for the auditor to obtain additional information about conditions and events identified that could create substantial doubt about the entity's ability to continue as a going concern. SAS 59, *The Auditor's Consideration of an Entity's Ability to Continue as a Going Concern*, gives the following examples of such conditions and events, some of which are interrelated:

*Negative trends:* Characterised by recurring operating losses, working capital deficiencies, negative cash flows from operating activities and adverse key financial ratios are the order of the day.

*Other indications of possible financial difficulties* – Examples are: default on loan or similar agreements, arrearages in dividends, denial of usual trade credit from suppliers, restructuring of debt, non-compliance with statutory capital requirements, need to seek new sources or methods of financing or to dispose of substantial assets (outside the course of business).

*Internal matters* – Examples: work stoppages or other labour difficulties, substantial dependence on the success of a particular project, uneconomic long-term commitments, needs to overhaul operations.

*External matters that have occurred* –

Examples are:

Legal proceedings, legislation, or similar matters that might jeopardise an entity's ability to operate,

- (a) loss of a key franchise, license, or patent; loss of a principal customer or supplier;
- (b) uninsured or underinsured catastrophe such as fire, flood, drought, earthquake.
- (c) If substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time, auditors should:
- (d) obtain information about management's mitigation plans and
- (e) assess the likelihood that such plans can be effectively implemented.

Management's plans might include:

- (a) plans to dispose of assets, reduce or
- (b) delay expenditures, borrow money or
- (c) restructure debt, or increase ownership equity.

The auditor should:

- (a) evaluate those plans;
- (b) consider whether there is adequate evidence supporting management's ability to carry out the plans. For example, plans to dispose of assets could be difficult or impossible to accomplish;

- (c) ascertain if there are restrictive covenants in loan agreements limiting such disposals;
- (d) request management to provide information about significant management's plans and
- (e) consider whether there is adequate support for the significant assumptions underlying the plans.

After evaluating management's plans, auditor should conclude whether substantial doubt exists about the entity's ability to continue as a going concern for a reasonable period of time.

If the auditor concludes there is substantial doubt, he or she should then consider

- (a) the adequacy of financial statement disclosure about the entity's possible inability to continue as a going concern and
- (b) include an explanatory paragraph (following the opinion paragraph) in the audit report to reflect that conclusion.

## CHAPTER 9

1. B
2. B
3. (a) An assertion based engagement  
(b) A direct reporting engagement.
4. D
5. E.
6. There can actually never be enough due diligence in evaluating an investment, but there are certain essentials that can lessen the investor's risk and possibly justify reducing the scope of due diligence. They include the following:
  - (a) Stable and proven management.
  - (b) Audited financial statements with short, easily understood notes.
  - (c) History of consistent earnings.
  - (d) Few subsidiaries, divisions or joint ventures.
  - (e) Strong market position.
  - (f) Absence of material litigation.
  - (g) No real estate or operations with potential environmental problems.
  - (h) Earnings primarily from operations.
  - (i) Not dependent upon one or few customers or clients.
  - (j) No intangible assets.
  - (k) No inter-company transactions.
  - (l) No discontinued operations or restructuring.
  - (m) Little or no extraordinary income or expenses.
  - (n) Strong internal controls.
  - (o) Few and readily accessible locations.

The absence of the above list will increase the signal for maximum due diligence.

7. In the perspective of private-sector world of business and finance, the term "due diligence" refers to the process through which an investor researches an organisation's financial and organisational health to guide an investment decision. The decision to fund or not to fund is based upon a balance of objective data analysis, insight into the general state of organisational health and stability, and intuition. A due diligence review is the process through which all the factors that make up that equation are uncovered and understood. It is the process in which a program officer seeks the truth about an organisation.

Due diligence is a somewhat technical phrase used to describe a range of assignments, legal obligations, reports and investigations which take place in business, manufacturing and law. Its most frequently heard version is the one pertaining to business, where due diligence refers to the steps taken by venture capitalists before investing a round of capital in a start-up, the ongoing investigation as to how the funds are being distributed, or the precautionary steps taken by a larger company in deciding to acquire a smaller company.

8. Complexities in business and changes in social and legal expectations have enhanced the need for forensic auditing. Wherever a potential loss, real financial loss, or risk of loss is perceived, a forensic audit may be commissioned. It can be applied in the following areas;
  - (a) Corporate investigations. Organisations frequently are faced with circumstances of possible wrongdoings that may require investigations. The forensic auditor assists in investigating allegations ranging from kickbacks and wrongful dismissals to internal situations involving allegations of management or employee wrongdoing.
  - (b) Litigation Support. In cases of loss of profit, construction claims, product liability, shareholder disputes, bankruptcies and breach of contracts, forensic auditors assist counsel in investigating and assessing the integrity and amount relating to such cases.
  - (c) Criminal matters. In criminal matters, forensic auditors as expert witnesses are increasingly important in court cases in verity of situations such as arson, scams, fraud, vendor frauds, customer frauds, investment scams, and stock market manipulations.
  - (d) Insurance claims. To assess the integrity and the quantum of claim, the assistance of the forensic auditor is often required.
  - (e) Government. Forensic accountants assist governments to achieve regulatory compliance by ensuring that companies follow the appropriate legislation.
9. Most aspects of forensic audit fall outside the normal training of financial auditors. The following qualities are necessary to perform adequately as a forensic auditor.
  - (a) Ability to identify fraud with minimal initial information.
  - (b) Identification of financial issues. When confronted with situations arising from a complain, allegation, rumour, etc., he should be able to quickly identify the financial issues significant to the matter.
  - (c) Knowledge of investigation techniques.
  - (d) Knowledge of evidence. He must understand what constitute evidence. For example the meaning of “best” and “primary” evidence, the rules of evidence in court, and what constitute evidence in court.
  - (e) Interpretation of financial information.
  - (f) Presentation of financial findings. He must have the ability to communicate findings in a language that must be understandable by a layperson and without any ambiguity.
  - (g) Investigative skills. Investigative skills are needed for litigation support.
  - (h) Investigative mentality. The forensic auditor must, along with accounting skill, develop an investigative mentality that allows him to go beyond the limits established generally accepted auditing standards. For example;
    - (i) Scope is not restricted as a result of materiality.
    - (ii) Sampling is not recommended.
    - (iii) Non assumption of integrity of management.

10. The following steps are adopted by the forensic auditor in performing an audit:
- (a) Verify compliance with regulatory, legal and evidential matters;
  - (b) Review documents related to legal and general business functions;
  - (c) Test the organisation's motivational and ethical climate;
  - (d) Document management, administrative, and organisational policies, procedures, and practices;
  - (e) Gather and preserve evidence to corroborate asset losses, fraudulent transactions;
  - (f) Establish accounting, audit, and internal control;
  - (g) Conduct a review of internal controls;  
Assess the strengths and weaknesses of those controls;
  - (h) Design scenarios of potential fraud losses based on identified weaknesses in internal controls;
  - (i) Identify questionable and exceptional transactions;
  - (j) Identify questionable and exceptional account balances and variations;
  - (k) Distinguish between simple and human errors and omissions in entries and fraudulent entries;
  - (l) Follow the flow of funds that support documents;
  - (m) Follow the flow of funds into and out of an organisation's bank account;
  - (n) Search for underlying support documents for questionable transactions;
  - (o) Review such documents for peculiarities, examples are fake billings, destruction of data, improper account classification, irregularities in financial data, substitution of copies of documents for the original; and
  - (p) Document and report fraud loss for criminal, civil, or insurance claims.

## ***APPENDIX II***

# ***COMPREHENSIVE QUESTIONS AND SUGGESTED SOLUTIONS***

## **MULTIPLE CHOICE QUESTIONS AND SOLUTIONS**

### **SECTION A: Multiple-choice questions**

Candidates are required to choose the single most appropriate answer from the following:

- (1) The responsibility for the fairness of the representations made in financial statements is that of
- (a) Independent auditor
  - (b) Audit committee
  - (c) Client's management
  - (d) External auditor.

Answer **c**

- (2) An auditor, while performing an audit, strives to achieve independence in appearance in order to
- (a) Maintain public confidence in the profession
  - (b) Comply with the generally accepted standards of field work
  - (c) Become independent in fact
  - (d) Reduce audit risk and liability.

Answer **b**

- (3) An independent auditor must act without bias in relation to the financial statements of a client in order to
- (a) Comply with the Companies and Allied Matters Act
  - (b) Attain the impartiality necessary for an expression of the auditor's opinion
  - (c) Maintain the appearance of separate interests on the part of the auditor and the client
  - (d) Avoid criticism and possible litigation from creditors and stockholders.

Answer **b**

- (4) Prior to accepting an audit engagement, an incoming auditor should make specific inquiries of the outgoing auditor regarding the outgoing auditor's
- (a) Understanding as to the reasons why the audit appointment should not be accepted
  - (b) Understanding of all matters of continuing accounting significance
  - (c) Awareness of departure in the application of generally accepted accounting principles over time
  - (d) Update of any subsequent events since the outgoing audit report was issued.

Answer **a**

- (5) In relation to maintaining its quality-control objectives on assigning personnel to engagements, a firm of independent auditors may use policies and procedures such as
- (a) Having for new entrants a recruitment policy that includes minimum standards of academic preparation and accomplishment
  - (b) Retaining senior qualified personnel to provide advice on accounting or auditing questions for the entire duration of the engagement
  - (c) Making available to auditing personnel current accounting and auditing literature for research and reference purposes throughout the engagement
  - (d) Requiring timely identification of the staffing requirements of specific engagements so that appropriate levels of qualified personnel can be allocated.

**Answer d**

- (6) Roberts & Co., a large international accounting firm, is to have an “external peer review.” The peer review will most likely be performed by
- (a) Audit review staff of the Institute of Chartered Accountants of Nigeria
  - (b) Employees and partners of Roberts & Co., who are not associated with the particular audits being reviewed
  - (c) Employees and partners of another firm of chartered accountants
  - (d) Audit review staff of the Securities and Exchange Commission.

**Answer c**

- (7) It is the responsibility of an independent auditor to design the audit to provide reasonable assurance of detecting errors and irregularities that are material to the financial statements. Which of the following, if material, constitutes an irregularity as defined in Statements on Auditing Standards
- (a) Mistakes in the application of accounting principles
  - (b) Clerical mistakes in the accounting data underlying the financial statements
  - (c) Misappropriation of an asset or groups of assets during the period covered by the audit
  - (d) Misinterpretation of facts that existed when the financial statements were prepared.

**Answer a**

- (8) There have been regular discussions on the auditor’s responsibility in relation to material errors and irregularities. Which of the following statements best describes the auditor’s responsibility regarding the detection of material errors and irregularities
- (a) The auditor needs to extend auditing procedures to detect material errors and irregularities if the audit indicates that they may exist
  - (b) The auditor may be held responsible for the failure to detect material errors and irregularities only when such failure results from the non-application of generally accepted accounting principles
  - (c) The auditor needs to extend auditing procedures to detect unrecorded transactions even if there is no evidence that material errors and irregularities may exist
  - (d) The auditor may be held responsible for the failure to detect material errors and irregularities only when the auditor fails to confirm receivables or observe inventories.

**Answer a**

- (9) If in the course of an audit, an auditor believes that the client may have committed illegal acts, which of the following actions should be taken immediately by the auditor
- (a) Extend the planned auditing procedures to ascertain whether the suspected illegal acts may have a material effect on the financial statements
  - (b) Communicate the findings to members of the audit committee of the board of directors of the nature of the acts and request that they give guidance with respect to the approach to be taken by the auditor
  - (c) Obtain the client's counsel and the auditor's counsel to determine how the suspected illegal acts will be communicated to the stockholders and other interested parties
  - (d) Communicate with the client's management and consult with the client's legal counsel or other specialists, as necessary, to obtain an understanding of the nature of the acts and their possible effects on the financial statements.

Answer **a**

- (10) An auditor would most likely withdraw from an engagement where the client has committed an illegal act when the
- (a) Illegal act has material financial statement implications
  - (b) Illegal act has received widespread publicity
  - (c) Illegal act affects the auditor's ability to rely on management representations
  - (d) The auditor cannot reasonably estimate the effect of the illegal act on the financial statements.

Answer **d**

- (11) In the course of an audit, audit evidence may come in different forms with different degrees of persuasiveness. Which of the following audit evidences is the least persuasive type of evidence
- (a) Vendor's invoice
  - (b) Bank statement obtained from the client
  - (c) Computations made by the auditor
  - (d) Pre numbered sales invoice of client

Answer **b**

- (12) Which of the following statements is generally correct about the competence of evidential matter
- (a) Accounting data alone may be considered sufficient competent evidential matter for the auditor to issue an unqualified opinion on financial statements
  - (b) In order to be competent, evidential matter must be either valid or relevant, but need not be both
  - (c) The auditor's direct personal knowledge, obtained through observation and inspection, is more persuasive than information obtained indirectly from independent outside sources
  - (d) Competence of evidential matter refers to the amount of corroborative evidence to be obtained.

Answer **d**

- (13) Which of the following procedures would an auditor most likely rely on to verify management's assertion of completeness
- (a) Compare a sample of vendors' invoices with related purchase orders
  - (b) Compare a sample of shipping documents with related sales invoices
  - (c) Observe the client's distribution of payroll checks
  - (d) Confirm a sample of recorded receivables by direct communication with the debtors.

Answer **d**

- (14) An example of an analytical procedure is the comparison of
- (a) Computer generated data with similar data generated by a manual accounting system
  - (b) Financial information with similar information regarding the industry in which the entity operates
  - (c) Results of a statistical sample with the expected characteristics of the actual population
  - (d) Recorded amounts of major disbursements with appropriate invoices.

Answer **b**

- (15) The auditor's working paper that reflects the major components of an amount reported in the financial statements is referred to as
- (a) Extended trial balance
  - (b) Audit control workbook
  - (c) Lead schedule
  - (d) Supporting schedule.

Answer **c**

- (16) Working papers which record the procedures used by the auditor to gather evidence should be
- (a) Designed to meet the circumstances of the particular engagement
  - (b) Considered the primary support for the financial statements being audited
  - (c) Destroyed when the audited entity ceases to be a client
  - (d) Viewed as the connecting link between the books of account and the financial statements.

Answer **a**

- (17) The independent auditor's principal reason for understanding the internal control structure is
- (a) To maintain a state of independence in mental attitude in all matters relating to the audit
  - (b) To obtain a measure of assurance of management's efficiency
  - (c) To comply with generally accepted accounting principles
  - (d) To determine the nature, timing, and extent of tests to be performed.

Answer **d**

- (18) Which of the following might, in itself, not form a valid basis for an auditor to decide to omit a test
- (a) Difficulty and expense involved in testing a particular item
  - (b) Auditor's assessment of control risk
  - (c) Relative risk involved
  - (d) Relationship between the cost of obtaining evidence and its usefulness.

Answer **a**

- (19) Which of the following is not a typical analytical procedure
- (a) Study of relationships for the financial information with relevant non financial information
  - (b) Comparison of the financial information with similar information regarding the industry in which the entity operates
  - (c) Comparison of recorded amounts of major disbursements with appropriate invoices
  - (d) Comparison of the financial information with budgeted amounts.

Answer **c**

- (20) A basic premise underlying analytical procedures is that
- (a) These procedures can not replace tests of balances and transactions
  - (b) Statistical test of financial information may lead to the discovery of material misstatements in the financial statements
  - (c) The study of financial ratios is an acceptable alternative to the investigation of unusual fluctuations
  - (d) Relationships among data may reasonably be expected to exist and continue in the absence of known conditions to the contrary.

Answer **b**

## SECTION B

Some of the questions in this section are reproduced or adapted from past examinations of the Institute of Chartered Accountants of Nigeria, as indicated.

### QUESTION 1

Tee & Co., an internationally affiliated firm of Chartered Accountants, act as a firm of auditors to two major insurance companies, which are in cut-throat competition with each other.

#### Required:

- (a) Comment on the above scenario in line with the rules of professional conduct of members as regards conflict of interest. (9 Marks)
- (b) State in detail what your opinion would be if it were discovered that the engagement partner had 20,000 ordinary shares in one of the companies. These shares were acquired before the firm commenced the audit of the company. The partner also held a life assurance policy taken out before the audit engagement. (5 Marks)

**(Total 14 Marks) – May 2002 QUESTION**

### ANSWER TO QUESTION 1

- (a) The Chartered Accountant should, according to the rules of professional conduct of members, take all reasonable steps to manage any possible conflict of interest of the two clients thereby avoiding any adverse circumstances. Meanwhile sufficient disclosure should be made to the two clients of safeguards proposed to avoid the interest of one client adversely affecting that of the other. Some of the safeguards include:
  - (i) Use of different partners and staff for different engagements.
  - (ii) Standing instructions and other steps necessary to prevent the leakage of confidential information between different teams and sections within the firm.
  - (iii) Regular review of the audits by a senior partner not personally involved with either client audit.

It is believed that nothing per se is wrong with Tee & Co being the auditors to the two Insurance Companies but where the continuance of the engagement would, even with safeguards, materially prejudice the interest of any or the two clients, the engagement of one or both should be discontinued.

On the other hand, the clients themselves may make an informed decision of retaining the firm considering the disclosure or safeguards. But where adequate disclosure is not possible, mainly by reason of constraints or confidentiality the firm should discontinue with one or both engagements.

- (b) Apart from the fact that if the information about the shareholding comes to the knowledge of the competing company, there is bound to be belief of conflict of interest and undue advantage, holding shares in a client company would amount to insider dealing or a “related party transaction”. But since the shares had been required before the audit engagement the shares should be disposed of by the engagement partner otherwise it would also constitute an “insurmountable self interest threat”

In similar manner since the partner held the life insurance policy before the commencement of the engagement, it is believed that there is nothing wrong with him continuing to hold the policy if it is in the normal course of business and on normal commercial terms. The engagement partner cannot take out a new policy with such a client. This will be unethical.

## QUESTION 2

- (a) Clients have an undisputable right to appoint their auditors or choose their professional advisers. They may seek professional advice from even more than one professional accounting firm, as required. However, there are legitimate professional reasons why a professional accounting firm might not wish to accept an appointment as Auditors to a prospective client. Enumerate these reasons. (6 Marks).
- (b) Hamzat, Chukwu & Co. a big auditing firm has been appointed Joint auditors to a commercial bank. Some years later, the bank decided to maintain Hamzat, Chukwu & Co as the sole firm of auditors. State the professional duty required of Hamzat, Chukwu & Co. before accepting the appointment on each occasion. (4 Marks)
- (c) Section 360 (3) of the Companies and Allied Matters Act 1990 confers on the auditors the right to require from the officers of a company any information and explanations deemed necessary for the performance of the audit. In addition, the auditor can obtain third party certificates to complement evidence he has obtained.

### Required:

- (i) What are third party certificates? (2 Marks)
- (ii) Briefly state reasons why certificates are obtained from third parties. (2 Marks)
- (iii) Describe three types of third party certificates. (6 Marks)
- (Total 20 Marks) – May 2003 QUESTION 1)**

## ANSWER TO QUESTION 2

- (a) **Acceptance of new appointment as auditors**

It has been established that in the interest of the investing public and professional practice, prospective auditors should communicate with the existing auditors whether there is any consideration, which may affect his decision to take up appointment as the new auditors or advisers.

The reasons why a professional firm may decide not to accept appointment as auditor include.

- (i) If permission is refused by the client for communication with the existing auditor.
- (ii) If the existing auditor informs the prospective firm that he is not authorised to discuss the client’s affairs with him.
- (iii) The reasons for the change as highlighted by the client are not in accordance with the facts.

- (iv) The proposal to replace the existing auditor arose because he has carried out his duties in the face of opposition or the existence of important difference of principle, or practice between him and the client.
- (v) The client, its directors or employees might have been guilty of some unlawful act or default, or that any aspect of their conduct which is relevant to the carrying out of the audit assignment ought in the opinion of the existing auditor, to be investigated further by an appropriate authority.
- (vi) The prospective auditor has serious doubts regarding the integrity of the directors and/or senior managers of the company.
- (vii) The client's directors or staff had deliberately hindered the performance of the existing auditor or limited or attempted to limit the scope of the audit.
- (viii) If any partner, staff or close relation of the new firm has financial and/or any beneficial interest in the prospective client.
- (ix) The client's directors and staff had defrauded or attempted to defraud government departments e.g. the Federal Inland Revenue Services, the Nigerian Customs Service etc. and wanted to cover up by changing the existing auditor.

(b) **Addition to or change of Auditors**

With the appointment of Messrs Hamzat, Chukwu & Co. as joint auditors, the first professional duty required of them is to formally communicate with the existing auditors (joint auditors) seeking information which could influence their decision as to whether or not they may accept the appointment as if they have been nominated to "take over" an existing audit assignment.

If a joint audit appointment becomes a sole appointment, the surviving auditor should communicate formally with the other joint auditor as in the case of a new appointment.

(c) **Third Party Certificates**

- (i) Third party certificate is external audit evidence obtained by the auditor from an independent outside source. It is normal practice for the auditor to accept certificates in respect of certain classes of assets, liabilities and other representations made by management in respect of the affairs of a company. These certificates provide more assurance in respect of verification work.

- (ii) **Reasons why third party certificates are obtained**

The auditor obtains third party certificates to complement/corroborate evidence he has obtained because evidence obtained from independent third party is more reliable. By the auditor's operational standards, he is required to obtain relevant, reliable and sufficient evidence to enable him draw valid conclusion relating to the audit.

- (iii) **Types of Certificates**

- (a) **Bankers' Certificates**

Bankers' certificates of balances are usually obtained in respect of all bank balances and other commitments of the client. These certificates confirm the existence and ownership of the account balances as well as confirm the right of the company to draw from the account and the limit of any overdraft facilities and other commitments. Bank certificates must be sent directly to the auditor by the bank, stating clearly the date in respect of which they were issued.

- (b) **Stock Certificates**

The problems inherent in stocks make it very difficult for the auditor to form a conclusive opinion as to the value at which stock was stated. Hence when stocks are held with third party the auditor often requires the holder

to confirm in writing that stocks are held by them and under what condition such stocks are held.

(c) **Certificate of Investment**

Investment certificates and other vital documents of title are often lodged with bankers or other third parties for direct evidence of the existence of such investments. It is therefore, the usual practice for the auditor to accept the banker's or holder's certificate to the effect that the investment certificates are held on behalf of the client and are free from any charges/lien whatsoever.

(e) **Solicitor's Certificate**

Sometimes companies are engaged in one type of litigation or another as at the balance sheet date. This may give rise to a contingent liability which might be difficult to ascertain. The auditor therefore obtains a solicitor's certificate which would contain details of the possible outcome of the litigation and the extent, if any of the costs that may arise there from.

(f) **Valuers' Certificates**

Certificates are at times required from architects, estate valuers, engineers and other professional experts to confirm completion level of construction work in progress, machinery installation, research and development project, special products work in progress, jewellery and other solid mineral products etc.

### QUESTION 3

Auditing firms do not always describe themselves as auditors. They describe themselves as "Chartered Accountants" because apart from auditing, they also render other services to their clients.

Describe FIVE other services, which audit firms provide for their clients in addition to auditing.

**(16 Marks) - November 2003 QUESTION 1)**

### ANSWER TO QUESTION 3

Candidates should consider the latest pronouncements on conflicts of interest in situations where auditors provide services to their clients.

The other services which an audit firm may render, provided the issue of conflict of interest is properly considered, include any five of the following:

**(a) Taxation**

- (i) Preparation of tax and capital allowances computations
- (ii) Rendition of advisory services regarding tax matters e.g. minimization of taxes payable and tax planning.
- (iii) Filing of tax returns and collection of tax clearance certificates on behalf of clients.
- (iv) Investigation of PAYE, VAT and corporation tax frauds on behalf of tax authorities.

**(b) Financial Consulting**

- (i) Advising on investment options and optimum returns.
- (ii) Monitoring liquidity management and budgetary control for clients
- (iii) Reorganisation and restructuring.

**(c) Receivership, Liquidation and Trusteeship**

- (i) Handling the winding up of companies to settle creditors and shareholders.

- (ii) Receivership for debenture holders and other creditors of a company in insolvency situations.
- (iii) Acting as trustees.

**(d) Investigation**

- (i) Investigating alleged frauds.
- (ii) Valuation of shares and businesses.
- (iii) Preparing prospectus reports for public issues.
- (iv) Reporting on profit forecasts.
- (v) Due diligence

**(e) Accounting Services**

- (i) Writing up books of accounts from source documents
- (ii) preparing financial statements from books of accounts
- (iii) Advising on:
  - ◆ Accounting and internal control systems,
  - ◆ Budgeting,
  - ◆ Costing,
  - ◆ Computerisation,
  - ◆ Internal audit set up, and
  - ◆ Financial management.

**(f) Manpower Planning, Recruitment and Training**

- (i) Audit firms help their clients in planning manpower development strategies.
- (ii) They also function in the area of staff recruitment, training and retraining

**NB:** Where chartered accountants provide secretarial and registrar services, they offer such services under corporate umbrellas different and distinct from the firm of chartered accountants.

**QUESTION 4**

An auditor is expected to be independent, competent and of high integrity.

- (a) Write short notes on each of the above qualities.
- (b) List FIVE factors that may impair the independence of an auditor.

**(15Marks) - November 2003 QUESTION 2)**

**ANSWER TO QUESTION 4**

**(a) Qualities required of an auditor**

**(i) Independence**

Professional independence is fundamental to the accountancy profession. An auditor cannot give an unbiased opinion unless he is independent of all the parties involved. Not only must the auditor be independent, he must also be seen to be independent. He must ensure that there are no circumstances that can reduce the degree of the exercise of his independence. As a guide, he must avoid financial dependence, financial involvement, close personal relationship and conflict of interest.

**(ii) Competence**

An auditor must be properly trained and must have acquired competence before he can sign an audit report. The Companies and Allied Matters Act, 2004 states that, to be qualified for appointment as an auditor of a company, a person must be a member of a body of accountants recognised for that purpose by the Act.

These bodies ensure that their members pass requisite examinations that will make them competent. They also need to acquire practical experience before they can be issued with licence to practice. In addition, they should also ensure that they attend Mandatory Continuing Professional Education (MCPE) programmes to update their knowledge and experience.

Furthermore, members have to be familiar with accounting and auditing standards, guidelines and other materials in order to enhance their competence.

(iii) **Integrity**

Chartered Accountants are renowned for their honesty, discretion and tactfulness. In ICAN rules of professional conduct to members, it is a fundamental requirement that a member should exhibit a high level of integrity in all professional and business relationships. Integrity implies not merely honesty but also fair dealing and truthfulness.

The auditor should conduct himself or herself with courtesy and consideration towards all with whom he/she comes into contact during the course of performing his/her work.

**Factors that may impair the independence of the auditor include:**

- (i) Where the fee is material in relation to total fee his total fee income.
- (ii) Where the auditor provides other services to the client which may lead to conflict of interest.
- (iii) If the auditor owns material shares in the client company.
- (iv) If the auditor receives loans from the company
- (v) If the auditor is in partnership with an officer of the company.
- (vi) If the auditor is related to management staff of the company (by blood or marriage)
- (vii) If the auditor is employed by the company or employs an employee of the company.
- (viii) If the auditor receives material gifts or gratification from the company.

**N.B.** any five of the above will satisfy the requirements of the question.

## QUESTION 5

The auditing guidelines "Audit evidence" suggests that techniques of audit testing fall into some broad categories.

**Required:**

List and discuss FOUR of these categories giving TWO examples of each.

**(12 Marks) - November 2003 QUESTION 4)**

## ANSWER TO QUESTION 5

The categories of audit evidence (only four required)

(a) **Inspection**

Inspection as a technique of audit test involves reviewing or examining of records, documents or tangible assets.

**Examples of inspection include (only two required):**

- (i) Review of tangible assets to ascertain their existence and service condition though not necessarily their ownership, cost or value.
- (ii) Examination of records and other documents to ensure evidence of Board authorisation and approval for assets acquisition and/or disposal.
- (iii) Review of minutes of board meetings will provide evidence of existence of capital commitments and/or contingent liabilities.

**(b) Observation**

Observation involves witnessing an operation or procedure being performed by others with a view to determining the manner of its performance at a point in time. Examples are:

- (i) Observing stock-counts in action.
- (ii) Attending wages payout in progress
- (iii) Observing receipt of goods into the warehouse
- (iv) Witnessing physical cash count.

**(c) Enquiry**

The auditor ensures that the accounting system and the related system of internal controls are effective in operation. This may be done by

- (i) the auditor enquiring from knowledgeable persons in the organisation either formally or informally, orally or in written form.
- (ii) Due to unclear nature of audit evidence in some situations, enquiry will be necessary to ascertain strength of such evidence.
- (iii) Enquiries can also be from third parties.

**Examples are:**

- ◆ Letter of confirmation of balances from the bank or debtors/creditors
- ◆ Confirmation of goods held by third parties on behalf of the client.

The degree of reliability that the auditor attaches to the evidence obtained is dependent on his opinion of the competence, experience, independence and integrity of the respondent.

**(d) Computations**

There may be a necessity for the auditor to establish evidence by undertaking computations and re-computations of data provided by the client.

**Examples are:**

- (i) Payroll deductions
- (ii) Sales men's commission
- (iii) Interest and dividend payable
- (iv) Withholding taxes.

**(e) Analytical review**

The auditor reviews figures and ratio and financial statements to check the fairness of the items or the need for additional explanation for unusual features in the accounts.

**QUESTION 6**

"Audit evidence" refers to the information obtained by the auditor and used in arriving at the conclusion on which he bases his opinion on the financial statements.

**Required:**

List and describe FIVE sources of audit evidence.

*(12 Marks) - November 2003 QUESTION 5*

**ANSWER TO QUESTION 6****Sources of audit evidence (only five required)**

- (a) Observation
- (b) Confirmation by independent parties
- (c) Authoritative external documents
- (d) Authoritative internal documents

- (e) Testimony from directors and officers of the company
  - (f) Calculations performed by the auditor
  - (g) Subsequent events
  - (h) Expected Relationships
  - (i) External events.
- (a) **Observation**  
This consists of:
- (i) Observation of the internal control system and book-keeping procedures.
  - (ii) Witnessing of processing of transaction to ensure that book keeping and internal control procedures are effectively carried out.
  - (iii) attendance at stock taking/cash counts
  - (iv) Observation of payment procedures of salary/wages on pay days
  - (v) Observation of procedures for receiving into and issuing out of stores
- (b) **Confirmation by Independent Parties**  
This refers to the evidence the auditor can obtain from reliable third parties in confirmation of audit information available within the client organisation e.g. Debtors/Creditors circularisation, bank confirmation letters.
- (c) **Authoritative external documents**  
These are documents issued by other individuals or organisations in evidence of transactions undertaken with client organisation. Examples are: title documents, share and loan certificates, lease and contract agreement and invoices.
- (d) **Authoritative internal documents**  
These are documents raised and authenticated within the organisation by persons with authority in evidence of decision reached or transactions undertaken with third parties e.g. minutes, copy invoices, Board resolutions, journal vouchers, memos and letters.
- (e) Testimony from directors and officers of the company. This may be formal, for example letter of representation, or informal, for example replies to Internal Control Questionnaires (ICQ).
- (f) Calculations performed by the auditor evidence of the correctness of many. Figures can be obtained this way.
- (g) **Subsequent events:**  
The audit is usually performed well after the year end and many assertions can be verified by reference to subsequent events.
- (h) **Expected relationship evidence:**  
Evidence confirming the truth about one item may tend to confirm the truth about another e.g. investment and investment income, loan and loan interest payable.
- (i) **External events:**  
These refer to the events in the external environment of the business being audited which affect the result shown in the financial statements. Knowledge of these events assists the auditor in reaching a more informed conclusion on the figures shown in the financial statements e.g. government restriction, economic recession, industry trends or news analysis and gazettes.

## QUESTION 7

What are the audit objectives applicable to inventories?

**ANSWER TO QUESTION 7**

**The audit objectives applicable to inventories are:**

**Completeness**

- ◆ Inventories represent all raw materials, work-in-progress, and finished goods that the entity owns, including those on hand, in transit or on the premises of others.
- ◆ All shipments of goods during the period covered by the financial statements.

**Accuracy**

- ◆ The detailed perpetual inventory records are correct and agree with the general ledger inventory control account.
- ◆ Costs associated with inventories have been properly classified and accumulated.
- ◆ Cost of sales is based on correct costs and quantities, is properly summarised and posted to the costs of sales and inventory control accounts, and, where appropriate, is credited in the perpetual inventory records.

**Existence/Occurrence**

- ◆ Recorded inventories physically exist in saleable condition and represent property held for sale in the ordinary course of business.
- ◆ Recorded cost of sales represents goods actually shipped during the period covered by the financial statements.

**Cut-off**

- ◆ Production costs incurred and charged to work-in-progress, transfers to finished goods, and cost of sales are recorded in the proper period.

**Valuation**

- ◆ Costs associated with inventories and costs of sales are determined and accumulated using generally accepted accounting principles consistently applied.
- ◆ Inventories are stated at not more than their net realisable value.
- ◆ Rights and Obligation
- ◆ The entity has legal title or ownership rights to the inventory; inventory excludes goods that are the property of others or have been billed to customers.

**Presentation and Disclosure**

- ◆ Inventories and cost of sales area properly described and classified in the financial statements.
  - ◆ All encumbrances against inventory are adequately disclosed.
- The auditor achieves these objectives by performing substantive tests or a combination of substantive tests and tests of control structure policies and procedures.

**QUESTION 8**

What alternative procedures should an auditor follow if physical inventory observation is impracticable?

**ANSWER TO QUESTION 8****Alternative procedures when observation is impracticable**

The auditor should not readily accept that the observation of inventories is impracticable or impossible. In a situation where the client does not or cannot take a physical inventory, or if the auditor cannot be present at the inventory-taking, the auditor may be able to form an opinion regarding the reasonableness of inventory quantities by applying any of the following alternative procedures:

**(i) Examining other physical evidence that may be tantamount to observing physical inventories**

If the auditor is engaged after the physical inventory has been taken, subsequent physical tests may be a satisfactory substitute for observing in the inventory-taking. The auditor may also examine written instructions for the inventory-taking, review the original tags or sheets, and make other suitable tests.

In any event, the auditor must:

- ◆ Examine or observe some physical evidence of the existence of the inventory and
- ◆ Make appropriate tests of intervening transactions or control procedures applied to them.

If the auditor is satisfied that inventories are fairly stated; he or she is in a position to express an unqualified opinion. Otherwise, there may be no practicable substitute for observation of inventory-taking, and an auditor may have to express a qualified opinion or disclaimer, depending on the materiality of the inventories and on whether failure to observe was unavoidable or resulted from management's decision to limit the scope of the audit.

**Substantiating through further examination of accounting documents**

Sometimes procedures for substantiating inventories must be based on examining other accounting documents and records. For example, in an initial audit, the auditor generally will not have observed the physical inventory at the previous year-end, which is a principal factor in determining cost of sales for the current year. If reputable independent accountants expressed an unqualified opinion on the prior-year statements, a successor auditor may accept that opinion and perhaps merely review the predecessor auditor's working papers supporting the prior-year balances. If no audit was made for the preceding year, the auditor may have no alternative but to substantially expand the tests of accounting records to attempt to obtain reasonable assurance about the beginning inventories in order to be able to express an opinion on the current year's results of operations.

Those expanded tests may include a detailed examination of physical inventory sheets and summaries, including review and testing of cut-off data, examination of perpetual inventory records and production records, and review of individual product and overall gross profit percentages. In connection with the latter procedures, cost accumulations for

selected inventory items should be tested and significant changes in unit costs directly traced to factors such as technological changes, mass buying economies, changes in labour costs, and changes in overhead rates. Changes in gross profit percentages should be further related to changes in unit sales prices and changes in the profitability of the sales mix, if applicable.

An auditor who is unable to form an opinion on the opening inventory may decide to qualify the audit opinion or disclaim an opinion with respect to results of operations for the year under audit.

**QUESTION 9**

The audit objectives in the verification of liabilities should focus on ascertaining that accrued liabilities are not understated, but not ignoring the possibility of the opposite may occur. What are some possible auditing procedures that would help the auditor address the completeness audit objective for liabilities?

**ANSWER TO QUESTION 9****Verification procedures**

Some of the auditing procedures that would help the auditor address the completeness of audit objectives for liabilities are:

- I. Schedule. Obtain or make detailed schedules of liabilities, showing the movement in each account during the period.
- II. Cut-off. Verify *cut-off*. For example a trade creditor should not be included unless the goods were acquired before the year-end.
- III. Reasonableness. Exercise professional scepticism in determining the reasonableness of the liability.
- IV. Internal control. Determine, evaluate and test internal control procedure. This is particularly important for trade creditors.
- V. Previous date clearance. Consider and review opening balances.
- VI. Review terms and conditions of loans. The auditor should determine that all terms and conditions agreed when accepting a loan have been complied with.
- VII. Authorisation. The authority for all liabilities should be sought. This will be found in the company minutes or directors' minutes and for some items the authority of the Memorandum and Articles may be needed.
- VIII. Description. The auditor must see that the description in the accounts of each liability is adequate.
- IX. Documents. The auditor must examine all relevant documents - invoices, correspondences, debenture deeds etc., according to the type of liability.
- X. Security. Some liabilities are secured in various ways, usually by fixed or floating charges. The auditor must enquire into these and ensure that they have been registered. The Companies Act requires, for secured liabilities, that an indication of the general nature of the security be given and also the aggregate amount of debts included under the item covered by the security.
  - ◆ Vouching. The creation of each liability should be vouched, for example the receipt of a loan.
  - ◆ Accounting policies. The auditor must satisfy himself that appropriate accounting policies have been adopted and applied consistently.
- XI. Letter of representation. Management must explicitly assert the existence, rights and obligations completeness and appropriate presentation and disclosure in the financial statements.
- XII. Interest and other ancillary evidence. Corroborative evidence about the existence of the loan must be obtained, for example, evidence of payments of interest and other activities.
- XIII. Disclosure. All matters, which need to be disclosed, are disclosed, to enable a true and fair view to be expressed on the financial statements. The Companies Act provisions must be complied with.
- XIV. External verification. With many liabilities it is possible to verify the liability directly with the creditor. This action will be taken with short-term loan creditors, bank overdrafts and, by a similar technique to that used with trade debtors and trade creditors.
- XV. Materiality. Materiality is a factor in all accounting and auditing issues.

***Inclusion of All Liabilities***

It is not enough for the auditor to be satisfied that all the liabilities recorded in the books are correct and are incorporated in the financial statements. Auditors must be satisfied that there are no unrecorded liabilities transactions or undisclosed items.

**QUESTION 10**

The auditor's tests of controls help to identify weaknesses which constitute threats to data security, reliability and loss. Discuss.

**ANSWER TO QUESTION 10**

The auditor's tests of controls help to identify weaknesses which constitute threats to data security, reliability, and loss; some of these weaknesses are:

- ◆ Fraud and abuse, including viruses.
- ◆ Error and loss due to negligence.
- ◆ Natural and manmade disasters (tornadoes, floods. Terrorism, etc.)
- ◆ Losses due to poor IT project management.

**Fraud and abuse**

Computer fraud is:

- ◆ Using a computer to steal funds, or
- ◆ Theft of confidential computer files or
- ◆ Unauthorised use of a company computer for private business

Abuse on other hand is the deliberate destruction of computer files or equipment.

**How to prevent fraud and abuse**

This can be effected by:

- ◆ Transfer of disgruntled employees to positions off from the computer area.
- ◆ Change of all locks, passwords, or other entry means available or known to those persons.
- ◆ Strengthening policies regarding the assignment of password privileges.
- ◆ Implementing policies and procedures essential for controlling insider

Computer fraud has become an area of significant concern to all organisations, including governments and their agencies. The increased risk of computer fraud, amongst others, prompted the establishment of Economic and Financial Crime Commission (EFCC). The law establishing the Commission requires all financial institutions operating in Nigeria and other Financial Institutions, to report the discovery of any of the following to their regulatory authority within 30 days of initial discovery:

- ◆ Insider abuse involving any amount.
- ◆ Transactions aggregating ₦50,000 or more that involve potential money laundering or violations of the Bank and Other Financial Institutions Act.

**Error and loss**

Data destruction cannot always be ascribed to malicious attacks. Poorly trained or unmotivated employees and unclear or nonexistent policies and procedures can cause data error and loss. Risk of data problems can be reduced through an effective organisational structure that take cognisance of management's involvement.

**Natural or manmade disasters**

All organisations that require computers to operate and conduct business on a daily basis, or otherwise lose revenue in the event of a computer shutdown, must have disaster-recovery plans that include off-site data storage. A chain of command for notification of a disaster (or pending disaster), agreements for off-site processing during an emergency, and detailed procedures for recovery should be considered.

**Poor IT project management**

Inadequate controls during the design, development, and implementation of IT projects have cost organisations whopping sums in excess project costs. In extreme cases, poorly managed IT projects end up having to be completely abandoned to avoid further losses. IT project management controls should include a strong project leader and project steering committee. There should be detailed project design requirements, milestones and tasks, detailed project budget estimates. Detailed and accurate accounting of costs paid to outside vendors and contractors and of hours spent by all internal staff on the project should be factored into the cost. There should be frequent comparisons of budgeted with actual costs during the life of the project to prevent cost overrun. Quality assurance of completed programming and documentation must be performed, so also is the monitoring of the project to ensure it meets design requirements.

**QUESTION 11**

What are the basic steps to Computer-Assisted Audit Techniques' (CAATs) developments?

**ANSWER TO QUESTION 11**

Basic steps to the development of Computer-Assisted Audit Techniques (CAAT) are:

**Definition of needs**

Fully understanding and documenting the precise audit objectives that the CAAT will test is essential to success. For example, a CAAT-based test of an inventory file could include the following types of objective:

- ◆ Valuation: Recheck or extend the Naira value per item (quantity x price) and select a sample of inventory items for price testing (invoice value to vendor).
- ◆ Summarisation: Foot the re-extended Naira value.
- ◆ Completeness: Compare the gaps in the numeric sequence of an automated count tag against those observed in a physical inventory.

A test of a receivable file could have these types of objectives:

- ◆ Existence: Select a statistical sample of account balances or invoices for confirmation.
- ◆ Valuation: Test the ageing of receivables by recalculating the number of days in receivables using the invoice date.
- ◆ Summarisation: Foot the Naira value of balances.

**Determine feasibility**

An important consideration in performing automated audit techniques is that the equipment is able to process the available types of backup media. Data are stored in different types of backup formats. In many cases, especially in mainframe environments, the auditor must depend on the IT department to initially develop an extract programme to map all auditable fields to an extract database or electronic report. The data can then be downloaded to a file server or PC for use by the auditor.

If IT department help is required, the auditor should be alert to the possibility of data manipulation by unscrupulous IT staff. For this reason, the auditor should always balance the extracted data to the corresponding source system totals when possible. If an extract database of a bank contains all loans with a non-zero balance, for example, the auditor should balance the total amount of loans in the extract database to the total amount of loans in the general ledger. Balancing the count of loans to the source system should also be performed. These controls also help ensure that there was not some other operational problem with the extract programme. Despite these measures, unauthorised changes could still be made that would not affect the total Naira amount or total count of loans. Therefore, auditors should be alert to:

- ◆ IT personnel who have system access capabilities that enable them to perform changes to extract programmes and the associated output.
- ◆ Compensating controls should be in place to monitor the activities of such IT personnel. In this wise, all changes to extract programmes and databases could be logged to a secure location accessible only by IT security personnel.
- ◆ The logs should be reviewed frequently by the IT security staff or designated audit staff.

The timely availability of data is another concern. For example, period closing date requirements affect availability. Coordination may require the input of MIS. MIS cooperation can play a key role in the successful execution of a CAAT, especially when the technique deals with complex data types or has complex programme logic.

Automating procedures for the sake of automation is hardly ever a successful strategy. CAATs are subject to cost/benefit analyses. Although CAATs may improve the effectiveness of a procedure

(e.g., testing 100 percent of a report rather than a sample), or the efficiency of a procedure (e. g, footing a large report using a CAAT rather than an adding machine), they are primarily a tool to improve overall audit effectiveness. In the time it takes to write and test CAATs, obtain and download files, and document the results, many CAATs end up being only marginally more effective than manual procedures in the long-term. In general, CAATs are best used when more than one query is to be performed. If just one query is performed, it may be more cost-effective to simply have the IT staff generate the query. However, if multiple queries and “what if” analyses are to be performed, they best are performed by the auditor. This adds to the independence of results and also frees the IT staff to concentrate on running the IT operations.

### **Plan the work**

#### *Develop the Code.*

It is beneficial to develop a CAAT beforehand, by using a prior period’s data to ensure that the live data will be in a usable format. Programme code that follows a structured format saves time during the debugging and review stages.

#### *Run and Analyse the Results.*

The final results of a CAAT are analysed in terms of the stated audit objectives and whether they meet them. There is a difference between CAATs that have a predictive result, which can be checked against footed totals, extended prices, and market values, for example, and CAATs that produce unpredictable results, such as analytical review reports. Predictive CAATs are always proven out by cross-referencing and reconciling them to expected results.

The accuracy of unpredictable CAATs is checked by:

- ◆ Logic testing, which ensures that the correct results are being achieved.
- ◆ Comparison of them with the original data file on a random basis.

#### *Document the Results.*

Auditor should document evidence of work performed to support CAATs conclusion.

## **QUESTION 12**

What do you understand by audit queries and alarms in the public sector?

## **ANSWER TO QUESTION 12**

Audit queries are observations or points raised by the audit in a particular transaction seeking further clarifications. Such queries raised by Internal Auditor are pre-audit queries while those raised by the Auditor-General are termed post-audit queries.

Queries serve as an important part of the mechanism of financial control as well as valuable means of detecting and preventing errors, fraud etc.

The guidelines on Civil Service Reforms gave prominence to queries by specifying time limit for replying audit queries and possible sanctions for failure to respond.

Offences on which queries may be raised can be classified as:

1. Irregularities resulting in losses to the government due to either fraudulent activity of the functionaries or their negligence or incompetence.
2. Irregularities not directly or immediately resulting in losses to government but which infringe upon budgetary and proper financial management.
3. Irregularities arising through poor or inefficient management and accounting, which may lead to losses to the government.

**QUESTION 13**

What are the contents of auditor's disclosure about the entity's ability to continue as a going concern?

**ANSWER TO QUESTION 13**

Auditors' disclosures about the entity's ability to continue as a going concern might include the following information:

- ◆ Pertinent conditions and events giving rise to the assessment of substantial doubt about the entity's ability to continue as a going concern for a reasonable period of time.
- ◆ The possible effects of such conditions and events.
- ◆ Management's evaluation of the significance of those conditions and events and mitigating factors.
- ◆ Possible discontinuance of operations.
- ◆ Management's plans (including relevant prospective financial information).
- ◆ Information about the recoverability or classification of recorded asset amounts or the amounts or classification of liabilities.

If, after considering management's plans, substantial doubt about the entity's ability to continue as a going concern does NOT exist, the auditor should still consider whether the principal conditions and events that initially generated the doubt need to be disclosed. The consideration of disclosure should include the possible effects of those conditions and events and any mitigating factors, including management's plans. It should be noted that:

“The auditor is not responsible for predicting future conditions or events. The fact that the entity may cease to exist as a going concern subsequent to receiving a report from the auditor that does not refer to substantial doubt, even within one year following the date of the financial statements, does not, in itself, indicate inadequate performance by the auditor. Accordingly, the absence of reference to substantial doubt in an auditor's report should not be viewed as providing assurance as to an entity's ability to continue as a going concern” (SAS 59).

**QUESTION 14**

If auditor has assessed control risk as low, then merely reviewing the client's reconciliations at year-end may be appropriate. What steps should an auditor take in reviewing a client's bank reconciliation?

**ANSWER TO QUESTION 14**

An auditor should take the following steps in reviewing a client's bank reconciliation:

- ◆ Obtain copies of the client's bank reconciliations and establish their mathematical accuracy.
- ◆ Reconcile the total of the bank balances on the reconciliations to the general ledger balance. This will generally require using a summary of the individual cash account balances in the general ledger account.
- ◆ Scan the bank reconciliation for significant unusual reconciling items and adjustments, and obtain evidence to support them by inquiry or examination of appropriate documents.

In addition to the review procedures the auditor may decide to test the client's reconciliations. The tests may be performed at an interim date, if the auditor has assessed that the client's reconciliations are subject to effective supervisory control procedures. If supervision during the intervening period is not considered effective, the auditor would probably perform the tests at year-end.

The following procedures in addition to the first two steps above are typically performed in testing the client's reconciliations:

- ◆ Determine that paid cheques, deposits, and debit and credit advices appearing on the cut-off bank statements and issued on or before the balance sheet date appear on the year-end reconciliations.
- ◆ Trace to the cash disbursements records outstanding checks listed on bank reconciliations but not returned with the cut-off statements.
- ◆ Trace deposits in transit on the bank reconciliations to the cut-off bank statements and the cash receipts records, and determine whether there are any unusual delays between the date received per the books and the date deposited per the bank statements.
- ◆ Trace other reconciling items to supporting documentation and entries in the cash records.
- ◆ Investigate old or unusual reconciling items. If checks remain uncashed after a specified period of time, the reason should be determined and the amounts either restored to the cash account.
- ◆ Determine the exact nature of items on the year-end bank statements not accounted for by the reconciliation procedures, such as debits or credits followed by offsetting entries of identical amounts that appear to be, or are represented by the client to be, bank errors and corrections not so coded. If information in the client's records is inadequate, clarification should be requested from the bank. In these circumstances, the auditor should consider performing a "proof of cash" reconciliation (described below) if the client's reconciliation process does not include one.

These procedures assume that the testing is performed as of the balance sheet date and that cut-off statements for a reasonable period after the balance sheet date are obtained from the bank.

### QUESTION 15

The Chairman of XYZ LTD, a small scale enterprise has been advised by his accountant to appoint an external auditor, but he disagreed with his accountant that since he has a qualified accountant in his employment, there is no need appointing an external auditor.

As a consultant, explain to the chairman:-

- (a)
  - (i) The difference between auditing and accountancy work;
  - (ii) The objects of an external audit
  - (iii) The advantages of an external audit
- (b) List five essential features of systems audit

**(Total 16 Marks) May 2002)**

### ANSWER TO QUESTION 15

- (a)
  - (i) **Difference Between Auditing and Accounting Work**  
 An audit can only commence after the necessary accounting work has been completed. Accountancy work involves keeping proper accounting books from which a trial balance can be extracted and thereafter the preparation of final accounts. It should be clearly understood that the keeping of accounting books and preparation of the financial statements are not part of the audit work.  
  
 An audit on the other hand entails the examination of the financial statements by a professionally qualified accountant in his capacity as an external auditor with a view to expressing an independent opinion on the truth and fairness of the state of affairs, the profit or loss, and cash flow of the business entity being reported on.

**(ii) The objects of an External Audit**

There are three main objects viz:

- ◆ To examine and report on financial statements prepared by a client. This is the primary object.
- ◆ To ensure that the correctness of the accounts is not impaired by fraud, error or other misstatements that should have been detected in the normal course of the audit.
- ◆ To prevent errors and frauds by the deterrent and moral effect of the audit.

If an audit is well planned and conducted with reasonable skill and care, material errors and fraud should be discovered in the process of the audit work. The auditor must not be regarded as a detective. He is not expected to carry out on his duties suspecting fraud or error. Nevertheless, if in the course of his examination of the books and records, suspicious circumstances are brought to light, he must do everything that may be reasonably necessary to probe such circumstances in order to either confirm or allay his suspicion.

**(iii) The Advantages of an External Audit**

- ◆ It facilitates the agreement of tax assessments with the Revenue Departments.
- ◆ It facilitates claims for loss profit from an insurance company; including consequential loss.
- ◆ Application to banks and other parties for the purpose of raising finance or credit are greatly enhanced if supported by audited accounts.
- ◆ It helps to reduce fraud and error, through objective review and evaluation of the effectiveness of the internal control system etc.
- ◆ Disputes between partners and other business associates may be avoided especially where complicated profit-sharing arrangements are in force.
- ◆ It enables the client to obtain general and sound financial advice.
- ◆ Users of financial statements would have more confidence in the audited financial statements.

**(b) Essential Features of System Audit**

- (i) To ascertain, record, assess and evaluate the adequacy of the accounting and internal control system on which the auditor wished to place reliance.
- (ii) To test the accounting records and perform compliance tests on the effectiveness of the internal control as basis for determination of other audit procedures.
- (iii) To compare the financial statements with the accounting records in order to ensure that they are in agreement.
- (iv) To carry out a review of the financial statements e.g. by use of analytical review procedures etc.
- (v) To send preliminary report on the financial statements to the management with respect to observed weakness in the system. In compliance with any relevant statutory requirements and professional standards.

**QUESTION 16**

- (a) Explain the term "Audit Committee" considering the provision of the Companies and Allied Matters Act, 1990 (4 Marks)
  - (b) What are the functions of the Audit Committee? (12 Marks)
- (Total 16 Marks) May 2002)**

**ANSWER TO QUESTION 16**

- (a) The Audit Committee is a body established under Section 359 (3) of the Companies and Allied Matters Act, 1990 to which the Auditor of a Public Company will report in addition to the Auditor's duty to report to the members of the company in accordance with Section 359

(1) of the Act. The Audit Committee shall consist of equal number of directors and representatives of the shareholders of the public company with a maximum number of six members. Any member of a Company may nominate a shareholder as a member of the Audit Committee if a notice is given to the Company Secretary at least 21 days before the Annual General Meeting. The members of the Audit Committee are not entitled to remuneration.

- (b) According to Section 359 (4) the Audit Committee shall examine the auditors' report and make recommendations thereon on the Annual General Meeting. Section 359 (6) states that subject to such other additional function and powers that the company's Articles of Association may stipulate, the objectives and functions of the audit Committee shall be to:
- (i) ascertain whether the accounting and reporting policies of the company with legal requirements and agreed ethical practices.
  - (ii) Review the scope and planning of audit requirements.
  - (iii) Review the findings on management letters in conjunction with the external auditor and departmental responses thereon.
  - (iv) Keep under review the effectiveness of the company's system of accounting and internal control.
  - (v) Make recommendations to the Board in regard to the appointment, removal and remuneration of the External Auditors of the company.
  - (vi) Authorise the Internal Auditor to carry out investigations into any activities of the company, which may be of interest or concern to the Committee.

#### QUESTION 17

Your client of over five years – ABC Rubber Products Limited, is proposing to change over to a computer-based accounting system.

- (a) How would this impact on your approach to the audit? (10 Marks)
- (b) Enumerate the major differences between manual and computer-based accounting system. (10 Marks)

**(Total 20 Marks) May 2002)**

#### ANSWER TO QUESTION 17

(a) **ABC Rubber Products Limited**

The approach of the auditor to a computerised system is considered not fundamentally different from that of the manual system. The auditors' duties and responsibilities actually do not change. The only thing that would change is the method of gathering of relevant, reliable and sufficient audit evidence to support the expression of an opinion by him on the financial statements.

The method of gather audit evidence would change because of special characteristics of processing data on the computer system. Some of the characteristics include:

- ◆ The complex nature of computer system vis-à-vis the manual system.
  - ◆ Centralisation of processing operations in the computer department or section. The auditor has to ascertain, evaluate and test the system to determine if it produces records, which form a reliable basis for the preparation of the financial statements and safeguards the organisation's assets.
- It is important that the auditor takes due cognizance of special computer control problems to aid him in the determination of the audit techniques to be applied.

Some of the control problems include:

- (i) the records and files are in the form of densely packed magnetic media making it difficult to identity their contents visually.
- (ii) Processing is done in the "black box" creating loss of visible processing trail in the course of computer processing.

- (iii) Too much dependence on the electronic data processing department – because of the specialized nature of processing financial data. This results in loss of recording autonomy by user departments.
  - (iv) Where auditor is not consulted during planning and installation stages some vital in-built controls could be ignored.
  - (v) Programmes reliability can only be inferred indirectly as opposed to being capable of direct observation while functioning.
  - (vi) Computer hardware and programmes are vulnerable to atmospheric and environmental conditions, electric and magnetic interference, accidental damage or destruction and human manipulation.
  - (vii) Loss of audit trail due to certain records which give no breakdown for checking purpose or for cross-referencing to original documents.
  - (viii) There is often a change in documentation on the audit files necessitating the redrafting of standard questionnaire and check-lists to record client data processing documentation and details of major controls included in programmes, systems flow diagrams, etc.
- (b) **Differences between manual and computer-based accounting systems**  
These include:
- (i) Complexity of the computerised system vis-à-vis the manual system is a major difference. Less skill is required to operate the manual system while operation of a computer-based system requires special skill.
  - (ii) In the manual accounting system internal checks which the duty of one officer bears to the duty of the other in the transactions processing chain is absent in a computerised environment.
  - (iii) There is lack of visible evidence since records are stored in the hard disc, magnetic disc and tape “files” whereas all records are visible in the manual system consequently errors and frauds could be more difficult to discover in a computerised system.
  - (iv) In a computer-based system, organisation may use an outside agency – like a computer service bureau to maintain and process their records. This is hardly often done in a manual system.
  - (v) Data processing is faster in a computerised system than a manual system.
  - (vi) Even though a computerised system is more expensive to install, in the long run, the benefit derivable outweighs the installation and establishment cost.
  - (vii) Information retrieval is faster in a computer-based system than in a manual system.

### QUESTION 18

It is common practice for auditors to send a letter of engagement to new clients and increasingly to existing clients. Matters usually included range from definition of scope to audit fees.

#### Required:

- (a) Briefly describe an engagement letter. (2 Marks)
- (b) List the purpose of the engagement letter (4 Marks)
- (c) List some of the principal contents of an engagement letter. (10 Marks)

**(Total 16 Marks) November 2003)**

### ANSWER TO QUESTION 18

- (a) An engagement letter is a letter showing the auditor's understanding of the agreement between the auditor and his client written before the commencement of any professional work detailing the precise scope and nature of work to be undertaken.

- (b) The purpose of the letter is to:
- (i) define clearly the extent of the auditor's responsibilities
  - (ii) minimise misunderstanding between the auditor and the client
  - (iii) confirm verbal agreement in writing.
  - (iv) confirm details of the auditor's engagement
  - (v) inform and educate the client on what the audit process entails
  - (vi) state client's responsibilities for preparing the financial statements.
  - (vii) state the form and contents of the audit report
  - (viii) state other services the practice firm provides apart from audit.
  - (ix) state basis for computation of audit fees.
- (c) The principal contents of the engagement letter are:
- (i) The Auditor's responsibility to report on the financial statements prepared by the directors.
  - (ii) The scope of the auditor's work based on:
    - ◆ auditing standards and guideline
    - ◆ accounting systems review
    - ◆ collection of audit evidence
    - ◆ test of and reliance on internal control
  - (iii) The letter of weakness to the Management
  - (iv) Special areas such as:
    - ◆ relationship with internal audit, if any
    - ◆ audit of branches
    - ◆ relationship with other auditors, if any
    - ◆ significant reliance on directors' supervision in small companies
  - (v) Need for a letter of representation from the Management.
  - (vi) Any agreement for the auditors to carry out work of a book keeping and accounting nature and the additional charges.
  - (vii) Any agreement for the auditor to provide taxation services – this could be a separate letter.
  - (viii) The fees and the basis on which they are charged.
  - (ix) A request for a letter of acknowledgement signed on behalf of the Board or a direct authentication signature as acceptance of the auditor's letter.

### QUESTION 19

Most large companies have both internal and external auditors.

#### Required:

- (a) Distinguish between the internal audit and external audit. (4 marks)
- (b) Describe the scope and objectives of internal audit. (4 Marks)
- (c) Explain the criteria employed by the external auditor to assess the likely effectiveness and relevance of the internal audit functions (4 Marks)
- (d) State four areas where the Internal Audit function can be of assistance to the External Audit. (3 Marks)

**(Total 15 Marks) - May 2003)**

### ANSWER TO QUESTION 19

#### (a) Internal audit and external audit

Internal audit has been defined as an independent appraisal activity within the organisation for a review of operation as a service to management. It is usually carried out by specially assigned staff of the enterprise known as internal auditors and it primarily involves a continuous review and evaluation of the accounting and internal control systems. External audit on the other hand, is an independent examination of the evidence supporting the

financial statements of an enterprise by a qualified person who is not an officer or servant of the company, with a view to forming and expressing an opinion as to whether the financial statements present a true and fair view of the results for the period in question and the financial position as at the period end.

(b) **Scope and objectives of internal audit**

The scope and objectives of internal audit vary widely and are dependent upon the responsibilities assigned to it by management, the size and structure of the enterprise, and the skills and experience of the internal auditor. Normally, internal audit operates in one or more of the following areas:

- (i) Review of accounting systems and related internal control;
- (ii) Examination of financial and operating statements for management including detailed examination of transactions and balances;
- (iii) Review of the economy, efficiency and effectiveness of operations and of the functioning of non-financial controls;
- (iv) Review of the implementation of corporate policies, plans and procedures;
- (v) Special investigations.

Following the scope of internal audit functions listed above. Objectives of internal audit include:

- (i) the attainment of corporate goal
- (ii) Elimination of waste or avoidable loss
- (iii) Ensuring the effective operation of internal control

(c) **The criteria for assessing effectiveness and relevance**

The criteria employed by the external auditor to assess the likely effectiveness and relevance of the internal audit function include:

(i) **The degree of independence**

The external auditor should evaluate the status and reporting responsibilities of the internal auditor and consider any constraints or restrictions placed upon him. Although an internal auditor is an employee of the enterprise and cannot therefore be totally independent of it, he should be able to plan and carry out his work as he wishes and have access to the highest level of management.

(ii) **The Scope and Objectives of the Internal audit Function**

The external auditor should examine the internal auditor's formal scope of duties and should ascertain the set objectives of the internal audit function.

(iii) **Due Professional Care**

The external auditor should consider whether the work of the internal auditor is properly planned controlled, and comprehensively documented.

(iv) **Technical Competence**

The external auditor should ascertain whether the work of the internal audit is performed by persons having adequate training and proficiency as auditors. Indication of technical competence includes membership of relevant professional body and possession of relevant practical experience and skills.

(v) **Internal Audit Reports**

The external auditor should consider the quality of reports issued by internal audit and consider the response of and action taken by the management.

(vi) **Level of Resources Available**

The external auditor should consider whether the internal audit department has the resources required to do the job effectively.

(d) **Assistance to the external auditor**

The internal audit function can be of assistance to the external audit in the following ways:

- (i) Attendance at stock taking and cash counts of the enterprise where external auditor is not able to do them himself.

- (ii) Conducting compliance tests on accounting controls, on a continuous basis to provide assurance that such controls have operated satisfactorily throughout the period.
- (iii) Documentation of the accounting and internal control systems.
- (iv) Testing of transactions and balances such as sales, purchases, fixed assets and debtors.

**QUESTION 20**

- (a) As the audit manager in charge of an audit of a large multinational company, draw up an audit programme for fixed assets for the use of the field staff. (10 Marks)
- (b) What are the shortcomings of using standardised audit programmes? (5 Marks)

**(Total 15 Marks) November 2003)****ANSWER TO QUESTION 20**

(a)	<b>Audit programme for fixed assets</b>	<b>Auditors</b>		
	<b>Details of Work</b>	<b>W/P. Ref</b>	<b>Initial</b>	<b>Date</b>
	<p>i. Obtain or prepare a summary of Fixed Assets and schedule of each type or category to – (a) reconcile the summary with the figures in the Balance Sheet and the opening figure with the balance brought forward, (b) cast and cross cast summary and the schedules.</p> <p>ii. Obtain or extract schedules of additions during the year for all classes of asset, to-test-vouch items with suppliers invoices or other supporting documents like debit notes, architect's or surveyor's certificate and completion statements</p> <ul style="list-style-type: none"> <li>◆ check directors' minutes and budgets for capital expenditure authorisations and approvals.</li> <li>◆ check appropriateness of capitalisation policy considering effect of accounting standards provisions.</li> </ul> <p>iii. Obtain or extract schedules of disposals to</p> <ul style="list-style-type: none"> <li>◆ check minutes for authority for disposals.</li> <li>◆ test-vouch proceeds of sale with independent external and internal evidence like sales agreement or correspondence as well as receipts.</li> <li>◆ check if assets are scrapped or written off.</li> <li>◆ verify that the original cost (or valuation) and related accumulated depreciation have been eliminated from the fixed assets accounts.</li> <li>◆ check that the profit or loss on disposal agree with the amount in the profit and loss account.</li> </ul>			

	Details of Work	W/P. Ref	Initial	Date
	<p>iv. Obtain and examine certificates of title Deeds And leases of landed properties to</p> <ul style="list-style-type: none"> <li>◆ Confirm that beneficial ownership is in the company.</li> <li>◆ If held by a bank for safekeeping confirm from the bank, the status regarding encumbrance or lien, the bank to confirm directly to the auditors.</li> <li>◆ Confirm directly from other third parties if they hold title documents as a result of charge on properties, details of the liability or indebtedness and nature of the charge.</li> </ul> <p>v. In the case of leasehold properties, to</p> <ul style="list-style-type: none"> <li>◆ verify that provision has been made for dilapidation in accordance with the terms of the lease, and</li> <li>◆ ensure that adequate amortisation is regularly effected.</li> </ul> <p>vi. If assets have been revalued during the year, (a) obtain a copy of the valuation report. **QUESTION 21**

- (a) Define and explain what is meant by analytical review procedures.  
 (b) Mention four types of general analytical review procedures.  
 (c) What is the purpose of performing preliminary analytical review procedures at the audit planning stage?

**(Total 18 Marks) November 2003****ANSWER TO QUESTION 21**

- (a) 'Analytical review procedure' is defined as audit procedure which systematically analyses and compares related figures, trends, ratios and other data with the aim of providing evidence to support the audit opinion on the financial statements.

The data used in such examination may be financial or non-financial and may originate from within or outside the client organisation. Analytical review procedures range from simple comparisons such as current with the prior year figures or accounting ratios; to complex analysis using advanced statistical techniques and computer audit programmes.

- (b) Four types of general analytical review procedures:
- (i) Comparison of current-year account balances to balances for one or more comparable periods.
  - (ii) Comparison of the current year account balances to anticipated results found in the company's budget and forecasts.
  - (iii) Comparison of current year account balances and financial relations (e.g. ratios) with similar information for the industry in which the company operates.
  - (iv) Study of the relationship of current year account balances with relevant non-financial information (e.g. physical production statistics relating to input and out, energy consumption etc.

- (c) Purpose of performing preliminary analytical review procedures in the audit planning stage:

The main purpose is to discover any misstatement in financial statement presentation, to confirm information supplied, to apply reasonableness test, estimates and judgements and to perform a cursory review of financial statements at the audit planning state. The auditor will endeavour to identify areas of potential risk or new development so that he can plan his other procedures in these areas.

## **APPENDIX III**

# **ESSAY TYPE QUESTIONS AND SOLUTIONS**

### **QUESTION 1**

Mr. Adalat George, the staff Partner of Binitie, George and Co., a firm of Chartered Accountants based in Port Harcourt, is conducting a recruitment interview, as a prelude to the employment of some Audit Staff into his firm.

As one of the applicants, you were requested to come to the interview venue with a report addressed to the staff Partner, detailing the Audit steps necessary, to verify the values appearing for the following assets, in a clients financial statements for an accounting year end.

- (a) Freehold Land and Buildings
- (b) Plant and Machinery
- (c) Motor Vehicles

### **SOLUTION TO QUESTION 1**

The Staff Partner,  
Binitie, George and Co.  
Horsefall Street,  
Port Harcourt.

Date: 16th May 2009

Dear Sir,

#### **AUDIT STEPS TO BE TAKEN, IN VERIFYING LISTED ASSETS**

I write in response to your request that I present a report stating the audit steps necessary to verify the values appearing for the following assets, in a client's Financial Statements, for an accounting year end.

The Steps are as follows:

#### **Freehold land and buildings**

##### **Freehold land**

- ◆ Obtain and examine title documents and costs relating to the land.
- ◆ Ensure that title is registered in the name of the company at the Lands Registry.

##### **Buildings**

- ◆ Agree balance to the General ledger
- ◆ Verify significant additions with relevant Invoices, Architects and Quantity Surveyor's Certificates
- ◆ Check and agree depreciation charges and ensure consistency of rate applied
- ◆ Obtain Board's approval relating to construction handled internally
- ◆ Trace to fixed assets register
- ◆ Verify insurance policy relating thereto
- ◆ In case of revaluation, obtain valuation report done by a professional value

### **Plant and machinery**

- ◆ Agree balance to the general ledger
- ◆ Verify additions by checking related purchase invoices
- ◆ Re-check and agree depreciation figures, and rates applied
- ◆ Check to fixed assets register
- ◆ Verify insurance policies relating thereto
- ◆ If there are disposals, confirm authorisation and proceeds
- ◆ If construction is done internally, check and agree cost sheets
- ◆ Carry out a physical verification of material items

### **Motor vehicles**

- ◆ Agree figures to the general ledger
- ◆ Verify purchase invoices
- ◆ Check that registration of vehicles with the licensing authorities are done in the name of company rather than individuals
- ◆ Check and agree depreciation figures; rates applied and its consistent application.
- ◆ Carry out physical verification of motor vehicles
- ◆ Verify and agree insurance policies relating thereto
- ◆ Check items to fixed assets register
- ◆ Confirm authorisation in respect of disposals where applicable and trace proceeds to bank statement/ cash book.

Once the above steps are followed painstakingly, the authenticity of the values stated against, the listed assets, can either be affirmed or otherwise.

Thanks You,  
Yours faithfully

Mr. O. A. Alainishe.

## **QUESTION 2**

Mr. Yekini Sofola, an Audit Senior in Sekibo Achike Gamba and Co. a firm of Practicing Accountants has recently been commissioned by the Managing Partner of the firm to:

- (a) Briefly outline the nature of the
  - (i) Application controls and
  - (ii) General Controls, expected in a computer-based accounting system
- (b) List and briefly comment on 5 (five) components of audit planning documentation as an important aspect of the audit process.
- (c) You are required to provide what you consider should be the content of Mr. Yekini Sofola's response

## **SOLUTION TO QUESTION 2**

The contents of Mr. Yekini Sofola's response, should include:

- (a) Description of Controls

(i) **Application Controls**

These relate to the transactions and standing data pertaining to each computer-based accounting system and are therefore specific to each such application. The objectives of application controls are to ensure the completeness and accuracy of the accounting records and the validity of the entries made in these records resulting from both manual and programmed processing.

(ii) **General Controls**

These are controls, which relate to the environment within which computer-based accounting systems are developed, maintained and operated and are therefore applicable to all the applications.

The objectives are to ensure the proper development and implementation of applications and the integrity of program as well as data files and computer operations. They may be manual or programmed.

### **Five Components of Audit Planning Documentation**

#### **Background Information**

- ◆ Meeting with client
- ◆ Brief history of the organisation
- ◆ Nature of Business
- ◆ Organisational Structure
- ◆ Accounting and internal control systems
- ◆ Audit Objectives
- ◆ Terms of engagement
- ◆ Financial Trends

#### **Audit Strategy**

- ◆ Audit approach
- ◆ Analysis of audit risks
- ◆ Outline of audit emphasis

#### **Job Administration**

- ◆ Timing of audit work
- ◆ Staff requirement
- ◆ Work Allocation
- ◆ Job review
- ◆ Reporting deadline
- ◆ Interim audit
- ◆ Attendance at stock-taking

#### **Audit Budget**

- ◆ Time
- ◆ Cost

#### **Audit Programmes**

- ◆ For all areas of the business

#### **Audit Briefing (Pre-audit conference)**

- ◆ Date of Meeting
- ◆ Name and level of staff to be briefed
- ◆ Specific matters requiring particular attention such as changes in management structure, technology, etc.

**QUESTION 3**

Audit is “An independent examination of and the expression of opinion on the financial statements of an enterprise by an appointed auditor in pursuance of that appointment”.

Required:

- (a) List FIVE types of audit
- (b) State ONE advantage of an audit to each of five different users of the audit report.
- (c) Write short notes on the following:
  - ◆ Compliance tests
  - ◆ Substantive tests
  - ◆ Vouching

**SOLUTION TO QUESTION 3**

- (a) **Types of audit are**
  - (i) Final Audit
  - (ii) Management Audit
  - (iii) Interim Audit
  - (iv) Internal Audit
  - (v) Continuous Audit
  - (vi) Environmental Audit
  - (vii) Value for money Audit
  - (viii) Forensic Audit
  - (ix) Social Responsibility Audit.
- (b) **Five advantages of audit are:**
  - (i) To the Tax Authorities, it helps to agree tax assessment with tax authorities
  - (ii) To the insurance underwriters, it facilitates claims for loss of profit or stock from an insurance company, including consequential loss.
  - (iii) To the Banks, it facilitates processing of application for bank facilities
  - (iv) To the Shareholders, it help to prevent or reduce incidents of fraud, error and other misstatements.
  - (v) To the Partnerships, it provides a proper basis for valuation of goodwill on admission, retirement, or death of a partner and helps reduce or settle disputes that may arise from financial statements
- (c) **Short Notes**
  - (i) **COMPLIANCE TESTS**  
These are detailed tests of transactions, which seek to assure the auditor (i.e. provide audit evidence) that the Internal control procedures are being adhered to by the company management.
  - (ii) **SUBSTANTIVE TESTS**  
These are tests of transactions, balances and other procedures such as analytical review, which seek to produce audit evidence regarding completeness, accuracy and validity of balances in the accounting records or financial statements.
  - (iii) **VOUCHING**  
Vouching is the examination of transactions of the business through vetting of documentary and other evidence of sufficient validity to satisfy the auditor that such transactions are in order and have been properly authorised and correctly recorded.

**QUESTION 4**

An Auditor is expected to obtain relevant and reliable audit evidence sufficient to enable him draw measurable conclusions as a basis for his report. You are required to:

- (a) List the factors, which may influence the auditor's judgment in relation to sufficiency of the evidence so collected.
- (b) State the factors that would enable the auditor assess the reliability of such evidence.

**SOLUTION TO QUESTION 4****(a) Sufficiency of Audit Evidence**

The sufficiency of audit evidence will be affected by the following factors:

- (i) The relevance of the evidence collected.
- (ii) The reliability of the evidence collected.
- (iii) The materiality and nature of the item being checked.
- (iv) The auditor's experience of the reliability of management, staff, accounting records as well as the effectiveness of the internal control system.
- (v) The possibility of management bias and the accompanying risk of mis-statements
- (vi) The time and cost of collecting the evidence in relation to the value of the evidence.
- (vii) The auditor's knowledge of the client's business and the operating industry

**(b) Reliability of evidence**

The auditor will consider the following factors when assessing the reliability of the evidence.

- (i) Reliability of the source and his previous experience about that source: the independence, objectivity, qualification, and experience of the provider of evidence.
- (ii) The form of the evidence e.g.
  - ◆ Documentary evidence is more reliable than oral evidence
  - ◆ Externally generated evidence is better than internally generated one
  - ◆ Evidence generated by the auditor through physical inspection, computation or analysis is more reliable than evidence presented by client staff.
- (iii) Whether the evidence agrees or conflicts with other related evidence: for example, if there is a conflict, more evidence will be required to prove the reliability of one source or evidence.

**QUESTION 5**

Penta Ltd. a manufacturing company involved in the production of vegetable oil, has been in business for over five years. Since then, it has been making huge losses. The company accounts are being audited by Babajide and Co., Chartered Accountants.

The company is currently experiencing serious financial difficulties. It has approached the major shareholder to assist it; by granting it a soft loan. Enquiries made by the major shareholder who is the Chairman, revealed that management, with the assistance of some suppliers of the company are defrauding the company, through payment for materials not supplied. The Chairman has approached your firm of Chartered Accountants, Experience and Co, to carry out an investigation into this matter and report your findings to him.

You are aware that Jeje Nig. Ltd, one of your major clients, is one of the major suppliers of Penta Ltd.

- ◆ State, with reasons, whether Experience and Co. (Chartered Accountants) should accept or reject this appointment.
- ◆ If Experience and Co. decides to accept the appointment, what steps should it take before formally accepting?
- ◆ Draw up a programme of work to be undertaken by Experience and Co.

### **SOLUTION TO QUESTION 5**

- (a) Experience and Co. (Chartered Accountants) may not accept the assignment if:  
He makes a discreet enquiry on his client Jeje Nigeria Ltd. and discovers that the company is one of the suppliers that is assisting the directors of Penta Ltd, to defraud.

The reason for this is that , if he takes the appointment, he will be biased unless he does not mind to lose Jeje and come up clear and plain with the result of his findings.

- (b) If he chooses to accept the appointment, then he must write to the company's auditors – Babajide and Co., informing them of the assignment given to him
- (c) Programme of work to be carried out by Experience and Co.
- (i) Obtain a list of the creditors of Penta Ltd, for the period that the investigation should cover.
  - (ii) Agree totals of the balances to the General Ledger and Trial Balance for each period. (This will help in establishing completeness of the list).
  - (iii) Trace debit entries in the Creditors' ledger to the Bank Cash book and Bank Statements.
  - (iv) Request for original Supplies' invoices, upon which these payments were made.
  - (v) Request for copies of Local Purchase Orders.
  - (vi) Ask for Delivery Notes/Waybills
    - ◆ Trace waybills to Goods Received Notes.
    - ◆ Trace Goods Received Notes to Stock Cards.
    - ◆ Review issues from stock.
    - ◆ Check authorisations to payment vouchers.
    - ◆ Review Bank Reconciliation Statements.

## ***APPENDIX IV***

# ***GLOSSARY OF TERMS***

**Access controls** – procedures designed to restrict access to on-line terminal devices, programmes and data.

**Accounting estimate** – an approximation of the amount of an item in the absence of a precise means of measurement.

**Accounting system** – the series of tasks and records of an entity by which transactions are processed as a means of maintaining financial records.

**Adverse opinion** – is expressed when the effect of a disagreement is so material and pervasive to the financial statements that the auditor concludes that a qualification of the report is not adequate to disclose the misleading or incomplete nature of the financial statements.

**Analytical procedures** - consist of the analysis of significant ratios and trends including the resulting investigation of fluctuations and relationships that are inconsistent with other relevant information or deviate from predictable amounts.

**Annual report** - document issued by an entity on an annual basis, which includes its financial statements together with the audit report thereon.

**Appropriateness** - the measure of the quality or reliability of audit evidence and its relevance to a particular assertion.

**Assertions** – representations by management, explicit or otherwise, that are embodied in the financial statements.

**Attendance** – Attendance consists of being present during all or part of a process being performed by others.

**Audit documentation** - the written record of the basis for the auditor's conclusions that provides the support for the auditor's representations.

**Audit engagement partner** - the partner or other person in the firm who assumes responsibility for the conduct of the audit and for issuing an auditors' report on the financial statements on behalf of the firm.

**Audit evidence** - the information obtained by the auditor in arriving at the conclusions on which the audit opinion is based.

**Audit risk** - the risk that auditors may give an inappropriate audit opinion on financial statements.

**Audit staff** - the personnel involved in an audit other than the audit engagement partner.

**Auditing** - a systematic process of objectively obtaining and evaluating evidence in respect of certain assertions about economic actions and events to ascertain the degree of correspondence between those assertions and established criteria and reporting the results to interested parties over a particular period of time.

**Auditor** – the person with final responsibility for the audit. This term is also used to refer to an audit firm.

**Client service partner** - is the partner who takes primary responsibility for coordinating the range of services provided to an audit client.

**Competencies** - the knowledge, skills and abilities of audit engagement partners and audit staff.

**Computer-assisted audit techniques(CAATs)** – application of auditing procedures using the computer as an audit tool.

**Computer information systems (CIS) environment** - exists when a computer of any type or size is involved in the processing of financial information of significance to the audit.

**Confirmation** - a specific type of inquiry that is the process of obtaining representation of information of an existing condition directly from a third party.

**Continuing auditor** – the auditor who audited and reported on the immediate prior period's financial statements and continues as the auditor for the current period.

**Control environment** - the overall attitude, awareness and actions of directors and management regarding internal controls and procedures and their importance in the entity.

**Control risk** - the risk that a misstatement that could occur in an account balance or class of transactions and would not be prevented, or detected and corrected on a timely basis by the accounting and internal control systems.

**Control procedures** – are those policies and procedures in addition to the control environment which management has established to achieve the entity's specific objectives.

**Date of financial statements** – the date of the end of the latest period covered by the financial statements, which normally is the date of the most recent balance sheet in the financial statements subject to audit.

**Date of approval of the financial statements**—the date on which those with the recognised authority assert that they have prepared the entity’s complete set of financial statements, including the related notes, and that they have taken responsibility for them.

**Date of the auditor’s report**—The date selected by the auditor to date the report on the financial statements. usually after the date of approval of the financial statements.

**Date the financial statements are issued**—The date that the auditor’s report and audited financial statements are made available to third parties, which may be, in many circumstances, the date that they are filed with a regulatory authority.

**Database** – collection of data that is shared and used by a number of different users for different purposes.

**Detection risk** - the risk that auditors’ substantive procedures do not detect a misstatement that exists in an account balance or class of transactions that could be material.

**Directors** - the directors of a company, partners, proprietors, or equivalent persons responsible for directing the entity’s operations and preparing its financial statements.

**Disclaimer of opinion** – is expressed when the possible effect of a limitation on scope is so material and pervasive that the auditor has not been able to obtain sufficient appropriate audit evidence and accordingly is unable to express an opinion on the financial statements.

**Error** – an unintentional mistake in financial statements.

**Errors** - unintentional misstatements or omissions of amounts or disclosures in financial statements.

**External auditor** – independent auditor who is not subject to management controls.

**Financial statements** – the balance sheets, income statements, statements of changes in financial position, notes and other statements and explanatory material which are identified as being part of the financial statements.

**Firm** – sole practitioners, partnerships, limited liability partnerships and other corporate entities engaged in the provision of auditing services.

**Fraud** – refers to an intentional act by one or more individuals among management, employees, or third parties, which results in a misrepresentation of financial statements.

**Going concern assumption** – an entity is ordinarily viewed as continuing in business for the foreseeable future with neither the intention nor the necessity of liquidation, ceasing trading or seeking protection from creditors pursuant to laws or regulations. Accordingly, assets and liabilities are recorded on the basis that the entity will be able to realise its assets and discharge its liabilities in the normal course of business.

**Goodwill** - the difference between the value of a business as a whole and the aggregate of the fair values of its separable net assets.

**Governance** - describes the role of persons entrusted with the supervision, control and direction of an entity by ensuring that the entity achieves its objectives, financial reporting, and of reporting to interested parties.

**Incoming auditor** – the auditor who is to take over from the current auditor and did not audit the prior period’s financial statements.

**Independent audit** - providing reasonable assurance that published audited financial reports are free from material misstatement and are in accordance with legislation and relevant accounting standards.

**Independent partner** - a partner with sufficient experience and authority who is not engaged in the performance of the audit to perform an ‘independent review’.

**Inherent risk** - the susceptibility of an account balance or class of transactions to material misstatement, either individually or when aggregated with misstatements in other balances or classes of transactions.

**Intended users** - the person, persons or class of persons for whom the practitioner prepares the assurance report.

**Internal audit** - an appraisal or monitoring activity established by management and the directors for the review of the accounting and internal control systems as a service to the entity.

**Internal control system**- the control environment and control procedures. Which includes all the policies and procedures (internal controls) adopted by the directors and management of an entity to assist in achieving their objective.

**IT environment** – the policies and procedures that the entity implements and the IT infrastructure (hardware, operating systems, etc) and application software that it uses to support business operations and achieve business strategies.

**Knowledge of the business** – the auditor’s general knowledge of the economy and the industry within which the entity operates and a more particular knowledge of how the entity operates.

**Limitation on scope** – a restriction on the scope of the auditor’s work which may sometimes be imposed by the entity or by circumstances. It may also arise when, in the opinion of the auditor, the entity’s accounting records are inadequate or when the auditor is unable to carry out an audit procedure believed desirable.

**Local Area Network (LAN)** - a communications network that serves users within a confined geographical area.

**Management** - those persons who may include directors, who have executive responsibility for the conduct of the entity’s operations and the preparation of its financial statements.

**Management** - comprises officers and others who also perform senior managerial functions. Management includes those charged with governance only in those instances when they perform such functions.

**Management fraud** – fraud involving one or more members of management or those charged with governance.

**Management representations** – representations made by management to the auditor during the course of an audit, either unsolicited or in response to specific inquiries.

**Material inconsistency** - exists when other information contradicts information contained in the audited financial statements. A material inconsistency may raise doubt about the audit conclusions drawn from audit evidence previously obtained and, possibly, about the basis for the auditor’s opinion on the financial statements.

**Mis-statement** - A mis-statement of the financial statements that can arise from fraud or error (also see Fraud and Error).

**Modified auditor’s report** – An auditor’s report is considered to be modified if either an emphasis of matter paragraph(s) is added to the report or if the opinion is other than unqualified.

**Other auditor** – an auditor, other than the principal, including affiliated firms, whether using the same name or not, and correspondents.

**Predecessor auditor** – the auditor who was previously the auditor of an entity and who has been replaced by an incoming auditor.

**Principal auditor** – the auditor with responsibility for reporting on the financial statements of an entity when those financial statements include financial information of one or more components audited by other auditors.

**Professional scepticism** – an attitude that includes a questioning mind and a critical assessment of evidence.

**Transaction logs** – reports that are designed to create an audit trail for each on-line transaction.

**Uncertainty** – is a matter whose outcome depends on future actions or events not under the direct control of the entity but that may affect the financial statements.

## APPENDIX VI

# STUDY AND EXAMINATION TECHNIQUES

This appendix contains notes on:

- (a) Using the questions and answers provided in the manual
- (b) Effective study
- (c) Examination technique

### 6.1 Questions and answers

#### Introduction

1. Two types of question are provided in this manual
  - (a) Questions set at the ends of chapters *with answers* provided in Appendix I
  - (b) Questions *with answers* set in Appendix II

#### Questions with Answers

2. These questions are either
  - (a) questions intended to test the understanding of the points arising out of the particular chapter; or
  - (b) examination questions inserted at a stage where it is considered the student will be best able to give a reasonable answer.
3. Most answers are given in outline but some examination answers go a little further in order to provide greater guidance and provide students with the basis for study.
4. When answers are *comprehensive* you could not be expected to write them in the time allowed. *Do not* worry if you feel you could not write such answers; you are not expected to. But you *must* grasp the main points or principles involved which will form the basis for good marks in an examination.
5. Do not worry if your answer differs, there is often more than one approach. You must satisfy yourself however, that it is *only* the approach that differs, and that you have not missed the fundamental principles.
6. Authors' Comments. These have been included to give *additional* points or elaborate on matters arising out of the subject covered by the question to which it is felt you should give some thought.

#### Using the answers

7. Have a shot at each question yourself *before* consulting the answer; you will achieve nothing if you do not do this. Write your answer out in full or jot down the main points. *Do not* hurry to the answer.
8. Look at the answer. (See para 5 in the case of examination answers). Study the particular area *thoroughly* now making sure of your understanding. *Repeat* the process outlined in para 7 and this paragraph after a suitable interval. You *must* do this to get any benefit at all. Make sure the main points *stick*.
9. Just browsing through the answers will really get you *nowhere*. You *must* test yourself by *writing* down your version of the answer.

### 6.2 Introduction

1. These notes are intended for those who are new to studying for examination subjects, although those who are not may also benefit. They have been written in relation to study involving the reading of *textbooks*, and they apply to all subjects. It is often very difficult to pick out the important principles from such books. Careful reading of these notes will be of benefit even in studying the manual.

**General**

2. Study means more than *just reading* a piece of literature. It means *close concentrated reading* with a *notebook* at your side. Unless you are one of a *few* people do not kid yourself you can absorb material by *just one* general read through it, you cannot!
3. Read a small area, *making notes* as you go along. Then ask yourself – what have I just learnt? *Write* down what you think it was all about. Then look again and you may be surprised to find you have missed a *key* point or points – they *must* be down in your notebook and eventually in your head.

**Compilation of notebook**

4. A *well-compiled* NOTEBOOK is a must. Use block capitals or different colour inks to *headline* the main areas and subdivisions of those areas. Notes made during lectures or private study should *not* go straight into your NOTEBOOK. Take them down on a “rough” paper and write them in your NOTEBOOK *as soon as possible* after the lecture or study period, thinking about what you are writing.

**Memory aids**

5. **Mnemonics** are very useful – if the sequence of points in the textbook *is not* significant, *change it* if it makes for a better mnemonic.
6. **Association** of the points with familiar objects which will serve to recall them is also useful.
7. Some people memorise things by *saying* them over and over *out loud*, others have to *write* them down *time after time*.
8. Many students have *small blank cards* and using one side of each card for each study area, put down the main points. They carry the cards everywhere with them and use every opportunity to study them. As they are small they are easily carried. It is surprising how much of your day can be utilized this way.

**Programme**

9. Map out a programme for yourself; set targets and *achieve* them. One thing is certain, studying is not easy but it is *not* too difficult if you go about it in an orderly purposeful way. Many students fail their examinations through *bad preparation*. Tackle your studies as you would a project at work, *systematically*. Allocate a number of hours each week to each subject. Try fixing *specific times* for each subject, then *keep to them* by refusing to let *anything* keep you from your planned task.

**Revision**

10. Revise periodically. The nearer the examination gets, the more you should concentrate on the major headlines in your notebook and less with the supporting details.

**6.3 Examination technique****First impressions**

1. However well prepared you may be, you are still likely to look at the paper on the day and say to yourself, after a quick look at the questions, “There’s not much *there* I can do”.
2. The atmosphere of the exam room has something to do with this. Try to blot everything from your mind other than the job in hand. *Concentrate* hard. If you feel a bit panicky (most people do – despite the apparent looks of serenity around you) grip the table, take a deep breath, and *get on with it*. Remember things are *never* as bad as they seem!

**Time allocation**

3. *Allocate* each question *time* appropriate to the number of marks. At the end of the allotted time for a question *go on to the next* – remember, the *first* 5 or 10 marks on the *new* question are more readily picked up than the *last* 1 or 2 on the *previous* question.
4. The *temptation* will be to say “I’ll write just *one* more sentence”, but before you know where you are you would have written *several* more and probably just managed to scrape another mark, whereas the same time on the next question could have earned 5 or 6 marks. TIME ALLOCATION IS IMPORTANT.
5. If you *are* running out of time write down the *main headings first*, leaving a few lines between each – at least the examiner will see that you had the overall picture. *Then* go back putting in as much supporting detail as you can.

**General approach**

6. Read the *instructions* at the top of the paper
7. Read the question paper once through. Make your choice of questions quickly. Pick the easiest (if one appears so) and *get on with it*.

**Individual question**

8. Read the question again carefully. The question will involve a key principle or set of principles. What are they? It is so easy to make the wrong decision at this stage, so read the question, underlining what appear to be the *key words*. This should help you. Irrelevancy has been heavily criticised by examiners.
9. Do not rush into action with your pen *yet*. Jot down on a piece of scrap paper the *main headings* you will use in your answer. All this will take time – about 5 minutes or more, but the *careful thought* and outline answer represents *marks* already earned.
10. If the question is *set out* in a particular sequence, that is:
  - a. ....
  - b. ....
  - c. .... etc.
 then answer it *in that sequence* or you’ll have a *hostile examiner* to cope with.
11. Use the particular terminology *used in the question*, the examiner can then *link the points* in your answer to the relevant parts of the question.
12. Assumptions are sometimes required (for example because of the lack of standardisation of terminology in this subject). Having stated your assumptions, make sure that what you write is *consistent* with them. Do ensure, however, that your assumptions *are valid* and are *not* just a device for changing the *meaning* of the question to suit your knowledge!

**Layout of answer**

13. Tabulate where appropriate, using block capitals for your main headings and underline subheadings. Underline *words* or phrases which require emphasis. *Use a ruler*.
14. Leave a line *between* your paragraphs and subparagraphs. This makes for a *good* layout. However, do *not* write one very other line within paragraphs, or on one side of the paper only – examiners are waste conscious!
15. The use of different colour pens, where appropriate, is useful but do not overdo it. In fact one black and red felt-tip pen would be sufficient (use the felt-tip pens which have a *fine point*).

### **Charts and diagrams**

16. A descriptive heading or title must be given to each diagram (using the one in the question if indicated).
17. Do not squeeze a diagram into a corner – *spread it out*.
18. Do not clutter your diagram up with too much detail – this defeats the object, which should be clarity.
19. Give a *key* to the symbols and the different lines you've used, and again – use a ruler.

### **End of examination procedure**

20. Have a quick look at each answer, checking for grammatical errors and badly formed letters.
21. Ensure each answer sheet has your *number* on it and *do not* leave any lying on the table.

### **Conclusion**

22. Good technique plays a *large* part in examination success; this is a *fact*. *Refuse* to be panicked, keep your head, and with reasonable preparation you *should* make it.
23. Remember – you do not have to score *100%* to pass.
24. A final point; once you're in the examination room *stay there* and make use of every minute at your disposal.
25. Practice your technique when answering the questions set in the manual.
